Chairman & Managing Director

Dear Shareholders,

It is an honour and privilege to present before you the 11th Annual Report of Bright Solar. This is an exciting year for Bright Solar as it marks our 11th Anniversary. It has been a wonderful journey so far as we continue to expand our services each year, and share in the continued success of our associates. During the course of last year and continuing, we have survived a tough time. It has come as a reality check for the whole solar industry that is trying to re-invent its own culture.

Surviving this time conveys our potential to lead the way for the bright future. Since getting listed on NSE, in 2018, we have been extending our knowledge and capabilities for venturing into new and unknown terrains to set up new benchmarks in the industry. As India have moved to 3rd largest solar market in the world. The installed capacity reached 35.12 GW as of 30 June 2020. India has the lowest capital cost per MW globally of installing solar power plants today. With The Focus of Modi Government on Atma nirbhar Bharat Mission, one of the Key area is Solar PV Manufacturing, Increasing end to end Power Availability as per requirement and Cheap Power Supply to all. The Future looks promising and bright.

We, at Bright Solar, are committed to fulfilling Government's vision and with the leadership of International Solar Alliance, propel India's growth story in the field of solar energy generation. The Government of Gujarat Launched last year Solar Rooftops Scheme that will boost its acceptance across the state. Bright Solar participated in the scheme as a valued partner in nation building and I am happy to announce that we got orders to the extent of 3.01 Mega Watt in the First Year Itself.

We are committed to provide the maximum contribution for scaling the rooftop scheme benefits to the retail users. The Total revenue from operation is Rs 2346.95 lacs compared to the Previous year was ₹ 5741.45 lacs. Which is 144.63% declined compared on Y-o-Y. The company has been awarded projects in FY 2019-20 which are ongoing and will be completed in FY 2020-21. After January 2020 there were problems in supply chain which resultant in shortage of goods which resulted into delayed invoicing around Rs 6 crore and will reflect in FY 2020-21.

Moreover, the Profit after tax (PAT) in current year is Rs 51.58 lacs compared to the Previous year was Rs 234.11. which is 353.88% declined Y-o-Y. Reason for declined in PAT mainly because of decrease in sales of the company and higher cost of goods, increased marketing activities and hired additional employees overhead expenses for the Gujarat solar Rooftop project.

Solar power is one of the most efficient yet clean sources of energy we have access to. There are no increased fuel costs or dependencies, no ties to pollutants, and it's both reliable and affordable. Of course, in order to harness solar power you need access to specific technology. We feel proud and blessed for being awarded multiple projects and are fully committed to diligently work to give the best performance across all the domains. We proactively and passionately endeavour to expand in scope and scale across all over the globe. None of these was, is or will be possible without your trustworthy, understanding and overwhelming support.

From the deepest reservoirs of my heart, I, on behalf of the company extend my gratitude and promise you that we will never let you down. Let's join hands to walk through an amazing financial year of 2021-22.

About Us

Bright Solar Limited is a solar technology company with specialized expertise in solar water pumping systems. Since its incorporation in 2010, the company has been a pioneer in developing, assembling, and selling high-quality products that run on clean and cost-friendly solar energy. Overall, Bright solar has been involved in project works pertaining to the areas of

- 💡 **SOLAR PUMPS AND PUMPING SYSTEMS ASSEMBLING**
- 💡 **CONSULTING OF PROJECTS AND TENDERS**
- 💡 **EPC CONTRACTS OF SOLAR WATER PUMPING SYSTEMS**
- 💡 **RURAL WATER SUPPLY & SEWERAGE PROJECTS**

And now, we have been approved as an Empaneled Vendor by Paschim Gujarat Vij Company Ltd (PGVCL) for the design, supply, installation, commissioning, and maintenance of Rooftop Photovoltaic systems. We are now certified by the Gujarat State Government and Government of India's Ministry of New and Renewable Energy (MNRE) and will be able to make your home solar powered!

Our Vision

All Our efforts, innovations, technology and R&D are focused to provide our customers optimum satisfaction out our products. We are fully committed to deliver on time and extend effective service to the customers besides maintaining the quality levels.

ABOUT COMPANY

COMPANY BACKGROUND

The Company was originally incorporated as “Bright Solar Private Limited” a Private Limited company under the provisions of the Companies Act, 1956 vide certificate of incorporation dated April 24, 2010, bearing Corporate Identification Number U51109GJ2010PTC060377, issued by Registrar of Companies, Gujarat, Dadra and Nagar Haveli.

Further, the Corporate Identification Number after conversion of the company from “Private” to “Public” was U51109GJ2010PLC060377. Further, the Company came up with the Initial Public Offer and got listed on National Stock Exchange of India Limited, SME Platform on July 09, 2018. The existing Corporate Identification Number is L51109GJ2010PLC060377.

BUSINESS DESCRIPTION

The Company is mainly engaged in the business of manufacturing of solar pump and pumping system & other solar products and Infrastructure projects which includes Rural water supply projects & EPC projects of Water treatment & Sewerage treatment plant unit.

The Company is operating in three different segments i.e.

- 1) Solar Water Pumping & Other System Sales
- 2) Infrastructure Projects
- 3) Sale of Services – Installation of Systems and Consulting of Project Tendering

COMPANY’S PRODUCT & WORK DESCRIPTION

Sr.no	Product Name	Product Description	USP of Product
1.	Solar Water Pumping System	Our Solar Water Pumping System Consists of an inverter, a pump, and a PW array. The system is designed on a premise that storing water is easier than storing electricity. The solar panels generate DC electricity, which is converted to AC by the inverter. The AC current thus generated can be used to run a 3-phase induction motor. The pump is water-submersible and can be used to draw water out of a river or lake. It can be directly connected to the irrigation system.	Our Solar Water pumping systems are easy to install. The parts used are of good quality and have a long life. The system is maintained by dedicated service engineers.
2.	DC Solar Pumps	These pumps are our flagship products and they are in high demand. DC pumps are made with feasible and high-grade non-corrosive material. They are designed for heavy duty work and can give an average of 110 cumt/hr.	The high efficiency of these pumps makes them extremely feasible. These pumps are easy to install and easy to use. The pumps are available in various sizes and can be fitted on any duty point.

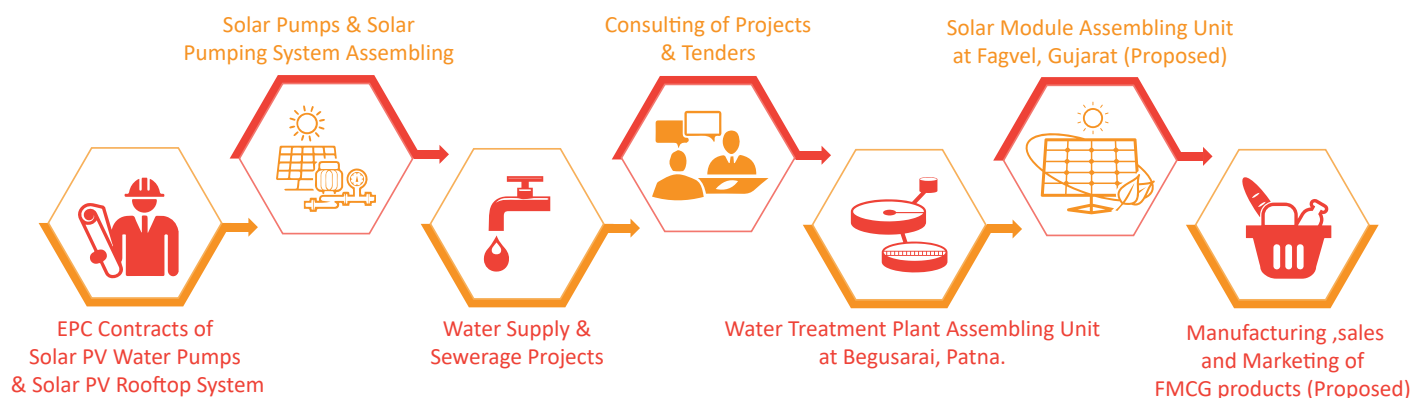

3.	AC Solar Pumps	Made with durable material for heavy duty pumping, our AC solar pumps are perfect for when large volumes of water have to be pumped out very fast. These pumps are made for irrigation work but can fit any duty point.	Easy to install and easy to use, AC Solar Pumps can pump up to 280-meter cubes per hour. This efficient pump is available in various sizes and can be fit at any duty point.
4.	Solar Pumping Controller	The entire system of pumping can be controlled through the inverter. The inverter acts as both the powerhouse and the brain of the system. The DC current generated by the solar panels is converted to AC current.	The Solar Pumping Controller can adjust the output frequency to match the solar irradiation to implement maximum power point tracking in real time. It is compatible with 3-phase induction motor. It is highly reliable, with 98% conversion efficiency. The controller is fully automatic and has a dynamic power point tracking algorithm with advanced SPWM control. The controller can store up to 8 years of operations data.
5.	Solar PV Rooftop System	A well-planned rooftop system can efficiently supply power without using grid supply. In urban and rural India, millions of homes and commercial buildings have rooftops that receive ample sunlight during the day. These are ideal for harnessing the sun's energy by converting it into electric power.	Bright Solar Limited is offering its new product which is Solar PV Rooftop System (Grid Connected) for home use. During the year 2019-20 the company has first time done work of 3.06 MW solar Rooftop system for Household and 38 KW commercial system successfully in the various cities of Gujarat state.
6.	Rural Water Supply Schemes	The Scheme is mainly for providing quality drinking water to the households in rural area. The households get water through piping system. In the scheme basically includes Solar Pump, iron or arsenic removal plant etc. are provided.	Bright Solar Limited is doing works of rural water supply in the state of Bihar and Assam. The Company is providing drinking water in rural area.

CHANGES IN NATURE OF BUSINESS DURING THE F.Y 2020-21

There was no change in nature of business during the FY 2020-21. Your Company has closed Solar pump assembling unit situated in Kathwada, Ahmedabad and opened new warehouse in Fagvel village, Dist. Kheda, Gujarat.

We are in the same line of business. But in the F.Y 2020-21 the company has received turnover from Infrastructure project is 51.58% whereas turnover from solar Projects is 48.42%. At Bright Solar, we are committed to creating a brighter future for everyone by making technology that works on clean energy sources and provides clean water for drinking and irrigation. We want to promote energy and water self-sufficiency in rural India. We also provide sanitation technology to India's villages.

OUR BUSINESS VERTICAL

➤ **Manufacturing of Solar Pump & Solar Pumping System**

As mentioned, before we are experts at manufacturing of Solar Water Pumping Systems. It is a way to fulfil our mission to take technology to rural India. This technology helps to fight the ongoing water crisis in India. It provides farmers with essential irrigation water and increases farmer's income.

➤ **Water Supply, Sewerage, and Infra Projects**

Solar pumps and their energy efficiency have universal appeal. We have also assembled pumping systems for infra projects across the country. Our pumping systems can be applied for water supply & sewage control. This service is instrumental in bringing clean drinking water & provide sewage drainage to rural India. The feasibility and quality of our pumps ensure that our systems are installed whenever a fixed supply of water is needed.

During F.Y 2020-21, your company has received work orders from the Office of the Chief Engineer (PHE) Water, Assam for the work of Implementation of different pipe water supply schemes under Tinsukia & Dibrugarh division amounting of Rs. 6.87 Cr. & Rs. 12.38 Cr. Your company has also opened Branch office in the state of Assam for the above specific projects.

➤ **EPC Contracts of Solar PV Water Pumps**

Under Engineering Procurement and Construction Contracts, we have associated with major industrial projects across the verticals. These projects give major industrial centres access to solar energy and clean water. Our expertise in solar technology has been appreciated by the biggest of corporations. Our prompt after-sales service and assembly management has positioned us a premier brand of solar pumps and modules.

➤ **Consulting of Projects and Tenders**

Bright Solar is also a key consultant to many government services that work in rural India. We often apply for government tenders to increase competitiveness and quality of service available in India. In Previous F.Y 2019-20, the company has started bidding tenders in its own name instead of doing consultancy. Hence, revenue from this segment is also ZERO during F.Y 2020-21.

➤ **Solar Module Manufacturing (Proposed)**

Due to COVID-19, Market is getting worse year by year. We are not able to procure machineries and require infrastructures at reasonable cost. Hence, we have currently postponed the plan for set up manufacturing unit of Solar Modules.

➤ **Water Treatment Plant Assembling Unit**

In May 2020, your company has started Water treatment plant assembling unit at Begusarai, Bihar. Currently, most regions in India do not have access to water treatment facilities. As a result, most of the unclean water either pollute the rivers or collects alongside the groundwater. To make this essential technology available to needed people, Bright Solar has taken an initiative towards making water treatment that works on solar energy.

➤ **Solar Photovoltaic Rooftop System (Grid Connected)**

Your company has received huge response of people for installation of Solar PV Rooftop system for residence during the year 2019-20. First time, your company has served 882 nos. household with total 3066 KW (3.06 MW) and 38 KW commercial work done during F.Y 2019-20 in the various cities of Gujarat state such as Ahmedabad, Vadodara, Surat, Rajkot, Junagadh & Amreli and other areas. In F.Y 2020-21, due to some unavoidable circumstances, your company was not able to submit its bid for the tender of installation of Solar Rooftop system in Gujarat state. However, your company has received a work order from “Office of Chief Engineer (Project-I), South Bihar Power Distribution Co. Ltd., Patna” for the work of Design, supply, installation, testing a& Commissioning of grid connected Solar PV Rooftop system for residential area in various locations of Bihar.

➤ **Manufacturing, Sales & Marketing of FMCG products**

Your Company is planning to start manufacturing or sales and marketing of FMCG products. This is will be a new business segment in which your company may be enter in the nearest future. This new vision may take time in actual execution.

During the year under review there were no incidences of sexual harassment reported.

29) ENERGY CONSERVATION TECHNOLOGY ABSORPTION AND FOREIGN EXCHANGE EARNINGS AND OUTGO

The information on conservation of energy technology absorption and foreign exchange earnings and outgo stipulated under Section 134(3)(m) of the Act read with Rule 8 of the Companies (Accounts) Rules 2014 as amended from time to time is annexed to this Report as **Annexure –III**.

30) REPORTING OF FRAUD

The Auditors of the Company have not reported any fraud as specified under Section 143(12) of the Companies Act, 2013.

31) MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Management's Discussion and Analysis Report for the year under review, is presented in a separate section forming part of the Annual Report and is annexed herewith as **"Annexure -IV**.

32) CORPORATE GOVERNANCE

Integrity and transparency are key factors to our corporate governance practices to ensure that we achieve and will retain the trust of our stakeholders at all times. Corporate governance is about maximizing shareholder value legally, ethically and sustainably. Our Board exercises its fiduciary responsibilities in the widest sense of the term. Our disclosures seek to attain the best practices in international corporate governance. We also endeavour to enhance long-term shareholder value and respect minority rights in all our business decisions.

As our company has been listed on Emerge Platform of National Stock Exchange Limited (NSE), by virtue of Regulation 15 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015 the compliance with the corporate Governance provisions as in regulation 17 to 27 and Clause (b) to (i) of sub regulation (2) of Regulation 46 and Para C D and E of Schedule V are not applicable to the company. Hence Corporate Governance Report does not form a part of this Board Report, though we are committed for the best corporate governance practices.

The Board has framed Code of Conduct for all Board members and Senior Management of the Company and they have affirmed the compliance during the year under review.

The Board has also re-framed Code of Practices and Procedures for Fair Disclosure of Unpublished Price Sensitive Information". The Code casts obligations upon the Directors and officers of the Company to prevent/ preserve Price Sensitive information, which may likely to have a bearing on the share price of the Company. Those who are in the knowledge of any such information are prohibited to use such information for any personal purpose. Similarly, the Code also prescribes how such information needs to be handled, disclosed or made available to the Public through Stock Exchanges, Company's website, Press, Media, etc. The Company Secretary & Compliance Officer has been entrusted with the duties to ensure compliance.

33) AUDITORS

A) Statutory Auditor

M/s. Chirag Shah & Co., Chartered Accountant Firm (Firm Reg. No. 118791W) was appointed as Statutory Auditor of the company to hold office from the conclusion of the 6th Annual General Meeting till conclusion of the 11th Annual General Meeting to be in the calendar year 2021. M/s. Chirag Shah & Co., is Peer Reviewed by the ICAI having certificate no. 010223 allotted on 11th Aug, 2017 have confirmed their eligibility and qualification required under Sections 139, 141 and other applicable provisions of the Companies Act, 2013 and Rules issued there under (including any statutory modification(s) or re-enactment(s) thereof for the time being in force)

The Auditors' Report for the financial year ended March 31, 2021 on the financial statements of the Company is a part of this Annual Report. The Auditor's Report for the financial year ended March 31, 2021 does not contain any qualification, reservation or adverse remark.

B) Internal Auditor

M/s VCAN & Co., Chartered Accountants has conducted internal audit of the Company for FY 2020-21. Report of Internal Auditor was reviewed by the Audit Committee and Board of Directors in their meeting held on June 17, 2021. During the year, the company continued to implement his suggestions and recommendations to improve the control environment, their scope of works includes, review of processes for safeguarding the assets of the company, review of operational efficiency, effectiveness the assets of the company, review of operational efficiency, effectiveness of systems and process, and assessing the internal control strengths in all areas.

C) Secretarial Auditor and Their Report

The Company has appointed **M/s. Payal Dhamecha & Associates, Company Secretaries in practice**, to conduct the secretarial audit of the Company for the Financial Year 2020-21, as required under Section 204 of the Companies Act, 2013 and Rules thereunder. The Secretarial Audit Report for the Financial Year 2020-21 is annexed to this report as an **Annexure – V**.

34) WEBSITE

As per Regulation 46 of SEBI (Listing Obligation and Disclosure Requirements) Regulations 2015 the Company has maintained a functional website namely "www.brightsolarltd.com" containing basic information about the Company.

On May 13, 2021, the company has submitted intimation to the stock exchange that the old website i.e. www.brightsolar.in is not working so that the company has developed new website www.brightsolarltd.com.

The website of the Company is containing information like Policies, Shareholding Pattern, Financial and information of the designated officials of the Company who are responsible for assisting and handling investor grievances for the benefit of all stakeholders of the Company etc.

35) INVESTOR EDUCATION AND PROTECTION FUND (IEPF)

There has not been an occasion in case of the Company during the year to transfer any sums or shares to the Investor Education and Protection Fund.

36) LISTING AT STOCK EXCHANGE

The Equity Shares of the Company continue to be listed on the NSE Emerge SME Platform.

37) Corporate Social Responsibility

The Annual report on CSR Activities is attached as an **Annexure- VI**.

37) GENERAL DISCLOSURE

Your Directors state that the Company has made disclosures in this report for the items prescribed in section 134 (3) of the Act and Rule 8 of The Companies (Accounts) Rules 2014 and other applicable provisions of the act and listing regulations to the extent the transactions took place on those items during the year. Your directors further state that no disclosure or reporting is required in respect of the following items as there were no transactions on these items during the year under review:

- (i) Details relating to deposits covered under Chapter V of the Act;
- (ii) Issue of Equity Shares with differential rights as to dividend, voting or otherwise;
- (iii) Issue of shares (including sweat equity shares) to employees of the Company under any scheme save and ESOS;
- (iv) Annual Report and other compliances on Corporate Social Responsibility;
- (v) There is no revision in the Board Report or Financial Statement;
- (vi) The Company has received an arbitration award on 20th day of January, 2019 in the matter with PGVCL and MGVL. As per the award total ₹ 5.88 Cr. along with an interest @ 9% is receivable by the company from PGVCL and MGVL.

38) ACKNOWLEDGEMENT:

Your directors acknowledge the dedicated service of the employees of the company during the year. They would also like to place on record their appreciation for the continued co-operation and support received by the Company during the year from bankers, financial institutions, business partners and other stakeholders.

STATEMENT OF DISCLOSURE OF REMUNERATION

[Pursuant to Section 197 of the Companies Act, 2013 ("the Act") and Rule 5(1) of the Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014]

A. Information as per Rule 5(1) of the Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014:

- a) The ratio of remuneration of each director to the median remuneration of employees for the Financial Year and the Percentage increase in remuneration of each director, Chief Financial Officer, Chief Executive Officer, Company Secretary or Manager, if any, in the Financial Year:

Sr. No.	Name	Designation	Nature of Payment	Ratio against median employee's remuneration	Percentage Increase/Decrease In 2021 as compared to 2020
1.	Piyushkumar Thumar ¹	Chairman & Managing Director	Remuneration	0:1	0
2.	Ajay Raj Singh ²	Additional Whole-Time Director	Remuneration	0:1	0
3.	Phool Kumar Saluja ^{3&6}	Non-Executive Independent Director	Sitting Fees	0.31:1	N.A
4.	Chalapathi Satya VenkataMogalapalli ^{4&6}	Non-Executive Independent Director	Sitting Fees	0.61:1	N.A
5.	Jagrutiben Rameshbhai Joshi ⁶	Non-Executive Director	Sitting Fees	0.61:1	N.A
6.	Viren Makwana ^{5&6}	Additional Non-Executive Independent Director	Sitting Fee	0.31:1	N.A
7.	Sahul Natvarbhai Jotaniya	Company Secretary & Compliance Officer	Remuneration	2.75:1	7.07%
8.	Keyur Muchhala	Chief Financial Officer	Remuneration	3.67:1	0.0%

Note:1

The employees who have drawn remuneration from the Company for full fiscal 2021 are considered for median remuneration.

1. In the F.Y 2019-20, the company has paid an excess managerial remuneration to Mr. Piyushkumar Thumar, Chairman & MD. Hence, During the F.Y 2020-21, the company has done recovery of excess paid in previous year.
2. Appointed as an Additional Whole- time director of the company w.e.f. October 12, 2020. The Company is not paying any kind of Managerial Remuneration to him.

3. Resigned as an Independent director with effect from September 16, 2020.
4. Resigned as an Independent director with effect from March 18, 2021.
5. Appointed as an Additional (Non-Executive) Independent Director with effect from December 23, 2020.
6. Reflects Sitting Fee.

b) The percentage increase in the median remuneration of employees in the financial year:

The Median remuneration of Employees in the financial year was 61.74

c) The number of permanent employees on the rolls of the Company: 31 as on March 31, 2021.

d) Average percentile increases already made in the salaries of employees other than the managerial personnel in the last financial year and its comparison with the percentile increase in the managerial remuneration and justification thereof and point out if there are any exceptional circumstances for increase in the managerial remuneration:

- Average increase in remuneration of employees excluding KMPs: NA
- Average Remuneration of KMPs : NA
- KMP salary increases are decided based on the Company's performance, individual performance, inflation, prevailing industry trends and benchmarks.

E) Affirmation that the remuneration is as per the remuneration policy of the company

Note:2

- 1) For the calculation of Median, we have considered total number of employees who have withdrawn salary during the whole year i.e. **31 number of employees.**
- 2) Appropriate Approvals have been taken for related party transactions wherever necessary.

CONSERVATION OF ENERGY, TECHNOLOGY ABSORPTION, FOREIGN EXCHANGE EARNINGS AND OUTGO*(Pursuant to Section 134 (3) (m) of the Companies (Accounts) Rules, 2014 and rules made there under)***A. Conservation of energy**

- i.) **The steps taken or impact on conservation of energy:** The Company has taken measures and applied strict control system to monitor day to day power consumption, to endeavour to ensure the optimal use of energy with minimum extent possible wastage as far as possible. The day today consumption is monitored and various ways and means are adopted to reduce the power consumption in an effort to save energy.
- ii.) **The steps taken by the Company for utilizing alternate sources of energy:** The Company has not taken any step for utilizing alternate sources of energy.
- iii.) **The capital investment on energy conservation equipment:** During the year under review, Company has not incurred any capital investment on energy conservation equipment.

B. Technology absorption –

- i.) **The effort made towards technology absorption:** The Company has not imported any technology and hence there is nothing to be reported here.
- ii.) **The benefit derived like product improvement, cost reduction, product development or import substitution:**
None
- iii.) **in case of imported technology (imported during the last three years reckoned from the beginning of the financial year) –**
- The details of technology imported: None
 - The year of import: None
 - Whether the technology has been fully absorbed: None
 - If not fully absorbed, areas where absorption has not taken place, and the reasons thereof: None
- iv.) **The expenditure incurred on Research and Development:** During the year under review, the Company has not incurred any Expenditure on Research and Development

C. Foreign Exchange Earnings & Expenditure:**i.) Details of Foreign Exchange Earnings:****(₹ in Lakhs)**

Sr. No.	Particulars	F.Y. 2020-21	F.Y. 2019-20

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

SPECIAL NOTE ON CORONAVIRUS PANDEMIC

By mid of March 2020, the outbreak of Coronavirus (COVID-19) pandemic has been rapidly spreading throughout the world, including India causing significant disturbance and slowdown of economic activity. The Company has made committed efforts to support its business stakeholders, employees and service providers. The effect of Covid-19 on the Company is insignificant. The company's manufacturing facilities were shut down from March 23, 2020 for 42 days. Due to this Pandemic, the first Q1 of F.Y 2020-21 was very worse for all the corporate entities for doing business and due to that the company has not made sufficient profitability. Even in the F.Y 2021-22 in mid of April, 2021 partial lockdown was imposed. Because of that most of the entities have stopped manufacturing activities, labours were returned to their hometown and pick in prices of raw materials, food items etc. Looking at current situation the company predict significant effect of Covid-19 on profitability during F.Y 2021-22 also. The Company is continuously monitoring the situation and taking necessary actions in response to the developments, to minimize the impact on the business of the Company.

Impact of Covid-19 on the Business of the Company

Sr. No	Particulars	Disclosure/Information
1	Impact of the COVID-19 pandemic on the business	<p>The Company's main revenue comes from EPC projects. Therefore, due to lockdown announced by the Government of India, our all-EPC projects were shut down from March 22, 2020. Our all skilled, semi-skilled and Un-skilled labours were migrated to their native place which has impacted negatively to the business operation and company's financial position. Moreover, in case of EPC projects, billing normally done in the month of march but due to lockdown, all the Government departments were closed. Due to that, our various pending payments are pending to receive. Therefore, the company is currently facing financial crunch and shortage of working capital.</p> <p>However, the Government allowed to start offices from 3rd May, 2020 but our EPC works are yet not started with full capacity because of non-availability of manpower. Due to this, the revenue and profitability were adversely affected during the financial year 2020-21.</p>
2	Ability to maintain operations including the factories/Branch office spaces functioning and closed down	<p>Due to announcement of lockdown, our skilled, un-skilled employees and labours have been returned to their home state, due to which the operation of the company is drastically impacted and during the period of lockdown Company's operation was ceased. However, it was permitted to do work from home to skilled staff. But Factory unit and EPC projects are not started till 31st May, 2020. However, the company has taken precautionary measures to safeguard health and safety of its employees and starting EPC works at various sites specifically in Bihar state with half capacity.</p>
3	Schedule, if any for re-starting the Business operations	<p>The Company has followed guideline of State and Central Government and starting its Office, Factory unit and Branch offices as per guideline.</p>

4	Steps taken to ensure smooth functioning of operations	<p>The company is taking care of its staff and work force and has put in place strict monitoring process for COVID-19 ensuring the following:</p> <ul style="list-style-type: none"> • Ensuring wearing of masks and regular cleaning of hands. • Use of sanitizer at office and factory unit. • Maintaining social distancing at all work places. • Asking all employees to have Aarogya Setu App. • Taking regular updates of the health of all the employees and their facilities.
5	Estimation of future impact of COVID-19 on Business operation of the company	<p>Our business is depended on semi and unskilled labours. But due to COVID-19, they are returned to their home state. Therefore, it was very difficult to resume EPC work at full capacity after lockdown closed. Therefore, our revenue and profitability were adversely affected in financial year 2020-21.</p> <p>In the first and Second quarter of F.Y 2020-21, revenue and profitability were adversely affected.</p>
6	Impact on Financial Resources	<p>Presently, the Management of working capital is badly affected. The payments are getting delay to receive and therefore, the company is currently in struggle for completing ongoing projects in given time frame.</p> <p>The shortage of fund will stick for next few months considering this extraordinary circumstance.</p>
7	Impact on Profitability	<p>The profitability of the company in the 1st and 2nd quarter was on negative side. It had directly affected profitability of the entire F.Y 2020-21. On other side, fixed overheads will affect our profitability adversely in the current financial year.</p>
8	Impact on Liquidity position of the company	<p>Due to lockdown in 2020, all the existing projects were stopped and simultaneously revenue generation was also stopped. The major source of revenue generation was from Solar EPC& Infra projects but due to lockdown we were not able resume work with full capacity. Hence, the liquidity position of the company is currently tight and the company is trying to manage it by strict monitoring of cash inflows and outflows.</p> <p>Moreover, due to liquidity issue, company is not able to procure new works and submit bid for big projects during the next few months.</p>
9	Business Opportunities	<p>In future for next few months, the company is expecting that new tenders for water supply and Solar pump installation work will not published by the Government. Moreover, the company's position is not good to submit bid for new big projects. Therefore, the company's financial performance will be adversely affected.</p>
10	Assets	<p>The company has put on hold planning for starting Solar panel manufacturing unit at Fagvel, Gujarat. Moreover, the Company is not thinking for any addition in the company's assets during the year.</p> <p>The Company is planning to sell out the land situated at Fagvel, Gujarat.</p>

11	Disruption of Supply chain	Due to lockdown, in first 2 Quarters, the Company was facing difficulties in supply of materials, parts and machinery at various location. The supply chain was badly affected because during lockdown transportation facility was not available.
12	Existing contracts /agreements	The Company is expecting that the ongoing projects of solar pumping system, Solar PV Rooftop system and Water Supply projects will get delayed.
Conclusion		<p>Due to lockdown in mid of march, 2020, in first 2 quarters of F.Y 2020-21, the company has made loss. After that the company has resumed works in July, 2020. But due to lockdown, all ongoing projects were not run-in full capacity. So that the billing generation was not done as per our expectation. Due to that cash inflow was not sufficient in order to meet existing liabilities i.e., expenses, fixed overheads.</p> <p>In April, 2021, Partial lockdown is imposed. This all things have encouraged in increase in inflation rate, Increase in Raw material prices, increase in expenses such as rents, price of transportation cost etc.</p> <p>Currently in Q1 of F.Y 2021-22, due to partial lockdown, the company has not done sufficient business. Also, currently government is saying that 3rd wave of COVID-19 may come in Aug, 2021. Hence, the company is predicting that in F.Y 2021-22, it will adversely affect revenue & profitability of the company.</p>

INDUSTRY STRUCTURE AND DEVELOPMENTS

India's Nationally Determined Contributions (NDC) under the Paris Agreement for the Period 2021-2030 include:

To reduce the emissions intensity of its GDP by 33 to 35 percent by 2030 from 2005 level; and to achieve about 40 percent cumulative electric power installed capacity from non-fossil fuel-based energy resources by 2030 with the help of transfer of technology. India is well on its way to achieve these targets.

India has achieved a cumulative installed renewable energy capacity (excluding large hydro) of 92.54GW out of which 5.47 GW was added in the period April 2020 till January, 2021. During the period from April 2014 to January 2021, the installed RE capacity of India has increased by two-and-half times, and in the same period, the installed solar energy capacity has increased 15 times. Globally, today India stands 4th in RE power capacity, 4th in Wind power, and 5th in Solar Power capacity.

India has one of the highest rates of growth for renewable energy in the world. As per Global Trends in Renewable Energy Investment 2020 report, during the period 2014-2019, renewable energy programmes and projects in India attracted an investment of US\$ 64.2 billion (Rs 4.7 lakh crore).

SWOT Analysis

Introduction:

Solar energy is one of the best options as it is a clean renewable energy source, and found abundantly in most places. In 90 minutes, the earth receives an amount of energy that is sufficient to meet the energy demand of the planet for one year from the sun. Although the solar energy is abundant to this extent, the energy tapped from this source is a tiny fraction of the world's current energy mix. However, this is changing rapidly and is being driven by global action to improve energy access and supply security, and to mitigate climate change.

Countries and companies all over the world are currently investing huge amount of money on solar energy. As a consequence, the technologies are advancing and cost of operating the solar energy is reducing from time to time.

A. Strength

- ❖ **Limitless:** Solar energy originates from the sun, and it is one of the main sources of unlimited free energy available on Earth. Theoretically solar energy has the capacity to fulfill the energy demand of the world. Despite this huge potential and increase in awareness, the contribution of solar energy to the global energy supply is still insignificant. Theoretically the amount of solar energy that touches the earth is 4200 times the energy that human population would consume in the year 2035. In few hours the earth can get the amount of solar energy that covers the annual energy consumption. Hence, developing an efficient and effective capacity of collecting solar energy could potentially solve the energy demand of the world without requiring additional sources of energies. The amount of solar energy that can be collected depends on the location. For example, India receives 4 to 7 KW/hr of solar radiation per square meter per day for more than 250 days per year.
- ❖ **Environmentally Friendly:** The energy from the sun is collected and stored to generate electricity. This method is considered as a renewable alternative to non-renewable technologies. Thus, the usage of solar energy greatly reduces the negative impact of carbon emissions. In California USA, an average of 696,544 metric tons of carbon emission was reduced through the installation of solar system onto 113,533 households. In addition, solar energy does not release other harmful gases that could harm the environment. The solar panels used on household can be recycled. It can then be concluded that solar energy is a non-polluting, reliable and clean source of energy.
- ❖ **Ease of usage/harvest:** Solar energy is collected mostly using solar panels that generate electricity by using photovoltaic technology. Installation of solar energy system can be done anywhere. For instance, solar panels are now easily placed on the rooftops of houses and commercial buildings. However, one could say that it would be impossible to install solar system on their homes especially if they are not the sole owner or due to lack of space or shade requirement by others. In countries like America with the introduction of shared solar energy there is no more problem with space unavailability. Homeowners can obtain electricity from the community solar garden without having solar panels on rooftop.
- ❖ **Less overall cost:** At first the investment of solar system seems expensive. Once solar system is installed the running cost is very low. Hence, in the long-run the cost benefit of using solar energy would be better than other sources of energy. Solar panels have low maintenance cost and can serve for 10 to 15 years with minor service. In addition, solar power benefits us in various ways such as tax incentives and added property values. Particularly when solar energy is used for specific purpose such as in drying of different products, the benefit obtained will be significant. In certain countries like USA, Germany, Denmark, UK and France drying of food products consumes 7-15% of industrial energy which can be done simply by solar energy [9]. Thus, for such processes solar energy is being used as an alternative source to reduce the high cost associated with drying.
- ❖ **Versatile:** Solar power is utilized either directly or indirectly in numerous applications that are not limited to industry purposes but also applicable on day-to-day usage such as, drying of agricultural and industrial products, solar powered refrigerator, water heating, solar cooking, etc. Using solar radiation for drying or removal of excess moisture from a product is a widely used method to meet the specification required for industrial processes. For instance, in the gasification process of biomass the moisture content of the feedstock should not exceed 20%, and this can be achieved by removing the moisture using solar driers. Solar energy is also widely used in cooking particularly in areas when the solar radiation intensity is high and no electricity. In solar cooking, radiation from the sun is concentrated at one point with the help of reflectors. Various type of solar cookers has already been invented such as box cooker, parabolic cooker, panel cooker and so on.

B. Weakness

- ❖ **Solar Power is Available Only in Day Time:** As solar radiation is available only in day time, photovoltaic panels and other collectors are able to convert solar energy into other forms of energy only when there is sunlight. For this reason, solar power needs to have energy storage system to get uninterrupted power supply. The solar system is also installed with other power supplement to replace when the available solar radiation is not enough or the energy storage is not enough to supply for the rest of the day when solar radiation is not available. The backup system is also an additional cost that makes solar system more expensive.
- ❖ **Solar Panels are inefficient:** The conversion efficiency of solar panels is very low compared to other energy conversion system. The achievable conversion efficiency of the solar energy into usable energy by solar panels are not exceeding 20% in general. Because of the inefficiency of the panels, a large space is required to collect solar energy which is just enough for an average household.
- ❖ **The Space Required for PV:** Many photovoltaic cells are needed to absorb enough energy for larger applications. The efficiency of photovoltaic panel drops dramatically due to overheating of the panel and as a result large quantity of solar panel is required. Since the space required for the solar collectors are large, identifying a space where it is not used for other purposes is frequently a challenging task.
- ❖ **High Initial Cost:** Although installation of solar system brings immense benefits, the initial investment cost is expensive. Quantifying the total cost is also difficult without the assistance of the manufacturing company. However, as most of the governments are concerned with the global warming that is caused by burning of fossil fuels, a subsidy and tax exemptions are provided for users of solar energy which helps to reduce the burden of overall installation cost of solar energy.

C. Opportunities

- ❖ **Create New Business Opportunities:** Every new innovation opens business opportunities. Currently, Tesla and Panasonic are orchestrating a huge solar panel manufacturing plant in Buffalo, New York. The power wall produced by Tesla has increased dramatically in the recent years. The demand of solar panels by real states are growing in recent years. Landowners have got opportunities to rent their unused land for new solar farms and get income. In countries like US, Germany, Italy, China, India, Japan and the UK, the market for solar products are growing very fast. Worldwide the demand for utilization of solar energy increases by more than 9% every year.
- ❖ **Availability of Subsidy and Support:** In most countries governmental and non-governmental organizations have subsidy and income tax exemptions schemes. The Indian Government is giving subsidy for installation of solar rooftop system for household sector. The various state government in India giving subsidy for installation of solar in the Household sector.
- ❖ **Cost Reduction:** Solar energy technologies are developing quickly and the competition in the market on the technologies are increasing. The competition in the technology leads to an improved efficiency and cost reduction. The Price of Silicon cell is globally going to reduce day by day. Hence, overall cost of solar technology is getting down which is good thing for us.

D. Threats

- ❖ **Health risks:** A new investigation by Environmental Progress (EP) reported that lethal waste from the used solar panels presents a worldwide environmental danger. The disposal of solar panels, which contain unsafe components such as lead, chromium, and cadmium are running over the world, but effort to minimize the adverse effect is very minimal. According to EP research, developing nations like India and China frequently burn the e-waste to reclaim the copper wires which is profitable for resale. Since this procedure requires burning off plastic, the resulting smoke contains poison that may cause cancer and teratogenic (birth

deformity) when it's being inhaled. It is approximated that per quadrillion joules of energy produced, 11 and 21 deaths have been identified in conjunction with the solar energy health threats.

- ❖ **High carbon footprint:** A carbon footprint is characterized as the total amount of greenhouse gases produced to either directly or indirectly in the process of realization of a product. It is usually specified in equal tons of carbon dioxide (CO₂). The fact is that even solar power plants have an environmental footprint on a lifecycle basis. The main components of solar PV panels are made from crystalline silicon. Manufacturing these components is an energy-intensive process that represents a high percentage of the total energy used to make solar panels. The exact carbon footprint of any solar panel relies upon numerous variables, including the materials source, the transported distance, and the energy used by the plants.

SWOT ANALYSIS OF THE COMPANY

OUTLOOK

The Renewable energy industry is well-established, viewing bright future in this sector. India is very ambitious in its targets for promoting renewable energy. In India, renewable energy has started playing an increasingly important role in the augmentation of grid power, providing energy access, reducing the consumption of fossil fuels and helping India pursue its low carbon development path. India submitted its Intended Nationally Determined Contribution (INDC) to the UNFCCC, outlining the country's post-2020 climate actions. India's INDC builds on its goal of installing 175 gigawatts (GW) of renewable power capacity by 2022 by setting a new target to increase the country's share of non-fossil-based installed electric capacity to 40 percent by 2030.

The launch of the International Solar Alliance (ISA) was announced by Mr. Narendra Modi, the Hon'ble Prime Minister of India and Mr. Francois Hollande, former Hon'ble President of France on 30th November 2015, at the 21st session of United Nations Climate Change Conference of the Parties (COP-21) in Paris, France. Former UN Secretary-General Ban Ki-moon attended the launch, alongside the Heads of about 120 nations who affirmed their participation in the Alliance to dedicate efforts for promotion of solar energy.

Moreover, MNRE has published scheme for achieving of 40,000 MW capacity from Rooftop Solar (RTS) Projects by the year 2022.

SCHEMES OF MINISTRY OF NEW AND RENEWABLE ENERGY (MNRE)

1) Pradhan Mantri Kisan Urja Suraksha Evam Utthaan Mahabhiyaan (PM KUSUM)

PM-KUSUM (Pradhan Mantri Kisan Urja Suraksha evam Utthaan Mahabhiyan) Scheme is aimed at ensuring energy security for farmers in India, along with honouring India's commitment to increase the share of installed capacity of electric power from non-fossil-fuel sources to 40% by 2030 as part of Intended Nationally Determined Contributions (INDCs).

The Scheme consists of three components:

- **Component A:** 10,000 MW of Decentralized Ground Mounted Grid Connected Renewable Power Plants of individual plant size up to 2 MW will be setup by individual farmers/ group of farmers/ cooperatives/ panchayats/ Farmer Producer Organisations (FPO)/Water User associations (WUA) on barren/fallow land.
- **Component B:** Installation of 17.50 lakh standalone Solar Powered Agriculture Pumps of individual pump capacity up to 7.5 HP for replacement of existing diesel Agriculture pumps / irrigation systems in off-grid areas, where grid supply is not available.

- **Component C:** Solarisation of 10 Lakh Grid-connected Agriculture Pumps. Under this Component, individual farmers having grid connected agriculture pump will be supported to solarise pumps.

2) Atma Nirbhar Bharat- Production Linked Incentive Scheme (PLI)

Accordingly, PLI schemes to create manufacturing global champions for an Atma Nirbhar Bharat have been announced for 13 sectors including manufacturing of 'High Efficiency Solar PV Modules'. The government has committed nearly Rs. 1.97 lakh crores, over 5 years starting FY 2021-22 including Rs. 4500 crore for 'High Efficiency Solar PV Modules' which will be implemented by Ministry of New & Renewable Energy (MNRE). It will help bring scale and size in Solar PV manufacturing, create and nurture global champions and provide jobs to youth. The PLI schemes will incentivize new Gigawatt (GW) scale solar PV manufacturing facilities in India. The EFC meeting for formulating a scheme in this regard has already been held. It will now be taken to the Cabinet for final approval. The scheme will reward efficiency of solar modules as well as local value addition.

Solar capacity addition presently depends largely upon imported solar PV cells and modules as the domestic manufacturing industry has limited annual capacity of around 2,500 MW for solar PV cells and operational annual capacity of 9,000-10,000 MW for solar PV modules.

Under the PLI Scheme 10,000 MW capacity of integrated solar PV manufacturing plants (from manufacturing of wafer-ingot to high efficiency modules) will be set up by Q4 of 2022-23 with the direct investment for around Rs. 14,000 crore. Due to inbuilt incentive for higher efficiency module and local value addition, it is expected that the successful manufacturers will invest in R&D for achieving more efficiency and source their input material locally for more PLI benefits. The scheme will additionally create further demand of Rs 17,500 crore over a period of 5 years for locally produced balance of materials like EVA, Solar glass, Back sheet, Junction box etc, which will help in the development and augmentation of entire ecosystem associated with Solar PV manufacturing.

3) Development of Solar Parks and Ultra Mega Solar Power projects

Solar power projects can be set up anywhere in the country, however the scattering of solar power projects leads to higher project cost per MW and higher transmission losses. Individual projects of smaller capacity incur significant expenses in site development, drawing separate transmission lines to nearest substation, procuring water and in creation of other necessary infrastructure. It also takes a long time for project developers to acquire land, get change of land use and various permissions, etc. which delays the project. To overcome these challenges, the scheme for "Development of Solar Parks and Ultra-Mega Solar Power Projects" was rolled out in December, 2014 with an objective to facilitate the solar project developers to set up projects in a plug and play model.

This scheme is valid till 31.03.2022. The scheme for "Development of Solar Parks and Ultra Mega Solar Power Projects" was rolled out by Ministry of New & Renewable Energy on 12-12-2014. Under this scheme, it was proposed to set up at least 25 Solar Parks and Ultra Mega Solar Power Projects targeting over 20,000 MW of solar power installed capacity within a span of 5 years starting from 2014-15.

4) Grid Connected Solar Rooftop Programme

The Scheme is published for achieving cumulative capacity of 40,000 MW from Rooftop Solar (RTS) Projects by the year 2022. This scheme is valid till 31.12.2022. As the Scheme is to be implemented through Power Distributing companies (DISCOMs), therefore, the residential consumer who wishes to seek CFA has to approach the DISCOMs operating in his area for installation of rooftop solar plant and get the CFA. Power Distributing companies (DISCOMs) operating in his area for installation of rooftop solar plant and get the CFA. One can approach either the portal of the DISCOM, if available, or visit the local office of the DISCOM in his area.

Phase II of the Grid connected rooftop solar programme was approved for with a target for achieving a cumulative capacity of 40,000 MW from Rooftop Solar (RTS) Projects by the year 2022 in February 2019. Operational guidelines were issued on 20th August, 2019.

Under the Phase II of the Grid connected rooftop solar programme Central Financial Assistance (CFA) up-to 40% of the benchmark cost is provided for RTS projects up to 3 kW capacity and 20% for RTS system capacity beyond 3 kW and up to 10 kW in residential sectors. For Group Housing Societies/Residential Welfare Associations (GHS/RWA), CFA is limited to 20% for RTS plants for supply of power to common facilities maximum upto 500 kW capacity. The programme is being implemented through power distribution companies (DISCOMs)/Electricity Department of States and UTs

5) Har Ghar Jal- Jal Jeevan Mission

(Functional Household Tap Connection (FHTC) to every household by 2024)

In his address to the nation on Independence Day–2019, Hon'ble Prime Minister of India announced Jal Jeevan Mission (JJM) to be implemented in partnership with States, **to provide functional household tap connection to every household by 2024**. Prime Minister has given a call to make water everyone's business – **a Jan Andolan**.

On 15 August, 2019, piped water supply covered about 17% of rural households, when the Prime Minister had announced potable tap water supply to every household by 2024 under Jal Jeevan Mission. The mission emerged from a realization that reliable access to potable water is the cornerstone of sustainable rural development. It has been 22 months since the announcement of the mission, and tap water supply has increased from 3.23 Crore (17%) to 7.63 Crore (39.7%), Covid-19 pandemic limitations notwithstanding. In spite of this good progress made so far, still about 11.56 Crore rural households to be provided with tap water supply in next 3 years, a gigantic task by any measure.

In the first quarter of 2021-22, about 28 lakh households have been provided with tap water connections. At present, 7,82,41,464 lakh households provided with tap connections; Now daily 1 lakh families are being given tap connections.

Out of 6.04 lakh villages in the country, as of now, more than 95 thousand villages (16%) have already achieved 100% tap water supply to rural households. In another 1.25 lakh villages, water supply works are at different stages of completion. Similarly, out of 19.20 Crore rural households, now more than 7.63 Crore households have tap water supply. In these 22 months, despite CoVid -19, the coverage has increased from 17% to 39.78% by providing tap water connections to 4.39 Crore households.

6) Scheme for Development of Solar Parks and Ultra Mega Solar Power Projects:

The Scheme for Development of Solar Parks and Ultra Mega Solar Power Projects was rolled out on 12-12-2014 with aggregate capacity 20,000 MW. Further, the capacity of the Solar Park Scheme was enhanced from 20,000 MW to 40,000 MW on 21-03-2017 to set up at least 50 Solar Parks by 2021-22.

Solar Park is a large chunk of land developed with all necessary infrastructure and clearances for setting up of Solar projects. The capacity of the Solar Parks is generally 500 MW and above. However, smaller parks (up to 20 MW) are also considered in States or UTs where there is shortage of non-agricultural land. Approximately 4 to 5 acres per MW of land is required for setting up Solar

Parks. The total Central Grants approved under the Scheme is ₹ 8,100 crore.

Under the scheme, the Ministry provides Central Financial Assistance (CFA) of up to ₹ 25 lakh per solar park for preparation of Detailed Project Report (DPR). Beside this, CFA of up to ₹ 20.00 lakh per MW (12 Lakh/MW for

development of internal infrastructure of solar park and ₹ 8 Lakh/MW for development of external power evacuation infrastructure of solar park) or 30% of the project cost, including Grid-connectivity cost, whichever is lower, is also provided on achieving the milestones prescribed in the scheme. The approved grant is released by Solar Energy Corporation of India Ltd. (SECI) as per milestones.

DISCUSSION ON FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

SECRETARIAL AUDIT REPORT
FOR THE FINANCIAL YEAR ENDED 31ST MARCH, 2021

[Pursuant to section 204(1) of the Companies Act, 2013 and Rule No. 9 of the Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014]

To,
The Members,
BRIGHT SOLAR LIMITED
CIN: L51109GJ2010PLC060377
C-103, TITANIUM SQUARE,
THALTEJ CROSS ROAD,
S.G HIGHWAY, THALTEJ,
AHMEDABAD-3800059.

I have conducted the secretarial audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by Bright Solar Limited (CIN: L51109GJ2010PLC060377) (hereinafter referred to as "the company"). Secretarial Audit was conducted in a manner that provided me a reasonable basis for evaluating the corporate conducts/statutory compliances and expressing my opinion thereon.

Based on my verification of the company's books, papers, minute books, forms and returns filed and other records maintained by the company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, I hereby report that in my opinion, the company has, during the audit period covering the financial year ended on 31st March, 2021 complied with the statutory provisions listed hereunder Company has proper Board-processes and compliance-mechanism in place to the extent, in the manner and subject to the reporting made hereinafter.

I have examined the books, papers, minutes books, forms and returns filed and other records maintained by the Company for the financial year ended on March 31, 2021 according to the provisions of:

- i. The Companies Act, 2013 ('the Act') and the rules made there under as applicable;
- ii. Foreign Exchange Management Act, 1999 and the rules and regulations made there under to the extent of Foreign Direct Investment;
- iii. The Depositories Act, 1996 and the Regulations and Bye-laws framed there under;
- iv. The Securities Contracts (Regulation) Act, 1956 ('SCRA') and the rules made there under;
- v. The following Regulations and Guidelines prescribed under the Securities and Exchange Board of India Act, 1992 ('SEBI Act'):-
 - a) The Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011 and circulars/guidelines/amendments issued thereunder;
 - b) The Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015 and circulars/guidelines/amendments issued thereunder;
 - c) The Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("the Listing Regulations")
- vi. Revised Secretarial Standards issued by The Institute of Company Secretaries of India;

During the period under review the Company has complied with the provisions of the Act, Rules made there under, Regulations, guidelines etc. mentioned above except: -

1. Schedule IV –Code for Independent Director of Companies Act 2013 **w.r.t time limit** of three months to appoint an Independent Director from the date of resignation of Independent Director, i.e. three months from resignation of Mr. Phool Kumar Saluja w.e.f September 16, 2020. During the Year, Mr. Viren Makwana

was appointed as Additional Independent Director w.e.f December 23, 2020 (Vacancy was filled up within 3 months and 8 days, therefore there is a delay of 8 days).

2. Delay in depositing Full amount of Final Dividend approved by Shareholders in 10th Annual General Meeting into Separate Account opened in a scheduled bank within five days from the date of declaration of such dividend as required under Section 123(4) of Companies Act, 2013. There is a delay of 1 day in depositing such amount into separate bank account opened.
3. Company has not transferred unspent amount of CSR amount of FY 2019-20 earmarked for Corporate Social Responsibility activities within a period of six months from the end of the financial year to a Fund specified in Schedule VII.
4. Company has not spent amount of CSR in FY 2020-21 as per average profits of last 3 years.
5. Company has not Filed FLA return for FY 2019-20 for Foreign Portfolio Investment.

I have relied on the representation made by the Company and its Officers for systems and mechanism formed by the Company for compliances under other applicable Acts, Laws and Regulations as applicable to the Company as given in **Annexure A**.

During the Period under review, provisions of the following Acts, Rules, Regulations, and Standards are not applicable to the Company,

- i. Foreign Exchange Management Act, 1999 and the rules and regulations made there under to the extent of Overseas Direct Investment and External Commercial Borrowings; and
- ii. The Securities and Exchange Board of India (Registrars to an Issue and Share Transfer Agents) Regulations, 1993; - The Company is not registered as Registrar to an Issue & Share Transfer Agent. However, the Company has appointed Accurate Securities and Registry Private Limited as Registrar & Share Transfer Agent in accordance with the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015.
- iii. The Securities and Exchange Board of India (Delisting of Equity Shares) Regulations, 2009;
- iv. The Securities and Exchange Board of India (Share Based Employee Benefits) Regulations, 2014 and circulars/guidelines/Amendments issued there under;
- v. The Securities and Exchange Board of India (Issue and Listing of Debt Securities) Regulations, 2008;
- vi. The Securities and Exchange Board of India (Buyback of Securities) Regulations, 1998;
- vii. The Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009;

I further report that -

The Board of Directors of the Company is duly constituted with proper balance of Executive Directors, Non-Executive Directors, Independent Directors and Woman Director.

Adequate notice is given to all Directors to schedule the Board Meetings, agenda and detailed notes on agenda were sent in advance, and a system exists for seeking and obtaining further information and clarifications on the agenda items before the meeting and for meaningful participation at the meeting.

Notes forming part of Financial Statements

1. Background

Bright Solar Limited is engaged in assembling of DC/AC Solar Pumps and Solar Pump Systems under the registered brand name of “PUMPMAN”, “BRIGHT SOLAR”, and “BRIGHT SOLAR WATER PUMP”. Our company is also engaged in EPC contracts of Solar Photo voltaic Water pumps which include supplying, installing and commissioning of the pump system along with comprehensive maintenance contract for a specific period of 1-5 years. In solar pump system we are having wide range of products of DC Solar Pump, Solar Pump Inverted and AC Solar Pump.

In the year 2017-18, we had started providing consultancy services for acquiring projects and tender bidding after identifying competent client on tender-to-tender basis. In addition, we have also been added water supply, sewerage and infra project in our service portfolio.

To sum up, we are into assembling of DC/AC Solar Pumps and Solar Pump Systems, EPC contracts of Solar Photo voltaic Water pumps, consulting of Projects and tenders, Water supply and Sewerage Infra Project. We are planning to commence Solar Module manufacturing and water treatment plant assembling unit.

2. Significant Accounting Policies

a. Basis of Preparation of Accounts: -

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, read with relevant rules there under and other accounting principles generally accepted in India. The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year. Previous year's figures were re-grouped/re-classified wherever necessary.

b. Use of Estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known/materialise.

c. Cash and Cash Equivalents (for purposes of Cash Flow Statement)

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

d. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/loss before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

e. Tangible/Intangible Fixed Assets:

An item is classified as fixed asset only if it satisfies the recognition criteria stated in AS 11(i.e.) is probable that future economic benefits will flow to the company and the cost of such item could be measured. Stores and Spares fulfilling the above conditions are also classified as fixed assets. Fixed assets are initially recognized at its purchase price including all costs directly attributable to bring the asset in a ready to use condition. All subsequent cost incurred such as day to day running expenses, repair and maintenance expenses are treated as revenue expenses except when such expenditure satisfied the recognition criteria stated above. Cost Model is followed after initial recognition i.e., Fixed Assets are carried at cost less accumulated depreciation/amortization/impairment.

Depreciation: Fixed assets are depreciated using the Written Down Value method. Useful lives of assets necessary for calculation of depreciation rates are taken as specified in Schedule II of Companies Act, 2013.

Intangible assets are amortized on written down value method over their estimated useful life or 4 years, whichever is lower.

The estimated useful life of the intangible assets and the amortization period are reviewed at the end of each financial year and the amortization period is revised to reflect the changed pattern, if any.

Fixed assets retired from active use and held for sale are stated at the lower of their net book value and net realizable value and are disclosed separately.

Capital Work-in-Progress: Projects under which tangible fixed assets are not yet ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable borrowing costs.

f. Impairment of Assets

The carrying value of assets/cash generating units at each balance sheet date is reviewed for impairment if any indication of impairment exists. If the carrying amount of the assets exceeds the estimated recoverable amount, impairment is recognized for such excess amount. The impairment loss is recognized as an expense in the Statement of Profit and Loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognized for an asset (other than a revalued asset) in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognized in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss. In case of revalued assets such reversal is not recognized.

g. Leases:

Where the Company as a lessor leases asset under finance leases, such amounts are recognized as receivables at an amount equal to the net investment in the lease and the finance income is recognized based on a constant rate of return on the outstanding net investment.

Assets leased by the Company in its capacity as lessee where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalized at the inception

of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognized as operating leases. Lease rentals under operating leases are recognized in the Statement of Profit and Loss on a straight-line basis, over the lease term.

h. Inventories

Items of inventories are measured at lower of cost and net realisable value after providing for obsolescence, if any, except in case of by-products which are valued at net realisable value. Cost of inventories comprises of cost of purchase and other costs net of recoverable taxes incurred in bringing them to their respective present location and condition.

Valuation of work in progress: -

Work in Progress has been valued on basis of the incurred costs less the cost of progressive billing of the projects.

i. Taxes on Income

The tax expense for the period comprises current and deferred tax. Tax is recognized in Statement of Profit and Loss, except to the extent that it relates to items recognized in the reserves directly. In such cases, the tax is also recognized in the reserves.

- Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted at the Balance sheet date.

- Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

j. Finance Cost

Borrowing costs include exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs that are directly attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. All other borrowing costs are charged to the Statement of Profit and Loss for the period for which they are incurred.

k. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

l. Revenue recognition

Revenue from sale of goods is recognized when the significant risks and rewards of ownership have been transferred to the buyer, recovery of the consideration is probable, the associated cost can be estimated

reliably, there is no continuing effective control or managerial involvement with the goods, and the amount of revenue can be measured reliably.

Revenue from rendering of services is recognized when the performance of agreed contractual task has been completed. Revenue from sale of goods is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

Interest income

Interest income and guarantee commission is accounted on an accrual basis.

Dividends

Revenue is recognized when the Company's right to receive the payment has been established.

m. Provisions, Contingent Liabilities and Contingent Assets

A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present values and are determined based on the best estimate required to settle the obligations at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognized in the financial statements and are disclosed in the Notes. A Contingent asset is neither recognized nor disclosed in the financial statements.

n. Earnings Per Share

Basic earnings per share is computed by dividing the profit/loss after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit/loss after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The number of equity shares and potentially dilutive equity shares are adjusted for share splits/reverse share splits and bonus shares, as appropriate.

 - a) If you are already registered for e-Voting, then you can use your existing password to login and cast your vote.
 - b) If you are using NSDL e-Voting system for the first time, you will need to retrieve the 'initial password' which was communicated to you. Once you retrieve your 'initial password', you need to enter the 'initial password' and the system will force you to change your password.
 - c) How to retrieve your 'initial password'?
 - (i) If your email ID is registered in your demat account or with the company, your 'initial password' is communicated to you on your email ID. Trace the email sent to you from NSDL from your mailbox. Open the email and open the attachment i.e. a .pdf file. Open the .pdf file. The password to open the .pdf file is your 8 digit client ID for NSDL account, last 8 digits of client ID for CDSL account or folio number for shares held in physical form. The .pdf file contains your 'User ID' and your 'initial password'.

- (ii) If your email ID is not registered, please follow steps mentioned below in process for those shareholders whose email ids are not registered.
6. If you are unable to retrieve or have not received the “Initial password” or have forgotten your password:
 - a) Click on “**Forgot User Details/Password?**”(If you are holding shares in your demat account with NSDL or CDSL) option available on www.evoting.nsdl.com.
 - b) **Physical User Reset Password?**” (If you are holding shares in physical mode) option available on www.evoting.nsdl.com.
 - c) If you are still unable to get the password by aforesaid two options, you can send a request at evoting@nsdl.co.in mentioning your demat account number/folio number, your PAN, your name and your registered address etc.
 - d) Members can also use the OTP (One Time Password) based login for casting the votes on the e-Voting system of NSDL.
 7. After entering your password, tick on Agree to “Terms and Conditions” by selecting on the check box.
 8. Now, you will have to click on “Login” button.
 9. After you click on the “Login” button, Home page of e-Voting will open.

Step 2: Cast your vote electronically and join General Meeting on NSDL e-Voting system.

How to cast your vote electronically and join General Meeting on NSDL e-Voting system?

1. After successful login at Step 1, you will be able to see all the companies “EVEN” in which you are holding shares and whose voting cycle and General Meeting is in active status.
2. Select “EVEN” of company for which you wish to cast your vote during the remote e-Voting period and casting your vote during the General Meeting. For joining virtual meeting, you need to click on “VC/OAVM” link placed under “Join General Meeting”.
3. Now you are ready for e-Voting as the Voting page opens.
4. Cast your vote by selecting appropriate options i.e. assent or dissent, verify/modify the number of shares for which you wish to cast your vote and click on “Submit” and also “Confirm” when prompted.
5. Upon confirmation, the message “Vote cast successfully” will be displayed.
6. You can also take the printout of the votes cast by you by clicking on the print option on the confirmation page.
7. Once you confirm your vote on the resolution, you will not be allowed to modify your vote.
