CHAIRMAN'S OVERVIEW

BY PRADIP DUBHASHI

Chairman & Independent Director

Dear Shareholders,

It is with some satisfaction that I forward the Annual Report for FY'2018. As you would note your Company has continued to do well; on consolidated basis the return on capital employed has substantially improved, the return on equity has decidedly turned a healthy positive and so has the Book Value per share. I am confident that this trend will continue.

Business environment

The influence of the economy is overarching in the financial advisory business. GDP growth was rather muted at 6.7% in 2017-18 as against a forecast of 7.1%. Oil price increased and its effect on fiscal deficit and currency, business process adjustment on a gargantuan national scale due to the introduction of GST, credit stall because of debt recovery worries, inflation worries and interest rate hikes by RBI in its wake did serve as speed breakers. Political fragmentation and a stall in parliamentary processes also contributed to the slowdown.

Uncertainties continue

Many of these uncertainties continue. Disturbances in global trade initiated by the US administration policies and sanctions imposed on Iran have exacerbated local uncertainties. What happens if the Iran oil supply is taken out? What happens to the INR if there is a currency war? Continued depreciation, engineered or otherwise, of the Chinese Yuan and

reaction of the US, make any take on the global economy dangerous. As if this was not enough, some respected economists have been talking of a shrinking world monetary base (US\$) and how it could lead to a global recession in 2019! In the midst of this doom and gloom, the Indian economy is expected to grow at 7.3% or so. The IMF report on the Indian economy has rather graphically said that the 'Indian elephant has begun to run'.

Our Company's mission continues

As Mr. Jayakumar explained last year, it is difficult for company managements to make sense of these rapid changes, let alone proactively react to them. Your Company has lent a helping hand to some of those affected with timely advice and creative execution. A lot of work that your Company does is non-mandated; it means that many a time we seek out clients likely to run into road blocks. It is not that we have a solution that is in search of a problem

with a particular sector; the Company's client portfolio is diversified with about 50% drawn from service sector, 39% from manufacturing and 11% from trading. Think of it this way, whether it is an aspirational situation or one of desperation, your Company's team has some solid service to offer!

New lines of business

During the year under review, your Company decided to move into adjacent lines of business like value-added intermediation services in wealth management for Corporate Treasuries, Fund Management companies and Family Offices. Such moves are common; what is slightly different was the path we took. Instead of building capability ground-up, we welcomed a well experienced and networked team into our fold and housed it in Prime Research and Advisory Limited, a subsidiary. Your Company hit the ground running with a client base, annuity income and a profitable operation. The complementarity is vivid; wealth management is incomplete without

financial advisory and investment banking. Similarly, financial advisory clients are an excellent catchment area for wealth management services. Annuity income from this business, moreover, could smoothen current chunky revenue streams from transaction-led advisory fees.

Organisational changes

With this induction of a new team in a subsidiary, your Company's team is more than doubled. It is expected to more than double over this year and that too in different geographies. To meet this challenge, your Board re-designated Mr. Jayakumar as MD & Group CEO. All MDs and EDs, including of subsidiaries, shall report to him.

We also persuaded Independent Director Mr. Subramaniam Sharma to take over as MD at Primesec Investments Limited, a subsidiary that shows promise and needed enlightened leadership. We continue to receive his wise counsel as he continues as a Non-

Executive Director on this Board. In Q1 of the current year, we also elevated Mr. Vineet Suri, a veteran in Corporate Finance, to the Board as an Executive Director.

The services that we provide, and that includes new ones added, require our clients to repose complete confidence and trust in us. The expansion in services and growing numbers in the team means your management needs to reassess the 'risk management' framework on an urgent basis and put changes in place. The board has directed the management to urgently reassess the Risk management structure and processes across the group including the subsidiaries. Mr. Subramaniam Sharma is heading this effort and his long experience in Shinsei Bank of Japan would serve us well. This, hopefully, will be done in the coming quarter.

Corporate governance

Corporate governance has been centre stage in public discourse.

Whenever a situation has arisen, a constant refrain of all is 'What were the Independent Directors doing?' In a Company like yours, which has no promoter (one among very few), the Independent Directors need to shoulder a disproportionate burden to ensure regulatory hygiene. Governance becomes less of providing leadership and oversight and, as one of my esteemed colleagues pointed out, more of policing. My colleagues and I on the Board have been having constructive debates on these issues. Irrespective what is said or unsaid, in your Company governance ethos is like atmospheric pressure; always 14 pounds to a square inch. I have to thank my colleagues for that.

Please write in if you have suggestions and views!

MANAGING DIRECTOR AND GROUP CEO'S OVERVIEW

BY N JAYAKUMAR

Managing Director and Group CEO

Prime Securities and the power of manthan

I am tempted to invoke mythology when starting with a review of where Prime stands and where it intends to go.

In Hinduism, one of the central events in the ever-continuing struggle between the gods and the demons was the churning of the ocean of milk. The churn generated wealth from the ocean depths – the moon, a beautiful fragrant and heavenly tree, Lord Indra's four-tusked elephant, a cow of plenty, the goddess of wine, a wish-fulfilling tree, celestial dancers, a celestial

horse, the goddess of wealth, Lord Vishnu's conch, mace and magic bow, various gems and the physician of the gods transporting nectar.

At Prime, this is the most faithful analogy that I can find for what we are and what are trying to do. Our principal objective is to churn the ocean of relationships that we enjoy with our customers, making it possible to generate multiple opportunities from the same customer, translating into enhanced revenues. In churning these relationships comprehensively and generating superior revenues, we don't just expect to generate one-time fees; we also expect to generate a sequence of revenues from the same customer (the closest we can get to annuity), the basis of business sustainability.

Widening the platform

At Prime, we took this initiative ahead during the last financial year when we widened our operating platform. During the earlier year, we had one business vertical of corporate finance and restructuring, which we churned with the objective of generating more business leads from within customers.

We churned our corporate finance restructuring business through the following priorities: nurtured customers for potential deals, increased the number of deals and generated a larger wallet share. We leveraged our advisory capabilities and showcased our complete skill set, addressing progressively complex restructuring assignments. In doing so, we strengthened our brand in a space marked by low competition and reported growth in every business segment quarter-on-quarter.

I am pleased to share that we did well in this regard. By the close of the last financial year, our concurrent 25-deal pipeline was higher than at any time during the last twenty years; the number of in-process deals was twice the number we had closed during the last financial year; the average ticket size per transaction was appreciably higher than in the past and half a dozen customers of the last financial year extended into the second round of their engagement with us.

In this business segment, we will continue to focus on companies needing to restructure their Balance Sheets, providing them with

solutions that strengthen their businesses. We will negotiate on their behalf with banks for lower debt costs or longer debt tenures or moratoriums that provide the affected companies with a breather before they return to profitability and debt repayment.

The acquisition

While most companies would have preferred to consolidate their presence across this business vertical during the nascent stage of our corporate reinvention, we went one decisive step ahead during the last financial year. We embarked on the acquisition of an independent wealth advisory firm, which became effective from 1 April 2018. This wealth advisory company is business-strengthening for Prime: the team brings with it a distinctive customer set, a profitable business and more importantly, an attractive net worth following the acquisition of shares of our company.

The result is that during the acquisition of this business, we replaced the conventional cash outgo model or the equity dilution model; we combined equity dilution with attractive net worth

infusion at terms that we believe are value-accretive for our company. This differentiated approach will strengthen our overall net worth – from (₹34.36) crore in 2015-16 to an estimated ₹44.77 crore at the close of 2019-20 when the warrants given to the incoming partners are likely to have been exercised (without accounting for the earnings the parent company and this subsidiary are likely to report during the intervening period).

Attractive synergy

What makes this deal attractive is the synergy between our existing corporate finance advisory business and the wealth advisory business. The addition of the wealth advisory business was imperative for widening our operating platform. The wealth advisory piece is a critical component of the Prime of the future; it will provide us with the flexibility to extend from being mobilisers of capital for customers needing our restructuring services to becoming deployers of capital on behalf of high net worth customers seeking investment solutions. The ability to be on both sides of the table will make it possible for us to address a wider range

of opportunities, increase the customer touch-points and more effectively leverage the power of customer relationships. In the wealth advisory business, we will increase our presence across family offices and market a wider range of NBFC and mutual fund products.

Conducive for business

The overall environment is becoming increasingly conducive for our business. A number of banks under Prompt Corrective Action are inadequately capitalised, finding it difficult in disbursing credit to corporates. This enhances the relevance of a range of NBFCs who are nimbler in providing funding cum advisory solutions to customers. Prime sits at an attractive sweet spot in this scenario. By virtue of being a non-fund-based advisor, Prime will continue arranging funds for its customers coupled with knowledge-based advisory value-addition. By providing an intermediation service that comprises raising capital plus knowledge, the Company is positioning itself as being more effective than conventional fund providers. This competence is translating into a distinctive industry respect. Prime leverages

its vast network; the result is that the Company has attracted deals from peer companies, validating its deep competence.

Besides, the business environment continues to be fluid. The implementation of GST in 2017-18 affected offtake and business sentiment.

The volatility of the Indian currency affected strategic planning stability of a number of companies. The appreciation in the cost of oil affected margins of most industrial players. The global trade war can have extensive ramifications for a number of companies. The cost of debt has begun to rise in India, threatening debt-heavy Balance Sheets. A sharp sell-off in the mid-cap space in the first half of 2018 deferred the fund-raising plans of a number of companies. These realities warrant a deep advisory engagement to help companies proactively evolve their business models to stay competitive.

Road map

Going ahead, our business-building initiatives will comprise the following: we will continue adding complementary non-fund businesses to our operating platform with the objective of

WAYS IN WHICH WE EXPECT TO ENHANCE SHAREHOLDER VALUE

1 Deal quantum: Prime intends to enhance the deal quantum, the increased throughput translating into enhanced revenues and profits.

2 Platformisation: Prime is engaged in the creation of a consolidated platform of non-fund advisory services, each synergistic, making it possible to carve out a larger share of the customer wallet.

3 Deal ticket size: Prime intends to increase the average ticket size of each deal through progressively complex engagements that generate commensurately higher fees.

4 Holistic people remuneration: Prime intends to strengthen its remuneration mix – through direct means (salary cum performance bonus) and through wealth generation (ESOS), enhancing people retention, which is the lifeblood of a network-driven business.

generating a third of our annual revenues from segments that did not exist within our company three years ago. We will make select recruitments of senior professionals. We intend to widen our geographic presence beyond our Mumbai positioning that makes it possible for us to get closer to customers pan-India. We intend to enhance people productivity through a larger sharing of functional responsibilities. We intend to generate a growing

proportion of revenues from repeat engagements with the same customer (the closest we can get to annuity revenues). We intend to cap our total costs as a percentage of revenues to half the sectoral average. We will continue to focus on the maximisation of RoNW (return on net worth). We will continue to focus on generating incremental net worth without using our Balance Sheet. We will continue to build our treasury corpus or buy out complementary

businesses, enhancing shareholder value through various progressive options.

On the overall, we intend to build Prime as a progressively multi-vertical, non-fund-based consulting and full service corporate, wealth and investment advisory company that is attractively profitable, enhancing value for all those who own shares in our company.

PRIME RESEARCH
AND ADVISORY LIMITED

OUR WEALTH MANAGEMENT AND INVESTMENT ADVISORY BUSINESS

BY AKSHAY GUPTA
CEO and CIO

The wealth management and investment advisory business of Prime Securities became effective from 1 April 2018.

The recent extension of Prime's business model took the Company from its core business of corporate finance advisory to wealth management.

The wealth management space in India came into its own across the last decade. Consider the realities: a decade ago, there were only 100,000 dollar millionaires (based on disclosed reports); this has increased to around 350,000 today and is expected to grow to 500,000 by 2022.

The same growth has been reflected on the institutional market side where the size of the treasury (across all asset classes) was about US\$ 50 billion about a decade ago; this market has since grown to about US\$ 250 billion today.

Positive disproportionate relationship

We believe that this substantial growth has been achieved out of a positive disproportionate relationship between GDP growth and individual wealth creation: where the country's 7% GDP growth translates into a significantly higher accretion in the wealth of individuals.

At the heart of this substantial outperformance lies the country's transition from investment in physical assets to financial assets and from investment in simple financial products to the sophisticated.

The conclusion is that as India transforms from a US\$ 2.5 trillion economy into a US\$ 7 trillion economy by 2030, there would be a considerably larger role in the intermediation of wealth management and investment advisory, inspiring the observation that perhaps we have not seen anything yet.

Gaps mean opportunities

At Prime, even as we see a considerably larger market building up for wealth management, we also see a number of gaps – advisory, service and knowledge – that provide opportunities for players like us.

One, we see a low understanding of markets among Relationship Managers, translating into an inability to consummate the full potential of customer relationships.

Two, we see a mismatch between the sizeable quantum of assets under management (AUM) and

the inexperience of the service providers.

Three, two of the largest wealth management companies in India were not even present a decade ago, indicating that the sector is still an evolving market and the competitive edge is in being nimble and yet working relentlessly on customer delight.

Four, the nature of products has gone through a sea change across the last decade, warranting new skills in analysis and presentation.

Five, we perceive a short-term and singular focus on selling financial products without a commensurate commitment to service, solve consequential issues and hand-hold clients during the relationship tenure.

Prime's differentiated proposition

Prime is bringing a differentiated proposition to this sectoral reality.

The business provides a unique one-stop solution for customers, comprising the in-sourcing of solutions across all asset and domain classes (equity, debt, tax, insurance, foreign exchange and real estate etc.) and solutions encompassing multiple

What attracted me to join Prime Securities

- Assurance of below industry-level attrition
 - No short-changing clients
 - No coercing of employees to generate business at any cost
 - A neat fit of values and culture
-

geographies as opposed to a number of service providers who select to outsource some of the services. The fact that we selected to in-source all these services from the day we went into business only indicates our long-term approach and priority in providing the customer with a single-point solution.

The business is focused on the creation of a knowledge-driven business where the edge is derived from owning distinctive intellectual capital.

The business will focus on the building of credible indices by which financial instruments may be transparently appraised, providing investors with an insight into the quality of financial instruments being offered and enhancing trust in the intermediation ecosystem.

The business comprises promoters who are not only driving the business but also own equity in the Company; this indicates that a reconciliation between the professed values and strategic implementation

– a commitment to not sacrifice impartial advisory services at any count.

The attractiveness of our business model is that the business will be cash-accretive from the first year, will not draw on the resources of the Balance Sheet, will generate a high Return on Equity and is competently placed to generate annuity revenues across the long-term.

Complementary value

Besides, the wealth management business brings a completely complementary capability to Prime's corporate finance advisory business. Prime enjoys a large number of corporate and individual relationships that will now be addressed by the Company's wealth management business. The acquired company's critical mass of business represents seed business that will kick-start growth from day one, which would otherwise have taken a few years.

The business intends to invest in the following initiatives during the current financial year:

while the existing team will continue to manage institutional clients and family offices, there will be a focus in acquiring individual high net worth clients. The business intends to grow the number of wealth management professionals from 12 to 50 across two years. The business will protect its nimble mid-sized scale marked by responsiveness and knowledge cross-flow. The business will extend its coverage across diverse asset classes (debt, equity, real estate, commodities, foreign exchange and international products). The business will comprise assets under management and assets under advisory, generating attractive fee revenues.

In doing so, we expect to build a business that is profitable and valuable across the foreseeable future.

Besides, our vision is to create a happy company marked by low attrition of employees and customers, translating into business sustainability.

WAYS IN WHICH THE PICTURE HAS CHANGED AT PRIME SECURITIES

BY VINEET SURI

*Executive Director, Prime Securities Limited,
Head of Corporate Finance & Investment Banking*

1 The Company diversified from last year's focus on debt-raising advisory and restructuring activity to other corporate finance and investment banking services. With its extensive product expertise and structuring niche, Prime advised customers on transactions including various equity placements, strategic advisory mandates (M&A, promoter stake sales), etc while continuing to work on structured debt mobilisation and debt/capital restructuring assignments. With developments in markets, businesses and customer requirements, our ability to provide product solutions across the spectrum has come into full play.

2 The Company's focus has always been on maintaining long-term customer relationships. We have seen an addition of a number of new customers where a relationship has begun with an idea for a single assignment, but has developed into a closer rapport where Prime has become the port of call for investment banking and other advisory

needs or even simply discussions on ideas. While this relationship-focused DNA at Prime has not changed, our ability to attract marquee names has been gratifying.

3 Our recent strategic integration with Prime Research and Advisory Limited makes it possible to enter into new business areas. Prime's competence lies in the generation of assets; PRAL's competence lies in the placement of debt with fund managers and its other wealth management customers. The accretion of PRAL's distribution platform represents an exciting synergy.

4 During the year we enhanced our ability to execute mergers and acquisition deals, now covering international buy-side and sell-side counter-parties. This was made possible through a tie up with professionals who once worked for marquee international institutions, drawing on their extensive client network. This greatly enhances Prime's strategic and financial investor relationship strengths.

5 There is high enthusiasm at every level of the Company, with new additions to the core team. These developments have played a large part. Our unique strengths in complex transaction management and our ability to provide customers with a bouquet of products and services have transformed Prime Securities into a full-fledged Corporate Finance & Investment Banking house.

GOVERNANCE AND PRIME

BY ALPANA PARIDA

Independent Director

When I joined Prime as Director in 2015, the principal story at the reinvented company was as much about building back as it was about building right. This messaging was evident through newly defined business priorities: the decision to move away from fund-based businesses to a fee-based consulting business, a focus

on process-led diligence that translated into extensive information availability during Board meetings and reviews of all significant deals the Company engaged in during the preceding quarter. The result was that even as the Board was collaborating with the Prime leadership team in charting out a new strategic direction for the Company, there were tactical reviews in every Board meeting.

I have been struck by the humility of the Prime leadership, that sought to make significant changes in their business model, took ownership of previous issues and led the organisation from the front with financial austerity and a dedication to build from scratch. The fee-based business model needs to be understood better. Prime is a highly profitable company, even when compared with many firms with over 10 times its revenue.

I accepted the Directorship at Prime because of the nature of its turnaround story. Over successive quarters I have been pleasantly surprised by the tremendous energy in the Company. As a result, there is always something new happening in each quarter – a significant deal or an acquisition.

I find it educative and invigorating to be on this active and engaged Board!

GLOBAL BLACK SWANS AND THE BUSINESS OF PRIME SECURITIES

BY SR SHARMA

Managing Director, Primesec Investments Limited

Trade wars

Automation

Terrorism

Climate change

The one operative word driving the business model of a company like Prime Securities is 'uncertainty'.

This uncertainty has been derived from an unprecedented convergence of diverse changes in the social, political, business, technology, labour and demographic landscapes the world over.

During the last couple of decades, increased globalisation has made it increasingly imperative for even local companies to be globally competitive.

Even as markets have become larger, the tenure of economic cycles has shortened. The widening footprint of terror has introduced a new dimension to global business. The accelerated pace of technology has resulted in a number of globally large companies disappearing into anonymity. Increased robotisation is threatening jobs, incomes and life stability. Interest rates have broadly increased the world over, affecting companies nursing large and expensive debt. A number of conventional sectors (especially based around fossil fuels) are staring at probable obsolescence as the age of renewables takes over. Platform-driven businesses (like Uber, Netflix and Airbnb) are threatening conventional brick and mortar equivalents. As capital abounds and product abundance becomes a visible reality the world over, a long-term deflation is a possibility.

Companies increasingly vulnerable

The result of this unprecedented transformation is that a number of companies that were once comfortable with the old order are now vulnerable; a number of

these companies are over-borrowed with virtually no room to grow their businesses.

In India, this transition in ground realities has been coupled with refreshing government urgency in addressing companies unable to meet their financial obligations. Conventionally, these companies would borrow afresh from banks to liquidate erstwhile dues, postponing their moment of truth. In a transforming India, banks are now being required to state the complete extent of non-performing assets on their books while companies are required to either restructure with the intention to repay or file for bankruptcy.

The need of the day is specialised consultancies that can work closely with debt-strapped companies on the one hand and bankers on the other with the objective to design and execute win-win solutions: help companies restructure their Balance Sheets to enhance their debt repayment capability and make it possible for banks to recover their dues.

Business attractiveness and Prime

This business is attractive given its long-term

relevance. There is a large volume of debt waiting to be restructured. There is a growing need for intermediaries to provide a complete restructuring solution as opposed to piecemeal patchwork services. Since each case is usually different from the other, there is a growing need for customised innovation.

Prime Securities is one such specialised consultancy that comprehensively and competently addresses this reality. The Company is a pain-point expert with a growing track record of assisting companies out of a strategic gridlock and helping banks recover dues that at some point may have appeared difficult to recover.

Prime is focused, nimble and muscular; the nearest analogy that I can evoke is that Prime Securities is like a commando unit within a large army; this special force possesses unique competencies, is provided focused assignments, works independent of the army and is respected for its ability to complete projects with clinical efficiency before being deployed to other projects.

OUR CULTURE

BY ANIL DHARKER

Independent Director

At Prime Securities, we believe we possess a distinctive culture that makes it possible for us to attract/retain people more effectively on the one hand and address client needs more efficiently on the other.

Entrepreneurial: At Prime, there is a distinctively entrepreneurial culture. The team has complemented academic soundness with the ability to bring innovative ideas to the table. The result is a company perpetually working with new concepts and cutting-edge business developments.

Governance: At Prime, it would have been easy to disregard processes in the pursuit of growth opportunities and dynamic market realities. This is the temptation that Prime has not yielded to. The Chairman has consistently prioritised the need for systems over 'ad hoc-ness', bring a sense of method into the 'madness' (so to speak).

Diversity: At Prime, it would have been convenient to have like-minded people generally tending to agree on things. This is another point that makes Prime different: the diversity of Board members who help in bringing different ideas to the table. It is not necessary to have all members nod their heads in agreement to what is suggested or proposed; what is more important is an active debate, the ability to appreciate alternative points of view and a capacity to resolve those differences in line with the stated objective of the Company.

Go-getting: At Prime, one of the things I quite admire is the ability to be always on the ball, addressing contemporary issues that most customers face. We describe our service as 'two steps ahead', making it possible to lead clients than merely follow a script. We are driven by a greater need to accomplish what most clients, experts and observers would consider improbable, leading to enduring solutions and respect. This provides the optimism that the Company will keep growing in a sustainable way year-on-year.

Culture: We embrace complex assignments; we are consistently punching above our weight with the conviction that we can draw into our wide network and experience to create win-win solutions

CASE STUDY #1

HOW PRIME'S ONE-STOP SOLUTION EMPOWERED A CLIENT TO GRADUATE TO THE NEXT ORBIT

In 2017-18, a prominent company needed to mobilise a large quantum of funds across a period of time to widen its geographic footprint. The challenges were many: the Company needed to widen its relationship beyond its existing consortium; it needed to work with different bankers who offered different rates; it needed to banks to extend beyond their initial assurances to

actual disbursement; it needed a prompt access to funds that would make it possible to address business opportunities; it needed funds across an extended tenure that would provide working capital comfort that would preserve cash flows during the productive nascent phase of the Company that could then translate into attractive business sustainability. The Company eventually

turned to Prime. Prime advised the client on the entire process. Prime advised the client on the business side and the financial side – a holistic one-stop solution. The result is that the Company mobilised the necessary funds, strengthened its business model through strategic changes and is now better placed to climb into the next orbit.

CASE STUDY # 2

‘NO ONE UNDERSTOOD MY COMPANY THE WAY PRIME DID’

The aging promoter of a successful Western India company desired to divest his stake and exit the business. The only stipulation of the promoter was that the Company's management be transferred to a competent incoming owner who would take the business ahead. The promoter had spoken

to a number of financial intermediaries; they had failed to find a competent suitor. The promoter turned to Prime; he gave Prime only 48 hours to study his company's fundamentals and provide a recommendation. Prime puts its team at work, comprehending the business model. Prime meanwhile began to

leverage its vast network: the result is that within 72 hours, Prime was able to identify a potential buyer. When the transaction had been completed, the erstwhile promoter paid Prime a compliment: 'No one understood my company the way Prime did.'

ENDORSEMENT

“WE HAVE BEGUN TO LOOK AT PRIME AS OUR LONG-TERM THOUGHT PARTNER.”

BY PIYUSH PERIWAL

*Managing Director,
National Plywood Industries Limited*

National Plywood, my company, had been delisted for 14 years after having suffered industrial sickness following a Supreme Court ruling in the late Nineties. We retrieved two of the Company's manufacturing five facilities as well as our brand through this challenging transition. We did so with the expectation that we would be able to revive the Company and lead it to its rightful place in India's interior infrastructure sector.

There was just one problem in our proposed recovery: bank funding would take time despite assurances; we were

averse to increasing debt during our recovery phase. The problem was that since few knew of our story and prospects, the chances of mobilising net worth appeared bleak.

In this challenging phase, Prime Securities proved to be our lifeline.

Prime did not just provide us with an access to precious net worth; it provided us with access to respected private equity players as well. The result is that we were able to access financial and intellectual value - both. These prominent private equity players were instrumental

in providing us with the benefit of their extensive network and their knowledge about the evolving and demanding standards of governance.

As it turned out, Prime extended beyond the standard call of duty; it didn't just provide us with net worth to kick-start our operations; it introduced us to select professionals who brought excellent value to our table that has since invigorated our corporate vision. We have begun to look at Prime as our long-term thought partner - someone sitting in India's financial capital batting for us while we focus on our core business.

BUSINESS MODEL

THE DISTINCTIVE WAY IN WHICH WE DO BUSINESS AT PRIME

Focus

At Prime, we believe that consistent business focus is key to long-term success. At one level, we believe that the country's financial services business is largely under-penetrated, making it an excellent growth proxy in a growing economy. At another level, we believe that within the country's financial services space, there will be under-penetrated and under-populated niches that are relatively under-addressed. We wish to be present in these niches, bringing to it a complement of professionalism, network strength, listed visibility and governance.

Revenue flows

Prime's revenue flows are lumpy when seen from a quarter-to-quarter perspective, marked by the possibility of some transactions spilling from one quarter to another. However, an annual perspective may provide a better index of the Company's progress.

Integrated

Prime provides an integrated solution – advisory and implementation. This is analogous to the roles played by a General Physician and a surgeon – one diagnoses and the other operates. The integration of roles makes it possible for Prime to conclude assignments faster and more completely.

Uncertainty-driven

At Prime Securities, our business model is directed at helping companies restructure to erstwhile health through innovative solutions. In a world of variables. There is a growing focus on finding an innovation-driven resolution that benefits lenders and client companies.

Non-fund-based business

The Company will continue to focus on the growing opportunities coming out of non-fund intermediation as

opposed to companies where the non-fund side of the business is a small component of the overall business mix. This focus is enhancing our business clarity on what we wish to be – a company that does not need to leverage the size of its tangible Balance Sheet to grow but leverages the intangible competencies resident within its business.

Lumpy

Even as our deal inflows have been continuously growing, our revenues and profits may often be lumpy quarter-on-quarter based on certain delays in assignment closures or advances being reported in the following quarter.

Solutions

Prime provides restructuring services that address the apex of the service consulting pyramid with regard to the customer organisation's criticality. The Company brings to the customer's table a competence across domains (manufacturing, engineering and finance).

The solution comprises the competence of an innovative solution as well as win-win proposition (for client and lender) coupled with effective implementation. One successful solution retains the potential of a number of business referrals and retainer-ship engagements.

Network-driven

The Company's business model – where the net worth on its Balance Sheet is secondary to its organic growth prospects – is driven by the power of its collective network. This network is a potent driver in opportunity identification, competent analysis and the ability to work with different agencies in the pursuit of a singular objective. At Prime, the key management brings more than two-and-a-half decades of exposure to peers, capital providers, capital deployers and policy makers – its network – for the benefit of customers. The focus on network size and quality is also a critical determinant in the Company's decision to pursue specific inorganic growth leads.

Flexible

At Prime, we recommend the use of debt and equity resources in creating a restructuring solution for the benefit of our client companies and their lenders. This goes counter to a number of peer consulting companies who are restricted by the use of debt or equity and hence are restrained from providing a complete solution.

Service network

At Prime, our objective is to provide a single-stop solution to our customers. On most occasions, this competence is resident within the Company. However, in specialised instances requiring an opinion or intervention that is niche, there is always a possibility of seeking the intervention of some of the most competent minds in the country. At Prime, we possess a wide and deep network of professionals who are not our employees but who we enjoy an access to. This network of associates makes it possible to address virtually any kind of challenge that our customers face – through the interplay of

in-sourced or outsourced competencies.

Intellectual capital-driven

While all businesses are driven by knowledge of their specific spaces, this is more evident in the business of non-fund advisory services where the Company must enhance sustainable value through the interplay of its network, ferret likely leads, make a non-mandated first-mover pitch to the Company, propose a solution for the pain point and leverage proprietary capability in implementing a timely solution. The Company's executives possess a rich network across all players in the financial ecosystem (companies, bankers, private equity funds and financial consultants), a rich understanding of the national business landscape, Balance Sheet mechanics, restructuring experience and distinctive communication clarity, providing customers with the optimism of transformative potential.

First-mover

The Company believes that in a competitive space, success is derived

from the ability to approach a prospective client with a solution for an existing business challenge than be one of a number of advisory agencies being approached by the Company. We believe that the former non-mandated approach makes it possible for the Company to ring-fence itself from competition and in doing so, escape pricing pressures – the ability to be remunerated commensurately for intermediation services provided. Nearly 90% of the Company's revenues were derived through non-mandated pitches in 2017-18.

Responsiveness

The business of non-fund advisory services usually addresses companies in distress. Most of these companies usually turn to specialised advisory agencies as a last resort at virtually the last stage. This scenario prioritises the need for responsiveness. At Prime, we pride on our speed: by the virtue of being selective in deal adoption, we match proprietary resources with the quantum of concurrent deals we can manage without compromising our

established reputation for implementation speed. The focus on assuming as many project responsibilities as we can competently address with speed represents a constant in our business, protecting our brand. We believe that the ability to walk away from a deal because we would not be able to do justice in terms of corresponding time allocation is reputation-protecting that strengthens the word of mouth about our commitment to customer interest.

Larger wallet share

One of the critical drivers of success in the on-fund advisory business is trust. When a customer believes that an advisory partner like Prime has provided superior engagement value, there is always the possibility of the customer selecting to work with Prime across a wider range of interventions. In view of this, the objective at Prime is to enhance a customer's wallet share by addressing a wider range of interventions on the one hand and increasing the frequency of interventions on the other. We expect to derive a growing annual proportion of revenues from existing customers,

a feature of our business that will be increasingly manifest across the future.

Revenue renewal

Sustainable success can be derived either from the linear scaling of the business or linear-cum-lateral growth. At Prime, we have selected to leverage the latter approach, convinced that successful businesses continuously renew their revenues, creating new revenue engines without compromising the overall non-fund-based direction of the business model. The Company showcased this commitment when it entered the wealth management advisory business effective from 1 April 2018. The Company's objective would be to derive a third of its revenues from businesses that did not exist within the Company three years ago, broad-basing its opportunity-orientation and risk profile.

Payout clarity

At Prime, we believe that it is not only important to report a healthy growth in the bottomline as the principal means of rewarding shareholders. It is imperative to announce

an institutionalised dividend payout policy whereby a pre-determined proportion of profits is paid out to shareholders, deepening the profit sharing commitment (policy to be enunciated and passed by the Board of Directors). Besides, we expect to reward our shareholders through timely buybacks when we believe that such an initiative will enhance shareholder value.

Financialisation

At Prime, we believe that as India financialises (movement from physical assets to financial assets), there will be a growing room to intermediate between financial instrument creators and investors. Following a wider appetite for mutual funds, we see this as the next big opportunity in a country where the needle has begun to shift from investment in traditional asset classes (gold and real estate) towards financial assets. In line with this movement, the Company intends to create distribution networks, market a wide range of products fitting customer needs and generating fee income.

Challenge-driven

At Prime, we are focused on addressing complex challenges faced by corporate customers. This focus makes it possible for the Company to graduate to a niche within a niche marked by relatively low competition and the ability to generate fees commensurate with the Company's competence and delivered solution.

Two-way relevance

Following the acquisition of the wealth advisory business effective from 1 April 2018, the Company has widened its engagement ambit – from mobilisers of capital for corporates to deployers (across high net worth clients). This two-way relevance has enhanced the Company's flexibility and relevance in the face of emerging opportunities.

People-lightness

In Prime's people-light business (employees 17 as on 31 March 2018) the core solution is in-sourced while the peripheral supports are selectively outsourced to domain experts in the areas of taxation etc. The result

is that Prime reported a per person productivity (measured through pre-tax profit divided by number employees as at year-end) of ₹0.99 crore in 2015-16 that increased to ₹1.01 crore in 2017-18. Prime enjoys possibly one of the lowest expense ratios within its niche (15.33%, 2017-18) translating into high margins and business sustainability.

ESOPs

In a business that is driven by intellectual capital, the principal asset of the Company lies in our people. Our sustainable success is therefore derived from our ability to retain our people. To strengthen retention on the one hand and strengthen attraction/accretion, the Company proposes to introduce an Employee Stock Option Scheme where employees become owners.

We believe that the introduction of ESOPs will also strengthen our overall remuneration package where a combination of direct and indirect remuneration will reduce outflows from the Profit & Loss Account.

INDIA READY FOR A STRUCTURAL SHIFT IN FINANCIAL ASSET INVESTMENTS

At Prime, we believe that our extension into the wealth advisory business comes at a relevant point in the history of the country: a shift from the preferred ownership of physical assets to the ownership of financial assets.

Conventionally, Indian households invested about 60% of their savings in physical assets (gold and real estate). Even when it came to financial assets, the preference was always skewed in favour of safe instruments; insurance accounted for 18% of India's financial investments as against

a mere 6% for shares and debentures. As an extension of this reality, India's retail investors constituted only approximately 13% of stock ownership in India; demat accounts were less than 10% of the number of banking accounts.

The result is that India's market capitalisation-to-GDP ratio for India was approximately 82% until a couple of years ago compared to 140% in US, 89% for Korea and 129% for Malaysia. This under-representation of financial assets is visible in other spaces as well: the corporate bonds

outstanding-to-GDP for India was approximately 13% compared to 21% for China, 28% for Hong Kong, 44% for Malaysia, 32% for Singapore and 75% for South Korea.

Until a couple of years ago, Indian mutual funds managed US\$270bn in AUM (+US\$90bn in equities) with a penetration considered among the lowest in the world at 12% of GDP as against 55% for the global average. India's equity AUM/GDP ratio at 4% compared weakly with 29% for the world; India's debt AUM/ GDP ratio at 8% compared with 21% for the world. India's mutual

fund folios were around a seventh of the number of life insurance policies in India and one-eighth of the number of savings accounts.

However, India's response to financial assets is transforming with speed. Following demonetisation, the needle has begun to move in a different direction. Until as recently as 2012-13, the annual allocation to financial savings was less than half than the allocation to physical savings. Thereafter, the plateauing of bullion and realty markets have transformed the scenario: during

2015-16, financial savings were marginally higher than physical savings; in the subsequent year, the quantum of financial savings was higher than the allocation to physical savings, indicating an unmistakable direction in India's savings allocation trend.

The allocation of India's savings to bank deposits increased at a CAGR of 17.5% between 2012-13 and 2016-17 to reach ₹10,957 billion in 2017. Meanwhile, investments in shares & debentures increased at a CAGR of 81% to reach ₹1,825 billion in 2016-17, the sharpest

growth across competing allocation avenues by a long margin even as it accounted for the smallest share of India's savings (except for non-banking deposits which were lower).

Correspondingly, there has been a significant transformation in the allocation of savings towards mutual funds. The quantum of increase in mutual fund investments in the single year of 2017-18 was almost equivalent to the entire quantum mobilised in 2008-09.

The segment's AUM crossed the milestone of ₹10 lakh crore for the first time in May 2014 and within three years, the AUM size crossed ₹20 lakh crore in August 2017. The total number of folios as of April 2018 stood at 7.22 crore, while the number of folios under equity, ELSS and balanced schemes, wherein the maximum investment is from the retail segment, crossing

the 6-crore landmark to stand at 6.03 crore.

SIP contribution rose to ₹67,190 crore during FY2017-18 from ₹43,921 crore in FY2016-17, registering a 53% growth. Indian mutual funds have currently ~2.11 crore SIP accounts through which investors regularly invest in mutual fund schemes. On an average, the mutual fund industry added ~9.70 lakh SIP accounts each month during FY2017-18 (vis-à-vis an average of 6.27 lakh SIP accounts each month during FY2016-17). The average SIP size stood at ~₹3,375 in March 2018, up from

₹3,200 in March 2017. (Source: AMFI)

At Prime, we believe that this reality provides the Company with a substantial opportunity to grow its presence in the wealth advisory space, making it possible to address a rapidly widening investor appetite, distribute financial products, generate intermediation fees and build the Balance Sheet by not deploying net worth.

GLOBAL UNPREDICTABILITY AND PRIME SECURITIES

The incidence of non-performing assets among Indian banks is increasing.

An increasing number of banks is applying stringent filters in recognising bad loans.

There is a regulatory openness in encouraging players to step forward and acknowledge bad loans on their books.

The number of businesses needing restructuring is large.

The competence related to corporate risk identification and analysis is still largely under-developed in India.

There is a greater evidence of manufacturing and marketing knowledge over financial within companies.

Most companies need ongoing course correction as opposed to one-time restructuring.

The incidence of innovation-driven

restructuring consultancies is low in India.

This makes the uncertainty-focused business model of Prime Securities increasingly relevant.

This model is likely to become increasingly relevant on account of an increase in disruptive technologies and developments the world over.

THE WORLD IS PASSING THROUGH AN UNPRECEDENTED INCREASE IN DEVELOPMENTS THAT ARE INCREASING ECONOMIC VOLATILITY

Trade wars

The US implemented of 25% tariffs on US\$ 34 billion worth of imports from China from July 2018. The US released a list of US\$ 200 billion

worth of Chinese goods likely to attract 10% tariffs following review. Beijing hit the US with retaliatory tariffs on 545 products. This is arguably the biggest tariff application by the US since the Smoot-Hawley tariffs that deepened the Great Depression,

shrinking world trade by 66% between 1929 and 1934. In June 2018, the EU put US\$ 3.2 billion tariff on US goods in retaliation for the Trump administration's steel and aluminum tariffs, targeting products like bourbon, orange juice and motor cycles.

Cryptocurrency

Bitcoins could affect faith in established global currencies and banking networks. Financial transactions could start getting decentralised, with no recourse to the traditional US Dollar. The dynamics of international trade can change.

Brexit

The advantage for the UK is that it would prohibit the free flow of people from the EU. Brexit could slow the growth of UK to 2.4% in 2018, 1.9% in 2019, and 1.6% in 2020. Brexit is a vote against globalisation. It takes the UK off the main stage of the financial world.

China's economic slowdown

China's debt to GDP ratio has mushroomed from 140% during the 2007-08 financial crisis to 260% by end of 2016. In absolute

terms, China's debt has increased from US\$6 trillion to US\$28 trillion. China's credit growth is on a dangerous trajectory, with increasing risks of a disruptive adjustment and/or a marked growth slowdown. IMF projects a debt-to-GDP ratio of 300% by 2022. This could moderate China's economic growth.

Green energy

By 2022, global renewables electricity generation is expected to grow by over one-third to over 8,000 terawatts per hour, equal to the total power consumption of China, India and Germany combined. As a result, the share of renewables in power generation could reach 30% in 2022, up from 24% in 2016. In the next five years, growth in renewable generation could be twice as large as that of gas and coal combined. This could affect large funding of thermal energy power plants, affecting shareholders and debt providers.

Electric vehicles

Global electric vehicle sales are poised to climb from 1.2 million in 2017 to 1.6 million in 2018 and an estimated 2 million in 2019; almost every sixth car sold in the world could be electric by 2025 (16.5 million). Since each electric car comprises a lower number of automotive components, this could affect the growth of the auto ancillary sector worldwide and investments in special steel manufacturers.

Artificial intelligence

The artificial intelligence market is expected to reach US\$ 190.61 billion by 2025 from US\$ 21.46 billion in 2018, a CAGR of 36.62% during the forecast period. Robots and AI could replace jobs. Tasks which are monotonous could be easily automated, making certain roles obsolete, affecting employment across countries.

3D printing

The increasing use of 3D printing to manufacture a number of products means that the labour arbitrage advantage could become a thing of the past. Manufacturers could move closer to raw material access and consumption markets instead, disturbing longstanding economic realities.

Platform-based aggregation

The increased use of platform-based aggregation (Uber, Airbnb and others) is replacing conventional business, threatening investments in the latter. Increasing dis-intermediation is threatening the global order through lower costs, enhanced transaction ease and a movement away from businesses once considered safe.

CRISPR

CRISPR is a new tool for genetic research that

allows scientists to locate specific segments of DNA and easily replace or delete them. This could cause a huge disruption in the way healthcare is delivered by curing disease at the genetic level, disrupting existing medical treatments.

Advanced automation and robotics

Due to better sensors, artificial intelligence and Siri-like voice communications, robots could work with humans in new and productive ways, disrupting routine processes.

The combination of IoT and blockchain — BloT—ushers a host of new services. BloT can be used to track shipments of products. This could disrupt conventional processes.

Cloud computing

The personalisation of cloud computing and

advanced cloud services will be increasingly embraced by business of all sizes, as this represents a major shift in how organisations obtain and maintain software, hardware, and computing capacity. Companies using cloud could cut costs in IT, human resources, and sales management functions.

Augmented Reality

Augmented Reality (AR) can simulate real-world scenarios. That allows orientations or training to take place in a safe environment versus a real-world environment that can be more dangerous. This could disrupt traditional services.

Autonomous driving

Autonomous driving will be facilitated by the data-processing capabilities of machine learning, but its disruption capabilities could be widespread. With autonomous vehicles, transportation could be largely converted to ride-sharing, moderating the use of vehicles.

EXPLANATORY STATEMENT PURSUANT SECTION 102 OF THE COMPANIES ACT, 2013

The following Explanatory Statement sets out all the material facts relating to the Special Business mentioned at item nos. 3 to 8 of the accompanying notice.

Item No. 3

The Board of Directors of the Company ("the Board"), at their Meeting held on January 14, 2016, had re-appointed Mr. N. Jayakumar as Managing Director of the Company for a further period of Five Years w.e.f. February 11, 2016 in accordance with Article 119 of the Articles of Association of the Company. Mr. N. Jayakumar had refrained from drawing any remuneration from the Company since December 2012 in view of adverse financial situation of the Company then. In light of substantial bettering of Company's prospects in last few quarters and based on the recommendation of the Nomination and Remuneration Committee, Mr. N. Jayakumar, Managing Director, had started drawing remuneration w.e.f. from January 1, 2017 as approved by the Member of the company at their Meeting held on September 21, 2017. Based on the recommendation of the Nomination and Remuneration Committee, the Board of Directors of the Company has, subject to approval of the Members of the Company, revised the remuneration payable to Mr. N. Jayakumar, Managing Director, w.e.f. April 1, 2018 for the remainder of his term as Managing Director. The approval of the Members pursuant to Section 197(1) of the Companies Act, 2013, as amended from time to time, is now sought for the revised remuneration payable to Mr. N. Jayakumar, Managing Director, w.e.f. from April 1, 2018 for the remainder of his term as the Managing Director.

Mr. N. Jayakumar is associated with the Company since 1992 and he was designated as a President of the Company since 2002. He is a qualified professional with expertise in Corporate Finance and Investment Management and has vast experience in advising in areas of financial restructuring, evaluation of business plans / joint venture proposals / acquisitions, fund raising and strategic alliances. He is with the Company for more than 26 years handling corporate relationships. Before joining the Company, he had 7 years experience in Citibank, N.A. as Vice President, Head – Merchant Banking Group & Corporate Finance, India.

The main terms of appointment, remuneration, perquisites, etc. as set out in the Memorandum of Understanding entered into between the Company and Mr. N. Jayakumar, which are subject to the approval of the Members of the Company, are as follows:

Term:

Period of Appointment - Five years effective February 11, 2016

Salary:

- a) Salary upto a maximum of ₹40,00,000/- per month for a period from April 1, 2018 to February 10, 2021, with authority to the Board or a Committee thereof to fix the salary within the said maximum amount.

Perquisites:

- a) Use of the Company's car with a driver or alternatively the Company will maintain at its expense a car belonging to the Managing Director and will also reimburse the salary of the driver as per the rules of the Company.
- b) Reimbursement of Company car running and maintenance expenses reasonably incurred by Mr. N. Jayakumar exclusively for the business of the Company;

-
- c) Reimbursement of Medical expenses actually incurred by Mr. N. Jayakumar and his family;
 - d) Company's Contribution to Provident Fund as per the rules;
 - e) Benefit of a Company Group Mediciclaim Policy;
 - f) Gratuity as per the Gratuity Scheme of the Company;
 - g) Reimbursement of Travelling and Entertainment expenses reasonably incurred by him exclusively for the business of the Company;
 - h) Leave on full remuneration as per the rules of the Company for the time being in force but not exceeding one month's privilege leave for every 12 months service;

Perquisite shall be evaluated as per Income-tax Rules, wherever applicable. In the absence of any such rules, perquisites shall be evaluated at actual cost.

Item No. 5

The Memorandum and Articles of Association of the Company currently in force were originally adopted when the Company was incorporated under the Companies Act, 1956 and the same were amended from time to time in accordance with the provisions of the Companies Act, 1956 and the Companies Act, 2013 from time to time. Several regulations in the existing AOA contain references to specific sections of the Companies Act, 1956 and some regulations in the existing AOA are no longer in conformity with the Act. With the introduction of the Companies Act, 2013, it is proposed to amend the existing Memorandum and Articles of Association to make it consistent with the provisions of Companies Act, 2013 including the Rules framed thereunder.

A copy of the proposed set of new Memorandum and Articles of Association of the Company would be available for inspection at the registered office of the Company on all working days, except Saturdays, Sundays and Public Holidays, between 11.00 a.m. to 1.00 p.m. upto the date of the 35th Annual General Meeting and during the 35th Annual General Meeting. The proposed draft of Memorandum and Articles of Association is also available on the Company's website at www.primesec.com for perusal by the Shareholders.

None of the Directors and Key Managerial Personnels of the Company or relatives of any of them are, in any way, concerned or interested in this Resolutions.

The Board of Directors recommends this resolution for approval by the Members of the Company by a Special Resolution.

Item No. 6, 7 and 8

The Company operates in the financial services industry and the major services provided by the Company i.e. Investment / Merchant Banking and Corporate Advisory Services are people driven. The Company believes that the growth witnessed by the Company is the result of the efforts put in by its employees. The Board has identified the need to reward the employees by enabling them to participate in the future growth and financial success of the Company. Equity based compensation is considered to be an integral part of employee compensation across sectors which enables alignment of personal goals of the employees with organizational objectives by participating in the ownership of the Company through share based compensation scheme. The Board of Directors of the Company at their Meeting held on May 29, 2018 has approved implementation of the Employee Stock Option Scheme 2018 ("ESOS 2018"), with a view to attract and retain key talents working with the Company and its Subsidiary Companies by way of rewarding their performance and motivate them to contribute to the overall corporate growth and profitability. The Board has authorised the Nomination and Remuneration Committee to administer ESOS 2018 and will formulate its detailed terms and conditions.

Pursuant to provisions of Securities and Exchange Board of India (Share Based Employee Benefits) Regulations, ("SEBI SBEB Regulations"), the approval of the Members of the Company is sought to implement ESOS 2018 and grant of options to the eligible Employees / Directors of the Company and that of its Subsidiary Companies as decided by the Nomination and Remuneration Committee from time to time in due compliance of the SEBI SBEB Regulations.

The main features of the ESOS 2018 are as under:

1. Brief Description of the Scheme:

ESOS 2018 is intended to reward the eligible permanent Employees / Directors of the Company and its Subsidiary Companies in India and abroad, for their performance and to motivate them to contribute to the growth and profitability of the Company. Your Company also intends to use ESOS 2018 to retain talent in the organization as it views options as instruments that would enable the employees to share the value they create for the Company and align individual objectives of employees with objectives of the Company in the years to come.

The Company, in terms of the SEBI SBEB Regulations, contemplates to implementation of ESOS 2018 by way of issue of fresh Equity Shares by the Company.

2. Total number of Options to be granted:

A total of upto 45,00,000 (Forty Five Lacs) Options would be available for grant to the eligible permanent Employees / Directors of the Company and its Subsidiary Companies under ESOS 2018, in one or more tranches, detailed terms of which are to be formulated by the Board but subject to the broad parameters of the Scheme to be approved by the Members. Each such Option when exercised would be converted into one new Equity Share of ₹5/-each fully paid-up of the

Company. The Option shall not be pledged, hypothecated, mortgaged or otherwise alienated in any other manner.

Vested options lapsed due to non-exercise and / or unvested options that get cancelled due to resignation / termination of the employees or otherwise, would be available for being re-granted at a future date. The Board is authorized to re-grant such lapsed / cancelled options as per the provisions of ESOS 2018, within overall ceiling.

SEBI SBEB Regulations require that in case of any corporate action(s) such as rights, bonus, merger, de-merger, amalgamation, sale of division or any other form of corporate restructuring, a fair and reasonable adjustment needs to be made to the options granted. Accordingly, if any additional Equity Shares are required to be issued pursuant to any corporate action, the above ceiling 45,00,000 (Forty Five Lacs) Equity Shares shall be deemed to be increased in proportion of such additional Equity Shares issued.

3. Identification of Classes of Employees entitled to participate and be beneficiary in the ESOS 2018:

- b) Director who either by himself or through his relatives or through any Body Corporate, directly or indirectly holds more than 10% of the outstanding Equity Shares of the Company; and
- c) Independent Director within the meaning of the Companies Act, 2013.

4. Requirements of Vesting and Period of Vesting:

Options granted under ESOS 2018 would vest not less than 1 (One) Year from the date of grant of such Options. Vesting may occur in one or more tranches or otherwise. The vesting dates in respect of the Options granted under ESOS 2018 may vary from Employee to Employee or any class thereof and / or in respect of the number or percentage of Options granted to an Employee. The Nomination and Remuneration Committee may, at its discretion, lay down certain performance metrics on the achievement of which such Options would vest, the detailed terms and conditions relating to such vesting, and the proportion in which Options granted would vest.

Options granted under ESOS 2018 shall vest so long as an Employee continues to be in the employment of the Company / Subsidiary Companies, as the case may be, unless such employment is discontinued on account of death, permanent disablement or on retirement. In the event of death of an employee while in employment, all the Options granted to him till such date shall vest in the legal heirs or nominees of the deceased Employee. In case the Employee suffers a permanent incapacity while in employment, all the Options granted to him as on the date of permanent incapacity shall vest in him on that date.

If the eligible Employee voluntarily terminates employment with the Company / Subsidiary Companies, as the case may be, the Options to the extent not vested shall lapse / expire and be forfeited forthwith. However, this shall not be applicable to eligible Employees who have resigned or who may resign from time to time to join Companies, approved by the Nomination and

Remuneration Committee, that have been established or promoted or set up (whether solely or jointly with any other entity) by the Company.

5. Maximum period within which the Options shall be vested:

Options granted under ESOS 2018 would vest within a maximum period of 5 (Five) Years from the date of grant of such Options.

6. Exercise Price or Pricing Formula:

The Exercise Price would be determined by the Nomination and Remuneration Committee on the date of Grant of Options in accordance with the SEBI SESB Regulations, subject to conditions for payment of Exercise Price in the manner prescribed by the Nomination and Remuneration Committee.

7. Exercise Period and Process of Exercise:

The Exercise Period would commence from the date of vesting and will expire at the end of Five Years from the date of Vesting or such period as may be decided by the Nomination and Remuneration Committee.

The Vested Options would be exercisable by the employees by submitting a written application to the Company along with the payment of Exercise Price and on execution of such other documents, as may be prescribed by the Nomination and Remuneration Committee. The options shall lapse if not exercised within the specified exercise period.

8. Appraisal process for determining the eligibility of Employees to ESOS 2018:

The appraisal process for determining the eligibility of the employees will be specified by the Nomination and Remuneration Committee and will be based on criteria such as seniority of the employees, length of service, performance record, merit, contribution and conduct of the employees, future potential and / or any such other criteria that may be determined by the Nomination and Remuneration Committee at its sole discretion.

9. Maximum number of Options to be issued per Employee and in an aggregate

The maximum number of Options granted to any single eligible Employee shall not exceed 15,00,000 Options at the time of Grant of the Option. The aggregate of all such Options shall not exceed 45,00,000 Options.

10. Maximum Quantum of benefits to be provided per employee under the ESOS 2018:

The maximum quantum of benefits underlying the Options issued to an eligible employee shall depend upon the market price of the Equity Shares as on the date of sale of Equity Shares allotted pursuant to the exercise of Options.

11. Whether ESOS 2018 is to be implemented and administered directly by the Company or through Trust:

ESOS 2018 shall be implemented and administered directly by the Company.

12. Whether ESOS 2018 involves new issue of Equity Shares by the Company or Secondary Acquisition by the Trust or both:

ESOS 2018 contemplates new Issue of Equity Shares by the Company.

13. The amount of loan provided for implementation of ESOS 2018 by the Company to the Trust, its tenure, utilisation, repayment terms etc.:

The Company is not providing any loan for ESOS 2018 purpose, as Company is directly implementing the plan.

14. Maximum percentage of Secondary Acquisition (subject to limits specified under the Regulations) that can be made by the Trust for the purchase under the scheme:

Not applicable for implementation of ESOS 2018 as the Company is directly implementing the plan by way of new issue of Equity Shares.

15. Accounting and Disclosure Policies:

The Company shall comply with the "Guidance Note on Accounting for Employee Share Based Payments" and / or any relevant Accounting Standards as may be prescribed by the Institute of Chartered Accountants of India from time to time, including the disclosure requirements prescribed therein.

16. Method of Valuation:

The Company shall use the intrinsic value method for computing the compensation cost for the Options granted. The difference between the employee compensation cost so computed and the compensation cost that shall have been recognised if the Company had used the fair value of the Options and also the impact of this difference on the profits and on EPS of the Company shall be disclosed in the Directors' Report.

The benefits of ESOS 2018 shall also be extended to the permanent Employees and Directors of the Subsidiary Companies of the Company, in the same manner and subject to the terms and conditions as mentioned herein. The aggregate Options issued in terms of ESOS 2018 shall not exceed the overall limit as mentioned in the ESOS 2018. SEBI SESB Regulations provide for separate approval of Members to be obtained for extending the benefits of the Scheme to Employees and Directors of Subsidiary Companies of the Company.

In terms of the provisions of Section 62(1)(b) and all other applicable provisions, if any, of the Companies Act, 2013 and Regulations 6 of the SEBI SESB Regulations, the approval of the Members is being sought by way of Special Resolutions.

A draft copy of ESOS 2018 is available for inspection at the Registered Office of the Company on all working days (excluding Saturday, Sunday and Holidays) till the date of the Annual General Meeting.

The Directors and Key Managerial Personnels of the Company may be deemed to be concerned or interested in these Resolutions only to the extent of any Options that may be granted to them and the resultant equity shares issued, as applicable.

The Board of Directors recommends this resolution for approval by the Members of the Company by a Special Resolution.

BUSINESS REVIEW & PROSPECTS

As you will note from the results, the year gone by has been satisfying and has helped in creating a base for sustained growth in our activity in the coming months. The hallmark of our work has been innovation and focused execution. The mandates we have executed range from corporate restructuring, debt

and equity issuances and strategic corporate advisory. Repeat business, referrals drive healthy deal flow and our teams have been busy! We will add to our team to increase capacity as per the demand of the business.

The temporary effects of demonetization have now faded and economic growth in the latest quarter is expected to top 7.7%. Growth is likely to be robust across sectors especially in agriculture and construction, which saw a negative rate of growth of 3.9% in the last quarter. This is clearly indicating that the lingering effects, if any were there, of demonetization and the roll out of GST are firmly in the rear-view mirror. Firms in key sectors, autos, cement, steel are reporting robust growth rates and this will trigger fresh investments. As the investment cycle begins its cyclical uptrend, deal flow will inevitably increase. We see this in the robust pipeline of deals.

This year's southwest monsoon ended the June-September season with 5% lower than average rainfall and expectations of a slightly lower output of kharif, or summer-sown crops, after bouts of floods and dry weather in different parts of the country. Forecasts for the current year are positive and the onset of monsoon is expected to be on time! This augurs well for a continuation of robust agricultural growth and in maintaining the momentum we have seen in the growth of our rural economy. Increasingly agriculture plays a smaller role in the rural economy with other activities contributing more. Overall, this will lead to more stable and higher growth rates in rural demand with its accompanying knock on impact.

Benign crude oil prices have helped the Government manage the fiscal deficit. The recent increase in prices, though have dampened the mood a bit. Pump prices of gasoline and diesel have gone up, and despite criticism, remain on par with the rest of the world. This indicates that the Government has maintained the policy of pump pricing in line with global prices and has not succumbed to the reintroduction of any subsidy. The recent turmoil with the USA withdrawing from the Iran accord may reduce supply but the statements from Saudi Arabia and Russia committing to maintain supply augur well for the supply and pricing of this key energy input. Crude oil production from new sources like shall remain robust.

The global macro-economic environment has been stable though some storm clouds loom. Brexit and continuing political turmoil in Italy and Spain have again reignited the debate on the future of the Euro. Rising rates in the US may dampen emerging market flows. This is tempered by the fact that India remains the Emerging Market of choice and should attract more than its share of fund flows.

We saw an opportunity in Wealth Management Advisory, driven by the rapidly expanding flows into mutual funds and the rapid growth of this sector, and effective April 1, 2018, a team of 20+ investment professionals have joined the group in our wholly owned subsidiary, Prime Research and Advisory Limited. We are very optimistic for

the prospects for this new business segment. In this the team services the institutional segment and, as a bonus, we see opportunities in cross selling.

As always, we are humbled by the confidence reposed in us by our customers. They continue to bless us with repeat business and referrals and for this we must express our deepest gratitude.

DIVIDEND AND RESERVES

The Board of Directors has not recommended any Dividend on Equity Shares for the Year under review. During the Year, no amount from Profit was transferred to General Reserve.

Management Discussion & Analysis

THE CONTINUING MATURING OF OUR CAPITAL MARKETS

Investor interest in our markets remains strong. Particularly heartening has been the strong flows into domestic mutual funds. Total assets under management for the industry is at an all-time high of around ₹22 Lakh Crores and the momentum is sustained in the first few months of the current year too. Markets remain at near all-time highs and we have seen a number of high quality equity issuances. While interest in the markets will ebb and flow, we remain confident in its short, medium and long-term prospects.

INDIA: A PREFERRED INVESTMENT DESTINATION

We remain a preferred investment destination with foreign direct investment flows touching all-time highs. Walmart's US\$ 16 billion investment in Flipkart underlines the massive progress we have made. A home-grown company, exemplifying "Make in India" will now be taken on to the world stage by the world's largest and most profitable retailer. This is a massive testimonial to the capability of our young entrepreneurs and this 'fire', we are sure will drive interest in our markets. The massive growth of digital start-ups, from Swiggy to Ola, creates a foundation for sustained economic growth and will create markets and employment in new uncharted areas that didn't exist before! The spin off impact on other sectors is immense. Warehousing, trucking, all are now high growth sunrise sectors for the economy

THE ECONOMY

The economy has been on a sustained path of recovery as the process of normalization, post the 2008 crisis, nears completion with

the stimulus having ended and a much-needed fiscal balance is restored. The tough tasks near completion and the Government has guided the economy onto a steep takeoff trajectory.

Infrastructure

There has been a sustained focus on the build out of infrastructure. Be it Civil Aviation, Railways or Roads, the Government has made huge strides.

In Aviation, the connection of several hitherto unconnected cities has brought remote regions closer to the major economic centers and will catalyze growth there. Air traffic volumes have seen around 20% growth and flights are all going full.

The Railways are leading the effort to develop metro systems in multiple cities and their roll out will be a key economic enabler as people with skills are better matched to jobs. The commute experience is far superior and will propel its usage. The progress in the build out of roads has been nothing but stupendous. The Bullet train project will be a major step forward for Rail technology and for commuting in one of the densest traffic corridors in the country.

It is in roads that we have made wonderful progress. The pace of completion of roads has accelerated. Riding on this and the impact of an overloading ban, as well as last year's low base, commercial vehicle sales expanded in the high double digits in April. Sales volumes of the top four manufacturers rose 78 per cent over the year-ago period to 67,548 vehicles.

Rural Electrification

This has been the bright spot in the development of infrastructure. As remote villages get lit up, the opportunities expand in our villages. The ability

to perform tasks before sunrise and after sunset, expands the time available and improves rural productivity. Moreover, the ability this creates for the villages to remain connected improves information flow and drives greater choice and efficiency

Rural Economy

The rural economy has performed well. Almost all businesses selling into this segment from tractors, we had their highest-ever sales in 2017-18. At 7.11 lakh units, sales are significantly higher than the 5.83 lakh units recorded in 2016-17. The 22 per cent rise exceeded expectations. Growth in consumption in rural India outpaced that of urban areas by a wide margin—the first time in five years. This was driven by better rains and lower rates of the goods and services tax (GST). Rural consumption grew at 9.7% for the financial year 2018, while that of urban markets was at 8.6%, in comparison. To give sustained support to agriculture, government has decided to keep MSP for all unannounced Kharif crops at least one and half times of their production cost after declaring the same for the majority of Rabi crops. This will give additional support to the rural economy.

The Global Economy

The US Fed began normalizing policy and has built up expectations of a series of rate increases. At the same time, the new Trump administration is focused on the US's terms of trade with other countries, including tariffs. This has created stress in the export sector. The US policy stance has meant that there has been pressure on the Indian Rupee and the risk of further weakening is high. Oil prices have been moving up as the excess supply has worked itself off and crude touches \$ 80 per barrel. This has a knock-on effect on the price of energy for our economy, as it impacts input prices for a number of critical products, fertilisers, plastics etc.

INDUSTRY REVIEW

A. Industry Structure & Developments

The year gone by has been eventful. The Reserve Bank of India and the Government

brought focused attention to the massive problem of NPAs. The initial results are heartening. As we write this report, the first of the NPA cases that defied resolution for quite a while, Bhushan Steel has been taken over by Tata Steel. Electrosteel is on the verge of being taken over by Vedanta. The recovery rates for banks has been higher than was anticipated and as the Insolvency Process goes through its initial teething issues, we now have a robust framework for recovery of loans and above all the regeneration of assets. The focus of the IBC and the process inherent in it has prompted many defaulting corporates to get their affairs in order.

As growth rates pick up and capital formation in the private sector is rekindled, opportunities for fund raising and mergers and acquisitions will grow.

We see a range of opportunities for mandates that our strengths are well suited for.

We took the step of expanding our product offerings with the addition "Wealth Management & Investment Advisory" services for institutions and high net-worth individuals, family offices and trusts. A team of around 20 professionals has come on board. This business is being run in our wholly owned subsidiary, Prime Research & Advisory Limited. This new business stream will add to our revenues and profits.

B. Opportunities & Threats

As the economy stabilizes onto a growth path, after the execution of key structural changes, we see increasing activity among customers we service. We are handling a number of mandates for fund raising as well as restructuring of balance sheets. Deal flow remains robust and we have a healthy pipeline of mandates. The new business of wealth management advisory will add significantly to revenues and profits.

Banks remain under stress with several of them having been placed under Prompt

Corrective Action (PCA) by the RBI. This freezes new lending by them and even as the NPA problem begins to get resolved, it is possible that recovery could get delayed due to this constraint. Yet, in this there is an opportunity for solutions and we look to capitalize on this.

The global economy has seen good growth rates and this could be ending as the Euro area enters another period of uncertainty. With continuing job growth in the US and unemployment there falling to 18-year lows, interest rates could be on the rise. Cyclical factors could turn down and threaten growth in our economy through a knock on effect via increasing interest rates, muted capital flows and tepid export growth.

C. Segment-wise or Product-wise Performance

The Company operates only in the advisory business. Its subsidiary has been in the business of brokerage for institutional and high net worth clients, an activity which has now been shut down.

D. Outlook

Deal flow has been excellent and we continue to add execution capacity opportunistically. We continue to provide innovative solutions to complex problems and referrals remain a key source of new business as well as repeat mandates.

E. Risks & Concerns

We have reduced debt on the balance sheet to nearly zero and as we have articulated in the past, we do not expect to leverage the balance sheet. Our focus will be on generating income from our advisory business and the only use of capital will be to setup office and related infrastructure.

F. Internal Control Systems & Their Adequacy

Your Company's Internal Control System and procedures were consciously reviewed during the year and systems and procedures were corrected wherever found to be inadequate to the Company's size, the

nature of its business and the endemic business environment. The internal control systems lay down the policies, authorization and approval procedures.

The adequacy of the internal control systems has been reported by the auditors under the Companies (Auditor's Report) Order, 2003.

G. Discussion on Financial Performance

The Consolidated Revenues of the Company were ₹2,402.47 lacs for the financial year under review as against previous year ₹1,957.65 lacs. Consolidated Profit after Tax and Exceptional Items was at ₹1,430.48 lacs as against previous year ₹1,341.31 lacs.

The Company has been able to restructure its debt substantially and has reached very advantageous settlements with its creditors. We have been able to reduce debt to very manageable levels and remain on track to be debt free in the next 12-18 months.

H. Material Development in Human Resources / Industrial Relations Front, Including Number of People Employed

We continue to grow our pipeline of transactions in the corporate advisory business and will add people as needed. Fortunately, with several firms closing shop, there is talent in the market available to be hired as the business volumes grow.

CAUTIONARY STATEMENT

Statements in this Management Discussion & Analysis describing the Company's objectives, projections, estimates, expectations or predictions may be "forward looking statements" within the meaning of applicable securities laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include economic developments in the country and improvement in the state of capital markets, changes in the Government regulations, tax laws and other status and other incidental factors.

Terms of Reference

The Board of Directors had constituted a Share Transfer Committee to approve transfer of shares and related matters. In line with the recommendations of the Code of Corporate Governance, the Board has re-designated the Committee as "Stakeholders Relationship Committee" and vested the Committee with further powers to monitor and review investors' grievances. The Committee, apart from approving share transfers, transmissions, etc and other related matters, also looks into the redressal of shareholder complaints like non-transfer of shares, non-receipt of annual reports etc.

The powers to approve transfer of shares and redress shareholder complaints have been designated to the Managing Director or the Company Secretary. Such transfer of shares and shareholder complaints which cannot be settled by the Whole-Time Director and the Company Secretary are placed before the Stakeholders Relationship Committee for their

decision. The approval of share transfers is normally done on a weekly basis so that the Company is able to return share certificates, duly transferred, within fifteen days.

Details of share transfer / transmission and summary of shareholder queries / complaints are placed at the Meeting of members from time to time.

Independent Auditor's Report

To,
The Members of
PRIME SECURITIES LIMITED

Report on the Indian Accounting Standards (Ind AS) Financial Statements

We have audited the accompanying standalone financial statements of **PRIME SECURITIES LIMITED** ("the Company"), which comprise the Balance Sheet as at March 31, 2018, the Statement of Profit and Loss (including Other Comprehensive Income) and the Statement of Cash Flow, the statement of Changes in Equity for the year then ended, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "standalone Ind AS financial statements").

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance (including Other Comprehensive Income), cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act, read with relevant rules issued thereunder. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind AS financial statements that give a true and fair

view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone Ind AS financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the standalone Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the standalone Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the standalone Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the standalone Ind AS financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone Ind AS financial statements.

Basis for Qualified Opinion

As referred in Note no. 32, the Company has, in earlier financial year re-instated advance of ₹327.50 Lacs which was earlier written-off as not recoverable. Accordingly, the loss in Surplus (Profit & Loss) is lower and Other Non-Current Asset is higher by the said amount.

Qualified Opinion

In our opinion and to the best of our information and according to the explanations given to us, except for the effects of the matters described in paragraph of the Basis for Qualified Opinion paragraph, the said standalone Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2018 and its total comprehensive income (comprising of profit and other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Material Uncertainty Related to Going Concern

As referred to in Note no. 29 & 30, the net worth of Company's subsidiaries viz. Primesec Investments Limited and Prime Research & Advisory Limited have been eroded but having regard to the circumstances specified in the said Notes, the subsidiaries have prepared their accounts on a going concern basis. Relying on the same, the Company has not considered making any adjustments to its financial exposure in the subsidiaries. Our opinion is not modified in respect of this matter.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of section 143 (11) of the Act, we give in

the Annexure A, a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143 (3) of the Act, we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c) The Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the statement of Cash Flow and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;
 - d) In our opinion, except for the effects of the matters described in paragraph of the Basis for Qualified Opinion paragraph, the aforesaid standalone Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act read with relevant rules issued thereunder.
 - e) On the basis of the written representations received from the directors as on March 31, 2018 and taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2018 from being appointed as a director in terms of Section 164 (2) of the Act.
 - f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of

such controls, refer to our separate report in "Annexure B".

- g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014 in our opinion and to the best of our information and according to the explanations given to us:

- i. The Company has disclosed the impact of pending litigations on its financial position in its standalone Ind AS financial statements – Refer Note 28 to the standalone Ind AS financial statements;
- ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

- iii. There has been no delay in transferring amounts, required to be transferred to the Investor Education and Protection Fund by the Company during the year ended March 31, 2018;
- iv. The reporting on disclosures relating to Specified Bank Notes is not applicable to the Company for the year ended March 31, 2018.

2. The Company does not hold any inventories and therefore Clause 3(ii) of the Order is not applicable to the Company.
3. The Company has granted unsecured loans to wholly-owned subsidiary companies covered in the register maintained under Section 189 of the Act. Considering the loans are to wholly-owned subsidiaries, in our opinion, the terms and conditions of the loans are not prejudicial to the Company's interest. The loans are repayable on demand and during the year part of loan to one subsidiary was repaid as demanded. Interest is paid by the subsidiary where applicable.
4. In our opinion and according to the information and explanation given to us, the Company has complied with the provisions of Section 185 and 186 of the Act with respect to the loans and investments made.
5. The Company has not accepted any deposits within the meaning of the directives issued by the Reserve Bank of India and the provisions of section 73 to 76 or any other relevant provisions of the Act and the rules framed thereunder and therefore Clause 3(v) of the Order is not applicable to the Company.
6. The Central Government has not prescribed the maintenance of cost records under Section 148(1) of the Act for any of the services rendered by the Company and hence the provisions of clause 3(vi) of the Order is not applicable to the Company.
7. a) According to the information and explanations given to us and the records of the Company examined by us, the Company is generally regular in depositing with the appropriate authorities undisputed statutory dues including provident fund, income tax, service tax, goods and service tax and other statutory dues applicable to it. Further, according to the information and explanations given to us, there are no undisputed amounts payable in respect of provident fund, income tax, service tax, goods and service tax and other statutory dues with the appropriate authorities outstanding at the end of the year for a period of more than six months from the date they became payable.
- b) According to the information and explanations given to us, the particulars of statutory dues outstanding at the end of the year on account of a dispute are as follows:

Statute	Assessment Year	Nature Dues	Forum before whom pending	₹Lacs
Income Tax Act 1961	2006-2007	Income Tax	Assessing Officer (Rectification Proceedings)	13.18

8. Based on our audit procedures and according to the information and explanations given by the management, the Company has not defaulted in repayment of its loans and borrowings to any financial institution and banks. The Company does not have any loan or borrowing from Government or debenture holders.
9. The Company did not raise any amount by way of initial public offer or further public offer (including debt instruments) and term loans during the year. Accordingly Clause 3(ix) of the Order is not applicable.
10. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, we have neither come across any instance of material fraud by the Company by its officers or employees, noticed or reported during the year, nor have been informed of any such case by the management.
11. The Company has paid/provided for managerial remuneration in accordance with provisions of section 197 read with Schedule V of the Act.
12. In our opinion and according to the information and explanation given to us, the Company is not a nidhi company and therefore, Clause 3(xii) of the Order is not applicable.
13. According to the information and explanations given to us and based on our examination of the records of the Company, transactions with the related parties are in compliance with Sections 177 and 188 of the Act where applicable and the details of such transactions have been disclosed in the standalone Ind AS financial statements as required under Indian Accounting standards (Ind AS) 24, Related Party Disclosures specified under Section 133 of the Act, read with relevant rules.
14. The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year and therefore, Clause 3(xiv) of the Order is not applicable.
15. On the basis of our examination and according to the information and explanations given to us, the company has not entered into any non-cash transactions with directors or persons connected with him and therefore, Clause 3(xv) of the Order is not applicable.

Annexure - B to the Auditor's Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting the Company as of March 31, 2018 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent

applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the

preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

1. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; and,
2. provide reasonable assurance that transactions are recorded as necessary to permit preparation of standalone Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and,
3. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper

management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the ICAI.

Note:

1. Net block of the Building include a residential flat of ₹246.98 lacs in a co-operative society, acquired from a debtor in satisfaction of a claim. In view of the restraining orders, the society has kept in abeyance the admission of membership of the Company. In the earlier year, pursuant to the order of the Hon'ble High Court, the possession of the flat was handed over to the Official Assignee. An appeal was filed by the Company against the said order whereby the said order was set aside. Pursuant to the fresh chamber summons filed by the Company for removing attachment, the Official Assignee has been directed not to sell or dispose-off the flat. The Company has been legally advised that the said developments will not have a bearing on the Company's title to the flat and consequently there is no impairment in the value of the asset and the Company is not likely to have any further claim or liability against the said flat.
2. The Company has availed the deemed cost exemption in relation to the property, plant and equipment on the date of transition and hence the net block carrying amount has been considered as the gross block carrying amount on that date. Refer note below for the gross block value and the accumulated depreciation on April 1, 2016 under the previous GAAP.

27 Significant accounting policies

a) Basis of preparation of Financial Statements:

The Financial Statements of the Company have been prepared in accordance with the Indian Accounting Standards (Ind AS) to comply with the section 133 of the Companies Act 2013 ("the 2013 Act"), read with Rule 3 of the Companies (Indian Accounting Standards) Rule 2015, and Companies (Indian Accounting Standards) Rules, 2016. For all periods up to and for the year ended 31 March 2016, the Company prepared its financial statements in accordance with accounting standards notified under the section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 (Indian GAAP). These financial statements are the Company's first Ind AS financial statements and are covered by Ind AS 101, First-time adoption of Indian Accounting Standards. The transition to Ind AS has been carried out from the accounting principles generally accepted in India ("Indian GAAP") which is considered as the "Previous GAAP" for purposes of Ind AS 101. An explanation of how the transition to Ind AS has affected the Company's equity and its net profit is provided in Note no 45. The financial statements were authorised for issue by the Company's Board of Directors on May 29, 2018.

All the assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in Schedule III to the Act. The Company has ascertained the operating cycle to be 12 months.

Functional and presentation currency:

These financial statements are presented in Indian rupees, which is the Company's functional currency. All amounts have been rounded off to two decimal places to the nearest lakh, unless otherwise indicated.

Historical cost convention:

The financial statements have been prepared on a historical cost basis, except for the following:

- certain financial assets and liabilities are measured at fair value;
- defined benefit plans – plan assets measured at fair value

b) Use of Estimates and Judgements:

The preparation of financial statements in accordance with Ind AS requires use of estimates and assumptions for some items, which might have an effect on their recognition and measurement in the balance sheet and statement of profit and loss. The actual amounts realised may differ from these estimates. Estimates and assumptions are required in particular for:

• Determination of the estimated useful lives of Property Plant and Equipments:

Useful lives of Property Plant and Equipments are based on the life prescribed in Schedule II of the Companies Act, 2013.

• Recognition and measurement of defined benefit obligations:

The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation, actuarial rates and life expectancy. The discount rate is determined by reference to market yields at the end of the reporting period on government bonds. The period to maturity of the underlying bonds correspond to the probable maturity of the post-employment benefit obligations.

• Recognition of deferred tax assets:

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax

Notes to Financial Statement for the year ended March 31, 2018

bases, and unutilized business loss and depreciation carry-forwards and tax credits. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

- **Recognition and measurement of other provisions:**

The recognition and measurement of other provisions are based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the balance sheet date. The actual outflow of resources at a future date may therefore vary from the amount included in other provisions.

- **Discounting of long-term financial assets / liabilities:**

All financial assets / liabilities are required to be measured at fair value on initial recognition. In case of financial liabilities/assets which are required to subsequently be measured at amortised cost, interest is accrued using the effective interest method.

- **Segment reporting:**

Operating segments are reported in a manner consistent with the internal reporting. The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

- **Measurement of fair values:**

The Company's accounting policies and disclosures require the measurement of fair values for financial instruments.

The Company has an established control framework with respect to the measurement of fair values. The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of a financial asset or a financial liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).
- If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.
- The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Notes to Financial Statement for the year ended March 31, 2018

c) Property, plant and equipment:

- **Recognition and measurement:**

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

The cost of an item of property, plant and equipment comprises:

Its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.

Any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

The cost of the property, plant and equipments as at 1st April 2016, the Company's date of transition to Ind AS, was determined with reference to its carrying value at that date.

d) Depreciation:

- Depreciation on tangible assets is provided on the straight-line method over the useful lives of assets as prescribed under Part C of Schedule II of the Companies Act, 2013;

Useful life of Property Plant and Equipment are reviewed at each balance sheet date and adjusted prospectively, if appropriate.

- Depreciation on addition to assets or on sale /discardment of assets, is calculated pro rata from the date of such addition or upto the date of such sale/discardment, as the case may be;
- Individual assets except assets given on lease acquired for less than ₹5,000 are depreciated entirely in the year of acquisition.

e) Intangible Fixed Assets:

Intangible assets, which are acquired by the Company and have finite useful lives are measured at cost less accumulated amortisation and any accumulated impairment losses.

The cost of intangible assets at April 1, 2016, the Company's date of transition to Ind AS, was determined with reference to its carrying value at that date.

f) Financial Instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial instruments also include derivative contracts such as foreign currency foreign exchange forward contracts and, interest rate swaps and currency options; and embedded derivatives in the host contract.

Financial instruments also covers contracts to buy or sell a non-financial item that can be settled net in cash or another financial instrument, or by exchanging financial instruments, as if the contracts were financial instruments, with the exception of contracts that were entered into and continue to be held for the purpose of the receipt or delivery of a non-financial item in accordance with the entity's expected purchase, sale or usage requirements.

Financial Assets:

Classification:

The Company shall classify financial assets as subsequently measured at amortised cost, fair value through other omprehensive income or fair value through profit or loss on the basis of its

Notes to Financial Statement for the year ended March 31, 2018

business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

Initial recognition and measurement:

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Equity investments:

Equity investments in subsidiaries are measured at cost less impairment.

All other equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the Company decides to classify the same either as at FVOCI or FVTPL. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as FVOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to profit and loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the profit and loss.

Derecognition:

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'passthrough' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Notes to Financial Statement for the year ended March 31, 2018

Impairment of financial assets:

In accordance with Ind-AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, and bank balance.
- b) Trade receivables - The application of simplified approach does not require the company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. Trade receivables are tested for impairment on a specific basis after considering the sanctioned credit limits, security like letters of credit, security deposit collected etc. and expectations about future cash flows.

Financial liabilities:

Classification

The Company classifies all financial liabilities as subsequently measured at amortised cost, except for financial liabilities at fair value through profit or loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.

Initial recognition and measurement:

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable and incremental transaction cost.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts and derivative financial instruments.

Derecognition:

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments:

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

g) Employee Benefits:

Short Term Employee Benefits:

All employee benefits payable within twelve months of rendering the service are recognised in the period in which the employee renders the related service.

Notes to Financial Statement for the year ended March 31, 2018

Post Employment / Retirement Benefits:

Contribution to Defined Contribution Plans such as Provident Fund, Employees' State Insurance Corporation, etc., are charged to the Statement of Profit and Loss as incurred.

Defined Benefit Plans – The present value of the obligation under such plans, is determined based on an actuarial valuation by an independent actuary at the end of each year, using the Projected Unit Credit Method. In the case of gratuity, which is funded, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans, to recognise the obligation on net basis.

Remeasurement of net defined benefit liability, which comprises actuarial gains and losses and the return on plan assets (excluding interest) and the effect of the asset ceiling (if any excluding interest), are recognized immediately in other comprehensive income.

Other Long Term Employee Benefits:

Compensated Absences:

Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year end are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end. Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the year end are treated as other long term employee benefits. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Actuarial losses/ gains are recognised in the Statement of Profit and Loss in the year in which they arise.

h) Foreign Exchange Transactions:

Transactions in foreign currencies are translated into the respective functional currencies of the Company at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are generally recognised in statement of profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are translated using the exchange rate as at the date of transaction.

i) Borrowing Costs:

Borrowing costs that are directly attributable to the acquisition or construction of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalised as part of the cost of that asset till the date it is ready for its intended use or sale. Other borrowing costs are recognised as an expense in the period in which they are incurred.

j) Recognition of Income and Expenditure:

- i) Merchant Banking and Advisory Fees are accrued as per the terms of contract except where there is uncertainty as to their realization.
- ii) Revenue/Income and Cost/Expenditure are accounted on accrual as they are earned or incurred, except in case of significant uncertainties.
- iii) Dividend income is recognised when the right to receive is established.

Notes to Financial Statement for the year ended March 31, 2018

- iv) Interest income is recognised on accrual basis.
- v) Gain or losses on sale of investments are recognized on trade dates by comparing the sales realization with the weighted average cost of such investment.

k) Leases:

Lease payments:

Payments made under operating leases are recognised in profit or loss on a straight line basis over the term of the lease unless such payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increase. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Assets held under other leases are classified as operating leases and are not recognised in the Company's statement of financial position.

l) Impairment of non-financial assets:

The carrying values of assets/cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists. If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognised for such excess amount.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognised for an asset (other than a revalued asset) in earlier accounting periods which no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss. In case of revalued assets, such reversal is not recognised.

m) Cash and cash equivalents:

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

n) Taxation:

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

i) Current tax:

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years.

Notes to Financial Statement for the year ended March 31, 2018

It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if, the Company:

- a) has a legally enforceable right to set off the recognised amounts; and
- b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

ii) Deferred tax:

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- temporary differences related to investments in subsidiaries and associates to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognized deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if:

- a) The entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b) The deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

Deferred tax asset / liabilities in respect of on temporary differences which originate and reverse during the tax holiday period are not recognised. Deferred tax assets / liabilities in respect of temporary differences that originate during the tax holiday period but reverse after the tax holiday period are recognised.

Notes to Financial Statement for the year ended March 31, 2018

o) Provisions, Contingent Assets and Contingent Liabilities:

Provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost. A provision for onerous contracts is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognises any impairment loss on the assets associated with that contract.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but will probably not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

A contingent asset is not recognised but disclosed in the financial statements where an inflow of economic benefit is probable.

28 Contingent Liabilities to the extent not provided for in respect of:

B) Measurement of fair values:

Valuation techniques and significant unobservable inputs

The following tables show the valuation techniques used in measuring Level 2 and Level 3 fair values, as well as the significant unobservable inputs used.

Financial instruments measured at fair value

Type	Valuation technique
Fixed rates long term borrowings	The valuation model considers present value of expected payments discounted using an appropriate discounting rate.
Security Deposits	The valuation model considers present value of expected payments discounted using an appropriate discounting rate.

C) Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- Credit risk;
- Liquidity risk; and
- Market risk

i) Risk management framework

The Company's Board of Directors has overall responsibility for the establishment and oversight of the Company's Risk Management framework. The Board of Directors have adopted an Enterprise Risk Management Policy framed by the Company, which identifies the risk and lays down the risk minimization procedures. The Management reviews the Risk management policies and systems on a regular basis to reflect changes in market conditions and the Company's activities, and the same is reported to the Board of Directors periodically. Further, the Company, in order to deal with the future risks, has in place various methods / processes which have been imbibed in its organizational structure and proper internal controls are in place to keep a check on lapses, and the same are been modified in accordance with the regular requirements.

The Audit Committee oversees how Management monitors compliance with the Company's Risk Management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Audit Committee is assisted in its oversight role by the internal auditors.

ii) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and loans and advances.

The carrying amount of following financial assets represents the maximum credit exposure:

Trade receivables and loans and advances.

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer in which it operates. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the Company grants credit terms in the normal course of business.

Notes to Financial Statement for the year ended March 31, 2018

The Risk Management Committee has established a credit policy under which each new customer is analysed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered.

For trade receivables, the company individually monitors outstanding balances. Accordingly, the Company makes specific provisions against such trade receivables wherever required and monitors the same at periodic intervals.

The Company monitors each loans and advances given and makes any specific provision wherever required.

The Company establishes an allowance for impairment that represents its estimate of expected losses in respect of trade receivables and loans and advances.

Impairment:

At March 31, 2018, the ageing of trade receivables was as follows.

Particulars	Carrying amount (₹ in lacs)		
	March 31, 2018	March 31, 2017	April 1, 2016
Neither past due nor impaired			
Past due 1-90 days	-	10.50	-

Past due 181-365 days	-	18.28	-
Past due 366 days	3.28	-	-
	64.73	28.78	-

Management believes that the unimpaired amounts which are past due are collectible in full.

Cash and cash equivalents and other Bank balances

The Company held cash and cash equivalents and other bank balances of ₹5.76 lacs as on March 31, 2018 (March 31, 2017: ₹9.24 lacs and April 1, 2016: ₹61.04 lacs). The cash and cash equivalents are held with banks with good credit ratings.

Loans and Advances:

The Company held Loans and advances of ₹5,070.66 lacs as on March 31, 2018 (March 31, 2017: ₹5,438.45 lacs and April 1, 2016: ₹6,147.48 lacs). The loans and advances are in nature of advance to subsidiaries and rent deposit paid to landlords and are fully recoverable in the opinion of the Management.

iii) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

iv) Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices – will affect the Company's income or the value of its holdings of financial instruments. Market risk is attributable to all market risk sensitive financial instruments including foreign currency receivables and payables and long term debt. We are exposed to market risk primarily related to foreign exchange rate risk, interest rate risk and the market value of our investments. Thus, our exposure to market risk is a function of investing and borrowing activities and revenue generating and operating activities in foreign currency. The objective of market risk management is to avoid excessive exposure in our foreign currency revenues and costs.

Notes to Financial Statement for the year ended March 31, 2018

Currency risk

The Company is not significantly exposed to currency risk. The functional currency of the Company is Indian Rupee.

Exposure to currency risk (Exposure in different currencies converted to functional currency i.e. INR)

The currency profile of financial assets and financial liabilities as at 31st March, 2018 are as below:

March 31, 2018	GBP
Financial assets	
Trade and other receivables	66,600
	66,600

v) Interest rate risk

Interest rate risk can be either fair value interest rate risk or cash flow interest rate risk. Fair value interest rate risk is the risk of changes in fair values of fixed interest bearing investments because of fluctuations in the interest rates. Cash flow interest rate risk is the risk that the future cash flows of floating interest bearing investments will fluctuate because of fluctuations in the interest rates.

42 Capital Management

For the purpose of the Company's capital management, capital includes issued capital and other equity reserves. The primary objective of the Company's Capital Management is to maximise shareholders value. The Company manages its capital structure and makes adjustments in the light of changes in economic environment and the requirements of the financial covenants.

The Company monitors capital using debt to equity ratio.

	Indian Assured Lives Mortality (2006-08) Ult.	Indian Assured Lives Mortality (2006-08) Ult.	Indian Assured Lives Mortality (2006-08) Ult.

Assumptions regarding future mortality have been based on published statistics and mortality tables.

ii) Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below.

Particulars	March 31, 2018		March 31, 2017	
	Increase	Decrease	Increase	Decrease
Discount rate (1% movement)	(2.65)	3.01	(2.60)	2.98
Future salary growth (1% movement)	3.07	(2.75)	3.02	(2.68)
Rate of employee turnover (1% movement)	0.31	(0.37)	0.12	(0.18)

The sensitivity analysis above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

Notes to Financial Statement for the year ended March 31, 2018

Expected future cash flows

The expected future cash flows in respect of gratuity as at March 31, 2018 were as follows

45 First-time adoption of Ind AS

A) Transition to Ind AS

For the purposes of reporting as set out in Note 27, the Company has transitioned the basis of accounting from Indian generally accepted accounting principles ("IGAAP") to Ind AS. The accounting policies set out in note 27 have been applied in preparing the financial statements for the year ended March 31, 2018, the comparative information presented in these financial statements for the year ended March 31, 2017 and in the preparation of an opening Ind AS balance sheet at April 1, 2016 (the "transition date").

In preparing the opening Ind AS balance sheet as at April 1, 2016 and in presenting the comparative information for the year ended March 31, 2017, the Company has adjusted amounts reported in financial statements prepared in accordance with IGAAP. An explanation of how the transition from IGAAP to Ind AS has affected the financial performance, cash flows and financial position is set out in the following tables and the notes that accompany the tables. On transition, the Company did not revise estimates previously made under IGAAP except where required by Ind AS.

B) Exemptions and exceptions availed

1) Ind AS mandatory exceptions

1.1) Estimates

The estimates at April 1 2016 and March 31 2017 are consistent with those made for the same dates in accordance with the Indian GAAP (after adjustments to reflect any differences if any, in accounting policies). The Company has made estimates for following items in accordance with Ind AS at the date of transition as these were not required under IGAAP:

- 1) Investment in equity instruments carried at FVTPL;

1.2) Classification and measurement of financial assets

The Company has classified and measured the financial assets on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

2) Ind AS optional exemptions

2.1) Deemed cost

The Company has elected to continue with the carrying value for all of its property, plant and equipment, intangible assets recognised in the financial statements as the deemed cost at the date of transition to Ind AS, measured as per the IGAAP

2.2) Deemed cost for investments in subsidiaries and Joint Ventures

The Company has elected to continue with the carrying value of its investments in subsidiaries as recognised in the financial statements as at the date of transition to Ind AS.

Accordingly, the Company has measured all its investments in subsidiaries at their IGAAP carrying value.

Notes to Financial Statement for the year ended March 31, 2018

C) Reconciliation between IGAAP and Ind AS:

Ind AS 101 requires an entity to reconcile equity, total comprehensive income and cash flows for prior periods. The following table represent the reconciliation from IGAAP to Ind AS

1) Actuarial gain and loss

Under Ind AS, all actuarial gains and losses are recognised in other comprehensive income. Under IGAAP the Company recognised actuarial gains and losses in profit and loss. However this has no impact on the total comprehensive income and total equity as on 1 April 2016 or

Notes to Financial Statement for the year ended March 31, 2018

as on 31 March 2017. The Employee Benefit Expenses and Other Comprehensive Income were reduced by ₹32.89 lacs each.

2) Fair Valuation of Investments

Under IGAAP, Non-Current Investments (including Investments in Subsidiaries) were carried at cost less provision, if any, for diminution which is considered other than temporary in nature. Current Investments were valued at lower of cost and fair value. Under Ind AS, these Investment are measured at fair value. The resulting fair value of changes of these investments have been recognised in the retained earnings as at the day of transition and subsequently in the profit or loss for the year ended March 31, 2017

IV) Adjustments to Statement of Cash Flows

Independent Auditor's Report on Consolidated Financial Statements

To,
The Members of
PRIME SECURITIES LIMITED

Report on Consolidated Ind AS Financial Statements

We have audited the accompanying consolidated Ind AS financial statements of **Prime Securities Limited** (hereinafter referred to as the 'Holding Company') and its subsidiaries and associate (the Holding Company and its subsidiaries together referred to as 'the Company' or 'the Group'), comprising of the Consolidated Balance Sheet as at 31 March 2018, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Cash Flow Statement and Consolidated Statement of Changes in Equity for the year then ended, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as the 'consolidated Ind AS financial statements').

Management's Responsibility for the Consolidated Ind AS Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated Ind AS financial statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as the 'Act') that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated changes in the equity of the Group in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified in Companies (Indian Accounting Standards) Rules, 2015 (as amended) specified under section 133 of the Act. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Group and for preventing and detecting frauds and other irregularities;

the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated Ind AS financial statements by the Directors of the Holding Company, as aforesaid.

Auditor's Responsibility

Our responsibility is to express an opinion on the consolidated Ind AS financial statements based on our audit.

While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the consolidated Ind AS financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated Ind AS financial statements, whether due to fraud

or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated Ind AS financial statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by other auditors in terms of their reports referred to in sub-paragraphs 1 & 2 of the Other Matter paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated Ind AS financial statements.

Basis for Qualified Opinion

1. As referred in Note 32, the Group has written-back an outstanding payable of ₹219.07 Lacs as in the opinion of the management the same was no longer payable. Accordingly, the profit for the year is higher by the said amount and Other Current Liabilities is lower by the said amount.
2. As referred in Note 33, the Group has written-back ₹327.50 Lacs which was written-off as not recoverable in the earlier financial year as in the opinion of the management the same is now recoverable. Accordingly, the loss in Surplus (Profit & Loss) under Other Equity is lower and the Other Non-Current Assets is higher, by the said amount.

Qualified Opinion

In our opinion and to the best of our information and according to the explanations given to us, except for the effects of the matters described in point nos. 1 & 2 of the Basis for Qualified Opinion paragraph, the aforesaid consolidated Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with

the accounting principles generally accepted in India, of the consolidated state of affairs of the Group as at 31 March 2018, and their consolidated total comprehensive income (comprising of consolidated profit for the year and consolidated other comprehensive income), their consolidated cash flows and consolidated changes in equity for the year ended on that date.

Other Matters

1. We did not audit the financial statements of the subsidiaries, whose audited financial statements reflect total assets of ₹1,137.79 Lacs as at March 31, 2018 and total revenue of ₹1,520.76 Lacs, total net profit after tax of ₹1,083.29 Lacs and total comprehensive income of ₹ (1,082.64) Lacs for the year ended on that date, as considered in the consolidated Ind AS financial statements. These audited financial statements and other financial information for these subsidiaries has been audited by other auditors whose reports have been furnished to us, and our opinion on the accompanying consolidated Ind AS financial statements is based solely on the reports of the other auditors.
2. We did not audit the financial statements of an associate, whose unaudited financial statements reflect the Group's share of profit/ (loss) of ₹ (2.35) Lacs for the year ended March 31, 2018. These financial statements and other financial information for the associate have been prepared by the management and our opinion on the accompanying consolidated Ind AS financial statements is based solely on such management certified financial statements/information.

Report on Other Legal and Regulatory Requirements

1. As required by section 143(3) of the Act, we report, to the extent applicable, that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of

our audit of the aforesaid consolidated Ind AS financial statements;

- (b) In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated Ind AS financial statements have been kept so far as it appears from our examination of those books and report of other auditors;
- (c) The consolidated balance sheet, the consolidated statement of profit and loss (including other comprehensive income), the consolidated cash flow statement and consolidated statement of changes in equity dealt with by this Report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated Ind AS financial statements;
- (d) In our opinion, except for the effects of the matters described in point nos. 1 & 2 of the Basis for Qualified Opinion paragraph, the aforesaid consolidated Ind AS financial statements comply with the Accounting Standards specified under section 133 of the Act, read with relevant rules issued thereunder.
- (e) On the basis of the written representations received from the directors of the Holding Company as on 31 March 2018 taken on record by the Board of Directors of the Holding Company and the report of the statutory auditors of its subsidiary companies incorporated in India, none of the Directors of the Group companies incorporated in India is disqualified as on 31 March 2018 from being appointed as a Director of that company in terms of section 164(2) of the Act.
- (f) With respect to the adequacy of the internal financial controls over financial reporting of the Group and

the operating effectiveness of such controls, refer to our separate report in "Annexure A".

- (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements of subsidiaries as noted in 'Other Matter' paragraph:
 - i) The consolidated Ind AS financial statements disclose the impact of pending litigations on the consolidated Ind AS financial position of the group- Refer Note No. 29 to the consolidated Ind AS financial statements;
 - ii) The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts;
 - iii) There has been no delay in transferring amounts required to be transferred to the Investor Education and Protection Fund by the Group;
 - iv. The reporting on disclosures relating to Specified Bank Notes is not applicable for the year ended 31 March 2018.

Annexure - A to the Auditor's Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated Ind AS financial statements of the Company as of and for the year ended 31 March 2018, we have audited the internal financial controls over financial reporting of Prime Securities Limited (hereinafter referred to as "the Holding Company") and its subsidiary companies which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The Respective Board of Directors of the Holding Company and its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Group considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting

(the "Guidance Note") issued by ICAI and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence obtained by us and the audit evidence obtained by other auditors in terms of their reports referred to in the Other Matters paragraph below is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed

to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material

misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company and its subsidiary companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

Note:

1. Net block of the Building include a residential flat of ₹246.97 lacs in a co-operative society, acquired from a debtor in satisfaction of a claim. In view of the restraining orders, the society has kept in abeyance the admission of membership of the Company. In the earlier year, pursuant to the order of the Hon'ble High Court, the possession of the flat was handed over to the Official Assignee. An appeal was filed by the Company against the said order whereby the said order was set aside. Pursuant to the fresh chamber summons filed by the Company for removing attachment, the Official Assignee has been directed not to sell or dispose-off the flat. The Company has been legally advised that the said developments will not have a bearing on the Company's title to the flat and consequently there is no impairment in the value of the asset and the Company is not likely to have any further claim or liability against the said flat.
2. The Company has availed the deemed cost exemption in relation to the property plant and equipment on the date of transition and hence the net block carrying amount has been considered as the gross block carrying amount on that date. Refer note below for the gross block value and the accumulated depreciation on April 1, 2016 under the previous GAAP.

28 Significant accounting policies

a) Basis of preparation of Financial Statements:

The Consolidated Financial Statements comprise the financial statements of Prime Securities Limited ("the holding Company") and its subsidiaries ("the holding Company and its subsidiaries together referred as the group") have been prepared in accordance with the Indian Accounting Standards (Ind AS) to comply with the section 133 of the Companies Act 2013 ("the 2013 Act"), read with Rule 3 of the Companies (Indian Accounting Standards) Rules 2015 and Companies (Indian Accounting Standards) Rules 2016 for all periods up to and for the year ended March 31, 2017. The Group prepared its financial statements in accordance with accounting standards notified under the section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 (Indian GAAP). These financial statements are the Group's first Ind AS financial statements and are covered by Ind AS 101, First-time adoption of Indian Accounting Standards. The transition to Ind AS has been carried out from the accounting principles generally accepted in India ("Indian GAAP") which is considered as the "Previous GAAP" for purposes of Ind AS 101. An explanation of how the transition to Ind AS has affected

Notes to Consolidated Financial Statement for the year ended March 31, 2018

the Group's equity and its net profit is provided in Note no 47. The financial statements were authorised for issue by the Holding Company's Board of Directors on May 29, 2018.

All the assets and liabilities have been classified as current or non current as per the Group's normal operating cycle and other criteria set out in Schedule III to the Act. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalent, the Group has ascertained the operating cycle to be 12 months.

b) Principles of Consolidation:

The consolidated financial statements comprise the financial statements of Prime Securities Limited ("the Holding Company"), its subsidiaries (the Holding Company and its subsidiaries together referred as "the Group") and associate company.

Subsidiaries

Subsidiaries are all entities that are controlled by the Company. Control exists when the Company is exposed to, or has the ability to affect those returns through power over the entity. In assessing control, potential voting rights are considered only if the rights are substantive. The financial statements of subsidiaries are included in these consolidated financial statements from the date that control commences until the date that control ceases. The financial statements of the Company and its subsidiaries and jointly controlled entity have been consolidated using uniform accounting policies for like transactions and other events in similar circumstances as mentioned in those policies.

Upon loss of control, the Group derecognizes the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognized in the Consolidated Statement of Profit and Loss. If the Company retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently, it is accounted for as an equity accounted investee depending on the level of influence retained.

Equity accounted investees

The Group's interests in equity accounted investees comprise interests in associates.

An Associate is an entity in which the Group has significant influence, but not control or joint control, over the financial and operating policies.

Interest in associates are accounted for using equity method. They are initially recognised at cost which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Group's share of profit or loss and OCI of equity-accounted investees until the date on which significant influence or joint control ceases.

Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealized income and expenses arising from intra-group transactions, are eliminated in full while preparing these consolidated financial statements. Unrealized gains or losses arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Company's interest in the investee.

The financial statements of the subsidiaries and the jointly controlled entities used for the purpose

of consolidation are drawn upto the same reporting date as that of the Holding Company, i.e. March 31, 2018. The Subsidiary Companies and Joint ventures considered in the consolidated financial statements are:

Name of the Company	Country of Incorporation	% Ownership held as at March 31, 2018	% Ownership held as at March 31, 2017
Subsidiaries:			
Primesec Investments Limited	India	100%	100%
Prime Commodities Broking (India) Limited	India	100%	100%
Prime Research & Adviosry Limited	India	100%	100%
Associates:			
Primary Cuisine Private Limited	India	24%	24%

"Minority interest" represents the amount of equity attributable to minority shareholders at the date on which investment in the subsidiary is made and its share of movements in the equity since the date the parent subsidiary relationship comes into existence.

Functional and presentation currency

These financial statements are presented in Indian rupees in lakhs, which is the Holding Company's functional currency. All amounts have been rounded off to two decimal places to the nearest lakh, unless otherwise indicated.

The consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances.

The financial statements of the subsidiaries used for the purpose of consolidation are drawn upto the same reporting date as that of the Holding Company, i.e. March 31, 2018.

Historical cost convention

The Consolidated financial statements have been prepared on a historical cost basis, except for the following:

- certain consolidated financial assets and liabilities (including derivative instrument) that are measured at fair value;
- defined benefit plans – plan assets measured at fair value

c) Use of Estimates and Judgements:

The preparation of consolidated financial statements in accordance with Ind AS requires use of estimates and assumptions for some items, which might have an effect on their recognition and measurement in the Consolidated balance sheet and Consolidated statement of profit and loss. The actual amounts realised may differ from these estimates. Estimates and assumptions are required in particular for:

• Determination of the estimated useful lives of Property Plant and Equipments:

Useful lives of Property plant and equipment are based on the life prescribed in Schedule II of the Companies Act, 2013.

Notes to Consolidated Financial Statement for the year ended March 31, 2018

- **Recognition and measurement of defined benefit obligations:**

The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation, actuarial rates and life expectancy. The discount rate is determined by reference to market yields at the end of the reporting period on government bonds. The period to maturity of the underlying bonds correspond to the probable maturity of the post-employment benefit obligations.

- **Recognition of deferred tax assets:**

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilized business loss and depreciation carry-forwards and tax credits. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

- **Recognition and measurement of other provisions:**

The recognition and measurement of other provisions are based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the balance sheet date. The actual outflow of resources at a future date may therefore vary from the amount included in other provisions.

- **Discounting of long-term financial assets / liabilities:**

All financial assets / liabilities are required to be measured at fair value on initial recognition. In case of financial liabilities/assets which are required to subsequently be measured at amortised cost, interest is accrued using the effective interest method.

- **Determining whether an arrangement contains a lease**

At inception of an arrangement, the Group determines whether the arrangement is or contains a lease.

At inception or on reassessment of an arrangement that contains a lease, the Group separates payments and other consideration required by the arrangement into those for the lease and those for other elements on the basis of their relative fair values. If the Group concludes for a finance lease that it is impracticable to separate the payments reliably, then an asset and a liability are recognised at an amount equal to the fair value of the underlying asset; subsequently, the liability is reduced as payments are made and an imputed finance cost on the liability is recognised using the Group's incremental borrowing rate. And in case of operating lease, treat all payments under the arrangement as lease payments.

- **Segment reporting:**

Operating segments are reported in a manner consistent with the internal reporting. The Group prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Group as a whole.

- **Fair value of financial instruments**

Derivatives are carried at fair value. Derivatives includes foreign currency forward contracts and interest rate swaps. Fair valued of foreign currency forward contracts are determined using the fair value reports provided by respective merchant bankers. Fair value of interest rate swaps are determined with respect to current market rate of interest.

Notes to Consolidated Financial Statement for the year ended March 31, 2018

- **Measurement of fair values:**

The Group's accounting policies and disclosures require the measurement of fair values for financial instruments.

The Group has an established control framework with respect to the measurement of fair values. The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of a financial asset or a financial liability, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).
- If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.
- The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

d) **Property, plant and equipment:**

- **Recognition and measurement:**

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

The cost of an item of property, plant and equipment comprises:

Its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.

Any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in consolidated profit or loss.

The cost of the property, plant and equipment's at 1st April 2016, the Group's date of transition to Ind AS, was determined with reference to its carrying value at that date.

e) **Depreciation:**

- Depreciation on tangible assets is provided on the straight-line method over the useful lives of assets as prescribed under Part C of Schedule II of the Companies Act, 2013;

Useful life of Property Plant and Equipment are reviewed at each balance sheet date and adjusted prospectively, if appropriate.

Notes to Consolidated Financial Statement for the year ended March 31, 2018

- Depreciation on addition to assets or on sale /discardment of assets, is calculated pro rata from the date of such addition or upto the date of such sale/discardment, as the case may be;
- Individual assets except assets given on lease acquired for less than ₹5,000/- are depreciated entirely in the year of acquisition.

f) Intangible Fixed Assets:

Intangible assets, which are acquired by the Group and have finite useful lives are measured at cost less accumulated amortisation and any accumulated impairment losses.

All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred.

The cost of intangible assets at April 1, 2016, the Group's date of transition to Ind AS, was determined with reference to its carrying value at that date.

g) Financial Instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial instruments also include derivative contracts such as foreign currency foreign exchange forward contracts and, interest rate swaps and currency options; and embedded derivatives in the host contract.

Financial instruments also covers contracts to buy or sell a non-financial item that can be settled net in cash or another financial instrument, or by exchanging financial instruments, as if the contracts were financial instruments, with the exception of contracts that were entered into and continue to be held for the purpose of the receipt or delivery of a non-financial item in accordance with the entity's expected purchase, sale or usage requirements.

Financial Assets:

Classification:

The Group shall classify financial assets as subsequently measured at amortised cost, fair value through other comprehensive income or fair value through profit or loss on the basis of its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

Initial recognition and measurement:

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Equity investments:

All other equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the Group decides to classify the same either as at FVOCI or FVTPL. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Group decides to classify an equity instrument as FVOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts

Notes to Consolidated Financial Statement for the year ended March 31, 2018

from OCI to profit and loss, even on sale of investment. However, the Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the profit and loss.

Derecognition:

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e. removed from the Group's balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'passthrough' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets:

In accordance with Ind-AS 109, the Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, and bank balance.
- b) Trade receivables - The application of simplified approach does not require the group to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. Trade receivables are tested for impairment on a specific basis after considering the sanctioned credit limits, security like letters of credit, security deposit collected etc. and expectations about future cash flows.

Financial liabilities:

Classification

The Group classifies all financial liabilities as subsequently measured at amortised cost, except for financial liabilities at fair value through profit or loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.

Initial recognition and measurement:

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through

Notes to Consolidated Financial Statement for the year ended March 31, 2018

profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable and incremental transaction cost.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts and derivative financial instruments.

Derecognition:

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments:

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

h) Employee Benefits:

Short Term Employee Benefits:

All employee benefits payable within twelve months of rendering the service are recognised in the period in which the employee renders the related service.

Post Employment / Retirement Benefits:

Contribution to Defined Contribution Plans such as Provident Fund, Employees' State Insurance Corporation, etc., are charged to the Statement of Profit and Loss as incurred.

Defined Benefit Plans – The present value of the obligation under such plans, is determined based on an actuarial valuation by an independent actuary at the end of each year, using the Projected Unit Credit Method. In the case of gratuity, which is funded, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans, to recognise the obligation on net basis.

Remeasurement of net defined benefit liability, which comprises actuarial gains and losses and the return on plan assets (excluding interest) and the effect of the asset ceiling (if any excluding interest), are recognized immediately in other comprehensive income.

Other Long Term Employee Benefits:

Compensated Absences:

Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year end are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the

Notes to Consolidated Financial Statement for the year ended March 31, 2018

year end. Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the year end are treated as other long term employee benefits. The Group's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Actuarial losses/ gains are recognised in the Statement of Profit and Loss in the year in which they arise.

i) Foreign Exchange Transactions:

Transactions in foreign currencies are translated into the respective functional currencies of the Group at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are generally recognised in statement of profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are translated using the exchange rate as at the date of transaction.

j) Borrowing Costs:

Borrowing costs that are directly attributable to the acquisition or construction of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalised as part of the cost of that asset till the date it is ready for its intended use or sale. Other borrowing costs are recognised as an expense in the period in which they are incurred.

k) Recognition of Income and Expenditure:

- i) Merchant Banking and Advisory Fees are accrued as per the terms of contract except where there is uncertainty as to their realization.
- ii) Revenue/Income and Cost/Expenditure are accounted on accrual as they are earned or incurred, except in case of significant uncertainties.
- iii) Dividend income is recognised when the right to receive is established.
- iv) Interest income is recognised on accrual basis.
- v) Gain or losses on sale of investments are recognized on trade dates by comparing the sales realization with the weighted average cost of such investment.

l) Leases:

Lease payments:

Payments made under operating leases are recognised in consolidated statement of profit or loss on a straight line basis over the term of the lease unless such payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increase. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Assets held under other leases are classified as operating leases and are not recognised in the Group's statement of financial position.

Notes to Consolidated Financial Statement for the year ended March 31, 2018

m) Impairment of non-financial assets:

The carrying values of assets/cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists. If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognised for such excess amount.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognised for an asset (other than a revalued asset) in earlier accounting periods which no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, to the extent the amount was previously charged to the consolidated Statement of Profit and Loss. In case of revalued assets, such reversal is not recognised.

n) Cash and cash equivalents:

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

o) Taxation:

Income tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI.

i) Current tax:

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if, the Group:

- a) has a legally enforceable right to set off the recognised amounts; and
- b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

ii) Deferred tax:

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- temporary differences related to investments in subsidiaries and associates to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Notes to Consolidated Financial Statement for the year ended March 31, 2018

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognized deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if:

- a) The entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b) The deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

Deferred tax asset / liabilities in respect of on temporary differences which originate and reverse during the tax holiday period are not recognised. Deferred tax assets / liabilities in respect of temporary differences that originate during the tax holiday period but reverse after the tax holiday period are recognised.

p) Provisions, Contingent Assets and Contingent Liabilities:

Provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost. A provision for onerous contracts is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Group recognises any impairment loss on the assets associated with that contract.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but will probably not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

A contingent asset is not recognised but disclosed in the financial statements where an inflow of economic benefit is probable.

B) Measurement of fair values:

Valuation techniques and significant unobservable inputs

The following tables show the valuation techniques used in measuring Level 2 and Level 3 fair values, as well as the significant unobservable inputs used.

Financial instruments measured at fair value

Type	Valuation technique
Fixed rates long term borrowings	The valuation model considers present value of expected payments discounted using an appropriate discounting rate.
Security Deposits	The valuation model considers present value of expected payments discounted using an appropriate discounting rate.

C) Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- Credit risk;
- Liquidity risk; and
- Market risk

i) Risk management framework

The Company's Board of Directors has overall responsibility for the establishment and oversight of the Company's Risk Management framework. The Board of Directors have adopted an Enterprise Risk Management Policy framed by the Company, which identifies the risk and lays down the risk minimization procedures. The Management reviews the Risk management policies and systems on a regular basis to reflect changes in market conditions and the Company's activities, and the same is reported to the Board of Directors periodically. Further, the Company, in order to deal with the future risks, has in place various methods / processes which have been imbibed in its organizational structure and proper internal controls are in place to keep a check on lapses, and the same are been modified in accordance with the regular requirements.

The Audit Committee oversees how Management monitors compliance with the Company's Risk Management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Audit Committee is assisted in its oversight role by the internal auditors.

ii) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and loans and advances.

The carrying amount of following financial assets represents the maximum credit exposure:

Trade receivables and loans and advances.

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer in which it operates. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the Company grants credit terms in the normal course of business.

The Risk Management Committee has established a credit policy under which each new customer is analysed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered.

For trade receivables, the company individually monitors outstanding balances. Accordingly, the Company makes specific provisions against such trade receivables wherever required and monitors the same at periodic intervals.

Notes to Consolidated Financial Statement for the year ended March 31, 2018

The Company monitors each loans and advances given and makes any specific provision wherever required.

The Company establishes an allowance for impairment that represents its estimate of expected losses in respect of trade receivables and loans and advances.

Impairment:

At March 31, 2018, the ageing of trade receivables was as follows.

Particulars	Carrying amount (₹ in lacs)		
	March 31, 2018	March 31, 2017	April 1, 2016

Past due 366 days	3.28	-	-
	129.63	428.88	-

Management believes that the unimpaired amounts which are past due are collectible in full.

Cash and cash equivalents and other Bank balances

The Company held cash and cash equivalents and other bank balances of ₹10.74 lacs as on March 31, 2018 (March 31, 2017: ₹285.72 lacs and April 1, 2016: ₹67.43 lacs). The cash and cash equivalents are held with banks with good credit ratings.

Loans and Advances:

The Company held Loans and advances of ₹340.45 lacs as on March 31, 2018 (March 31, 2017: ₹146.71 lacs and April 1, 2016: ₹1459.03 lacs). The loans and advances are in nature of rent deposit paid to landlords and advances to other parties and are fully recoverable in the opinion of management.

iii) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Maturity profile of financial liabilities

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted, and include estimated interest payments and exclude the impact of netting agreements.

The gross inflows/(outflows) disclosed in the above tables represent the contractual undiscounted cash flows relating to the financial liabilities which are not usually closed out before contractual maturity.

iv) Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices – will affect the Company's income or the value of its holdings of financial instruments. Market risk is attributable to all market risk sensitive financial instruments including foreign currency receivables and payables and long term debt. We are exposed to market risk primarily related to foreign exchange rate risk, interest rate risk and the market value of our investments. Thus, our exposure to market risk is a function of investing and borrowing activities and revenue generating and operating activities in foreign currency. The objective of market risk management is to avoid excessive exposure in our foreign currency revenues and costs.

Currency risk

The Company is not significantly exposed to currency risk. The functional currency of the Company is Indian Rupee.

Exposure to currency risk (Exposure in different currencies converted to functional currency i.e. INR)

The currency profile of financial assets and financial liabilities as at March 31, 2018 are as below:

A) Transition to Ind AS

For the purposes of reporting as set out in Note 28, the Company has transitioned the basis of accounting from Indian generally accepted accounting principles ("IGAAP") to Ind AS. The accounting policies set out in note no. 28 have been applied in preparing the financial statements for the year ended March 31, 2018, the comparative information presented in these financial statements for the year ended March 31, 2017 and in the preparation of an opening Ind AS balance sheet at April 1, 2016 (the "transition date").

In preparing the opening Ind AS balance sheet as at April 1, 2016 and in presenting the comparative information for the year ended March 31, 2017, the Company has adjusted amounts reported in financial statements prepared in accordance with IGAAP. An explanation of how the transition from IGAAP to Ind AS has affected the financial performance, cash flows and financial position is set out in the following tables and the notes that accompany the tables. On transition, the Company did not revise estimates previously made under IGAAP except where required by Ind AS.

B) Exemptions and exceptions availed

1) Ind AS mandatory exceptions

1.1) Estimates

The estimates at April 1 2016 and March 31 2017 are consistent with those made for the same dates in accordance with the Indian GAAP (after adjustments to reflect any differences if any, in accounting policies). The Company has made estimates for following items in accordance with Ind AS at the date of transition as these were not required under IGAAP:

- 1) Investment in equity instruments carried at FVTPL;

1.2) Classification and measurement of financial assets

The Company has classified and measured the financial assets on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

2) Ind AS optional exemptions

2.1) Deemed cost

The Company has elected to continue with the carrying value for all of its property, plant and equipment, intangible assets recognised in the financial statements as the deemed cost at the date of transition to Ind AS, measured as per the IGAAP

2.2) Deemed cost for investments in subsidiaries and Joint Ventures

The Company has elected to continue with the carrying value of its investments in subsidiaries as recognised in the financial statements as at the date of transition to Ind AS.

Accordingly, the Company has measured all its investments in subsidiaries at their IGAAP carrying value.

Notes to Consolidated Financial Statement for the year ended March 31, 2018

C) Reconciliation between IGAAP and Ind AS:

Ind AS 101 requires an entity to reconcile equity, total comprehensive income and cash flows for prior periods. The following table represent the reconciliation from IGAAP to Ind AS

Notes to Consolidated Financial Statement for the year ended March 31, 2018

1) Actuarial gain and loss

Under Ind AS, all actuarial gains and losses are recognised in other comprehensive income. Under IGAAP the Company recognised actuarial gains and losses in profit and loss. However this has no impact on the total comprehensive income and total equity as on April 1, 2016 or as on March 31, 2017. The Employee Benefit Expenses and Other Comprehensive Income were reduced by ₹41.10 lacs each.

2) Fair Valuation of Investments

Under IGAAP, Non-Current Investments (including Investments in Subsidiaries) were carried at cost less provision, if any, for diminution which is considered other than temporary in nature. Current Investments were valued at lower of cost and fair value. Under Ind AS, these Investment are measured at fair value. The resulting fair value of changes of these investments have been recognised in the retained earnings as at the day of transition and subsequently in the profit or loss for the year ended March 31, 2017

IV) Adjustments to Statement of Cash Flows

There were no material differences between the statement of Cash Flows presented under Ind AS and IGAAP
