**FIVE-DECADE RICH LEGACY
COMMITTED TO EXCEL**

FINANCIAL HIGHLIGHTS 2017-18

Established in 1965, Century Enka Limited (CEL) is committed to quality, innovation and fair business practices for complete customer satisfaction.

The Company manufactures synthetic yarn – Nylon Tyre Cord Fabric (NTCF) that find its application in making bias tyres, and, Nylon Filament Yarn (NFY) that find its application in making sarees, dupattas, dress materials and athleisure among others.

Plans are afoot to use its existing fabric capacities and dipping facilities to offer Polyester Tyre Cord Fabric (PTCF) that will find its application as a reinforcement material in radial passenger vehicle tyres.

Its manufacturing facilities located at Rajashree Nagar, Bharuch (Gujarat) and Bhosari, Pune (Maharashtra) are equipped with state-of-the-art manufacturing technology. With continuous innovation, the Company has consistently delivered new and high-quality products. Today, it enjoys a strong presence in both NTCF and NFY products.

BUSINESS PROFILE

Nylon Tyre Cord Fabric (NTCF)

Application

Bias tyres

USPs

- Preferred NTCF supplier to leading tyre manufacturers
- Best-in-class technologies
- End-to-end integration

Industry opportunities

- Despite increasing radialisation, there is going to be a sustained demand from the non-radial tyre segment like medium and heavy commercial vehicles (MHCV), off the road vehicles (OTR), Two Wheelers and Three Wheelers

Nylon Filament Yarn (NFY)

Applications

- Used in making fabrics for sarees, dupattas, dress materials, athleisure
- Very versatile to blend with other yarns

USPs

- Strong position in the industry
- Wide dealers network to serve small weavers
- Sells to fabric manufacturers that supply fabric to the bigger end users
- Converted polyester spinning capacities to nylon spinning capacities for better asset utilisation

Industry opportunities

- Increasing disposable income and aspirations will lead to higher spends on clothes
- Listed retailers and e-commerce clothing segment is consistently witnessing around 15% growth

Polyester Tyre Cord Fabric (PTCF)

Application

Passenger vehicle tyres (cars, utility vehicles and van)

USP

- Fabric with uniform cord distribution
- Ultra low shrinkage

Industry opportunities

- PTCF has an estimated annual domestic demand of 15,000 TPA. Out of these, only 4,000 TPA is produced in India and the rest is imported mainly from China and Thailand
- Demand of PTCF to grow with increase in demand of car

DIRECTORS' REPORT

FOR THE YEAR ENDED 31ST MARCH, 2018

Dear Shareholders,

Your Directors present the 52nd Annual Report and Audited Financial Statements of the Company for the year ended 31st March, 2018.

Profit for the year was impacted due to inventory losses resulting from sudden drop in raw material prices in the first half of the year, and lower margin in case of Nylon Filament Yarn (NFY).

FINANCIAL RESULTS

₹ / Lacs

	This Year	Previous Year
Net Revenue from Operations (Net of Excise Duty)	141648	118531
Profit before Depreciation, Finance Cost, Exceptional Item and Tax	12946	19736
Add / (Less) :		
Depreciation	(4194)	(4237)
Finance Cost	(340)	(562)
Exceptional Item (Note 1)	2491	(958)
Taxation (Net)	(3894)	(4882)
Net Profit	7009	9097

Note 1: Exceptional item in this year represents profit on sale of property and in previous year impairment loss for some polyester spinning machines.

DIVIDEND

We recommend a dividend at the rate of 70% (i.e. ₹ 7.00 per Equity Share of ₹ 10/- each) for the year ended 31st March, 2018 (Previous year dividend at the rate of 70% i.e. ₹ 7.00 per equity share of ₹ 10/- each).

TRANSFER TO RESERVES

It is proposed to transfer ₹ 900 lacs (previous year ₹ 900 lacs) to General Reserve.

COURSE OF BUSINESS

The Management's Discussion and Analysis Report as required under the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 is forming a part of this report and gives the state of affairs of the business of the Company.

The business reengineering undertaken over the past few years, continued this year as well. Your Company converted polyester spinning machines into nylon spinning machines with strong in-house technical support. As a result, your Company has emerged as a market leader in the Nylon Filament Yarn market which is fragmented with large number of small size spinners. Your Company is further focussing on value added products such as

dope dyed, deep dyeable yarn and textured yarn and on exports to maintain its competitiveness in the market.

Nylon Tyre Cord Fabric (NTCF) plants at both the Sites are operating at full capacities. The levy of antidumping duty on import of radial tyres and increase in custom duty on NTCF imports have helped in stabilisation of demand for domestic NTCF. Your Company is making efforts to increase customer base including exports and diversify product portfolio by entering into Polyester Tyre Cord Fabric market, thus diversifying its product base.

Your Company is constantly pursuing increase in raw material supply sources to reduce lead time for supply of raw material as well as insulate itself from the raw material price fluctuations, as much as possible.

High energy cost continued to be matter of concern. Continuous efforts are made to procure cheaper power. Your Company has concluded a long-term Open Power Purchase Agreement effective from 6th April, 2017 for its Bharuch site resulting in savings in power cost.

EXCISE DUTY DEMAND

The Company has filed an appeal against the order of Commissioner of Central Excise for the alleged excise duty demand of ₹ 22927 lacs, equal amount of penalty and interest on duty amount, before Customs, Excise and Service Tax Appellate Tribunal (CESTAT) Mumbai, denying benefit of Notification No. 6/2000 CE dated 01.03.2000 for specific excise duty. The appeal has been admitted and, on pre-deposit of ₹ 700 lacs, the stay has been granted. Your Company has been advised by the legal experts that it has a fair chance of ultimately succeeding in the matter and, accordingly, no provision is required to be made for the same.

EXPANSION AND MODERNISATION

Your Company continues to enjoy its leadership in Nylon Filament Yarn in terms of product range, quality parameters as well as in volumes. In order to further consolidate its position into value added segments, the Company proposes to install additional Air Texturising capacity. Besides, it will also undertake conversion of additional polyester spinning machines into nylon spinning machines to enhance its production capacity.

As reported last year, your Company continuous to pursue diversifying its product range by offering dipped Polyester Tyre Cord Fabric. It is also exploring possibilities of offering dipping services for Rayon Tyre Cord Fabric. Your Company is also pursuing to fully integrate its NTCF capacity and shall approach the Government authorities for requisite permissions to implement these facilities.

Your Company is constantly endeavouring to become energy efficient and has initiated steps to replace some of the old equipment to reduce the energy cost.

HEALTH, SAFETY AND ENVIRONMENT

The report on Management's Discussion and Analysis includes observations on health, safety and environment compliances by the Company.

Both the Plant sites of the Company are environment regulations compliant.

CONSERVATION OF ENERGY, TECHNOLOGY ABSORPTION, FOREIGN EXCHANGE EARNINGS AND OUTGO

MANAGEMENT'S DISCUSSION AND ANALYSIS

1. OVERALL REVIEW

The first half of the financial year 2017-18 was quite challenging for the Company. A significant drop in raw material prices and the introduction of Goods and Services Tax (GST) from 1st July, 2017, adversely impacted the deliveries of Nylon Filament Yarn (NFY) for nearly 3 to 4 months, thus affecting the profitability. The second half of the year witnessed a good recovery due to the proactive initiatives by the Management.

The key highlights include:

Increase in turnover by 19%, from ₹ 1185 Crs. to ₹ 1416 Crs., owing to additional NFY sale resulting out of higher production from conversion of polyester spinning machines into nylon spinning machines at Bharuch plant.

Satisfactory performance of the Nylon Tyre Cord Fabric (NTCF) owing to steady demand from the tyre companies.

Enhanced focus on NFY product diversification and introduction of value-added products to maintain the competitive edge in the market.

Realised positive value potential from the newly installed Air Texturising and Draw Texturising machines towards the end of the year. The Company is expected to consolidate its position further in the NFY products.

Commissioning of new twisting machines and looms at Bharuch plant to increase conversion capacity of NTCF, thus, enabling the Company to increase production of NTCF.

Overall performance for the year is considered to be satisfactory under given circumstances.

2. INDUSTRY STRUCTURE, DEVELOPMENT, THREATS, OPPORTUNITIES & OUTLOOK

Industry Status:

NTCF finds its application as a major reinforcement material in bias tyres for heavy commercial vehicles, farm and mining vehicles, 2-wheelers and 3-wheelers. The usage of steel tyre cord as reinforcement material in passenger and heavy commercial vehicles is rising owing to improvement in road conditions and strict compliance of overloading laws. However, the Company expects the NTCF usage to continue with marginal growth driven by farm and mining vehicles, 2-wheelers and 3-wheelers. In the long run, the percentage of usage of steel radial tyre cord would continue to be on the rise.

During the year 2017-18, the Government of India increased the custom duty on NTCF imports from 10% to 20% and imposed anti-dumping duty on radial tyre imports that has resulted in demand stability for the domestic NTCF producers. Apart from that, there exist anti-dumping duties on NTCF imports from certain countries. To circumvent levy of anti-dumping duty, significant imports of NTCF are coming in from FTA (Free Trade Agreement) countries with zero / concessional duty. This continues to put pressure on NTCF margin.

With better disposable income in the hands of middle class and ever-changing fashion requirement of young Indians, NFY is witnessing steady growth by virtue of its feel and luster quality. While NFY continues to enjoy preference in saree, dupatta and dress material, its substitution in silk and VFY may provide an opportunity to increase consumption.

Profitability of NFY continues to remain under pressure owing to raw material price volatility, competition from fragmented small and medium producers and imports from FTA countries, which caters about 20% of total consumption of NFY in India.

Company Status:

The Company witnessed full capacity utilization of NTCF at both Pune and Bharuch Sites. Trials were carried out for dipping of Polyester Tyre Cord Fabric. It is heartening to state that the samples of dipped Polyester Tyre Cord Fabric provided to the tyre companies have been approved. Encouraged by this successful trial, the Company is planning to consider commercial proposition for converting Polyester Tyre Yarn into Dipped Polyester Tyre Cord Fabric.

Additionally, the Company is also pursuing to provide dipping services for Rayon Tyre Cord Fabric and proposes to undertake first trial very shortly. Once successful, it would commercially explore this proposition as well.

Despite increasing competitive NTCF market due to imports, the Company has been able to maintain its market share. The Company is pursuing to fully integrate its NTCF capacity to strengthen its competitive position.

The Company, with a view to diversify its customer base, has started looking into export of NTCF and is pleased to share that the first export consignment has met with quality standards set by tyre companies. The Company would continue to diversify customer profile to reduce dependency risk.

As reported in the last balance sheet, the Company has successfully converted few of its Polyester Spinning machines at Bharuch Site into Nylon Spinning machines, which has enhanced NFY capacities by about 10,000 M.T. per annum. The Company expects to increase its market share from 19% to 22% in the year 2018-19.

With a vision to establish the Company as a leading exporter of NFY, the Company targets exports of its value-added NFY. It is heartening to state that it has received favourable response. The Company expects to substantially capitalise on this opportunity and increase its exports. It is also working with organised sector customers as a preferred supplier of premier NFY products.

With a view to avoid impact of raw material price volatility, the Company has strengthened raw material inventory management and cost control system. The system would effectively monitor prices of its main raw materials i.e. Caprolactam and nylon chips, and mitigate the risk from any unfavourable price movements.

Company Outlook:

With successful GST implementation, which brought nationwide uniform tax structure, a level playing field has been offered to companies like ours to improve its competitive position against unorganised NFY producers. This would pave way for better stability in price and maintaining the margins.

With focus on enlarging customer base and integration of NTCF capacity the Company expects optimum capacity utilisation.

Despite concerns on account of impact of volatility of raw material price and dependence on raw material imports coupled with NTCF and NFY import from FTA countries at zero/concessional import duties, the Company is cautiously optimistic of its improved performance. The optimism is largely driven by its thrust on diversification of product profile and consolidation of value-added products.

3. RISK MANAGEMENT

Risk Management is an important business aspect in the current economic environment. Its objective is to identify, monitor and take mitigation measures on a timely basis with respect to the unforeseen events that may be potential business risks.

The Company has a robust Risk Management Policy and Procedure in place for effective identification and monitoring of risks and implementation of mitigation plans. The Risk Management Committee reviews and monitors the identified risks and mitigation plans at regular intervals. Some of the risks identified and analysed by the Management are as under:

(a) Dependency on imports of raw material coupled with high volatility in prices:

GSFC is the sole domestic manufacturer of Caprolactam. Hence, entire Nylon industry is dependent on imports. This results in higher inventory carrying cost and a risk of additional cost due to currency fluctuations. The Company is continuously working on increasing its supplier base to reduce cost and lead time and ensure uninterrupted supplies. The Company simultaneously reviews its policies and practices to adjust the inventory levels of both raw materials and finished goods to reduce the impact of volatility in raw material prices while ensuring availability of sufficient stocks for optimum production plans and supply of finished goods.

(b) High Energy Cost:

The Company is continuously evaluating various options including power purchase under open access to reduce the energy cost of Pune and Bharuch plants. The Company is further putting up a new Briquette Boiler of 15 TPH to reduce the steam cost at its Pune plant.

The Company operates captive power plants as and when the power generation cost through Furnace Oil and / or Gas becomes viable.

Continued efforts and investments are made to reduce power consumption and bring down the overall power cost.

(c) Technology Risk:

Technology obsolescence may adversely impact the production process and technical support from original equipment manufacturers. The Company regularly undertakes re-engineering for improvisation and efficiency improvement.

The Audit Committee and the Board are apprised of the significant risks and mitigations efforts made by the Management in its quarterly meetings.

4. HEALTH, SAFETY, ENVIRONMENT AND SUSTAINABILITY

The Company gives foremost importance to Safety, Health and Environment and strives relentlessly on cultivating and improving safe work culture, health awareness and environment protection.

Safety:

The Company has adopted the safety culture among its employees and extended the same to its contractors, service providers, suppliers and neighbouring industrial units. It aims to bring about a cultural change and hence considers safety as the top priority.

To achieve this objective, various training programmes such as basic fire fighting, mock fire drill, case studies to learn and improve existing practices, emergency plan, shop floor training, safety promotion and motivation activities are regularly conducted. More than 95% work force participated in fire fighting training.

The Company also continues to impart accident prevention and fire fighting training to workmen of neighbouring small and medium size industries of its Pune and Bharuch plants. Pune plant attended four emergency fire fighting calls from Municipal Corporation of Pimpri Chinchwad in 2017-18 and Bharuch plant attended seven fire fighting calls from neighbouring units.

In order to further promote the safety measures among the workforce, the Company organised various safety contests round the year and rewarded the winners with prizes.

A monthly 'Safety Bulletin' is taken out in English, Hindi and regional language for circulation among employees.

Safety audits are conducted at regular intervals which inter-alia covers noise level, hazard identification and plant risk analysis.

Bharuch plant is awarded with a certificate of honour for the year 2017 from National Safety Council for maintaining good safety culture among textile industries in India.

Health:

Periodical health check-up are conducted across the workforce. More emphasis is given to cleanliness, workplace hygiene and good house-keeping. First-aid trainings are imparted from professionally qualified personnel and doctors. Regular lectures are organised on health awareness.

A booklet containing work specific health risk management in English, Hindi and local language is taken out for circulation among the employees.

Occupational Health & Safety Management System of Pune site is certified by international body as BS OHSAS 18001:2007.

Environment and Sustainability:

The Company follows a structured environment risk management approach which encompasses identifying potential environmental risks, assessing their potential impact, mitigating them through timely action and continuous monitoring.

Some of the major thrusts given by the Company on environment related issues include:

- Re-cycling of manufacturing waste and its eco-friendly disposal
- Extending use of treated water from effluent water treatment Plant
- Utilising solar energy for tube well
- Substituting fossil fuel oil for boiler with bio fuel
- Installing STP with softener for sewage water treatment which is further used in cooling tower makeup
- Utilising zero ozone depleting substance as refrigerants

The Company is continuously working on possibility of using appropriate technology to reduce the hazardous waste generation.

The Company's Pune plant has been certified by international certification body as ISO 14001:2015 compliant for Environment Management System.

The Company's products NFY and NTCF have been approved as eco-friendly and fulfilling requirement of European Chemical Regulation REACH as well as ECHA SVHC. NFY has also been approved by OEKO TAX as eco-friendly.

The Company's efforts on sustainability has received a stamp of approval by Maharashtra Energy Development Agency (MEDA) where the Company's entry was adjudicated first, for energy conservation in textile segment for Maharashtra.

5. HUMAN RESOURCE AND INDUSTRIAL RELATIONS

Human Resource is the back-bone of achieving organisation excellence. The Company continuously strives for improvement of its human resources. It regularly organises various programmes to improve productivity and competency of its employees.

The Company has redesigned performance evaluation system to draw career path of deserving employees and their promotion.

The industrial relations at both the sites are cordial. Regular interaction between the site management and union committees of workman paves the way to understand and cultivate a bonding amongst all.

The strength of permanent employees as on 31st March, 2018 was 1519 Nos. (as on 31st March, 2017 : 1479 Nos.).

6. INTERNAL CONTROL SYSTEM AND ITS ADEQUACY

The Company has a robust internal control system commensurate with the size and scale of its operations. Roles

and responsibilities are clearly defined and assigned alongwith well-structured authorisation matrix. Standard operating procedures are designed to provide a reasonable assurance and are well supported by SAP system. The Company has implemented SAP system to strengthen internal controls and monitoring. Apart from self-monitoring of internal controls, Internal Auditors have also expressed their satisfaction about the adequacy of the internal control systems.

The Audit Committee takes due cognizance of the observations made by the auditors and gives their suggestions for improvement. The suggestions of the Audit Committee are also taken into account for further strengthening of the control systems.

7. INFORMATION TECHNOLOGY

Information Technology is the driving force of the business.

The Company has successfully migrated from home grown ERP to SAP with data analytics that would increase productivity and provide harmonious data for business decision making.

The Company is continuously adopting and utilizing various information technology tools and is in process to implement new age technologies in the sphere of *Internet of Things (IoT) and Robotics*, among others, to improve business process efficiency. Various IT enabled initiatives are being planned to strengthen work efficiency, support business growth and be responsive to the evolving IT scenario.

The systems for adopting GST was successfully implemented by the Company.

Data being very critical, the Company ensures implementation of necessary Information Security measures to protect them.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF CENTURY ENKA LIMITED

Report on the Audit of the Ind AS Financial Statements

We have audited the accompanying Ind AS financial statements of Century Enka Limited ("the Company"), which comprise the Balance Sheet as at 31st March, 2018, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flows Statement for the year then ended, and a summary of the significant accounting policies and other explanatory information (herein after referred to as "Ind AS financial statements").

Management's Responsibility for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards ("Ind AS") prescribed under Section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibility

Our responsibility is to express an opinion on these Ind AS financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the Ind

AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Ind AS financial statements.

We are also responsible to conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify the opinion. Our conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause an entity to cease to continue as a going concern.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including the Ind AS, of the state of affairs of the Company as at 31st March, 2018, its profit (including other comprehensive income), changes in equity and its cash flows for the year ended on that date.

Emphasis of Matter

We draw your attention to Note 44 to the financial statements regarding the Company's appeal pending before CESTAT, Mumbai against the excise duty demand aggregating ₹ 22,927 Lakh plus interest thereon and penalty of ₹ 22,927 Lakh. Based on expert legal advice and merits of the case, no provision has been considered necessary by the Company. The final determination of the cash outflow, if any, would depend upon the final decision of the appropriate authorities in the future. Our opinion is not modified in respect of the matter.

Report on Other Legal and Regulatory Requirements

- As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order.

(Referred to in our report of even date)

- i. (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.
- (b) The Company has a regular programme of physical verification of its fixed assets by which all fixed assets are verified in a phased manner over a period of three years. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to the programme, certain fixed assets were physically verified by the Management during the year. In our opinion, and according to the information and explanations given to us, no material discrepancies were noticed on such verification.
- (c) In our opinion and according to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties are held in the name of the Company.
- ii. The inventory has been physically verified by the management at reasonable intervals during the year. In our opinion, the frequency of such verification is reasonable. The discrepancies noticed on verification between the physical stocks and the book records were not material.
- iii. In our opinion and according to the information and explanations given to us, the Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, paragraph 3(iii) of the Order is not applicable to the Company.
- iv. The Company has not granted any loans or provided any guarantees or security to the parties covered under section 185 of the Act. In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of Section 186 of the Act, with respect to the loans given, investments made, guarantees given and security provided.
- v. In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits from the public during the year in terms of the provisions of Sections 73 to 76 or any other relevant provisions of the Act and the rules framed there under. Accordingly, paragraph 3(v) of the Order is not applicable to the Company.
- vi. We have broadly reviewed the books of account maintained by the Company as specified under Section 148(1) of the Act, for maintenance of cost records in respect of products manufactured by the Company, and are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. However, we have not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

INDEPENDENT AUDITOR'S REPORT *(Contd.)*

Annexure B to the Independent Auditors' Report of even date on the Ind AS financial statements of Century Enka Limited – 31st March, 2018

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Act

We have audited the internal financial controls over financial reporting of Century Enka Limited ("the Company") as at 31st March, 2018 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

NOTES TO THE FINANCIAL STATEMENTS

1 COMPANY OVERVIEW

Century Enka Limited (the Company) is a Public Limited Company incorporated in India having its registered office at Pune, Maharashtra, India. The Company is engaged in the manufacturing and selling of 'Synthetic Yarn' and related products.

2 SIGNIFICANT ACCOUNTING POLICIES

(a) Statement of Compliance

These financial statements are prepared in accordance with the Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, the relevant provisions of the Companies Act, 2013 ("the Act") and guidelines issued by the Securities and Exchange Board of India (SEBI), as applicable.

The financial statements are authorized for issue by the Board of Directors of the Company at their meeting held on May 3, 2018.

(b) Basis of Preparation and Presentation:

Basis of Preparation

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities:

- (i) Derivative Financial Instruments measured at fair value
- (i) Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)
- (ii) Employee's Defined Benefit Plan as per actuarial valuation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions, regardless of whether that price is directly observable or estimated using another valuation technique. In determining the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Functional and Presentation Currency

The financial statements are presented in Indian Rupees, which is the functional currency of the Company and the currency of the primary economic environment in which the Company operates.

Classification of Assets and Liabilities into Current/Non-Current

The Company has ascertained its operating cycle as twelve months for the purpose of Current / Non-Current classification of its Assets and Liabilities.

For the purpose of Balance Sheet, an asset is classified as current if:

- (i) It is expected to be realised, or is intended to be sold or consumed, in the normal operating cycle; or
- (ii) It is held primarily for the purpose of trading; or
- (iii) It is expected to realise the asset within twelve months after the reporting period; or
- (iv) The asset is a cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

Similarly, a liability is classified as current if:

- (i) It is expected to be settled in the normal operating cycle; or
- (ii) It is held primarily for the purpose of trading; or
- (iii) It is due to be settled within twelve months after the reporting period; or
- (iv) The Company does not have an unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could result in its settlement by the issue of equity instruments at the option of the counterparty does not affect this classification.

All other liabilities are classified as non-current.

(c) Property, Plant and Equipment (PPE):

The initial cost of PPE comprises its purchase price, including import duties and non-refundable purchase taxes, and any directly attributable costs of bringing an asset to working condition and location for its intended use, including relevant borrowing costs and any expected costs of decommissioning. Expenditure incurred after the PPE have been put into operation, such as repairs and maintenance, are charged to the Statement of Profit and Loss in the period in which the costs are incurred.

If significant parts of an item of PPE have different useful lives, then they are accounted for as separate items (major components) of PPE.

Material items such as spare parts, stand-by equipment and service equipment are classified as PPE when they meet the definition of PPE as specified in Ind AS 16 – Property, Plant and Equipment.

(d) Expenditure during construction period:

Expenditure/ Income during construction period (including financing cost related to borrowed funds for construction or acquisition of qualifying PPE) is included under Capital Work-in-Progress, and the same is allocated to the respective PPE on the completion of their construction. Advances given towards acquisition or construction of PPE outstanding at each reporting date are disclosed as Capital Advances under “Other non-current Assets”.

(e) Depreciation:

Depreciation is the systematic allocation of the depreciable amount of PPE over its useful life and is provided on a straight-line basis over the useful lives as prescribed in Schedule II to the Act or as per technical assessment.

Depreciable amount for PPE is the cost of PPE less its estimated residual value. The useful life of PPE is the period over which PPE is expected to be available for use by the Company, or the number of production or similar units expected to be obtained from the asset by the Company.

In case of certain classes of PPE, the Company uses different useful lives than those prescribed in Schedule II to the Act. The useful lives have been assessed based on technical advice, taking into account the nature of the PPE and the estimated usage of the asset on the basis of management's best estimation of obtaining economic benefits from those classes of assets.

Such classes of assets and their estimated useful lives are as under:

No	Nature	Useful life
1	Leasehold Assets	Lease Period
2	Stores and Spares Parts in the nature of PPE	03 Years
3	Assets individually costing less than or equal to ₹ 5,000	Fully Depreciated in the year of purchase

Depreciation on additions is provided on a pro-rata basis from the month of installation or acquisition and in case of Projects from the date of commencement of commercial production. Depreciation on deductions/disposals is provided on a pro-rata basis up to the month of deduction/disposal.

Residual value for Air Conditioners, Furniture and Fittings, Office Equipment's, Computers and servers is considered Nil.

(f) Intangible Assets and Amortisation:

➤ Internally generated Intangible Assets:

Expenditure pertaining to research is expensed as incurred. Expenditure incurred on development is capitalised if such expenditure leads to creation of an asset, otherwise such expenditure is charged to the Statement of Profit and Loss.

➤ Intangible Assets acquired separately:

Intangible assets that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment, if any. The Company determines the amortisation period as the period over which the future economic benefits will flow to the Company after taking into account all relevant facts and circumstances. The estimated useful life and amortisation method are reviewed periodically, with the effect of any changes in estimate being accounted for on a prospective basis.

➤ Class of intangible assets and their estimated useful lives are as under:

Nature	Useful life
Software	10 Years

(g) Impairment of Non-Financial Assets

At the end of each reporting period, the Company reviews the carrying amounts of non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in Statement of Profit and Loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

(h) Inventories:

Inventories are valued as follows:

➤ Raw materials, fuel, stores & spare parts and packing materials:

Valued at lower of cost and net realisable value (NRV). However, these items are considered to be realisable at cost, if the finished products, in which they will be used, are expected to be sold at or above cost. Cost is determined on weighted average basis. The cost of inventory comprises its purchase price, including non-refundable purchase taxes, and any directly attributable costs related to the inventories.

➤ Work-in- progress (WIP), finished goods, stock-in-trade and trial run inventories:

Valued at lower of cost and NRV. Cost of Finished goods and WIP includes cost of raw materials, direct labour, other direct costs and related production overheads upto the relevant stage of completion. Cost of inventories is computed on weighted average basis.

➤ Waste / Scrap:

Waste / Scrap and Byproduct inventory is valued at NRV.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

(i) Borrowing Costs:

General and specific borrowing costs that are attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of such asset till such time the asset is ready for its intended use and borrowing costs are being incurred. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. All other borrowing costs are recognised as an expense in the period in which they are incurred.

Borrowing cost includes interest expense, amortization of discounts, hedge related cost incurred in connection with foreign currency borrowings, ancillary costs incurred in connection with borrowing of funds and exchange difference arising from foreign currency borrowings to the extent they are regarded as an adjustment to the Interest cost.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

(j) Government Grants and Subsidies:

Government grants are recognised in the Statement of Profit and Loss on a systematic basis over the periods in which the Company recognises the related costs for which the grants are intended to compensate.

Government grants are not recognised until there is reasonable assurance that the Company will comply with the conditions attached to them and that the grants will be received.

(k) Provisions, Contingent Liabilities and Contingent Assets:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources, that can be reliably estimated, will be required to settle such an obligation.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows to net present value using an appropriate pre-tax discount rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Unwinding of the discount is recognised in the Statement of Profit and Loss as a finance cost. Provisions are reviewed at each reporting date and are adjusted to reflect the current best estimate.

A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made, is disclosed as a contingent liability. Contingent liabilities are also disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

Claims against the Company where the possibility of any outflow of resources in settlement is remote, are not disclosed as contingent liabilities.

Contingent assets are not recognised in financial statements since this may result in the recognition of income that may never be realised. However, when the realisation of income is virtually certain, then the related asset is not a contingent asset and is recognised.

(l) Revenue Recognition:

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the amount can be reliably measured.

Sale of goods: Revenue is measured at the fair value of consideration received or receivable taking into account the amount of discounts, volume rebates, outgoing taxes on sales and are recognized when all significant risks and rewards of ownership of the goods sold are transferred to buyer and there is no managerial involvement and effective control over goods.

Other Income:

- Dividend Income is accounted for when the right to receive the income is established.
- Interest income is recognized on time proportion basis taking into account the amount outstanding on effective interest rate.
- Difference between the sale price and carrying value of investment is recognised as profit or loss on sale / redemption on investment on trade date of transaction.

(m) Lease :

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as Operating Leases.

Operating Lease: Lease rentals are charged or recognised in the Statement of Profit and Loss on a straight-line basis over the lease term, except where the payment are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increase.

Finance Lease: Assets held under finance leases are recognised as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the Balance Sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged to the Statement of Profit and Loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Company's policy on borrowing costs.

(n) Employee benefits:

Gratuity:

Gratuity being defined benefit plan, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Re-measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the Balance Sheet with a charge or credit recognised in Other Comprehensive Income (OCI) in the period in which they occur. Re-measurement recognised in OCI is reflected immediately in retained earnings and will not be reclassified to Statement of Profit and Loss. Past service cost is recognised in the Statement of Profit and Loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. The costs are categorised as follows:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- Net interest expense or income; and
- Remeasurement

The present value of the gratuity liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

The defined benefit obligation recognised in the Balance Sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

Superannuation:

The company has Defined Contribution Plan for Post Employment benefits in the form of Superannuation schemes for eligible employees. The scheme is administered through Life Insurance Corporation (LIC) and Trust which is administered by the Trustees. In respect of this scheme, the Company has no further obligation beyond its contributions.

Employee's Family Pension

The Company has Defined Contribution Plan for Post Employment benefits in the form of family pension for eligible employees, which is administered by the Regional Provident Fund Commissioner. Company has no further obligation beyond its contributions.

Provident Fund

Contribution towards provident fund for certain employees is made to the regulatory authorities, where the Company has no further obligations. Such benefits are classified as Defined Contribution Scheme as the Company does not carry any further obligations, apart from the contributions made on a monthly basis.

In respect of certain employees, Provident Fund contributions are made to the Trust set up and administered by the Company. If the board of trustees are unable to pay interest at the rate declared by the government under Para 60 of the Employees provident fund scheme, 1972 for the reason that the return on investment is less or for any other reason, then the deficiency shall be made good by the Company making interest shortfall a defined benefit plan. Accordingly, the Company obtains actuarial valuation and having regard to the assets of the fund and the return on investments, the Company does not expect any deficiency as at the year end. If there is a deficiency as at any Balance Sheet date, then, the same will be recognized in the Statement of Profit or Loss / Other Comprehensive Income in the year in which it arises.

Short-term and other long-term employee benefits

Liabilities for wages, salaries and bonus (as per the payment of bonus Act, 1965) including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees and workmen render the related service are recognized in respect of employee's services up to the end of the reporting period and are measured at the amount expected to be paid when the liabilities are settled.

Compensated Absences

The Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end.

Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the year are treated as other long-term employee benefits. The company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Actuarial losses/gains are recognised in the Statement of Profit and Loss in the year in which they arise.

(o) Income Taxes:

Income Tax expenses comprise current tax and deferred tax charge or credit.

Current Tax is measured on the basis of estimated taxable income for the current accounting period in accordance with the applicable tax rates and the provisions of the Income-tax Act, 1961 and other applicable tax laws.

Deferred tax is provided, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax assets and liabilities are measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at the reporting date. Tax relating to items recognised directly in equity or OCI is recognised in equity or OCI and not in the Statement Profit and Loss.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable. MAT is recognized as an asset to the extent there is convincing evidence that the Company will pay normal income tax during the specified period.

(p) Earnings Per Share:

The basic Earnings Per Share ("EPS") is computed by dividing the net profit / (loss) after tax for the year attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, net profit/(loss) after tax for the year attributable to the equity shareholders and the weighted average number of equity shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

(q) Foreign Currency transactions:

In preparing the financial statements of the Company, transactions in currencies other than the Company's functional currency (i.e. foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are translated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of initial transactions.

Exchange differences on monetary items are recognised in the Statement of Profit and Loss in the period in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings.

(r) Financial Instruments:

Financial assets and financial liabilities are recognized when a Company becomes a party to the contractual provisions of the instruments.

Initial Recognition:

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss and ancillary costs related to borrowings) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in Statement of Profit and Loss.

Classification and Subsequent Measurement: Financial Assets

The Company classifies financial assets as subsequently measured at amortised cost, fair value through other comprehensive income ("FVOCI") or fair value through profit or loss ("FVTPL") on the basis of following:

- the entity's business model for managing the financial assets and
- the contractual cash flow characteristics of the financial asset.

Amortised Cost:

A financial asset shall be classified and measured at amortised cost if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

In case of financial assets at amortised costs, interest income, foreign exchange gain or loss and impairment are recognized in Statement of Profit and Loss.

Fair Value through OCI:

A financial asset shall be classified and measured at fair value through OCI if both of the following conditions are met:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Where the Company has elected to present the fair value gain on equity instruments in other comprehensive income, there is no subsequent classification of fair value gain or losses to profit and loss account. Dividend from such instruments is recognized in profit and loss account as other income where right to receive is established.

Fair Value through Profit or Loss:

A financial asset shall be classified and measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through OCI.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Classification and Subsequent Measurement: Financial liabilities

Financial liabilities are classified as either financial liabilities at FVTPL or 'other financial liabilities'.

Financial Liabilities at FVTPL:

Financial liabilities are classified as at FVTPL when the financial liability is held for trading or are designated upon initial recognition as FVTPL:

Gains or Losses on liabilities held for trading are recognised in the Statement of Profit and Loss.

Other Financial Liabilities:

Other financial liabilities (including borrowings and trade and other payables) are subsequently measured at amortised cost using the effective interest method.

Impairment of financial assets:

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. In case of trade receivables, the Company follows the simplified approach permitted by Ind AS 109 – Financial Instruments for recognition of impairment loss allowance. The Company recognises a loss allowance for expected credit losses on financial asset. The Company's trade receivables do not contain significant financing component and loss allowance on trade receivables is measured at an amount equal to life time credit expected losses. The Company calculates the expected credit losses on trade receivables using a provision matrix on the basis of its historical credit loss experience.

Derecognition of financial assets:

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises associated liabilities.

On derecognition of a financial asset, other than investments classified as FVOCI, in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

The Company derecognizes financial liabilities when the Company's obligation are discharged, cancelled or have expired. The difference between the carrying amount of financial liability derecognized and consideration paid and payable is recognized in the statement of profit and loss.

On derecognition of equity investments classified as FVOCI, accumulated gains or loss recognised in OCI is transferred to retained earnings.

(s) Financial liabilities and equity instruments:**➤ Classification as debt or equity**

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

➤ Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a Company are recognised at the proceeds received.

(t) Derivative financial instruments:

The Company enters into derivative financial instruments viz. foreign exchange forward contracts to manage foreign exchange risks. The Company does not hold derivative financial instruments for speculative purposes.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in statement of profit and loss immediately.

(u) Cash and cash equivalents:

Cash and cash equivalents in the Balance Sheet comprise cash at bank, Cheques and Cash in hand and short-term deposits with banks that are readily convertible into cash which are subject to insignificant risk of changes in value and are held for the purpose of meeting short-term cash commitments.

(v) Derecognition of Financial Liabilities:

The Company de-recognises financial liabilities when and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability de-recognised and the consideration paid and payable is recognised in the statement of profit and loss.

Note 2(A) Critical accounting judgements and key sources of estimation uncertainty:

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Key assumptions:

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(i) Useful Lives of Property, Plant & Equipment:

The Company uses its technical expertise along with historical and industry trends for determining the economic life of an asset/component of an asset. The useful lives are reviewed by management periodically and revised, if appropriate. In case of a revision, the unamortised depreciable amount is charged over the remaining useful life of the assets.

(ii) Fair value measurement of financial instruments:

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility.

(iii) Defined benefit plans:

The cost of the defined benefit plans gratuity and provident fund, and the present value of the gratuity and provident fund obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

(iv) Impairment of Assets:

The Company has used certain judgments and estimations to estimate future projections and discount rates to compute value in use of cash generating unit and to assess impairment. In case of certain assets independent external valuation has been carried out to compute recoverable values of these assets.

34. FINANCIAL RISK MANAGEMENT OBJECTIVES (IND AS 107):

The Company's principal financial liabilities, other than derivatives, comprises of borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the company's operations. The company's principal financial assets, other than derivatives include trade and other receivables, investments and cash and cash equivalents that derive directly from its operations.

The Company's activities expose it to market risk, liquidity risk and credit risk. Company's overall risk management focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the company. The company uses derivative financial instruments, such as foreign exchange forward contracts, to hedge foreign currency risk exposure. Derivatives are used exclusively for hedging purposes and not as trading or speculative instruments.

The sources of risks which the company is exposed to and their management are given below:

Risk	Exposure Arising From	Measurement	Management
A. Market Risk			
1) Foreign Exchange Risk	Committed commercial transaction Financial asset and Liabilities not denominated in INR	Cash Flow Forecasting Sensitivity Analysis	Forward foreign exchange contracts
2) Interest Rate	Long Term Borrowings at variable rates Investments in Debt Schemes of Mutual Funds and Other Debt Securities	Sensitivity Analysis, Interest rate movements	Portfolio Diversification
3) Commodity Price Risk	Movement in prices of commodities	Sensitivity Analysis, Commodity price tracking	Active inventory management, Sales Price linked to purchase price
B. Credit Risk	Trade receivables, Investments, Derivative financial instruments, Loans	Aging analysis, Credit Rating	Diversification of mutual fund investments, Credit limit and credit worthiness monitoring, Criteria based approval process
C. Liquidity Risks	Borrowings and Other Liabilities and Liquid investments	Rolling cash flow forecasts Broker Quotes	Adequate unused credit lines and borrowing facilities Portfolio Diversification

The Company has standard operating procedures and investment policy for deployment of surplus liquidity, which allows investment in debt securities and mutual fund schemes of debt categories only and restricts the exposure in equity markets.

Compliances of these policies and principles are reviewed by internal auditors on periodical basis.

The Corporate Treasury team updates the Audit Committee on a quarterly basis to about the implementation of the above policies. It also updates to the Internal Risk Management Committee of the Company on periodical basis about the various risk to the business and status of various activities planned to mitigate the risk.

A. Market Risk Management:

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments and deposits, foreign currency receivables, payables and borrowings.

1) Foreign Currency Risk:

Foreign currency risk is the risk of impact related to fair value or future cash flows of an exposure in foreign currency, which fluctuate due to changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to import of raw materials and spare parts, capital expenditure, exports of textile yarn and nylon chips.

When a derivative is entered for the purpose of being a hedge, the Company negotiates the terms of those derivatives to match the terms of the hedged exposure.

The Company evaluates exchange rate exposure arising from foreign currency transactions. The Company follows established risk management policies and standard operating procedures. It uses derivative instruments like foreign currency forwards to hedge exposure to foreign currency risk.

2) Interest Rate Risk:

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's short-term borrowing. The Company constantly monitors the credit markets and rebalances its financing strategies to achieve an optimal maturity profile and financing cost. Since all the borrowings are on floating rate, no significant risk of change in interest rate.

INR Interest Rate Exposure:

₹ / lacs		
Particulars	Total borrowings	Floating rate borrowings
Total as at 31 st March 2018	4695	4695
Total as at 31 st March 2017	5253	5253

Interest rate sensitivities for unhedged exposure (impact on increase in 100 bps):

₹ / lacs		
Particulars	As at 31 st March 2018	As at 31 st March 2017
INR	47	51

Note: If the rate is decreased by 100 bps profit will increase by an equal amount.

Interest rate sensitivity has been calculated assuming the borrowings outstanding at the reporting date have been outstanding for the entire reporting period.

3) Commodity price risk

Commodity price risk for the Company is mainly related to fluctuations of raw materials prices linked to various external factors, which can affect the production cost of the Company. Company actively manages inventory and in many cases sale prices are linked to major raw material prices. Energy costs is also one of the primary costs drivers, any fluctuation in fuel prices can lead to drop in operating margin. To manage this risk, the Company enters into long-term supply agreement for power, identifying new sources of supply etc. Additionally, processes and policies related to such risks are reviewed and managed by senior management on continuous basis.

B. Credit Risk Management:

Credit risk arises when a customer or counterparty does not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing/ investing activities, including deposits with banks, mutual fund investments, and investments in debt securities, foreign exchange transactions and financial guarantees. The Company has three major clients which represents 80% receivables as on 31st March, 2018 and company is receiving payments from these parties within due dates. Hence, the company has no significant credit risk related to these parties.

Trade Receivables

Trade receivables are consisting of a large number of customers. The Company has credit evaluation policy for each customer and based on the evaluation credit limit of each customer is defined. Wherever the Company assesses the credit risk as high the exposure is backed by either letter of credit or security deposits.

As per simplified approach, the Company makes provision of expected credit losses on trade receivables using a provision matrix to mitigate the risk of default payments and makes appropriate provision at each reporting date wherever outstanding is for longer period and involves higher risk.

As per provision matrix, the Company makes provision for the trade receivable for more than 6 Months @ 10 – 15%.

All the Trade Receivables are less than 6 months and hence there is no provision as per expected credit loss model.

Investments, Derivative Instruments, Cash and Cash Equivalent and Bank Deposit

Credit Risk on cash and cash equivalent, deposits with the banks/financial institutions is generally low as the said deposits have been made with the banks/financial institutions who have been assigned high credit rating by international and domestic rating agencies.

Credit Risk on Derivative Instruments are generally low as Company enters into the Derivative Contracts with the reputed Banks and Financial Institutions.

Investments of surplus funds are made only with approved Financial Institutions/ Counterparty. Investments primarily include investment in units of mutual funds. These Mutual Funds and Counterparties have low credit risk.

Total Non-current and current investments as on 31st March, 2018 is ₹8661 Lacs (31st March , 2017 - ₹ 9803 Lacs).

C. Liquidity Risk Management:

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at reasonable price. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of credit facilities to meet obligations when due. The Company's treasury team is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Company's liquidity position through rolling forecasts based on expected cash flows.

The table below provides details regarding the remaining contractual maturities of financial liabilities and investments at the reporting date based on contractual undiscounted payments.

(B) - FAIR VALUE MEASUREMENTS (IND AS 113):

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The Company has established the following fair value hierarchy that categorizes the values into 3 levels. The inputs to valuation techniques used to measure fair value of financial instruments are:

Level 1: This hierarchy uses quoted (unadjusted) prices in active markets for identical assets or liabilities. The fair value of all bonds which are traded in the stock exchanges is valued using the closing price or dealer quotations as at the reporting date.

Level 2: The fair value of financial instruments that are not traded in an active market (For example traded bonds, over the counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on company specific estimates. The mutual fund units are valued using the closing Net Asset Value. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

The management assessed that fair value of cash and bank balances, trade receivables, trade payables, cash credits, commercial papers and other financial assets and liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The following methods and assumptions were used to estimate the fair values:

- The fair values of the quoted investments/units of mutual fund schemes are based on market price/net asset value at the reporting date.
- The fair value of forward foreign exchange contracts is calculated as the present value determined using forward exchange rates and interest rate curve of the respective currencies.
- The fair value of the remaining financial instruments is determined using discounted cash flow analysis or based on the contractual terms. The discount rates used is based on management estimates.

39. DISCLOSURES IN ACCORDANCE WITH IND AS-19 ON "EMPLOYEE BENEFITS"

- a) **Defined Contribution Plans - The Company has recognised the following amounts in the Statement of Profit and Loss for the year:**

₹ / lacs

Particulars	2017-18	2016-17
Employer's Contribution to Provident Fund and Employee's Pension Scheme, 1995	402	378
Employer's Contribution to Superannuation Fund	61	65
Employer's Contribution to Employee's State Insurance	30	17
Total	493	460

- b) **Defined Benefit Plans - Gratuity and Provident Fund**

Gratuity: Inherent Risk - The plan is defined benefit in nature which is sponsored by the Company and hence it underwrites all the risks pertaining to the plan. In particular, this exposes the Company to actuarial risk such as adverse salary growth, change in demographic experience, inadequate return on underlying plan assets. This may result in an increase in cost of providing these benefits to employees in future. Since the benefits are lump sum in nature, the plan is not subject to any longevity risks.

The Company operates a gratuity plan which is administered through Life Insurance Corporation and a trust which is administered through trustees. Every employee is entitled to a minimum benefit equivalent to 15 days salary last drawn for each completed year of service in line with Payment of Gratuity Act, 1972. However, certain employees are entitled to benefit higher than the benefit prescribed under Payment of Gratuity Act, 1972. The same is payable at the time of separation from the Company or retirement, whichever is earlier or death in service.

Provident Fund:

The Company makes contribution towards Provident fund for certain eligible employees to the trust, set up and administered by the Company, in line with the Provident Fund and Miscellaneous Provisions Act, 1952. The plan guarantees interest at the rate notified by the Provident Fund Authorities. The contribution by the employer and employee together with the interest accumulated thereon are payable to employees at the time of their separation from the company or retirement, whichever is earlier. The benefits vest immediately on rendering of the services by the employee. The rules of the trust provides that if the board of trustees are unable to pay interest at the rate declared by the government under Para 60 of the Employees provident fund scheme, 1972 for the reason that the return on investment is less or for any other reason, then the deficiency shall be made good by the Company making interest shortfall a defined benefit plan. Accordingly, the Company has obtained actuarial valuation and based on the below provided assumptions there is no deficiency as at the balance sheet date. Hence, the liability is restricted towards monthly contributions only.
