RISKS TO INVESTORS

Summary description of key risk factors based on materiality

- We are dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have an adverse effect on our profitability and results of operations.
- We are dependent on a few vendors/ suppliers who are our OEM partners and we typically do not enter into long-term contracts or arrangements with them. Any loss of such suppliers or any increase in the price will have an adverse impact on our business and our revenue.
- Significant proportion of our orders are from government related entities which award the contract through the process of tender. Tenders, typically, are awarded to the lower bidder once all other eligibility criteria are met. Our performance could be adversely affected if we are not able to successfully bid for these contracts or required to lower our bid value.
- We generate a significant percentage of our revenue from operations from customers in Bihar, Odisha and West Bengal in India. If our operations in these states are negatively affected, our financial results and future prospects would be adversely impacted.
- Our working capital requirements have fluctuated in the past and may continue to fluctuate in the future. Any inability to efficiently manage our working capital requirements, including timely realization of trade receivables, may adversely affect our business, financial condition, cash flows and results of operations.
- Our financial condition could be materially and adversely affected if we fail to secure new government and PSU projects
- Any increase in the cost of, or a shortfall in the supply of IT Equipment's, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition
- Our success depends largely upon the knowledge and experience of our Promoters. Any loss of our Promoters and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition
- A significant portion of our assets comprises trade receivables. Any delay in realization, inability to recover outstanding dues, or deterioration in the creditworthiness of our customers may adversely affect our liquidity, cash flows, financial condition and results of operations.
- Our competitive position and future growth depend on our ability to adapt to evolving technologies and customer requirements in a highly competitive IT infrastructure and solutions market.
- We have experienced negative cash flows in the past three financial years. Any negative cash flows in the future would adversely affect our results of operations and financial condition.
- Our Company's success depends largely upon its skilled professionals and its ability to attract and retain these personnel. The industry where our Company operates requires highly skilled and technical employee.
- Our Registered Office and our Branch Office from where we operate is not owned by us.
