RISK TO INVESTORS

For details refer to section titled "Risk Factors" on page 37 of the RHP

A. Risk to Investors

- Government Policy Dependence Risk:** Our business is directly influenced by the income levels and purchasing power of farmers, which are significantly affected by state and central government policies. Any reduction in government spending on agriculture, withdrawal or modification of subsidies, changes in MSPs, or export restrictions could reduce farmers' disposable income and demand for our products. We are engaged in 14 out of 27 pesticides proposed to be banned, contributing ₹ 1,031.47 million (20.55% of revenue) in FY 2025, ₹ 899.20 million (19.75% of revenue) in FY 2024, and ₹ 770.04 million (19.39% of revenue) in FY 2023. Although, our flexible infrastructure and diverse product registration portfolio (410 products) is expected to mitigate the said impact and the proposed ban is not anticipated to materially impact Company's financial condition or overall operations, we cannot assure you that similar reforms or changes in agricultural laws and policies will not be introduced in the future.
- Market Concentration Risk:** Our manufacturing facilities, supply chains, and primary customer base are located within India, with limited exposure to international markets. Our performance is closely linked to domestic agriculture demand, exposing us to region-specific risks. Any adverse political, regulatory, economic, or environmental developments within India could disproportionately affect our operations and financial performance.
- Quality Standard Compliance Risk:** We are subject to stringent quality standards and specifications in India and in export markets. We incurred quality control expenses of ₹ 9.29 million (0.19% of revenue from operation) in FY 2025, ₹ 6.06 million (0.13% of revenue from operation) in FY 2024, and ₹ 2.04 million (0.05% of revenue from operation) in FY 2023. Certain litigations relating to misbranding of Phorate 10% CC are pending against us in Haryana, Maharashtra, and Rajasthan. Inability to meet quality standards prescribed by regulatory authorities in India and export markets may adversely impact our business, reputation, and operations.
- Risk of Bad Debts and Credit Losses:** Our business operations involve extending credit to customers. Trade receivables were ₹ 1,630.71 million in FY 2025, ₹ 1,431.52 million in FY 2024, and ₹ 1,044.83 million in FY 2023. Trade receivable turnover days increased from 78 in FY 2023 to 99 in FY 2024 and 111 in FY 2025. Allowances for credit losses were ₹ 2.55 million in FY 2024 and ₹ 1.40 million in FY 2023. Bad debts of ₹ 0.19 million occurred in FY 2023 in the last three Fiscals. Defaults due to adverse macroeconomic conditions, insolvency of customers, or disruptions could materially impact cash flows and profitability while receivables concentration increases the risk.
- Working Capital Intensive Business:** Our business demands significant working capital to fund for raw materials procurement, manufacturing and inventory. Demand may increase with B2B sales expansion, larger order volumes, and the gap between shorter supplier credit and longer customer terms. Defaults, unforeseen costs, or disruptions could strain liquidity, making continuous access to working capital critical for sustaining growth.
- Conflict of Interest:** The Company's Directors and Promoters may have interests in other ventures that could compete with the Company, leading to potential conflicts of interest. One such entity is Hok Agrichem Private Limited, in which the Promoters hold an interest. Although Hok Agrichem has signed a non-compete agreement and the Company plans to acquire it as a subsidiary, there is no guarantee that conflicts will not arise or be resolved without negatively impacting the Company's business or shareholders.

...continued from previous page.

- 7. Supplier concentration risk:** We rely on a few suppliers for key raw materials, with our top ten suppliers contributing over 50% of purchases in recent fiscals. Procurement is largely through purchase orders, exposing us to risks of delay, shortage, price fluctuations, and dependency on certain imports from China. Any disruption could affect production, costs, profitability, and reputation.
- 8. Geographical Concentration Risk:** Our Manufacturing Facilities, Registered Office, and Corporate Office are located in Jaipur, Rajasthan, while a majority of revenues are generated from states including Rajasthan, Punjab, Uttar Pradesh, Haryana, Madhya Pradesh, Maharashtra, and Gujarat. In FY 2025, these states contributed 84.00% of revenue; FY 2024 contributed 78.16% of revenue, and FY 2023 contributed 75.60% of revenue. This concentration exposes us to local risks such as political unrest, labor issues, droughts, floods, earthquakes, or public health crises.
- 9. Customer Concentration Risk:** A significant portion of our revenue comes from a limited number of customers. In FY 2025, our top five and top ten customers contributed 51.70% and 69.47% of revenue, respectively (38.55% and 54.91% in FY 2024; 33.70% and 46.44% in FY 2023). As we operate mainly on purchase orders without long-term contracts, loss of key customers or preference for competitors could materially affect revenues and create production planning risks.
- 10. Risk of alternative methods of pest management and crop protection:** Growing adoption of alternatives such as biotechnology Genetically Modified crops, and Zero Budget Natural Farming (ZBNF) may reduce demand for our products and affect sales, pricing, and financial performance despite our mitigation strategies.
