Disclaimer:

1. The information contained in this notice has been extracted from regulatory sources and has been published only as a guidance to members. As the future course of events with regards to this threat are not known, members are advised to keep a close watch on their systems to identify timely detection and remediation of this threat.
2. Members shall act upon this notice at their own discretion after conducting appropriate impact/risk analysis to their specific environment.
3. Please note that the other exploit kits are also widely in circulation and available for download for free on the Internet and there are possibilities of attack vectors other than this threat which may exist/emanate. It is critical to perform a self-assessment against these zero-days/ exploit kits released in the wild in a controlled environment.
4. This notice is for informational purpose only.
