Some of the quantitative factors which may form the basis for computing the Offer Price are as follows:

A. Basic and diluted earnings per Equity Share ("EPS")

Financial Year	Basic EPS (in ₹)	Diluted EPS (in ₹)	Weight
Fiscal 2026	(6.69)	(6.69)	3
Fiscal 2025	(1.17)	(1.17)	2
Fiscal 2024	(4.86)	(4.86)	1
Weighted Average EPS	(4.54)	(4.54)	
Three months period ended June 30, 2026*	(0.45)	(0.45)	-
Three months period ended June 30, 2025*	(6.08)	(6.08)	-

- ^{*} Not annualised
- Notes:
- Weighted average = Aggregate of year-wise weighted EPS divided by the aggregate of weights i.e. (EPS x weight) for each year divided by the total of weights.

- F. Comparison of accounting ratios with listed industry peers**
- Global manufacturing capacity is organized through operating models that differ in asset ownership, and coordination intensity. Each model represents a distinct way of converting supplier capability into finished industrial output.
- Vertically Integrated (Captive) Manufacturing:** Under this model, company own and operate dedicated production facilities designed around specific product lines or process capabilities, placing asset ownership primarily within the firm. Production planning, procurement, quality control, and logistics are managed internally within the organization. Supplier relationships exist primarily at the raw-material or subcomponent level, while final assembly and critical processes remain within captive plants. Capacity expansion occurs through direct capital investment, and operational decisions are governed by internal production schedules.
 - Contract Manufacturing:** In this model, a specialized manufacturing firm owns and operates production facilities, while producing goods on behalf of external brands. Asset ownership is concentrated with the manufacturer, whereas product design, intellectual property, branding, and market access remain with the client company. Coordination between the brand and manufacturer is bilateral and contract driven. The brand defines product specifications, quality standards, delivery timelines, and volume forecasts, while the contract manufacturer executes production within agreed parameters. Capacity expansion is driven by long-term client commitments, demand visibility, or aggregation of orders across multiple brands, and typically involves investments in new production lines, automation, geographic expansion, or facility scaling.

- Manufacturing Platform:** In this model, production assets remain owned by independent suppliers, but a centralized platform provides the coordination layer that governs how those assets are utilized. The platform aggregates demand from multiple buyers and allocates work across a distributed supplier network, resulting in high coordination intensity driven by standardized execution protocols and real-time monitoring. Supplier onboarding, quality systems, procurement, and logistics are managed through shared digital infrastructure that provides system-wide visibility and control. The capital architecture remains asset-light at the platform level, with growth achieved by aggregating and optimizing existing supplier capacity rather than through direct ownership of manufacturing assets. Rather than functioning as a passive marketplace, the platform operates as an orchestration layer for distributed manufacturing, synchronizing capacity, financing, and delivery across a multi-tier network.
- We are a technology-led, asset-light manufacturing platform driving production of industrial goods, both in India and globally. We aggregate manufacturing capacity across a network of third-party suppliers and our own facilities into a "universal factory," unified through Zetwerk OS, our proprietary technology backbone. Our customers range across sizes, from innovative startups to mature companies, and across industries, including utilities, renewables, consumer electronics, artificial intelligence infrastructure, aerospace, space & defence, oil & gas, and industrial automation. Accordingly, there are no listed companies in India or globally which operate in a similar business model as ours.

- The following provides an explanation to the Cap Price being 0.87 times of weighted average cost of acquisition of Equity Shares that were issued by our Company or acquired or sold by the Selling Shareholders or other shareholders with rights to nominate directors on our Board by way of primary and secondary transactions in the last three full Financial Years preceding the date of the Red Herring Prospectus compared to our Company's KPIs for the three months period ended June 30, 2026 and June 30, 2025 and for the Financial Years 2026, 2025 and 2024.
- Our end-to-end manufacturing platform, powered by our proprietary Zetwerk OS, transforms fragmented capacity across 6,979 third-party suppliers in 26 countries, including India, and our 26 manufacturing facilities across four countries, including India, in Fiscal 2026, into a unified network that allows us to serve multiple industries, manufacture diverse product types, and operate across geographies reliably and at scale.
 - We have built a broad base of suppliers across 26 countries, expanding from a solely third-party supplier model to a hybrid model incorporating both third parties and our own manufacturing capabilities.
 - Our hybrid, technology-driven manufacturing platform combines the advantages of both models, allowing us to benefit from the scalability of a distributed network, with capacity accessed primarily through third-party manufacturers without a corresponding increase in invested capital, together with the control of selective own capacity for complex, high-value manufacturing. Our selective expansion into own manufacturing facilities has also allowed us to capture higher margins.
 - Many of our customer relationships evolve from single-order engagements to multi-year contracts. This is demonstrated by the Revenue from Repeat Customers in our Manufacturing Business which was 89.26% in the three months ended June 30, 2026, 95.36% in the three months ended June 30, 2025, 80.15% in Fiscal 2026, 84.80% in Fiscal 2025 and 78.11% in Fiscal 2024. Our customer retention is reflected in our Fiscal 2023 to Fiscal 2026 median NRR of 128.85% (NRR stood at 175.49% in Fiscal 2023, 137.46% in Fiscal 2024, 87.13% in Fiscal 2025 and 120.24% in Fiscal 2026).
 - Our Manufacturing Order Book as of March 31, 2025, together with Manufacturing New Orders for Fiscal 2026, represented approximately 2.5 times our Segment Revenue from Manufacturing Business for Fiscal 2026.
 - The unified, technology-first design of our manufacturing platform supports the addition of new value-added services on top of our core manufacturing capabilities. This ecosystem of services strengthens our customer proposition by addressing structural gaps in the manufacturing ecosystem, unlocking capabilities that individual customers cannot access on their own.
