MANAGEMENT DISCUSSION AND ANALYSIS

The year 2014-15 is one of a watershed year for Sujana Towers Limited due to many organizational restructuring programs that are in pipeline for a better future of the Company; The Management has aimed to make the Company debt free and start on a fresh note in the sunrise sectors like Specialty Structural Steel Manufactures.

The business environment of your company during the year saw lot of ups and downs with challenging and heavy competition from small players and new entities per-se, illiquidity & volatility in currency and in commodity prices, predatory pricing by the new players from other industry segments to gain a toe hold in the T&D sector, inordinate delays in power capacity additions and power density improvement projects have proven to major constraints for growth.

INDUSTRY STRUCTURE AND DEVELOPMENTS

For global economy, year 2014 proved to be another disappointing year notwithstanding a Dynamic and forward thinking Government in place. Despite sharp decline in crude & commodity prices, this year barely managed to match growth rate achieved in 2013. IMF estimated global economic growth of -3.3%, i.e., the same as in 2013. OECD estimated the growth of G-20 economies, which constitute 90% of global GDP, at -3.4% against -3.2% achieved during 2013. Probable reasons for this negative growth estimates include but not limited to slowdown in growth in China and Japan, which nullified the positive impact of better growth in India, UK, USA and Eurozone.

While growth of Chinese economy is expected to slip further to below 7%, Russian economy is expected to shrink due to sharp decline in crude prices. However, India, ASEAN, South America, South Africa, and rest of the economies expected to do better, aided by lower crude prices. This, we consider as a good augury for "Make In India – Made By India" in the times to come.

Indian economy has registered a growth in GDP of 7.3 % in spite of the Global slowdown. The same trend has been followed in the industry also. Accordingly there has been growth in the performance of the Company. With the initiatives of the new Government in India there is a further wave of positive sentiment in the country. Your Company has achieved robust growth in all its business i.e. the Power Transmission & Distribution (T&D) business and the TSF Products business; however due to the admittance of the company for its debt restructuring scheme, company was finding it increasingly difficult to procure the orders from PSUs. This has lead to a very piquant situation and at the same time, the realisation from these debtors was getting stagnated due to the delays in executing the orders at various levels.

Keeping in view of many external and internal factors and in view of the long term prospects and growth possibilities, your Company has decided to exit the Telecom and Transmission business along with EPC business and concentrate and distinctly focus efforts and resources on the Specialty Structural Steel Manufactures business, which is one of the expected sector to grow rapidly due to the many reforms and FDI norms that are proposed by the Indian Government.

OPPORTUNITIES AND THREATS

A developing country such as India needs to invest heavily on key sectors such as Power and Transportation. The new Government has not just maintained investments into these sectors but has increased manifold, the short, medium and long term investments for these sectors. The company is clearly aligned with these parameters and is in process to sustain the volatility of these prices and demands. Not just domestically but also globally the developing economies have increased their investments substantially on their Power and infrastructures development.

Although Indian economy has registered growth, overall global scenario is still in slow down or at the best in consolidation phase. Continuous slowdown of global economy is likely to put a threat to the Indian Economy also the resultant impact of which will be on the Industry as well as on the Company. The Company is

SUJANA TOWERS LIMITED

operating in a very cautious manner so as to be prepared to face the challenges that may come up in future by conserving its resources and to reduce the debt burden on it.

Even though the T&D Industry is expected to grow at a very rapid pace in India, in the backdrop of the crying need to improve the archaic transmission network across the length and breadth of the Country and to bring the Southern India into the national grid. Your company also notes that the government of India is laying emphasis on increasing the national transmission backbone's capacity upto 1200 kVA and 765 kVA from the present level of 400 kVA max, your Company feels that it has to divest from this lucrative segment in view of the cash flow constraints in so far as the manufacturing of the Transmission & Telecom Towers is concerned. EPC business calls for an iron grip on the entire supply chain in order to not only ensure that the timely supply of the component materials are made but also to ensure that the suppliers do supply on the prices agreed at the time of tendering. Due to the slippages, your company had to endure on account of the failure of these intermediary suppliers, your company had to face the music many a times. Keeping these in view, your Company feels that it would be better to divest its state of the art facilities to manufacture Transmission Towers, Telecom Towers and Sub Station structures to some other company who can exclusively tackle the irritants in this otherwise growing sector.

Needless to mention, the concern arising out of watching the reluctance of the customers' to place further orders on account of the reference of your Company to the CDR Mechanism, has played a decisive role in arriving at this decision.

RISK AND CONCERNS

Your Company is having a risk management policy for identification and assessment of risks which is monitored by the risk management committee of the Company. The Committee closely monitors the process and suggests suitable measures to mitigate the risks. These risks may be caused due to an internal factor which may be tackled by the prompt action from the management. However risks imposed by the external factors are not in the control of the Company and the same are identified as per the directive given by risk management policy of the Company. Necessary precautionary measures are taken by the Company to negate the impact of probable risk.

BUSINESS RISK

The business risk is in general the risk imposed by the competition from the competitors. The Company has achieved such a milestone that the risk of competition is very rare. However the Company does not ignore the possibility of competition from other players. The company operates in a very dynamic state and all decisions by the management are taken considering all these possibilities.

INTEREST RATE RISK

The Company is financed by various bankers and it is required to pay interest on various credit facilities used by it. The Change in rate of interest may be both favourable as well as unfavourable to the Company. The Company has availed credit facilities from various bankers and as a result the Company is in a better position to make negotiation with the bankers and take the benefit of competitive rate of interest.

MARKET RISK

The Company is supplier in both domestic and international market. The market risk may originate either way be it global impact or government policy or due to competition by way of predatory pricing from other players, especially the new entrants into the market. Due to the backward integration the Company is in a position to provide the products of better quality at competitive prices, which to a great extent minimizes the market risk due to Competition.

Prices of major inputs such as Steel, Zinc and Aluminum are highly volatile and are in sync with the global markets. This volatility in the prices could impact the profitability of the Company. While there is no formal 'futures' mechanism to enable hedging against Steel price volatility at the moment, your Company is

insulating itself from these adverse price movements by resorting to acceptance of the orders on “Variable” basis, which means the increase /decrease in the prices of the key raw materials are passed on to the customer.

LIQUIDITY RISK

The liquidity risk may come in the way of smooth operation of the company due to one or the other reasons. Whenever there is blockage of funds in the hands of customers, the liquidity crunch is likely to happen. Although wholehearted support from the bankers strengthen the hands of the Company to face the liquidity risk, the company leaves no stone unturned to avoid the possibility of liquidity risk. Although management expects this kind of co-operation from the bankers, but things may go otherwise too.

FINANCIAL RISK

Increase in operation cost as well as raw material cost poses financial risk to the Company. The impact of this risk is to some extent minimized with the escalation clause in majority of domestic orders. However the Company applies various strategies like purchase in bulk as well as import of raw materials etc. to minimize the impact of financial risk.

GROWTH PLANS

Looking at the current market trends prevailing your Company is drafting aggressive plans to focus and develop itself as one of the key players in Specialty Structural Steel Manufacturing business with establishment of speciality steel structural manufacturing facilities and increase the volumes of its services.

The Company is continuously focusing on fast and quality execution, cost reduction, obtaining of financial support from banks with competitive interest rates; order book building is being achieved by retaining the existing customers as well by exploring new customers to retain the upward trend in the performance of your Company.

OUTLOOK AND OPPORTUNITIES

It is estimated that this demand would continue unabated for a decade. This affords a very exciting opportunity to your company to enter into this segment with its proven manufacturing facilities. This would also afford a lucrative opportunity to piggy back on the tremendous brand recall and value, the brand “Sujana” commands in the steel market.

Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated financial statements in terms of the requirements of the Companies Act, 2013, (the Act) that give a true and fair view of the consolidated financial position, financial performance and cash flows of the Group in accordance with the accounting principles generally accepted in India, including Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.. This responsibility includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting other irregularities; the selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and the design, implementation and maintenance of internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Holding Company has an adequate internal financial controls system over financial reporting in place and operating effectiveness of such controls.
