## TAP Parameters for Live

Members have the option to use either of the below TAP versions for connecting to Exchange (Live) environment.

### Windows TAP Software:

| Sr. no. | Setup Name          | Version      | OS             | Extranet path          |
|---------|---------------------|--------------|----------------|------------------------|
| 1       | TAP_1.1.4_Setup.exe | <b>1.1.4</b> | <b>Windows</b> | /Common/IPO-OFS/WinTAP |
| 2       | TAP_1.1.5_Setup.exe | <b>1.1.5</b> | <b>Windows</b> | /Common/IPO-OFS/WinTAP |

### Linux TAP Software:

| Sr. no. | Setup Name                                      | Version      | OS           | Extranet path          |
|---------|-------------------------------------------------|--------------|--------------|------------------------|
| 2       | TAP_7.0.7_Setup.sh,<br>TAP_7.0.7_SetupFiles.zip | <b>7.0.7</b> | <b>Linux</b> | /Common/IPO-OFS/LinTAP |
| 2       | TAP_7.0.9_Setup.sh,<br>TAP_7.0.9_SetupFiles.zip | <b>7.0.9</b> | <b>Linux</b> | /Common/IPO-OFS/LinTAP |

Configuring TAP Software windows version 1.1.4 / 1.1.5 & Linux – Version 7.0.7 / 7.0.9:

| New TAP Version                                         | TAP configuration                                                                    |
|---------------------------------------------------------|--------------------------------------------------------------------------------------|
| For Windows – Version 1.1.4                             | For Windows TAP –                                                                    |
| Member Code 10                                          |   |
| Member LAN IP                                           |                                                                                      |
| WAN IP Provided by NSE                                  |                                                                                      |
| Please select 'Primary'                                 |                                                                                      |
| Please select 'Live' for connecting to Live environment |                                                                                      |
| For Linux – Version 7.0.7                               | For Linux TAP-                                                                       |
|                                                         |  |
| Please select 'Switch to Live Environment'              |                                                                                      |
| •                                                       |                                                                                      |

### Configuring NSE UDP server: (For Broadcast Data Connection)

|                             |              |
|-----------------------------|--------------|
| Receiving Multicast Address | 239.50.50.41 |
| Receiving UDP Port          | 10841        |

NSE UDP Broadcast Server Configuration v3.04.00

Broadcast Details

Sending Multicast Address

Local IP Address towards Host

Local IP Address towards NEAT

| Host | Receiving UDP Port No. | Receiving Multicast Address | Sending UDP Port No. |
|------|------------------------|-----------------------------|----------------------|
| 0    | 10841                  | 239.50.50.41                | <input type="text"/> |

Enter Corresponding Receiving Multicast Address.

To be configured at Member's N/W

WAN IP Provided by NSE

Member LAN IP

To be configured at Member's N/W

Input as 10841

Input as 239.50.50.41
