

NSE Clearing Limited

(Formerly known as National Securities Clearing Corporation Limited)

Department : FUTURES AND OPTIONS SEGMENT

Download Ref No: NCL/CMPT/47585

Date : March 09, 2021

Circular Ref. No:25/2021

All Members,

Sub: Computation of Margin Utilisation

NSE Clearing levies Initial margin, Extreme Loss Margin (ELM), Margin on consolidated crystallized obligation (COBG) and Delivery margins in the Future and Options segment and are monitored against the effective deposit/limit of the clearing/trading members. The margin utilization percentage is used for the calculation of point of entry/exit in the risk reduction mode.

The formula used for computation of margin utilisation shall be revised as under:

For Clearing Members:

$$\text{Margin Utilisation \%} = \frac{(\text{Initial Margin} + \text{ELM} + \text{COBG} + \text{Delivery Margins})}{\text{Effective Deposit- Minimum liquid net worth}}$$

For Trading Members:

$$\text{Margin Utilisation \%} = \frac{(\text{Initial Margin} + \text{ELM} + \text{COBG} + \text{Delivery Margins})}{\text{Applicable Limit}}$$

The effective date for implementation of the revised formula shall be communicated separately

Members are requested to take note of the above.

For and on behalf of
NSE Clearing Limited

(Formerly known as National Securities Clearing Corporation Limited)

Huzefa Mahuvawala
