The accounting policies have been consistently applied by the Company are consistent with those used in previous year.

2. Use of Estimate

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities on the date of the financial statements and the reported amounts of revenues and expenses during the period reported. Actual results could differ from those estimates. Any revision to accounting estimates is recognised in accordance with the requirements of the respective accounting standard.

3. Fixed Assets

Fixed assets are stated at cost (or re-valued amounts, as the case may be), less accumulated depreciation and impairment losses. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Financing costs relating to construction of fixed assets are also included to the extent they relate to the period till such assets are ready to be put to use. Financing costs not relating to construction of fixed assets are charged to the income statement.

Depreciation

Depreciation on the fixed assets has been provided for on written down value method at the rates prescribed and in the manner specified in Schedule II to the Companies Act, 2013.

Impairment

- i. The carrying amounts of assets are reviewed at each balance sheet date if there are impairment indicators. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the WACC.
- ii. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.
- iii. A previously recognised impairment loss is increased or decreased based on reassessment of recoverable amount, which is carried out if the change is significant. However the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

4. Intangible Assets

Intangible assets include miscellaneous expenditures that are capitalized if specific criteria are met and are amortised over their useful life, generally not exceeding 5 years. The recoverable amount of an intangible asset that is not available for use or is being amortized over a period exceeding 5 years should be reviewed at least at each financial year end even if there is no indication that the asset is impaired.

5. Leases

Where the Company is the lessee

Finance leases, where substantially all the risks and benefits incidental to ownership of the leased item, are transferred to the company, are capitalized at the lower of the fair value and present value of the minimum lease payments at the inception of the lease term and disclosed as leased assets. Lease payments are apportioned between finance charges and reduction of the lease liability based on the implicit rate of return. Finance charges are charged to income. Lease management fees, legal charges and other initial direct costs are capitalised.

If there is no reasonable certainty that the Company will obtain the ownership by the end of the lease item, capitalized leased assets are depreciated over the shorter of the estimated useful life of the asset or the lease term.

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased term, are classified as operating leases. Operating lease payments are recognized as an expense in the Profit and Loss account on a straight-line basis over the lease term.

Where the Company is the lessor

Assets subject to operating leases are included in fixed assets. Lease income is recognised in the Profit and Loss Account on a straight-line basis over the lease term. Costs, including depreciation are recognised as an expense in the Profit and Loss Account. Initial direct costs such as legal costs, brokerage costs, etc. are recognised immediately in the P&L Account.

6. Inventories

Inventories are valued at lower of cost or net realisable value. Raw material and manufactured finished goods are valued at cost. Cost is determined on using average cost method.

7. Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured.

- (i) Sale of goods
Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer.
- (ii) Interest
Revenue is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.
- (iii) Dividends

- i Retirement benefits in the form of Provident Fund is a defined contribution scheme and the contributions are charged to the Profit and Loss Account of the year when the contributions to the statutory authority are due.
- ii. Gratuity liability are defined benefit obligations and are provided for on the basis of an actuarial valuation on projected unit credit method made at the end of each financial year.

- (i) Provision for current tax is made after taking into consideration benefits admissible under the provision of the Income Tax Act, 1961.
- (ii) Deferred tax resulting from timing difference between the book and taxable profit is accounted for using the tax rates and laws that have been enacted or substantively enacted as on the balance sheet date.
