Circular Ref. No: 56/2026	

All Members,

Introduction of NSE Extranet Beta service - Update

This is in continuation to Exchange Circular Reference No. NSE/MSD/73589, dated April 02, 2026, regarding the Introduction of NSE Extranet Beta Service. As part of the Exchange's ongoing efforts to enhance the user experience of trading members across its services and facilities, the Exchange has introduced the following new features on the NSE Extranet Beta platform.

1. New Features provided for File Download:

- Date Range Option:** A date range selection facility has been provided.
- File Selection & Download Facility:** Members may choose to download individual files (one or more) or all displayed files in a single action.
- Search Option:** Members can use the search option to find any specific file in the folder.

2. NSEIL Dashboard Facility on NSE Extranet Beta:

The Exchange currently provides an “**NSEIL Dashboard**” on the Member Portal where members use this facility to track the status of various trade-related reports—downloaded via the Extranet—across different segments. This dashboard is now also made available on **NSE Extranet Beta**, with the following enhanced features:

- Members will have uninterrupted access to view file status and availability and can directly download either a single or multiple reports from the NSEIL Dashboard. These reports will be available in parallel on both the existing Extranet and the new NSE Extranet Beta application, with the report download paths remaining unchanged. Reports will be published on the new platform after five minutes of their release on the existing Extranet.
- Members can filter files on NSEIL Dashboard either by segment and/or file availability status (i.e *Completed* or *Scheduled*).
- Facility to download report having the file availability status on NSEIL Dashboard.

A detailed user manual (filename: User Manual for NSE Extranet Beta Ver 1.docx) providing details on how to access this updated features is attached to this circular.
