Management Discussion and Analysis Report

INDUSTRY STRUCTURE AND DEVELOPMENT

Your Company is primarily engaged in the businesses of storage infrastructure viz (a) storage facilities for handling bulk storage of liquid commodities such as edible oils, petroleum products, liquid chemicals etc. and (b) agricultural warehousing facilities for storing commodities such as, wheat, cotton, soybean etc. The company has also significant investments in renewable energy sector as a part of infrastructure business, with a view for expansion.

In recent year Company has made strategical shift for business expansion of its warehousing division. With more than 11 lacs square feet of warehouse space in heart of the country, the Company is inclined to unlock the value and potential of its warehousing infrastructure to logistic solution providers along with the conventional agri business line. Warehouse business vertical which was predominantly utilized by State Government is now optimally utilized by various other private business organizations and MNCs for many Non-Agri Products including Logistic companies, training institute, White goods company, automobile company, FMCG etc.

This has not only resulted in 30-40% growth in revenue but also helped company achieve true warehouse & logistic infrastructure branding, despite the challenging domestic economy.

Although the overall volumes of trade in our liquid storage business have been resilient. However, keeping in view the growing domestic demand and low commodity prices, the demand for bulk storage of liquid commodities at port based locations is expected to increase to cater to the growing imports in the near future.

As regards storing of commodities such as wheat, soybean, paddy etc, the demand has been fluctuating due to various factors including commercial parity, demand – supply of individual commodities at various points in time, cost of storing vis-a-vis benefits etc. Due to intense competition, conservative policies for state owned warehouse and lack of commercial parity, the demand for storage has been subdued during the year under review, still with the fortified approach of diversification to logistic driven services, the company is confident of scoring better results for FY 17-18. Keeping in view the focus of the Indian Government on the rural economy and the farm sector and the expectation of improved weather conditions leading to better crop production, the demand for storage facilities in rural areas is likely to increase in the current year but company is not waiting for the same and leveraging its strategic locational advantage by expanding base of Non agri clients.

Company's Renewable Energy business is very stable and continuously generating stable return as well as contributing to fight pollution for 10 years. Company also has expanded the renewable energy business through a subsidiary and this new project is also stabilized and generated expected returns. Now with total group capacity of 25+ MW Company has significant portion of revenue coming from Renewable Energy business. The projects are tied up with long term PPAs of 20-25 years and expected to generation good cash revenue in future.

INDUSTRY OUTLOOK

There is a vast gap in the quantity of agricultural produce and the available storage. This is not only resulting in over supply but also a churning in the market. Company has converted this churning as well as oversupply from challenge to opportunity in the warehouse space. In case of Liquid terminals there are systemic gaps both in terms of capacity and integration. Despite the obvious need for improvement and new government initiatives to stimulate growth, private investment is in short supply for reasons such as lack of knowhow and trained manpower, lack of backward & forward linkages to supplement value chain, high capital outlay, high operational costs due to high cost of power, lack of two way cargo movements, connectivity, infrastructural bottlenecks, efficient utilization of fleets etc resulting in low returns and long pay back period.

Also, the expected increasing volumes of global trade entail a strong demand for growing storage infrastructure needs, at the port based areas for commodities such as petroleum products, edible oil, liquid chemicals, oil seed extractions etc and at the in land areas for storage of various commodities to cater to the growing economy and demand.. The long term potential for growth in this sector is, therefore, promising and the demand for storage infrastructural requirements is likely to increase considerably in future.

Renewable Energy outlook has also changed due change in Govt. power procurement policy and tariff rates of power are also reduced. But with reduction in capital cost and efficient products we see good opportunity in the renewable energy space. There are good developments in solar (ground mounted as well as roof top) solar as well.

BUSINESS STRATEGY; OPPORTUNITIES AND THREATS

Growth in production and consumption and GST which is beyond doubt going to benefit the logistic and infrastructure businesses like us, further, organized retail outlets across India, logistics outsourcing, increased agricultural production, food security initiatives and the demand for storage infrastructure is expected to grow significantly in the coming years. Company has already started expansion activity in the warehouse space and looking to expand the capacity at its premium locations, where the demand is more. Also, the demand for storage facilities at port based locations for storage of edible oils, petroleum products, liquid bulk chemicals etc. has also been growing. Your Company has storage infrastructure facilities at various strategic locations Our storage facilities are well connected to the railways to enable long distance supply and the port based facilities are integrated with ports to facilitate transportation by pipelines. Thus company is trying to increase the utilization factor of the liquid storage terminal while keeping in view good demand for liquid storage facilities at port based areas.

The Company is refocusing and reenergizing in consolidating its core infrastructure business and scaling down non core businesses such as supply chain activities which are subject to challenging commodity cycles, changing business dynamics, volatility in commodity prices, etc. The Company is also in the process of realigning its core infrastructure businesses portfolio for a potential value creation and rebalancing in agricultural storage businesses to ensure that the assets are exploited to the maximum potential possible and steeping up the investment in renewable energy sector to generate better return on capital employed for the company as a whole, on a sustained basis. The other investments of the company are also being reviewed for opportunities to unlock value, from time to time. No major change in man-power/HR domain is anticipated.

Management Discussion and Analysis Report (Contd.)

RISKS AND CONCERNS

Government policies play an important role in the business of your Company. However, the policies announced by the Government have been progressive in the infrastructure segment and are expected to remain so in future considering various factors including the infrastructural needs, demand-supply gap, inflation, economic growth and equitable view towards various stakeholders. Company is also concerned about the over capacity of the warehouse space in central India and also the duty structure of the imported edible oil.

INTERNAL CONTROL SYSTEMS AND ADEQUACY

The Company's internal control systems are adequate and ensure that all corporate policies are strictly adhered to and that transparency is maintained at all levels and functions throughout the organization. Systems have been put in place at all levels to ensure optimum usage of resources and to minimize risks across all activities undertaken by the Company. The internal control systems are designed to ensure the safety of all assets of the Company and also to ensure that all transactions are carried out as per the documented policies, guidelines and procedures. The management reviews the potential risk factors on an ongoing basis and appropriate measures are taken to mitigate the risks. Management is also looking for implementing integrated HR system in coming year to bring more transparency among its team members and associates

ENERGY CONSERVATION

Energy costs have steadily risen over the last decade and are expected to carry on doing so as consumption grows. Energy efficiency programmes help us to reduce and manage energy costs, at the same time it is a step towards green environment and checking global warming. Your Company has taken initiatives towards energy conservation as mentioned here below:

1. To achieve optimum utilization of all energy equipment, all conventional electric motor starters have been replaced by Variable Frequency Drives (VFD) which results in smooth operation and reduced energy bills.
2. Conventional lighting fixtures have been replaced with energy efficient LED fittings.
3. To optimize the overall energy consumption, and to achieve reduction in electricity expenses, power factor controllers are being installed.
4. We have adopted a scientific approach to ascertain the illumination level required in storage facilities, office buildings and other relevant areas. By doing so the overall number of light fixtures have been rationalized and thus the cost saving has been achieved.

Apart from above basic energy conservation program which company has undertaken we are pleased to announce that from current year your company has become net Green energy positive. This company has generated more green energy than brown energy it has consumed in the same year. Further, company is looking to further improve it by putting up rooftop solar power. It has already started studying the roof top solar power opportunity in its warehouse and terminal facility and will start working on it.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Independent Auditors' Report (Contd.)

Annexure A To the Independent Auditor's Report of even date on the Consolidated Financial Statements of Ruchi Infrastructure Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended 31st March, 2017, we have audited the internal financial controls over financial reporting of Ruchi Infrastructure Limited ("the Holding Company") and its subsidiary companies which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding company and its subsidiary companies which are companies incorporated in India are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and obtained by other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company and its subsidiary companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our aforesaid reports under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to three subsidiary companies, which are companies incorporated in India, is based on the corresponding reports of the auditors of such companies incorporated in India.
