All Members,

Sub: Connectivity – Introduction of category "E" and "O"

Over the past several years the demand for higher bandwidth and lower latency connections has been increasing due to upsurge in trading activity, advent of algorithmic trading, resultant data traffic etc. Also there is latent ask from members to have a separate connectivity for interactive and broadcast.

In pursuance of the same, the Exchange is pleased to introduce new Categories "E" and "O"

Features:

	Category	
Details	**E**	**O**
Messages/Sec	1000	NIL
Data (5 deep 1 second frequency or other such non-Tick-By-Tick data as offered by the Exchange from time to time)	Available	Available
No of user id	200 (including all segments except commodity)	NIL
Message charges (in Rs p.a excluding taxes)	25 lacs	NIL

Availability of services:

	Category	
Details	**E**	**O**
MPLS	Available	Available
Leased Lines (Managed and Self-service modes)	Available	Available
Colocation/ CaaS	Available#	N.A*

*no separate connection required for receiving data
#data is not provided on interactive connectivity

Members are further requested to note the following in this regard:

1. Application for Child /Subnet IPs will be applicable only under category 'E'.
2. All existing services like shifting, change in bandwidth etc. for these two categories will be available through ENIT as per current applicable process for POP and MPLS Lines
3. Members intending to change the category of their existing links to 'E' or 'O' can place the request via ENIT from the existing modules. However, while placing the request for conversion to category 'O', members need to ensure that the connection has no user ids on it and it is also not being used for multi locking.
4. There shall be no boxes on category 'O'.
5. All other modalities pertaining to various modes of connectivity shall remain the same

The date for commencement of ENIT application process in this regards shall be communicated later.
