MANAGEMENT DISCUSSION AND ANALYSIS

To avoid duplication between the Directors' Report and the Management Discussion and Analysis, we present below a composite summary of performance and functions of the Company.

OVERALL REVIEW

In the Indian market, better macroeconomic conditions, coupled with improved sentiment post the general elections, helped India to be among the better performing emerging market economies. There was a slight increase in the GDP growth, while inflation moderated and the Rupee remained relatively stable during the year.

Consumer spending remained muted and this was reflected in a moderate growth across FMCG categories in the context of tight monetary policy followed by the Reserve Bank of India through most of the financial year, political & policy stability related concerns. Given the backdrop of a market slowdown coupled with a volatile input cost environment and heightened competitive intensity, the operating environment for the year continued to be challenging.

Your Company's performance for the year 2014-15 has to be viewed in the context of aforesaid economic and market environment.

The textiles industry has made a major contribution to the national economy in terms of employment generation and foreign exchange earnings. The sector contributes about 14 per cent to industrial production, 4 per cent to the GDP. Among the core apparel categories, innerwear appears to be a potential growth category across all segments.

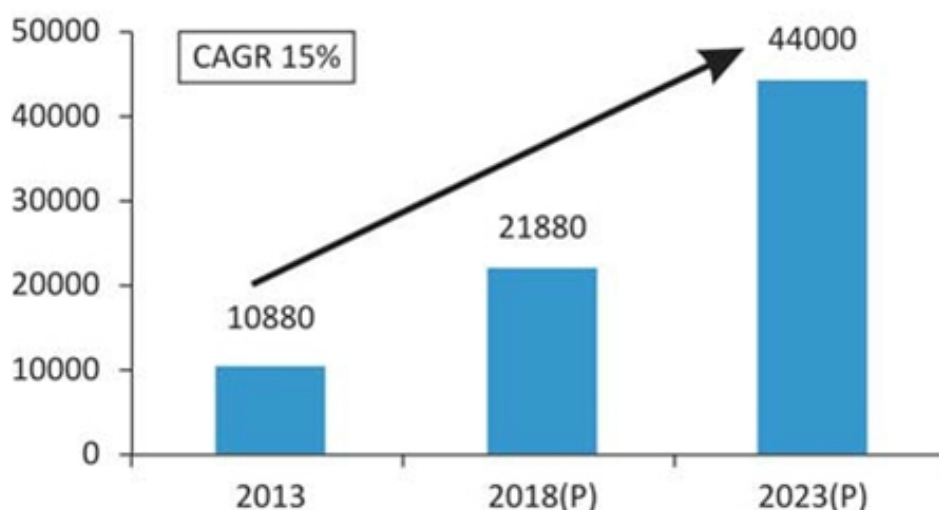

Currently, the Indian innerwear market is worth INR 17,750 crore (2013) and is estimated to grow at 13 percent to reach INR 59,540 crore by 2023.

Since the last few years, Indian brands showcased new designs and styles to woo the new age Indian women. The focus was mainly on the width of the product range. Men's and women's innerwear began to be sold through a variety of retail formats such as Exclusive Brand Outlets (EBO), Large Format Stores (LFS) and departmental stores. LFS, with shop-in-shop concept, have carved a niche by showcasing the entire product range.

Looking ahead, we expect growth in the innerwear market to be driven by broad based consumer trends in the form of rising discretionary spend, growing number of mid-high income house hold and rising urbanization.

Innerwear has graduated from being just a functional category to a category that offers additional fashion quotient. It is shifting from a price sensitive category to a brand sensitive category. The women's innerwear market, which is driven by value added innerwear products, contributes around 60 percent to the total innerwear market. This market is worth INR 10,880 crore, and is growing at a promising CAGR of 15 percent. The growing number of working women and the increased share of western wear in their wardrobe have propelled this growth. Western wear usually encompasses specialized innerwear, which the branded players can provide, for the most part.

OPPORTUNITIES AND THREATS

Opportunities:

For the apparel industry in general and our market in particular:

- More organized retail. Better consumer retail experience
- Increasing fashion consciousness and consumers becoming more aspirational, discerning and brand savvy
- The factors that determine consumption, education, occupation, urbanization, rise in nuclear families moving in a positive direction
- Increasing urban women population and women corporate workforce
- Increasing brand consciousness and spending on kids
- Higher disposable income
- Increasing online retail

Threats:

Many major international apparel brands have commenced operations in India realizing that Indian markets are likely to emerge as one of the largest market in the world in the next few decades.

RISKS AND CONCERNS

The Company has robust risk management procedures to identify and evaluate risks on an ongoing basis. The identified risks are integrated into the business plan and a detailed action plan to mitigate the identified business risk and concerns is put in place.

The key risks and concern identified by the company and its mitigation plans are:

Availability of Labour:

The industry is growing at a fast pace, in a highly labour intensive sector and demand for experienced and trained manpower is outstripping supply. The ability to retain existing talent and attract new talent assumes crucial importance. The Company has created long term plans with the objective of motivating employees to create a sense of “belonging” and a ‘feel good’ environment. The Company has set up robust training centers at various units where newcomers to the labour force receive structured training.

Increase in input and labour costs:

The availability of raw materials at reasonable rates is one of the main concerns of the company. However the company is confident that increases in raw material cost, if and when they occur, can be passed on to consumers because of the strong pricing power of its brands. The company is also aggressively taking steps to monitor and improve productivity, which will mitigate the impact of labour and material cost increases to some extent.

HUMAN RESOURCES

Your Company fully values the Human capital; it deploys and credits its success to them. It has been the consistent endeavor of the Company to create a congenial and challenging working atmosphere wherein every employee can develop his own strength and deliver to his full potential.

The relations with Company’s work force continue to be very cordial and their unstinted co-operation has enabled the unit to achieve continuous growth, both quantitatively and qualitatively. Your Company continued to maintain excellent industrial relations with all its employees and independent job work firms. Adequate safety and welfare measures are in place and your Company will continue to improve the same on ongoing basis.

As of 31st March, 2015, the Company had 1,884 employees on its roll.

FUTURE OUTLOOK

Your Company has achieved a significant growth and has been constantly following emerging market trends and has accordingly from time to time revamped its marketing strategies and product portfolios. The Company is trying to come up with some new products and ranges of inner wears according to changing consumer needs and demand.

During the year, the Company entered into a Brand Sublicensing Agreement with "Global Merchandising" (an Overseas Company of Adidas Group) & acquired license of the its Brand for a period of 1+2 years to manufacture, distribute and sell the products in the Indian market as per terms & conditions stipulated in the Agreement and thereby expand the market operations of the Company by using the brand and developing its reputation. For competitive reasons, much information about this Brand License will be shared forthcoming after Launch in the market. The product category under the License is a Sporty line of Innerwear.

India is expected to perform better, aided by improving macroeconomic fundamentals. While currently inflation is benign, upside pressures on inflation from the vagaries of monsoon or sudden changes in the rupee, could have a significant bearing on inflation.

FMCG markets are expected to grow. While consumer confidence has increased, this has not yet translated into significant improvement in FMCG market conditions. There are a few green shoots in market growths; however, uncertain global economic environment, inflation and competitive intensity continue to pose challenges. Your Company, with its brands, talent and investment in capabilities, is well placed to benefit disproportionately from this opportunity.
