## MANAGEMENT'S DISCUSSION AND ANALYSIS

### 1. OVERALL REVIEW

The year under review was a year of re-engineering of business and consolidation. The Company decided to focus on Nylon, its core strength and expertise. The closing down of Mahad units and the shutdown of Continuous Polymer Operation (Polyester) at Bharuch site in 2013-14 was followed by starting of Nylon Filament Yarn (Textile Grade) production activity at Bharuch site. The Nylon Filament Yarn operations at Bharuch site have almost stabilised and the same coupled with aggressive marketing helped the Company regain its market share.

During the year, the Company also consolidated its Nylon Tyre Cord Fabric (NTCF) business by adding capacity to existing dipping plant to increase customer base and to meet the increasing demand for dipped NTCF from existing customers.

Pune plant had to absorb an increase in operational cost on account of new wage settlement arrived at Pune factory.

The year 2014-15 also saw a steep fall in crude oil prices. Brent Oil prices dropped from US\$ 108 per Barrel in Apr'14 to US\$ 55 per Barrel by Jan'15, leading to a cascading effect on petroleum based raw materials used by the Company. Due to higher dependence on imported raw material and continuously falling raw material prices inventory valuation losses could be avoided only to a limited extent.

Another cost area which impacted the profitability of the Company significantly for the year as a whole was operations at Bharuch site with high electrical cost per unit due to denial of power purchase from Open Access by Gujarat Energy Transmission Company.

Except for the reasons a) Inventory valuation losses due to continuously falling raw material price, b) high energy cost and c) increase in labour cost on account of wage settlement, the operational performance of the Company was satisfactory.

On demand of ₹229.27 Crs. from Central Excise Department alongwith equal amount of penalty and interest thereon, the Company has filed an Appeal before Appellate Tribunal including application for stay of demand. The Tribunal admitted the appeal and granted stay on deposit of ₹ 700 Lacs.

### 2. INDUSTRY STRUCTURE, DEVELOPMENT, THREATS, OPPORTUNITIES & OUTLOOK

#### (a) Industry Status:

In Synthetic Yarn segment of Textile Industry, the Company caters to the demand of Nylon Filament Yarn from the Apparel Textile Industry and from the Tyre Industry for reinforcement fabric – Nylon Tyre Cord Fabric (NTCF).

Nylon Industry from end product point of view can be broadly sub-divided into four categories, namely (a)

Apparel Textiles (Sarees, Dupattas, Dress materials etc.), (b) Reinforcement Fabric (mainly for Tyre manufacturing, Transmission Belts etc), (c) Technical products (like Fish net, Sewing threads, Flock fabric, Bolting fabric etc.), and (d) other Industrial products like engineering plastics etc.

In the first area i.e. Apparel textiles (sarees, dupattas, dress materials etc.), the industry has grown significantly in the last 2 years with a double digit growth in demand and expected to grow further.

In the second category the major application area is reinforcement for Bias Tyres mainly for bus and truck tyres also known as NTCF. With the improvement in infrastructure sector and increased penetration of radial tyres, even in bus and truck tyres, the demand is likely to remain stagnant.

The area of concern for growth, for Indian Nylon Industry is very high dependence on imported raw material. Out of the two suppliers for Caprolactam (FACT Travancore and GSFC Baroda), only GSFC is operational and hence the supply from domestic supplier is very limited. Similarly for Nylon Polymer other than a few players who are making their own polymer, entire industry is dependent on imported polymer.

The dependence on imports associated with longer lead times calls for carrying high inventory of raw material which ultimately leads to high working capital requirement.

Since basic raw material for Nylon industry is Caprolactam, a petroleum derivative, its price is closely linked with crude oil prices. Crude oil prices have fluctuated widely during the last 4-5 years. This has created problems for several industries and have also provided lifeline to many. Recent continuous fall in Caprolactam prices had severely impacted the first prominent area that is Apparel fabric segment due to heavy inventory valuation losses.

Cheaper imports from China and other ASEAN (Association of South East Asian Nations) countries is a serious concern for Nylon Filament Yarn Industry.

Anti dumping duty on NTCF, mainly from China will provide some respite to NTCF Industry but imports from other ASEAN countries under MFN (Most Favoured Nations) status will continue to put pressure on this industry.

#### (b) Company Status:

Operations of Polyester Continuous Processing Unit remained suspended throughout the year due to thin margins on the products. The Company consolidated its focus on Nylon Filament Yarn and put efforts in modification of additional Polyester lines. Investments were made in adding to After Treatment facilities like Air-texturising, Draw-texturising to provide a bouquet of products in the Nylon Filament Yarn business. These efforts helped the Company increase its market share in Nylon Filament Yarn business. The Company could successfully recapture its market share in Nylon Filament Yarn business in a short span of time and enjoys once again a good position in the

market. The Company has plans to further enhance its position in Nylon Filament Yarn business by investing in modification of existing machines and also addition of new machines.

To counter the aggressive pricing policy of the competitors, the Company is exploiting its technical strength by developing new product applications in nylon textile fabric. Educating end of the chain customers, mainly weavers and processors, to encourage use of these products has been started as an initiative to increase volumes in special products.

In NTCF business, radialisation of tyres definitely remains a concern for the Company. As a result of increasing radialisation, the demand for bias tyres has stagnated although the pace of radialisation will depend on improvement in road infrastructure. To meet the challenges, the Company successfully commissioned its second dipping unit at Bharuch and expects to widen its customer base with increase in production of Dipped fabric.

Writ Petition for anti-dumping duty on imports of Nylon Tyre Cord was filed and the investigations are completed. The Anti-Dumping duty is to continue for another 5 years till April 2020 which will help the Company in maintaining its market share.

The raw material supplies for Caprolactam in the domestic market is a concern, as GSFC being a single supplier. Nevertheless, the Company has annual supply contracts with GSFC which are renewable. Similarly, the Company has entered into contracts with international suppliers to secure itself against the risk of raw material outage. Globally the raw material supplies are stable hence there is no worry of shortages or unavailability of raw material in the near future.

To improvise product quality and reduce the cost of production, activities for conversion of two-step conventional tyre yarn manufacturing process to one-step process at Pune are under way and expected to commence operation by July – September 2015.

Continuously rising power cost and denial by State owned power transmission company to source power from open access, which is available at lower rates, puts the Company at a disadvantage with the competitors who have units in states where such facilities or cheaper power is available.

### Company Outlook

Introduction of VAT on NTCF in Gujarat from April 2015 will have adverse impact on NTCF margins. With both Pune and Bharuch units now falling under VAT applicability the Company will be under major disadvantage against its competitors making similar products in tax exempted States. At the same time the announcement by Government of Maharashtra to withdraw LBT from August 2015 could provide some relief to Pune plant operations. The Government is working on alternatives to compensate the shortfall in revenue collection on discontinuance of LBT. Further, the introduction of GST will hopefully create a uniform operating environment.

Despite all concerns and threats, mainly from imports, the outlook remains positive.

## 3. RISK MANAGEMENT

The Company has robust Risk Management Policy and Procedure in place to identify and prioritise risk, selection of appropriate mitigation strategy and reporting process.

The Management has identified some of the risks and efforts made to mitigate the same are as under:

### Declining trend of raw material prices:

The prices of Caprolactam and Nylon Chips, the raw material for NTCF and NFY started a downward trend from October 2014 on account of fall in crude oil prices in international market. This adversely affected the carrying cost of inventory.

To manage the risk, the Company changed the policy to procuring imported raw material on spot basis instead of long term contract and tightened control over inventory to minimize the losses in the event of further fall in price till market situation get normalised.

### High energy cost:

Open access power purchase which was hitherto available to Bharuch site of the Company was denied from March 2014 by power transmission company due to system constraint in transmission network. This resulted into substantial increase in power cost. To reduce the impact of this risk, the Company is constantly working on cost benefit analysis to generate power from furnace oil and natural gas vis-a-vis purchase from the State Electricity Board and is taking appropriate action.

### Technology obsolescence:

Tyre companies are not inclined to continue purchase of NTCF manufactured from two step process and prefer to purchase NTCF manufactured from one step process. To meet customers preference, the Company has placed order for modernizing existing spinning lines to produce one step yarn instead of the existing two step.

### NTCF market share :

NTCF customers are insisting for dipped fabric. The Company to protect its market share and to retain its customers, has installed 2<sup>nd</sup> NTCF dipping plant at its Bharuch site to cater the demand of dipped fabric.

### Foreign Exchange exposure :

It is the policy of the Company to cover its foreign currency exposure for imports to avoid currency exchange fluctuation.

The Audit Committee and the Board are apprised of the significant risks and mitigation efforts made by the Management in its quarterly meetings.

## 4. HEALTH, SAFETY AND ENVIRONMENT

The Company gives great importance to all the matters related to Health, Safety and Environment and ensures compliances of all statutory regulations.

Training of employees on emergency response, fire fighting, rescue and first aid are some of the regular features at both manufacturing sites. Apart from in-house programmes, the Company employees participated in state level safety related competitions and won prizes.

In addition to inculcating the safety culture within, the Company continued to impart free training on accident prevention and fire fighting for neighbouring small and medium scale enterprises and extended support for emergency fire calls by providing services of its fire tender.

The Company strives for clean environment, and it is achieved by controlling stack emission and maintaining treated water parameters. Treated effluent is used within the premises ensuring zero discharge. A new ozonator unit is installed to substitute chlorination by ozonation. Further the Company is working on possibilities to adopt newer technologies for effluent treatment which has potential to substantially reduce the hazardous sludge generation. Special cleaning and house-keeping drives are undertaken under the 'SWACHH BHARAT ABHIYAN' (CLEAN INDIA MOVEMENT) in the factory and staff residential colonies. To spread the message of cleanliness and importance of hygiene apart from increased thrust on housekeeping the Company plans to have a company wide drive programmes at regular intervals.

New biomass based steam boiler was commissioned in Pune site resulting in substantial reduction in usage of Furnace Oil.

Keeping pace with the changing times, the Company revisited its Health, Safety and Environment manual and updated it in the year under review.

The internal control systems are complemented by various Management Information System (MIS) reports covering all areas. Increased attention is given to auto generation of MIS reports as against manual reports to take care of possible human errors or alteration of data. The Management reviews and strengthens the controls periodically.

Apart from self monitoring of the internal controls, there are two independent Chartered Accountant firms appointed to conduct internal audit of the Company's operations as per audit plan approved by the Audit Committee. These firms present their important observations to the Audit Committee which is chaired by an independent director. The internal auditors provide a reassurance to the affirmation given by the Management that the control systems are effective, operational and adequate. Additionally, the Statutory Auditors, as a part of the audit process, review IT systems for effectiveness of the controls. The Statutory Auditors also present their observations to the Audit Committee on financial statements including the financial reporting system.

## 8. FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

Highlights (₹ / Lacs)

	2014-15	2013-14
Net Sales/ Income from Operations	121853	146679
Profit Before Depreciation, Financial Cost, Exceptional Items and Tax	12269	18963
Depreciation	(4275)	(7071)
Finance Cost	(1732)	(2091)
Exceptional Items	Nil	(220)
Taxation (Net)	(2605)	(3288)
Net Profit After Tax	3657	6293
Earnings Per share (in ₹ )	16.74	28.80
Cash Earnings Per Share (in ₹ )	36.30	61.16

### A. Sales:

The fall in net sales is primarily due to steep fall in the sale of Polyester Filament Yarn and Chips consequent to the suspension of Continuous Polyester Process plant at Bharuch since November 2013. In terms of value, the sale of Polyester Filament Yarn and Chips was lower by about ₹ 315 Crs.. The sales were partially built up by higher volume of Nylon Filament Yarn. In addition to this, falling raw material prices per unit also contributed in lower realisation per unit.

### B. Profit Before Depreciation, Financial Cost, Exceptional items and Tax (PBDFT):

The PBDFT for the year is lower mainly due to inventory valuation losses arising out of falling raw material prices, high energy cost and additional burden under employee benefit expenses due to new wage agreement at Pune for another three years starting from May 2014 to April 2017.

### C. Depreciation:

The Company has adopted the useful lives of the fixed assets as those specified in Part C of Schedule II to the Companies Act, 2013 effective 1<sup>st</sup> April, 2014. Accordingly, carrying amount of assets, for which the useful lives as per the revised estimate were exhausted as of 1<sup>st</sup> April, 2014 has been charged off to the retained earnings as on that date. For other assets, the carrying amount as of 1<sup>st</sup> April, 2014 is being amortised over the remaining useful lives of the assets. As a result, depreciation expense for the year is lower.

### D. Taxation:

The Company has calculated its deferred tax liability considering surcharge at 12% in all future years for tax calculation.

### Outlook

In the recent state budget of Gujarat, 5% VAT was levied on technical textiles which were exempted earlier. This will not only be a disadvantage as against competitors operating in states offering exemption but also reduces the profitability. Some relief in this situation is expected once GST is introduced and uniformity created.
