3. Others:

a. Lending policy:

A. Origination Method:

Chola has its own in-house team for business origination which pertains to sourcing and identifying of customers eligible as prospective borrowers for the company.

All activities like field investigation, personal discussion, original seen and verification of "know your customer" document (as per RBI approved KYC norms), collection of all relevant documents & a thorough due diligence of the borrower(s) to evaluate the credit worthiness of the borrower is done by the sourcing executives.

All the documents are then duly verified by the Credit & Operations department of the company.

B. Credit Appraisal Methodology:

The credit philosophy followed in Chola is risk identification and measurement to ensure sanction of profitable loans for the organization with optimum productivity and desirable portfolio behaviour.

The credit assessment criteria follow a process focusing on –

- Quality portfolio
- Consistency in credit appraisal
- Innovation & improvisation
- Productivity
- Profitability

The primary responsibility of the credit team is to analyze risks and to make credit decisions that will result in granting low-risk, profitable loans in which the principal and interest is estimated to be repaid in a timely fashion. In this regard credit managers analyze the borrower's ability and willingness to repay.

The different tools for assessment are –

- Traditional Tools viz. bureau report, dedupe, field credit investigation, tele-verification reference checks, market visit, personal discussion, grids, intuition and experience, process & policies etc.
- Pricing based upon risk assessment, product and customer profile.
- Credit scoring mechanism.

C. Risk management, structure, monitoring, EWS:

Risk is adequately measured as well as priced while carrying out underwriting.

The company follows a robust portfolio review and monitoring mechanism with close tracking of receivables from the date of lending itself.

Chola has a very stringent early warning portfolio management wherein early default is monitored over a period of 18 months by credit team from the date of disbursement. This enables a strong check on portfolio behaviour. Early default is a critical credit parameter and any delinquency has impact upon branch business itself hence there exists a proper risk management culture in the origination.

In addition, the company has a strong internal audit mechanism. In fact, credit team also conducts a self audit i.e. risk containment and self assessment activity to review and monitor risk.

The company has defined processes for concentration risk, risk parameters and a separate risk measurement & monitoring division under the aegis of Chief Risk Officer (CRO).

D. Rating

Credit underwriting is rendered through Credit scoring mechanism which is a predictive model to quantify the likelihood of default of a borrower using certain key trends identified –

- The output of the model is the probability to default within a particular period of time
- Probability to default is then converted to score.
- Credit score denotes the credit worthiness of the borrower – higher the score, higher the creditworthiness of the applicant.

Hence,

- Credit score denotes the credit worthiness of the borrower – higher the score, higher the creditworthiness of the applicant.

Hence,

- Objective assessment of the borrower greatly reduces the need for human intervention for credit evaluation and the cost of delivering credit.
- Credit scoring helps to increase the speed and consistency of the loan application process and allows automation of lending process.
- Credit scores helps to price the riskiness of the borrowers.

E. Lending Limit:

Our company has adopted a scientific model for determining Loan to Value (LTV) for every loan granted. Hence we have moved away from a traditional model for disbursing a loan on the basis of pre-determined matrix only to a mathematical model which is based on several factors to ensure that that default and recovery risks are contained, with all loans being sanctioned using a blend of technology & qualitative credit assessment.

This scientific model determines output based upon geography, product, make and model, customer profile and LTV. This model considers Probability of Default and Risk based pricing. The Probability of default (PD) in this digital underwriting model is arrived on the basis of the historical data related to the performance of the demography, geography, product, make model, customer category, customer profile & LTV etc. PD is translated to ECL and pricing is done basis the transactional risk of the customer to achieve desired ROTA. Therefore any LTV offered to the customer is thoroughly premeditated keeping both expected loss & the return in the deal. The customer profile, geography and historical portfolio behaviour is static but LTV and make & model are dynamic.

Hence, the LTV is one of the variables for underwriting as per the loan policy of the company. The model output is the primary factor for taking credit decision. As a result of which the LTV range may vary based upon the multitude of variables.

F. Recovery:

Receivables management is a strong focus area for the company. Collections are made on the basis of well-defined processes & policies.

Chola has an in-house collection team for making recoveries from the customer. Also, there is a strong use of technology for the collection process and selling of vehicles.

The company has created a digital platform for sale of repossessed stock to enable transparency as well as ensure the availability of the highest selling price from a multitude of bidders.

Dear Sir,

Re: ICRA rating for Rs. 12,000.00 crore Commercial Paper (CP) programme of Cholamandalam Investment and Finance Company Limited

Please refer to your request dated March 29, 2023 for revalidating the rating letter issued for the captioned programme.

We confirm that the "[ICRA]A1+" (pronounced as ICRA A One Plus) rating assigned to your captioned programme and last communicated to you vide our letter dated March 06, 2023 stands. Instruments with this rating is considered to have very strong degree of safety regarding timely payment of financial obligations. Such instruments carry lowest credit risk. Within this category rating modifier {"+" (plus)} can be used with the rating symbols. The modifier reflects the comparative standing within the category.

Additionally, we wish to highlight the following with respect to the rating:

(a) If the instrument rated, as above, is not issued by you within a period of 3 months from the date of this letter, the rating would need to be revalidated before issuance;

(b) Subject to Clause (c) below, once the instrument is issued, the rating is valid throughout the life of the captioned programme (which shall have a maximum maturity of twelve months from the date of the issuance of the instrument).

(c) notwithstanding what is stated in clause (b) above, ICRA reserves the right to review and/or, revise the above rating at any time on the basis of new information or unavailability of information or such circumstances, which ICRA believes, may have an impact on the aforesaid rating assigned to you.

The rating, as aforesaid, however, should not be treated as a recommendation to buy, sell or hold the CP issued by you. The rating is restricted to your CP Programme size of Rs. 8,000.00 crore only.

In case, you propose to enhance the size of the CP programme, the same would be required to be rated afresh. ICRA does not assume any responsibility on its part, for any liability, that may arise consequent to your not complying with any eligibility criteria, applicable from time to time, for issuance of CP.
