Particulars	At Floor Price of ₹ 1,065 per Equity Share		At Cap Price of ₹ 1,119 per Equity Share	
	Up to no. of Equity Shares of face value of ₹ 10 each	Up to Amount (In ₹ Million)	Up to no. of Equity Shares of face value of ₹ 10 each	Up to Amount (In ₹ Million)
Fresh Issue	270,000,000	287,262.94*	270,000,000	301,876.48*
Post Issue Market Capitalization	9,269,036,830	9,807,617.83	9,209,830,830	10,304,905.50

* Considers the impact of Employee Discount of ₹ 54 per Equity Share

IN MAKING AN INVESTMENT DECISION, POTENTIAL INVESTORS MUST RELY ONLY ON THE INFORMATION INCLUDED IN THE RED HERRING PROSPECTUS AND THE TERMS OF THE ISSUE, INCLUDING THE RISKS INVOLVED AND NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION ABOUT THE ISSUE AVAILABLE IN ANY MANNER. IN RELATION TO PRICE BAND, POTENTIAL INVESTORS SHOULD ONLY REFER TO THIS PRICE BAND ADVERTISEMENT AND SHOULD NOT RELY ON ANY MEDIA ARTICLES / REPORTS IN RELATION TO THE COMPANY AS THESE ARE NOT ENDORSED, PUBLISHED OR CONFIRMED EITHER BY THE COMPANY OR THE BOOK RUNNING LEAD MANAGERS TO THE ISSUE ("BRLMs").

In accordance with the recommendations of the Committee of Independent Directors of our Company, pursuant to their resolution dated October 14, 2026, the above Price Band is justified based on quantitative factors (KPIs) disclosed in the "Basis for Issue Price" section on page 126 of the RHP vis-à-vis the weighted average cost of acquisition ("WACA") of primary issuances / secondary transactions as disclosed in "Basis for Issue Price" section on page 126 of the RHP and provided below in the advertisement and other relevant factors.

RISK TO INVESTORS

For details refer to the section titled "Risk Factors" section on page 30 of the RHP.

1. Risk relating to telecommunication license and spectrum: The unified licence for providing telecom services held by Reliance Jio Infocomm Limited ("RJIL") across circles in India is due for renewal in October 2033. Further, the spectrum held by RJIL is valid for a period of 20 years with the majority of the spectrum expiring between 2041 and 2042. Any inability to maintain or renew such licences or to successfully bid for any spectrum required for our operations, could have a material adverse impact on our business, financial condition and results of operations.

2. **Dependence on Reliance Industries Limited, Reliance Retail Limited and other Reliance Group entities:** The Company and its subsidiaries have entered into various non-exclusive agreements with the Promoter, Reliance Retail Limited, a subsidiary of the Promoter and other Reliance Group entities for certain key aspects of the business. Disruption of these arrangements could significantly impact our business, financial condition and results of operations. The following table provides an overview of our significant transactions with the Promoter, Reliance Retail Limited and Sanmina-SCI India Private Limited, for the periods/Fiscals indicated.

Particulars	Parent ⁽¹⁾ / fellow subsidiary / joint venture of the Parent	Three months ended June 30,		Fiscal		
		2026	2025	2026	2025	2024
		(In ₹ million, unless otherwise indicated)				
Purchase of Property, Plant and Equipment and Other Intangible Assets	Parent ⁽¹⁾ (A)	19,440	14,237	39,040	37,099	62,248

Network Operating Expenses	Parent ⁽¹⁾ (O)	3,131	4,312	18,761	15,807	15,388
	As a percentage of Total Expenses (P = O/ W)	1.05%	1.65%	1.71%	1.68%	1.89%
Selling and Distribution Expenses	Parent ⁽¹⁾ (Q)	-	-	-	6,299	9,449
	As a percentage of Total Expenses (R = Q/ W)	-	-	-	0.67%	1.16%
	Reliance Retail Limited (S)	10,527	11,858	43,551	35,158	30,008
	As a percentage of Total Expenses (T = S/ W)	3.54%	4.54%	3.98%	3.73%	3.89%
Cash Capex ⁽³⁾ (U)		41,838	120,481	341,843	442,680	535,090
Revenue from Operations (V)		391,729	350,323	1,468,853	1,282,184	1,095,561
Total Expenses (W)		297,708	261,350	1,094,060	942,057	813,674

Notes:

⁽¹⁾ Parent, in this table, means the Promoter.

⁽²⁾ Recharge routers sold to Reliance Retail Limited are accounted as 'Advance against services' which is disclosed as a related party transaction under the head 'Revenue received in advance'. When Reliance Retail Limited or its distributor sub-distributor further sells the routers to our customers by way of recharge to the digital connectivity services, RJIL recognises such transfer as 'Deferred revenue' and therefore, based on the type of tariff plan, it is accounted as operating revenue in the profit & loss account. In light of the above, revenue received in advance has not been presented as a percentage of revenue from operations.

⁽³⁾ Cash Capex refers to the cash outflow towards expenditure for property, plant and equipment, spectrum and other intangible assets less proceeds from disposal of property, plant and equipment and other intangible assets.

3. **Dependency on Reliance Retail Limited for distribution of prepaid connectivity services:** RJIL has a master distribution agreement and a master collection agreement with RRL. RRL is the sole distributor of our pre-paid connectivity services. Our revenue from pre-paid connectivity services constituted 78.37%, 77.88%, 77.08%, 78.57% and 79.35% of our consolidated Revenue from Operations for the three months period ended June 30, 2026, June 30, 2025 and Fiscals 2026, 2025 and 2024, respectively. Any disruption in this relationship or distribution channel could adversely impact our business, financial condition and results of operations. The following table provides the details of the Revenue Received in Advance attributed to the above arrangement with RRL:

Particulars	Three months ended / As of June 30		Fiscal / As of March 31		
	2026	2025	2026	2025	2024
	(In ₹ millions)				
Revenue Received in Advance	292,480	271,663	1,129,351	1,023,958	890,587

4. **Dependency on RJIL that contributes significantly to our Revenue from Operations, EBITDA and PAT and KPIs relating to digital connectivity services:** RJIL contributed significantly to our Revenue from Operations, EBITDA and PAT in periods / Fiscals as indicated below:

Fiscals / period	RJIL's revenue from operations (in ₹ million)	% of our consolidated Revenue from Operations	RJIL's EBITDA (in ₹ million)	% of our consolidated EBITDA	RJIL's profit after tax (in ₹ million)	% of our consolidated PAT
Three months ended June 30, 2026	342,121	87.34%	195,904	93.89%	71,689	92.31%
Three months ended June 30, 2025	305,821	88.15%	173,813	95.40%	67,110	94.38%
Fiscal 2026	1,285,714	87.74%	723,544	94.86%	281,732	93.76%
Fiscal 2025	1,141,413	89.02%	612,334	95.42%	247,948	94.97%
Fiscal 2024	1,001,194	91.38%	528,784	96.21%	204,656	95.53%

Note: The financial information of RJIL, provided above is on a standalone basis.

Any material adverse impact on the business, financial conditions or results of operations of RJIL would have a corresponding material adverse impact on our consolidated business, financial condition and results of operations. Further, while we operate as a technology platform, our key operational indicators ("KPIs") are primarily pertaining to our digital connectivity services provided by RJIL, and do not reflect the technology platform specific metrics. Our competitors may perform more favourably on certain operational or financial KPIs, which could affect our competitive position. For details of comparison of the KPIs of our Company with listed peers, see "Basis for Issue Price - Comparison of KPIs with Listed Industry Peers" on page 135 of the RHP.

5. **Network, Infrastructure and Service Disruption Risk:** The uninterrupted performance, reliability and availability of our network, passive infrastructure, technology, products and services are critical to our operations and our ability to consistently deliver our digital services. Any disruption to our network, passive infrastructure and technology could impair our ability to ensure consistent performance and deliver uninterrupted customer experience, which could have a material adverse impact on our business, financial condition and results of operations, and could lead to increased churn in our customer base.
6. **Risk related to Technology change:** The connectivity industry is subject to rapid and continuous technological change, and our connectivity infrastructure faces the risk of technological obsolescence. If we are unable to respond to changes in technologies, including for instance, more competitive satellite-based broadband services and the evolving demands of our customers, we may face technological obsolescence, which would have a material adverse impact on our business, financial condition and results of operations.
7. **Risk relating to negative publicity of 'Jio' Brand:** The 'Jio' trademark is owned by the Promoter, and we do not control the use of this trademark by other companies in the Reliance Group. Negative publicity arising from actions outside its control, inability to protect intellectual property or infringement claims could have a material adverse impact on our reputation, business, financial condition and results of operations.
8. **Dependency on a limited group of passive infrastructure service providers:** We rely on a limited set of passive infrastructure service providers for our operations. For instance, of the 390,537 Network Towers used by us for our operations, 174,451 Network Towers are owned by Summit Digital Infrastructure Limited, as of June 30, 2026. Additionally, as of June 30, 2026, we rely on Jio Digital

Fibre Private Limited, for substantially all our optic fibre network requirements (approximately 98%), aside from the last mile fibre network which is owned by RJIL. Any disruption in the availability of these passive infrastructure assets could have an adverse impact on our business, financial condition and results of operations.

9. **Cybersecurity, Data Privacy and Information Security Risk:** Our systems, platforms, network infrastructure, and the services provided by our Promoter and third-party technology partners are exposed to cybersecurity threats, security breaches, operational disruptions, and other technology-related risks. Any such incident or disruption could impair our operations, compromise data security, increase costs, expose us to regulatory and legal liabilities, and adversely affect our business, results of operations, financial condition, and reputation.
10. **Artificial Intelligence ("AI") and Machine Learning ("ML") Technologies Related Risk:** We rely on AI and ML technologies across our operations, including for network automation through our proprietary JioBrain platform, customer engagement and service delivery. The deployment of AI and ML technologies across our operations may not yield the desired results. Further, reliance on AI/ML technologies may expose us to inherent risks pertaining to algorithmic bias and model errors leading to inaccurate or biased outputs, which may cause reputational harm and adversely impact our business, financial condition and results of operations.
11. Our Price/Earning (P/E) ratio based on diluted EPS for Financial Year 2025 at the upper end of the price band is 33.31 as compared to the average industry peer group P/E ratio of 22.35, as of October 13, 2026.
12. Weighted Average Return on Average Net Worth for Financial Year ended 2026, 2025 and 2024 is 9.04%. Return on Average Net Worth for the three months ended June 30, 2026, and June 30, 2025 is 2.30% and 2.31% respectively (unannualized).
13. Weighted average cost of acquisition of all Equity Shares transacted in one year, 18 months and three years preceding the date of the RHP:

Period	Weighted average cost of Acquisition (in ₹)	Cap Price is 'X' times the weighted average cost of acquisition*	Range of acquisition price per Equity Shares: lowest price - highest price (in ₹)
Last one year / 18 months/ 3 years	N.A.	N.A.	N.A.

*As certified by D T S & Associates LLP, Chartered Accountants (FRN 142412W/W/100595), by way of their certificate dated October 14, 2026, (UDIN: 26126430/YE6/P/07581).

Note: No Equity Shares were transacted in the last one year, 18 months and three years preceding the date of the Red Herring Prospectus.

14. The 19 BRUMs associated with the Issue have handled 160 public issues in the past three years, out of which 46 issues have closed below the issue price on the listing date

AVAILABILITY OF THE OUR APPLICATION TERMS

[illegible]

Place : Mumbai, Maharashtra
Date : October 14, 2026

All capitalized terms used herein and not specifically defined shall have the same meaning as ascribed to them in the RHP.

As Pinterest Limited is preparing, subject to receipt of its sole approvals, material conditions and other considerations, to make an initial public offering of its Equity Shares and has filed the PPF with the SEC on October 14, 2020, the PPF shall be available on the website of the SEC at www.sec.gov or, on the websites of the Stock Exchanges, a SEC filing center and a NYSE automated data center, or on the website of the Company or any of its or the respective subsidiaries of the PPF. Any potential investors or other interested parties, who wish to receive a copy of the PPF, should contact the underwriter or, for details relating to such request, please see the section titled "Risk Factors" on page 20 of the PPF. Potential investors should also see the SEC's PPF and the Stock Exchanges' listing rules, and any other material information that may be filed with the SEC, for further information.

This announcement is not an offer of securities for sale in the United States or elsewhere. This announcement has been prepared for publication in solely one or more jurisdictions and is not for publication or distribution, directly or indirectly, in the United States. The Equity Shares offered in the base issue and in all will not be registered under the U.S. Securities Act of 1933, as amended ("U.S. Securities Act"), or any state securities laws in the United States, and it is not registered, may not be offered or sold within the United States, except pursuant to an exemption therefrom, or in a jurisdiction not subject to the registration requirements of the U.S. Securities Act and applicable state securities laws in the United States. Accordingly, the Equity Shares are being offered and sold ("in the United States only by "qualified institutional buyers" as defined in Rule 144 under the U.S. Securities Act) in transactions exempt from, or not in reliance on, the registration requirements of the U.S. Securities Act, or in reliance on the exemption under the U.S. Securities Act for the sale of securities to qualified institutional investors. These sales are not for resale by the United States or in the United States.

Rice Exports Rise 13% to ₹45,739 cr in April-August

Satoru Ichioka

Kolkata: India's rice exports increased 22.9% to \$65.736 crore in April-August, a growth trend that the industry says the government should help sustain by ensuring policy certainty and timely access to incentives amid tight margins and volatile freight costs.

Reporters have written to the government at a time when the US Department of Agriculture (USDA) has projected a decline in India's rice production to 147 million tonnes in 2025-26 from 154 million tonnes a year earlier due to adverse weather conditions.

India holds a buffer stock of more than 18 million tonnes, which is adequate to meet domestic demand. According to exporters, this surplus allows India to capitalise on a global rice supply gap of 32 million tonnes projected by the USDA for the 2025-27 crop year. With competing rice-producing nations also vying for a larger export share, India's export policy certainty is critical to sustaining India's export momentum.

India had introduced rice-export restrictions in September 2022 to contain domestic price due to concerns over production and supply.

"No incentive matters to an exporter only when it can be accessed, channelled and translated into a real business benefit," said Dev Grewal, national vice-president, Indian Rice Exporters Federation (IREF).

Reporters are seeking a predictable trade policy framework, simpler procedures for claims/incentives, affordable export norms and clarity on the benefits available under trade agreements as India aims to expand overseas shipments and expand into new markets.

The demands will also be discussed at the Shared International Rice Conference 2024, to be held in the last week of October while it will be attended by exporters and inspectors from different countries.

IREF's exports account for \$2-32.64 crore of earnings during April-August, increasing 3.6% year-on-year, while non-IREF exports rose 34.2%, to \$2.15-54 crore. The figures reflect growth in export valuations but volume as the region depends on agricultural conditions.

For exporters, however, government support is critical to translate it to tangible benefits at the business level. The IREF has also emphasised clarity on eligibility, documentation, application procedures and timelines for seeking incentives as well as a better understanding of the products and activities covered under the central and state schemes.

Early Crushing to Shore Up Sugar Supplies Before Diwali

M'rashtira mills to start operations this week as sugar prices start 4%

Jayashree Bhosale

Prase: A quarter of Maharashtra's sugar mills will begin crushing sugarcane this week, a month ahead of schedule, to boost domestic supplies before Diwali, as sugar prices rise amid shrinking availability and farmers' extremely profitable higher cane prices.

Sugar prices have risen about 4% in the past fortnight, while standing crop is swelling across large areas, raising concerns over crop losses. Freshly produced sugar is expected to reach markets in about a week, said mills.

"It takes four to five days for sugar to get ready for dispatch to the markets after the crushing operations commence. We expect the new sugar to start reaching markets after October 20," said HB Thakur, president, West Indian Sugar Mills Association, which represents private sugar mills from Maharashtra.

The Centre had advised sugar producers to start to advance the crushing operations to meet the increas-

ing sugar availability during the festive period.

For the fortnight beginning October 11, the government has allocated a quota of 1.5 million tonnes. "However, prices have firm ed up as there is not much sugar with the mills," said a miller from Maharashtra, who did not want to be identified.

Some administrative changes and farmers' agitation have delayed the commencement of the mills' operations from the scheduled date of October 15.

"As of Wednesday, about 10 mills had started crushing operations, while a total of 45 mills are expected to begin operations by the end of this month. We expect a total of about 10 to 15 sugar mills to get crushing licenses this week," a senior state sugar official said on condition of anonymity.

According to preliminary estimates, the state government expects a decline of about 10% in sugar production in the 2008-25 season compared to last year's production of 63 million tonnes. However, the fall in sugar production could be higher as large quantities of cane are awaiting the start of

crushing and low-quality sugary cane and old industry licences.

"As the standing crop is large across Maharashtra has started with the farmers are in a hurry to harvest their sugarcane," said Thakur.

The 8,500-member Shetkari Sangathan from Maharashtra and farmers' organisations from Karnataka have intensified their "vasta roko" (strict blockade) campaign on the Maharashtra-Karnataka border demanding a higher price for sugarcane, higher minimum selling price (MSP) for sugar and higher price of Rs 10 per tonne for the Chetty molasses-based ethanol.

The Sangathan has also demanded a sugarcane rate of Rs 1,000 per tonne, including a Rs 200 per tonne government subsidy.

"Farmers are going to suffer because of advancing the crushing operations because the sugar content in the matured sugarcane is low, making them eligible for a lower sugarcane price," said Shetty.

Sugar mills in the districts along the Maharashtra-Karnataka border account for nearly 50% of the country's sugar production, according to Shetty.

Monsoon Deficit Raises Risk of Lower Rabi Crop Acreage

Accra! In some crops could fall 25-30% as water scarcity puts wheat & mustard at risk

Shambhavi Anand

New Delhi: Farmers across several regions may soak back, risk sowing this winter as deficient monsoon rainfall, falling soil moisture and depleted reservoir levels threaten irrigation supplies, and sowing dates of kharif-crops of winter staples such as wheat, paddy and oil seeds.

The potential shortfall comes as the monsoon has been slower to start, with widespread rainfall rising to 70% in September.

Average could decline by 25-30% in some crops, said Suresh Agrawal, president of The Mill Association. Lentils (masur) and gram (chana) could be at risk. Three international wheat varieties, wheat and mustard could suffer the most because they require multiple rounds of irrigation, unlike rice and millets.

Soil moisture levels are below the average of the past decade across several major agricultural states, including Karnataka, Maharashtra, Andhra Pradesh, Telangana, Tamil

Nadu, Rajasthan, Gujarat and Madhya Pradesh, according to a government official.

Parts of northern Bihar are also reporting below-average soil moisture, raising concerns about the extent of winter sowing and farm cashew crops.

The shortfall in soil moisture an irrigation reserves could influence planting decisions in the coming months, particularly in regions where reservoirs depend on rainfall, over-sown and groundwater to sustain winter crops.

Winter crops, a key source of irrigation during the hot season, are also under pressure. A World Bank survey has water stress at 40-50% or less of their levels at the same time last year when it was at 30% or less of their normal storage levels, according to the latest bulletin of the Central Water Commission (CWC).

Of the 54 districts that the India Meteorological Department (IMD) tracks, around 5% have recorded a deficit or largely deficient precipitation compared with the long-term average (LTA), while 7% have recorded normal rainfall and 8% were on the brink, according to the data provided. The Centre and state governments have urged farmers to adopt crop choices with water availability, encouraging those in water-stressed areas to shift towards less water-intensive crops such as pulses and oilseeds.
