Letter to Shareowners

My dear fellow Shareowners,

I am happy to share that our Company has completed 10 years. Financial Year 2017-18 has been an iconic year for us. Let me share with you the highlights of the Company's performance.

The Company made significant progress during the year towards improving operational performance across its core segments, and is fully geared to capitalise on its growth aspirations. We continue to move forward in fulfilling the vision of our legendary founder, Padma Vibhushan Shri Dhirubhai Ambani, to make sure that every Indian who desires a home can own it and, we, at Reliance Home Finance act as enablers.

While the housing finance companies have been able to grow at a faster pace, owing to their focus on niche segments such as self-employed and affordable housing segments which have huge growth potential, the initiatives and economic reforms taken by the Government such as implementation of Goods and Services Tax (GST), Jan Dhan Yojana, Demonetization, etc. have been very positive for financial services sector; particularly for the housing finance sector.

Owing to the growing housing finance sector, the government's initiatives like "Pradhan Mantri Awas Yojana (PMAY) and Housing For All" by 2022; better access to the capital markets, your Company's equity shares were successfully listed on BSE and NSE with effect from September 22, 2017. The existing shareholders of Reliance Capital Limited ("Reliance Capital"), the Company's holding company; were given one free share of RHF for every share held by them in Reliance Capital.

Today, your Company is reckoned amongst India's leading housing finance companies serving over 45,000 customers and has a clear focus on creating value by expanding the book size along with a robust growth in the net worth, and superior asset quality. Over the period, we have developed our expertise in Home Loans including Affordable Housing Loans, Loan against Property (LAP) and Construction Finance product segments.

The Policy was reviewed and revised by the Board at its meeting held on April 24, 2018.

Objective

The Objective of this Policy is to establish the parameters to be considered by the Board of Directors of the Company before declaring or recommending dividend.

Circumstances under which the shareholders of the listed entities may or may not expect dividend

The shareholders of the Company may not expect dividend in the below mentioned circumstances:

- i. In the event of a growth opportunity where the Company may be required to allocate a significant amount of capital.
- ii. In the event of higher working capital requirement for business operations or otherwise.
- iii. In the event of inadequacy of cashflow available for distribution.
- iv. In the event of inadequacy or absence of profits.
- v. In the event of any regulation or contractual restriction.

In such event, the Board will provide rationale in the Annual Report.

Parameters to be considered before recommending dividend

Dividends will generally be recommended by the Board once a year, after the announcement of the full year results and before the Annual General Meeting (AGM) of the shareholders, as may be permitted by the Act. Macro Economy

While the world economy grew by 3.2 per cent and 3.7 per cent, respectively, in 2016 and 2017, the Indian economy expanded by a sharper 7.1 per cent and 6.7 per cent, respectively, making it the fastest growing large economy in the world, ahead of China (+6.7 per cent and +6.8 per cent), and significantly healthier than the performance of South Africa (+0.3 per cent and +0.9 per cent), Brazil (-3.5 per cent and +1.1 per cent) and Russia (-0.2 per cent and +1.8 per cent) (According to the data released by the International Monetary Fund (IMF) in January 2018).

The Union Budget for 2018-19, focused on uplifting the rural economy and strengthening of the agriculture sector, healthcare for the economically less privileged, infrastructure creation and improvement in the quality of education of the country. In the budget, the Government is committed towards doubling the farmers' income by 2022. A total of ₹ 14.34 lakh crore (US\$ 225.43 billion) will be spent for creation of livelihood and infrastructure in rural areas. Budgetary allocation for infrastructure is set at ₹ 5.97 lakh crore (US\$ 93.85 billion) for 2018-19. All-time high allocations have been made towards the rail and road sectors.

Although the nation is not immune to the global trends, the focus on initiatives to curtail economic evils like tax evasion, counterfeit currency, corruption and terrorism would help the country grow at a much higher pace. The Government's initiatives

like demonetization, implementation of Goods and Service Tax (GST) and introduction of The Real Estate (Regulation and Development) Act, 2016 (RERA) would also help in building a positive business environment, which is expected to drive an overall economic growth to higher levels.

India is expected to emerge as one of the fastest growing major economy in the world as its GDP is estimated to have increased 7.4 per cent in 2018 and is expected to grow 7.8 per cent in 2019.

Indian Housing Finance sector

The prospects of housing finance industry are closely linked to country's economic growth which impacts primary as well as secondary real estate sales, interest rate environment, government policies, and income levels of individuals and saving habits.

The mortgage penetration levels in India has increased to approx. 10 per cent as on March 31, 2018 while it was 8 per cent as on March 31, 2014, but still it continues to be lower than the developed countries. This shows a significant scope for further growth.

Over the last 5 years (FY13-FY18), the housing credit growth has remained steady despite a tough operating environment, subdued real estate demand and low affordability levels. This could be attributed to construction linked housing loans (and thus disbursements being linked to construction stages), secondary sales and low mortgage penetration in India. Housing Finance Companies (HFCs) have been able to grow at a faster pace, owing to their focus on niche segments such as self-employed and affordable housing segments which have been largely served by the HFCs and have higher growth potential. The total housing credit outstanding was approx. ₹ 16 trillion as on March 31, 2018.

While there has been a temporary slowdown in the growth for the sector due to the implementation of the demonetization and GST along with the imposition of RERA, the long-term growth outlook remains positive.

Initiatives by the Government

The Government further sweetened the deal for prospective home buyers by permitting them to utilise as much as 90 per cent of their accumulated Employee Provident Fund Organisation (EPFO) corpus for purchase or construction of a home. Additionally, the remainder corpus and monthly contributions can now be used to service home loan EMI's.

Increasing supply, moderating prices, low effective interest rates and strong wage inflation will boost affordability. The outlook for the housing sector is very bright and the sector will see an elongated period of steady growth.

The Government and various sectoral regulators have also done much to direct efficient funding to the housing sector. The granting of infrastructure status to affordable housing widened access to cost effective long-term funding from external commercial borrowing, insurance companies and pension provident fund. The Government has also implemented initiatives such as "Pradhan Mantri Awas Yojana" (PMAY) to promote the provision of housing, which has also increased the demand for housing loans, particularly in the affordable housing segment. Tax incentives on home loans, for both principal and interest repayment, and subsidies under CLSS for EWS, LIG and MIG segments have further decreased the effective rate of interest on housing loans.

SEBI had increased the cap for mutual fund investment into HFCs rated AA and above, permitting investment into HFC's by upto 15 per cent in addition to the 25 per cent sectoral cap in place.

Risks and Concerns

RHFL is exposed to specific risks that are particular to its businesses and the environment within which it operates, including market risk, competition risk, credit risk, liquidity and interest rate risk, human resource risk, operational risk, information security risks, regulatory risk and macro-economic risks.

Market risk

The Company has also raised funds through issue of Market Linked Debentures, whose returns are linked to relevant underlying market instruments or indices. RHFL continuously

Management Discussion and Analysis

monitors market exposure for both equity and debt and, in appropriate cases, also uses various derivative instruments as a hedging mechanism to limit volatility.

Competition risk

The housing finance sector is becoming increasingly competitive and the Company's growth will depend on its ability to compete effectively. The Company's main competitors are other HFCs, Banks and Non - Banking Financial Companies (NBFCs). The Company's strong brand image, wide distribution network, diversified product offering and quality of management, place it in a strong position to deal with competition effectively.

Credit risk

Credit risk is a risk arising out of default or failure on the part of borrowers in meeting their financial obligations towards repayment of loans. Thus, credit risk is a loss as a result of non-recovery of funds lent both on principal and interest counts. This risk is comprehensively addressed both at the strategic level and at the client level. There is a robust governance framework with risk oversight being provided by the Risk Management Committee.

Stringent standards have been stipulated for customer identification and evaluation of credit proposals. Critical underwriting activities are automated. Comprehensive product program guidelines have been developed to suit various products requirements and appropriate delegation and deviation grids have been put in place. Each credit proposal is evaluated on various lending parameters both in qualitative and quantitative terms. Proper security, industry norms and ceilings have been prescribed to ensure diversifying risks and to avoid concentration risk. Cross references to credit bureau data are made to assess the credit behavior of the prospective customers. Since most of the loans are secured against assets (residential and commercial properties) which are valued by independent agencies and loan to value ratio is restricted, chances of non-recoverability in case of default are minimised. Company has put in place monitoring mechanisms commensurate with nature and volume of activities. Any early signal of default is addressed on priority to minimise / prevent credit loss. Regular portfolio risk analysis is done extensively on various financial and policy parameters for making required changes in the credit policy as a proactive approach to risk management. The Indian housing finance industry is highly competitive and the Company may compete directly with large HFCs and large public and private sector banks, which have larger retail customer bases, larger branch networks and greater access to capital than the Company. Large HFCs and Indian banks have made significant investments in retail credit in recent periods and currently have a larger market share in the retail home loan credit segment as compared to medium sized HFCs. If the Company is unable to compete with such large HFCs and Banks, by reason of our lesser experience in retail Home Loans or otherwise, its business, results of operations and financial condition could be affected to some extent. With the experience and market knowledge the Company has gained over the years in the housing finance business and is well placed to be the preferred provider of housing finance in coming years.

Liquidity and Interest Rate risk

The Company is exposed to liquidity risk principally, as a result of lending and investment for periods which may differ from those of its funding sources. RHFL's treasury team actively manages asset liability positions in accordance with the overall guidelines laid down by NHB in the Asset Liability Management (ALM) framework. The Company may be impacted by volatility in interest rates in India which could cause its margins to decline and profitability to shrink. The success of the Company's business depends significantly on interest income from its operations. It is

exposed to interest rate risk, both as a result of lending at fixed interest rates and for reset periods which may differ from those of its funding sources. Interest rates are highly sensitive to many factors beyond the Company's control, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions and, inflation. As a result, interest rates in India have historically experienced a relatively high degree of volatility.

The Company seeks to match its interest rate positions of assets and liabilities to minimise interest rate risk. However, there can be no assurance that significant interest rate movements will not have an adverse effect on its financial position. With the growth of the Company's business, it will become increasingly reliant on funding from the debt capital markets and commercial borrowings. The market for such funds is competitive and the Company's ability to obtain funds at competitive rates will depend on various factors including its credit ratings. There can be no guarantee that the Company will be able to raise debt on competitive terms, in the required quantum and in a cost-effective manner. Any failure to do so may adversely impact the Company's business, its future financial performance. The Company is also hedged to some extent against this risk through the variable interest clause in its advances portfolio.

Human resource risk

The Company's success depends largely upon the quality and competence of its management team and key personnel. Attracting and retaining talented professionals is therefore a key element of the Company's strategy and a significant source of competitive advantage. While the Company has a salary and incentive structure designed to encourage employee retention, a failure to attract and retain talented professionals, or the resignation or loss of key management personnel, may have an impact on the Company's business, its future financial performance and the results of its operations.

Operational risk

The Company may encounter operational and control difficulties when commencing businesses in new markets. The rapid development and establishment of financial services businesses in new markets may raise unanticipated operational or control risks. Such risks could have a materially adverse effect on the Company's financial position and the results of its operations.

The operations of the Company have been extensively automated which minimizes the operational risk arising out of human errors and omissions. A robust system of internal controls is practiced by RHFL to ensure that all its assets are safeguarded and protected against loss from unauthorised use or disposition and all its transactions are authorised, recorded and reported correctly. The Audit Committee of Board periodically reviews the adequacy of our internal controls. The Company has implemented SAP systems across functions. With this initiative, along with other key systems and checks and balances established, we believe that our overall control environment has been enhanced. The Company is relentlessly focused on quality parameters and has a dedicated quality team to proactively identify and address operational issues. The mandate of the quality team is also to work closely with various business teams to bring about operational efficiencies and effectiveness through Six Sigma initiatives. It is pertinent to note that Reliance Home Finance has obtained an ISO 9001:2008 certification and is amongst the few companies in the industry to be ISO certified.

Information security risk

RHFL has robust Information Security Risk monitoring systems and tools to guard and protect sensitive customer data and guard against potential hackers and viruses. The Information Security team is governed by the Information Security Risk Management

Management Discussion and Analysis

Committee. Robust governance, controls and sophisticated technology is adopted across lines of business to ward off cyber threats and protect information residing within the Company.

Information Security has been brought under the Enterprise Risk Management Framework to enhance data protection and ward off cyber risks effectively, thereby making our overall Risk, Control and Governance framework more robust.

Regulatory risk

As an entity in the financial services sector, the Company is subject to regulations by Indian governmental authorities, including the National Housing Bank (NHB). Government's and Regulator's laws and regulations impose numerous requirements on the Company, including asset classifications and prescribed levels of capital adequacy liquid assets. There may be future changes in the regulatory system or in the enforcement of the laws and regulations that could adversely affect the Company's performance.

Macro-economic risk

Any slowdown in economic growth in India could cause the business of the Company to suffer. Any slowdown in the Indian economy, and in the demand for housing and infrastructure, could adversely affect the Company's business. Similarly, any sustained volatility in global commodity prices, including a significant increase in the prices of oil and petroleum products, could once again spark off a new inflationary cycle, thereby curtailing the purchasing power of the consumers. RHFL manages these risks by maintaining a conservative financial profile and following prudent business and risk management practices.

Internal Control

The Company maintains a system of internal controls designed to provide a high degree of assurance regarding the effectiveness and efficiency of operations, the adequacy of safeguards for assets, the reliability of financial controls, and compliance with applicable laws and regulations.

The organization is well structured and the policy guidelines are well documented with pre-defined authority. The Company has also implemented suitable controls to ensure that all resources are utilised optimally, financial transactions are reported with accuracy and there is strict adherence to applicable laws and regulations. The Company has put in place adequate systems to ensure that assets are safeguarded against loss from unauthorised use or disposition and that transactions are authorised, recorded and reported. The Company also has an exhaustive budgetary control system to monitor all expenditures against approved budgets on an ongoing basis.

The Company uses information technology extensively in its operations for ensuring effective controls besides economy. It also helps the Company in providing accurate MIS and prompt information / services to its customers and other stakeholders. The Company has implemented enhanced level of Information System Security controls with monitoring systems to address technology risks.

The Company has an independent internal audit function which continuously evaluates the adequacy of, and compliance with, policies, plans, regulatory and statutory requirements. Risk based approach is adopted while carrying out the audits. Internal audit also evaluates and suggests improvement in effectiveness of risk management, control and governance process. The Audit Committee of Board provides necessary oversight and directions to the internal audit function and periodically reviews the findings and ensures corrective measures are taken.

Opportunities

- Government's focus on the infrastructure and financial push
- The main purpose of RERA was to curb the unaccounted transactions, diversion of funds, inflated prices, etc. Many

fringe players may completely exit the residential market, while mid-sized players would focus on execution and managing risks. This would make RERA successful in the long term

- With the implementation of RERA, the developers now have limited alternative sources of funds like pre-sales, etc. leading to an increase in the need for formal sources of funding
- Extensive distribution reach and strong brand recognition
- In the budget, the Government is committed towards doubling the farmers' income by 2022. A total of ₹ 14.34 lakh crore (US\$ 225.43 billion) will be spent for creation of livelihood and infrastructure in rural areas. Budgetary allocation for infrastructure is set at ₹ 5.97 lakh crore (US\$ 93.85 billion) for 2018-19
- Affordable housing finance is estimated to be a ₹ 6 lakh crore business opportunity by 2022, by when the Government seeks to achieve housing for all citizens. This may lead to deeper market opportunity
- Opportunity to capitalise on the group synergy to optimise distribution

Challenges

- With the Implementation of RERA, the initial impact might be negative during the phase when the housing finance sector transits from being uncontrolled to a regulated one
- Inflationary pressures, slowdown in policy making and reduction in household savings in financial products
- However, there is enormous demand for low – cost housing finance options within the lower income groups, but demand remains unfulfilled due to constraints like difficulty in assessing the repaying capacity of the customers having uneven income streams, inability in assessing repaying capacity of customers, etc.
- Several new players are entering the sector thus leading to stiff competition which may lead to downward pressure on the pricing. This may impact the profitability for the players in the years ahead
- Supply constraints in the affordable housing space

Human Resources

The Company has a dedicated team of 961 employees (average age being 33 years, women employees being 118) as on March 31, 2018, who has been contributing to the progress and growth of the Company. The Company also invests in professional development and provides career development opportunities for its employees. The Company has a leadership competency framework which identifies the potential leaders on a regular basis and as a result of which most of the senior management has grown within the organization. Investor Information

Important points

Hold securities in dematerialised form as transfer of securities in physical form will no more be permissible.

As per notification issued by SEBI, with effect from December 5, 2018, the securities of the Company can be transferred only in dematerialised form. Members are advised to dematerialise securities in the Company to facilitate transfer of securities.

Form for updating PAN / Bank details is provided as a part of this Annual Report.

Members are requested to send duly filled form along with (a) self-attested copy of PAN card of all the holders; and (b) original cancelled cheque leaf with names of shareholders or bank passbook showing names of members, duly attested by an authorised bank official.

Holding securities in dematerialised form is beneficial to the investors in the following manner:

- A safe and convenient way to hold securities;
- Elimination of risk(s) associated with physical certificates such as bad delivery, fake securities, delays, thefts, etc.;
- Immediate transfer of securities;
- No stamp duty on electronic transfer of securities;
- Reduction in transaction cost;
- Reduction in paperwork involved in transfer of securities;
- No odd lot problem, even one share can be traded;
- Availability of nomination facility;
- Ease in effecting change of address / bank account details as change with Depository Participants (DPs) gets registered with all companies in which investor holds securities electronically;
- Easier transmission of securities as the same done by DPs for all securities in demat account;
- Automatic credit into demat account of shares, arising out of bonus / split / consolidation / merger / etc;
- Convenient method of consolidation of folios / accounts;
- Holding investments in Equity, Debt Instruments, Government securities, Mutual Fund Units, etc. in a single account;
- Ease of pledging of securities; and
- Ease in monitoring of portfolio.

Hold securities in consolidated form

Investors holding securities in multiple folios are requested to consolidate their holdings in single folio. Holding of securities in one folio enables shareholders to monitor the same with ease.

Furnish bank details and get dividend directly credited in bank account

Investors should avail the Electronic Payment Services for payment of dividend as the same reduces risk(s) attached to physical dividend warrants. Some of the advantages of payment through electronic credit services are as under:

- Avoidance of frequent visits to banks for depositing the physical instruments;
- Prompt credit to the bank account of the investor through electronic clearing;

- Fraudulent encashment of warrants is avoided;
- Exposure to delays / loss in postal service avoided; and
- As there can be no loss in transit of dividend warrants, issue of duplicate warrants is avoided.

Printing of bank account numbers, names and addresses of bank branches on dividend warrants provide protection against fraudulent encashment of dividend warrants. Members are requested to provide the same to the Company's RTA for incorporation on their dividend warrants.

Register for SMS alert facility

Investor should register with Depository Participants for the SMS alert facility. Both Depositories viz. National Securities Depository Limited (NSDL) and Central Depository Services (India) Limited (CDSL) alert investors through SMS of the debits and credits in their demat account(s).

Intimate mobile number

Shareholders are requested to intimate their mobile number and changes therein, if any, to Karvy, if shares are held in physical form or to their DP if the holding is in electronic form, to receive communications on corporate actions and other information of the Company.

Submit nomination form and avoid transmission hassle

Nomination helps nominees to get the securities transmitted in their favour without any hassles. Investors should get the nomination registered with the Company in case of physical holding and with their Depository Participants in case securities are held in dematerialised form.

Form may be downloaded from the Company's website, www.reliancehomefinance.com under the section "Investor Relations". However, if securities are held in dematerialised form, nomination has to be registered with the concerned Depository Participants directly, as per the form prescribed by the Depository Participants.

Deal only with SEBI registered intermediaries

Investors should deal with SEBI registered intermediaries so that in case of deficiency of services, investor may take up the matter with SEBI.

Corporate benefits in electronic form

Investor holding shares in physical form should opt for corporate benefits like bonus / split / consolidation / merger / etc. in electronic form by providing their demat account details to the Company's RTA.

Register e-mail address

Investors should register their e-mail address with the Company / Depository Participants. This will help them in receiving all communication from the Company electronically at their e-mail address. This also avoids delay in receiving communications from the Company. Prescribed form for registration may please be downloaded from the Company's website.

Course of action in case of non-receipt of dividend, revalidation of dividend warrant, etc.

Shareholders may write to the Company's RTA, furnishing the particulars of the dividend not received, and quoting the folio number / DP ID and Client ID particulars (in case of dematerialised shares), as the case may be and provide bank

Investor Information

details along with cancelled cheque bearing the name of the shareholder for updation of bank details and payment of unpaid dividend. The RTA would request the concerned shareholder to execute an indemnity before processing the request. **As per the circular dated April 20, 2018 issued by SEBI, the unencashed dividend can be remitted by electronic transfer only and no duplicate dividend warrants will be issued by the Company. The shareholders are advised to register their bank details with the Company / RTA or their DPs, as the case may be, to claim unencashed dividend from the Company.**

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing deemed to be prescribed under section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Meaning of Internal Financial Controls Over Financial Reporting

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Such debentures have a component of an embedded derivative which is fair valued at a reporting date. p Employee benefits

i) Provident fund

Contributions payable to the recognised provident fund, which is a defined contribution scheme, are charged to the Statement of Profit and Loss.

ii) Gratuity

The Company's gratuity benefit scheme is a defined benefit plan. The Company's net obligation in respect of the gratuity benefit scheme is calculated by estimating the amount of future benefit that employees have earned in the return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any plan assets, if any, is deducted.

The present value of the obligation under such defined benefit plan is determined based on actuarial valuation using the Projected Unit Credit Method, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plan, are based on the market yields on Government securities as on the balance sheet date.

Actuarial gains and losses are recognised immediately in the Statement of Profit and Loss.

iii) Leave encashment

Leave encashment which is a defined benefit, is accrued for based on an actuarial valuation at the balance sheet date carried out by an independent actuary.

The employees of the Company are entitled for compensated absence. The employees can carry forward a portion of the unutilised accrued leave balance and utilise it in future periods. The Company records an obligation for compensated absences in the period in which the employee renders the service that increases the entitlement. The Company measures the expected cost of compensated absence as the amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the balance sheet date.

iv) Phantom stock option

As a long-term incentive plan to employees, the Company has initiated phantom stock option plan which are cash settlement rights where the employees are entitled to get cash compensation based on formula linked to fair market value of shares upon exercise of phantom stock option over notional or hypothetical shares, whereby instead of becoming entitled to buy the actual shares on vesting, they become entitled to cash payment equivalent to appreciation in the value over defined base price of share. The present value of the obligation under such plan is determined based on actuarial valuation at the year end and any actuarial gains/ losses are charged to statement of profit and loss as applicable.

v) Employee Stock Option Scheme ("ESOS / Scheme")

The employees of the Company, its subsidiaries and holding company are entitled for grant of stock options (equity shares), based on the eligibility criteria set in Scheme of the Company. The employee compensation expenses are accounted on the basis of "intrinsic value method" as prescribed by the Guidance Note on Employee share based payments issued by the Institute of Chartered Accountants of India as required by the Securities and Exchange Board of India (Share Based Employee Benefits) Regulations, 2014. The excess, if any, of quoted market price over the exercise price on the date of grant would be recognised as compensation cost over the vesting period. The Company recognises compensation cost on the basis of estimated number of stock options expected to vest.

q Borrowing cost

Borrowing costs, which are directly attributable to the acquisition / construction of fixed assets, till the time such assets are ready for intended use, are capitalised as part of the cost of the assets. Other borrowing costs are recognised as an expense in the year in which they are incurred. Brokerage costs directly attributable to a borrowing are expensed over the tenure of the borrowing.

r Investment in property

Investment in property is accounted for in accordance with cost model, i.e. cost less any accumulated depreciation and any accumulated impairment losses.

s Guarantee fees

Mortgage guarantee fees, which are directly attributable to the loans guaranteed are expensed based on the principal outstanding at the end of the period.

t Expenses related to public issue of Non-Convertible Debentures (NCDs)

Expenses related to public issue of NCDs, which are directly attributable to the particular series of NCDs are expensed based on tenure of respective series. The expenses which are not directly attributable to the particular series of NCDs are expensed based on weighted average tenure of NCDs issued.

u Earnings per share

The basic earnings per share is computed by dividing the net profit / (loss) attributable to the equity shareholders for the period by the weighted average number of equity shares outstanding during the reporting period. The number of shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving earnings per share, and also the number of equity shares, which could have been issued on the conversion of all dilutive potential shares. In computing dilutive earnings per share, only potential equity shares that are dilutive and that reduce profit / (loss) per share are included.

The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as right shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

v Provision for current tax and deferred tax

Provision for current tax is made after taking into consideration benefits admissible under the provisions of the Income Tax Act, 1961. Minimum Alternative Tax (MAT) credit entitlement is recognised where there is convincing evidence that the same can be realised in future.

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realised.

w Impairment of assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired, if such condition exists an asset is treated as impaired, when carrying cost of assets exceeds its recoverable amount. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting periods is reversed if there has been a change in the estimate of the recoverable amount is treated as impaired, when carrying cost of assets exceeds its recoverable amount.

x Provisions, contingent liabilities and contingent assets

The Company creates a provision when there is a present obligation as a result of past events and it is probable that there will be outflow of resources and a reliable estimate of the obligation can be made of the amount of the obligation. Contingent liabilities are not recognised but are disclosed in the notes to the financial statements. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are neither recognised nor disclosed in the financial statements.
