3. Others:

a. Lending policy:

A. Origination Method:

Chola has its own in-house team for business origination which pertains to sourcing and identifying of customers eligible as prospective borrowers for the company.

All activities like field investigation, personal discussion, original seen and verification of "know your customer" document (as per RBI approved KYC norms), collection of all relevant documents & a thorough due diligence of the borrower(s) to evaluate the credit worthiness of the borrower is done by the sourcing executives.

All the documents are then duly verified by the Credit & Operations department of the company.

#### B. Credit Appraisal Methodology :

The credit philosophy followed in Chola is risk identification and measurement to ensure sanction of profitable loans for the organization with optimum productivity and desirable portfolio behaviour.

The credit assessment criteria follow a process focusing on –

- Quality portfolio
- Consistency in credit appraisal
- Innovation & improvisation
- Productivity
- Profitability

The primary responsibility of the credit team is to analyze risks and to make credit decisions that will result in granting low-risk, profitable loans in which the principal and interest is estimated to be repaid in a timely fashion. In this regard credit managers analyze the borrower's ability and willingness to repay.

The different tools for assessment are –

- Traditional Tools viz. bureau report, dedupe, field credit investigation, tele-verification reference checks, market visit, personal discussion, grids, intuition and experience, process & policies etc.
- Pricing based upon risk assessment, product and customer profile.
- Credit scoring mechanism.

#### C. Risk management, structure, monitoring, EWS:

Risk is adequately measured as well as priced while carrying out underwriting.

The company follows a robust portfolio review and monitoring mechanism with close tracking of receivables from the date of lending itself.

Chola has a very stringent early warning portfolio management wherein early default is monitored over a period of 18 months by credit team from the date of disbursement. This enables a strong check on portfolio behaviour. Early default is a critical credit parameter and any delinquency has impact upon branch business itself hence there exists a proper risk management culture in the origination.

In addition, the company has a strong internal audit mechanism. In fact, credit team also conducts a self audit i.e. risk containment and self assessment activity to review and monitor risk.

The company has defined processes for concentration risk, risk parameters and a separate risk measurement & monitoring division under the aegis of Chief Risk Officer (CRO).

#### D. Rating

Credit underwriting is rendered through Credit scoring mechanism which is a predictive model to quantify the likelihood of default of a borrower using certain key trends identified –

- The output of the model is the probability to default within a particular period of time
- Probability to default is then converted to score.
- Credit score denotes the credit worthiness of the borrower – higher the score, higher the creditworthiness of the applicant.

Hence,

Hence,

- Objective assessment of the borrower greatly reduces the need for human intervention for credit evaluation and the cost of delivering credit.
- Credit scoring helps to increase the speed and consistency of the loan application process and allows automation of lending process.
- Credit scores helps to price the riskiness of the borrowers.

#### E. Lending Limit:

Our company has adopted a scientific model for determining Loan to Value ( LTV ) for every loan granted. Hence we have moved away from a traditional model for disbursing a loan on the basis of pre-determined matrix only to a mathematical model which is based on several factors to ensure that that default and recovery risks are contained, with all loans being sanctioned using a blend of technology & qualitative credit assessment.

This scientific model determines output based upon geography, product, make and model, customer profile and LTV. This model considers Probability of Default and Risk based pricing. The Probability of default (PD) in this digital underwriting model is arrived on the basis of the historical data related to the performance of the demography, geography, product, make model, customer category, customer profile & LTV etc. PD is translated to ECL and pricing is done basis the transactional risk of the customer to achieve desired ROTA. Therefore any LTV offered to the customer is thoroughly premeditated keeping both expected loss & the return in the deal. The customer profile, geography and historical portfolio behaviour is static but LTV and make & model are dynamic.

Hence, the LTV is one of the variables for underwriting as per the loan policy of the company. The model output is the primary factor for taking credit decision. As a result of which the LTV range may vary based upon the multitude of variables.

#### F. Recovery:

Receivables management is a strong focus area for the company. Collections are made on the basis of well-defined processes & policies.

Chola has an in-house collection team for making recoveries from the customer. Also, there is a strong use of technology for the collection process and selling of vehicles.

The company has created a digital platform for sale of repossessed stock to enable transparency as well as ensure the availability of the highest selling price from a multitude of bidders.

Dear Mr. D Arulselvan,

**Re: CRISIL Rating on the Rs. 8000 Crore Commercial Paper of Cholamandalam Investment and Finance Company Limited**

All ratings assigned by CRISIL Ratings are kept under continuous surveillance and review.  
Please refer to our rating letter dated November 23, 2022 bearing Ref. no.: RL/CHOINVE/302316/CP/0922/43975/2

Please find in the table below, the rating outstanding for your company.

S.No.	Instrument	Rated Amount (Rs. in Crore)	Rating Outstanding
1	Commercial Paper	8000	CRISIL A1+

For the purpose of issuance of captioned commercial paper programme, this letter is valid for 30 calendar days from the date of the letter. In the event of your company not placing the above programme within this period, or in the event of any change in the size/structure of your proposed issue, the rating shall have to be reviewed and a letter of revalidation shall have to be issued to you. Once the instrument is issued, the above rating is valid (unless revised) throughout the life of the captioned Commercial Paper Programme with a maximum maturity of one year.

As per our Rating Agreement, CRISIL Ratings would disseminate the rating through its publications and other media, and keep the rating under surveillance for the life of the instrument. CRISIL Ratings reserves the right to withdraw or revise the ratings assigned to the captioned instrument at any time, on the basis of new information, or unavailability of information or other circumstances, which CRISIL Ratings believes, may have an impact on the rating. Please visit [www.crisilratings.com](http://www.crisilratings.com) and search with the name of the rated entity to access the latest rating/s.

Should you require any clarification, please feel free to get in touch with us.

With warm regards,

Yours sincerely,
