We are positively poised for the forthcoming growth phase

Krishna Kumar Karwa

FY17 emerged to be an eventful year for India. Your views on the year gone by?

Fiscal 2017 truly embodied a warrior on a mission of relentless reforms, with 'progress' as its steadfast end goal. Energy levels were almost unprecedented with a host of unanticipated government policies imprinting the landscape of this country. For an already resolute government at the center, the UP elections arrived as a stimulus, with its hold gaining dominance, making passage of reforms an uncomplicated affair. Mounting political stability and nimble swing of reforms from germination to implementation were both instrumental in elating investor perception of India. The year turned out to be a landmark one for BJP, with its sweeping victory in 5 out of the 9 state elections held during this period. However, their triumph in UP, a state that roofs nearly 20% of India's population, emerged to be colossal by far.

Generous monsoons, following two years of drought like conditions lifted rural sentiments and catapulted food grain production to a record high. Government policies aided this further, thus easing overall inflation and curtailing import dependence towards agro commodities in fiscal 2017. The first half of the year saw a resuscitating rural economy; however, the impetus was deterred with the announcement of demonetization. The initial tremors of demonetization were sensed until January 2017, with dipping production, greater loss of jobs in the unorganized sector & across casual labor, plummeting real estate sales, a multi-decade low

credit growth and surplus liquidity with banks. However, once the initial knee jerk reaction to demonetization waned out, consumption has shown signs of recovery and the same is likely to gain momentum in the current fiscal. Demonetisation of specified bank notes and GST implementation are expected to present long standing gains in the form of transformation of the unorganized economy into an organized one.

The year also saw the enactment of the Insolvency and Bankruptcy code that shall be instrumental in providing a unified framework for resolving matters pertaining insolvency and bankruptcy. In the longer run these reforms would translate into improved tax compliance, higher GDP growth and lower inflation, while laying a strong foundation for our country's future growth.

The capital markets rewarded concentration of power at the centre by augmenting nearly 17% in fiscal 2017, despite the insubstantial performance of corporate India. The other significant events that fed to this rise were demonetization- with inundation of flows in mutual funds and drying out of Trump expectations.

Broadly, the Indian Government undertook several landmark reforms that shall be the harbingers of sustainable growth in the years to come.

What is the outlook for India over the course of the next two years?

We behold a highly optimistic view for India. A strong GDP growth, a sturdy currency and the fiscal deficit and current account deficit, being where

they are, are a culmination of the efforts that the Indian government has put in terms of advancing the economy forward. In time to come, all the efforts of the last three years should yield benefits. The next two years, in particular, will see immense thrust from the government in terms of delivering on what they have promised, chiefly leveraging on the efforts that they have put in the previous three years.

Our sense is that remonetisation, reflationary government policies and favorable geo-political scenario would recuperate corporate performance. The focus of the Central and the State governments towards revival of rural consumption that dominates close to 55% of the total consumption in India, along with higher seeding of Aadhar under DBT is likely to lead to faster conduction of government policies to its target audience. The Government's intent of doubling farm income by 2022, would, in most certainty be its priority for the next couple of years. The Centre and States have allocated higher funds towards revival of rural and agrarian economy through MNRGA, PMAY, PMGSY and by way of higher food procurement.

Additionally, with States implementing the 7th pay commission, which would be on a scale larger than one at the Centre, overall consumption should receive a thrust. With higher impetus towards consumption and elevated commodity prices, inflation is likely to remain above the comfort zone. RBI is expected to maintain its neutral stance and has clearly signaled end of the rate easing cycle. Going forward, rising global yields coupled with improvement in corporate performance would most likely harden the yields across tenor.

The government may now be required to focus its efforts towards ensuring that job growth receives a stimulus. Probably a lot of endeavor would now be on that front and we would think that the whole effort on the affordable housing segment is a function of trying to revive the sector, given it is one space that can create a phenomenal number of job opportunities in the system. In the next two years we should also see growing emphasis on urban infra and capexes across the board that would deliver enormous returns to the people of India in the longer run.

How are GST and the global economy likely to impact India?

We believe that replacement of the complicated indirect taxes with the single structure Goods & Services Tax would be a game changing reform for our country. The complexity of input tax credit, exclusion of a few items from the GST gamut and intricacy of the rate structure could make assessment of the overall impact of this reform on the growth prospects difficult. However, in the longer run, the benefits of GST implementation and formalization of the economy are likely to be experienced.

Fiscal 2017 was exposed to some major developments in the global landscape too. UK's withdrawal from the European Union and the US presidential elections were events that left an impression on economies across the globe. With indications of reviving global demand, in particular from the advanced economies becoming visible, there is expectation of some positive spillover effect for India. However, the protectionist measures adopted world over could juxtapose the earlier linkages of advanced economies' growth with that of the rest of the world. These measures are emanating particularly from the wayward US policies targeted at protecting and promoting its domestic industry. Against this backdrop, we believe that India is positioned favorably and its export demand should strengthen further with improving global growth. Also, growing global demand would elevate the global commodity prices translating to higher inflationary pressure.

Do you believe that Emkay is in a

favorable spot given the overall environment?

The Indian equity markets today stand at a threshold of a significant transformation with mounting dominance of domestic players, particularly the mutual fund industry and retail investors. Inflows into mutual funds have continued to remain strongly positive since 2014. This transformation has provided a considerable impetus to mid and small cap stocks, thereby infusing liquidity and depth into Indian stock markets. Net FII inflows to the extent of USD 8.3bn were witnessed in Indian markets, wherein there were outflows of USD 722mn from debt and inflows of USD 9.1bn into equity markets. The turnaround in FII flows are being experienced since Feb'17, with the highest monthly net investment in equity since 2010, of USD 5.1bn in March 2017. Similar observation has been made in the FII debt investment space, which witnessed its highest ever inflow in March.

According to CMIE database, overall, Assets Under Management in fiscal 2017 have inflated nearly 42% to INR 17.5tn, chiefly driven by higher corporate participation that contributed to 50% of this growth. Interest of retail investors has also seen a revival, as indicated by the surge of investor accounts in mutual funds to over 52 mn in Mar'17 from 45 mn in Mar'16. With fixed income investment avenues yielding dismal returns we should see a surge in equity investments in the period to come.

Emkay Global with its rich heritage that spans over two decades stands strategically focused in the midst of the existing global and domestic environment. We are honored and humbled to be bestowed the title of 'India's Most Trusted Brand' by the World Consulting & Research Corporation for 2016-17. MANAGEMENT DISCUSSION AND ANALYSIS

1. Overview of the Economy

With liquidity being a strong channel justifying higher valuations, growth is expected to continue its slow march into the recovery phase. The shifting paradigm of global growth in favour of advanced economies is likely to uphold pressure on the emerging economies to gather momentum or lose their share in the pie. Major events in 2017 that ranged from Brexit to US presidential elections induced considerable volatility in the markets. Rising interest rates the world over, coupled with shrinking balance sheet of Fed makes the outlook on global financial markets highly uncertain.

Against this global backdrop lies India as a focal point, with recovery in growth expected in view of some landmark reforms like demonetisation, enactment of the Insolvency and Bankruptcy Code and various other reforms initiated to improve consumption from bottom of the pyramid, while also leveraging on some spill over effects emerging from the recovering growth of the advanced economies. Now, with global commodity prices bottoming out, the repercussions of the same are likely to be reflected on inflation and current account deficit. Domestic structural impediments continue to pose a hurdle to India's sustainable growth story. Government's efforts to revive growth through consumption are expected to further increase inflationary pressure. Implementation of Goods & Services Tax should advance growth by 70-100bps and also benefit the Tax/GDP ratio in the long run, however in the short term it may induce tremors on inflation.

2. Indian Equity Markets in Fiscal 2017

The Indian capital markets performed remarkably in fiscal 2017 as they spiked nearly 16% YoY after having dived ~10% in the previous fiscal. This rapid rise in the markets was largely an after effect of demonetisation, given the influx of flows in mutual funds, coupled with drying out of Trump expectations.

The Assets Under Management (AUM) in the Indian mutual fund (MF) industry witnessed an exceptional

growth of 42% during the fiscal. Net FII inflows to the extent of USD 8.3bn were witnessed in Indian markets, primarily on the back of higher equity inflows, to the tune of USD 9.1bn. Investments by FIIs into equities and bonds in March hit the highest in about 15 years, even as expectations are rife that foreign investors will likely continue to be bullish on Indian markets given the strong domestic fundamentals.

Other Businesses: Emkay's other service offerings include Commodities, Currency, Investment Banking, insurance et al.

Emkay's Investment Banking division has been successfully advising and raising money for small and mid-market companies for almost a decade. During fiscal 2017, the investment banking team completed two fund raising transactions in the form of Preferential Issues aggregating to ₹ 168 crore for Time Technoplast Limited and OK Play India Limited and also executed a Buyback for Dhanuka Agritech Limited with a buyback size of ₹ 80 crore.

Emkay's focused efforts on the currency derivatives market, paid off handsomely, by clocking overall volumes of 34,971 crore, registering a growth of 110% YoY. We expect to continue this growth trajectory in the current fiscal, given our focus on building a strong corporate client base.

With SEBI having taken over the functioning of the commodity markets, we expect that unified licensing regime would soon be a reality for the broking community, thereby saving on regulatory costs. Also with SEBI's recent nod to introduction of options in commodities, the commodity volumes are expected to see a sharp rise by end of the current fiscal. Revenues from Emkay's commodity business increased to ₹ 34.3 lac in FY17 from ₹ 28.7 lac in the previous fiscal.

MANAGEMENT DISCUSSION AND ANALYSIS

Emkay's Insurance broking arm, Emkay Insurance Brokers Limited (EIBL) offers both life and non-life insurance services to corporate and individuals. In fiscal 2017 the Non-life insurance business contributed 88% of the total revenue while the Life segment brought in the remaining 12%.

Emkay Fincap Limited, a 100% subsidiary, carries out Non Banking Financial activities like financing against shares and margin funding. The amount deployed in margin funding increased to ₹ 3205 lac in FY17 from ₹ 2267 lac in FY16. The Profit After Tax from this business was reported at ₹ 273 lac as against ₹ 288 lac in the previous year.

4. Opportunities & Threats

The Indian equity markets stand at a threshold of a significant transformation with increasing dominance of domestic players, specially the mutual fund industry and retail investors. Inflows into MFs have remained strongly positive since 2014 with roughly ₹ 3000 crore of net inflows per month. With this the contribution of domestic institutions in secondary market volume has increased to nearly 50% from 30% three years back. This transformation has provided a considerable fillip to mid and small cap stocks, thereby enhancing liquidity and depth of the Indian stock markets.

Emkay Global, with its dominance across a wide array of company coverage and with a 2.5-3% market share in the pie of domestic institutional business stands to gain considerably from this transformation. Emkay's tie-up with DBS Singapore during the year will enhance its ability to tap into the opportunities that lie ahead. In particular, this collaboration will strengthen our reach to capture greater market share in global business.

5. Future Outlook

Global growth suggests signs of stronger activity in most advanced economies and easing of recessionary conditions in commodity exporting large emerging

market economies. International financial markets have been impacted by policy announcements in major advanced economies, geo-political events and country-specific factors. Equity markets in advanced economies were driven by reflation trade, stronger incoming data and currency movements while that of emerging market economies had a mixed performance reflecting domestic factors amidst surge of capital flows. The pick-up of global trade activities led by recovery in advanced economies is likely have a positive spill-over impact on India, notwithstanding the limiting influence of protectionism.

On the domestic front, revival post demonetisation, focus on restoration of the depressed rural economy and adoption of the 7th pay commission by States should drive growth in fiscal 2018. The focus of the centre to double farm income by 2022 is likely to be the focal point of government's major policies. The government is likely to escalate spends towards MNREGA, housing for all and hike the Minimum Support Price amongst other measures. Loan waivers announced by few of the States are also likely to give an impetus to consumption. Downside risks to the projected growth path stem from the outturn of the south west monsoon.

With renewed focus of the government to revive slouching domestic demand, private consumption is likely to be the main driver of growth in fiscal 2018. Domestic policies that reinforce the macro-economic fundamentals should likely aid coping up with external vulnerabilities particularly arising from sudden volatility in external flows.

Several favourable domestic factors like remonetisation will continue to trigger a rebound in discretionary consumer spending; transmission of past policy rate reductions into banks' lending rates post demonetisation should help encourage both consumption & investment demand; budgetary focus on stimulating capital expenditure & rural demand and roll out of structural reforms such as GST would all invigorate economic activity.

INDEPENDENT AUDITOR'S REPORT

Meaning of Internal Financial Controls Over Financial Reporting

6. A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2017 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ON CONSOLIDATED FINANCIAL STATEMENTS

ANNEXURE "A" TO INDEPENDENT AUDITOR'S REPORT OF EVEN DATE TO THE MEMBERS OF EMKAY GLOBAL FINANCIAL SERVICES LIMITED ON THE CONSOLIDATED FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31st MARCH, 2017

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

1. In conjunction with our audit of the Consolidated Financial Statements of the Company as at and for the year ended 31st March, 2017, we have audited the Internal Financial Controls over financial reporting of EMKAY GLOBAL FINANCIAL SERVICES LIMITED (hereinafter referred to as "the Holding Company") and its subsidiary companies as on that date.

Management's Responsibility for Internal Financial Controls

2. The respective Board of Directors of the Holding Company and its subsidiary companies are responsible for establishing and maintaining Internal Financial Controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's Internal Financial Controls over financial

reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of Internal Financial Controls, both applicable to an audit of Internal Financial Controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate Internal Financial Controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the Internal Financial Controls system over financial reporting and their operating effectiveness. Our audit of Internal Financial Controls over financial reporting included obtaining an understanding of Internal Financial Controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's Internal Financial Controls system over financial reporting.

INDEPENDENT AUDITOR'S REPORT ON CONSOLIDATED FINANCIAL STATEMENTS

Meaning of Internal Financial Controls Over Financial Reporting

6. A Company's Internal Financial Control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with Generally Accepted Accounting Principles. A Company's Internal Financial Control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Financial Statements in accordance with Generally Accepted Accounting Principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the Financial Statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7. Because of the inherent limitations of Internal Financial Controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the Internal Financial Controls over financial reporting to future periods are subject to the risk that the Internal Financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Holding Company and its subsidiary companies have, in all material respects, an adequate Internal Financial Controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
