MANAGEMENT DISCUSSION AND ANALYSIS

(A) Economic Overview:

– Indian Economy:

Indian Economic growth, it is widely believed, will remain high, supported by a revival in investment. Relaxation in the FY 2015-16 fiscal consolidation target would allow for increased infrastructure investment. Structural reforms to improve the ease of doing business and the "Make in India" initiative is expected to boost corporate investment. Growth in export may be held back due to currency appreciation. However, decline in oil prices will reduce pressures on inflation, subsidies and the current account deficit.

Improved public spending efficiency and increased revenue are expected to fund needed public investment in physical and social infrastructure. The reduction in inflation expectations provides room for monetary easing.

Investment failed to rebound in 2014, reflecting poor infrastructure and delays in administrative procedures. The government has deregulated the coal sector, taken measures to improve the business environment and opened up new sectors – including construction, rail and insurance to foreign direct investment. The 2015-16 Budget raises investment in the rail sector. To revive corporate investment, further reforms are needed to reduce uncertainties surrounding land acquisition and tax regulations and to improve the quality of electricity and transport systems.

Infrastructure Sector in India

Infrastructure development has been fuelling India's economic growth over the past decade or so. Increasing population, rapid industrialization and urbanization as well as global trade are driving the demand for consistent investment in infrastructure development. Recognizing these requirements, the Government plans to invest INR56.3 trillion in infrastructure during the Twelfth Five Year Plan (2012-17) and approximately 50% of the investments are to be contributed by the private sector. Considering this major potential opportunity in the infrastructure segment, the EPC sector is likely to be benefitted. The EPC market in India has evolved over the last few years with increased project size and complexity, increasing private clients and entry of several foreign players.

The highway sector, after several years of operating in the PPP mode, is considering to award more projects on the EPC model. However, the construction industry as a whole and the infrastructure sector, in particular, are currently on a crossroad in the country as interest from the private sector has declined significantly in the last couple of years due to the economic slowdown and a legacy of unresolved challenges. Issues impacting projects right from planning to operation stage have made several of them unviable. Significant cost overruns, regulatory bottlenecks and aggressive bidding positions taken by a few market players are some of the key concerns affecting the EPC sector. Moreover, with increasing working capital requirements and the resultant increase in leverage, the construction players are left with limited opportunity to raise further capital to fuel growth in the current scenario. Therefore, the sector is reeling under significant liquidity constraints.

However, the new Government has set the ball rolling once again with several announcements to reform the sector and

boost investor sentiments. It has laid down its agenda to resurrect infrastructure development. Bids are being invited again for stalled projects and new infrastructure projects have been announced including smart cities, high speed rail corridors, Greenfield airports, Greenfield major ports, port-based SEZs, and housing for all by 2022

Regulatory challenges leading to time and cost overruns

India's infrastructure sector lacks an integrated framework and holistic approach for the selection and execution of projects. Several highways and port projects have been delayed in recent years due to lack of environmental and forest clearances. Furthermore, power projects suffered due to shortage of fuel and low pace of resolutions in that regard.

Furthermore, due to the lack of a robust resolution system, several dispute cases, pertaining primarily to change in scope of work, are pending across all infrastructure sub-sectors, resulting in time and cost overruns.

Challenges relating to financing

The slowdown in the Indian economy has been continuing since last two years, with domestic structural constraints, dampened global cyclical conditions and dented business confidence. Furthermore, the asset-liability mismatch limits the capacity of banks to lend funds to infrastructure projects, and most banks have reached their exposure limits. This has resulted in a virtual freeze on bank loans for infrastructure projects.

In the last two years, the speed of execution and margins have deteriorated in the sector. Increase in base interest rates, coupled with deterioration of credit profile of highway projects have resulted in a substantial increase in borrowing costs for these projects. The credit worthiness of developers has also gone down due to their highly leveraged balance sheets and stressed profitability.

The construction industry is the country's second-largest economic segment employing more than 40 million people. The infrastructure sector is the mainstay of India's economic growth, which has primarily been driven by considerable investment in infrastructure development over the last decade or so.

Despite a large project pipeline and policy support, the last two years have been difficult for the construction sector due to the less than 5% economic growth, domestic structural constraints and inflationary pressures. Growth in revenues is not getting translated into bottom line, due to significant cost overruns, regulatory bottlenecks and aggressive bidding decisions taken by various market players. Moreover, with increasing working capital requirements and the resultant increase in leverage, the construction players are left with limited opportunity to raise further capital to fuel growth in the current scenario.

The sector is reeling under significant liquidity constraints, which are expected to improve as a result of the developments witnessed recently. The Government, on its part, has been continuously attempting to simplify the approval processes, standardizing repetitive tasks (such as model agreements) to eliminate redundancies in efforts and expedite execution, easing out credit generation for the infrastructure sector and setting up agencies to expedite growth through a planned release of projects.

There is a need to realize that a large project pipeline alone is not sufficient, the sector needs a helping hand to continue on its growth trajectory. Integrated and holistic development of infrastructure, speedy regulatory clearances, improvement in bidding process, balanced risk allocation and rapid dispute resolution mechanism are few measures, which are long overdue.

Precise project scoping and cost estimation will make the project robust. Furthermore, emergence of new sectors such as railways, smart cities, port-based SEZ and renewable energy provides EPC players an opportunity to diversify and de-risk their business.

(B) Opportunities:

(1) Irrigation & Water:

For the FY 2015-16 various states have earmarked a substantial quantum of funds for Irrigation and development of Water Resources in some of the major states are as below:

Maharashtra: An outlay of Rs.7,272 cr is proposed for Water Resources Department in the year 2015-16 and 38 irrigation projects is planned to be completed during this year. As a result, 700 million cubic liter water storages will be created and 69 thousand hectare of land will be brought under irrigation.

Orissa: Public investment for Agriculture is largely made through creation and maintenance of Irrigation Infrastructure. The total budgetary outlay for Water Resources Department is Rs.6,212 cr in 2015-16.

Karnataka: New schemes for the year 2015-16 Government has given utmost importance for the implementation of Upper Krishna Project Stage-III. Works related to 9 sub projects under this scheme, 8 sub projects namely, Mulwad, Chimmalagi, Indi, Mallabad, Rampur, Koppal, Herkal Lift irrigation and extension of Narayanapura right bank canal will be expedited. Administrative approval for Rs.5,768 cr has been accorded for the revised detailed project estimate of Singatalur Lift irrigation Scheme. It is planned to adopt flow irrigation in 48,381 acres and micro irrigation in 2,16,848 acres under this project.

Andhra Pradesh: Allocations in AP Budget 2015-16 for Irrigation Water & Flood Management - Rs 5,258 cr

Madhya Pradesh: Drinking Water Projects worth Rs 1,000 cr are proposed to be started in 2015-16 through Madhya Pradesh Jal Nigam. Provision of Rs. 7,463 cr for irrigation works in 2015-16

Haryana: For Irrigation & Water resources allocating Rs 2,351 cr during 2015-16.

Tamil Nadu: The overall allocation to the Irrigation Sector has been increased to Rs.3,727 cr in the Budget Estimates 2015-2016.

Telangana: Rs. 8,500 cr allocated for Irrigation Sector

Punjab: An amount of Rs 1,005 cr has been earmarked for irrigation in the year 2015-16.

(2) Roads:

India's growing population requires proper infrastructure. The government seeing this need has provided a lot of assistance through policies that have attracted involvement from the

private sector, which is now a key player in the growth of road infrastructure in the country.

The Indian government plans to develop a total of 66,117 km of roads under different programmes such as National Highways Development Project (NHDP), Special Accelerated Road Development Programme in North East (SARDP-NE), and has set an objective of building 30 km of road a day from 2016.

The Indian Roads Segment, which is one of the biggest in the World behind only to the US and China, is expected to see capital expenditures of more than Rs 1.2 trillion stretching from States to Rural Roads. This is about 50% higher than Rs 80,000 crores seen in FY 2012. India has the second largest road network in the world at 4.7 million km. This network transports more than 60 per cent of all goods in the country and 85 per cent of India's total passenger traffic. Road activity has gradually increased over the years with the improvement in connectivity between cities, towns and villages in the country.

With automobiles and freight movement also growing at a rapid rate, the necessity for a road network good enough to carry the traffic is paramount. Understanding this need, the Government of India has set aside 20 per cent of the investment of US\$ 1 trillion reserved for infrastructure during the 12th Five-Year Plan (2012–17) to develop the country's roads. The most significant of the announcement made by Transport Minister was that the Government would focus on awarding projects through the Engineering, Procurement and Construction (EPC) route for the next two years rather than the Build - Operate – Transfer (BOT) model under Public – Private Partnership (PPP). "The shift to EPC mode is due to the fact that PPP models are economically not viable at this moment.

In the Roads and Highways Sector, the National Highways Authority of India is planning to restart the highway development programme and award 6,000 Km and Rs 55,000 crores worth of projects in FY 15.

The Indian government plans to set up a finance corporation with an amount of Rs 1 trillion (US\$ 16.34 billion), in collaboration with Japanese investors, to fund projects in the roads segment. The Japanese partners are expected to have a 26 per cent stake with assured returns of nine per cent, according to an official source.

The Indian government has approved road projects worth about Rs 40,000 crore (US\$ 6.53 billion), including around Rs 20,000 crore (US\$ 3.26 billion) highway projects in J&K, Rs 15,000 crore (US\$ 2.45 billion) road-building projects in the Northeast, Rs 6,000 crore (US\$ 980.55 million) road network in Uttarakhand, and realignment of roads in Himachal Pradesh. The target is to build 30 KM of roads per day by FY 2017

(3) Power:

Present Government has taken up challenge to provide power in India on 24x7 basis and have launched ambitious plans with investment of INR 4,00,000 Crores in the domestic

power sector Targeted sector where these investments shall go are Generation (Including Renewable Energy) Transmission and Distribution and Electrification

Besides adding 70,000 MW of new generation capacity planned in the 12th Plan of Government of India, 30,000 MW of renewable energy capacity additions is targeted in this plan.

Central Transmission Utility M/s Power Grid Corporation of India Ltd (PGCIL) plans to invest INR 1,00,000 Crores in a phased manner for Transmission lines and Substations, Large pooling stations of 800 KV with allied lines are planned in state of Chattisgarh and Orissa supporting the evacuation of Power of Ultra Mega Power Projects.

State of Rajasthan, Madhya Pradesh, Andhra Pradesh, Tamil Nadu and Gujarat have launched Green Energy Corridors with the support of funding from international agencies, e.g. KfW Germany, JICA Japan, Total investment for creating transmission line facility for 30,000 MW renewable energy generations capacity shall be of INR 40,000 Crores.

Emphasis is also been laid on development of integrated power development systems and Rural electrification with allocation of total investment of INR 80,000 Crores. Rural Electrification Corporation (REC) has been made the nodal agency for disbursement of these funds and supervise this scheme for implementation.

Also with the allocations of coal blocks by Government of India, Independent Power Plants which were starting of coal support shall start generation and shall add new capacity of more than 20,000 MW in the 12th Plan.

(4) Railways:

Indian Railways (IR) is one of prime mover of Economy in India. It is one of the world's largest railway networks comprising 115,000 km of track over a route of 65,436 km and 7,172 stations.

In 2014-15, IR carried 8.397 billion passengers annually or more than 23 million passengers a day (roughly half of whom were suburban passengers) and 1050.18 million tons of freight in the year. In 2014-2015 Indian Railways had revenues of Rs 1,634.50 billion (US\$26 billion) which consists of Rs 1,069.27 billion (US\$17 billion) from freight and Rs 402.80 billion (US\$6.4 billion) from passengers tickets.

Indian Railways has come out with a five year Plan 2015 - 2019. To expand Bhartiya Rail's capacity substantially and modernize infrastructure, Railways plans to do following:

- Increase daily passenger carrying capacity from 21 million to 30 million.
- Increase track length by 20% from 1,14,000 km to 1,38,000 km.
- Grow annual freight carrying capacity from 1 billion to 1.5 billion tones.

The government has increased outlays on the gross budgetary support to the Railways by Rs 10,050 million. The Budget has allowed Infrastructure Finance company like Indian Railways Finance Corporation (IRFC) to issue Tax

Free Infrastructure bonds for the Rail Projects .

Ministry of Railways has planned fast track works on 7,000 kms of double/third/fourth lines and commission of 1200 km in 2015 - 16 at an investment of Rs. 8,686 crore, 84% higher Y-O-Y

Railways has planned to award 750 km of civil contracts and 1,300 km of system contracts in 2015 -16 on Dedicated Freight Corridor (DFC); 55 km section of Eastern DFC to be completed in the current year. Preliminary Engineering cum Traffic Survey (PETS) for four other DFCs are in progress.

Other initiatives intended to be undertaken is to increase the Speed of 9 railway corridors from existing 110 and 130 kmph to 160 and 200 kmph respectively so that inter metro journeys like Delhi - Kolkata and Delhi - Mumbai can be completed overnight.

Feasibility study for High Speed Rail between Mumbai - Ahmedabad is in advanced stage and report expected by the mid of this year. For other high speed routes on the diamond quadrilateral, studies are being commissioned.

Many cities are planned to have Metro Routes to enable timely commutation between various locations within city. Metro's are planned to come up in Vijaywada, Nagpur, Pune, Ahmedabad, Lucknow, Kanpur, Agra, Meerut, Patna, etc.,

(5) Urban Infrastructure:

India's urban population has increased from 222 million (26% of the population) in 1990 to 410 million (32%) in 2014 and is expected to reach 814 million (50%) by 2050. Three of India's cities are among the most populous in the world: Delhi (25 million), Mumbai (21 million) and Kolkata (15 million) ranking 2nd, 6th and 14th, respectively. The government knows that, although India's current urban population makes it the second-largest urban community in the world, the proportion of Indian citizens living in cities is still comparatively low. An urbanization rate of 32% in India compares to a rate of 54% (758 million) in China, 53% (134 million) in Indonesia and a whopping 85% (173 million) in Brazil.

The gap between the levels of investment needed and the business-as-usual scenario is estimated to be around \$80-\$110 billion. The government's own ambition in the 12th Five Year Plan is to raise infrastructure investment as a proportion of GDP to 9% by 2017. But clearly the state will be unable to finance all of this investment on its own, so the core question now is how India can attract the requisite amount of private-sector funding for urban projects.

The new Indian government has sought to encourage further urban development through various initiatives, such as the creation of five industrial corridors and, more recently, the launching of the 'Make in India' and the 100 Smart Cities programme.

For urban development, Government of India has conceptualized Industrial/Economic corridors:

1. Delhi-Mumbai Industrial Corridor (DMIC) which covers the States of Uttar Pradesh, Haryana, Rajasthan, Madhya Pradesh, Gujarat and Maharashtra

2. Bengaluru- Mumbai Economic Corridor (BMEC) which covers the States of Karnataka and Maharashtra
3. Chennai-Bengaluru Industrial Corridor (CBIC) which covers the States of Tamil Nadu, Karnataka and Andhra Pradesh
4. Visakhapatnam-Chennai Industrial Corridor (VCIC) which covers the States of Andhra Pradesh and Tamil Nadu
5. Amritsar-Kolkata Industrial Corridor (AKIC) which covers the seven States namely Punjab, Haryana, Uttar Pradesh, Uttarakhand, Bihar, Jharkhand and West Bengal.

BMEC, VCIC and AKIC are in the initial stages of implementation whereas master planning for all the three nodes in CBIC and all nodes except for Dadri Noida Ghaziabad Investment region under DMIC have been completed. Seven industrial cities have been taken up for development in the first phase of the DMIC project such as Ahmedabad-Dholera Investment Region in Gujarat; Manesar-Bawal Investment region in Haryana; Dadri-Noida-Ghaziabad Investment region in Uttar Pradesh; Khushkhara-Bhiwadi-Neemrana Investment region in Rajasthan; Shendra Bidkin Investment region in Maharashtra; Dighi Port Industrial area in Maharashtra; Pithampur-Dhar-Mhow Investment region in Madhya Pradesh. Various trunk infrastructure projects like development of roads and utilities, drainage, sewage, potable water, industrial water, water treatment & recycling, sewage treatment plant, common effluent treatment plant, ICT, etc. are being developed under DMIC.

(6) Building & Structures:

The Union Budget 2015 may have disappointed most stakeholders in the real estate sector as the Finance Minister did not announce any measure to benefit either demand or supply in the sector. Moreover, the proposed increase in service tax will also affect the market. The only positive thing that came out of the budget for real estate was the tax clarification on real estate investment trusts (REITs).

In India, improved economic conditions and government measures to provide better infrastructure and housing are expected to have a positive effect.

Government proposals to relax guidelines for foreign investment, implementation of REITs, and increased funding for affordable housing and infrastructure projects, these are all expected to offer the much needed impetus.

While commercial real estate is expecting to see much action, residential housing may lag. Any benefit coming from introduction of REITs is likely to remain confined to commercial real estate. While developers in the residential segment may not see REIT funds coming their way, other factors may play out in their favour. "The housing market is likely to see a shift from luxury towards affordable housing projects, with affordable price points hopefully leading to higher absorption levels. Developer emphasis on clearing inventory levels and meeting construction deadlines is seen as an encouraging step for the segment

Lower interest rates on home loans is one such factor that homebuyers as well as developers are waiting for. While the Reserve Bank of India reduced repo rates by 25 basis points in January and March each, expectation is high that it may go for

a further rate cut. If that happens, and lending institution pass on the benefit to home loans, potential homebuyers who have been sitting on the fence are likely to take a buy decision.

REITs bring an opportunity to invest in real estate even with small amounts. You could consider the instrument to diversify your portfolio, and it could provide regular income as well as capital appreciation over a period

(7) Oil & Gas:

In line with Prime Minister Narendra Modi's 'Make in India' initiative to give domestic manufacturing a major push, the country's one of the core sector Oil & Gas is expected to see investments worth as much as Rupees 5-6 Lakhs crore over the next five to seven years.

Manufacturing opportunity is expected to be created in near to medium term across the Oil and Gas value chain including upstream (exploration & production), midstream (Natural Gas pipeline infrastructure and LNG shipbuilding, LNG terminals, etc.) and downstream (refining, and petrochemicals).

The Government of India has taken many initiatives for attracting investment to boost domestic output and strengthen the relative infrastructure. These efforts are likely to create several Opportunities for oilfield services, EPC companies and capital goods companies.

The decisions to move towards market driven pricing are expected to reduce subsidies on petroleum products and, in turn, help oil companies (HPCL, BPCL, and IOCL) reduce their losses and free up capital for investments and expansions.

The Government has allowed 100% FDI in upstream and private sector refining projects. In addition, FDI limit for public sector refining projects has been raised to 49%. Additionally, the Indian Government has enacted various policies such as New Exploration Licensing Policy (NELP), coal bed methane (CBM), shale gas and Petroleum, Chemicals and Petrochemical Investment Regions (PCPIR) policy to encourage investments across the industry's value chain.

Several assets in the oil and gas segment are over 30 years old. Hence, oil companies are undertaking projects for the redevelopment and revamp of these assets (ONGC).

(8) Ports

The ministry plans to create a port capacity of 2400 MT for handling about 1600 M.T. of cargo by FY 2019-20. The current capacity in ports is 1700-1800 MT, which handles a traffic of 1200-1300 MT. The ministry wishes to bring the ports at par with the best international ports in terms of performance and capacity. The ministry wants to increase the tonnage under the Indian Flag and Indian Control.

The Ministry wishes to promote the coastal shipping, so that it helps in decongesting the roads. Coastal shipping is environment friendly. India's current share in the Global Shipping Building is 1%, the government wants to increase it to 5%. The share of India seafarers is currently between 6-7% in the Global Shipping Industry.

The Government wants to increase it to minimum of 9% by 2015. The total proposed investments in major and non-major ports by 2020 is expected to be approximately 287000 crores and the total proposed investments in the shipping sector by 2020 is Rs. 165000 crores. The agenda lays emphasis on

implementation of the Port development projects. The ministry would develop two new Major Ports, one on east and another on west coast.

The Ministry would work towards full mechanisation of cargo handling and movement. A new policy on Dredging would be released. The projects for rail, road and inland waterway connectivity to ports will be identified and implemented. Major ports will be corporatized. A new land policy for major ports will be developed.

Water Ways

Govt to spend around 5 lac Crores in next ten years for developing Inland waterways in the country.

(C) Performance during the year:

- (1) Over the past two years, the economy has been burdened with high inflation and fiscal deficits, currency and capital account volatility and poor business investment and sentiments, which has caused growth to fall below the desired level.
- (2) Structural factors such as poor infrastructure and capacity, labour market inefficiencies, lack of land acquisition reforms and a poor distribution system often have resulted in supply bottlenecks and are some of the primary reasons for inflation and poor investments in the economy.
- (3) Against such background, your company had been able to secure orders in Power, Building, Roads and Oil & Gas segments.
- (4) Continued management efforts to improve the performance of the Company has resulted in successful completion of some projects in India and overseas

(E) Outlook:

Your Company has significantly strengthened its business developments initiatives and is reaping the rewards of the efforts, in terms of healthy order inflow. Your Company has now built a stable platform for execution of large projects across various sectors.

Falling crude prices might have brought some relief in the domestic market, operations of the Subsidiary Company in Kingdom of Saudi Arabia (KSA) has been negatively impacted. Most of the mega infrastructure projects announced earlier have been put on hold. Consequently, acquisition of new orders in KSA has almost stalled.

(F) Challenges, Risks and Concerns:

The Indian infrastructure industry has tremendous scope for the future. In the current macro-economic environment, the Company perceives following risks and concerns.

(1) Liquidity Position:

IL&FS as the Promoter has supported your Company by providing long term loans to meet the working capital requirements. While the overall Cash Flow situation has improved during the year, the Company is working with Banks and Financial Institutions for further funding to support the increased Working Capital need of the Company.

(2) Changes in Government policies including change in tax structure:

While of late, Government policies are tending to be more stable than they were in the past, the Company does provide for such contingencies at the time of bidding if the attendant costs cannot be passed on to the customer through the contract itself.

(3) Price Inflation Risk:

The Company has a centralized purchase department to meet the requirements of all its projects and is therefore able to source at best possible terms.

(4) Increased Public Spending:

Given the current size of the order book and the number of projects that are in the pipeline, your Company is confident of maintaining the present levels of operations. However,

this scenario is expected to improve in the light of politically stable government at the Centre which is expected to clear policy paralysis and increase public spending.

(G) Internal Control System and their Adequacy:

The Company has put in place adequate and effective system solutions to manage internal controls to ensure that all company assets and interests are safeguarded properly. All transactions are recorded, authorized and approved properly. Reliability and accuracy of accounting data are ensured with proper checks and balances for complying with various statutory requirements. The company has in the earlier years implemented Oracle e-Business Suite as Enterprise Resource Planning (ERP) System for recording transactions with complete audit trail, which addresses the requirements of Supply Chain Management, Finance & Accounts, Projects, Plant & Machinery and Human Resource departments in an integrated way. A renewed emphasis on Internal Audit process and in-house Governance policies has been the practice of the day. The Company has continued thrust on improved systems & policies with an endeavor to align all business processes with ERP system and implement best practices.

(H) Human Resources & Industrial Relations:

The Company has implemented several plans to attract and retain skilled manpower at all levels. The Company introduced many new initiatives for better employee engagement and also implemented training programs for its employees to develop their hard and soft skills required for their profession. Our responsibility is to express an opinion on these standalone financial statements based on our audit. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial control system over financial reporting and the operating effectiveness of such controls. The financial statements have been prepared on an accrual basis and under the historical cost convention.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

2.1 Statement of significant accounting policies:

(a) Use of estimates:

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities at the date of the reporting year. Although these estimates are based on management's best knowledge of current events and actions, actual results could differ from these estimates.

(b) Revenue recognition:

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and revenue can be reliably measured. Revenue recognized is net of taxes.

Revenue from construction contracts

Revenue from construction contracts is recognized on the percentage of completion method as mentioned in Accounting Standard (AS 7) "Construction Contracts" notified under section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules 2014. The percentage of completion is determined by the proportion that contract costs incurred for work performed up to the balance sheet date bear to the estimated total contract costs. However, profit is not recognized unless there is reasonable progress on the contract. If total cost of a contract, based on technical and other estimates, is estimated to exceed the total contract revenue, the foreseeable loss is provided for. The effect of any adjustment arising from revision to estimates is included in the income statement of the year

in which revisions are made. Contract revenue earned in excess of billing has been reflected under "Inventories" and billing in excess of contract revenue has been reflected under "other current liabilities" in the balance sheet. Revenue recognized is net of taxes

Price escalation and other claims or variations in the contract works are included in contract revenue only when:

- (a) Negotiations have reached to an advanced stage (which is evidenced on receipt of favourable arbitration award, acceptance by customer, etc.,) such that it is probable that customer will accept the claim; and
- (b) The amount that is probable will be accepted by the customer and can be measured reliably.

Interest

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

Dividend

Dividend income is recognized when the Company's right to received dividend is established by the reporting date.

(c) Tangible fixed assets and depreciation:

- (i) Fixed assets are stated at cost less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price, freight, duties, taxes and any attributable cost of bringing the asset to its working condition for its intended use. Borrowing costs relating to acquisition of fixed assets which take substantial period of time to get ready for use are included to the extent they relate to the period till such assets are ready for intended use.
- (ii) Assets retired from active use and held for disposal are stated at their estimated net realizable values or net book values, whichever is lower.
- (iii) Assets acquired under finance lease are depreciated on a straight-line basis over the useful life of the asset or the useful life envisaged in Schedule II to the Companies Act, 2013, whichever is lower.
- (iv) Gains or losses arising from derecognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.
- (v) Depreciation on fixed assets other than those mentioned in S No (vi) below, is provided on straight line method,

Notes to financial statements for the year ended March 31, 2015

(All amounts in Rs. Crore except for share data or as otherwise stated)

based on useful life of the assets as estimated by the management which coincides with rates prescribed under Schedule II to the Companies Act, 2013.

- (vi) Depreciation on the following fixed assets, for which rates are not prescribed under Schedule II of the Companies, Act 2013, is provided on a straight-line basis, at rates that are based on useful lives as estimated by the management:

Category of asset	Useful life
Plant and Machinery	
- construction equipment consisting of shuttering /scaffolding material and equipments given on hire	6 years
- shuttering/scaffolding material at project sites	6 years
Temporary erections – site offices	over the expected life of the respective project
Leasehold improvements	over the period of lease
Site Infrastructure	6 years
Tools and implements	Fully in the year of purchase

- (vii) Assets costing five thousand rupees or less are fully depreciated in the year of purchase.

(d) Intangible Assets - Software:

Computer software license cost is expensed in the year of purchase as there is no expected future economic benefit, except for enterprise wide/project based software license cost which is amortized over the period of license or six years, whichever is lower.

(e) Investments:

Investments that are readily realizable and intended to be held for not more than one year from the date on which such investments are made are classified as current investments. All other investments are classified as long term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued. If an investment is acquired in exchange for another asset, the acquisition is determined by reference to the fair value of the asset given up or by reference to the fair value of the investment acquired, whichever is more clearly evident.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

(f) Inventories:

- Project materials at site are valued at the lower of cost and estimated net realizable value. Cost is determined on weighted average basis. Net realizable value is the estimated selling price in the ordinary course of business, reduced by the estimated costs of completion and costs to effect the sale.
- Amount due from customers (project work-in-progress) represents contract revenue earned in excess of billing.

(g) Retirement and other employee benefits:

- Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

- Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation on projected unit credit method made at the end of each financial year.

Accumulated Gratuity liability which is expected to be paid on account of retirement within 12 months is treated as Short term employee benefit. Accordingly the Company presents the liability as current liability. Accumulated Gratuity liability in respect of which the Company has no obligation before 12 months is treated as long term employee benefit. Accordingly, the Company presents the liability as non-current liability.

- Short-term compensated absences are provided for based on estimates. Long-term compensated absences are provided for based on actuarial valuation on projected unit credit method made at the end of each financial year. The Company presents the entire leave encashment as current liability in the balance sheet, since the Company does not have an unconditional right to defer its settlement for the 12 months after the expiry date.
- Actuarial gains / losses are immediately taken to Statement profit and loss and are not deferred.

(h) Income taxes:

Tax expense consists of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961. Deferred income tax reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Notes to financial statements for the year ended March 31, 2015

(All amounts in Rs. Crore except for share data or as otherwise stated)

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each balance sheet date, the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The Company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

(i) Foreign currency transactions:

• **Initial recognition**

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

• **Conversion**

Foreign currency monetary items are reported using the closing rate. Non – monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction; and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

• **Exchange differences**

Exchange differences arising on the settlement of monetary items or on reporting such monetary items of the Company at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognized as income or as expenses in the year in which they arise.

• **Forward exchange contracts not intended for trading or speculation purposes**

The premium or discount arising at the inception of forward exchange contracts are amortized as expense or income over the life of the contract. Exchange differences on such contracts are recognized in the statement of profit

and loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognized as income or as expense for the year.

• **Accounting for derivative instruments**

As per the announcement of the Institute of Chartered Accountants of India (ICAI) on accounting for derivative contracts, derivative contracts, other than those covered under AS-11, are marked to market on a transaction basis, and the net loss after considering the offsetting effect on the underlying hedge item is charged to the income statement. Net gains are not accounted on the basis of prudence.

• **Translation of non-integral foreign operation**

The assets and liabilities of a non-integral foreign operation are translated into the reporting currency at the exchange rate prevailing at the reporting date. The statement of profit and loss is translated at exchange rates prevailing at the dates of transaction or weighted average rates, where such rates approximate the exchange rate at the date of transaction. The exchange differences arising on translation are accumulated in the foreign currency translation reserve. On disposal of a non-integral foreign operation, the accumulated foreign currency translation reserve relating to that foreign operation is recognized in the statement of profit and loss.

• **Translation of integral foreign operation**

The financial statements of an integral foreign operation are translated as if the transactions of the foreign operation have been those of the Company itself.

(j) Leases:

• **Where the Company is a Lessee**

Finance leases, which effectively transfer to the Company substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the lower of the fair value and present value of the minimum lease payments at the inception of the lease term and disclosed as leased assets. Lease payments are apportioned between the finance charges and reduction of the lease liability based on the implicit rate of return. Finance charges are recognised as finance costs in the Statement of profit and loss. Lease management fees, legal charges and other initial direct costs are capitalized.

If there is no reasonable certainty that the Company will obtain the ownership by the end of the lease term, capitalized leased assets are depreciated on a straight-line basis over the shorter of the estimated useful life of the asset, the lease term or the useful life envisaged in Schedule II to the Companies Act, 2013.

Leases where the lessor effectively retain substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the Statement

Notes to financial statements for the year ended March 31, 2015

(All amounts in Rs. Crore except for share data or as otherwise stated)

of profit and loss on a straight-line basis over the lease term.

- **Where the Company is a Lessor**

Assets under operating leases are included in fixed assets. Lease income is recognised in the Statement of profit and loss on a straight-line basis over the lease term. Costs, including depreciation, are recognised as an expense in the Statement of profit and loss. Initial direct costs such as legal costs, brokerage costs, etc. are recognised immediately in the statement of profit and loss.

(k) Borrowing Costs:

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition or construction of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the year they occur.

(l) Accounting for Joint Ventures:

Accounting for joint ventures undertaken by the Company has been done in accordance with the requirements of AS – 27 “Financial Reporting of Interests in Joint Venture” notified under section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014 as follows:

- **Jointly controlled operations:**

In respect of joint venture contracts which are executed under work sharing arrangements, the Company's share of revenues, expenses, assets and liabilities are included in the financial statements as revenues, expenses, assets and liabilities respectively. In case of certain construction contracts in the irrigation sector, the share of work executed by the Company has been determined on the basis of certification by lead partner.

- **Jointly controlled entities:**

Investments made in unincorporated integrated joint ventures registered in the form of partnership firms or Association of Persons (AoPs) are classified as Jointly Controlled Entities in terms of Accounting Standard (AS) – 27 “Financial Reporting of Interest in Joint Ventures” notified under section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014 and Company's share in profit/losses of the respective entities is recognized in the financial statements. The initial investment including accumulated Company's share of profit/losses in the jointly controlled entities are recognised under investments. Any further funding made by the Company in the jointly controlled entities in the nature of current account transaction is recognised under loans and advances.

(m) Earnings per share:

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting preference dividends and taxes applicable) by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events of bonus issue that have changed the number of outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

(n) Impairment:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

(o) Provisions, contingent liabilities and contingent assets:

A provision is recognised when the Company has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimates. A contingent liability is disclosed unless the possibility of an outflow of resources embodying the economic benefits is remote. Contingent assets are neither recognised nor disclosed in the financial statements.

(p) Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short term investments with original maturity of three months or less.

Notes to financial statements for the year ended March 31, 2015

(All amounts in Rs. Crore except for share data or as otherwise stated)

(q) Employee stock compensation cost:

Measurement and disclosure of the employee share-based payment plans is done in accordance with SEBI (Share Based Employee Benefits) Regulations, 2014 and the Guidance Note on Accounting for Employee Share-based Payments, issued by the ICAI. The Company measures compensation cost relating to employee stock options using the intrinsic value method. Compensation expense, if any, is amortized over the vesting period of the option on a straight line basis.

(r) Measurement of EBITDA:

As permitted by the Guidance Note on Revised Schedule VI to the Companies Act, 1956, the Company has opted to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of statement of profit and loss. The Company measures EBITDA on the basis of profit/ (loss) from continuing operations. In its measurement, the Company does not include depreciation and amortisation expense, finances costs and tax expense.

High Court of Karnataka appointed arbitrator who has dismissed the proceedings during the year. Further, during the year ended March 31, 2014, the transferee also filed petition under Section 9 of the Arbitration & Conciliation Act, 1996. During the year, these arbitration proceedings have been dismissed. As at March 31, 2015 there are no cases against the Company in respect of this matter.

HJV subcontracted this work to SSJV Projects Private Limited (SSJV) and the work has been executed to the extent of Rs. 262.45 by SSJV. During the previous year, the terms of the PTCs were restructured and as per revised arrangement, the Trust has issued fresh PTCs in lieu of erstwhile PTCs wherein the contributories would participate in the realization arising out of disposal of underlying investments in specified order and the Company is no longer liable for the shortfall, if any, towards settlement of PTCs held by other contributories. The aforesaid Trust portfolio includes an investment wherein the investee company has gas based power plant, which is facing concerns on account of lower supplies/availability of natural gas. However, based on expert advice, evaluation of few alternates including representations/discussions with various government authorities to secure the gas linkage/supplies, the Management is of the view that the concerns in the industry are temporary in nature and will not have any material impact on the carrying value of the underlying investments held by the Trust and consequently on the carrying value of the PTCs held by the Company.

48. Post induction of IL&FS Group [Consisting of Infrastructure Leasing & Financial Services Limited ("IL&FS"), IL&FS Financial Services Limited ("IFIN") and IL&FS Engineering & Construction Company Limited ("IECCL")] in the Hill County Properties Limited ("HCPL"), IL&FS Group has extended loans to HCPL through the Company amounting to Rs. 201.46 (March 31, 2014: Rs. 201.46). Such facilities rank as priority debt and will have priority in repayment over other liabilities of HCPL (except existing secured borrowings from banks). In addition, towards security for the same, the Company has entered into an "Articles of Agreement" with HCPL wherein IL&FS Group has been given an option for adjusting the loans, along with accrued interest, against all the unsold villas and apartments of Hill County Phase I project of HCPL.

During the previous year, the Company had entered into inter-se sharing of security provided by HCPL along with other lenders of HCPL in the form of hypothecation of certain identified receivables including inter corporate loans, residual charge against receivables from unsold inventory, pledge of investment in Jubilee Hills Landmark Projects Private Limited and letter of guarantees and mortgage of title deeds of immovable property from subsidiaries of HCPL. HCPL is in the process of creating charges for certain mortgage of title deed of immovable property and development rights from identified subsidiaries along with their respective corporate guarantees. Based on internal evaluation and/or legal advice, the Management is confident on the realization of the same.

50. In accordance with the provisions of Schedule II of the Companies Act, 2013, the Company has revised the estimated useful lives of fixed assets with effect from April 01, 2014. Accordingly, the net-book value of the fixed assets as on April 01, 2014, is depreciated on a prospective basis over the remaining useful life, wherever applicable. As a result of such change in the estimated useful lives, the depreciation and amortization expense for the year ended March 31, 2015 has decreased by Rs. 11.62 with a corresponding impact on profit after tax and fixed assets.

Further, as per the notification issued by MCA dated August 29, 2014, the Company has opted to adjust the carrying amount of certain fixed assets amounting to Rs. 2.50 as on April 1, 2014 whose remaining useful life was 'Nil' as on that date, to deficit in the Statement of profit and loss in the financial statements.

51. All amounts less than Rs. 0.01 have been disclosed as Rs. 0.00. Notes to Consolidated financial statements for the year ended March 31, 2015

(All amounts in Rs. Crore except for share data or as otherwise stated)

1. Corporate Information:

IL&FS Engineering and Construction Company Limited ("IECCL" or "the Company") is a public company domiciled in India. The Company along with its subsidiaries (collectively termed as "the Group") and its associate and jointly controlled entities (collectively termed as "the Consolidated entities") is primarily engaged in the business of erection / construction of roads, irrigation projects, buildings, oil & gas infrastructure, railway infrastructure, power plants, power transmission & distribution lines including rural electrification and development of ports. The equity shares of the Company are listed on National Stock Exchange of India Limited ("NSE") and BSE Limited ("BSE").

2. Basis for preparation of Consolidated financial statements:

The consolidated financial statements of the Consolidated entities for the year ended March 31, 2015, have been prepared in accordance with Generally Accepted Accounting Principles in India (Indian GAAP). The Consolidated entities have prepared these financial statements to comply in all material respects with the accounting standards notified under section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules 2014. The consolidated financial statements have been prepared on an accrual basis and under the historical cost convention.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

2.1 Statement of significant accounting policies:

a) Principles of consolidation

The consolidated financial statements of the Consolidated entities have been prepared using uniform accounting policies for like transactions and other events in similar circumstances, except as referred in note 26 below.

Investments in Consolidated entities, except where such investments are acquired with a view to their subsequent disposal in the immediate future, are accounted in accordance with accounting principles as defined under Accounting Standard ('AS') 21 "Consolidated Financial Statements", on a line by line basis, AS 23 "Accounting for Investment in Associates in Consolidated Financial Statements", under Equity method and AS 27 "Financial Reporting of Interests in Joint Ventures", using proportionate consolidation method notified under section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules 2014.

The results of operations of a subsidiary are included in the consolidated financial statements from the date on which the parent subsidiary relationship came into existence.

All material inter-company balances and inter-company transactions and resulting unrealized profits or losses are eliminated in full on consolidation of subsidiaries and proportionately (to the extent it pertains to the Group) on consolidation of joint ventures.

Minorities' interest in net profits/losses of consolidated subsidiaries for the year is identified and adjusted against the income in order to arrive at the net income attributable to the shareholders of the Company. Their share of net assets is identified and presented in the Consolidated Balance Sheet separately. Where accumulated losses attributable to the minorities are in excess of their equity, in the absence of the contractual obligation on the minorities, the same is accounted for by the holding company.

The difference between the cost to the Group of investment in Subsidiaries and Joint Ventures and the proportionate share in the equity of the investee company as at the date of acquisition of stake is recognized in the consolidated financial statements as Goodwill or Capital Reserve, as the case may be. Goodwill arising on consolidation is tested for impairment annually.

The financial statements of the entities used for the purpose of consolidation are drawn up to same reporting date as that of the Company, i.e., year ended March 31, 2015.

The Consolidated Financial Statements for the year ended March 31, 2015 have been prepared on the basis of the financial statements of the following subsidiaries, associate and joint venture entities:

Note I:

During the year, MISA has incorporated a subsidiary. MISA has written-off the investment as the step-down subsidiary is under liquidation as at the balance sheet date. Accordingly, the net assets, revenues and cash flows of Maytas Infra for Construction WLL have not been included in the consolidated financial statements as at and the year ended March 31, 2015.

Note II:

During the previous year, as per the revision in the arrangement, the Company has amicably settled the liability with the other JV partner. Accordingly, the Company's share in net assets, revenues and cash flows in Maytas-SNC (JV) has not been included in the consolidated financial statements as at and the year ended March 31, 2015 and as at and for the 18 months ended March 31, 2014.

Note III:

During the year 2010-11, the Company had invested Rs. 0.10 in equity shares of Hill County Properties Limited (HCPL) constituting 40% of the post issue paid up share capital of HCPL pursuant to the order passed by the Honorable Company Law Board on January 13, 2011 allowing IL&FS Group (consisting of Infrastructure Leasing and Financial Services Limited, IL&FS Financial Services Limited and the Company) to be the new promoters of HCPL. During the previous year, the Company had sold Rs. 0.02 in equity shares (2,250 Equity Shares of Rs. 100 each) of HCPL constituting 9% of the paid up share capital of

HCPL to Infrastructure Leasing and Financial Services Limited. HCPL was under the direct supervision of the Company Law Board (CLB), represented by a nominee director and hence was operating under severe long-term restrictions that significantly impair its ability to transfer funds to the investor. Hence the investment in HCPL was accounted in accordance with Accounting Standard 13 "Accounting for Investments" instead of applying equity method in accounting for investments. During the year, the term of the CLB nominee director has expired and HCPL ceased to operate under severe long-term restrictions. However, such acquisition of shares does not form part of a strategy to acquire and retain long term assets / investments. Hence the investment in HCPL is continued to be accounted in accordance with Accounting Standard 13 "Accounting for Investments".

b) Use of estimates:

The preparation of financial statements in conformity with Indian GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities at the date of the reporting year. The percentage of completion is determined by the proportion that contract costs incurred for work performed up to the balance sheet date bear to the estimated total contract costs. However, profit is not recognized unless there is reasonable progress on the contract. If total cost of a contract, based on technical and other estimates, is estimated to exceed the total contract revenue, the foreseeable loss is provided for. The effect of any adjustment arising from revision to estimates is included in the income statement of the year in which revisions are made. Contract revenue earned in excess of billing has been reflected under "Inventories" and billing in excess of contract revenue has been reflected under "other current liabilities" in the balance sheet. Revenue recognized is net of taxes.

Price escalation and other claims or variations in the contract works are included in contract revenue only when:

- (a) Negotiations have reached to an advanced stage (which is evidenced on receipt of favourable arbitration award, acceptance by customer, etc.) such that it is probable that customer will accept the claim; and
- (b) The amount that is probable will be accepted by the customer and can be measured reliably.

d) Tangible fixed assets and depreciation:

- (i) Fixed assets are stated at cost less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price, freight, duties, taxes and any attributable cost of bringing the asset to its working condition for its intended use. Borrowing costs relating

to acquisition of fixed assets which take substantial period of time to get ready for use are included to the extent they relate to the period till such assets are ready for intended use.

- (ii) Assets retired from active use and held for disposal are stated at their estimated net realizable values or net book values, whichever is lower.
- (iii) Assets acquired under finance lease are depreciated on a straight-line basis over the useful life of the asset or the useful life envisaged in Schedule II to the Companies Act, 2013, whichever is lower.
- (iv) Gains or losses arising from derecognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.
- (v) Depreciation on fixed assets other than those mentioned in S No (vi) below, is provided on straight line method, based on useful life of the assets as estimated by the management which coincides with rates prescribed under Schedule II to the Companies Act, 2013.
- (vi) Depreciation on the following fixed assets, for which rates are not prescribed under Schedule II of the Companies, Act 2013, is provided on a straight-line basis, at rates that are based on useful lives as estimated by the management:

Plant, and machinery -construction equipment	2-4 years

Notes to Consolidated financial statements for the year ended March 31, 2015

- (ix) The net block and depreciation charge respectively of overseas subsidiary is 9.65% of total net block of tangible assets at the Consolidated entities as at March 31, 2015 (March 31, 2014: 13.76%) and 31.99% of the total depreciation expense for the Consolidated entities for the year ended March 31, 2015 (March 31, 2014: 25.29%).

e) Intangible Assets - Software:

Computer software license cost is expensed in the year of purchase as there is no expected future economic benefit, except for enterprise wide/project based software license cost which is amortized over the period of license or six years, whichever is lower.

f) Investments:

Investments that are readily realizable and intended to be held for not more than one year from the date on which such investments are made are classified as current investments. All other investments are classified as long term investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued. If an investment is acquired in exchange for another asset, the acquisition is determined by reference to the fair value of the asset given up or by reference to the fair value of the investment acquired, whichever is more clearly evident.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

g) Inventories:

- (i) Project materials at site are valued at the lower of cost and estimated net realizable value. Cost is determined on a weighted average basis. Net realizable value is the estimated selling price in the ordinary course of business, reduced by the estimated costs of completion and costs to effect the sale.
- (ii) Work-in-progress related to project and construction is valued at cost till such time the outcome of the related project is ascertained reliably and at contractual rates thereafter.
- (iii) Amount due from customers (project work-in-progress) represents contract revenue earned in excess of billing.

h) Retirement and other employee benefits:

- (i) Retirement benefit in the form of provident fund is a defined contribution scheme. The Consolidated entities have no obligation, other than the contribution payable to the provident fund. The Company recognizes

contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

- (ii) Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation on projected unit credit method made at the end of each financial year.

Accumulated Gratuity liability which is expected to be paid on account of retirement within 12 months is treated as Short term employee benefit. Accordingly the Consolidated entities present the liability as current liability. Accumulated Gratuity liability in respect of which the Consolidated entities have no obligation before 12 months is treated as long term employee benefit. Accordingly the Consolidated entities present the liability as non-current liability.

- (iii) Short term compensated absences are provided for based on estimates. Long term compensated absences are provided for based on actuarial valuation on projected unit credit method made at the end of each financial year. The Consolidated entities present the entire leave encashment as current liability in the balance sheet, since the Consolidated entities do not have an unconditional right to defer its settlement for the 12 months after the expiry date.

- (iv) Actuarial gains / losses are immediately taken to Statement profit and loss and are not deferred.

i) Segment reporting

Identification of segments

The Consolidated entities operating businesses are organized and managed separately according to the nature of products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The analysis of geographical segments is based on the areas in which major operating divisions of the Consolidated entities operate.

Unallocated items

Unallocated items include general corporate income and expense items which are not allocated to any business segment.

Segment accounting policies

The Consolidated entities prepare its segment information in conformity with the accounting policies adopted for preparing and presenting the consolidated financial statements.

(All amounts in Rs. Crore except for share data or as otherwise stated)

j) Income taxes:

Tax expense consists of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961. Deferred income tax reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Consolidated entities has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each balance sheet date, the Consolidated entities re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The Consolidated entities writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

k) Foreign currency transactions:

• Initial recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

• Conversion

Foreign currency monetary items are reported using the closing rate. Non – monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction; and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

• Exchange differences

Exchange differences arising on the settlement of monetary items or on reporting such monetary items of the Consolidated entities at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognized as income or as expenses in the year in which they arise.

• Forward exchange contracts not intended for trading or speculation purposes

The premium or discount arising at the inception of forward exchange contracts are amortized as expense or income over the life of the contract. Exchange differences on such contracts are recognised in the statement of profit and loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognised as income or as expense for the year.

• Accounting for derivative instruments

As per the announcement of the Institute of Chartered Accountants of India (ICAI) on accounting for derivative contracts, derivative contracts, other than those covered under AS-11, are marked to market on a transaction basis, and the net loss after considering the offsetting effect on the underlying hedge item is charged to the income statement. Net gains are not accounted on the basis of prudence.

• Translation of non-integral foreign operation

The assets and liabilities of a non-integral foreign operation are translated into the reporting currency at the exchange rate prevailing at the reporting date. The statement of profit and loss is translated at exchange rates prevailing at the dates of transaction or weighted average rates, where such rates approximate the exchange rate at the date of transaction. The exchange differences arising on translation are accumulated in the foreign currency translation reserve. On disposal of a non-integral foreign operation, the accumulated foreign currency translation reserve relating to that foreign operation is recognized in the Statement of profit and loss.

• Translation of integral foreign operation

The financial statements of an integral foreign operation are translated as if the transactions of the foreign operation have been those of the Consolidated entities itself.

l) Leases:

• Where the Consolidated entities are Lessee

Finance leases, which effectively transfer to the Consolidated entities substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the lower of the fair value and present value of the minimum lease payments at the inception of the lease term and disclosed as leased assets. Lease payments are apportioned between the finance charges and reduction of the lease liability based on the implicit rate of return. Finance charges are recognized as finance cost in the statement of profit and loss. Lease management fees, legal charges and other initial direct costs are capitalized.

If there is no reasonable certainty that the Consolidated entities will obtain the ownership by the end of the lease term, capitalized leased assets are depreciated on a straight-line basis over the shorter of the estimated useful life of the asset, the lease term or the useful life envisaged in Schedule II to the Companies Act, 2013.

Leases where the lessor effectively retain substantially all

Notes to Consolidated financial statements for the year ended March 31, 2015

(All amounts in Rs. Crore except for share data or as otherwise stated)

the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the Statement of profit and loss on a straight-line basis over the lease term.

• **Where the Consolidated entities is a Lessor**

Assets under operating leases are included in fixed assets. Lease income is recognised in the Statement of profit and loss on a straight-line basis over the lease term. Costs, including depreciation, are recognised as an expense in the Statement of Profit and Loss. Initial direct costs such as legal costs, brokerage costs, etc. are recognised immediately in the statement of Profit and Loss.

m) Borrowing costs:

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the year they occur.

n) Accounting for Jointly controlled operations:

In respect of joint venture contracts which are executed under work sharing arrangements, the Consolidated entities share of revenues, expenses, assets and liabilities are included in the consolidated financial statements as revenues, expenses, assets and liabilities respectively. In case of certain construction contracts in the irrigation sector, the share of work executed by the Consolidated entities has been determined on the basis of certification by lead partner.

o) Earnings per share:

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting preference dividends and taxes applicable) by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events of bonus issue that have changed the number of outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

p) Impairment:

The Consolidated entities assess at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Consolidated entities estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's

(CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

q) Provisions, contingent liabilities and contingent assets:

A provision is recognised when the Consolidated entities have a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimates. A Contingent Liability is disclosed unless the possibility of an outflow of resources embodying the economic benefits is remote. Contingent assets are neither recognised nor disclosed in consolidated financial statements.

r) Cash and cash equivalents:

Cash and cash equivalents comprise cash at bank and in hand and short term investments with original maturity of three months or less.

s) Employee stock compensation cost:

Measurement and disclosure of the employee share-based payment plans is done in accordance with SEBI (Share Based Employee Benefits) Regulations, 2014 and the Guidance Note on Accounting for Employee Share-based Payments, issued by the ICAI. The Consolidated entities measure compensation cost relating to employee stock options using the intrinsic value method. Compensation expense, if any, is amortized over the vesting period of the option on a straight line basis.

t) Measurement of EBITDA:

As permitted by the Guidance Note on Revised Schedule VI to the Companies Act, 1956, the Consolidated entities have opted to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of statement of profit and loss. The Consolidated entities measures EBITDA on the basis of profit/(loss) from continuing operations. In its measurement, the Consolidated entities does not include depreciation and amortisation expense, finances costs, tax expense and minority interest.

26. Uniform accounting policies:

As per the requirements of AS-21, AS-23 and AS-27, in the preparation of consolidated financial statements, the accounting policies of the Consolidated entities are required to be aligned with those of the Company to the extent practicable. The following accounting policy followed by various Consolidated entities is not aligned with those of the Company:

As per the Consolidated entities accounting policy, revenue from construction contracts is recognised on the percentage of completion method as mentioned in Accounting Standard (AS 7) "Construction Contracts" notified under section 133 of the Companies Act, 2013, read with paragraph 7 of the Companies (Accounts) Rules, 2014. The percentage of completion is determined by the proportion that contract costs incurred for work performed up to the balance sheet date bear to the estimated total contract costs. However, NCC-Maytas (JV) (Singapore Class Township) and Maytas CTR (JV), joint venture entities have determined stage of completion on the basis of "Surveys performed" wherein the Consolidated entities has determined the stage of completion of the project by the proportion that contract costs incurred for work performed upto the balance sheet date bear to the estimated total contract costs. The proportion of the aggregate work-in-progress of the above joint venture entities as compared to the work-in-progress at consolidated financial statement is 1.86% as at March 31, 2015 (1.37% as at March 31, 2014).

The Consolidated entities have estimated the impact of such differential accounting policies on the consolidated results for the year-end financial position of the Consolidated entities as at March 31, 2015 and based on such estimates, has determined that the difference is not material. Management is of the opinion that, such alignment of accounting policies is not practicable and that the cumulative impact of such alignment, if made, would not be significant to the consolidated financial statements.

27. In the previous year, the following entities were consolidated based on unaudited financials, the Company's share of assets, revenues and cash flows of these entities considered in consolidated financials are given below:

(iv) Consequent to announcement by erstwhile chairman of Satyam Computers Services Limited on January 7, 2009, Serious Fraud Investigation Office (SFIO) has initiated investigations on various matters pertaining to the Company which are ongoing. The SFIO has submitted its reports relating to various findings and has issued notices for prosecution for alleged violations against the Company and others. While the Company has not accepted these violations, in order to settle these issues, the Company had filed compounding applications for these alleged violations, which are yet to be concluded.

(v) The Company had received a Show Cause Notice (SCN) on June 19, 2009 from Securities and Exchange Board of India (SEBI) alleging insider trading by the Company in the scrip of Satyam Computer Services Limited in the years 2001-2002 and 2004-2005. After the afore mentioned SCN no further communication was made in this regard until February 2013 when SEBI directed the Company for a personal hearing before whole time member of SEBI. The Company has filed its detailed reply against the SCN in the previous year. During the year, the Company has attended a personal hearing before a whole time member of SEBI and accordingly filed written submissions. The order from SEBI on this matter is awaited.

Subsequently, on July 2, 2012, on the pretext of certain acts/alleged breaches by the Company, the transferee made certain unsubstantiated allegations and nominated an arbitrator, which was refuted by the Company for lack of any disputable ground and no loss on part of transferee for the breaches alleged. High Court of Karnataka appointed arbitrator who has dismissed the proceedings during the year. Further, during the year ended March 31, 2014, the transferee also filed petition under Section 9 of the Arbitration & Conciliation Act, 1996. During the year, these arbitration proceedings have been dismissed. As at March 31, 2015 there are no cases against the Company in respect of this matter.

HJV subcontracted this work to SSJV Projects Private Limited (SSJV) and the work has been executed to the extent of Rs. 262.45 by SSJV. Due to the geographical conditions at site, work could not be done at the rates prescribed in the contract. HJV invoked arbitration clause for delays and extra-ordinary geological occurrence in executing the project. The Client en-cashed bank guarantees for an amount of Rs. 216.40 provided by SSJV and issued winding up notice to the Company as well as other joint venture partners. The Company vide its letter dated July 29, 2013 replied to the said notice stating that the matter is disputed and subjudice and would not be legally tenable. 45. In the earlier years, pursuant to the Debt Restructuring Programme, the Company had settled an irrevocable trust, namely, Maytas Investment Trust (Trust). The objective of the Trust was to dispose certain underlying investments held and settle the liability towards the Pass Through Certificate (PTC), wherein the Company was also a contributory. Hitherto, the Company was also liable for shortfall, if any, in eventual settlement of the PTCs issued by the trust to other contributories. During the previous year, the terms of the PTCs were restructured and as per revised arrangement, the Trust has issued fresh PTCs in lieu of erstwhile PTCs wherein the contributories would

participate in the realization arising out of disposal of underlying investments in specified order and the Company is no longer liable for the shortfall, if any, towards settlement of PTCs held by other contributories. As at March 31, 2015, the Investment of the Company includes Rs. 259.67 (March 31, 2014: Rs. 259.67) contributed towards these PTCs.

The aforesaid Trust portfolio includes an investment wherein the investee company has gas based power plant, which is facing concerns on account of lower supplies/availability of natural gas. However, based on expert advice, evaluation of few alternates including representations/discussions with various government authorities to secure the gas linkage/supplies, the Management is of the view that the concerns in the industry are temporary in nature and will not have any material impact on the carrying value of the underlying investments held by the Trust and consequently on the carrying value of the PTCs held by the Company.

46. Such facilities rank as priority debt and will have priority in repayment over other liabilities of HCPL (except existing secured borrowings from banks). In addition, towards security for the same, the Company has entered into an "Articles of Agreement" with HCPL wherein IL&FS Group has been given an option for adjusting the loans, along with accrued interest, against all the unsold villas and apartments of Hill County Phase I project of HCPL.

47. Consequent to an arbitration award, during the year, the Company has accrued proportionate revenue to the extent of percentage of completion in case of a road project amounting to Rs. 137.54 (including interest of Rs. 36.30). As a result of such change in the estimated useful lives, the depreciation and amortization expense for the year ended March 31, 2015 has decreased by Rs. 11.62 with a corresponding impact on profit after tax and fixed assets.

Further, as per the notification issued by MCA dated August 29, 2014, the Company has opted to adjust the carrying amount of certain fixed assets amounting to Rs. 2.50 as on April 1, 2014 whose remaining useful life was 'Nil' as on that date, to deficit in the Statement of profit and loss in the financial statements.
