2. Summary of the Industry (Source: CARE Report)

Hydraulic fittings are critical components of hydraulic systems, designed to connect pipes, tubes and hoses while ensuring leak-proof transmission of pressurized hydraulic fluids. They enable the flow, distribution, mixing and directional control of hydraulic fluids, thereby facilitating efficient power transmission in hydraulic equipment. Given that hydraulic systems operate under high pressure and often in harsh operating environments, fittings are required to offer superior mechanical strength, corrosion resistance, dimensional precision and long service life to ensure system reliability and operational safety. Hydraulic fittings are manufactured in a wide range of configurations based on connection type (threaded, flanged, quick-connect, compression, etc.), material (carbon steel, stainless steel, brass, aluminium and engineered polymers), pressure rating and end-use application. The choice of fitting depends on factors such as operating pressure, fluid compatibility, temperature, vibration resistance and maintenance requirements. The hydraulic fittings market in India is experiencing significant growth, driven by the expansion of various industries such as manufacturing, construction, automotive, and agriculture. As infrastructure development and industrialization continue to rise, there is an increasing demand for hydraulic systems, which in turn boosts the need for high-quality hydraulic fittings. In India, the Indian hydraulic fittings market has grown at a CAGR of 10% between CY21 and CY25 and is projected to expand at a higher CAGR of 11% from CY26 to CY31.

8. Risk Factors

The following are the top 10 internal risk factors as disclosed in the Red Herring Prospectus:

1. We are dependent on a few customers for a major portion of our revenues with our top 10 customers contributing to 45.32%, 42.02% and 48.72% of our revenue from operations in the Fiscals 2026, 2025 and 2024, respectively. Further, we do not enter into long-term arrangements with our customers and any failure to continue our existing arrangements with such customers could adversely affect our business, financial condition, results of operations and cash flows.
2. We derive a significant portion of revenue from operations from exports, which accounted for 29.37%, 28.30% and 33.14% of our total revenues in Fiscal 2026, 2025 and 2024, respectively. Out of which a substantial portion was generated from the United States of America, which contributed 21.42%, 22.85% and 24.56% of our total revenues during the same period. Fluctuation in exchange rates, any adverse developments in these markets or restrained economic or political relations of India with the United States of America could adversely affect our business.
3. In Fiscal 2024, we have experienced negative year on year growth in our profit after tax. We may be unable to manage our growth and expansion operations or to successfully implement our business plan and growth strategies in a timely manner or within budget estimates, which could materially and adversely affect our business, results of operations and financial condition.
4. Four out of our six Manufacturing Facilities are located in Maharashtra, India and the balance two in Madhya Pradesh. We derived 77.64%, 77.27% and 77.43% of our revenue from operations during Fiscals 2026, 2025 and 2024, respectively, from the Manufacturing Facilities located in the state of Maharashtra. Any significant social, political, economic or seasonal disruption, natural calamities or civil disruptions in the state of Maharashtra or Madhya Pradesh where our other Manufacturing Facilities are concentrated could have an adverse effect on our business, results of operations and financial condition.
5. Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.
6. We are dependent on our suppliers for raw materials used in our manufacturing processes with our top 10 suppliers contribution to 65.61%, 54.78% and 65.49% of our total purchases in the Fiscal 2026, 2025 and 2024, respectively. Any shortages, delay or disruption in the supply of the raw materials we use in our manufacturing process may have a material adverse effect on our business, financial condition, results of operations and cash flows.
7. We derive a significant portion of our revenue from operations from direct sales to our customers, with such direct sales contributing to 88.42%, 88.60% and 90.64% of our revenue from operations in Fiscals 2026, 2025 and 2024, respectively. Any adverse changes in this distribution channel could adversely impact our business, results of operations and financial condition.
8. While we cater to multiple industry segments, a significant portion of our revenue comes from construction machinery, farming and automotive industry segments, which collectively contributed 54.82%, 52.33% and 54.55% of our revenue from operations in Fiscals 2026, 2025 and 2024, respectively. We may be affected by any reduction in the demand or requirement of products in such industries which can adversely impact our business, financial condition, results of operations, cash flows and prospects.
9. We depend on third party logistic providers for transportation of our products. Any disruption, accident or delay in transportation, by such logistic providers may hamper our supply chain and impact our financial performance.
10. We have not placed orders in relation to purchase of machineries. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the machineries in a timely manner, or at all, the same may result in time and cost over-runs.
