GROWTH AND EXPANSION

Time is never constant and so is evolution and if tandem between both is established on a common ground; the result of such rhythmic combination is exemplified by Jay Bharat Maruti Limited. The organization has successfully surpassed the 3-decade milestone and this feat has been a result of consolidating a grounded approach of 'Growth driven by a foundation of experiential knowledge and Expansion using the corporate art of quick adaptability to technology and innovation'.

Growth And Expansion of Jay Bharat Maruti Limited has been achieved by repeatedly re-examining the sense of purpose in the business, aligning business dealing on ethics and strengthening the process and system to fulfil the purpose of being a conscious vendor to its partner.

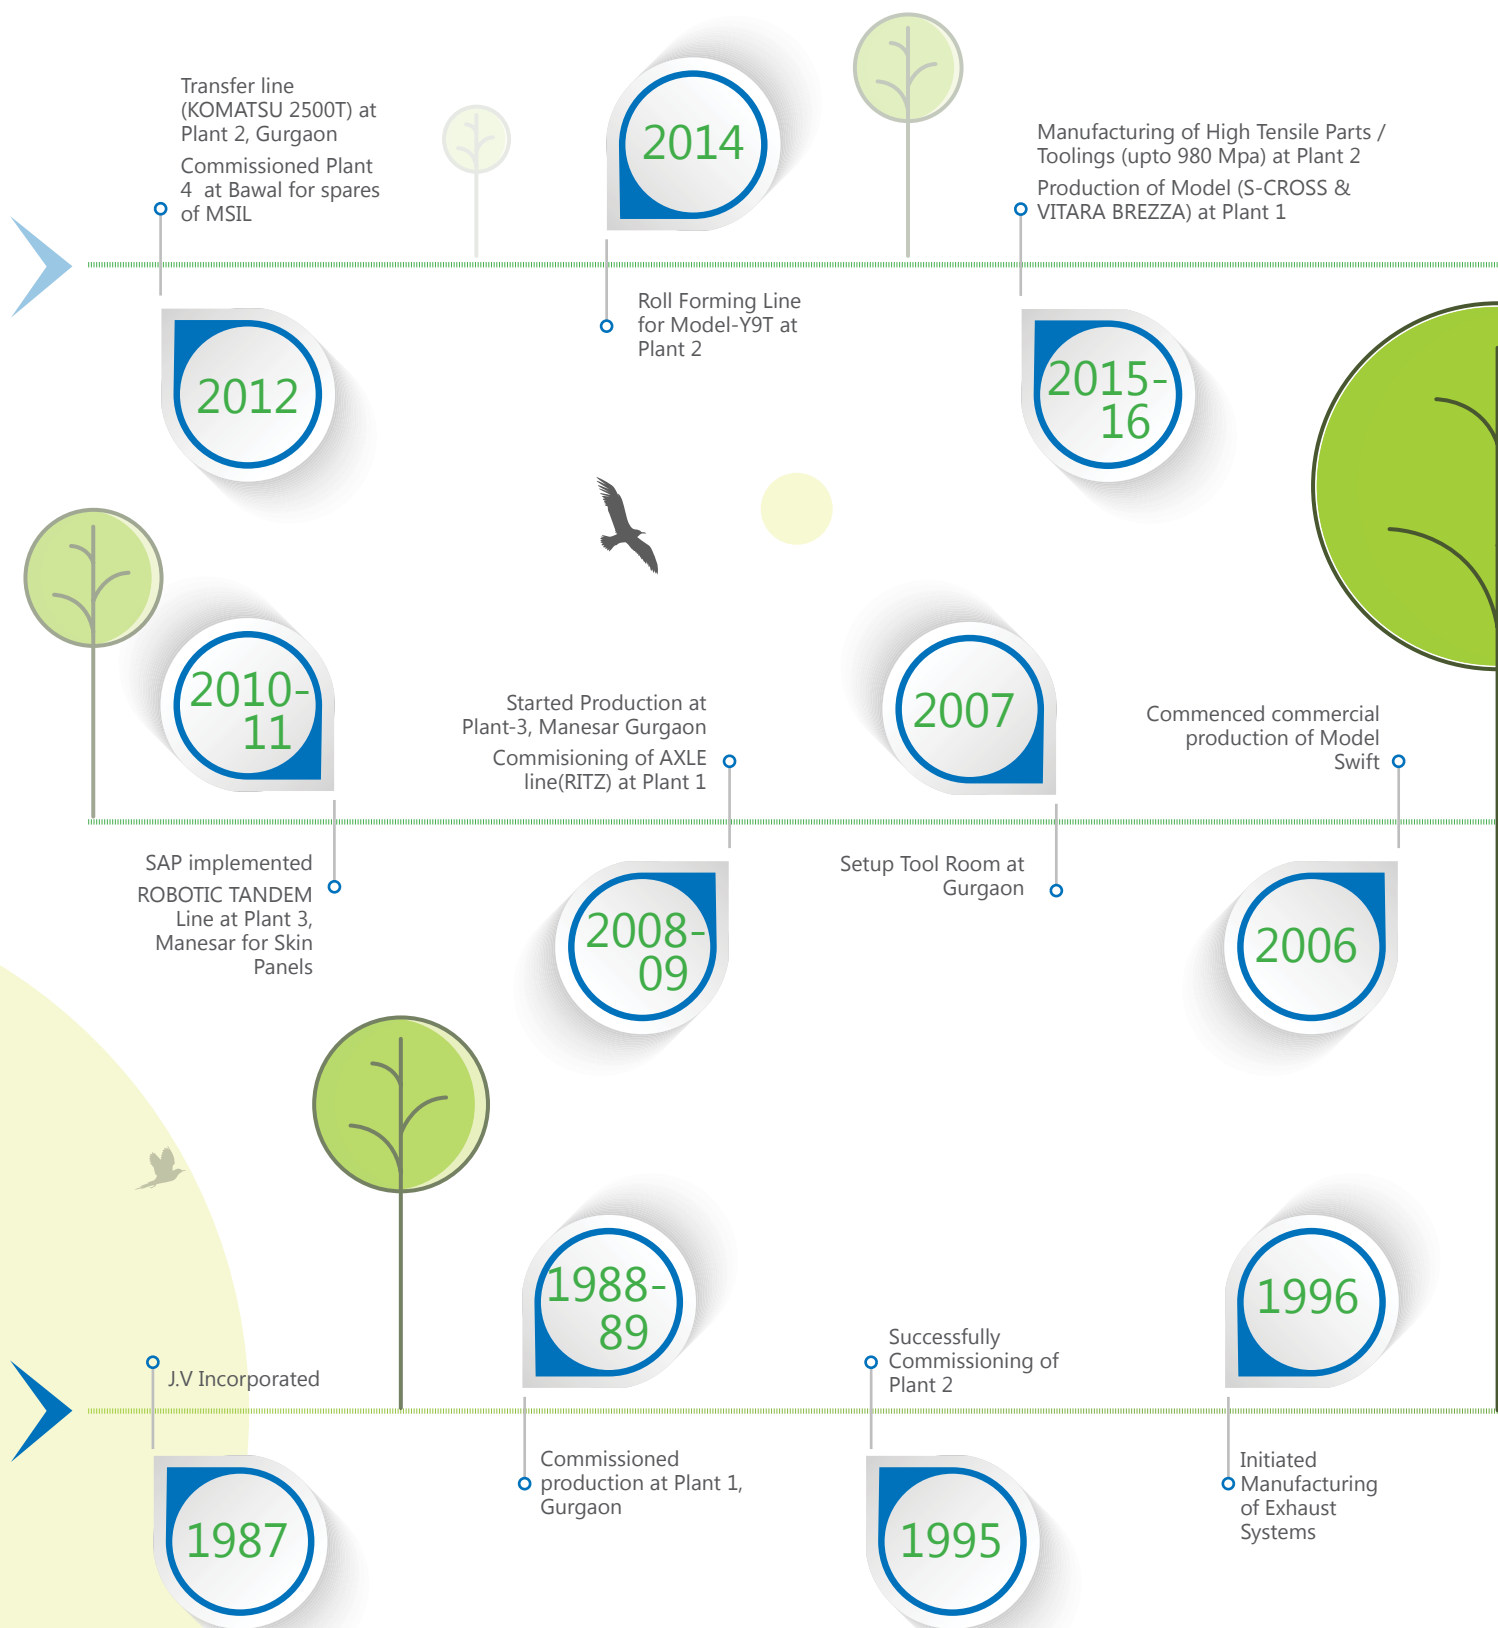

Jay Bharat Maruti Limited (JBML) the forerunner of the JBM Group has continued its path of 'Growth And Expansion and this has been attributed because of carefully selected, trained and nurtured intellectual capital, engineering design services to compliment vendor relations, high quality precision product delivery using state-of-the-art technology and continuous improvement in manufacturing automation. These are the attributes that have created a foundation for growth and space for expansion.

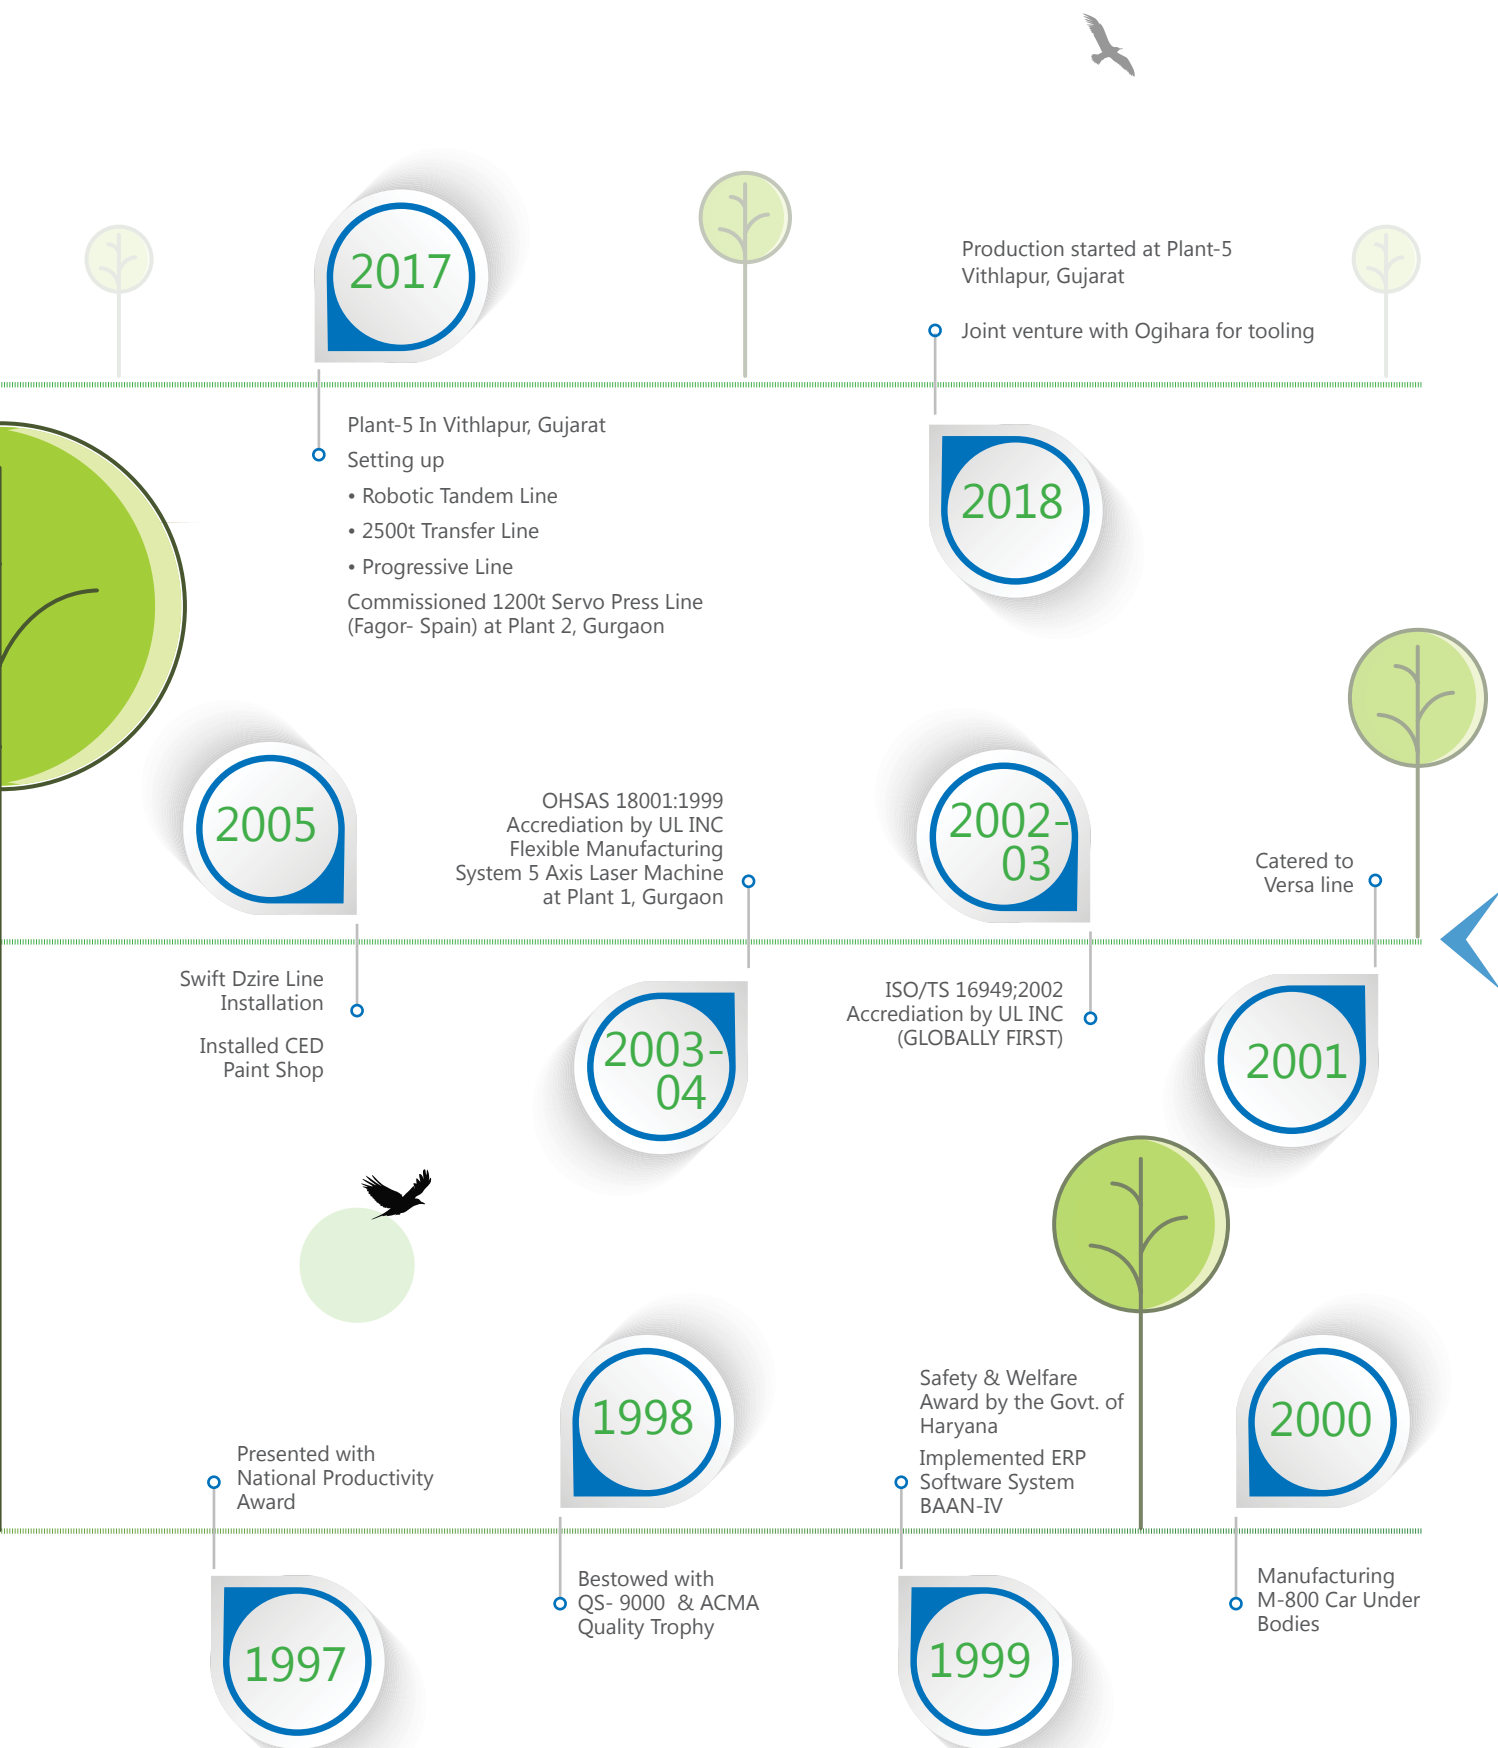

Our journey of metamorphosis has been made possible due to the conscientiousness in our actions; integrating and upgrading to latest technology for product development for a consistent manufacturing evolution. Employing innovation in design, with technology enhancing the overall output has spurred our phenomenal growth, which has been both dramatic and incremental. This in turn has created the scale for expansions into business horizons to tap newer opportunities.

With a right mix of intent, ability and opportunity and thereby leveraging the foundation on which Jay Bharat Maruti Limited has been built on; the organization has been able to fundamentally transform and bridge technology evolution to tap opportunity. Assimilating technology and innovation within the business process has garnered the credibility Jay Bharat Maruti Limited enjoys with its business association with Maruti Udyog Limited.

The organization continues to take mindful steps toward continuously shaping its infrastructure to achieve a healthy growth trajectory and create expansive business agility.

OUR MILESTONES

FROM THE CHAIRMAN'S DESK

Dear Shareholders,

Synergies in relationships create value and a symbiotic approach is essential to create a win - win result. A cohesive organization has been our guiding principle that formed Jay Bharat Maruti Ltd.'s FY17-18 mission of 'Growth & Expansion'.

With consistent growth over the years, India is the fastest growing G20 economy today. Increasing investments and exports, aptly supported by the smooth implementation of the new Goods and Services Tax (GST), have been the major growth engines. With capacity utilization rising, corporate earnings recovering and the recapitalization of public banks, investment has revived. Private consumption has suffered from the confidence and employment shocks associated with demonetization. However, recovery is underway as depicted by the rebound in vehicle sales. Our Government's dual objective of bringing the unorganized sectors into the tax compliant mainstream and propelling the benefits of economic growth to larger sections of our society have strengthened the foundation of a new India that is already on its way towards a sustained economic growth in the coming decades.

The Automotive Mission Plan 2026 aims to propel the Indian Automobile Industry to be a frontrunner in the "Make In India" programme, as it is amongst the foremost drivers of the manufacturing sector. Over the next decade, the Indian automotive sector is likely to contribute in excess of 12% of the country's GDP and comprise more than 40% of its manufacturing sector. The AMP envisages that the Indian Automotive Industry will grow 3.5-4 times in value from its current output of around Rs 4,64,000 cr to about Rs. 16,16,000 – Rs. 18,88,500 cr by 2026, thereby, constituting almost 50% of the total manufacturing GDP.

Fiscal 2017- 2018 was a year of growth driven by a founding principle of being responsible, dynamic, efficient, transparent and reliable. The Indian automobile industry grew by 14.81% to reach 29.07 million vehicles. The passenger vehicle segment recorded an annual growth of 7.87%, riding on a robust growth of 20.97% in the demand of utility vehicles. Moreover, the sale of commercial vehicles and two wheelers grew by 21.13% and 14.79%, respectively. The overall automobile exports in FY17-18 registered a growth of 16.38%, backed by strong growth of 20.51% in 2 wheeler and 40.74% in 3 wheeler vehicles segments. According to ACMA,

The highlights of the year have been start of production at your company's state of the art plant in Vithalapur, Gujarat which is catering to the requirements of Suzuki Motor Corporation. JBML also entered into a strategic joint venture with Ogihara with an objective of strengthening our tooling capabilities. Your company's performance has been driven by a double digit growth in revenues by 13.48% at Rs. 17340.21 million. EBIDTA witnessed a remarkable jump of 18.39% from Rs 1345.22 million in FY17 to Rs 1592.58 million in FY18. The EBIDTA margin in FY18 increased to 9.26% from 8.8%. The net profit for the year stood at Rs 588.91 million, as against Rs 537.74 million in FY17.

the Indian Auto Components Industry would grow to US\$ 100 billion by 2020, backed by strong exports estimated to be of US\$ 80-100 billion by 2026, from the current US\$ 11.2 billion. With this as its core we were able to deliver quality products to our partners, driven by our efficiency in design and advanced automation.

I am glad to report a double digit growth in your company's revenues by 13.48% at Rs. 17340.21 million. EBIDTA witnessed a remarkable jump of 18.39% from Rs 1345.22 million in FY17 to Rs 1592.58 million in FY18. The EBIDTA margin in FY18 increased to 9.26% from 8.8%. Your company's net profit for the year stood at Rs 588.91 Million, as against Rs 537.74 million in FY17.

The highlight of the year has been start of production at your company's state of the art plant in Vithalapur, Gujarat which is catering to the requirements of Suzuki Motor Corporation. JBML also entered into a strategic joint venture with Ogihara with an objective of strengthening our tooling capabilities. The year has been satisfying for us all at Jay Bharat Maruti Ltd, and we intend to continue with our mission of creating value for all stakeholders by focusing on our strengths and delivering synergistic congruence to grow and expand.

To conclude, I would like to formally thank our partner Maruti Suzuki India Ltd for their continued patronage on our delivery prowess. I extend my sincere appreciation to the management and the staff of the company for their valued contribution, as always. A big thanks to you, our valued shareholders. Your faith and trust in our capabilities keeps motivating us to evolve higher and stronger.

Finally, I would like to end this note by quoting Benjamin Franklin,

"Without continual growth and progress, such words as improvement, achievement, and success have no meaning."

Thank You and Jai Hind.

CORPORATE SOCIAL RESPONSIBILITY

Our Corporate social responsibility (CSR) activities revolve around the ethos of consistent socio-economic progress along with a focus on creating a sustainable business blueprint that puts emphasis on environmental sustainability. We have persistently worked towards economic empowerment of the rural communities wherein we have provided economic independence to the rural populace and improved their infrastructure through our community outreach programs. By way of our contribution to Shri Madhav Jan Sewa Nyas, Moga Devi Minda Charitable Trust, Neel Foundation, we have been promoting education and women empowerment by establishing public libraries, organising medical relief camps and healthcare programmes for them. Besides, we regularly lend our support to the NGOs who are actively involved in imparting education to the underprivileged and are investing their time and resources in character building, improving health and hygiene of people and sports. The Company has also collaborated with Jal Vayu Sanrakshan Samiti for the plantation of new trees to ensure environmental sustainability, ecological balance, protection of flora and fauna, animal welfare, agroforestry, conservation of natural resources and maintaining quality of soil, air and water. On the healthcare front, we have organized several in-house blood donation camps to help children suffering from Thalassemia. We have

also extended our help to distressed people and communities who have been victims of natural calamities by donating to the Red Cross Foundation.

Our belief system strongly promulgates ethical value system, therefore, we have produced and promoted moral and motivational CD's for distribution to various Schools and Institutions that will, in turn, instill moral values in the younger generation. We are steadfast in following our social and environmental ethos and our business development will be pursued in such a manner that it will continue to support inclusive growth, social equity, and environmental sustainability, which, in turn, will help create value for all our stakeholders.

Following are some of our committed efforts in this direction:

- We manage our operational activities effectively to minimise any adverse impact on the environment, general health and safety.
- We constantly frame and implement effective environment conservation policies.
- We have a Health and Safety Management Team that regularly monitors, set and reviews our environment health and safety objectives and targets.
- We constantly endeavour to reduce waste through implementing an effective waste recycling process within our manufacturing operations

- v. There were no specific laws applicable to the Company by virtue of the Company being engaged in the business of auto ancillary/components manufacturing, as informed by the management of the Company, during the period under audit.

We have also examined compliance with the applicable clauses of the following:

- I. Secretarial Standards issued by The Institute of Company Secretaries of India on Board Meetings (SS-1) and General Meetings (SS-2);
- II. The Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015.

During the period under audit, the Company has complied with the provisions of the Acts, Rules, Regulations, Guidelines, Standards, etc.

We further report that-

The Board of Directors of the Company is duly constituted with proper balance of Executive Director, Non-Executive Directors, Independent Directors and Women Director. The changes in the composition of the Board of Directors that took place during the period under review were carried out in compliance with the provisions of the Act. However, after resignation of Shri Virender Ganda, Independent Director w.e.f 16th January 2018, the number of Independent Directors have come down to three from required four Independent Directors. The Company, through written representation, has informed us that the company took necessary steps to identify and appoint to fill the vacancy of Independent Director and the Nomination and Remuneration committee of the company has recommended Mr. Dhanendra Kumar (DIN:05019411) in its meeting held on 16th July 2018, to the Board of Directors for his appointment as Independent Director. The Board has appointed Mr. Dhanendra Kumar (DIN: 05019411) as Independent Director in its Board Meeting held on 16th July 2018.

Adequate notice has been given to all Directors to schedule the Board Meetings, agenda and detailed notes on agenda were sent at least seven days in advance, and a system exists for seeking and obtaining further information and clarifications on the agenda items before the meeting and for meaningful participation at the meeting.

All decisions at Board Meetings and Committee Meetings are carried out unanimously as per the minutes, as duly recorded and signed by the Chairman, of the meeting of the Board of Directors or committees of the Board, therefore no dissenting views were there required to be recorded as part of the minutes.

We further report that there are adequate systems and processes in the Company commensurate with the size and operations of the Company to monitor and ensure compliance in respect of applicable laws , rules, regulations and guidelines etc.

We further report that during the audit period the Company has undertaken no activities having a major bearing on the Company's Affairs in pursuance of the above referred laws, rules, regulations, guidelines, etc.

Particulars of Energy Conservation, Technology Absorption and Foreign Exchange Earning & Outgo required under the Companies (Accounts) Rules, 2014

A. Conservation of energy

(i) Steps taken for conservation of energy

Various energy conservation measures taken by the Company during the year under review are:

- (a) AC Drive provided in paint shop on Oven Exit Blower and canopy entry blower to reduce energy consumption when oven door is closed.
- (b) AC Drive provided in Paint shop on Oven Main Blower to reduce energy consumption when oven door is open.
- (c) Interlock provided in paint shop so that KOD Degreasing Pump is off when no basket in KOD and Degreasing Tank. Frequency of oven blower also reduced from 50 HZ to 40 HZ.
- (d) Interlock provided at the scrap conveyor so that it will be off during die change.
- (e) Three phase Fan (750 watt & 550 watt) replaced with single phase Fan (180 watt & 100 watt) as per cooling air requirement.
- (f) Reduction of compressed air by 100 CFM by change in pipeline layout in Exhaust and Axle Line.
- (g) Installation of LED Light in PDI Area and inspection table in place of conventional lights.

(ii) Steps taken by the Company for utilizing alternate source of energy

Installation of solar systems for using solar energy which will be a low cost source of energy and beneficial for eco system for its new plant at Vithlapur, Gujarat.

(iii) Capital Investment on energy conservation equipments

All energy conservation measures have been taken by process optimization without any major capital investment.

B. Technology absorption

(i) Efforts made towards technology absorption

- (a) To meet the business requirements, the Company has imported and absorbed the Japanese Technology for production of Rear Axle for new models of MSIL. Welding process designing, line layout is finalized by the Company under guidance of Yorozu Corporation, Japan. Complete manufacturing, installation and fine tuning of the line is done by local team.
- (b) To meet the stringent quality requisites for Rear axles in new models, Company has introduced a state of art MIG welding technology "Active – Tawers series Robot by Panasonic", the Key features includes – High operating speed of the order 100 cm / min In comparison to 50 cm/ min in conventional robot, without sacrificing – Weld penetration and generates very low spatters - at New Wagonr rear axle line - J3.
- (c) MIG-Weld bead analysis by " Online checking through vision camera ", to prevent the poor weld parts to escape to next weld station - at Ignis rear axle line - J1.

(ii) The benefit derived like production improvement, cost reduction, product development or import substitution

- (a) The above projects helped us in reduction of development time and subsequent reduction in investment.
- (b) Saving of foreign exchange due to localization of 'Rear Axle production line'.

- (c) Tawers series has a direct impact on productivity improvement with a great control on Weld quality.
- (d) Introducing Vision camera for weld analysis, is a good initiative to keep a check on weld quality output and control the NG parts to Outflow.
- (e) PRESS SHOP FAGOR (SPAIN) make SERVO lead press installed in J2 plant for following advantages
 - i). More flexibility for draw operations of typical parts as slide speed can be controlled at various stages of single cycle.
 - ii) No flywheel, clutch & brake and related controls. Less maintenance & ease in operation.
 - iii) Latest technology in stamping for better draw quality, longer die life, lesser noise during operation & lesser power consumption.

(iii) Information regarding imported technology (Imported during last three years)

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

A. ECONOMIC SYNOPSIS

I. GLOBAL ECONOMY

As per the IMF, the World growth strengthened in 2017-18 to 3.9 %, with a notable rebound in global trade as compared to 3.5% in 2016-17. The Growth was driven by an investment recovery in advanced economies, continued strong growth in emerging Asia, a notable upswing in emerging Europe, and signs of recovery in several commodity exporters.

Growth in advanced economies increased slightly to 2.5% in 2018 as compared to 2.0% in 2017, as central banks gradually remove their post-crisis accommodation and as an upturn in investment levels off. Growth in emerging market and developing economies as a whole stood to 4.9% in 2018 against 4.5% in 2017, as activity in commodity exporters continues to recover.

Global GDP growth reached to 4.5% in 2018 as against 3.5% in 2017, the strongest annual expansion since 2011. Growth is expected to remain strong in 2019 but moderate slightly to 3.0%.

The pickup in growth has been broad-based. World trade has grown strongly in the 4th quarter of 2017, well supported by a pick-up in investment in advanced economies and increased manufacturing output in Asia. For the year 2018 and 2019 forecast horizon, the upward revision to the global outlook results mainly from Advanced Economies where growth is now expected to exceed 2 percent.

The US tariff and tax policy changes are expected to stimulate growth and positively impact the Country, However, the punitive tariffs on Chinese imports to the US, has caused dramatic increase in the price of metals like Steel and Aluminium. While the direct impact on the global economy may not be substantial, but it could adversely affect the driving forces behind global economic growth and dampen investor confidence.

The global economy is experiencing a cyclical recovery, reflecting a rebound in investment, manufacturing activity, and trade. This improvement comes against the backdrop of benign global financing conditions, generally accommodative policies, rising confidence, and firming commodity prices.

II. INDIAN ECONOMY

The International Monetary Fund (IMF) is projecting an acceleration for the Indian economy, with the GDP growth of 7.11% in 2016-17 scaling up to 7.36 % in 2017-18 and projected to reach 7.8% for 2018-19, potentially making India the world's fastest growing large economy. The growth in 2016-17 was hampered by disruptions associated with the demonetisation introduced in November, 2016, while 2017-18 included the transition costs related to the launch of Goods and Services Tax (GST). With the structural reforms in place, the economy is expected to move to a higher growth trajectory for 2018-19 and beyond.

The second advance estimate of National Income released by the Central Statistical Organisation (CSO) of the Government of India on 28 February, 2018 has pegged India's real GDP growth for 2017-18 (or FY2018) at 6.6% — which represents a deceleration of 50 basis points compared to 7.1% of the previous year. The results are qualitatively similar when national income is measured in terms of gross value added (GVA) at constant prices. CSO estimates real GVA growth for FY2018 at 6.4% versus 7.1% in FY2017.

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organization (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.

India's gross domestic product (GDP) at constant prices grew to 7.36 per cent in 2018 as per the Central Statistics Organization (CSO) as compared to 7.11percent in 2017.

(Source: CSO)

India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute.

India's foreign exchange reserves were US\$ 422.53 billion in the week up to March 23, 2018, according to data from the RBI. The tax collection figures between April 2017- February 2018 show an increase in net direct taxes by 19.5 per cent year-on-year and an increase in net direct taxes by 22.2 per cent year-on-year.

As on 2018, India has retained its position as the third largest startup base in the world with over 4,750 technology startups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM.

India's gross domestic product (GDP) is expected to reach US\$ 6 trillion by FY27 and achieve upper-middle income status on the back of digitization, globalization, favourable demographics, and reforms. With the improvement in the economic scenario, there have been various investments in various sectors of the economy.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by Price Waterhouse Coopers

According to Department of Industrial Policy and Promotion (DIPP), the total FDI investments in India during April-December 2017 stood at US\$ 35.94 billion, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

B. INDIAN AUTOMOTIVE INDUSTRY

The Indian automotive industry is the 7th largest in the world. As per Society for Indian Automobile Manufacturers (SIAM) the industry produced a total 29,075,605 vehicles including Passenger Vehicles, Commercial Vehicles, Three Wheelers, Two Wheelers and Quadricycle in April-March 2018 as against 25,320,967 in April-March 2017, registering a growth of 14.81 percent over the same period last year.

The major highlight of the India Automotive Industry is as:

- The Automotive Component Industries revenue growth is expected to touch the 7 year high in FY19, to clock 10-12% CAGR from FY18-FY20.
- The Operating margin of the Industry is expected to remain stable at 12-13% over the medium term, on the ground of better volumes and raw materials pass-through clause to support healthy cash generation.
- The Investment in the sector over the next two years is expected to remain high of around ₹ 100-Rs.110 BN led by growing demand and regulatory imperatives.
- The Credit profile will sustain to improvement over near to medium term.

Auto industry is said to be the engine of growth in most developed countries, including in China and India today. Indian Automobile industry which was at its nascent stage at the beginning of the 21st century has now become a huge industry that contributes majorly to growth and development of Indian Economy. As per the current statistics, the Auto Industry's turnover is estimated to be equivalent to:

- 7.1% of overall GDP
- About 26% of Industry GDP
- About 49% of manufacturing GDP

CURRENT SCENARIO

The Indian Automotive sector has ended the first quarter of 2018-19 with a robust double-digit growth of 18.1 percent across segments. Passenger Vehicles clocked a strong growth of 19.91 percent at 8,73,501 units with the highest growth posted by Vans at 27.29 percent with domestic sales of 55,078 units. Utility Vehicles recorded a 23.22 percent uptick at 2,34,876 units with Cars registering a 17.98 percent with sales of 5,83,547 units.

Commercial Vehicles were up 51.55 percent at 2,30,095 units with the Medium & Heavy Commercial Vehicle segment growing 83.59 percent to 89,027 units with Light Commercial Vehicles experiencing an upswing of 36.51 percent at 1,41,068 units.

Growth in Two-Wheelers remained strong led by the Motorcycle segment as the rural market was up and consumers had more disposable income in their hands. The Three-Wheeler segment also posted a healthy growth of 54.01 percent at 1,61,673 units.

Segment	Domestic Sales April-June		% Change

D. ADOPTION AND IMPACT OF ELECTRIC VEHICLES ON INDIA'S AUTOMOTIVE INDUSTRY:

The transition to Electric Vehicle in India will be gradual and in a phased manner as it has started late on the electrification path and needs a strong policy to catch-up and move rapidly towards the stated goal of hundred percent pure electric technology regime. There are challenges in availability of affordable models along with adequate infrastructure. With increasing urbanization, comes environmental challenges due to high levels of vehicle emissions. To combat this, governments across the world have announced regulations on emissions and efficiency that are expected to become stringent with time. In the case of India, crude oil imports account for a significant portion of the current account deficit and also create dependence on certain global regions to meet fuel needs of the Country.

For Auto Component manufacturers, adapting to EV technology is unlikely to impact business and credit profile in medium terms:

- Growth opportunities in certain product categories like batteries, starters and other electrical parts.
- Manufactures of Engine components and transmission parts like clutches and gear assemblies are planning to diversify into other component segments over long term.

Pure electric vehicle penetration currently remains quite low in India, ~0.1% in PVs, ~0.2% in 2Ws and practically nil for commercial vehicles due to several reasons including significant affordability gap and low level of consumers' acceptance (i.e. lack of demand), low level of electric vehicle manufacturing activities (i.e. lack of supply), lack of comparable products (especially in the 2W category), non-existent public charging infrastructure etc. Electrification emerges, as an increasingly attractive avenue of exploration, and e-mobility, or the "electrification of the automotive powertrain" in the form of EVs (e.g., battery-powered electric vehicles, hybrid electric vehicles, plug-in hybrid electric vehicles) could be the way forward. As per a NITI Aayog report, India could save 64 percent of energy demand for road transport and 37 percent of carbon emissions by 2030 by pursuing a shared, electric and connected mobility future.

The automotive industry is already feeling the effects of electrification or e-mobility, both globally and in India (Exhibit 3).

This trend could impact the automotive industry in different ways. It could cause overlaps in the value chain, affect the cost structure and render a few components obsolete. For example, electrification will gradually drive down demand for core value components like engines and transmission. This might push OEMs and suppliers to explore options beyond their traditional means of value addition. Uncharted areas like e-motors and battery services or packaging will emerge as more relevant and attractive. This could create an overlap between OEMs and suppliers, making it important for them to identify a collaborative model.

E. MEETING THE BS VI CHALLENGE

The Homologation of BS-VI vehicles is slated to commence by the early part of 2020 i.e., April 2020. With the earlier implementation of BS VI norm's it spurred a whirl of activity across the automotive sector and ancillary industries. The major Automotive components segment impacted are the Engine parts & Assembly, Fuel injection System and Exhaust System. The OEMs have been mulling various after-treatment technologies for cleaning tailpipe emissions and working in close sync with their supply chain to design the new components that will be leveraged for meeting the new emission regulations.

The challenge of BS-VI is that each variant will have to undergo changes. For instance, Maruti Suzuki has over 50 variants and it is working on all of them. Moreover, having adequate quantities of the BS-VI fuel in advance for testing and validation will pose a challenge.

The implementation of new emission norms will allow India to save as much as 1 gigatonne of carbon emissions between 2019-2030, and approximately \$60 billion in annual diesel and petrol costs in 2030.

F. NEW DRIVE REGULATIONS TECHNOLOGY AND INNOVATION ON THE AUTOMOTIVE SEGEMENTS:

The Government has prescribed new drive regulation for the upgradation of technology and innovation of the Automobile Sector as per following details :

Key Regulations	Indicative Time Line	Segment Impacted	Opportunity / Treat
Safety Features in Passenger Vehicles	Features such as Air bags, speed warning system, seat belt, alert system and vehicle reverse-gear sensor technology to be compulsory from July 2019	Electric and Electronic manufacturers and Drive Transmission manufacturers	It is an opportunity for the players largely involved in manufacturing safety systems.
Anti-Lock Brake systems (ABS)/ Combined Braking System (CBS)	ABS and CBS norms to be mandatorily for newly launched vehicles from April, 2019. CBS compulsory for all vehicles below 125cc and ABS compulsory for all vehicles above 125 cc	Brake Assembly and ABS/CBS unit manufacturers	Opportunity for assembly makers, ABS/CBS manufacturers.
V-VMP(Voluntary-Vehicle Fleet Modernisation Programme)	According to the new proposal , V-VMP is applicable to a CV with a life span of 20 years or more	Industry wide impact	Not much impact
National Mission for Electronic Mobility (NEMMP) –FAME (Faster Adoption and Manufacturing of Hybrid and Electric Vehicles)	<p>The Union Cabinet is expected to approve proposal to entail financial support of Rs.93.81 billion for next 5 years.</p> <p>Subsidy: Buses-Rs.72 Lakhs to Rs.1 Crore, Taxi-Rs.1.24 Lakhs and Autorickshaw-Rs.37,000 to Rs.61,000.</p> <p>Proposal to give capital investment subsidy of 20-25% to manufacturers of Electric Vehicle Components such as motor drive powertrain, etc.</p>	Battery manufacturers, Engine Manufacturers, Engine part like integrated starter generator	Opportunity for OEM's particularly in Bus segment, 3W segment as well as component manufacturers supplying Batteries and Electric Motors for EVs'.

G. INDIAN AUTO COMPONENTS INDUSTRY

The auto component industry is likely to grow at 10-12 per cent annually in the long term on rising rural income, higher disposable income and continued infrastructure activity. According to ICRA, a long-term compounded annual growth rate (CAGR) of 10-12 per cent for the industry (auto component) is expected and Operating margins for the industry are expected to be strong at 14 per cent for FY19. Riding strong volume growth across automotive segments, especially in the automotive original equipment (OEM manufacturers, the Indian auto component industry grew by 13 per cent during FY18, as per the ICRA report. The domestic aftermarket segment (barring battery and tyres) witnessed flattish revenue growth during FY18 as goods and services tax (GST) implementation impacted the dealer-distributor supply chain. The tyre and battery segment witnessed healthy replacement demand during FY18, with truck and bus (T&B) tyre replacement demand growing during FY18, post over three years of muted demand.

The Indian auto-components market contributes almost seven per cent to India's GDP and employs as many as 19 million people. The auto components sector has been observing robust growth, and turnover is anticipated to reach US\$ 200 billion by FY26 from US\$ 43.5 billion in FY17. India's exports of auto components could account for as much as 26 per cent of the market by 2021. Growth of the domestic auto components industry is expected to reach 13-15 per cent in FY18 on the back of high growth expectation in domestic passenger vehicles (PV) and two-wheelers (2W) segments.

India is emerging as global hub for auto component sourcing. A cost-effective manufacturing base keeps costs lower by 10-25 per cent relative to operations in Europe and Latin America. Relative to competitors, India is geographically closer to key automotive markets like the Middle East and Europe. Global auto component players are increasingly adopting a dual-shore manufacturing model, using overseas facilities to manufacture few types of components and Indian facilities to manufacture the others.

As per Automobile Component Manufacturers Association (ACMA) forecasts, automobile component exports from India are expected to reach US\$ 70-billion by 2026 from US\$ 10.9 billion in FY17. The Indian auto component industry aims to achieve US\$ 200 billion in revenues by 2026.

The market size for auto component sector increased by 11.5 per cent reaching to US\$ 43.5 billion in FY17 from US\$ 39 billion in FY16. Revenues have risen from US\$ 26.5 billion in FY08 to US\$ 43.5 billion in FY17 at a CAGR of 5.66 per cent during FY08-17.

H. OPPORTUNITIES AND THREATS/ CHALLENGES TO INDIAN AUTOMOTIVE INDUSTRY

OPPORTUNITIES

1. **Brighter Road Ahead:** The Indian automotive sector has ended the first quarter of 2018-19 with a robust double-digit growth of 18.1percent across segments. Therefore, the road ahead for the entire FY 2018-19 seems to be brighter and wider.
2. **Strong growth:** The demand for vehicles is increasing due to rising income, middle class, and a young population. Domestic sales of passenger vehicles expected to increase at a CAGR of 12.87 per cent between 2016-26. Utility vehicle sales increased 19.95 per cent year-on-year in April-November 2017.
3. **Automotive Mission Plan:** 2016-26 shows clear vision of government. The government aims to develop India as a global manufacturing centre.
4. **Introducing fuel-efficient vehicles:** Optimization of fuel-driven combustion engines and cost efficiency programs are good opportunities for the automobile market. Emerging markets will be the main growth drivers for a long time to come, and hence fuel efficient cars are the need of the hour.
5. **Strategic Alliances:** Making strategic alliances can be a smart strategy for Automobile companies. By using specialized capabilities & partnering with other companies, they can differentiate their offerings.
6. **Changing lifestyle & customer groups:** Three powerful forces are rolling the auto industry. Shift in consumer demand, expanded regulatory requirements for safety and fuel economy, and the increased availability of data and information. Also with the increase in nuclear families there has been increase in demand of two-wheelers & compact cars and this will grow further.
7. **Market expansion:** Entering new markets like Asian & BRIC nations will result in upsurge in demand of vehicles. After these markets, other markets are likely to emerge soon.
8. **OEM priorities:** Given the increase in electronic content, OEMs need to collaborate with suppliers and experts outside the traditional auto industry. Accomplishing this will require changes in the way OEMs function. OEMs will be looking to their top suppliers to co-invest in new global platforms & this will be the driving force in the future

CHALLENGES FOR THE AUTO INDUSTRY

1. **Intense Competition:** Presence of such a large number of players in the Automobile industry results into extensive competition, every company eating into others share leaving little scope for new players.
2. **Volatility in the fuel Prices:** At least for the passenger segment fluctuations in the fuel prices remains the determining factor for its growth.
3. **Sluggish Economy:** Macroeconomic uncertainty, Recession, un-employment etc. are the economic factors which will daunt the automobile industry for a long period of time.
4. **High fixed cost and investment in R & D:** Due to the fact that mature markets are already overcrowded, industry is shifting towards emerging markets by building R & D centers in these markets. But the ROI out of these decisions is yet to be capitalized.
5. **Cars recalled:** Controversies relating to recalling vehicles on account of some technical dis-functionality or non-abidance to govt. led rules is becoming very common.
6. **Bargaining power of consumers:** Over the last 3-4 decades the automobile market has shifted from demand to supply market. Availability of large number of variants, Stiff competition between them, and long list of alternatives to choose from has given power to customers to choose whatever they like.
7. **Government Regulations:** Growth rate of Automobile industry is in the hands of the government due to regulations like GST, no entry of outside vehicles in the state, decreasing number of validity of registration period & volatility in the fuel prices. These factors always affect the growth of the industry.

I. FINANCIAL REVIEW

Your Company recorded total Revenue of ₹ 17,340.21 million (net of excise) during the financial year 2017-18 as compared to ₹ 15,280.48 million in the previous year, an increase of 13.48%. The EBITDA has gone up by 18.39% during the financial year 2017-18 due to strong operational performance. The Profit Before Tax for the financial year 2017-18 amounts to ₹ 900.36 million as against ₹ 747.93 million for the previous year, showing an increase of 20.38%. The profit after tax has gone up in the financial year 2017-18 to ₹ 588.91 million as compared to ₹ 537.74 million in the previous year showing an increase of 9.52%. The reason for lower increase in Profit After Tax is due to non-availability of tax benefit under section 32AC of Income Tax Act in the current year.

In spite of significant increase in investment for its new plant in Vithlapur at Gujarat for Suzuki Motor Gujarat Private Limited, your company is able to maintain its financial cost and debt within control by prudent financial and cash flow management.

The FY 2018 was the best year for MSIL in spite of Demonetization and GST and it achieved double digit growth continuously from the last 4 years. The Japanese car maker also increased its market share to 52.54 percent in Q1 FY18, compared to 50.43% in the same period of Q1 FY17.

The market capitalization of the Company as on 31st March, 2018 stood at ₹ 8,118.75 million. Your Company's financial performance is in line with MSIL.

Today's world is unimaginable without automobiles. They are especially essential to the working population. Automobiles are complex, sophisticated machines which require regular mechanical and electrical service, replacement parts, paint, cleaning, stereo system installations and more. The automotive aftermarket provides these parts and services, and largely flourishes during economic uncertainty.

Additionally, there are many technological advances like live traffic updates, smart routing and tracking, roadside assistance in case of an accident, automatic toll transactions, automatic parking / parking management and much more. So, over the next decade, we can expect that internet-connected car technologies and self-directed vehicles are set to stir up yet another revolution in the automotive sector.

At this point, there aren't enough electric vehicles and they are too expensive to have a large influence on car market, but the forecast of the future car market is that the cost of owning an electrical car will be equal or below that of driving a car powered by fuel by the mid of 2020s.

The Indian Auto Components industry is preparing itself to meet the tough challenge of the electrification of the vehicles and is all set to become the third largest Auto Components Industry by 2025.

P. RISK AND CONCERNS

To reduce Quality risk, the Company has skilled workforce who are provided with job skill enhancement training. The Company regularly interacts with its suppliers and supervises by conducting periodical audit in their plants and ensures that the raw materials as well as the process meet out the Quality Standards.

On the advice of Risk Management Committee, the Company reviewed its risk library. One of the risks the Company identified is the risk of inadequate management of knowledge. The Company generates critical knowledge as part of its operation and its people possess valuable experience.

Following are some of the major risks that surrounds the auto industry:

1. **Rising Fuel Prices:** Slowdown in economic growth and rise in fuel prices will impact demand for new vehicles. The heavy trucks segment to remain down as high running cost due to expensive diesel and poor freight rates.
2. **Regulation:** Big swings in regulation could create pressure for automotive makers to rethink their supply base and manufacturing locations on quite a short notice.

Mitigation Measure: Although your Company does not have any control over this risk, we focus on process improvement in manufacturing and administration to build a sturdy future while increasing business competence.

3. **Quality:** Quality compromise could lead to loss of customer loyalty.

Mitigation Measure: To reduce quality risk, our skilled workforce is provided job skill enhancement training. We regularly interact with suppliers and supervises by conducting periodical audit in their plants. This helps ensure that the raw materials as well as the processes meet the quality standards.

4. **Consumer Demand:** India being a country where majority of the population belongs to middle class which is starting to buy cars and the industry is looking for ways to satisfy that demand. The difficulty in this game is that consumer tastes are fickle.
5. **High interest rates:** The automotive industry of India continues to face high interest rates, which could affect your Company. This could lead to possible risks that could arise due to stoppage of production of uncertain results of settlement negotiations leading to unpredictable cost structure.

Mitigation measure: Your Company has partnered with banks where most of its loan are procured at floating interest rate for taking the advantage of lower interest rate. Further, the Company has floated Commercial Paper to bring its borrowing cost below the bank rate of interest.

6. **Credit and default risk:** The receivables of your Company could rise owing to the prevailing liquidity tightness and subdued consumer demand.

Mitigation measure: Your Company closely monitors these risks and strives hard to take appropriate and timely action.

7. **Higher competition:** Your Company operates in a highly competitive market. Moreover, customers have started adopting de-risking strategies to maintain more than one source for a product.

Mitigation measure: Working closely with customers, your Company develops products to best meet customer requirements. We retain and motivate best talent through a focussed employee development program, which helps us stay competitive. Further, your Company continues investing in advanced technologies and upgrades production processes regularly to maintain the competitive edge.

8. **Manufacturing inputs and cost inflation:** Inflation has a direct impact on raw material cost. Thus, any significant upward movement in inflation can lead to rise in raw material prices.

Mitigation measure: Any increase/decrease in raw material costs is passed on to the customers by your Company. Further, your Company follows a strict budgetary control regime for cost reduction and stronger control of operating expenses.

9. **Currency depreciation:** These include risks owing to potential change in foreign currency rates in relation to INR.

Mitigation measure: Your Company's prudent management takes appropriate steps for Hedging foreign currency risks.

10. **Technology:** Technology obsolescence could lead to loss in market share.

Mitigation Measure: The Company have consistently delivered cutting edge technology products owing to the joint venture and association with the global majors, this mitigating the risk and being a front runner in the market.

U. ROAD AHEAD

According to the Society of Indian Automotive Manufacturers (SIAM), Indian automotive sector today is a \$74 billion industry and by 2026, the industry is expected to achieve a turnover of \$300 billion- clocking a CAGR of ~ 15 percent. The Automotive Mission Plan 2016-26 (AMP 2026) is the collective vision of Government of India (Government) and the Indian Automotive Industry on where the Vehicles, Auto components, and Tractor industries should reach over the next ten years in terms of size, contribution to India's development, global footprint, technological maturity, competitiveness, and institutional structure and capabilities.

The Indian Auto Component industry is among a few sectors that have a distinct global competitive advantage in terms of cost and quality. JBML focuses on end-to-end product solutions, from product development to manufacturing with the promise of reliability and technological contemporaneity. JBML is clearly positioned as a technology leader across product lines, backed by strong R&D and strategic JV partner having the latest technology across segments. Innovation and constant up gradation of products with enhanced features has been a key business strategy.

While on the one hand, the Indian Automotive market is witnessing the increased participation of global players, the shortened product life cycles, on the other hand, are opening up bigger opportunities for Indian OEMs to become global players in the true sense. It is also an opportunity for India to become a global hub for automotive components.

The Indian Auto Component market is likely to see regulatory changes in the near future with an emphasis on mandatory vehicular safety features such as air bags and reverse parking sensor systems. Many products, considered premium features today, will become part of the standard kit in the coming years. At JBML, we continuously evaluate our product portfolio and its technological readiness for the future, in the face of challenges posed by both emerging and disruptive technologies.

CERTIFICATE ON CORPORATE GOVERNANCE

To,

The Members of M/s Jay Bharat Maruti Limited

We have examined the compliance of conditions of Corporate Governance by M/s Jay Bharat Maruti Limited ('the Company'), for the year ended 31st March, 2018 as stipulated under Regulations 17 to 27, Regulation 46 and Paragraph C, D and E of Schedule V of The Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations").

The compliance of conditions of corporate governance is the responsibility of the management. Our examination was limited to the review of procedures and implementation thereof, as adopted by the Company for ensuring the compliance of the conditions of the Corporate Governance. It is neither an audit nor an expression of opinion on the financial statements of the Company.

In our opinion and to the best of our information and according to the explanations given to us, we certify that the Company has complied with the conditions of Corporate Governance as specified under Regulations 17 to 27, Regulation 46 and paragraph C, D and E of Schedule V of The Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015. However, after resignation of Shri Virender Ganda, Independent Director w.e.f 16th January 2018, the number of Independent Directors have come down to three from required four Independent Directors. The Company, through written representation, has informed us that the company took necessary steps to identify and appoint to fill the vacancy of Independent Director and the Nomination and Remuneration committee of the company has recommended Mr. Dhanendra Kumar (DIN:05019411) in its meeting held on 16th July 2018, to the Board of Directors for his appointment as Independent Director. The Board has appointed Mr. Dhanendra Kumar (DIN: 05019411) as Independent Director in its Board Meeting held on 16th July 2018.

We further state that such compliance is neither an assurance as to the future viability of the Company nor of the efficiency or effectiveness with which the management has conducted the affairs of the Company.

INDEPENDENT AUDITOR'S REPORT

To

The Members Of Jay Bharat Maruti Limited

Report on the Ind AS Financial Statements

We have audited the accompanying Ind AS Financial Statements of JAY BHARAT MARUTI LIMITED ("the Company"), which comprise the Balance Sheet as at 31st March, 2018, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of the significant accounting policies and other explanatory information.

Management's Responsibility for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the state of affairs (financial position), profit or loss (financial performance including other comprehensive income), cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards ("Ind AS") prescribed under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these Ind AS financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Ind AS financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including the Ind AS, of the state of affairs (financial position) of the Company as at 31st March, 2018, and its profit (financial performance including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Other Matter

The comparative financial information of the Company for the year ended March 31, 2017 included in these Ind AS financial statements are based on the previously issued statutory financial statements for the year ended March 31, 2017 prepared in accordance with the Ind AS which were audited by the predecessor auditor who expressed an unmodified opinion vide their report dated April 19, 2017.

The financial results of the Company for the quarter ended June 30, 2017, prepared in accordance with Ind AS were reviewed by another firm of chartered accountants who issued their unmodified conclusion, vide their report dated July 18, 2017.

Our opinion is not qualified in respect of these matters.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of Section 143(11) of the Companies Act, 2013 and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanation given to us, we give in "Annexure-A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143 (3) of the Act, we report that:
 - a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

ANNEXURE-B TO THE INDEPENDENT AUDITOR'S REPORT

(This is the annexure referred to in Para 2(f) of 'Report on Other Legal and Regulatory Requirements' of our Report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **JAY BHARAT MARUTI LIMITED** ("the Company") as of March 31, 2018 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- a. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- b. provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- c. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES ANNEXED TO AND FORMING PART OF THE ACCOUNTS

1. GENERAL INFORMATION

Jay Bharat Maruti Limited (JBML) ("The Company") is a public limited company incorporated in India, listed on Bombay Stock Exchange (BSE) and the National Stock Exchange (NSE). The address of its registered office is 601, Hemkunt Chambers, 89, Nehru Place, New Delhi, New Delhi-110019. The Company is a Associate of Maruti Suzuki India Limited. The principal activities of the Company are manufacturing of sheet metal components, rear axle, muffler assemblies, fuel neck and tools & dies for motor vehicles, components and spare parts.

The financial statements for the year ended March 31, 2018 were approved by the Board of Directors and authorize for issue on 16-04-2018.

NOTE-2 :- SIGNIFICANT ACCOUNTING POLICIES

2. Significant Accounting Policies

2.1 Statement of Compliance

The Financial Statements have been prepared as a going concern in accordance with Indian Accounting Standards (Ind AS) notified under the section 133 of the companies Act, 2013 ("the Act") read with the companies (Indian Accounting Standards) Rules, 2015 and other relevant provisions of the Act.

2.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost convention on accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the accounting policies mentioned below. Historical cost is generally based on the fair value of the consideration given in exchange of goods or services.

The principal accounting policies are set out below.

All assets and liabilities have been classified as current or non-current according to the Company's operating cycle and other criteria set out in the Act. Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of current or non-current classification of assets and liabilities.

2.3 Use of Estimates

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods affected.

2.4 Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are inclusive of excise duty and net of returns, cash discount, trade allowances, sales incentives and value added taxes and amount collected on behalf of third parties. The Company recognizes revenue when the amount of revenue and its related cost can be reliably measured and it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the Company's activities as described below. The Company bases its estimates on historical results, taking into consideration the type of customer, the type of transactions and the specifics of each arrangement.

Sale of goods

Revenue from sales of goods is recognized when the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on delivery of the goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts, volume rebates & cash discount.

Income from services

Income from services is recognized by reference to the stage of completion of the transaction at the end of the reporting period.

Dividend and interest income

Dividend income from investments is recognized when the shareholders' right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably).

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

For all Financial instruments measured either at amortized or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of the financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instruments but does not consider the expected credit losses. Interest income is included in other income in the Statement of Profit and Loss. Interest income in respect of financial instruments measured at fair value through profit or loss is included in other income.

2.5 Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Company as lessor

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases, such increases are recognised in the period in which such benefits accrue.

The Company as lessee

Assets held under finance leases are initially recognised as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Company's policy on borrowing costs.

Rental expense from operating leases is recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the period in which such benefits accrue.

2.6 Foreign Currencies

Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is the Company's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary

assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in statement of profit or loss.

Non-monetary items which are carried at historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items is recognised in line with the gain or loss of the item that gave rise to the translation difference (translation differences on items whose gain or loss is recognised in Other Comprehensive Income or the Statement of Profit and Loss is also recognised in Other Comprehensive Income or the Statement of Profit and Loss respectively).

2.7 Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets are deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognised in the Statement of Profit and Loss in the period in which they are incurred.

Borrowing costs consist of interest, which is computed as per effective interest method, and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

2.8 Employee Benefits

Short-term obligations

Liabilities for wages and salaries including non-monetary benefits that are expected to be settled within the operating cycle after the end of the period in which the employees render the related services are recognised in the period in which the related services are rendered and are measured at the undiscounted amount expected to be paid.

Other long-term employee benefit obligations

Liabilities for leave encashment and compensated absences which are not expected to be settled wholly within the operating cycle after the end of the period in which the employees render the related service are measured at the present value of the estimated future cash outflows which is expected to be paid using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period on Government bonds that have terms approximating to the terms of the related obligation. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in profit or loss.

Post-employment obligations

Defined benefit plans

The Company has defined benefit plans namely gratuity fund for employees. The gratuity fund is recognised by the income tax authorities and are administered through Trust set up by the LIC. Any shortfall in the size of the fund maintained by the Trust is additionally provided for in profit or loss.

The liability or asset recognised in the balance sheet in respect of gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by Actuary using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in profit or loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the Statement of Changes in Equity and in the Balance Sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in profit or loss as past service cost.

Defined contribution plans

The Company has defined contribution plans for post retirements benefits, namely, Employee Provident Fund Scheme administered through Provident Fund Commissioner and Superannuation Fund administered through Life Insurance Corporation of India. The Company's contribution are charged to revenue every year. The Company has no further payment obligations once the contributions have been paid. The Company's contribution to State Plans namely Employees' State Insurance Fund and Employees' Pension Scheme are charged to the Statement of Profit and Loss every year.

Termination Benefits

A liability for the termination benefit is recognised when the Company can no longer withdraw the offer of the termination benefit.

2.9 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the Statement of Profit and Loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences and incurred tax losses to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year

Current and deferred tax are recognised in the Statement of Profit and Loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the income taxes are also recognised in other comprehensive income or directly in equity respectively.

2.10 Property, Plant and Equipment (PPE)

Property, Plant and Equipment (PPE) are stated at cost of acquisition, net of accumulated depreciation and accumulated impairment losses, if any. Freehold land is measured at cost and is not depreciated.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. The other repairs and maintenance of revenue nature are charged to the Statement of Profit and Loss during the reporting period in which they have incurred.

Transition to IND AS

The Company has elected to use a previous GAAP cost (cost less accumulated depreciation and impairment losses (if any)) of an item of property, plant and equipment at, or before, the date of transition to Ind ASs as deemed cost at the date of transition in accordance with accounting policy option available in Ind AS 101

Depreciation methods, estimated useful lives and residual value

Depreciation is calculated using the straight-line method on a pro-rata basis from the month in which each asset is ready to use to allocate their cost, net of their residual values, over their estimated useful lives.

Estimated useful life of assets are as follows which is based on technical evaluation of the useful lives of the assets:

Property, plant and equipment	Useful lives based on technical evaluation
Plant & machinery	20 years
Electric Installation	20 years
Factory Building (Including Tube well)	28-29 Years
Vehicles	5 years
Furniture & Fixtures	5 years
Trolleys & Bins (Dies, Fixtures & Special Purpose Machine)	5 years
Dies, Fixtures & Jigs	3-9 years
Computers	3 Years
Office Equipments	5 Years

The assets' residual values, estimated useful lives and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis

Depreciation is charged on pro-rata basis for assets purchased / sold during the year. Individual assets costing ₹ 5000/- or less are depreciated in full in the year of purchase. Plant & Machinery and other assets the written down value of which at the beginning is the year is ₹ 5000/- or less and ₹ 1000/- or less respectively are depreciated at the rate of 100%.

Freehold is not amortised.

Gains and losses on disposal are determined by comparing proceeds with carrying amount and are credited / debited to profit or loss.

2.11 Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost of acquisition and are stated net of accumulated amortization and accumulated impairment losses, if any.

The cost of an intangible asset includes purchase cost (net of rebates and discounts), including any import duties and non-refundable taxes, and any directly attributable costs on making the asset ready for its intended use.

Transition to IND AS

The company has elected to use a previous GAAP cost (cost less accumulated depreciation and impairment losses (if any)) of an intangible assets at, or before, the date of transition to Ind ASs as deemed cost at the date of transition in accordance with accounting policy option in Ind AS 101.

Amortisation methods and useful lives

The Cost of Intangible assets are amortized on a straight line basis over their estimated useful life which is as follows.

Residual Value is considered as Nil in the below cases:

Nature of Assets	Life
Technical knowhow	3 years
Computer software	3 years

The amortisation period and method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit or loss when the asset is derecognized.

Impairment of Tangible and Intangible Assets

At the end of each reporting period, the Company reviews the carrying amount of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

2.12 Inventories

Inventories are valued at the lower of cost or net realizable value, less any provisions for obsolescence. Cost is determined on the following basis:-

Raw Material is recorded at cost on a first-in, first-out (FIFO) basis;

Stores & spares are recorded at cost on a weighted average cost formula.

Finished goods and work-in-process are valued at raw material cost + cost of conversion and attributable proportion of manufacturing overhead incurred in bringing inventories to its present location and condition.

By products and scrap are valued at net realizable value.

Machinery spares (other than those qualified to be capitalized as PPE and depreciated accordingly) are charged to profit and loss on consumption

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

2.13 Provisions and contingencies

Provisions

Provisions are recognized when there is a present obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are determined by discounting the expected future cash flows at a pretax rate that reflects current market assessment of the time value of money and the risks specific to the liability.

Provisions are determined based on best management estimate required to settle the obligation at balance sheet date. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate

Contingent Liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non- occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Contingent Assets

Contingent asset being a possible asset that arises from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company, is not recognized but disclosed in the financial statements.

2.14 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial instruments (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

Financial assets

All recognised financial assets are subsequently measured in their entirety at either amortised cost using the effective interest method or fair value, depending on the classification of the financial assets

Classification of financial assets

Classification of financial assets depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

A financial asset that meets the following two conditions is measured at amortised cost unless the asset is designated at fair value through profit or loss under the fair value option:

- Business model test : the objective of the Company's business model is to hold the financial asset to collect the contractual cash flows.
- Cash flow characteristic test : the contractual term of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset that meets the following two conditions is measured at fair value through other comprehensive income unless the asset is designated at fair value through profit or loss under the fair value option:

- Business model test : the financial asset is held within a business model whose objective is achieved by both collecting cash flows and selling financial assets.
- Cash flow characteristic test : the contractual term of the financial asset gives rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are measured at fair value through profit or loss

2.15 Investments in equity instrument at fair value through other comprehensive income (FVTOCI)

On initial recognition, the Company can make an irrevocable election (on an instrument by instrument basis) to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instrument. This election is not permitted if the equity instrument is held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains / losses arising from changes in fair value recognised in other comprehensive income. This cumulative gain or loss is not reclassified to the Statement of Profit and Loss on disposal of the investments.

The Company has equity investments in certain entities which are not held for trading. The Company has elected the fair value through other comprehensive income irrevocable option for all such investments. Dividend on these investments are recognised in Statement of Profit & Loss.

Financial assets at fair value through profit or loss (FVTPL)

Investment in equity instrument are classified at fair value through profit or loss, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Financial assets that do not meet the amortised cost criteria or fair value through other comprehensive income criteria are measured at fair value through profit or loss. A financial asset that meets the amortised cost criteria or fair value through other comprehensive income criteria may be designated as at fair value through profit or loss upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets and liabilities or recognising the gains or losses on them on different bases.

Financial assets which are fair valued through profit or loss are measured at fair value at the end of each reporting period, with any gains or losses arising on Remeasurement recognised in profit or loss.

2.16 Trade receivables

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost less provision for impairment.

2.17 Cash and cash equivalents

In the cash flow statement, cash and cash equivalents includes cash in hand, cheques and balances with bank. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet and forms part of financing activities in the cash flow statement. Book overdraft are shown within other financial liabilities in the balance sheet and forms part of operating activities in the cash flow statement.

2.18 Impairment of Financial Assets:-

The Company assesses impairment based on expected credit losses (ECL) model to the following:

- financial assets measured at amortised cost
- financial assets measured at fair value through other comprehensive income

Expected credit loss are measured through a loss allowance at an amount equal to :

- the twelve month expected credit losses (expected credit losses that result from those default events on the financial instruments that are possible within twelve months after the reporting date); or
- full life time expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Derecognition of financial assets

A financial asset is derecognised only when

- The Company has transferred the rights to receive cash flows from the financial asset or
- Retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients
- The right to receive cash flows from the asset has expired.

Foreign Exchange Gains and Losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the exchange rate at the end of each reporting period. For foreign currency denominated financial assets measured at amortised cost or fair value through profit or loss the exchange differences are recognised in profit or loss except for those which are designated as hedge instrument in a hedging relationship. Further change in the carrying amount of investments in equity instruments at fair value through other comprehensive income relating to changes in foreign currency rates are recognised in other comprehensive income.

2.19 Financial liabilities and equity instruments

2.19.1 Classification of debt or equity

Debt or equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.19.2 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

2.19.3 Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest rate method or at fair value through Statement of Profit and Loss.

2.19.3.1 Trade and other payables

Trade and other payables represent liabilities for goods or services provided to the Company prior to the end of financial year which are unpaid.

2.19.3.2 Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in Statement of Profit and Loss over the period of the borrowings using the effective interest rate method.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired.

The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in Statement of Profit and Loss.

2.19.3.3 Foreign exchange gains or losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in profit or loss.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the exchange rate at the end of the reporting period. For financial liabilities that are measured as at fair value through profit or loss, the foreign exchange component forms part of the fair value gains or losses and is recognised in Statement of Profit and Loss.

2.19.3.4 Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired.

2.20 Derivative Financial Instruments:-

The Company enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, interest rate and cross currency swaps.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in statement of profit & loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in Statement of Profit and Loss depends on nature of the hedging relationship and the nature of the hedged item.

2.21 Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

2.22 Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the balance sheet on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above

2.22 Earnings Per Share

Basic Earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. For the purpose of calculating Diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares, except where the result would be anti-dilutive.

2.23 Rounding of amounts

All amounts disclosed in the financial statements and the accompanying notes have been rounded off to the nearest lacs as per the requirement of Schedule III of the Companies Act 2013, unless otherwise stated

2.24 Dividends

Final dividends on shares are recorded on the date of approval by the shareholders of the Company.

2.25 Royalty

The Company pays/accrues for royalty in accordance with the relevant licence agreements.

NOTE 35: EARNING PER SHARE

Basic EPS amounts are calculated by dividing the profit for the year attributable to equity holders of the Company by the weighted average number of Equity Shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit attributable to equity holders of the Company by the weighted average number of Equity Shares outstanding during the year plus the weighted average number of Equity Shares that would be issued on conversion of all the dilutive potential Equity Shares into Equity Shares, unless the effect of potential dilutive equity share is antidilutive.

The following reflects the income and share data used in the basic and diluted EPS computations:

NOTE 43 : LEASES

OPERATING LEASE : COMPANY AS LESSEE

The Company leases mainly office facilities under cancellable operating lease agreements. Minimum lease payments under operating lease are recognized on a straight line basis over the term of the lease. Rent expense for operating leases for the year ended March 31, 2018 and March 31, 2017 was Rs 226.23 Lakhs and Rs 167.82 Lakhs respectively. There are no restrictions imposed by the lease agreements and there are no sub leases. There are no contingent rents. The operating lease agreements are renewable on a periodic basis. Some of these lease agreements have price escalation clause.

OPERATING LEASE : COMPANY AS LESSOR

The Company has given small portion of freehold land under cancellable operating lease arrangements. Minimum lease rentals under operating leases are recognized on a straight line basis over the term of the lease. Rent income for operating leases for the year ended March 31, 2018 and March 31, 2017 was Rs. 28.92 Lakhs and Rs. 28.92 Lakhs respectively.

NOTE 44 : EMPLOYMENT BENEFITS

A Defined Benefit Plans as per Ind AS 19 Employee Benefits: Gratuity

The Company has a defined benefit gratuity plan. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn salary) for each completed year of service. These benefits are funded.

The following tables summaries the components of net benefit expense recognized in the Statement of Profit and Loss and the funded status and amounts recognized in the balance sheet.

These Plans typically expose the Company to actuarial risks such as : Investment risk, Interest rate risk, Longevity risk and Salary risk.

Investment Risk: The Probability or likelihood of occurrence of losses relative to the expected return on any particular investment.

Interest Risk: The Plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability.

Longevity risk : The present value of defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants during employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk : The present value of the defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.

- Impact due to increase of 1.00 %	40.69	34.40
- Impact due to decrease of 1.00 %	(35.82)	(33.97)

The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligation liability recognised in the Balance Sheet.

The Company is expected to contribute Rs 153.53 lakhs to Defined Benefit Plan Obligation Funds in next year

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to prior period.

The figures for the year ended 31st March 2018 are strictly not relatable to FY 31st March 2017 as consequent to introduction of Goods and Services Tax (GST) with effect from 1st July, 2017 Central Excise , Value Added Tax (VAT) etc. have been subsumed into GST. In accordance with Indian Accounting Standard-18 on Revenue and Schedule III of the Companies Act 2013, unlike Excise Duties, levies like GST, VAT etc. are not part of the Revenue

Terms and conditions of transactions with Related Parties

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions. Outstanding balances at the year-end are unsecured and interest free and settlement occurs in cash. There have been no guarantees provided or received for any related party receivables or payables. For the year ended 31 March 2018, the Company has not recorded any impairment of receivables relating to amounts owed by related parties (31 March 2017: INR Nil). This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.

Note 46 : SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. These include recognition and measurement of financial instruments, estimates of useful lives and residual value of Property, Plant and Equipment and Intangible Assets, valuation of inventories, measurement of recoverable amounts of cash-generating units, measurement of employee benefits, actuarial assumptions, provisions etc.

Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The Company continually evaluates these estimates and assumptions based on the most recently available information. Revisions to accounting estimates are recognized prospectively in the Statement of Profit and Loss in the period in which the estimates are revised and in any future periods affected.

Judgments

In the process of applying the Company's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the financial statements:

Operating lease commitments – Company as lessor

The Company has entered into leasing arrangements wherein the Company is receiving lease rental income. The Company has determined, based on an evaluation of the terms and conditions of the arrangements e.g. lease term, lease rental income, fair value of the land, transfer / retention of significant risks and rewards of ownership of land determined the lease as operating leases.

Operating lease commitments – Company as lessee

The Company has entered into leasing arrangements wherein the Company is required to pay monthly lease rentals. The Company has determined, based on an evaluation of the terms and conditions of the arrangements e.g. lease term, lease rental income, fair value of the land, transfer / retention of significant risks and rewards of ownership of land determined the lease as operating leases.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(i) Gratuity benefits

The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexity of the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

In determining the appropriate discount rate, management considers the interest rates of government bonds, and extrapolated maturity corresponding to the expected duration of the defined benefit obligation. The mortality rate is based on publicly available mortality tables. Future salary increases and pension increases are based on expected future inflation rates. Further details about the assumptions used, including a sensitivity analysis, are given in Note 44 .

(ii) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the discounted cash flow (DCF) model based on level-2 and level-3 inputs. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as price estimates, volume estimates, rate estimates etc. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

(iii) Impairment of financial assets

The impairment provisions for trade receivables are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation based on the Company's past history and other factors at the end of each reporting period.

(iv) Estimates related to useful life of tangible assets :

Depreciation on tangible assets is calculated on a straight-line basis over the useful lives estimated by the management. These rates are in line with the lives prescribed under Schedule II of the Companies Act, 2013.

The management has re-estimated useful lives and residual values of all its assets. The management based upon the nature of asset, the operating condition of the asset, the estimated usage of the asset, past history of replacement and anticipated technological changes, believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment.

(v) Impairment of Assets

An impairment exists when the carrying value of an asset exceeds its recoverable amount. Recoverable amount is the higher of its fair value less costs to sell and its value in use. The value in use calculation is based on a discounted cash flow model. In calculating the value in use, certain assumptions are required to be made in respect of highly uncertain matters, including management's expectations of growth in EBITDA, long term growth rates; and the selection of discount rates to reflect the risks involved.

(vi) Contingent liabilities

The contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company. The Company evaluates the obligation through Probable, Possible or Remote model ('PPR'). In making the evaluation for PPR, the Company take into consideration the Industry perspective, legal and technical view, availability of documentation/agreements, interpretation of the matter, independent opinion from professionals (specific matters) etc. which can vary based on subsequent events. The Company provides the liability in the books for probable cases, while possible cases are shown as contingent liability. The remotes cases are not disclosed in the financial statement.

(vii) Taxes

Provision for tax liabilities require judgments on the interpretation of tax legislation, developments in case law and the potential outcomes of tax audits and appeals which may be subject to significant uncertainty. Therefore the actual results may vary from expectations resulting in adjustments to provisions, the valuation of deferred tax assets, cash tax settlements and therefore the tax charge in the Statement of Profit or Loss.

NOTE 47 : FINANCIAL INSTRUMENTS**A Capital management**

The Company manages its capital to ensure that the Company will be able to continue as a going concern while maximising the return to stakeholders through efficient allocation of capital towards expansion of business, optimisation of working capital requirements and deployment of surplus funds into various investment options

The management of the Company reviews the capital structure of the Company on regular basis. As part of this review, the Board considers the cost of capital and the risks associated with the movement in the working capital.

The Group monitors its capital using gearing ratio, which is net debt divided to total equity. Net debt includes, Loans and borrowings less cash and cash equivalents.

(₹ in Lakhs).		
Particulars	31 Mar, 18	31 Mar, 17
Net debt	29604.43	25340.54
Total equity	36024.41	30445.87
Net debt to equity ratio	0.82	0.83

B. Fair value measurements

The Company uses the following hierarchy for determining and/or disclosing the fair value of financial instruments by valuation techniques:

The following is the basis of categorising the financial instruments measured at fair value into Level 1 to Level 3:

- Level 1: This level includes financial assets that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: This level includes financial assets and liabilities, measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: This level includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part, using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

The fair value of the financial assets are determined at the amount that would be received to sell an asset in an orderly transaction between market participants. The following methods and assumptions were used to estimate the fair values: Quoted equity investments: Fair value is derived from quoted market prices in active markets.

Fair value of the Company's financial assets that are measured at fair value on a recurring basis:

There are certain Company's financial assets which are measured at fair value at the end of each reporting period. There have been no transfer among levels during the period. Following table gives information about how the fair values of these financial assets are determined:

The Company enters into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques which employs the use of market observable inputs. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the respective currencies, currency basis spreads between the respective currencies, interest rate curves and forward rate curves of the underlying commodity. All derivative contracts are fully cash collateralised, thereby eliminating both counterparty and the Company's own non-performance risk.

D. Financial Risk Management

The Company has a Risk Management Committee established by its Board of Directors for overseeing the Risk Management Framework and developing and monitoring the Company's risk management policies. The risk management policies are established to ensure timely identification and evaluation of risks, setting acceptable risk thresholds, identifying and mapping controls against these risks, monitor the risks and their limits, improve risk awareness and transparency. Risk management policies and systems are reviewed regularly to reflect changes in the market conditions and the Company's activities to provide reliable information to the Management and the Board to evaluate the adequacy of the risk management framework in relation to the risk faced by the Company.

The risk management policies aims to mitigate the following risks arising from the financial instruments:

- Market risk
- Credit risk; and
- Liquidity risk

D.1 Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the market prices. The Group is exposed in the ordinary course of its business to risks related to changes in foreign currency exchange rates and interest rates.

a) Foreign currency risk management

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency) and foreign currency loans and borrowings (Foreign currency Buyer's credit).

Foreign Currency Exposure that have been hedged by derivative Instrument are given below.

Liabilities/Assets	Foreign Currency (In Lakhs)		INR Equivalent (Lakhs)	
	As at 31-03-2018	As at 31-03-2017	As at 31-03-2018	As at 31-03-2017
Liabilities				
USD	58.48	49.61	3,811.43	3,217.46

Foreign Currency Exposure that have not been hedged by derivative Instrument are given below.

Liabilities/Assets	Foreign Currency (₹In Lakhs)		INR Equivalent (₹ in Lakhs)	
	As at 31-03-2018	As at 31-03-2017	As at 31-03-2018	As at 31-03-2017
Liabilities				
USD	2.63	17.56	171.59	1,138.91
JPY	1,589.18	704.03	977.19	408.27
EURO	3.14	-	253.78	-
Assets				
USD	8.71	3.61	567.93	234.14
Euro	-	5.35	-	370.93

The Company has taken cross currency interest rate swaps to hedge its foreign currency exposures in relation to Foreign Currency Buyer's credits availed by the Company. The Company had negotiated the terms of CCIRS to match the terms of the hedged exposure. Further, the Company has not entered into any derivative or hedging instruments in relation to its foreign currency exposures other than Foreign Currency Buyer's credits.

Foreign currency sensitivity analysis

The following tables demonstrate the sensitivity to a reasonably possible change in USD and JPY exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives. The Company's exposure to foreign currency changes for all other currencies is not material.

Impact on Profit / (loss) for the year for a 5% change:

Particulars	Increase		Decrease	
	31-Mar-18	31-Mar-17	31-Mar-18	31-Mar-17
Payables				
USD /INR	(8.58)	(20.99)	8.58	20.99
YEN/INR	(48.86)	(20.41)	48.86	20.41
EURO/INR	(12.69)	-	12.69	-
Receivables				
USD /INR	(28.40)	11.71	28.40	(11.71)
EURO/INR	-	18.55	-	(18.55)

b) Interest rate risk management

The Company is exposed to interest rate risk because Company borrow funds at both fixed and floating interest rates. The risk is managed by the Company by maintaining an appropriate mix between fixed and floating rate borrowings. The Company's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note. The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. In respect of the Foreign Currency Buyers Credits denominated in US Dollars (USD), the Company is having 6 months Libor linked rate. To mitigate the risk of any adverse interest rate movement, the Company has entered into Cross Currency Interest Rate Swaps (CCIRS) i.e. pay fixed receive variable rate of interest. In the event of any adverse movement of interest rates, the Company is required only to pay the fixed interest eventually thereby offsetting the interest loss from the CCIRS. Accordingly, no sensitivity analysis in respect of such loans is given.

Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk

internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

Impact on Profit / (loss) for the year for a 50 basis point change:		
	Increase/decrease in basis points	Effect on profit before tax
31 Mar, 18		
INR loans	+50	-129.52
INR loans	-50	129.52
31 Mar, 17		
INR loans	+50	-49.06
INR loans	-50	49.06

c) Security Price Risk

The Company is exposed to equity price risks arising from equity investments held by the Company and classified in the balance sheet as fair value through OCI

Equity Price Sensitivity Analysis

The Sensitivity Analysis below have been determined based on the exposure to equity price risks at the end of the reporting period.

If the equity prices had been 5% higher/lower:

Other comprehensive income for the year ended 31st March 2018 would increase / decrease by ₹ 53.61 lacs (for the year ended 31st March 2017: increase / decrease by ₹ 38.40 lacs) as a result of the change in fair value of equity investment measured at FVTOCI

D.2 Credit Risk Management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company has adopted a policy of only dealing with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults. The Company's exposure and wherever appropriate, the credit ratings of its counterparties are continuously monitored and spread amongst various counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the management of the Company

Financial instruments that are subject to concentrations of credit risk, principally consist of balance with banks, trade receivables, loans and advances and derivative financial instruments. None of the financial instruments of the Company result in material concentrations of credit risks.

Balances with banks were not past due or impaired as at the year end. In other financial assets that are not past dues and not impaired, there were no indication of default in repayment as at the year end.

D.3 Liquidity Risk Management

Liquidity risk refers to the risk that the Company can not meet its financial obligations. The objective of liquidity risk management is to maintain sufficient liquidity and to ensure funds are available for use as per the requirements.

The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of long term borrowings, short term borrowings and trade payables etc. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

	Less than 1 year	1 to 5 years	> 5 years	Total

NOTE 48 : EVENTS AFTER THE REPORTING PERIOD

There are no reportable events that occurred after the end of the reporting period.

NOTE 49 : AMENDMENTS TO STANDARDS THAT ARE NOT YET EFFECTIVE AND HAVE NOT BEEN ADOPTED BY THE COMPANY

Appendix B to Ind AS 21, Foreign currency transactions and advance consideration:

On March 28, 2018, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency.

The amendment will come into force from April 1, 2018. The Company has evaluated the effect of this on the financial statements and the impact is not material.

Ind AS 115- Revenue from Contract with Customers:

On March 28, 2018, Ministry of Corporate Affairs ("MCA") has notified the Ind AS 115, Revenue from Contract with Customers. The core principle of the new standard is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Further the new standard requires enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers.

The standard permits two possible methods of transition:

- Retrospective approach - Under this approach the standard will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8- Accounting Policies, Changes in Accounting Estimates and Errors
- Retrospectively with cumulative effect of initially applying the standard recognized at the date of initial application (Cumulative catch - up approach).

The effective date for adoption of Ind AS 115 is financial periods beginning on or after April 1, 2018.

The Company is evaluating the requirements of the amendment and its effect on the financial Statements.

The Board recommends the resolution for your approval.

None of the Directors of the Company except Mr. S. K. Arya, Mr. Nishant Arya, son of Mr. S.K. Arya and Ms. Esha Arya, Daughter of Mr. S.K. Arya shall be treated as concerned or interested in this resolution except and to the extent they are members in the Company.

ITEM NO. 6

The members of the Company are hereby informed that the Company had taken an approval of the shareholders for issuing the non-convertible debentures through private placement basis by passing a special resolution through Postal ballot process in the previous year.

Further, as per the provisions of section 42 of the Companies Act, 2013 and the rules made thereunder, special resolution is valid for one year in case of offer or invitation for non-convertible debentures. Since, the Company has not issued the Non-Convertible debentures during the last one year, the validity of the special resolution has expired.

The Company is in the continued process of expansion of its manufacturing capacity of the plant at Vithalapur, Gujarat to cater the requirements of M/s Suzuki Motor Gujarat Private Limited & Maruti Suzuki India Ltd.. The investment for expansion of said Project is being funded through Loans/debts and Internal accruals. In order to meet the additional funds requirements, the Company is exploring options to raise the funds in the form of Unsecured/ Secured Non-Convertible Debentures ('NCDs')/ Bonds on private placement basis.

The Board has at their meeting held on 16th July, 2018, recommended to the shareholders to give their consent to the Board of Directors or any Committee of the Board to borrow and raise funds by issue of NCDs on private placement basis, up to an amount of Rs. 150 Crores [Rupees One Hundred and Fifty Crores Only] under section 42 and 71 read with section 179 of the Companies Act, 2013.

Such issue shall be subject to overall borrowing limits of the Company as approved by the shareholders and will be issued in terms of the provisions of the Act, Articles of Association of the Company and Securities and Exchange Board of India (Issue and Listing of Debt Securities) Regulations, 2008 and other applicable laws, if required.

Pursuant to sections 42 and 71 of the Act read with rule 14 of the Companies [Prospectus and Allotment of Securities] Rules, 2014, a Company offering or making an invitation to subscribe to NCDs on a private placement basis is required to obtain prior approval of the shareholders by way of a Special Resolution.

For NCDs, it shall be sufficient if the company passes a previous Special Resolution only once in a year for all the offers or invitation for such NCDs during the year. Thus such approval by way of Special Resolution shall be valid for a year for all offers and invitations for such NCDs to be made during the year.

Accordingly, it is proposed to raise funds through Private Placement of NCDs in one or more tranches during a year starting from the date of approval of the Special Resolution by the shareholders of the Company. Such NCDs shall be issued to such person or persons, who may or may not be the members of the Company, as the Board or any duly constituted Committee of the Board or such other authority as may be approved by the Board, may think fit and proper.

The resolution contained in Item No. 6 of the accompanying Notice, accordingly, seek members' approval for raising funds through Private Placement of NCDs in one or more tranches during a year starting from the date of approval of Special Resolution by the members of the Company and authorizing the Board of Directors or any duly constituted Committee of the Board or such other authority as approved or as may be approved by the Board of the Company to complete all the formalities in connection with the issue of NCDs.

None of the Directors or Key Managerial Personnel of the Company or their relatives are, in any way, concerned or interested in the proposed resolution.

The Board recommends the resolution as set out in the Notice for your approval as Special Resolution.
