# LETTER TO SHAREHOLDERS

**Ladies and Gentlemen,**

It gives me great pleasure to welcome you all to the 29<sup>th</sup> Annual General Meeting of your Company. Your Company continues to deliver healthy financial and operational performance despite challenging times in Indian power sector. It is my privilege to share some of our achievements with you today.

Your Company crossed significant milestones during fiscal 2015. Your Company became the largest NBFC operating in the country based on networth (all reserves) as on 31.03.2015. As per DPE

Survey, 2015, your Company is 6<sup>th</sup> highest profit making PSU among 290 PSUs. Despite the structural challenges in power sector, your Company, consecutively for the 2<sup>nd</sup> time, achieved all the MoU targets set by Govt. of India, which entitles it to highest MoU Score. Your Company presently crossed ₹ 5 trillion figure in term loan sanctions to Indian power sector reflecting its dominant leadership position in the sector, yet it maintains low level of NPAs. Your Company continues to remain one of the leanest and most agile companies among industry peers, which is reflected in the fact that each employee generates ₹ 13.24 Crore of average profit per year. Govt. of India in July, 2015 disinvested 5% of its holding in your Company through Offer for Sale (OFS) route. The OFS issue saw tremendous success despite volatile market conditions with over subscription upto 2.34 times reflecting investors' confidence in the fundamentals of your Company.

## ***The Economy***

Indian economy has shown signs of recovery in last couple of years with stronger growth, significantly narrowed current account deficit, fiscal deficit moving towards a consolidation path and inflation trending downwards. However, Indian economy is certainly capable of achieving higher growth than the current levels. In order to achieve and sustain such higher economic growth it is imperative that there should be an enabling atmosphere that fosters competition and improves ease of doing business. The challenge, therefore, is to initiate structural reforms for sustainable higher economic growth.

The Government of India has already initiated various structural reforms to improve the ease of doing business. The recent structural reform initiatives include labour reforms, measures to increase FDI into India, 'Make in India', 'Digital India', reforms to promote energy, coal and mining, push for national Goods and Services Tax (GST) and land reforms, some of which are underway.

Govt. of India in its Union Budget in Feb, 2015 emphasized on infrastructure creation as central to its road map for economic growth. The government promised in the budget to boost infrastructure spending by ₹ 70,000 Crore in fiscal 2016. Accordingly, the fiscal 2016 consolidation target has been relaxed to allow for increased infrastructure investment. Further, Govt. announced formation of an investment and infrastructure fund and tax-free bonds for raising funds to facilitate investment in infrastructure. The above clearly underlines Government's commitment to revive the investment cycle to spur economic growth.

## ***Outlook on Power Sector***

The fiscal 2015 was a good year for Indian power sector with (i) highest capacity addition in a single year, of 22,566 MW (ii) power generation growth of 8.4%, the highest in 20 years (iii) power deficit reduced to 3.6%, the lowest ever (iv) highest ever increase in transmission lines to 22,100 ckm (v) highest ever increase in sub-station capacity to 65,554 MVA (vi) highest coal production growth of 8.3% in last 23 years (vii) first time ever exceeded renewable capacity addition targets.

Indian power sector, however, is still grappling with structural challenges like fuel supply issues, weak financial health of State distribution utilities, stressed projects & balance sheets of power developers. Govt. of India has already introduced several reform initiatives and measures to address the issues of power sector, which includes (i) the uncertainty, post cancellation of 204 coal blocks in 2014, was adequately addressed by Govt. through quick reallocation of coal blocks through a transparent e-auction process (ii) to operationalize the stranded gas based power projects, Govt. introduced new gas pooling mechanism whereby Govt. would provide subsidy in fiscal 2016 and fiscal 2017 to kick start the stranded gas projects (iii) Two new schemes aimed at distribution reforms have been formulated, got approved & are being implemented by Govt., namely Integrated Power Development Scheme (IPDS) for Urban areas and Deen Dayal Upadhyay Gram Jyoti Yojana (DDUGJY) for Rural areas. Additionally, Restructured Accelerated Power Development and Reform Programme (R-APDRP) scheme was subsumed into IPDS. (iv) Govt. has finalized a loss reduction trajectory for bringing down national AT&C losses from current level of 25% to 15% by 2020 through various state specific measures best suited to respective states (v) to promote efficiency, competition, renewable energy and to improve quality and reliability of power, Govt. has approved amendments in Electricity Act and introduced the same in parliament. The amendments envisage ensuring grid stability, competition in distribution sector, operationalisation of open access, strengthening regulatory commissions, tariff rationalization etc.

On the renewable energy front, Solar capacity increased by 42% in fiscal 2015. Out of planned 25 solar parks with capacity of 1000 MW, already 17 solar parks in 14 states have been approved. Renewable energy global meet held in Feb, 2015 attracted commitments of 273 GW. Green energy corridors are being rolled out with investment of ₹ 38,000 Crore to ensure power evacuation from renewable energy plants.

On the power transmission front, Govt. approved National Smart Grid Mission to bring efficiency in power supply network and reduce losses & outages. The activities under the same include development of smart grid, micro grids, consumer engagement and training & capacity building. Further, about ₹ 1,00,000 Crore of transmission projects are to be bid out in next one year. To have a comprehensive transmission infrastructure, a 20 year transmission plan has been formulated by CEA (Central Electricity Authority) being considered for implementation.

To achieve sustainable development of power sector, Govt. of India set long term targets of 24x7 power for all by 2019, doubling Coal India's production to 100 Crore tonne by 2020, increase power generation by 50% by 2020, increase renewable capacity by more than 5 times to 175 GW by 2022 and energy saving to increase to 10% of current consumption. Given all the above initiatives and targets, the outlook of power sector going forward looks optimistic.

## MANAGEMENT DISCUSSION & ANALYSIS REPORT

The Management of the Company (PFC) is pleased to present its Report on Industry scenario including Company's performance during the FY 2014-15.

### Industry Structure and Development

Power sector is a critical infrastructure element required for the smooth functioning of the economy. An efficient, resilient and financially healthy power sector is essential for growth and poverty reduction. The availability of reliable, quality and affordable power helps in the rapid agriculture, industrial and overall economic development of a country. Electricity consumption is one of the most important indices that decide the development level of a nation. The per capita electricity consumption which was mere 16.3 kWh in 1947 has increased to 1010 KWh in 2014-15. Power Supply position in the country has also improved during FY 2014-15. The gap between requirement & availability of energy reduced from 4.2% during FY 2013-14 to 3.6% during FY 2014-15. However, gap

between peak demand & supply increased from 4.5% during FY 2013-14 to 4.7% during FY 2014-15.

### Generation

#### Installed Capacity

As on March 31, 2015, India's total installed capacity was 2,67,637 MW. Thermal sources continued to have a dominant share at 71% (1,88,898 MW) followed by Hydro 15% (41,267 MW), renewable 12% (31,692 MW) and nuclear 2% (5,780 MW). The installed capacity stood at 96,963 MW (36%) in state sector, 98,153 MW (37%) in private sector and 72,521 MW (27%) in central sector.

#### Capacity addition

The capacity addition target for the FY 2014-15 was set at 17,830 MW. However exceeding the target, a capacity addition of 22,566 MW has been achieved during the FY 2014-15, the details of which are as follows:

(MW)					
Source	Central	State	Private	Total	Share
Hydro	736	-	-	736	3%
Thermal	2659	4886	13285	20830	92%
Nuclear	1000	-	-	1000	5%
Total	<b>4395</b>	4886	13285	22566	100
Share	<b>19%</b>	22%	59%	100%	

For the 12<sup>th</sup> Plan period (2012-17), the capacity addition has been estimated at 88,537 MW comprising 26,182 MW in the central sector, 15,530 MW in the state sector, and 46,825 MW in the private sector respectively.

Generation capacity of 61,014 MW has been added upto March 31, 2015 comprising 12,367 MW in the central sector, 12,221 MW in the state sector, and 36,426 MW in the private sector respectively. This is 69% of the target.

### Transmission

Transmission forms an indispensable link in the power sector value chain. The large expansion in production and consumption of electricity has to be supported by a significant expansion and strengthening of the transmission network.

Nationwide synchronous power grid, interconnecting all the five regional grids, has been established in the country with which both the scale and the scope of transmission-related activities have increased manifold.

Against a target of adding 20,882 Ckms of transmission lines for FY 2014-15, 22,101 Ckms have been commissioned/ready for commissioning which is 105.84% of the target. Also, 55,956 Ckms of transmission lines have been added upto March 31, 2015 against the target of 1,07,440 Ckms for the 12<sup>th</sup> Five year Plan which is 52% of the target. Further, 65,554 MVAs of transformation capacity has been added during FY 2014-15, against the target of 47,871 MVA, which is 136.94% of the target. Against a target of 2,82,750 MVA for addition of transformation capacity under the 12<sup>th</sup> Five year Plan, 1,86,549 MVAs have been added upto March 31, 2015 which is 65.98% of the target.

### Distribution

In the overall functioning of the power sector, Distribution segment plays a crucial role since it is the part of the system which generates the revenues needed to pay generation and transmission utilities.

Therefore, the viability of power sector depends upon the distribution sector.

To reduce aggregate technical and commercial (AT&C) losses, establish IT-enabled energy accounting/auditing, and improve collective efficiency, a new scheme, the 'Integrated Power Development Scheme (IPDS)' which subsumes the Restructured Accelerated Power Development and Reforms Programme (R-APDRP), has been launched. The outlay for the IPDS is ₹32,612 crore. Its key features are strengthening of the sub transmission and distribution network in urban areas, metering of distribution/ feeders/ transformers /consumers in urban areas and roof top solar panels.

A new scheme, the 'Deendayal Upadhyaya Gram Jyoti Yojana' (DDUGJY), has also been launched with the objectives of: (a) separating agriculture and non-agriculture feeders to facilitate distribution companies (discoms) in the judicious rostering of supply to agricultural and non-agricultural consumers; (b) strengthening and augmentation of sub-transmission and distribution infrastructure in rural areas; and (c) metering in rural areas. The existing 'Rajiv Gandhi Grameen Vidyutikaran Yojana (RGGVY)' is subsumed under the DDUGJY. Under the new scheme all discoms including private sector discoms are eligible for availing of financial support.

### Opportunities/Threats/Risks/Concerns

Over the past 60 years or so, India has taken rapid strides in the development of the power sector both in terms of enhancing power generation as well as in making power available to widely distributed geographical boundaries. In order to meet the increasing demand for electricity, to fuel the economic growth of the country, large additions to the installed generating capacity and development of associated transmission and distribution network are required. However this developmental process has to be within the realms of sustainable development and environmental concerns.

On the basis of envisaged capacity mix, proposed capacity addition schedule and associated project cost, the total funds required during 12<sup>th</sup> Plan have been estimated at ₹13,72,580 crore with a debt requirement of ₹10,18,730 crore and equity requirement of ₹3,53,850 crore.

PFC is dedicated to Power Sector financing and committed to the integrated development of the power and associated sectors. PFC's product portfolio comprise of Financial Products and Services like Project Term Loan, Equipment Lease Financing, Discounting of Bills, Short Term Loan, and Consultancy Services etc. for various Power projects in Generation, Transmission, and Distribution sector as well as for Renovation & Modernization of existing power projects.

PFC's priorities include not only accelerating the pace of existing business of funding generation, transmission and distribution projects but also to exploit the new opportunities available in the area of consortium lending, lending to capital equipment manufacturers and fuel supply projects and related infrastructure development projects, renewable energy and equity funding. In order to align the lending policies/guidelines with market necessities as well as its corporate objectives, PFC reviews and revises the same on continuous basis. In spite of growing competition in the market as well as concerns on interest rates on account of factors like movement in RBI key policy rates, inflation prevailing in the financial year, etc., your company could balance its objectives of business growth and profitability.

During the past, the power sector was perceived to be riddled with some fundamental weaknesses. Being the fourth largest consumer of energy in the world after USA, China and Russia, India is not endowed with abundant energy resources. Further, the exponentially growing population of our country is creating more pressures on the power sector. We are urbanizing rapidly and in order to effectuate the increasing needs of power, fuel emerges as the most significant constraint, which project developers have to grapple with and the lenders are hesitant to take the risk. India has adopted a blend of commercial sources like coal, lignite, natural gas, oil, hydro and nuclear power to other viable non-conventional sources like wind, solar and agriculture and domestic waste. Poor financial condition of State utilities due to high AT&C losses and inadequate tariff also are major constraints in the sector. Other major constraints being faced by the power sector pertain to delays in environment clearances and other key inputs such as land and water. Shortage of talent and trained manpower in the construction sector is a long term problem and is likely to continue to push up project costs and risks. Power Industry being capital intensive, requires huge investment. Optimal use of installed capacity for the country as a whole is the key to economics of the power sector.

## **Outlook**

Power Sector in India has grown significantly since independence both in the installed electricity generating capacity and transmission & distribution (T&D) system. The total power generating capacity of (utilities & non utilities) has increased from meagre 1362 MW in 1947 to 267 GW at the end of March, 2015.

Despite this, the growth of electricity demand has surpassed the power supply and our country has been facing power shortages during peak electricity demand.

Government of India lays special emphasis on reduction of T&D losses and demand side management to optimally utilize the limited resources. Concerted efforts are going on to bridge the gap of demand and supply through policy initiatives, such as Development of Power Projects on Tariff based bidding, New Hydro Policy, Private Sector Participation in Transmission sector, National Mission on Enhanced Energy Efficiency, Focus on development of Renewable Energy Sources (RES) and development of the Ultra Mega Power Projects (UMPP).

The performance of the power sector shows many positive features, especially relating to the pace of addition to power generation but there are numerous problems relating to fuel supply which need to be resolved as also problems relating to the financial viability of the operation of the distribution companies.

## **Corporate Social Responsibility and Sustainable Development (CSR&SD)**

CSR is a cornerstone of PFC's operations and it discharges its social responsibility obligations as a part of its growth philosophy. It has been your Company's endeavor to act as a responsible Corporate citizen committed to improving the quality of life of the society at large.
