NSE IFSC and SGX Launch Negotiable Large Trades

Our Bureau

Mumbai: The National Stock Exchange (NSE) - Finance Services Center (IFSC) on Monday introduced a new facility through which clients of Singapore Exchange (SGX) can execute Negotiable Large Trades (NLT) through Gift City. This marks the first phase in operationalising the proposed NSE-SGX connect from Gift City, Gujarat.

Negotiable Large Trades are typically large trades pre-negotiated between the buyer and seller. Unlike normal trades, where exchange servers match a buy and sell order, NLTs are trades are negotiated between two parties after which they are executed on the exchanges.

This new product is a part of the proposed IFSC connect between NSE and SGX where eventually all the India related orders on SGX platform will be routed to NSE IFSC for execution.

The connectivity is expected to become fully functional by July-August this year, market participants said.

The much awaited NSE IFSC-SGX Connect at Gujarat International Finance Tech City (GIFT City) commenced operations today.

"The Connect is expected to go live in July 2022, with the onboarding of SGX Group's members," NSE said in a press statement.

This so-called Connect is a framework between NSE's subsidiary in GIFT International Financial Services Centre (IFSC) and Singapore Exchange. Via this connect, clients, investors and trading members of SGX who used to trade in NSE listed Indian securities through SGX would now trade in these securities through NSE IFSC.

This will help in transitioning the liquidity pool away from SGX to India's so-called foreign jurisdiction. IFSC is a tax holiday zone, at par with finance centres in Dubai, Singapore, Hong Kong. However, the contracts will be settled at the exchange where the investors are coming from. Meaning in the initial years the revenue from these trades will mostly go to SGX.

On Monday, the two exchanges successfully introduced Negotiable Large Trades (NLT) from Singapore Exchange (SGX Group) in GIFT City. NLT is an off-market trading facility that allows trading participants or their clients to arrange and transact orders of a defined large size away from the trading system.

NLT for Nifty Futures would be in the lot size of 50.

"This is the first phase in the operationalization of the NSE IFSC-SGX Connect which is expected to contribute significantly to the development of markets in GIFT City," NSE said.

NSE IFSC started operations in 2017 and by May 2022 they have 60 officials working on the payroll.

"NSE IFSC has a full-fledged office at Gift city and resources are operating from Gift city," a spokesperson for NSE IFSC said.

NSE IFSC-SGX connect commences operations at GIFT City; Know about this Facility

NSE IFSC has successfully introduced negotiable large trades from Singapore Exchange in GIFT City

16 May 2022

NSE IFSC on Monday said it has commenced the much-awaited NSE IFSC-SGX Connect by introducing negotiable large trades (NLTs) from the Singapore Exchange (SGX Group) in the GIFT City. This is the first phase in the operationalisation of the NSE IFSC-SGX Connect, which is expected to contribute significantly to the development of markets in GIFT City.

"NSE IFSC has successfully introduced Negotiable Large Trades (NLT) from Singapore Exchange (SGX Group) in GIFT City, marking the commencement of the NSE IFSC-SGX Connect," NSE IFSC said in a statement.

Negotiable large trade (NLT) is an off-market privately negotiated trading facility that allows trading participants and their clients to arrange and transact large-sized orders away from the trading system. NLT is transacted off the exchange's electronic trading facility but is subsequently reported to the clearing house.

Through the NSE IFSC-SGX Connect, which is a framework between NSE's subsidiary in GIFT IFSC and the Singapore Exchange, the SGX trading members, their clients and investors who used to trade in NSE-listed Indian securities through SGX would now trade in these securities through NSE IFSC.

The Connect's foundation was laid in August 2019 when the National Stock Exchange and the SGX Group entered into a collaboration agreement to create a unified liquidity pool for Nifty products in GIFT City via an innovative Connect model. "The Connect is expected to go live in July 2022, with the onboarding of SGX Group's members," NSE IFSC said in the statement.

NSE Managing Director and CEO Vikram Limaye said, "Today is a historic moment for NSE IFSC with the commencement of the much-awaited NSE IFSC-SGX Connect. We are committed towards developing GIFT-IFSC as India's premier financial services centre and a gateway for global financial flows."

He added that the NSE IFSC -SGX Connect is a strategic partnership with SGX Group in an innovative, first-of-its-kind structure and will help develop the exchange and the capital markets ecosystem in Gift City IFSC and contribute towards fulfilling the vision of Atmanirbhar Bharat as envisaged by our Honorable Prime Minister of India.
