India Ratings Affirms SMFG India Credit Company’s Subordinated Debt at ‘IND AAA’/Stable

Apr 02, 2026 | SMFG India Credit Company Limited (Formerly FULLERTON INDIA CREDIT COMPANY LIMITED) |

Non Banking Financial Company (NBFC)

India Ratings and Research (Ind-Ra) has affirmed SMFG India Credit Company Limited’s (SMICC) subordinated debt as follows:

Details of Instruments

Instrument Type	Date of Issuance	Coupon Rate	Maturity Date	Size of Issue (billion)	Rating assigned along with Outlook/Watch	Rating Action
Subordinated debt*	-	-	-	INR0.21 (reduced from INR0.96)	IND AAA/Stable	Affirmed

*Details in Annexure

Analytical Approach

To arrive at the rating, Ind-Ra continues to factor in strong parentage, support, and managerial and operational linkages with Sumitomo Mitsui Financial Group, Inc. (SMFG, Fitch Ratings Ltd, Issuer Default Rating: A-/Stable; Viability Rating: ‘a-’) which holds 100% stake in SMICC.

Detailed Rationale of the Rating Action

The rating reflects Ind-Ra’s expectation of continued support from its parent, SMFG. The agency anticipates ongoing capital infusion from SMFG along with operational and managerial backing for SMICC. The company also benefits from a well-diversified funding profile, supported by a broad lender base and competitive borrowing costs. The rating further factors in the company’s adequate liquidity buffers, underpinned by a stable liability franchise.

However, Ind-Ra notes that SMICC’s asset quality remains a key monitorable, given the sizeable proportion of unsecured lending in the portfolio.

List of Key Rating Drivers

Strengths

- Strong parentage
- Diversified funding sources
- Adequate capitalisation for current Scale of operations
- Credit cost covered by operating buffers

Weaknesses

- Asset quality remains monitorable given unsecured exposure in portfolio

Detailed Description of Key Rating Drivers

Strong Parentage: The rating reflects Ind-Ra's expectation of strong parental support from SMFG, which holds 100% stake since its acquisition in March 2024. SMFG's involvement is evident through its representation on SMICC's board and senior committees, along with active participation in strategic planning and key decisions. SMICC's board has eight directors, of which three directors are non-executive directors, one is managing director and chief executive officer and four are independent directors.

The non-banking financial company's (NBFC) lending platform is considered core to the SMFG group to focus on the retail business, while the bank focuses on wholesale lending. Ind-Ra believes SMFG, a global financial conglomerate, provides strength to SMICC's franchise and brings in global experience of operating in the consumer finance, and small and medium enterprises space. SMFG has expanded its footprints in the Asian markets such as the Philippines, Indonesia, and Vietnam. SMICC's acquisition was in line with its strategy of expanding into markets and establishing a retail lending franchise.

SMICC has been consolidated with SMFG's balance sheet and also benefits on the borrowing front through its ability to leverage on SMFG's global banking relationships. The shared brand name provides support to the company. The sizeable INR43 billion equity infusion in FY25 (including INR4.5 billion down streamed to SMFG India Home Finance Co. Ltd (SMHFC) underscores SMFG's demonstrated commitment.

Diversified Funding Sources: SMICC maintains a diversified funding profile, supported by borrowing lines from multiple banks. As of 9MFY26, term loans and working capital facilities accounted for 49% of total borrowings, followed by external commercial borrowings (ECBs; 23%), non-convertible debentures (NCDs; 21%), and a limited reliance on commercial paper at 6% (9MFY25: 3%; 9MFY24: 2%; FY23: 6%). During 9MFY26, the company mobilised INR167.62 billion (excluding securitisation) across term loans, working capital loans, NCDs, commercial papers (CPs) and ECBs. In the past year, the funding mix shifted towards ECBs and CPs, as SMICC opportunistically leveraged low-cost funding avenues, while dependence on NCDs and bank loans moderated. Going forward, SMICC plans to prioritise domestic bank borrowings and capital-market instruments, guided by cost considerations and policy thresholds. The company has also demonstrated strong debt-raising capability across a diverse investor base, including banks, mutual funds, pension funds, development finance institutions, and insurance companies.

Adequate Capitalisation for Current Scale of Operations: SMICC's leverage increased slightly to 4.6x in 9MFY26 (FY25: 4.0x; FY24: 6.1x), following SMFG's infusion of equity worth INR43 billion in two tranches—INR13 billion in April 2024 and INR30 billion in December 2024. This capital strengthened the balance sheet and positioned the company to pursue growth more confidently. SMICC remains adequately capitalised, with Tier-1 capital at 16.6% in 9MFY26 (FY25: 19.5%; FY24: 13.4%; FY23: 14.0%).

Ind-Ra expects SMFG to continue providing commensurate capital support to sustain growth, with the management indicating a significant infusion in FY27. Ind-Ra believes SMFG will extend timely equity support to help SMICC scale its franchise and absorb potential asset-side stresses.

Credit Cost Covered by Operating Buffers: SMICC's yields strengthened to 22.2% in 9MFY26, driven by a higher share of its high-yield digital portfolio (FY25: 21.8%; FY24: 20.9%; FY23: 20%). This supported an improvement in net interest income to total tangible assets, which rose to 12.2% in 9MFY26 (FY25: 11.7%; FY24: 10.7%; FY23: 10.2%; FY22: 9.1%). Operating expenses remained broadly stable at 7.8% of total assets in 9MFY26 (FY25: 7.8%; FY24: 6.6%), as ongoing investments in technology have been offset by operating efficiencies, preventing any significant rise in opex.

SMICC's credit costs increased to 5.7% in 9MFY26, primarily due to regulatory developments. Historically, under IND AS 109, the company factored in expected recoveries under the first loss default guarantee (FLDG) arrangements when calculating expected credit loss (ECL). However, the RBI's directive to exclude credit enhancement from default loss guarantee (DLG) arrangements in ECL computation by 30 September 2025, resulting in an additional provisioning, thereby elevating credit costs. As a result, pre-provision operating profit (PPoP) coverage of credit costs moderated to 1.1x in 9MFY26 (FY25: 1.26x; FY24: 1.63x; FY23: 2.61x; FY22: 1.1x). Nonetheless, its PPoP continues to offer an adequate buffer to absorb incremental stress.

Asset Quality Remains Monitorable Given Unsecured Exposure in Portfolio: SMICC continues to maintain a high share of unsecured lending, primarily due to its personal loan offerings across urban and rural segments. The unsecured book accounted for 53.79% of the consolidated assets under management (AUM) in 9MFY26 (FY25: 53.24%; FY24: 54.28%; FY23: 56.24%). The digital loan portfolio rose to 24.96% of consolidated AUM in 9MFY26 (FY25: 19.54%; FY24: 15.46%; FY23: 14.41%; FY22: 5.11%). As of 9MFY26, the portfolio comprised loan against property (LAP; 29.5%), personal loans (24.8%), housing loans (11.5%), with the balance comprising commercial vehicle and two-wheeler loans.

Its write-offs elevated to 7.1% of the loan book in 9MFY26 (FY25: 7.3%; FY24: 6.0%; FY23: 6.2%). Within SMICC, LAP delinquencies in the rural segment increased sharply, with PAR30+ rising to 9.06% in 9MFY26 (FY25: 5.9%; FY24: 7.9%). Urban LAP delinquencies also weakened, with PAR30+ rising to 3.75% (FY25: 2.96%). In response, the company strengthened its technical evaluation processes by forming an independent technical assessment team reporting directly to the senior risk leadership. Delinquencies increased in the commercial vehicle portfolio, with its gross non-performing assets (NPAs) rising to 5.3% in 9MFY26 (FY25: 3.9%; FY24: 2.9%). Despite this, SMICC maintained healthy Stage 3 provisioning of 51.1% in 9MFY26 (FY25: 48.8%; FY24: 49.6%; FY23: 53.0%).

The company wrote off INR23.23 billion in 9MFY26 (7.1% of FY25 AUM) but maintained an overall collection efficiency of 94% (including overdues). Its gross stage 3 assets increased to 2.5% in 9MFY26 (FY25: 1.9%), while recoveries from written-off accounts stood at INR7.22 billion, consistent with SMICC's historical 20%–25% recovery rate. Unsecured loans accounted for the majority of the write-offs, in line with SMICC's 120-days-past-due (dpd) write-off policy for these products. On the underwriting front, SMICC has shifted focus to strengthening the secured portfolio, tightening norms in the group loan and LAP segments. For SMHFC, asset quality remained relatively stable, with gross NPAs at 2.7% in 9MFY26 (FY25: 2.4%; FY24: 2.6%; FY23: 3.7%). The management aims to increase the share of secured lending in the medium term.

Liquidity

Adequate: SMICC's liquidity is comfortable, with sufficient cash and bank balance, and unutilised bank lines to meet at least three months of debt repayments. As per Ind-Ra's calculations, the structural asset-liability management (adjusted for pending disbursement and lines of credit in inflows and outflows) at end-December 2025 did not have any negative cumulative mismatch. Additionally, SMICC had unutilised bank lines of INR49.65 billion at end-December 2025. As on 31 December 2025, the company has maintained adequate liquidity of INR58.64 billion, which was sufficient to meet the total debt repayment obligations amount to INR35.54 billion between January and February 2026. SMICC has been able to manage its liability structure by raising long-term borrowings (three-to-four years) to match the average tenor of its assets. SMICC can also use securitisation/direct assignment as the route to manage liquidity needs due to the retail nature of its loan book. Furthermore, the unutilised bank lines provide additional comfort over and above the liquidity buffer.

Rating Sensitivities

Positive: Not applicable

Negative: Future developments that could, individually or collectively, lead to a negative rating action are:

- a change in the majority ownership or a decline in support expectation from SMFG
- sustained deterioration in the operating performance of SMICC
- a multiple-notch downgrade in the rating of SMFG
