## **INTERNAL & BUSINESS RISK FACTORS**

### **1. Our revenue is significantly dependent on a key brand relationship, and any adverse change in this relationship could materially affect our business, financial condition, and results of operations.**

A substantial portion of our revenue is derived from our longstanding relationship with Brand 1. In nine months period ended December 31, 2025 and Financial Years 2024-25, 2023-24, and 2022-23, our revenue from the sale and distribution of Brand 1 products accounted for approximately 45.68%, 72.05%, 94.00%, and 99.66% of our total revenue from

operations, respectively. Further, out of the 19 retail stores operated by the Company, 16 of such stores are exclusive brand outlets of Brand 1 products. Developing this relationship required significant time and effort, and a large part of our business success depends on our ability to continue offering products of such key brands to our customers. Our brand-wise revenue bifurcation for the Financial Years 2024-25, 2023-24 and 2022-23, is stated below.

**2. The Restated Financial Statements have been provided by Peer Reviewed Chartered Accountants who is were not the Statutory Auditor of our Company for FY 2022-23.**

The Restated Financial Statements of our Company for the nine months period ended on December 31, 2025 and Financial Year ended on March 31, 2025, March 31, 2024 and March 31, 2023, have been provided by Manish Pandey & Associates, Chartered Accountants, who are a Peer Reviewed firm but were not the Statutory Auditors of our Company for FY 2022-23 and before.

The Financial Statements of our Company for Financial Years ended on March 31, 2023 have been audited by KNA Associates, Chartered Accountants who were the Statutory Auditor of our Company for the said period.

**3. A significant portion of our revenue is generated from our top ten customers, and the loss of one or more such customers, the deterioration of their financial condition or prospects, or a reduction in their demand for our products could adversely affect our business, revenues, profitability, financial condition and cash flows.**

Our Company derives significant portion of revenue from the top ten customers, which constituted for 69.31% of the revenue in the period ended March 31, 2025, resulting in high dependency on the top ten customers. The revenue bifurcation of our top ten customers for the nine months period ended on December 31, 2025 and the Financial Years 2024-25, 2023-24 and 2022-23, is stated below.

We are dependent on such customers for a certain portion of our revenues. There can be no assurance that all such top customers will continue to place similar orders with us in the future. Although we have not experienced any material reduction in orders from our key customers as of date of this Red Herring Prospectus, a significant decrease in business from any such key customer, whether due to circumstances specific to such customer or adverse market conditions affecting the industry or the economic environment generally, such as the COVID-19 pandemic, may materially and adversely affect our business, results of operations and financial condition.

Our reliance on a selected group of customers may also constrain our ability to negotiate our arrangements, which may have an impact on our profit margins and financial performance. We cannot assure you that we will be able to maintain historic levels of business from our significant customers, or that we will be able to significantly reduce customer concentration in the future. In addition, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their purchasing of the products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such

customers. The loss of one or more of our significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. Further, to sustain or increase our revenue, we must add new customers and encourage existing customers to allocate a greater portion of their procurement spends to us.

**4. Our revenue is highly dependent on sale of footwear products, and any adverse developments in this product category may materially affect our business, financial condition and results of operations.**

Our business comprises sale of footwear, apparel and accessories. A significant portion of our revenue is derived from the sale of footwear products. In the for the nine months period ended on December 31, 2025 and Financial Year 2024-25, 203-24 and 2022-23, revenue from footwear products contributed approximately 72%, 85%, 96% and 89%, respectively, of our total revenue from operations. This concentration exposes us to risks associated with demand, consumer preferences and competitive dynamics specific to the footwear segment. The revenue bifurcation of each product segment for the for the nine months period ended on December 31, 2025 and Financial Years ended March 31, 2025, March 31, 2024 and March 31, 2023 is stated below.

Any adverse changes in consumer preferences, fashion trends, pricing pressures, increased competition, or disruptions in supply chain impacting footwear products may directly affect our sales performance. In addition, regulatory changes, higher import duties or restrictions on raw material availability could adversely impact our footwear segment, thereby affecting our overall business performance. Although we also sell apparel and accessories, these categories presently contribute a relatively smaller share of our total revenue. Consequently, any downturn in the footwear segment may not be adequately offset by revenue from other product categories, and our cash flows, financial condition and results of operations could be materially and adversely affected.

**5. We rely on non-exclusive supply, license and distribution arrangements with multiple international brands, and any adverse changes in these arrangements may materially affect our business, operations, and financial results.**

Our Company's success is closely tied to the strength and reputation of the international footwear and athleisure brands we sell and / or distribute for multiple brands. We operate under non-exclusive distribution agreements, which permit these brands to appoint other retailers and distributors, including our direct competitors, for the same products and territories. This creates risks of increased competition, pricing pressures, and potential erosion of market share, which may adversely affect our revenue and profitability.

In addition, these agreements are typically subject to periodic renewal, modification, and termination at the discretion of the brand owners, and there can be no assurance that they will be renewed on favourable terms, or renewed at all. The brand owners also impose specific compliance requirements, including adherence to quality standards, pricing structures, and marketing restrictions. Failure to comply with such requirements may result in penalties, disputes, or termination of the agreement.

Our performance is further dependent on the marketing strategies, brand positioning, and product demand of these brands. Any adverse change in such strategies, reduction in demand, or withdrawal of products from the market could negatively impact our sales. Moreover, since we represent multiple brands under non-exclusive arrangements, there is a risk of brand dilution or conflict of interest, which could affect our positioning and customer perception in the market. While we have not encountered such issues in the past, we cannot assure you that similar risks will not materialize in the future. Any adverse developments in our relationships with these brands, or changes in their strategic direction, could materially and adversely impact our business, operations, and financial performance.

**6. We rely on third-party suppliers for purchase of finished products for our retail sales and distribution business. We have not entered into any long-term supply agreements with them, except with the brand-owner suppliers. Any shortage and cessation in supply could adversely affect our business and results of operations.**

We rely heavily on third-party suppliers for purchase of finished products for our retail sales and distribution business. Our business involves both retail sales and distribution, and contract manufacturing of branded products, and while we are dependent on such suppliers to supply finished products, we only have long-term agreements with our brand-owner suppliers and not with other suppliers. Instead, we rely on purchase orders to acquire finished products.

Although our supplier base has diversified over the years, we are significantly dependent on certain suppliers. Following table sets forth the purchases made from the top ten suppliers of our Company for the nine months period ended on December 31, 2025 and the Financial Years 2024-25, 2023-24 and 2022-23.

The supply of these goods can be volatile due to factors beyond our control, such as fluctuations in fabrics and cotton prices, crude oil prices, general economic and political conditions, tariff disputes, transportation issues, and unrest, natural disasters, competition, import duties, infectious disease outbreaks like COVID-19, among others. These variables are inherently uncertain, irrespective of the methodologies and assumptions we may use.

Discontinuation of supply or failure of suppliers to adhere to delivery schedules or quality standards could disrupt production and adversely affect our business and results of operations. While we have not experienced any significant disruptions in supply or material quality issues from our suppliers as of the date of this Red Herring Prospectus, there is no assurance that demand, capacity limitations, or other problems experienced by our suppliers will not result in occasional shortages or delays in supply of finished products. If we face a significant or prolonged shortage from any supplier and cannot procure such goods from alternative sources, we would be unable to deliver products to customers on time. This would negatively impact our sales, margins, and customer relations.

Our suppliers may be unable to provide us with a sufficient quantity of the goods as desired by us at prices acceptable to us. Additionally, we may not be able to renegotiate our pricing or delivery terms on reasonable terms or find suitable alternative suppliers in the future, which could negatively impact our business, financial condition, cash flows, and results of operations. Any extended interruption in the supply of finished products could disrupt our operations and materially affect our business, results of operations, and financial condition. Although we believe we have maintained stable relationships with our suppliers in the past and have not faced any significant supply-side disruptions as of the date of this Red Herring Prospectus, we cannot assure that we will be able to source adequate quantities of supplies of the goods in a timely manner from our existing suppliers in the future or find alternative suppliers that meet our price and quality requirements.

**7. We are yet to identify the exact locations or properties for the setting up EBOs and MBOs, for which we intend to utilise the amount from Net Proceeds. If we are unable to find suitable locations or if the lease or license payments for these locations are in excess of our estimates, our operations and financial conditions may be adversely impacted**

The exact locations or properties for establishing these new outlets have yet to be finalized. The selection and acquisition of suitable store locations are critical to the successful implementation of the Company's expansion strategy. Despite undertaking a comprehensive site selection process which includes demographic analysis, lease rental assessments, footfall estimates, and demand forecasting, these locations remain indicative and will require final approvals, including Brand approval for EBOs and Board approval for MBOs, in addition to the negotiation of lease or license agreements.

There is no assurance that the Company will be able to secure viable locations on commercially acceptable terms or within the anticipated timelines. Potential delays or inability to finalize locations, cost overruns on leasing or fit-out expenses, as well as regulatory, operational or demographic changes could materially impact the Company's planned

expansion. Such factors may adversely affect the Company's ability to effectively utilize the Net Proceeds, delay new store openings, limit market penetration growth, and thereby impact financial performance and return on investment.

Investors should carefully consider the risk that any failure to identify, acquire and commence operation at suitable retail locations may have a material and adverse effect on the Company's business, prospects, results of operations, and financial condition.

**8. *Certain terms of our supply, license and distribution agreements executed with brands may adversely affect our business and financial performance.***

We execute supply, license, and distribution agreements with global and domestic brands for the conduct of our business. These agreements impose material obligations on our Company, while granting significant rights and flexibilities to the brands. Certain provisions of such contracts that could materially affect our operations are listed below.

- (i) Some brand agreements allow the brands to terminate with short notice or without assigning any reason. Such termination could disrupt our revenue streams and require us to make significant adjustments in sourcing and sales.
- (ii) Certain brand agreements require us to provide forecasts, meet minimum purchase commitments, inventory holding levels and guaranteed royalty payments, payable even if we fail to sell or distribute products during the term. Failure to meet these obligations could lead to penalties, delayed delivery, vendor substitution, termination, or loss of commercial benefits.
- (iii) One of our brand agreements require us to secure payment obligations with an irrevocable standby letter of credit in favor of the brand. Failure to furnish this within prescribed timelines could constitute breach of the agreement, accelerating our financial liability.
- (iv) We are required under several of our brand agreements to indemnify the brands for claims, losses, or damages, without a contractual cap on liability. Such indemnification obligations are payable on demand and may expose us to substantial and unforeseen financial liabilities.
- (v) Some of our brand agreements are subject to foreign governing law and provide for arbitration or dispute resolution in jurisdictions outside India, including courts of Dubai International Financial Centre and Zurich and arbitration through Singapore International Arbitration Centre. This may increase legal costs, prolong dispute resolution timelines, and expose us to unfamiliar legal systems, adversely impacting our ability to enforce contractual rights.
- (vi) Some of our brand agreements allow brands to revise pricing, amend minimum purchase commitments, or impose additional performance standards at their discretion. Such unilateral amendments could reduce our competitiveness, increase procurement costs, and negatively affect margins.
- (vii) Under one of our brand agreements, the brand reserves the right to publicly announce termination of our arrangement. Any such disclosure could adversely impact our reputation in the market, reduce customer confidence, and affect our ability to secure future partnerships.
- (viii) Certain brand agreements impose strict obligations relating to brand protection, sales channel usage and customer service standards. Breach of these obligations may result in immediate cessation of distribution rights, liquidated damages, or penalties, which may adversely impact our revenues and goodwill.
- (ix) Under our agreements with few brands, the brands retain the discretion to discontinue manufacturing or alter global sales strategies, and to enter collaborations with other partners in India. Such actions could reduce or eliminate our business opportunities under these brands.
- (x) Under one of our brand agreements, we may be called upon to repurchase or buy back unsold products at discounted prices if such products are returned, remain unsold, or do not meet agreed sales thresholds. Enforcement of such obligations could expose us to inventory risks, working capital strain, and potential financial losses.
- (xi) Our agreement with one of the brands does not treat delivery timelines as being of the essence of the contract. Accordingly, delays in supply would not constitute a breach by the brand. Any such delays may result in product shortages, adversely affecting our sales, customer relationships, and overall business performance.

Further, as the products of Brand 1 contribute significantly to our total revenue from operations, any adverse event under our agreements with Brand 1 could materially and adversely affect our business, financial condition, and results of operations. Additionally, our arrangement for Brand 1 products is dependent on the license granted by corporate entity of Brand 1 based in USA to us. In the event the said license is terminated, our agreement will automatically terminate, requiring us to immediately cease sales of Brand 1 products in the authorized territory.

While we have not faced material adverse events under our current brand agreements, there can be no assurance that these

arrangements will continue on the same terms in the future. Any non-renewal, early termination, unfavourable modification of contractual obligations, or non-compliance with brands' obligations could disrupt our business operations, reduce our revenue streams, and adversely impact our financial performance, reputation, and long-term growth prospects.

**9. Our business depends significantly on the contracts with e-commerce marketplace customers, and any non-compliance, penalties, or termination under such agreements could adversely affect our operations, financial condition, and results of operations.**

Our business operations are significantly dependent on contractual arrangements entered into with our customers, including large e-commerce platforms and retailers. These agreements typically impose obligations on us relating to timely supply, adherence to quality specifications, compliance with applicable laws, and other performance-related conditions. Non-fulfilment of these obligations may expose us to penalties, claims, or termination of such contracts. For instance, one of such agreements includes a penalty structure for cancellation of orders, whereas another such agreement provides for penalties in the event of delayed delivery. These provisions expose us to the risk of financial liabilities in the event of non-performance or delays, irrespective of whether such lapses arise due to factors within or beyond our control, such as supply chain disruptions, delays by third-party logistics providers, or unforeseen operational challenges.

Furthermore, these agreements are typically terminable by customers under specified circumstances, which may include breach of obligations, failure to meet service levels, or other events deemed material by the customer. Termination of such contracts could result in the loss of a key customer relationship and materially impact our revenues. Our customer agreements may also require compliance with ongoing obligations, such as audit rights, confidentiality, data protection, marketing restrictions, and reporting requirements. Failure to adhere to any of these obligations could result in adverse actions including penalties, withholding of payments, suspension of services, or termination of contracts. Additionally, many of our customers are large corporations with strong bargaining power, which may allow them to impose onerous terms or unilaterally modify commercial arrangements. This imbalance in bargaining power places us at a competitive disadvantage and increases our exposure to risks of unfavourable terms or stricter compliance requirements in the future. The table below provides a breakdown of revenue generated across different business verticals of the Company, further depicting each vertical's contribution to the Company's overall revenue.

While we have not experienced any material penalties, disputes, or adverse consequences under our customer contracts to date, there can be no assurance that such events will not occur going forward. For further details, please refer chapter titled “*Our Business*” on page 151 of this Red Herring Prospectus.

**10. Inability to Successfully Establish and Operate Exclusive Brand Outlet (EBO) Retail Stores**

The Company proposes to expand its retail presence by establishing Exclusive Brand Outlet (“EBO”) retail stores in the future. However, the opening and successful operation of such EBO stores is subject to various risks and uncertainties, including identification of suitable locations, execution of lease agreements on commercially viable terms, availability of adequate capital expenditure, timely receipt of statutory and local approvals, recruitment and retention of trained manpower, and prevailing market and consumer demand conditions. There can be no assurance that the Company will be able to open the proposed EBO retail stores as planned or within the envisaged timelines, or at all. Any delay or failure in establishing such EBO stores, or inability to operate them profitably, may adversely affect the Company's growth strategy, brand visibility, revenues, cash flows, and overall financial performance.

**11. Certain agreements entered into by our Company, including agreements and arrangements in respect of properties from which we operate, may be inadequately stamped or, unregistered, instead of registered lease agreements. Consequently, such documents may be rendered inadmissible as evidence in legal proceedings, may not be legally enforceable, and may expose the Company to penalties, operational risks, and other regulatory or legal consequences.**

Our Company has entered into various agreements, including lease deeds, license agreements, rent agreements and possession agreements, for the use of properties as retail stores and a warehouse. Certain such agreements are inadequately stamped and/or unregistered. Under applicable laws, non-registration or inadequate stamping may render these agreements inadmissible as evidence and unenforceable unless the applicable stamp duty and penalties are paid, which could expose the Company to disputes, eviction proceedings, or adverse claims by landlords or third parties. Company have experienced difficulties in obtaining such consent in past. As a result, some agreements may continue to remain unregistered or inadequately stamped and the company is still in process to get some unregistered agreements registered. There may be no assurance that any delays, penalties or disputes arising in the future from such inadequately stamped or unregistered agreements will not adversely affect our business, financial condition and results of operations.

Our revenue concentration in Delhi heightens our exposure to competitive pressures, economic shifts, and demographic changes specific to the concerned region. While we have not experienced any material adverse impact due to such regional revenue concentration as of the date of this Red Herring Prospectus, adverse developments in these areas could potentially affect our business prospects, financial stability, and operational outcomes. As we explore opportunities to expand into new markets and geographical regions, we face competition not only from national players but also from entrenched local competitors. Local players often possess established market presence, familiarity with regional business practices, and strong relationships with distributors, government authorities, and suppliers. These factors may grant them competitive advantages over us, potentially impacting our ability to successfully penetrate new markets and regions. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance

**13. We have outsourced our manufacturing activities to third parties without exclusivity arrangements. Any inability to obtain sufficient quantities of manufactured products of the requisite quality in a timely manner and at**

***acceptable prices, or any slowdown, shutdown, or disruption in the operations and performance of these third parties could adversely affect our business, results of operations, and financial condition.***

While our Company is primarily engaged in the business of sale and distribution of branded products, we also undertake manufacturing of the approved products of two of the leading brands through third-party contract manufacturers. We rely on such contract manufacturers to supply us with the requisite quantity of products as per our orders. We have executed contracts with certain third-party manufacturing partners for this purpose. However, it cannot be assured that they will do so in a timely manner, or at all. The third parties may decide not to accept our future orders on the same or similar terms, or at all. We face the risk of competitors offering better terms, which may cause third parties to cater to our competitors alongside, or even instead of us.

As per the contract manufacturing agreements entered into by the Company, the manufacturers are obligated to submit pre-production samples to the Company for its review and approval and ensure that the products are equal in quality, workmanship, appearance, fit, design and material to the pre-production samples approved by the Company. Upon delivery of products to the Company, the Company conducts an inspection within 7 days of its delivery. Any defective product found during such inspection is returned to the manufacturer and a debit note for the same is issued to that effect by the Company. In the event the Company elects to obtain a replacement of the defective products, the manufacturer is obligated to replace defective products at its own expense. The Company may choose to buy defective products at a discount but is not obligated to do so. Any destruction or disposal of defective products by the manufacturer must be done as per directions of the Company and written confirmation of the same must be provided to the Company.

Additionally, such contract manufacturing facilities are subject to various operating risks, such as performance below expected levels of efficiency, excessive wastage of raw materials, production delays, decreases in product quality, labour disputes, natural disasters, industrial accidents, power supply interruptions, and statutory and regulatory restrictions. Any non-compliance by our third-party manufacturers with applicable laws, which may result in a shutdown of their facilities, could lead to delays or non-availability of our product deliveries.

We cannot ensure that the processes carried out by the third parties will be of satisfactory quality. Any failure to maintain quality standards may damage our reputation and adversely affect our business, results of operations, and financial condition. Defects in the products manufactured could expose us to product liability, damage our reputation, and reduce demand for our products. If our third-party manufacturing partners perform unsatisfactorily, significantly reduce the volume of products manufactured, substantially increase prices, or terminate their business relationship with us, the cost and time required to manufacture our products would increase. We may also need to replace our existing manufacturers or take other remedial actions. While we have not experienced any such events as of the date of this Red Herring Prospectus, there can be no assurance that our third-party manufacturers will continue to provide uninterrupted services or refrain from catering to competitors on more favourable terms, and any withdrawal of services, decline in product quality, or adverse developments affecting their operations may materially and adversely impact our business, results of operations, and future prospects.

***14. If we are unable to identify customer demand and preferences and gain customer acceptance for our own and licensed brand, our business, results of operations and financial condition may be adversely affected.***

Our continued success relies on sustaining strong demand for the brands we offer. Challenges such as declining demand, inaccurate forecasting, or market fluctuations could negatively affect sales, lead to excess inventory, and require significant discounting in both existing and potential markets. To stay competitive, we must proactively anticipate and respond to evolving customer preferences. Securing customer acceptance for both current and future products is crucial. If we fail to accurately predict market trends or adjust our portfolio of licensed products in a timely manner, we risk losing customers or encountering increased pricing pressures. We aim to lead the market by driving consumer interest and setting trends through the innovation of our design and product development teams. While we have not faced such challenges in the past, we cannot guarantee that they will not arise in the future.

Although there are checks to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we over-stock inventory, our capital requirements will increase, and we will incur additional financing costs and render our stock obsolete. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any material mismatch between our forecast and actual sales could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation. Stock of inventory may also be impacted by disruptions faced in the transportation of our products or adverse developments affecting our warehouses and the inventory stocked therein. However, there have been no instances in the past pertaining to the events stated above.

***15. Our lack of dedicated warehousing facilities and our ability to maintain an optimal inventory proportionally may affect the Company's ability to manage inventory efficiently and meet customer demand.***

We do not operate dedicated warehousing facilities, other than our central warehouse in Delhi and bonded warehouses for imported products. For all other products, we rely primarily on direct dispatches from our stores. Our ability to manage inventory efficiently and ensure timely availability of products depends on having adequate storage and distribution infrastructure. Since we do not maintain our own warehouses except the central warehouse, we have limited flexibility in holding stock, responding to fluctuations in customer demand, and optimising our supply chain.

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in such identification could result in either surplus stock, which we may not be able to sell in a timely manner, or no stock at all, or under stocking, which will affect our ability to meet customer demand. We plan our inventory and estimate our sales based on the forecast, demand and requirements for our products based on past data. Any mismatch in demand and supply may result in either shortage, which could adversely affect our ability to fulfil customer requirements, or lost opportunities due to unavailability of stock. Further, the use of bonded warehouses for imported products introduces additional dependencies on external processes and regulatory clearances, which may delay the availability of goods for sale. Such reliance could impact our turnaround time and affect our ability to respond quickly to market demand. While our current arrangements have supported our operations, there can be no assurance that the absence of dedicated warehousing facilities will not adversely affect our business, results of operations, and financial condition in the future.

***16. Our business is fully dependent on the continued success and reputation of our third-party brands globally, and any negative impact on these brands, or a failure by us or owners of these brands to protect them, as well as other intellectual property rights and proprietary information, may adversely affect our business, results of operations and financial condition.***

Our business is fully dependent on the continued success, reputation, and global positioning of the third-party brands we distribute. The sustainability of our operations and growth prospects are directly tied to the performance of these brands globally, including their financial health, marketing strategies, product innovation, competitive standing, and overall consumer acceptance. We do not have control over the management, operations, or strategic decisions of these brands outside the jurisdictions and outlets operated by us. Consequently, any factor adversely affecting these brands, which is beyond our control, could materially and adversely impact our business. Such factors may include negative publicity or loss of reputation due to quality concerns, product recalls, operational failures, regulatory investigations, legal disputes, or adverse changes in brand positioning or consumer perception. In addition, under the terms of our material agreements, we are obligated to safeguard the intellectual property rights and proprietary information of these brands.

While we take measures to protect such rights, there can be no assurance that such measures will always be adequate. Any unauthorized use, leakage of proprietary information, or third-party infringement could harm the value of these brands and, by extension, our business. Moreover, the brand owners may deem any actual or perceived misuse of their brand name, intellectual property, or goodwill, whether intentional or otherwise, by us as a breach of our contractual obligations, leading to termination of our arrangements. Any such termination or deterioration in our relationships with these brands would have a direct and material adverse impact on our business, revenues, profitability, and market position. Any adverse developments affecting the reputation, operations, or consumer acceptance of these global brands could cause loss of customers, reduced sales, heightened regulatory scrutiny, and reputational damage to us, all of which would adversely affect our business, results of operations, and financial condition. However, there have been no instances in the past pertaining to the events stated above.

***17. The increase in PAT margins in FY 2024 and FY 2025 may not be sustainable and could adversely affect future profitability***

Our profit increased ₹ 1,268 lakhs from ₹ 827.42 lakhs in FY 2023-24 to ₹ 2,095.42 lakhs in FY 2024-25, representing an increase of 153.25%. This increase was mainly due to increased revenue and improved operational efficiency, which outpaced the growth in expenses. However, the continued sustenance of these high PAT margins is subject to a number of factors and we cannot assure you that the increase in numbers shall be consistently maintained by our Company. The sustainability of our increase in PAT margins may be affected and cause fluctuations due to multiple factors such as:

- \* Changes in the volume or demand for our products under our business verticals;
- \* Our continued ability to maintain consistency in inventories of our products;
- \* Fluctuations in currency rates resulting in an increase of costs for importing of our products from international brand owners;
- \* Changes in our operational expenses pertaining to the use of our stores and any fluctuations in lease rent, license fees and maintenance related expenses;
- \* Changes if any in taxation slabs and policies applicable to the sale of our products; and

\* Increase in competition from other distributors and vendors in the territory.

**18. We depend on third-parties for our transportation needs. Any disruptions may adversely affect our operations, business and financial condition.**

We rely on third-party transporters and logistics providers for the movement of products from our central warehouse to our stores as well as for delivery to customers placing orders through e-commerce portals or our website, and any disruption in these services may adversely affect our operations, profitability and reputation. We do not have an in-house transportation facility and depend entirely on third-party transporters and logistics service providers for the movement of our products. This includes transportation of goods from our central warehouse to our various retail outlets, as well as delivery of products directly to customers who place orders through e-commerce portals or through our own website. Our reliance on such third-party service providers is expected to increase as we expand our retail presence.

Further, the value of the goods carried by such third-party transporters is typically much higher than the freight or consideration paid for transportation. Consequently, it may be difficult for us to recover adequate compensation in the event of damage, delay, loss or theft of goods during transit. Our operations and profitability are therefore dependent on the continued availability of reliable transportation and logistics services in a time- and cost-efficient manner. Our business is vulnerable to increased transportation costs (including those arising from fluctuations in fuel prices), transportation strikes, disruptions caused by adverse weather, lock-outs, accidents, inadequacies in road infrastructure, or operational failures of the logistics providers. Although we have not experienced any material disruptions in the past, any prolonged delay, disruption, or unavailability of such facilities could result in delayed deliveries, non-supply of products to our stores or customers, and may require us to engage alternative arrangements which could be less efficient or more costly. Such events may adversely affect our operations, profitability, reputation and market position.

**19. We have experienced negative cash flows from operations in the recent past, and we may have negative cash flows in the future.**

We have in the past, and may in the future, experience negative cash flows from operating, investing and financing activities. The following table sets forth our net cash inflow/ (outflow) from operating, investing and financing activities for the periods/years indicated:

(₹ in Lakhs)

Particulars	Nine months period ended December 31, 2025	FY 2024-25	FY 2023-24	FY 2022-23
Net Cash from Operating Activities	(1,202.07)	(69.50)	168.08	(129.84)
Net Cash Used for Investing Activities	(472.42)	(288.49)	(318.95)	(40.67)
Net Cash from Financing Activities	1,344.03	730.57	167.08	164.03

Cash flows of a company are a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our business, financial condition and results of operations could be materially and adversely affected.

Any negative cash outflows from operating activities over extended periods, or significant cash outflows in the short term from investing and financing activities, could have an adverse impact on our cash flow requirements, business operations and growth plans. The negative cash flow has primarily arisen due to substantial investments made during the Company's initial years to establish its market presence and support retail operations, including bulk purchases to build adequate inventory levels, resulting in higher working capital utilization and corresponding fluctuations, increased finance costs due to borrowings, and significant advertising and marketing expenses. As a result, our cash flows, business, future financial performance and results of operations could be adversely affected.

While all such past transactions have been conducted on arm's length basis as per Companies Act, 2013 and other applicable law, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations. **21. Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.**

Our business requires significant amount of working capital and major portion of our working capital is utilized towards inventories and trade receivables. The details of our working capital for the nine months period ended on December 31, 2025 and Financial Year 2024-25 is as under:

(₹ in Lakhs)

Particulars	December 31, 2025	March 31, 2025

<b>Net Working Capital (I)-(II)</b>	<b>5,628.33</b>	<b>2,371.23</b>

Further, our growing scale and expansion may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these

debtors. As of March 31, 2025, our trade receivables stood at ₹ 3,736.17 Lakhs, which constitutes approximately 28% of our revenue from operations for the same period. Any default or delay in recovery from these debtors may adversely affect our business operations, working capital cycle, and overall financial condition.

For further details regarding our working capital requirements, please refer to the section “*Objects of the Issue*” on page 98 of this Red Herring Prospectus.

**22. We have incurred a high debt-to-equity ratio in the financial year 2022-23. While the debt-to-equity ratio is balanced out in the past two financial years, i.e., financial year 2023-24 and financial year 2024-25 and the nine months period ended on December 31, 2025, we cannot assure you of a balanced debt-equity ratio in the future.**

The Company’s debt-equity ratio was normalized to 0.40 in FY 2023-24 and FY 2024-25 and 0.26 for the nine months period ended on December 31, 2025 following a substantially higher ratio of 2.91 in FY 2022-23 presented as follows:

For the nine months period ended on December 31, 2025	FY 2024-25	FY 2023-24	FY 2022-23
0.26	0.40	0.40	2.91

The elevated debt-equity position in FY 2022-23 arose due to significant borrowings for rapid retail network expansion and inventory build-up, in the context of limited internal accruals and urgent working capital requirements. These borrowings, primarily in the form of short-term loans at higher interest rates, led to increased financial leverage and higher interest costs for the period.

Should the Company require additional borrowings to fund future growth or address liquidity constraints, there is a risk that the debt-equity ratio may once again rise to elevated levels. An increase in financial leverage could expose the Company to greater interest rate risk, higher debt servicing obligations, and potential constraints on future capital raising. Moreover, inability to adequately manage and balance capital structure may adversely impact the Company’s cash flows, limit operational flexibility, and restrict its ability to respond effectively to business challenges or adverse market conditions.

Consequently, any recurrence of high debt-equity levels, or inability to maintain prudent leverage, could significantly affect the Company’s business, working capital cycle, credit profile, and overall financial position. Investors should carefully consider these risks in evaluating the Company’s financial stability and growth prospects.

While the debt-to-equity ratio is balanced out since the past two financial years, we cannot assure you that such instances shall not arise in the future. For further information, see chapter “Restated Financial Information” on page 215. Our inability to balance out the debt-to-equity ratio in the future shall expose our Company to higher credit risks and in turn significantly affect our business operations, working capital cycle and overall financial condition of the Company.

**23. Our contingent liabilities may materially and adversely affect our business, results of operations and financial condition.**

For further information on such contingent liabilities, please refer section titled “*Restated Financial Statement – Annexure XLI – Restated Statement*”

of *Contingent Liabilities and Commitments*” under the section titled “*Restated Financial Statements*” beginning on page 223 of this Red Herring Prospectus.

**24. Our Company has, in the past, recognized certain amounts under the heads “bad debts”, “balance written off,” and “miscellaneous expenses” as part of other expenses in the statement of profit and loss. Any significant increase in such expenses may adversely affect our financial performance, operating margins, and overall profitability.**

Our Company has, in the past, recognized certain amounts under the heads “bad debts”, “balance written off,” and “miscellaneous expenses” as part of other expenses in the Statement of Profit and Loss. These amounts primarily represent receivables and balances that were no longer recoverable or had become irreconcilable and were therefore written off. There can be no assurance that similar write-offs or bad debts will not arise in the future. Any significant increase in such expenses may adversely affect our financial performance, operating margins, and overall profitability.

The details of balance written off/bad debt as per Restated Financial Statements are as follows:

Investors are advised to carefully consider these historical trends and the potential for recurrence when assessing our financial health and making investment decisions.

**25. Our Promoters and Directors are engaged in similar line of business activities as those undertaken by our Company, which may give rise to potential conflicts of interest.**

Our Promoters and Directors are currently engaged, and may in the future engage, in the businesses of Incubator Ecom Private Limited and our Group Entities, Sunglass Palace Private Limited, Akka Luxury Brand Distribution Private Limited, Vault Kicks Private Limited and Sports Implus Private Limited that operate in the same or similar line of business as our Company, including sale and distribution of luxury and / or athleisure footwear, apparels, accessories and equipment. and which may result in a potential conflict of interest.

While our Promoters and Directors are generally expected to act in the best interests of our Company, their other business interests may, in certain circumstances, overlap with the business of our Company. This could influence decisions related to allocation of resources, management time, business opportunities, or strategic initiatives. Any actual or perceived conflict of interest may have an adverse effect on our business operations, reputation, financial performance, and prospects. Investors should be aware that, while our Company has policies in place to address and manage conflicts of interest, there can be no assurance that such conflicts will not arise in the future or that they will be resolved in a manner that protects the interests of our Company and its shareholders. Further, we cannot assure you that such entities will not compete with us in similar markets or our existing business or any future business that we may undertake. For further details of other businesses and ventures of our Promoters and Directors, see “*Our Management*” and “*Our Promoters and Promoter Group*” on page 196 and 211, respectively, of this Red Herring Prospectus.

**26. Our Company is promoted by first generation entrepreneurs.**

Our Company is founded by Mr. Arun Malhotra and Ms. Kavya Malhotra. Both Mr. Arun Malhotra and Ms. Kavya Malhotra are first-generation promoters. Ms. Kashika Malhotra also joined the Company as a Promoter in 2024, and is a second-generation Promoter. Their role in managing and instrumenting the growth of our Company is limited to the extent of their knowledge and experience and we cannot assure that this will not affect our business growth. However, our Promoters Mr. Arun Malhotra and Ms. Kavya Malhotra have an experience of approximately 22 years.

Investors and stakeholders may exercise caution when entrepreneurs belong to first generation or are having limited knowledge and experience. This could potentially impact our ability to secure funding or establish partnerships that are critical for growth. Established entrepreneurs often have extensive and broad networks within their industries, which can prove invaluable for forming partnerships, collaborations, and accessing resources. Our Promoters may have limited connections, posing challenges in tapping into these opportunities. Furthermore, the lack of extensive prior corporate track record may make it more challenging to attract and retain senior management and skilled personnel who are accustomed to working in a more structured corporate environment, thereby potentially hindering our operational efficiency and expansion plans. Our ability to compete effectively in the market could also be constrained by a perceived lack of corporate maturity, potentially affecting customer confidence and market share acquisition.

**27. We have incurred indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.**

Our ability to borrow and the terms of our borrowings depends upon our financial condition, stability of cash flows, general market conditions, economic and political conditions in our operating markets, and our capacity to service debt. As of December 31, 2025, our total outstanding indebtedness amounted to ₹1,567.91 Lakhs out of which ₹ 623.45 Lakhs are long term borrowings and ₹ 944.46 Lakhs are short term borrowings.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

- (i) limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- (ii) limiting our ability to borrow more money both now and in the future; and
- (iii) increasing our interest expenditure and adversely affecting our profitability.

While we have not, as of the date of this Red Herring Prospectus, experienced any instance of loan recall or default in meeting our debt obligations, if our loans are recalled on short notice, we may need to secure funds quickly to meet the immediate demand. Occurrence of these events could adversely affect our cash flows and the financial condition of the Company. For further details regarding our indebtedness, please refer to the “**Financial Indebtedness**” on page 224 of this Red Herring Prospectus.

**28. Our Company and our Subsidiary has availed unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash-flow.**

Our Company and our Subsidiary have availed unsecured loans which may be called by their lenders at any time. As on December 31, 2025 the unsecured loans of our Company amounting ₹ 1,070.09 Lakhs. Such loans are not subject to any agreed repayment schedule and may be recalled by the relevant lenders at any time. In such cases, our Company and / or our Subsidiary may be required to repay the entirety of the unsecured loans together with accrued interest. Our Company and / or Subsidiary may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to the Company and / or Subsidiary. Failure to repay unsecured loans in a timely manner may have a material adverse effect on the business, cash flows and financial condition. For further details on unsecured loans of our Company, please refer chapter titled “**Financial Indebtedness**” beginning on page 224 of this Red Herring Prospectus.

**29. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.**

Our Company has obtained insurance coverage in respect of certain anticipated risks which are standard for our type of business and operations, viz. Bharat Laghu Udyam Suraksha Policy, Burglary Policy, Commercial General Liability and Motor Vehicle Policy. The Company has not obtained insurance for any assets except for its stock. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks. For further details of our insurance coverage, see “**Our Business – Insurance**” on page 180 of this Red Herring Prospectus.

The Company has not incurred any losses in the past three financial years and there is no instance of a claim exceeding the liability insurance cover. The insurance coverage ratio of the Company is as below:

(₹ in lakhs)					
Insurer	Insurance Coverage Ratio	Asset Value as on December 31, 2025	Insurance Value	% of Insured Assets	Nature of Coverage
Bajaj Allianz General Insurance Company Limited.	100% to the extent sum assured	1,716.39	2,000.00	131.95%	Burglary
Bajaj Allianz General Insurance Company Limited.	100% to the extent sum assured	1,716.39	2,000.00	131.95%	Fire (Add on cover earthquake)

We may be exposed to various risks which we may not be able to foresee or may not have adequate insurance coverage. Our insurance coverage may not be adequate to cover such loss or damage to life and property, and any consequential losses arising due to such events will affect our operations and financial condition. Further, in addition to the above, any fatal accident or incident causing damage or loss to life and property, even if we are fully insured or held not to be liable,

could negatively affect our reputation, thereby making it more difficult for us to conduct our business operations effectively, and could significantly affect our business, availability of insurance coverage in the future and our results of operations.

While we believe that the insurance coverage that we maintain is in accordance with industry standards, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all material losses. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, that is not covered by insurance or exceeds our insurance coverage, the loss would have to be borne by us and our cash flows, results of operations and financial performance could be adversely affected. In the event that our Company files a claim under the applicable insurance policy, there is no assurance that we will be able to recover all, or part of the losses incurred. However, we have not experienced any uninsured or underinsured loss events or rejected insurance claims in the past.

**30. Our Company, our Promoters and our Group Entities are party to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.**

Our Company, our Promoters and our Group Entities are party to certain legal proceedings. These proceedings are pending at different levels of adjudication before various legal forums. While the possibility of future legal proceedings in the ordinary course of business cannot be ruled out, we believe that there are no other outstanding matters that are or may be material in nature or that could have an adverse impact on our business, operations, financial condition, or reputation, that have not been disclosed in this Red Herring Prospectus. The Company has disclosed all legal proceedings which fall within the threshold of material litigation and no litigation which is non-material has been disclosed.

There can be no assurance that proceedings involving our Company, our Promoters and our Group Entities will be decided in favour of our Company, our Promoters or our Group Entities, or that it may divert the attention of our management and Promoters and consume our corporate resources and we may incur significant expenses in such proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against Company, there could be a material adverse effect on our reputation, business, financial condition

and results of operations, which could adversely affect the trading price of our Equity Shares.

Furthermore, we may not be able to quantify all the claims in which we are involved. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure that similar proceedings will not be initiated in the future. This could adversely affect our business, cash flows, financial condition, and results of operation. For further details, pertaining to material pending outstanding litigations involving our Company, see “*Outstanding Litigations and Material Developments*” on page 254 of this Red Herring Prospectus.

**31. Our Company has not complied with certain statutory provisions of the Companies Act and the POSH Act. Such non-compliances may attract penalties and prosecution against our Company and its Directors, which could impact our financial position to that extent.**

Our Company is required to make disclosures under various rules and regulations as applicable under the Companies Act and POSH Act within the time period stipulated therein. Our Company has inadvertently missed making certain requisite disclosures or have made incorrect disclosures in the relevant forms and statutory filings. Further, few forms have not been filed by our Company within the stipulated time period, which have later been filed along with payment of requisite additional fees with the RoC in compliance with the Companies Act. The above errors as are described in the respective filings under the Companies Act, 2013 are typographical in nature and hence do not require the filing of a compounding application with the Registrar of Companies. The Company is committed to adhering to all statutory provisions and regulations under the Companies Act and POSH Act by implementing stringent internal checks and controls. While we have generally maintained compliance with applicable laws, there have been instances of delays, inconsistencies and clerical errors in certain statutory filings with the MCA. Although no show cause notices have been issued against our Company till date in respect of the above, in the event of any cognizance being taken by the concerned authorities in respect of the above, actions may be taken against our Company and Directors. While the discrepancies highlighted above could be attributed to technical lapses and human errors, our Company is in process of setting up a system to ensure that the requisite filings are done appropriately and within the timelines.

***32. We require certain approvals, licenses and registrations in the ordinary course of business, and any delay or failure in obtaining, renewing, updating or complying with such approvals and licenses may adversely affect our business, financial condition, results of operations and prospects.***

Our Company is required to obtain and maintain various approvals, licenses, registrations and permits under applicable laws for carrying on its business operations. As of the date of this Red Herring Prospectus, we believe that we have obtained the material approvals required to operate our business. However, certain approvals are still pending with the authorities for fresh issuance, amendment pursuant to change in name of the Company upon conversion to public, or for addition / cancellation of places of business. Further, certain approvals continue to remain in force in respect of locations which have since become non-operational or closed, and our Company is yet to apply for their cancellation or surrender with the relevant authorities. Additionally, our Subsidiary is still in process of commencing its operations and is yet to

apply for certain approvals that will be required for its business operations. There is no assurance that the authority will issue the said approval in a timely manner, or at all. For details of all such pending approvals of the Company, refer to the chapter titled “**Government and Other Statutory Approvals**” on page 259 of this Red Herring Prospectus.

Further, certain approvals obtained by us are conditional in nature and subject to ongoing compliance. While we endeavour to adhere to such conditions, there can be no assurance that we will be able to continuously comply with them or demonstrate compliance to the satisfaction of the relevant authorities. Failure to comply with such conditions may result in suspension, revocation or cancellation of such approvals. There have been no past incidents as of the date of this Red Herring Prospectus of non-compliance by the Company with the terms and conditions of any such approvals or applicable laws. However, if there is any failure by us to comply with applicable regulations or amendments to regulatory frameworks governing our business, such failure could result in increased costs, penalties, revocation of approvals and permits, or suffer a disruption in our operations, any of which could adversely impact our business.

Any delay or failure in obtaining new approvals, renewing or updating existing approvals on a timely basis, or complying with the conditions of such approvals could lead to interruptions in our operations, imposition of penalties, additional compliance costs, and could materially and adversely affect our business, financial condition and results of operations. Additionally, we are required to make periodic statutory payments to authorities, including those related to employee provident fund, employee state insurance and income tax. Any delay or default in making such payments may attract penalties, regulatory action and could adversely impact our reputation, operations and financial performance.

**33. Our inability to protect our intellectual property rights may prevent us from successfully marketing our products and we may infringe the intellectual property rights of others which could result in litigation.**

The Company has applied for the registration of six trademarks under various classes with the Registrar of Trademarks under the Trademarks Act, 1999 as listed below, and five of such applied trademarks have been objected by the Registrar.

Date of Application	Particulars of the Mark	Application Number	Class of Registration	Status
June 12, 2024		6476665	28	Accepted & advertised
June 12, 2024		6476663	18	Objected
June 12, 2024		6476664	25	Objected
June 12, 2024		6476666	35	Objected
July 03, 2024		6509904	35	Formalities Check Pass

Further, these applications have been filed in the name of Brandman Retail Private Limited, and we are yet to update the said applications in the new name of the Company pursuant to conversion to a public limited company. As a result, we do not enjoy the legal protection available to registered trademarks. There can be no assurance that our trademark applications will be successfully registered, that objections will be resolved in our favour, or that the pending applications will be amended to reflect the new name of the Company pursuant to conversion in a timely manner or at all.

We may not be able to detect any unauthorized use or protect our intellectual property rights, including our trademarks

after receipt of approval from Registrar of Trademarks, against third-party infringement and unauthorized use of our intellectual property, including by our competitors. Any failure to protect our intellectual property rights may adversely affect our business, results of operations and financial condition. Further, a failure to obtain or maintain these registrations may adversely affect our competitive business position. This may in turn affect our brand value, our customer relations, and consequently, our business. Despite our efforts to protect our proprietary rights, unauthorized parties may infringe our proprietary marks. Although we have faced no instances of unauthorized use or infringement of our intellectual property in the past and while we take care to ensure that we comply with the intellectual property rights of others, we cannot assure that our intellectual property are adequately protected against infringement and unauthorized use.

We may also be susceptible to claims from third parties asserting infringement and other related claims. We cannot determine with certainty as to whether we are infringing on any existing third-party intellectual property rights, which may require us to obtain licenses or cease some of our operations. If such claims are raised, those claims could adversely affect our relationships with current or future customers, result in costly litigations and divert management's attention and resources. While we have not been involved in litigation or incurred litigation expenses in connection with infringement of intellectual property rights by us in the past, in the case of an infringement claim made by a third party, we may be required to defend or settle such claims at our own cost and liability and may need to indemnify and hold harmless our customers. Any of the foregoing could adversely affect our business, results of operations and financial condition.

For further information relating to our intellectual property, refer to chapters titled “*Our Business*” and “*Government and Other Statutory Approvals*” beginning on pages 151 and 259, respectively, of this Red Herring Prospectus.

***34. We face competition in our business from domestic and international brands. Such competition would have an adverse impact on our business and financial performance.***

We face intense competition in all product categories and markets in which we operate. We compete with other international and national brands which own and operate well-known brands of high-quality goods and may have greater financial resources and negotiation power with suppliers, vendors and landlords than we do. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. We expect competition could increase with new entrants coming into footwear retail industry, who may have more flexibility in responding to changing business and economic conditions, and existing players consolidating their positions. Some of our competitors may have access to significantly greater resources, including the ability to spend more on advertising and marketing and hence the ability to compete more effectively. We believe that we compete primarily on the basis of our brand image, innovative design, product assortment and reputation for quality. If we are unable to compete successfully, our business and results of operations could be adversely affected. Further, our competitors may set up stores in the vicinity of our existing stores and may offer their products at lower prices, resulting in a decreasing of sales of our projects. We cannot assure you that we can continue to compete effectively with our competitors. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability.

***35. Our Promoters and Directors have provided personal guarantees for financing facilities availed by our Company and may in the future provide additional guarantees. Any failure or default by our Company to repay such facilities in accordance with the terms and conditions of the financing agreements could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters and Directors and thereby, adversely impact our business and operations.***

Our Promoters and Directors have personally guaranteed an amount of ₹ 500.00 Lakhs for the repayment of certain loan facilities taken by us for period ended December 31, 2025. Our Promoters may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the guarantees provided by our Promoters and Directors may be invoked, which could negatively impact the reputation and net worth of our Promoters and Directors. In addition, our guarantors may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. Furthermore, in the event that our Promoters and Directors withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

***36. Our Promoters and members of the Promoter Group will jointly continue to retain majority shareholding in our Company after the Issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.***

Our Promoters along with the members of the Promoter Group have a cumulative pre-Issue shareholding of 93.91%, and will continue to hold collectively up to [●] % of the Equity Share capital of the Company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder's vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our Company. In addition to the above, our Promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. For further information, please refer to the chapters titled "**Our Business**" and "**Our Promoter and Promoter Group**" beginning on page 151 and 211, respectively, of this Red Herring Prospectus.

**37. The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.**

Our Promoters' average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity Shares as given below:

Sr. No.	Name of Promoters	No. of Equity Shares held	Average Cost of Acquisition per Equity Share (₹)
1.	Arun Malhotra	22,93,980	0.11
2.	Kavya Malhotra	94,19,700	0.24
3.	Kashika Malhotra	1,020	-

The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire and shares allotted to them as reduced by amount received on sale of shares i.e. net of sale consideration is divided by net quantity of shares acquired. For further details, please see chapter titled "**Basis for Issue Price**" on page 115 of this Red Herring Prospectus.

**38. The success of our business depends substantially on our management team and operational workforce. Our inability to attract or retain such manpower could adversely affect our business operations.**

Our business and financial performance depends largely on the efforts and abilities of our Promoters, management and Key Managerial Personnel. We benefit from our relationship with our individual Promoters and our success depends upon the continuing services of our Promoters and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and executive Directors have been actively involved in the day-to-day operations and management and therefore, we are heavily reliant on them for the success of the Company. If our Promoters and executive Directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key management for continued success and smooth functioning of the operations of the Company. Our success also depends on our ability to recruit, develop and retain qualified and skilled personnel, for all our lines of business.

From time to time, there may be changes in our management team or other key employees to enhance the skills of our teams or as a result of attrition. We cannot assure that we will continue to retain any or all of the key members of our management. Further, we cannot assure that if one or more key members of our management are unable or unwilling to continue in their present positions, that we would be able to replace such member(s) in a timely and cost-effective manner. We compete in the market to attract and retain skilled personnel, in areas such as engineering, technology, sales, marketing and operations. If we lose the services of any of our key managerial personnel, it may take reasonable time to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters and executive Directors, along with the key managerial personnel, have over the years-built relations with various customers and other persons who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected. For further details on our management, please refer chapter titled "**Our Management**" beginning on page 196 of this Red Herring Prospectus.

**39. Some of our KMPs are associated with our Company for less than one year.**

Our Key Managerial Personnel, Mrs. Sanchita Rameka, Company Secretary & Compliance Officer, who has over six years of experience in the field of legal and compliance, and our Chief Financial Officer, Mr. Saket Prakash, who has over 15 years of experience in accounts and financial operations, have been associated with our Company for a period of less than one year. Therefore, they may not have been accustomed to our Company affairs till date. For details of Key Managerial Personnel and their appointment, see “*Our Management*” on page 196 of this Red Herring Prospectus.

***40. Losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.***

Our business and the industry we operate in are vulnerable to the problem of shoplifting by customers, pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. Additionally, our business operations also involve a significant number of cash transactions. The retail industry also typically encounters some inventory loss on account of employee theft, shoplifting, supplier fraud, credit card fraud and general administrative error. While we have taken measures to prevent such instances such as introducing policies against shrinkages, pilferages and theft, regular stock audit of our stores conducted by our centralized team, taking disciplinary action against non-compliance, blacklisting of vendors and regular training sessions for our staff and security, any increase in product losses due to such factors at our existing and future stores or our retail channels may require us to, inter alia, install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We have not faced such instances in the past, however, we cannot assure you whether these measures will successfully prevent such losses.

***41. Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.***

We believe our employees and personnel, including personnel at our stores are critical to maintain our competitive position. Our employees are not unionised. Although we have not experienced any material labour unrest in the past, we cannot assure you that we will not experience disruptions in work or our retail operations due to disputes or other problems with our workforce, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us in the future, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are very difficult for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

***42. Our Promoters and Executive Directors hold Equity Shares in our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.***

Our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, refer to chapter titled “*Our Management*” and “*Our Promoters and Promoter Group*” on pages 196 and 211, respectively, of this Red Herring Prospectus.

***43. Conflicts of interest may arise out of common business undertaken by our Company, our Subsidiary and our Group Entities.***

Our Subsidiary, Incubator Ecom Private Limited and our Group Entities, Sunglass Palace Private Limited, Akka Luxury Brand Distribution Private Limited, Vault Kicks Private Limited and Sports Implus Private Limited are authorized by their memorandum to carry similar activities as those conducted by our Company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, our Subsidiary and /or our Group Entities in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour other entities in which our Promoters or their immediate relatives have interests. There can be no assurance that our Promoters, members and entities of our Promoters Group, our Subsidiary and / or Group Entities will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

***44. Our business is subject to seasonality, with demand typically increasing during festivals, holidays and peak sale periods, which may place pressure on our operations and systems.***

Our business is influenced by seasonal factors, with higher demand generally observed during festive periods, holidays, and large-scale promotional or sale events. Such demand patterns require us and our distributors, logistics partners, and brand partners to plan inventory, fulfilment, and delivery capacities in advance. Any failure to adequately stock or re-

stock popular products, or to ensure timely fulfilment and delivery during these peak periods, may adversely impact consumer experience and harm our business relationships.

We may also experience increased pressure on our supply chain, logistics and customer service functions during these periods. Inadequate capacity, system interruptions on our website or on third-party e-commerce platforms through which we sell our products, or insufficient staffing of customer support during such times, may disrupt our ability to meet customer expectations. While festive periods and holidays may present opportunities for increased sales, they also expose us to the risk of operational inefficiencies, reputational impact in case of delays or service lapses, and potential strain on our relationships with distributors, logistics partners and customers. Any inability to effectively manage such seasonal demand may adversely affect our operations, brand perception and customer retention.

**45. Our Promoter, Ms. Kashika Malhotra, has limited experience in our current business, which may have an adverse impact on our operations and navigating competitive business dynamics and day-to-day workings.**

Our Promoters play a key role in shaping and executing our business strategy. However, one of our Promoters, Ms. Kashika Malhotra has limited experience in our current business activities. Should our Promoters be unable to navigate competitive dynamics, operations, or manage strategic partnerships due to gaps in relevant experience, our execution capabilities and business performance could be adversely affected. While our other Promoters, Key Managerial Personnel and Directors are capable and experienced, there can be no guarantee that these measures will fully mitigate the impact of limited Promoter experience. Any inability on the part of our Promoter to manage our business effectively may adversely affect our operations, growth prospects, and financial condition.

**46. In past, there have been instances of non-payment and delay in in payment of statutory dues under the statutory provisions of the Goods and Services Tax Act, 2017, the Employees Provident Funds and Miscellaneous Provisions Act, 1952, Income Tax Act, 1961 and the Employees State Insurance Act, 1948. Such non-compliance and delayed compliance may attract penalties against our Company which could impact the financial position of us to that extent.**

In past, there have been instances where the Company has delayed to file Employees' State Insurance ("ESI") Returns, Tax Deducted at Source ("TDS") Returns, Provident Fund ("PF") Returns and Goods and Services Tax ("GST") Returns in specified time. Certain delays in deposit of GST amounts and in compliance relating to PF and ESI were primarily on account of technical challenges and limited internal expertise. Further, statutory returns of the Company were being filed by internal team members who lacked adequate technical know-how, resulting in inadvertent delays in preparation and filing. To address this, our Company has engaged an external consultant with relevant expertise to ensure timely and accurate compliance. The delays in filings are as follows:

The primary reasons for such delay are due to the following reasons set out below:

Financial Year	Reason for Delay	Corrective Measures Taken
FY 2025-26	The delays were nominal in nature, primarily arising from the reconciliation of GST liabilities and the time taken to obtain sales reports during the software upgradation process.	Our Company has hired a third-party consultant and expert in such field to file such return to minimize such cost occurring from non-compliances.
FY 2024-25	The delays occurred due to changes in the accounts team, as time was required to familiarize new members with the business processes and ensure accurate data flow.	
FY 2023-24	As the Company expanded its operations to a turnover of ₹100 crore, we initiated the implementation of new software to strengthen statutory compliance. During the trial phase and due to certain technical glitches encountered, some delays occurred.	
FY 2022-23	As the Company expanded its operations to a turnover of ₹100 crore, we initiated the implementation of new software to strengthen statutory compliance. During the trial phase and due to certain technical glitches encountered, some delays occurred.	
FY 2021-22		

The Company has paid the above penalties and taken the steps to improve the internal system for payment of ESI returns, TDS returns, PF returns and GST returns to mitigate the technical difficulties. However, there can be no assurance that such delays or lapses will not occur in the future, and any continued non-compliance may attract penalties, fines, or other regulatory actions, which could expose the Company to potential financial liabilities and adversely affect our business, operations, financial condition as well as our reputation and goodwill.

***47. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see chapter titled “*Dividend Policy*” beginning on page 221 of this Red Herring Prospectus.

***48. Certain key performance indicators for certain listed industry peers included in this Offer Document have been sourced from public sources and there is no assurance that such financial and other industry information is complete.***

In compliance with the SEBI ICDR Regulations, we have included specific key performance indicators, comprising financial and operational data, for selected listed industry peers, detailed in the “*Basis for Issue Price*” section starting on page 115 of the Red Herring Prospectus. This information has been sourced from and relies upon the audited financial statements of relevant listed industry peers, accessible on Stock Exchanges’ websites, including annual reports submitted to the respective Stock Exchanges. It should be noted that there is no guarantee of the completeness of this information concerning industry peers. Different methodologies and formulas may have been employed in calculating the various ratios. Investors are advised not to place undue reliance on this information in making investment decisions. Any reliance

on such data for benchmarking or valuation purposes should be undertaken with caution and a clear understanding of its limitations.

***49. Any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.***

We propose to utilize the Net Proceeds towards utilization for the objects specified in the chapter titled “***Objects of the Issue***” on page 98 of this Red Herring Prospectus. For further details of the proposed objects of the Issue, see chapter titled “***Objects of the Issue***” beginning on page 98 of this Red Herring Prospectus. However, these objects of the issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the other applicable laws, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the issue to use any unutilized proceeds of the issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and the results of operations.

***50. We may face pricing pressure from our customers which could impact our revenues and profitability***

Our Company faces competition from existing brands and distributors in the footwear and retail industry. As a result, we face requests from our customers especially in the B2B outright sales and B2B e-commerce sales verticals of our business for the provision of competitive offer lists comprising of competitive price offers. Competitors may, whether through consolidation or growth, present more credible integrated or lower cost solutions than we do, which may result in better rates for procurement of products by customers, resulting in a decrease of sales of our products. We cannot assure you that we can continue to compete effectively with our competitors. Our failure to meet with our customers’ demands to provide competitive price ranges, may affect the sales of products, which may result in the decline in our revenues and profitability.

***51. The online sales are dependent on sales channels controlled by third party online marketplaces and the inability to utilize these channels or significant changes to the business arrangements.***

Our Company engages in online sales of its products through its online vertical. The Company’s revenue builds up depends on the continued demand for our products that are offered on the e-commerce platforms. The sale and purchase of our products, once sold to the e-commerce platform, are sold through the sales channel which is operated and controlled by such e-commerce platforms. Each of these e-commerce platforms are third party online marketplaces and unconnected with the Company. As a result, our Company does not have any control over the strategy or business model implemented by each such third-party platform for the sale of our products. Due to the lack of such control, any fluctuations in the sale of our products shall in turn, affect our revenues growth under the online sale segment. Further, our failure or inability to utilise these sales channels for sale and outreach of our products shall result in a significant impact to our revenue and profitability. Our online sales are further dependent on the terms and conditions with such e-commerce platforms and are translated into contractual terms under agreements with such third-party e-commerce platforms. Any significant amendments or changes to our contractual terms, including without limitation any changes to commercial understanding or business flow could negatively impact our sales, financial condition, cash flows and prospects.

***52. Company may seek to grow the business through acquisitions of, or investments in, new or complementary businesses, facilities, technologies, or products, or through strategic alliances.***

As on the date of this RHP, the Company has established a Subsidiary for the purpose of carrying out further expansion of its business. As a part of our growth strategy, the Company may in the future likely to pursue acquisitions of or investments in companies, assets or technologies that are complementary or synergistic to its existing product portfolio, market, capabilities or such other strategic alliances that provide our Company with access to new footwear, apparel or

adjacent products, brands, services, capabilities or markets. The Company may not be able to fully complete, or integrate such acquisitions, investments or realise the anticipated benefits or synergies from such acquisitions, for reasons such as:

- \* Inability to obtain the necessary approvals or consents from the relevant authorities, lenders, or other stakeholders, to consummate such acquisitions;

- Inability to secure sufficient financing for such acquisitions;

- \* Inability to retain or integrate the key personnel, customers, suppliers, or distributors, of the acquired companies, or to manage the cultural, operational and strategic differences or conflicts;

- \* Inability to successfully integrate financial, accounting, information technology, human resource, legal, compliance, or other systems, processes, policies, or practices of the acquired companies, businesses, assets, technologies, or maintaining adequate internal controls, governance, or reporting standards;

- Inability to protect or enforce the intellectual property rights of the acquired companies, businesses, assets, or technologies, or to defend against any infringement or misappropriation claims or litigation involving such intellectual property rights; or

- Inability to adapt to the changing market, competitive, regulatory, or customer conditions affecting the acquired companies, businesses, assets, or technologies, or to respond to technological advances or innovations in the relevant industry or sector.

Any of the above factors could adversely affect our ability to successfully execute our acquisition strategy, or to achieve our growth, diversification, or expansion objectives, which could adversely affect our business, financial condition, results of operations, and cash flows. Further, we cannot assure you that any acquisitions undertaken by us will generate the results that we anticipate or that we will be able to obtain the expected benefits of such acquisitions.

### ***53. Cyber-attacks or other disruptions to the information technology systems or online sales channels.***

Our platform and back-end infrastructure, including without limitation our information security systems as well as information technology systems of our e-commerce platform partners may be vulnerable to cyberattacks and security breaches including social engineering, denial of service, ransomware and other malware, employee error and malfeasance and other sources of disruption and third parties may be able to access data. Employee error, malfeasance, or other errors in the storage, use or transmission of any of these types of data could result in an actual or perceived privacy or security breach or other security incident. Although we have policies, system controls and checks restricting access to the data we store, there is a risk that these policies may not be effective in all cases.

In addition, users on our platform could have vulnerabilities on their own devices that are entirely unrelated to our systems and platform but could mistakenly attribute their own vulnerabilities to us. Further, breaches experienced by other companies, as well as compromised systems on the part of our users, restaurant, merchant, brand or delivery partners, may also be leveraged against us. Any actual or perceived breach or similar incident could interrupt our operations; harm our reputation, brand and competitive position; result in our platform being unavailable; result in loss or unavailability of data; or result in a fraudulent transfer of funds; significant regulatory investigations, proceedings and financial exposure. Any such incidents or any perception that our security measures are inadequate could lead to loss of user, restaurant partner, merchant partner, brand partner and delivery partner confidence in, or decreased use of, our platform, any of which could adversely affect our business, financial condition and results of operations. Further, any cyberattacks, or actual or perceived breaches or other incidents directed at, or suffered by, our competitors could reduce confidence in our industry as a whole and, as a result, reduce confidence in us. Any actual or perceived breach or other security incident, impacting on any entities with which we share or disclose data (including, for example, our vendors) could have similar effects.

### ***54. Our Directors Do Not Have Prior Experience in Managing or Operating Listed Companies, Which May Adversely Affect the Company's Ability to Comply with Regulatory Requirements and Corporate Governance Norms***

A majority of our directors on our Board, including some of our independent directors do not have prior experience of being on the board of a company listed on the Stock Exchanges, or have experience of working in a listed company. Upon listing of the Equity Shares, our Company will be subject to the applicable regulatory requirements, including the regulations prescribed under the SEBI LODR Regulations and the Companies Act. Any non-compliance with such regulatory framework, whether due to lack of such experience or otherwise, could subject us to adverse regulatory actions, and have an impact on the price of our Equity Shares.

**55. The Company exports its products to countries outside India, contributing a certain percentage of its total revenue during the last three financial years. Any inability to effectively execute or sustain export operations, including timely supply of products to overseas customers, may adversely impact the Company's business operations, revenues, and results of operations.**

In the nine months period ended on December 31, 2025 and financial years 2024-25, 2023-24 and 2022-23, our Company's revenue from such exports amounted, of our Company's total revenue from operations in such periods as follows:

(₹ In Lakhs)

Particulars	For the nine months period ended on		For the Financial year ended on					
	December 31, 2025	% of Total Turnover	March 31, 2025	% of Total Turnover	March 31, 2024	% of Total Turnover	March 31, 2023	% of Total Turnover
	Consolidated		Consolidated		Consolidated		Standalone	
Export Sales	4,654.79	48.84%	1,918.71	14.18%	195.48	1.58%	-	-

Our ability to maintain and increase export sales is subject to various factors, including the identification of new markets, building and maintaining customer relationships, meeting product quality expectations, timely fulfilment of export orders, and compliance with applicable export and import laws and regulations. We are also exposed to risks associated with logistics, shipping constraints, international competition, and foreign exchange fluctuations.

In addition, our export performance is dependent on global economic conditions, trade relations between India and the destination countries, and the policies of such countries regarding import duties, tariffs, or other trade restrictions. Any adverse changes in such factors or inability to recover dues from international customers may affect our cash flows and profitability.

Any significant disruption in our export operations or inability to manage the complexities associated with international trade could adversely affect our business operations, revenue growth, and financial performance.

**56. There can be no assurance that the Company will be able to successfully identify, address, or improve the existing inadequacies or limitations in its information and reporting systems, which may affect the accuracy and timeliness of management information and decision-making.**

As we continue to expand, our success depends on our ability to effectively utilize our resources and maintain internal controls. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis so that our operations adhere to our policies, compliance requirements and internal guidelines. We periodically test and update our internal processes and reporting systems and are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances. We may need to modify and improve our financial and management control processes, reporting systems and procedures and other internal controls and compliance procedures to meet our evolving business needs. If we are unable to improve our controls, reporting systems and procedures, they may become ineffective and adversely affect our ability to manage our operations resulting in errors or information lapses that affect our business. Our efforts in improving our internal control and reporting systems may not result in eliminating all risks. If we are not successful in discovering and eliminating weaknesses in our internal controls, our ability to manage our business effectively may materially and adversely be affected.

We are also subject to anti-corruption laws and regulations, which generally prohibit us and our employees and intermediaries from bribing, being bribed or making other prohibited payments to government officials or other persons to obtain or retain business or gain some other business advantage. If we are not in compliance with applicable anti-corruption laws, we may be subject to criminal and civil penalties, disgorgement and other sanctions and remedial measures, and legal expenses, which could have an adverse impact on our business, financial condition, results of operations and liquidity. Likewise, any investigation of any potential violations of anticorruption laws by the relevant authorities could also have an adverse impact on our business and reputation.

**57. Our Registered Office and other business premises through which we conduct our business are not owned by us and the same have been taken on rental or lease basis.**

The premises on which our Registered Office is situated has been occupied vide Rent Agreement dated December 24, 2025 effective from December 01, 2025. Our Company also has 19 retail stores obtained on rental or lease basis. For

further details of such premises, refer the section titled “***Our Business – Our Properties***” on page 171 of this Red Herring Prospectus.

We cannot assure that we will be able to continue the above arrangements on commercially acceptable or favourable terms in future. In the event we are required to vacate the current premises, we would be required to make alternative arrangements for new premises and other infrastructure and facilities. We cannot assure that the new arrangements will be on terms that are commercially favourable to us. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

***58. Technology failures could disrupt our operations and adversely affect our business operations and financial performance.***

IT systems are critical to our ability to manage our large retail operations, warehouses, supply chain management and e-commerce sales and in turn, to maximize efficiencies and optimize costs. Our IT systems enable us to coordinate our operations, from planning and new orders and routing, customer delivery, invoicing, customer relationship management and decision support. Our main IT system includes our ERP system designed to provide capabilities to address inventory management and warehouse management.

If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure, we could be subject to transaction errors, processing inefficiencies, customer service disruptions and, in some instances, loss of customers. Challenges relating to the building of new IT structures can also subject us to certain errors, inefficiencies, disruptions and, in some instances, loss of customers. Our IT systems, and the systems of our third party IT service providers may also be vulnerable to a variety of interruptions due to events beyond our control, including, but not limited to, natural disasters, terrorist attacks, telecommunications failures, computer viruses, hackers and other security issues. Although we have security initiatives in place to mitigate its risk to these vulnerabilities, such measures may not have been effectively implemented or may not be adequate to ensure that its operations are not disrupted. There have been no past occurrences of material disruptions, failures, or breaches of our IT systems. However, we cannot assure you that such events will not occur in the future. Any significant disruption or failure of our IT systems may materially and adversely affect our operations, reputation, customer confidence, financial condition and results of operations.

***59. Our Company has availed loans from its Director in the past and such loan if re-called may have an adverse impact on the cash-flow, operation and financial condition of the Company.***

Our Director has extended unsecured, interest-free loan to the Company to support its working capital and operational needs. While these funds have enabled continuity of operations, such loans are repayable on demand and are not backed by any collateral. We cannot assure that our Directors will continue to extend such financial support or that these loans will not be recalled at short notice. Any sudden re-call or cessation of such support could adversely affect our liquidity, operational flexibility, and overall financial condition.

***60. The Objects of the Issue for which funds are being raised are based on our management estimates and the same have not been appraised by any bank or financial institution or any independent agency.***

The fund requirement and deployment, as mentioned in the chapter titled “***Objects of the Issue***” beginning on page 98 of this Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These funds are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety, within the estimated timelines, or at all. Given the highly competitive and dynamic nature of our business, we may be required to revise our business plan from time to time, which may result in changes to the proposed fund requirements. Further, we cannot assure that the actual costs or schedule of implementation as stated on page 98 of this Red Herring Prospectus under chapter titled “***Objects of the Issue***” will not vary from the estimated costs or schedule of implementation. Any such variance or delay may be on account of one or more factors, some of which may be beyond our control. The occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

***61. Our ability to successfully implement the Objects of the Issue, including the proposed setting up of 15 new outlets, may be subject to delays, modifications or failure due to regulatory, legal or other external factors beyond our control.***

A portion of the Net Proceeds of the Issue is proposed to be utilized towards capital expenditure for setting up 15 new retail outlets. The success of this Object depends on a number of factors, many of which are beyond our control, including obtaining necessary approvals, licenses, building permits, fire safety clearances, environmental and municipal permissions, as well as complying with local zoning and land-use regulations. Any changes in regulatory requirements,

imposition of new restrictions, delays in grant of approvals, or adverse changes in applicable laws could delay or prevent us from opening these outlets in a timely manner or at all.

In addition, our ability to identify and secure suitable locations on commercially viable terms, potential objections from local authorities or residents, changes in local development plans, and legal or contractual disputes with landlords may also hinder the execution of our expansion plans. Even where outlets are successfully opened, unforeseen regulatory interventions could impose compliance burdens, result in operational delays or additional costs. Further, while our Company has entered into a license agreement for retail store in Maharashtra in April 2025, the Company is yet to commence operations from that premise.

While we are committed to utilizing the Net Proceeds for the stated Object, there can be no assurance that we will be able to open all 15 proposed outlets within the anticipated timelines or at all. Any such delay, modification or failure could adversely impact our growth strategy, business operations, financial condition and the intended benefits of this Issue.

***62. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue Proceeds may delay the implementation schedule.***

The proposed fund requirement mentioned in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this Issue. We have not identified any alternative sources of funding. Therefore, any failure or delay on our part to mobilize the required resources or any shortfall in the Issue Proceeds may delay our implementation schedule. As a result, we cannot assure that we will be able to execute our future plans and strategies within the specified timeframe. For further details, please refer to the chapter titled “*Objects of the Issue*” starting on page 98 of this Red Herring Prospectus.

***63. Degree certificate and marksheets of one of our Directors are presently not traceable which may limit our ability to provide documentary evidence of their educational qualifications if required.***

One of our Directors, Mr. Paul Silvertown, has pursued a Bachelor of Arts degree in Social Sciences from the University of Leicester. However, since he did not attend his graduation ceremony, the formal degree certificate was not collected. While we have received official confirmation on email from the said University evidencing his alumni status, the physical copy of the degree certificate has not been made available. Accordingly, reliance has been placed on such confirmation received from the said University for disclosure of his educational qualifications in this Red Herring Prospectus. There can be no assurance that the physical certificate will be traceable or recovered in the future. Any such inability to furnish supporting documentation may attract queries from regulatory or investor stakeholders and could affect the perception of our management’s credentials. For details of his profile, refer to chapter titled “*Our Management*” on page 196 of the Red Herring Prospectus.

***64. Industry information included in this Red Herring Prospectus has been derived from publicly available industry sources. There can be no assurance that such third-party statistical, financial and other industry information is complete, reliable or accurate.***

This Red Herring Prospectus includes information on Industry in which we operate from various open and publicly applicable sources. For further details, please see chapter titled “*Industry Overview*” beginning on page 127 of this Red Herring Prospectus. The data has been furnished by independent agencies on their websites and has no relationship with our Company, its Promoters, Directors, or the Book Running Lead Manager as on the date of this Red Herring Prospectus. The data used in these sources may have been reclassified by us for the purposes of presentation and may also not be comparable.

***65. We will continue to be controlled by our Promoters and Promoter Group members after completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.***

As on the date of this Red Herring Prospectus, our Promoters and members of our Promoter Group hold 100% of the pre-Issue paid-up share capital of our Company. Consequently, they will continue to exercise significant control over us after the Issue and will have the ability to influence matters requiring shareholders' approval, including the ability to appoint Directors to our Board, the approval of significant actions at Board and at shareholders' meetings, such as issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot assure you that our Promoters and members of our Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business. For further details regarding our shareholding, please refer to chapter titled "**Capital Structure**" beginning on page 91 of this Red Herring Prospectus.

***66. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

## **EXTERNAL RISK FACTORS**

***67. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.***

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and

state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency and may result in significant additional taxes becoming payable.

***68. An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our business, results of operations and financial condition.***

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

***69. Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.***

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighboring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

***70. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock prices.***

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

***71. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.***

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

***72. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

***73. Investors outside India subscribing to this Issue may not be able to enforce any judgment of a foreign court against us, except by way of a suit in India.***

Our Company is a limited liability company incorporated under the laws of India. Our Company's assets are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons in India or to

enforce judgments obtained against our Company or such parties outside India. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions, including the United Kingdom, Singapore, UAE, and Hong Kong. A judgment from certain specified courts located in a jurisdiction with reciprocity must meet certain requirements of the Code of Civil Procedure, 1908, as amended. The United States has not been notified as a reciprocating territory. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Such amount may also be subject to income tax in accordance with applicable law. Consequently, it may not be possible to enforce in an Indian court any judgment obtained in a foreign court, or effect service of process outside of India, against Indian companies, entities, their directors and executive officers and any other parties' resident in India. Additionally, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner.

***74. Instability in financial markets could materially and adversely affect our results of operations and financial condition.***

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

***75. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.***

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

***76. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.***

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investor's reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

***77. If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate thereby reducing our margins.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the government has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

***78. The requirements of being a public listed company may strain our resources and impose additional requirements.***

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

***79. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

***80. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time***

Following the Issue, we will be subject to a daily "Circuit Breaker" imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares.

***81. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

## ***82. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.***

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

## ***83. Our ability to attract foreign investment is subject to regulatory approvals and conditions.***

Foreign investments into Indian companies are regulated by the Government of India (“**GoI**”) and the Reserve Bank of India (“**RBI**”). For example, under its consolidated foreign direct investment policy (effective from October 15, 2020) (“**FDI Policy**”), Foreign Exchange Management Act, 1999 and the rules and regulations thereunder, each as amended (“**FEMA**”), the Government of India has specific prescribed requirements and conditionalities with respect to the level of foreign investment permitted in certain business sectors, both, without prior regulatory approval (“**Automatic Route**”) and with prior regulatory approval (“**Approval Route**”).

Our Company is engaged in the business of single brand retail and multi-brand retail trading. For companies engaged in single brand retailing, the FDI Policy and FEMA rules allow 100% foreign investment under the automatic route. For companies engaged in multi-brand retail trading, the FDI Policy and FEMA rules prescribe a cap of 51% on foreign investment under the government approval route, subject to specific conditions. These conditions include: (i) minimum investment of US Dollars 100 million; (ii) mandatory investment of at least 50% of the first tranche in back-end infrastructure within three years; (iii) local sourcing of at least 30% of the value of manufactured/processed products from Indian micro, small and medium industries; (iv) restriction on retail outlet locations to cities with population over 10 Lakh or as approved by respective State Governments; and (v) prohibition on e-commerce activities. Additionally, retail sales outlets may only be established in those States/Union Territories which have agreed to allow FDI in multi-brand retail trading under this policy, such as Andhra Pradesh, Assam, Delhi, Haryana, and others as specified in the FDI Policy.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and falls under any of the exceptions specified by the RBI, then the RBI’s prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure the investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms, or at all.

In terms of Press Note 3 of 2020, dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade (“**DPIT**”), the foreign direct investment policy has been recently amended to state that all investments under the foreign direct investment route by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the GoI.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction or purview, such subsequent change in the beneficial ownership will also require approval of the GoI. Furthermore, on April 22, 2020, the Ministry of Finance, GoI has also made similar amendment to the FEMA rules. While the term “beneficial owner” is defined under the Prevention of Money-Laundering (Maintenance of Records) Rules, 2005 and the General Financial Rules, 2017, neither the foreign direct investment policy nor the FEMA Rules provide a definition of the term “beneficial owner”. The interpretation of “beneficial owner” and enforcement of this regulatory change involves certain uncertainties, which may have an adverse effect on our ability to raise foreign capital. Further, there is uncertainty regarding the timeline within which the said approval from the GoI may be obtained, if at all.

## ***84. Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in

excess of ₹ 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

***85. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Individual Bidders are not permitted to withdraw their Bids after the Bid/ Issue Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Individual Investors and Eligible Employees can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment within Three Working Days from the Bid/Issue Closing Date, or such other period as may be prescribed by the SEBI, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, financial condition or cash flows may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

***86. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure ("ASM") and Graded Surveillance Measures ("GSM") by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.***

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple, market capitalization etc. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, networth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

***87. The determination of the Price Band is based on various factors and assumptions and the Issue price of the Equity Shares may not be indicative of the market price of the Equity Shares after the issue. Further, the current market price of some securities listed pursuant to certain previous issues managed by the BRLM is below their respective issue prices.***

The determination of the Price Band is based on various factors and assumptions and will be determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the issue Price of the Equity Shares will be determined by our Company, in consultation with the Book Running Lead Manager through the Book Building Process. The Issue Price will be based on numerous factors, including the factors described in "***Basis for Issue Price***" on page 115 of this Red Herring Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. Further, the BRLM has previously handled issues wherein the market price of the issued shares declined below the Issue price of shares within 30 days of their listing and in certain cases continued to trade at a price lower than their Issue price on the 180th day from listing. For details of the price information of the past issues handled by the BRLM, see chapter titled "***Other Regulatory and Statutory Disclosures***" on page 266 of this Red Herring Prospectus.

In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. As a result of these factors, there can be no assurance that the investors will be able to resell Equity Shares at or above the Issue Price resulting in a loss of all or part of the investment.

The SEBI ICDR Regulations have permitted the Issue of securities to the public through the Book Building Process, wherein allocation to the public shall be made as per Regulation 253 of the SEBI ICDR Regulations.

The Issue is being made through the Book Building Process wherein 50% of the Net Issue shall be available for allocation on a proportionate basis to QIBs, provided that our Company may in consultation with the BRLM allocate upto 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations (the “**Anchor Investor Portion**”), out of which one third shall be reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the Anchor Investor Issue Price. Five percent of the QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only, and the remainder of the QIB Portion shall be available for allocation on a proportionate basis to all QIB Bidders, including Mutual Funds, subject to valid Bids being received at or above the Issue Price.

Further, not less than 15% of the Net Issue shall be available for allocation on a proportionate basis to Non-Institutional Bidders and not less than 35 % of the Net Issue shall be available for allocation to Individual Bidders, in accordance with the SEBI ICDR Regulations, subject to valid Bids being received at or above the Issue Price.

However, under – subscription, if any, in the QIB Portion will not be allowed to be met with spill over from other categories or a combination of categories.

In terms of SEBI circular no. CIR/CFD/POLICYCELL/11/2015 dated November 10, 2015, and the SEBI ICDR Regulations, all the investors applying in a public Issue shall use only ASBA process for application providing details of the bank account which will be blocked by the SCSBs for the same. Further, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 01, 2018, Individual Bidders applying in public issue may use either ASBA facility for making application or also can use UPI as a payment mechanism with ASBA for making application. For details in this regards, specific attention is invited to the chapter titled “**Issue Procedure**” beginning on page 291 of the Red Herring Prospectus.

Subsequently, for applications by Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later (“UPI Phase II”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. However, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Thereafter final reduced timeline of T+3 days for the UPI Mechanism for applications by Individual Investors (“UPI Phase III”), as may be prescribed by SEBI. Further, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, and circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, has introduced certain additional measures for streamlining the process of initial public offers and redressing investor grievances. This circular is effective for initial public offers opening on / or after May 1, 2021, except as amended pursuant to SEBI circular SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Red Herring Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹500,000 shall use the UPI Mechanism.

The process of Book Building under the SEBI ICDR Regulations is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to making a Bid or application in the Issue.

For further details on the method and procedure for Bidding, please see section entitled “**Issue Procedure**” on page 291 of this Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

The size of our EBOs and MBOs varies across regions and is dependent on various factors such as availability of suitable locations in cities, approval from Brand, addressable market, lease rentals etc. Our Company proposes to open 15 new EBOs / MBOs on in the various states of India with an estimated aggregate built up area of 2,300 Sq. - our internal estimates for specifications and item requirements for setting-up EBOs and MBOs.

The table below sets forth the details of bifurcation of EBO and MBO stores to be launch along with identified cities and rationale:

Sl No.	Type of Stores (EBO/MBO)	Tentative City where stores expected to be open	State	Tier	Rationale
1	EBO	Noida	UP	Tier-II	In view of the significant growth in sales figures in Uttar Pradesh i.e. ₹ 805.61 Lakhs in FY 2023-24 to ₹ 851.79 Lakhs in FY 2024-25, i.e. an increase of 5.73 %, we propose to expand our presence across the state in Tier-II cities like Lucknow, Meerut & Noida. Existing outlets in UP have shown consistent sales growth, indicating strong market acceptance and unmet demand in nearby Tier-II cities. As compared to Tier-I cities, Tier-II cities offer less competition and untapped customer segments, allowing faster market penetration.
2	EBO	Lucknow	UP	Tier-II	
3	EBO	Meerut	UP	Tier-II	
4	MBO	Mumbai	Maharashtra	Tier-I	We plan to strengthen and expand our brands in Tier-I city like Mumbai to enable sustained and scalable growth. Mumbai has one of the highest population densities and purchasing power levels in India, offering significant revenue potential. The city hosts consumers across income segments, enabling both mass-market and premium product positioning.
5	MBO	Guwahati	Assam	Tier-II	The Company proposes to expand its operations and drive growth in Tier-II city like Guwahati. Tier-II cities in Assam have relatively low penetration of organized footwear brands, offering first-mover or early-mover advantages. Online demand and inquiries from Assam indicate offline potential and justify a physical retail presence.
6	MBO	Mohali	Punjab	Tier-II	In view of the significant growth in sales figures in Punjab i.e. from ₹ 133.73 Lakhs in FY 2023-24 to ₹ 208.00 Lakhs in FY 2024-25, i.e. an increase of 55.54 %, we propose to expand our presence, operations and drive growth in Tier-II city like Mohali. Existing outlets in Punjab have shown consistent sales growth, indicating strong market acceptance and unmet demand in nearby Tier-II cities. As compared to Tier-I cities, Tier-II cities offer less competition and untapped customer segments, allowing faster market penetration.
7	MBO	Delhi	Delhi	Tier-I	Our highest revenue contributor state-wise during the last 3 financial years is Delhi. It has contributed a significant share of total company sales i.e. 62.96% of the total sales in FY 2024-25 due to its large customer base, high transaction volumes, and strong brand recall. Even marginal improvements in performance can have a substantial impact on overall revenue. A strong presence in the national capital region is critical for brand image, media exposure, and competitive positioning. This is the reason we plan to strengthen and expand our own IP footprint in Tier-I city like Delhi to enable sustained and scalable growth.
8	EBO	Faridabad	Haryana	Tier-II	In view of the significant growth in sales figures in Haryana i.e. ₹ 943.85 Lakhs in FY 2023-24 to ₹ 1,493.95 Lakhs in FY 2024-25, i.e. a significant increase of 58.28%, we propose to expand our presence across the state in Tier-II cities like Gurgaon & Faridabad. Existing outlets in Gurgaon have shown consistent sales growth, indicating strong market acceptance and unmet demand in nearby Tier-II cities. As compared to metro cities, Tier-II cities offer less competition and untapped
9	EBO	Gurgaon	Haryana	Tier-II	
10	MBO	Gurgaon	Haryana	Tier-II	
11	EBO	Gurgaon	Haryana	Tier-II	

					customer segments, allowing faster market penetration. Going forward, we plan to deepen our presence in Tier-II cities by entering untapped areas where these brand stores are currently absent.
12	EBO	Jaipur	Rajasthan	Tier-II	The Company proposes to expand its operations and drive growth in Tier-II city like Jaipur. Tier-II city like Jaipur have relatively low penetration of organized footwear brands, offering first-mover or early-mover advantages. Online demand and inquiries from Jaipur indicate offline potential and justify a physical retail presence. As these brands are relatively new in India, we plan to initially expand them in Tier-II cities, where demand is significantly high, and subsequently scale their presence in Tier-I cities.
13	EBO	Bangalore	Karnataka	Tier-I	In view of the growth in sales figures in Karnataka i.e. ₹ 10.00 Lakhs in FY 2023-24 to ₹ 16.73 Lakhs in FY 2024-25, i.e. an increase of 67.3 %, we propose to expand our presence across the state in Tier-I city like Bangalore. Bangalore has a high concentration of young professionals with strong purchasing power, making it ideal for launching and scaling new brands. **B. Working Capital Requirements for New Exclusive Brand Outlets (EBOs) & Multi-Brand Outlets (MBOs):**

Our Company intends to launch 15 retail outlets, comprising Exclusive Brand Outlets (EBOs) and Multi-Brand Outlets (MBOs). These locations shall be strategically identified based on the Company's analysis of past sales performance through e-commerce platforms in the respective areas. The proposed outlets are designed to offer a unique and engaging shopping experience, enabling customers to directly interact with the brands, try on products, and experience their quality and style first-hand.

In line with our retail expansion plans, we will also need to maintain inventory levels across our newly established Exclusive Brand Outlets (EBOs) and Multi-Brand Outlets (MBOs). This initiative encompasses a comprehensive assortment of multiple brands, ensuring wide coverage across multiple product categories and customer preferences. A dedicated portion of the proceeds from the Issue will be allocated toward funding the working capital required for the procurement and efficient management of this inventory. By supporting optimal stock levels, we will be able to consistently meet consumer demand, capitalize on market opportunities, and strengthen our position as a multi-brand destination in the footwear segment, driving continued growth across all retail channels.

#### Explanation of Fluctuations:

Based on the Restated Financial Statements, the Company's net working capital stood at negative ₹471.28 lakhs in FY 2023, representing (-10.18%) of revenue, and improved to ₹280.38 lakhs in FY 2024, representing 2.27% of revenue. The net working capital to revenue ratio improved from (-10.18%) in FY 2023 to 2.27% in FY 2024, primarily due to a significant reduction in inventory levels and trade receivables as compared with percentage growth in revenue, which more than offset the impact of changes in trade payables and short-term provisions. This improvement reflects enhanced working capital management, supported by better inventory control and improved collection efficiency during the year.

#### 1. Inventories

During FY 2023–24, the Company witnessed a substantial increase in revenue from ₹4,630.96 lakhs to ₹12,333.26 lakhs. While purchases of stock-in-trade increased in absolute terms from ₹4,854.69 lakhs in FY 2022–23 to ₹7,201.02 lakhs in FY 2023–24, the same declined significantly as a percentage of revenue, from approximately 105% to 58%, reflecting improved procurement efficiency.

In view of the lower purchase intensity during FY 2023–24, the Company relied to a greater extent on utilization of existing inventory to support the higher scale of operations. Consequently, closing inventory as a percentage of revenue declined from 53.77% in FY 2023 to 19.72% in FY 2024, indicating improved inventory turnover and more efficient inventory management. Refer table below for comparison:

Particulars	FY 2023	FY 2024
Revenue from Operation	4,630.96	12,333.26
Purchases (₹ lakhs)	4,854.69	7,201.02
Purchases as % of Revenue	105%	58%
Closing Inventory (₹ lakhs)	2,489.96	2,432.42
Inventory as % of Revenue	53.77%	19.72%

The higher level of purchases and inventory carried in the previous year enabled the Company to meet the significant growth in revenues during FY 2023–24 by utilising existing stock. As a result, incremental purchases during the year were relatively lower, leading to reduced closing inventory levels. This reflects efficient inventory planning, improved turnover, and optimal utilisation of resources leading to decrease in working capital requirement by 34.05%.

#### 2. Trade Receivables

The Company has entered into a Agreement dated January 11, 2024, pursuant to which the Company has been appointed as the non-exclusive mono-brand reseller of licensed footwear, apparel and accessories of Brand 1 in the approved locations in India and The Company has entered into a License Agreement with Brand 2 dated January 01, 2024 for the non-exclusive manufacturing, distribution and sale of licensed footwear, apparel and accessories of Brand 2 in India, Sri Lanka, Nepal and Maldives which. These significant developments accelerated the sales exponentially in FY 2024 as compared to FY 2023 especially revenue in Footwear segment from ₹4,025.04 lakhs in FY 2022–23 to ₹11,797.25 lakhs in FY 2023–24.

In consideration with better Payment terms with new entrants the issuer company managed to maintain Trade Receivable at 15 days in FY 2023-24 as compared to 30 in FY 2022-23. In absolute terms the Trade Receivables has increased from ₹475.63 lakhs in FY 2022–23 to ₹512.91 lakhs in FY 2023–24, whereas due to exponential growth in Revenue the change in Trade Receivable is 10.27% in FY 2022-23 to 4.16% in FY 2023-24, in reflecting a change in Working Capital to Revenue ratio by -6.11%.

### 3. Trade Payable

The trade payable as a percentage of revenue has decreased from 36.50% in FY 2022-23 to 19.05% in FY 2023-24. However, Trade Payable depends on the value of purchase during the year. As mentioned in point 1 above in this reply, the purchase has decreased in current year leading to decrease in trade payable also. The detail of the same is mentioned below:

Particulars	FY 2023	FY 2024
Revenue from Operation	4,630.96	12,333.26
Purchases (₹ lakhs)	4,854.69	7,201.02
Purchases as % of Revenue	105%	58%
Trade Payables	1,690.08	2,350.06
Trade payable as % of Revenue	36.50%	19.05%
Trade payable as % of purchase	34.81%	32.64%

The trade payable as a percentage of purchase has decreased nominally by 2.18% reflecting no major change over the period. However, as a percentage of revenue the working capital requirement has increased by 17.44%.

### 4. Other Current Liabilities:

There was a significant decrease in Other Current Liabilities from ₹1,757.32 lakhs in FY 2022-23 to ₹199.60 lakhs in FY 2023-24, primarily attributable to a significant reduction in advances from customers, which declined from ₹1,715.47 lakhs in FY 2022-23 to ₹23.01 lakhs in FY 2023-24. During 2022-23 the company was in process to enter in to multiple commercial agreements which were executed in FY 2023-24. The substantial portion of customer advances received in FY 2022-23 were settled against revenue during FY 2023-24 which in line with growth in Revenues in FY 2023-24 as compared to FY 2022-23.

Other components of current liabilities, such as interest accrued but not due, expenses payable, and statutory dues payable, remained relatively stable or increased marginally and therefore did not materially impact the overall decrease.

### 5. Other components

There are other components of working capital which lead to nominal impact on over all change in Working capital to Revenue ratio from FY 2023 to FY 2024 by 1.17%.

### Explanation of Fluctuations:

The net working capital to revenue ratio increased from 2.27% in FY 2023–24 to 17.53% in FY 2024–25. This is primarily due to significant rise in trade receivables, which outweighed the increase in trade payables and short-term provisions, resulting in a higher working capital requirement relative to revenue.

#### 1. Trade Receivables:

The Average estimated Trade Receivable to Revenue holding days increased from 15 days in FY 2023-24 to 57 days in FY 2024 – 25 which spiked by around 400 %. The primary reason for enhanced Average estimated Trade Receivable days is that around 78 % of the Trade Receivable Balance out of the Total Trade Receivable as on March 31<sup>st</sup> 2025 were outstanding for around 61 days to 566 days and the funds were outstanding for a longer period then average estimated holding days of 57 days for some Debtors. Details of such debtors' balances are as follows:

SL	Party Name	Amount Receivable as on March 31st 2025 (₹ in lakhs)	% of Total Trade Receivable	No of Days, the Balance is outstanding
1	Customer 1	45.35	1.21%	566 Days

## 2. Trade Payables:

The Average estimated Trade Payables to Revenue holding days increased from ₹2,350.06 lakhs (102 days) in FY 2023-24 to ₹3,346.26 lakhs (183 days) in FY 2024 – 25 leading to increase in Trade Payable by ₹996.20. The primary reason for enhanced Average Estimated Trade payable days is attributable to a Brand 1 whose outstanding alone was ₹1,090.79 lakhs contributing 32.60 % of the Trade Payables Balance out of the Total Trade Payable as on March 31<sup>st</sup> 2025. The funds were outstanding for a longer period around 260 days as compared to the average estimated holding days of 183 days for FY 2024-25. This led to decrease in working capital requirement by 5.68%.

## 3. Short term provisions

Short-term provisions increased from ₹252.01 lakhs in FY 2023–24 to ₹721.16 lakhs in FY 2024–25 increasing from 2.04% to 5.33%. This increase is primarily attributable to a higher provision for income tax, consequent to the increase in profitability during the year. The higher tax provisioning has resulted in a reduction in working capital by 3.29%.

## 4. Other components

There are other components of working capital which lead to nominal impact on over all change in Working capital to Revenue ratio from FY 2024 to FY 2025 by 0.76%.

### Rationale for the increase in working capital requirement for the estimated period.

Net Working Capital (I)-(II)	2,371.23	1,961.66	17.53%	13.55%	(3.98) %

### Justification of Working Capital Changes

The Net Working Capital to Revenue ratio is projected to decrease from ₹2,371.23 lakhs (17.53% of revenue) in FY 2025 to ₹1,961.66 lakhs (13.55% of revenue) in FY 2026, reflecting a net change of 3.98% of revenue. This change is primarily driven by the reduction in trade receivables and trade payables, partially offset by increases in inventories and other current assets, with variations in holding periods reflecting operational adjustments.

#### 1. Inventories

Inventories are estimated to increase from ₹2,447.37 lakhs (18.09% of revenue) in FY 2025 to ₹3,030.95 lakhs (20.93% of revenue) in FY 2026, representing a rise of 2.84% of revenue. The inventory holding period is projected to increase from 157 days to 171 days, reflecting higher stocking requirements to support anticipated growth in demand and ensure product availability across geographies. This leads to a moderate increase in working capital requirement.

#### 2. Trade Receivables

Trade receivables are estimated to decrease significantly from ₹3,736.17 lakhs as at March 31, 2025 to ₹422.38 lakhs in FY 2025–26, declining from 27.62% of revenue to 2.92% of revenue. Under normal operating conditions, the Company's standard credit period ranges between 9 days to 30 days. The higher receivable holding period observed during FY 2024–25 was exceptional in nature and driven by delayed realisations from a limited set of customers rather than a structural change in the Company's credit policy. The elevated trade receivable balance as at March 31, 2025 was primarily attributable to delayed collections from certain large customers, wherein approximately 78% of the total trade receivables were outstanding for periods ranging from 61 days to 566 days, resulting in an increase in average estimated trade receivable holding days to 57 days during FY 2024–25.

During FY 2025–26, the Company expects substantial recovery of these long-outstanding balances. Further, the Company has strengthened its receivable management framework by tightening credit terms, enhancing follow-up mechanisms, and selectively shifting to advance or shorter credit cycles. Accordingly, trade receivables are expected to normalise in line with the Company's regular credit period of 9 to 30 days in FY 2025–26, resulting in a significantly lower closing balance and reduced trade receivables as a percentage of revenue.

#### 3. Trade Payables

Trade payables are estimated to reduce from ₹3,346.26 lakhs as at March 31, 2025 to ₹974.54 lakhs in FY 2025–26, decreasing from 24.73% of revenue to 6.73% of revenue.

During FY 2025–26, the Company expects gradual improvement in cash flows with the normalisation of trade receivable cycles in line with its regular credit period. In view of improved liquidity and prudent cash flow management, the Company proposes to reduce its reliance on extended supplier credit and make payments to suppliers within shorter timelines, with a view to strengthening supplier relationships and negotiating more favourable commercial terms.

#### 4. Other Components

There are other components of working capital which are expected to lead to nominal impact on over all change in Working capital to Revenue ratio form FY 2025 to FY 2026 by 0.13%.

#### Justification for Working Capital Changes (FY 2026–27)

The net working capital is estimated to increase slightly from ₹1,961.66 lakhs in FY 2026 to ₹2,852.23 lakhs in FY 2027, representing a minor change in the working capital to revenue ratio of 0.93%. This marginal change is primarily due to:

1. **Increase in Inventories:** Inventories are expected to rise from ₹3,030.95 lakhs to ₹4,937.25 lakhs (from 20.93% to 21.83% of revenue), reflecting planned growth in stock to support higher sales.
2. **Current Assets:** Other current assets and short-term loans and advances show minor variations from 486.34 lakhs in FY 2025-26 to 583.61 lakhs in FY 2026-27, contributing to a negligible net effect.
3. **Current Liabilities:** Trade payables and other current liabilities remain relatively stable as a percentage of revenue, partially offsetting the increase in assets.

Overall, the working capital position remains healthy, with no significant fluctuations relative to revenue, indicating effective management of short-term assets and liabilities.

#### Reasons for Significant Changes in Working Capital Holding Periods

##### Sundry Debtors Holding Period:

1. **Decrease from 30 days (FY 2022-23) to 15 days (FY 2023-24):**

The Sundry Debtors Holding Period decreased from 30 days in FY 2022-23 to 15 days in FY 2023-24, representing a reduction of 15 days. This significant decrease in the receivable holding period is primarily attributable to an improvement in the company's receivables collection efficiency, as indicated by a substantial drop in the average trade receivables despite a marked increase in net sales during FY 2023-24. The company's higher sales volume and enhanced collection processes, resulted in a faster conversion of receivables into cash, thereby reducing the time funds were tied up in accounts receivable.

2. **Increase from 15 days (FY 2023-24) to 57 days (FY 2024-25):**

The Sundry Debtors Holding Period increased from 15 days in FY 2023-24 to 57 days in FY 2024-25, reflecting an increase of 42 days. This substantial increase in the receivable cycle is primarily attributable to the significant rise of ₹3,223.26 lakhs in trade receivables during FY 2024-25, which outpaced the growth in net sales. The increase in trade receivables is mainly driven by the higher volume of B2B sales during the year.

3. **Decrease from 57 days (FY 2024-25) to 52 days (FY 2025-26):**

The Sundry Debtors Holding Period decreased from 57 days in FY 2024-25 to 52 days in FY 2025-26, reflecting a reduction of 5 days. This improvement in the receivable cycle is primarily attributable to the company's higher sales volume and enhanced collection processes, resulted in a faster conversion of receivables into cash, thereby reducing the time funds were tied up in accounts receivable.

4. **Decrease from 52 days (FY 2025-26) to 9 days (FY 2026-27):**

The Sundry Debtors Holding Period decreased significantly from 52 days in FY 2025-26 to 9 days in FY 2026-27, reflecting a reduction of 43 days. This substantial improvement in the receivable cycle is primarily attributable to the

increase in cash sales resulting from the opening of new retail stores during FY 2026–27, thereby reducing the overall debtor levels.

**Sundry Creditors Holding Period:**

**1. Increase from 78 days (FY 2022-23) to 102 days (FY 2023-24):**

The Sundry Creditors Holding Period increased from 78 days in FY 2022-23 to 102 days in FY 2023-24, representing an extension of 24 days. This notable increase in the payable holding period is primarily attributable to the rise in average trade payables compared to the increase in credit purchases, suggesting that the company took longer to settle its supplier obligations during FY 2023-24.

**2. Increase from 102 days (FY 2023-24) to 183 days (FY 2024-25):**

The Sundry Creditors Holding Period increased from 102 days in FY 2023-24 to 183 days in FY 2024-25, representing a jump of 81 days. This substantial rise in the payable holding period is primarily due to the significant increase in average trade payables compared to the decline in credit purchases during FY 2024-25 due to existing inventory.

**3. Decrease from 183 days (FY 2024-25) to 135 days (FY 2025-26):**

The Sundry Creditors Holding Period decreased from 183 days in FY 2024–25 to 135 days in FY 2025–26, reflecting a reduction of 49 days. This decline in the payable holding period is primarily attributable to decline in average trade payable. The decrease in trade payables is further explained by the settlement of outstanding payables using the IPO proceeds

**4. Decrease from 135 days (FY 2025-26) to 52 days (FY2026-27):**

The Sundry Creditors Holding Period decreased from 135 days in FY 2025–26 to 52 days in FY 2026–27, representing a reduction of 83 days. This sharp decline in the payable holding period is primarily attributable to a significant contraction in average trade payables relative to the substantial increase in the cost of goods sold (COGS) during FY 2026–27. The decrease in trade payables is further explained by the settlement of outstanding payables using the IPO proceeds.

**Inventory Holding Period:**

**1. Decrease from 190 days (FY 2022-23) to 124 days (FY 2023-24):**

The Inventory Holding Period decreased from 190 days in FY 2022-23 to 124 days in FY 2023-24, representing a reduction of 66 days. This considerable improvement is primarily attributable to a sharp increase in cost of goods sold (COGS) during FY 2023-24, while average inventory levels remained stable. The decrease is likely driven by enhanced inventory management practices, improved sales velocity, and optimized stock turnover, all of which contributed to more efficient conversion of inventory into revenue and reduced days inventory outstanding.

**2. Increase from 124 days (FY 2023-24) to 157 days (FY 2024-25):**

The Inventory Holding Period increased from 124 days in FY 2023-24 to 157 days in FY 2024-25, representing a rise of 33 days. This increase in the inventory holding period is mainly attributable to a decline in cost of goods sold (COGS) during FY 2024-25 while average inventory levels remained nearly flat compared to the previous year. The slower inventory turnover may have resulted from accumulation of stock in anticipation of future demand, leading to a longer duration for which inventory was held before being converted into revenue.

**3. Increase from 157 days (FY 2024-25) to 171 days (FY 2025-26):**

The Inventory Holding Period increased from 157 days in FY 2024-25 to 171 days in FY 2025-26, representing a rise of 14 days. This increase is mainly attributable to a significant buildup in average inventory during FY 2025-26, while the cost of goods sold (COGS) grew at a slower rate. The significant buildup in average inventory is due to proposed launch of 3 new retail stores during FY 2025-26.

**4. Decrease from 171 days (FY 2025-26) to 165 days (FY 2026-27):**

The Inventory Holding Period decreased from 171 days in FY 2025-26 to 165 days in FY 2026-27, representing a reduction of 6 days. This improvement is primarily attributable to a significant increase in Cost of Goods Sold (COGS) during FY 2026-27, while average inventory levels increased proportionately to support retail network expansion. The decrease in holding period, despite higher absolute inventory levels, is driven by enhanced inventory management practices, improved sales velocity across the expanded store network, and optimized stock turnover, all of which contributed to more efficient conversion of inventory into revenue and reduced days inventory outstanding.

Outlined below are the possible special tax benefits available to the Company and its shareholders as per the Income tax Act, 1961 (“IT Act”) as amended from time to time and applicable for financial year 2025-26 relevant to assessment year 2026-27 (AY 2026-27) and Indirect Tax Laws as amended from time to time and applicable for financial year 2025-26. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in the Equity Shares particularly since certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

### **I. Under the IT Act**

#### **1. Special Tax Benefits to the Company**

##### **a) Lower corporate tax rate on income of domestic companies under Section 115BAA of the ITA**

The Taxation Laws (Amendment) Act, 2019 introduced section 115BAA wherein domestic companies are entitled to avail a concessional tax rate of 22% (plus applicable surcharge and cess) on fulfillment of certain conditions.

The option to apply for this tax rate is available from Financial Year (FY) 2019-20 relevant to Assessment Year (AY) 2020-21 and the option once exercised through filing of Form 10IC on the Income tax portal shall apply to subsequent assessment years. The concessional tax rate of 22% is subject to the company not availing any of the following deductions under the provisions of the ITA:

- Section 10AA: Tax holiday available to units in a Special Economic Zone.
- Section 32(1) (iia): Additional depreciation.
- Section 32AD: Investment allowance.
- Section 33AB/33ABA: Tea coffee rubber development expenses/site restoration expenses.
- Section 35(1)/35(2AA)/ 35(2AB): Expenditure on scientific research.
- Section 35AD: Deduction for capital expenditure incurred on specified businesses.
- Section 35CCC/35CCD: expenditure on agricultural extension /skill development.
- Chapter VI-A except for the provisions of section 80JJAA and section 80M.

The total income of a company availing the concessional rate of 25.168% (i.e., 22% along with surcharge of 10% and health and education cess of 4%) is required to be computed without set off any carried forward loss and depreciation attributable to any of the aforesaid deductions/incentives. A company can exercise the option to apply for the concessional tax rate by filing Form 10IC on or before the due date of filing return of income under section 139(1) of the ITA. Further, provisions of Minimum Alternate Tax (‘MAT’) under section 115JB of the ITA shall not be applicable to companies availing this reduced tax rate, thus, any carried forward MAT credit also cannot be claimed. The provisions do not specify any limitation/condition on account of turnover, nature of business or date of incorporation for opting for the concessional tax rate. Accordingly, all existing as well as new domestic companies are eligible to avail this concessional rate of tax.

##### **b) Deductions in respect of employment of new employees under Section 80JJAA of the ITA**

As per section 80JJAA of the ITA, where a company is subject to tax audit under section 44AB of the ITA and derives income from business, it shall be allowed to claim a deduction of an amount equal to 30% of additional employee cost incurred in the course of such business in a previous year, for 3 consecutive assessment years including the assessment year relevant to the previous year in which such additional employment cost is incurred.

The eligibility to claim the deduction is subject to fulfilment of prescribed conditions specified in sub-section (2) of section 80JJAA of the ITA. The company is presently not claiming deduction under section 80JJAA of the ITA.

**c) Deduction with respect to inter-corporate dividends –Section 80M of the ITA**

As per the provisions of section 80M of the ITA, inserted with effect from 01 April 2020 i.e., AY 2021-22, a domestic company shall be allowed to claim a deduction of dividend income earned from any other domestic company or a foreign company or a business trust. The amount of deduction so claimed should not exceed the amount of dividend distributed by it on or before the due date. In this case, due date means one month prior to the due date of furnishing return of income under sub section (1) of section 139 of the ITA.

The company has one group company on which company has invested and thus, the company should be eligible to claim deduction under section 80M of the ITA in respect of dividends received (if any) from these and further distributed to its shareholders subject to fulfillment of other conditions.

**2. Special Tax Benefits available to Shareholders**

**a) Dividend Income**

Dividend income earned by the shareholders would be taxable in their hands at the applicable rates. However, in the case of domestic corporate shareholder, benefit of deduction under section 80M of the ITA would be available on fulfilling the conditions. Further, Finance Act 2021 restricted surcharge to 15% in respect of dividend income.

**NOTES:**

- The above statement of Possible Special Tax Benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
- The above statement covers only certain Special Tax Benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This statement also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.

**II. Under the Indirect Tax Laws**

**3. Special Indirect Tax Benefits available to the Company**

**a) Benefits under the Central Goods and Services Act, 2017, respective State Goods and Services Tax Act, 2017, Integrated Goods and Services Tax Act, 2017 (read with relevant Rules prescribed thereunder)**

- Under the GST regime, all supplies of goods and services which qualify as export of goods or services are zero-rated, that is, these transactions attract a GST rate of zero per cent.
- There are two mechanisms for claiming refund of accumulated ITC against export. Person can export under Bond/ Letter of Undertaking (LUT) as zero-rated supply and claim refund of accumulated Input Tax Credit or

person may export on payment of integrated Goods and Services Tax and claim refund thereof as per the provisions of Section 54 of Central Goods and Services Tax Act, 2017.

- Thus, the GST law allows the flexibility to the exporter (which will include the supplier making supplies to SEZ) to claim refund upfront as integrated tax (by making supplies on payment of tax using ITC) or export without payment of tax by executing a Bond/LUT and claim refund of related ITC of taxes paid on inputs and input services used in making zero rated supplies.

The Company is exporting the goods with payment of Integrated GST and is entitled to claim refund of accumulated ITC on such exports in terms of GST law.

#### **b) Benefits of Duty Drawback scheme under the Customs Act, 1962**

Duty drawback is the export benefit given to rebate the custom duties charged on imported materials which are used for manufacture of exported goods.

The Company is currently availing benefit under this scheme.

#### **4. Special Tax Benefits available to Shareholders**

Shareholders of the Company are not eligible to special tax benefits under the provisions of the Central Goods and Services Act 2017 (read with Central Goods and Services Tax Rules, circulars, notifications), respective State Goods and Services Tax Act, 2017 (read with respective State Goods and Services Tax Rules, circulars, notifications), Integrated Goods and Services Tax Act, 2017 (read with Integrated Goods and Services Tax Rules, circulars, notifications), The Foreign Trade (Development and Regulation) Act, 1992 (read with Foreign Trade Policy 2015-20), Customs Act, 1962 (read with Custom Rules, circulars, notifications), Customs Tariff Act, 1975 (read with Custom Tariff Rules, circulars, notifications)

The Shareholders of the Company are not entitled to any Special Tax Benefits under indirect tax laws.

***INVESTORS ARE ADVISED TO CONSULT THEIR OWN TAX CONSULTANT WITH RESPECT TO THE TAX IMPLICATIONS OF AN INVESTMENT AND CONSEQUENCES OF PURCHASING, OWNING AND DISPOSING OF EQUITY SHARES IN THE SECURITIES, PARTICULARLY IN VIEW OF THE ACT THAT CERTAIN RECENTLY ENACTED LEGISLATION MAY NOT HAVE A DIRECT LEGAL PRECEDENT OR MAY HAVE A DIFFERENT INTERPRETATION ON THE BENEFITS, WHICH AN INVESTOR CAN AVAIL IN THEIR PARTICULAR SITUATION.***

We hereby give our consent to include our above referred opinion regarding the tax benefits available to the Company and to its shareholders in the offer document.

#### 1. Economic Outlook

##### 1.1 Global Economy

The global economy is projected to grow at a moderate pace over the forecast period amid persistent macroeconomic, financial, and geopolitical uncertainties. Global output is projected to grow by 3.2 percent in 2025 and 3.1 percent in 2026, which is below the pre-pandemic average growth rate of 3.7 percent recorded during the period from 2000 to 2019. Growth prospects reflect tighter financial conditions in several advanced economies, elevated trade policy uncertainty, and geopolitical tensions, partially offset by domestic demand in select emerging market economies.

Global inflation is projected to decline over the forecast period, supported by easing supply-side pressures and moderation in commodity prices. Inflation outcomes are expected to remain uneven across economies. While inflation in several emerging market economies is projected to approach target levels, price pressures in certain advanced economies, particularly the United States, are projected to remain above central bank targets. Risks to the inflation outlook include potential tariff escalation, geopolitical disruptions affecting energy and commodity markets, and climate-related supply shocks.

*World Economic Outlook - Real GDP growth (in %) - International Monetary Fund*

Global growth projections indicate an uneven profile across regions. Among advanced economies, growth is projected to remain modest during the forecast period. The United States economy is projected to expand by approximately 2.0% in both 2025 and 2026, supported by private consumption and investment, while facing constraints from tight labour market conditions, elevated interest rates, and policy uncertainty.

In the euro area, economic growth is projected at approximately 1.0% in 2025 and 1.2% in 2026, supported by investment activity and net exports, but constrained by subdued household consumption, weak industrial output, and policy uncertainty. Other advanced economies are projected to grow at a modest pace, with outcomes influenced by exchange rate movements, domestic policy settings, and global trade conditions. Japan's economy is projected to grow at around 0.6% in both 2025 and 2026, reflecting weak domestic demand and demographic factors.

Emerging market and developing economies are projected to grow by over 4.0% in 2025 and 2026, supported primarily by domestic demand, investment activity, and gradual policy adjustments. Within Emerging and Developing Asia, growth is projected to be comparatively stronger. China's economy is projected to grow by approximately 5.0% in 2025 and 4.5% in 2026, supported by fiscal measures and stabilisation in manufacturing activity, although vulnerabilities in the property sector and subdued consumer confidence continue to weigh on the outlook. India is projected to be among the fastest-growing major economies globally, with growth estimated at approximately 6.6% in both 2025 and 2026, supported by domestic consumption, public capital expenditure, and improving private investment conditions.

In the Middle East and Central Asia, economic growth is projected at 3.4% in 2025 and 3.5% in 2026, supported by higher oil production and government spending in major oil-exporting economies. Saudi Arabia's growth is projected at 3.6%

in 2025 and 3.9% in 2026, reflecting policy support and increased hydrocarbon output. Growth in Latin America and the Caribbean is projected at 2.2% in 2025 and 2.4% in 2026, reflecting modest expansion amid structural constraints and fiscal pressures. Emerging and Developing Europe is projected to grow by 1.8% in 2025 and 2.2% in 2026, weighed down by weak momentum and geopolitical uncertainties.

## **Key Considerations**

### **1. Global Growth Below Long-Term Average**

World GDP growth projected at 3.2 percent in 2025 and 3.1 percent in 2026 remains below long-term historical averages, reflecting structural constraints, tighter financial conditions, and elevated policy uncertainty.

### **2. Divergence Between Services and Manufacturing Activity**

Services activity is projected to expand at a relatively stronger pace, supported by consumption and information-based sectors, while manufacturing activity remains uneven due to supply chain adjustments and trade-related frictions.

### **3. Disinflation with Uneven Outcomes Across Economies**

Inflation is projected to moderate over the forecast period, although outcomes vary across regions. Advanced economies are projected to experience slower convergence toward inflation targets compared to several emerging market economies.

### **4. Divergent Monetary Policy Stances**

Monetary policy paths are projected to differ across economies, reflecting variations in inflation dynamics, labour market conditions, and domestic growth considerations. These differences may contribute to volatility in capital flows and exchange rates.

#### ***5. Trade Activity Affected by Policy Uncertainty***

Global trade activity is projected to remain subject to policy-related uncertainty, including tariff measures and trade restrictions, which may affect supply chain configurations and cross-border investment decisions.

#### ***6. Financial Conditions and Fiscal Vulnerabilities***

Financial conditions are projected to remain sensitive to shifts in monetary policy expectations and risk sentiment. Elevated fiscal deficits and rising public debt levels in several advanced economies pose risks to long-term debt sustainability and financial stability.

#### ***7. Geopolitical Risks and Policy Uncertainty***

Geopolitical developments, particularly in the Middle East and Eastern Europe, represent significant sources of downside risk to the global outlook, with potential implications for energy markets, commodity prices, and global financial conditions.

#### ***8. Structural Vulnerabilities in Financial Systems***

The growing role of non-bank financial institutions and private credit markets increases interconnectedness within the global financial system, potentially amplifying contagion risks during periods of financial stress.

### **1.2 Overview of the Indian economy**

India's economy continued to exhibit resilience during the second quarter (July–September) of FY 2025-26, with Gross Domestic Product (GDP) at current prices estimated at ₹85.25 lakh crore, registering a year-on-year growth of 8.7 percent. In real terms, GDP expanded by 8.2 percent during the quarter, marking a significant acceleration compared to the 5.6 percent growth recorded in the corresponding quarter of the previous year. The improvement in growth momentum during Q2 reflects a shift in the composition of growth, led by a sharp acceleration in manufacturing activity within the secondary sector, while services provided stability and the primary sector remained subdued due to weakness in mining and quarrying.

Economic activity during the quarter was underpinned by strong domestic demand conditions, as reflected in sustained private consumption and resilient investment activity. While global economic uncertainties, geopolitical tensions and moderation in external demand continued to pose challenges, the Indian economy remained largely insulated due to its domestic demand orientation. High-frequency indicators for Q2 FY 2025-26, including industrial production, credit growth and services activity, pointed to steady underlying momentum, reinforcing confidence in India's near- to medium-term growth outlook.

#### ***High Frequency Indicators – Industry***

### High Frequency Indicators – Services

Source: [RBI Bulletin October 2025](#)

GDP at current prices stood at ₹85.25 lakh crore during Q2 FY 2025-26, with growth supported primarily by private consumption and fixed investment. The expenditure composition highlights the continued dominance of household spending in driving economic activity, while capital formation remained stable. At the same time, elevated import demand resulted in net exports acting as a moderating factor for headline growth.

**Private Final Consumption Expenditure (PFCE)**

Private Final Consumption Expenditure increased to ₹53.29 lakh crore in Q2 FY 2025-26, accounting for 62.5 percent of GDP. In real terms, PFCE recorded a year-on-year growth of 7.9 percent, indicating sustained household demand during the quarter. Urban consumption remained resilient, supported by discretionary spending, stable employment conditions and credit availability. Rural consumption showed gradual improvement, aided by stable agricultural output and moderation in food inflation, although growth remained measured rather than robust. Consumption trends were further corroborated by sustained growth in Goods and Services Tax collections and digital payment transactions during the quarter.

**Government Final Consumption Expenditure (GFCE)**

Government Final Consumption Expenditure stood at ₹7.73 lakh crore in Q2 FY 2025-26, with its share in GDP moderating to 9.1 percent. The slowdown in GFCE reflects the government’s continued emphasis on fiscal consolidation and expenditure rationalisation. Despite this moderation, government spending on public administration, defence and welfare-related services continued to provide a stable base of demand, ensuring that public consumption remained supportive of overall economic activity during the quarter.

**Gross Fixed Capital Formation (GFCF)**

Gross Fixed Capital Formation amounted to ₹26.01 lakh crore in Q2 FY 2025-26, representing 30.5 percent of GDP. Investment activity remained resilient during the quarter, supported by ongoing public infrastructure projects and steady private sector capital expenditure. While investment growth did not accelerate sharply, continued spending on manufacturing capacity expansion, power and transmission infrastructure, and urban development projects reflects sustained confidence in India’s medium-term growth prospects. The rise in imports of capital goods during the quarter further indicates continued investment-led demand.

Exports of goods and services increased to ₹18.38 lakh crore during Q2 FY 2025-26, constituting 21.6 percent of GDP. Imports rose more sharply to ₹21.38 lakh crore, reflecting strong domestic demand for capital goods, energy products and intermediate inputs. While net exports continued to act as a drag on GDP growth during the quarter, the rise in imports largely mirrors underlying strength in domestic investment activity. Services exports and remittance inflows remained supportive of external sector stability and household disposable incomes.

High-frequency indicators of industrial and services activity, as reported in the Reserve Bank of India Bulletin of October 2025, indicate a mixed but stable momentum during Q2 FY 2025-26. In industry, the Index of Industrial Production (IIP) remained in expansionary territory, with manufacturing output supported by strong performance in capital goods, although overall industrial growth moderated in certain months due to base effects and weather-related disruptions. Steel and cement production showed steady year-on-year growth, while electricity generation reflected moderation following volatility earlier in the year.

In services, Purchasing Managers’ Index (PMI) readings remained firmly above the expansion threshold, signalling continued growth, though with some moderation in export-oriented segments. Passenger air traffic and port cargo volumes registered year-on-year increases, reflecting stable logistics and travel activity, while hotel occupancy and tourism indicators showed gradual improvement, supported by domestic discretionary travel demand.

Overall, the macroeconomic environment during the second quarter of FY 2025-26 reflects a manufacturing-led acceleration within the secondary sector, anchored by resilient services activity and steady domestic demand, even as the external sector remained a moderating factor. Continued investment in infrastructure, stable household consumption, and structural drivers such as digital adoption, urbanisation and formalisation of the economy continue to reinforce India's medium-term growth outlook amid persistent global uncertainties.

**Sectoral Composition of GVA: Building Blocks of India's Growth Story**

India's Gross Value Added at Basic Prices expanded by 8.8 percent in Q1 FY2025–26, following a 9.5 percent rise in the corresponding quarter of the previous year. The composition of growth underscores the continued primacy of the tertiary sector while the primary and secondary sectors display contrasting dynamics that are material for the industrial and manufacturing ecosystem, including fabricated metals and allied industries.

**Primary Sector (↑1.2 percent YoY in Q2 FY 2025-26):** Agricultural stability amid mining weakness

The primary sector recorded modest growth of 1.2 percent in Q2 FY 2025-26. Agriculture, livestock, forestry and fishing expanded by 1.8 percent, supported by stable kharif output and favourable monsoon conditions. In contrast, mining and quarrying contracted by 4.3 percent, reflecting subdued coal and mineral production, which weighed on input-intensive industries.

**Secondary Sector (↑9.3 percent YoY in Q2 FY 2025-26):** Manufacturing-led industrial expansion

The secondary sector recorded a strong growth of 9.3 percent in the second quarter of FY 2025-26, improving significantly from 4.7 percent in the corresponding quarter of the previous year. The acceleration reflects a broad-based recovery across manufacturing and construction activities, supported by resilient domestic demand, sustained public infrastructure spending, and steady private sector investment. The sector's performance underscores the strengthening of India's industrial cycle during the quarter.

**1. Manufacturing**

Manufacturing Gross Value Added recorded a robust growth of 11.7 percent in Q2 FY 2025-26, marking the highest growth among all major sub-sectors. The expansion reflects strong performance in automobiles, capital goods, engineering products and select consumer segments, supported by healthy domestic demand and improved capacity utilisation. Policy support through production-linked incentive schemes and stable input costs further aided manufacturing output. **Manufacturing emerged as the principal accelerator of economic growth during the quarter.**

**2. Electricity, Gas, Water Supply and Other Utility Service** GVA from electricity, gas, water supply and other utility services grew by 3.7 percent in Q2 FY 2025-26. The moderate growth reflects stable industrial and commercial power demand, with base effects limiting headline expansion. The sector continued to play a stabilising role rather than a growth-accelerating role during the quarter.

### 3. Construction

Construction activity expanded by 6.9 percent during Q2 FY 2025-26, moderating from the higher growth recorded in the previous year. Public infrastructure spending on roads, railways and urban projects continued to support construction activity, although execution momentum was partially affected by seasonal monsoon conditions. Construction remained supportive of growth but was not the primary driver during the quarter.

#### **Tertiary Sector (↑10.6 percent YoY): Stable anchor of growth**

**The tertiary sector continued to anchor overall economic growth in Q2 FY 2025-26, expanding by 10.6 percent. While services growth remained strong, it did not exhibit sharp acceleration during the quarter, instead providing stability amid volatility in other sectors.**

##### 1. Trade, Hotels, Transport, Communication & Services related to Broadcasting (↑6.8 percent YoY)

This sub-sector recorded moderate growth of 6.8 percent during Q2 FY 2025-26, reflecting a slowdown compared to earlier quarters. The moderation was driven by softer growth in trade and transport activities amid global uncertainty and base effects. Nevertheless, passenger air traffic, port cargo handling and logistics activity continued to record year-on-year expansion, supported by domestic demand and steady movement of goods.

##### 2. Financial, Real Estate & Professional Services (↑11.5 percent YoY)

Financial, real estate and professional services emerged as a key contributor within the services sector, expanding by 11.5 percent during the quarter. Growth was supported by steady credit expansion, resilient real estate activity and continued demand for professional and business services. The sector benefited from strong lending activity to industry and households, as well as ongoing urban housing and commercial real estate development.

##### 3. Public Administration, Defence & Other Services (↑13.2 percent YoY)

Public administration, defence and other services recorded robust growth of 13.2 percent in Q2 FY 2025-26. The expansion reflects continued government expenditure on defence, administrative services and social sector programmes. Although growth moderated slightly compared to exceptionally high levels in the previous year, the sector remained a strong pillar of services-led stability during the quarter.

Overall, the industrial and economic environment during the second quarter of FY 2025-26 reflects a manufacturing-led improvement in growth momentum, supported by steady domestic demand and resilient services activity. While construction growth moderated and the primary sector remained subdued due to weakness in mining, investment activity and capacity utilisation in manufacturing remained supportive of industrial output. Despite global uncertainties and a moderating external sector, structural drivers such as infrastructure spending, formalisation and urbanisation continue to underpin India's medium-term growth prospects.

### 1. Overview of the Indian Retail Sector

India is one of the fastest-growing retail markets globally, supported by favourable demographics, rising disposable incomes, urbanisation, and the expansion of organised formats. The sector accounts for more than 10% of India's gross domestic product and approximately 8% of total employment, making it both a major contributor to the economy and a large employer in the services sector. <sup>1</sup>

The Indian retail industry can broadly be divided into discretionary and non-discretionary categories. Non-discretionary retail primarily consists of food, groceries, and essentials, while discretionary retail comprises categories such as apparel, footwear, jewellery, consumer durables, and beauty and personal care. Discretionary categories, while relatively smaller in size than groceries, have been growing faster due to aspirational consumption and increasing penetration of branded and organised formats. <sup>2</sup>

Organised retail penetration in India has steadily increased over the last decade, rising from single-digit levels in the early 2010s to over 18–20% of total retail sales in 2023.<sup>3</sup> The share of organised retail is expected to continue growing to over 30% in the medium term, supported by mall developments, consolidation of modern trade players, and aggressive expansion by large corporate-backed retailers. This trend is particularly visible in discretionary categories such as apparel and footwear, where consumers increasingly seek branded products, quality assurance, and a consistent shopping experience.

 2. Southeast Asia includes Indonesia, Malaysia, Philippines, Singapore, Thailand, and Vietnam  
 3. The Middle East includes Saudi Arabia and the UAE  
 4. Discretionary expenditures include spending on categories such as FMCG (excl. staples), apparel, footwear, consumer electronics, consumer appliances, general merchandise, and beauty & personal care (BPC), among others. These tend to have cyclical demand, fluctuating with economic conditions  
 5. Non-discretionary expenditures encompass spending on essential categories such as pharmaceuticals, staples and fresh food, which are less sensitive to economic changes

## 2. The Apparel Industry in India

### 2.1 Market Size and Growth

The Indian apparel market is one of the largest discretionary categories, valued at approximately USD 77 billion in 2023 and projected to reach approximately USD 120 billion by 2027, representing a compound annual growth rate (CAGR) of 9–10%.<sup>4</sup> This makes India one of the fastest-growing apparel markets globally, driven by favourable demographics, rising urbanisation, premiumisation, and greater adoption of branded products.

Globally, the apparel market is estimated at approximately USD 1.7 trillion in 2023, with major contributions from China, the United States, and the European Union.<sup>5</sup> India, while smaller in absolute size compared to these markets, is projected to record higher growth rates than most mature economies. This positions India as a key growth driver in global apparel consumption over the coming decade.

Figure 2 – Indian apparel market size and forecast

## 2.2 Market Segmentation

The Indian apparel market is segmented by consumer group (men, women, and children), by product category (ethnic wear, casual wear, formal wear, sportswear, innerwear), and by price positioning (value, mid-premium, premium, luxury).

**Men's Apparel:** Men's apparel constitutes the largest segment, contributing around 40% of the overall market. Key categories include shirts, trousers, denim, and T-shirts. Formal wear has historically been dominant, but casual and semi-formal wear have shown stronger growth in recent years due to shifts in workplace attire and lifestyle preferences. <sup>6</sup>

**Women's Apparel:** Women's apparel contributes about 38% of the market and is among the fastest-growing segments, with a CAGR exceeding 12%. Drivers include rising female workforce participation, increasing exposure to global fashion trends, and higher spending power. Ethnic wear continues to dominate but fusion and western wear are growing rapidly. <sup>7</sup>

**Kids' Apparel:** The children's apparel market, accounting for approximately 15% of total apparel sales, has outpaced overall apparel growth. This is supported by increasing discretionary spending by young parents, growth of nuclear households, and higher fashion consciousness among children and teenagers. <sup>8</sup>

**Athleisure and Sportswear:** This is a high-growth category across both men's and women's apparel. Increasing health and fitness awareness, the growing acceptance of casual wear in social and professional contexts, and the rise of yoga and gym culture in India are propelling growth in this segment. <sup>9</sup>

## 2.3 Organised vs Unorganised Retail in Apparel

The apparel industry in India has historically been dominated by unorganised players, including local tailors, regional ethnic wear stores, and small-scale retailers. However, organised retail has gained momentum over the last decade, now accounting for approximately 30% of apparel sales in 2023, up from less than 10% a decade ago. <sup>10</sup>

Drivers of organised penetration include:

Expansion of large format retailers such as Reliance Trends, Lifestyle, and Pantaloons.

Entry of international brands like Zara, H&M, and Uniqlo into Indian metros.

Rapid growth of e-commerce platforms such as Myntra, Ajio, and Flipkart Fashion.

Increasing consumer preference for branded products, standardised sizing, and return/exchange policies.

Organised penetration in apparel is expected to expand further to 40–45% over the next five years, with higher contributions from tier-II and tier-III cities where mall development and cluster-based expansions are ongoing.

**Figure 3 – Organised vs unorganised share of apparel retail in India**

## 2.4 Regional Trends

Apparel consumption patterns vary significantly across regions in India:

**North India:** Ethnic wear and wedding-related apparel constitute a significant portion of demand, with Delhi NCR and Punjab being high-consumption markets.

**West India:** Urban centres like Mumbai and Pune are hubs for western wear and premium brands, while Gujarat remains strong in ethnic wear and festive apparel.

**South India:** Sarees and traditional wear continue to dominate, though younger consumers are increasingly adopting casual and western wear. Bengaluru and Hyderabad are growth centres for premium western apparel.

**East India:** Kolkata is a major hub for ethnic wear, with gradual penetration of organised retail formats.

These regional nuances play an important role in determining store rollout strategies and product assortments for retailers.

## 2.5 Demand Drivers in Apparel

Key drivers of apparel demand in India include rising disposable incomes, aspirational consumption, evolving fashion trends, increasing exposure to global brands, and digital influence. Festivals and weddings continue to drive a significant share of annual apparel purchases, while urbanisation and the spread of organised retail formats into smaller cities are unlocking new demand catchments.

### 3. The Footwear Industry in India

#### 3.1 Market Size and Growth

The Indian footwear market is among the most important discretionary retail categories, valued at approximately USD 25 billion in 2023. <sup>11</sup> It is projected to grow at a CAGR of 5–6% to reach USD 34 billion by 2028, supported by premiumisation, lifestyle shifts, and greater penetration of branded products. <sup>12</sup>

Globally, the footwear market is estimated at USD 400 billion in 2023. <sup>13</sup> India's contribution, though relatively modest in global terms, is set to rise as domestic demand increases and export capacity strengthens. India is also the second-largest footwear producer worldwide, accounting for over 10% of global output, supported by established clusters in Agra, Kanpur, Ambur, Ranipet, and other regions.<sup>14</sup>

#### 3.2 Market Segmentation

The Indian footwear market can be categorised into sportswear, casual wear, formal wear, women's footwear, and children's footwear:

**Sports and Athleisure Footwear:** The fastest-growing sub-segment, driven by rising fitness consciousness, increasing participation in sports, and global sneaker culture. International brands like Adidas, Nike, Puma, and New Balance dominate, though Indian brands such as Campus and Relaxo are also scaling rapidly.<sup>15</sup>

**Casual Footwear:** Includes sandals, floaters, flip-flops, and casual sneakers. This is the largest segment by volume, catering primarily to the mass and value-conscious market.

**Formal Footwear:** Historically important in urban India, particularly among male consumers. Demand has stabilised due to workplace casualisation but remains significant in tier-I cities.

**Women's and Kids' Footwear:** Women's footwear, including both fashion and functional categories, is growing faster than men's, supported by urbanisation and rising disposable incomes. Kids' footwear is a niche but fast-growing segment.

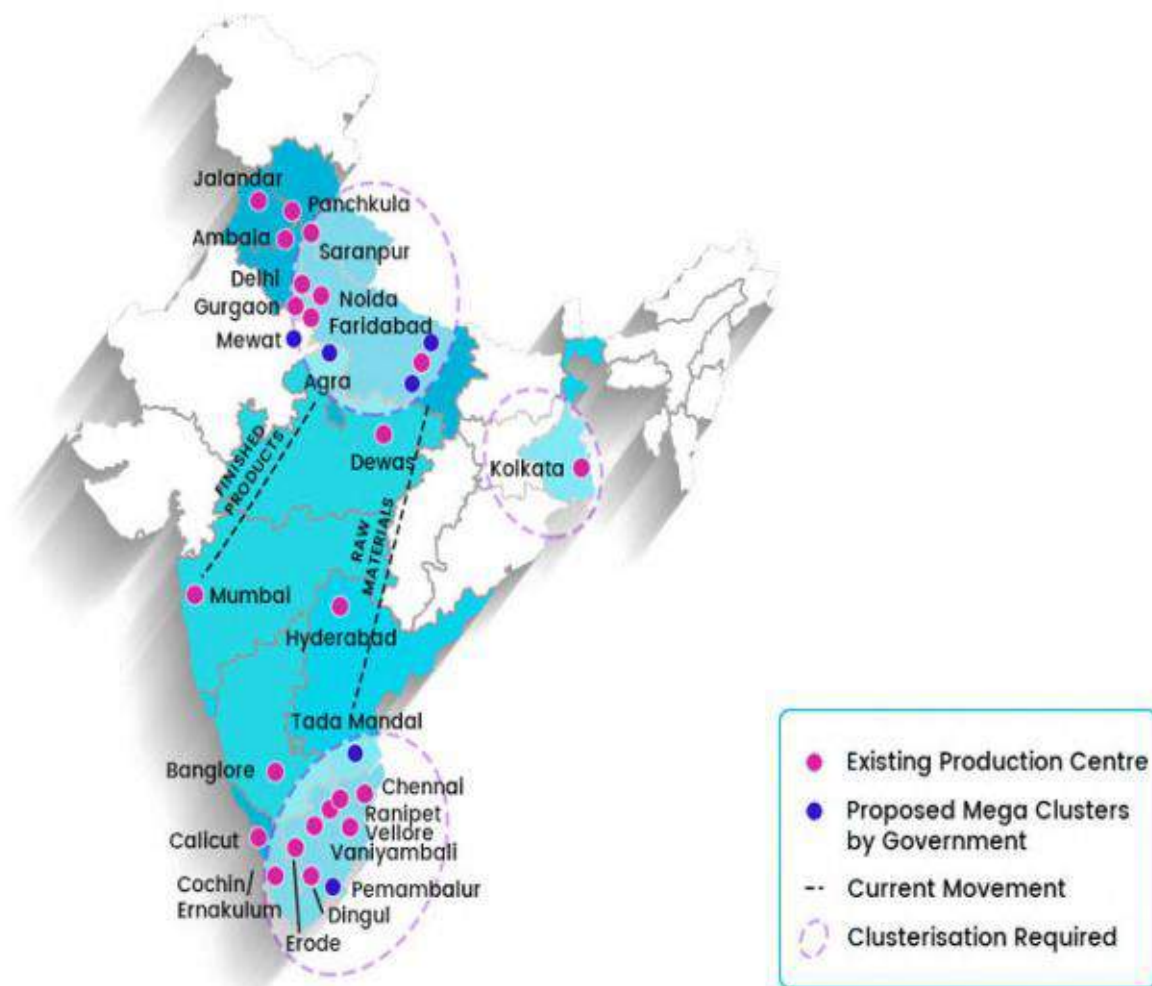

#### 3.3 Domestic Manufacturing and Exports

India's footwear industry benefits from a strong domestic production base, with manufacturing concentrated in traditional clusters such as Agra and Kanpur (leather footwear) and Tamil Nadu (non-leather and synthetic footwear).<sup>16</sup> Exports remain an important part of the industry, contributing over USD 2.5 billion annually.<sup>17</sup> Key destinations include the United States, the European Union, and the Middle East.

Imports, particularly from China, Vietnam, and Bangladesh, supply the fashion-forward, non-leather, and low-cost footwear segments. Domestic players are increasingly diversifying their vendor base to comply with new regulatory requirements and reduce overdependence on imports.

**Figure 6 – Footwear Production Clusters in India**

### 3.4 Regulatory Compliance

The Ministry of Commerce and Industry has introduced **Quality Control Orders (QCOs)** for footwear, mandating Bureau of Indian Standards (BIS) certification and marking for designated footwear categories.<sup>18</sup> These include leather footwear, sports shoes, sandals, and other subcategories. Compliance has implications for vendor approvals, product development timelines, and import substitution. Companies that proactively align with BIS requirements are expected to benefit from smoother operations and enhanced consumer trust.

## 4. Athleisure and Lifestyle Wear

Athleisure has emerged as a defining trend in both apparel and footwear, blurring the boundaries between performance wear and everyday fashion. Globally, athleisure is projected to grow at a CAGR of over 8% through 2030, outpacing traditional apparel segments.<sup>19</sup> In India, the category has gained strong momentum, with millennials and Gen Z consumers driving adoption.

### 4.1 Consumer Trends in Athleisure

**Fitness and Wellness:** Rising participation in gyms, yoga, running, and other fitness activities has driven demand for performance apparel and footwear.

**Casualisation of Workwear:** Hybrid work models and casual office cultures have accelerated the acceptance of athleisure in semi-formal settings.

**Fashion-Forward Adoption:** Sneaker culture has become aspirational, with limited edition launches and collaborations creating demand surges among urban youth.

**Women's Participation:** Women's athleisure is growing faster than men's, driven by greater fitness awareness and rising female purchasing power.

**Figure 7 – Athleisure market size and forecast**

## 4.2 Impact on Retail Strategy

Brands are increasingly dedicating store formats, online campaigns, and product lines to athleisure. Sneaker-focused multi-brand outlets, limited-edition drops, and influencer-led digital campaigns have become central to marketing strategies. This has also led to increased collaborations between sportswear and luxury brands in India.

## 5. Distribution Channels and Omnichannel Retail

The Indian apparel and footwear retail industry operates across multiple sales formats, each catering to distinct consumer needs and value propositions. The balance between offline and online retail has shifted significantly in recent years, with omnichannel models now dominating industry strategy.

### 5.1 Exclusive Brand Outlets (EBOs)

EBOs allow companies to exert maximum control over pricing, merchandising, and consumer experience. These stores also reinforce brand equity and loyalty. Both company-owned-company-operated and franchise-owned-company-operated models are prevalent. EBO expansion is now extending aggressively into tier-II and tier-III cities, where aspirational demand is rising.<sup>20</sup>

### 5.2 Multi-Brand Outlets (MBOs)

MBOs provide consumers with variety across brands and price points, particularly in footwear and athleisure. Sneaker-focused concepts and curated MBOs are gaining popularity in urban centres. While margins are thinner than EBOs, these outlets enable discovery and wider consumer reach.

### 5.3 Department Stores and Large Format Retail

Department stores such as Shoppers Stop and Lifestyle, along with large-format discount retailers, contribute significantly to organised apparel and footwear sales. They provide scale and consumer traffic aggregation but require careful working capital management due to consignment or revenue-sharing arrangements.

### 5.4 E-commerce Marketplaces

E-commerce has transformed apparel and footwear retail in India. Platforms such as Myntra, Ajio, Flipkart, and Amazon contribute a significant share of organised sales. E-commerce penetration in apparel is estimated at over 15% as of 2023, with higher penetration in footwear at nearly 20%. <sup>21</sup> Flash sales, end-of-season discounts, and influencer-led promotions drive high traffic and conversions on these platforms.

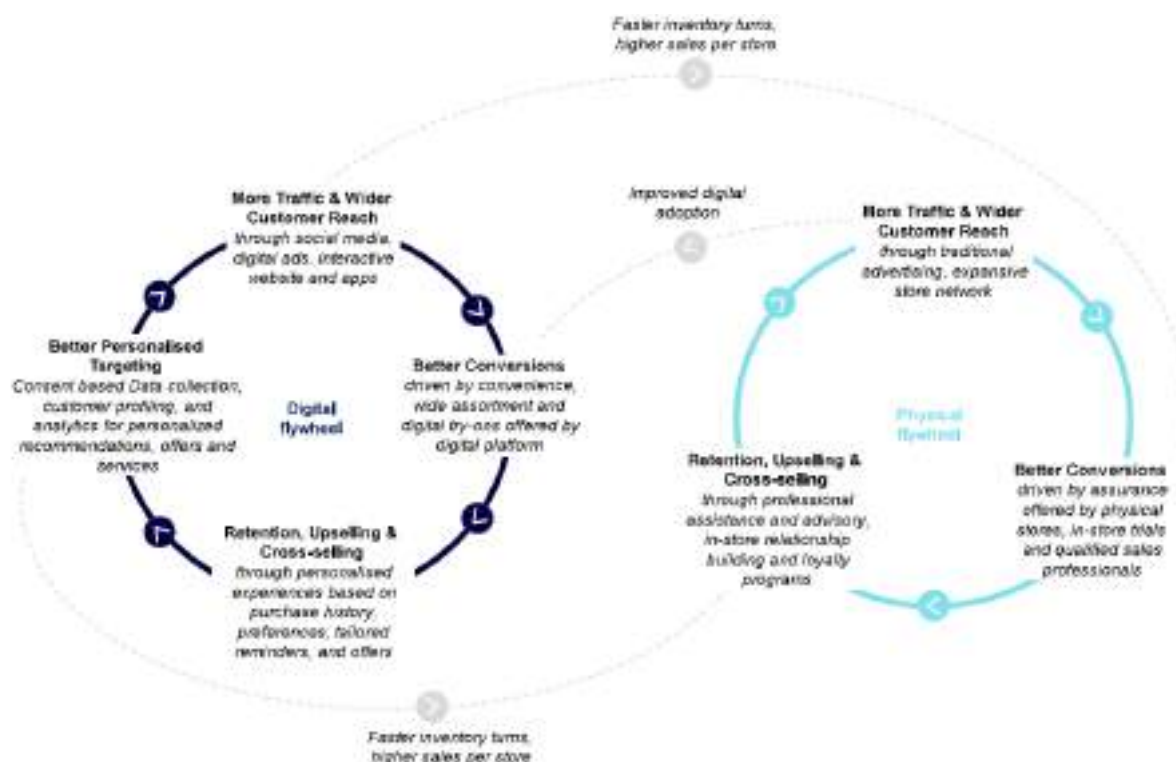

### 5.5 Direct-to-Consumer (D2C) Platforms

Brand-owned websites and apps provide higher gross margins, access to consumer data, and direct engagement. D2C adoption has accelerated, especially among digital-first brands. Customer loyalty programmes, personalised recommendations, and exclusive launches are often concentrated on D2C channels.

### 5.6 Omnichannel Integration

The evolution of omnichannel retail represents a structural shift. Consumers increasingly browse online and purchase offline, or vice versa. Initiatives such as buy-online-pick-up-in-store (BOPIS), ship-from-store, and return-to-store are becoming standard. The “omnichannel flywheel” concept, widely highlighted in DRHPs such as Lenskart, is equally applicable in apparel and footwear. <sup>22</sup>

## 6. Consumer Behaviour and Key Growth Drivers

The Indian apparel and footwear retail industry is underpinned by powerful structural drivers that continue to transform consumption patterns. These factors encompass demographics, income growth, urbanisation, lifestyle changes, social and cultural influences, digital adoption, and premiumisation. Together, they have created a demand environment that supports sustained expansion in both volume and value terms.

### 6.1 Demographics and Youth Economy

India's median age of under 30 years makes it one of the youngest large consumer markets in the world. More than 65% of the population is below the age of 35.<sup>23</sup> This young demographic is inherently more fashion-conscious, digitally engaged, and open to experimenting with new brands and formats compared to older cohorts.

Millennials and Generation Z consumers in particular display a high propensity to spend on apparel and footwear. Surveys by Bain & Company and Deloitte have shown that apparel and footwear are consistently ranked among the top three discretionary spending categories for Indian youth, alongside electronics and dining.<sup>24</sup>

Youth-driven consumption is also shaping product categories. Sneaker culture, graphic tees, athleisure, and fast-fashion apparel formats resonate strongly with urban Gen Z consumers. Limited-edition footwear drops and influencer-driven apparel lines frequently sell out within days, demonstrating the purchasing power and trend sensitivity of this demographic.

**Figure 9 – Age profile of Indian consumers compared with key markets**

## 6.2 Rising Disposable Incomes and Aspirational Consumption

Per capita income in India crossed USD 2,700 in FY 2023–24 and continues to grow at a mid-single digit pace.<sup>25</sup> Rising income levels have translated into higher discretionary spending, with apparel and footwear being key beneficiaries. Aspirational consumption patterns are evident as consumers move from value-oriented purchases to mid-premium and premium categories.

Household surveys by the National Statistical Office indicate that discretionary expenditure as a percentage of total consumption has risen steadily, particularly in urban centres.<sup>26</sup> Families with monthly household incomes above INR 50,000 are increasingly allocating a higher share of spending to apparel, footwear, and accessories.

Aspirational behaviour is amplified by social media exposure, international travel, and the availability of global brands in India. Premium and luxury apparel categories, though a small fraction of total consumption, are growing at double-digit rates annually, reflecting rising willingness to pay for quality, exclusivity, and brand identity.<sup>27</sup>

**Figure 10 – India’s Private Final Consumption Expenditure (PFCE) trends (FY2022-2025E)**

Source: MoSPI | CBRE Research, Q1 2025

## 6.3 Urbanisation and Expansion into Tier-II and Tier-III Cities

Urbanisation is a structural driver of organised retail. India’s urban population is expected to rise from 35% in 2023 to nearly 40% by 2030.<sup>28</sup> The growth of tier-II and tier-III cities is particularly significant for apparel and footwear retailers. Cities such as Indore, Lucknow, Bhubaneswar, Surat, Coimbatore, and Nagpur are witnessing rapid mall development, expansion of high-street retail, and growing acceptance of branded apparel and footwear.

Cluster-based expansion strategies, where retailers concentrate stores in a defined region to optimise logistics, marketing, and brand awareness, are increasingly common.<sup>29</sup> Tier-II and tier-III cities also contribute disproportionately to volume growth, while metros lead premiumisation. Retailers are tailoring product assortments to local demand, balancing ethnic wear and value fashion with western and athleisure categories.

**Figure 11 – E-Retail has democratized the shopping landscape – Tier 3 cities are now at scale**

## 6.4 Festival and Wedding Economy

The festival and wedding economy is a cornerstone of apparel and footwear demand in India. Annual spending on weddings alone is estimated at INR 3.7 lakh crore (approximately USD 45 billion), with apparel, jewellery, and footwear accounting for a large share.<sup>30</sup> In northern India, wedding purchases often extend across multiple families, creating demand for ethnic apparel, formalwear, and premium footwear.

Festivals such as Diwali, Navratri, Durga Puja, Eid, and Christmas consistently generate sales peaks. For many retailers, 30–40% of annual revenues are concentrated in the festive quarter (September–December).<sup>31</sup> End-of-season sales (EOSS), often scheduled around these festive cycles, add another layer of demand aggregation.

Regional festivals further diversify demand drivers. For instance, Onam in Kerala and Pongal in Tamil Nadu see significant apparel spending, while Baisakhi and Karva Chauth influence northern markets.

## 6.5 Digital Influence and E-Commerce Adoption

Digital adoption has fundamentally altered consumer behaviour in apparel and footwear. India has over 850 million internet users, of which more than 200 million are active online shoppers.<sup>32</sup> E-commerce penetration in apparel and footwear has reached 15–20% of organised sales, with even higher influence when including digitally assisted offline purchases.

Consumers frequently browse online before making in-store purchases. Omnichannel journeys such as browsing size availability online and completing purchases offline, or discovering new products in-store and reordering online, are increasingly common.<sup>33</sup> Social media platforms like Instagram, Facebook, and YouTube play a crucial role in shaping fashion trends, aided by influencer marketing and peer recommendations.

Marketplaces such as Myntra and Ajio have invested heavily in technology to improve size recommendations, virtual try-ons, and return logistics, which have become critical to consumer confidence in online apparel purchases.<sup>34</sup>

**Figure 12 – India’s e-retail surges ahead, claiming the title of second-largest shopper base globally**

Source: How India Shops Online 2025 - Bain

## 6.6 Shift from Unorganised to Organised Retail

Indian consumers are increasingly gravitating towards organised and branded retail formats. While unorganised players continue to dominate in absolute size, organised formats are gaining share due to the following factors:

Assurance of quality, sizing, and after-sales service.

Availability of wider assortments and latest fashion trends.

Store ambience and experiential elements that enhance the shopping journey.

Structured loyalty programmes and return/exchange policies.

Organised penetration in apparel has crossed 30% as of 2023, up from less than 10% in 2010, while footwear has reached close to 35%.<sup>35</sup> This structural shift is expected to continue, aided by government initiatives to formalise the economy, tax reforms such as GST, and the growing presence of corporate-backed retail.

## 6.7 Premiumisation and Luxury Appetite

Premiumisation is one of the most pronounced consumption shifts in Indian apparel and footwear. Consumers with higher disposable incomes are increasingly choosing branded products over unbranded alternatives, and within branded options, they are trading up to higher-quality and aspirational products.<sup>36</sup>

The luxury apparel and footwear market, though less than 5% of total volumes, is growing at double-digit rates annually. International luxury brands are expanding their presence through high-street flagships and luxury malls in metros, while premium sportswear and sneaker brands are scaling across both metros and mini-metros.<sup>37</sup> The aspirational value of luxury products is amplified by social media visibility, celebrity endorsements, and international travel.

**Figure 13 – Luxury retail sales YoY growth, 2025E, %**

Source: McKinsey Fashion Growth Forecasts 2025

### 6.8 Fitness, Wellness, and Athleisure Adoption

The growing emphasis on health and wellness has directly benefited apparel and footwear consumption. Gym memberships, yoga studio enrollments, and marathon participation have increased steadily over the past decade.<sup>38</sup> This has resulted in higher demand for athleisure, sportswear, and performance footwear.

Women's participation in fitness activities has been particularly significant, fuelling growth in women's activewear categories. The athleisure segment, which combines functionality and style, has outpaced traditional apparel growth, driven by younger consumers who prioritise comfort and versatility in their clothing choices.

### 6.9 Experiential Retail and Mall Culture

The rise of shopping malls and experiential retail formats has transformed consumer expectations. Mall-based shopping offers not only access to a wide range of brands but also entertainment, dining, and leisure, making it a lifestyle activity.<sup>39</sup> Consumers increasingly value store design, product display, and immersive experiences.

Retailers are also hosting in-store events, sneaker drops, and collaborations to attract younger audiences. This shift underlines the importance of physical stores as both sales channels and brand-building platforms, even in an era of growing digital adoption.

### 6.10 Sustainability and Ethical Consumption

Sustainability has begun to emerge as a consideration among urban consumers, particularly in metros. Consumers are showing interest in eco-friendly fabrics, ethically sourced leather, and circular fashion models such as resale and rental.<sup>40</sup> While still a niche trend, regulatory pressures, global ESG mandates, and the evolving preferences of younger consumers are expected to amplify its importance over time.

Brands adopting eco-friendly packaging, carbon-neutral production, and sustainable sourcing practices are gaining visibility and goodwill among environmentally conscious consumers.

### 6.11 Regional Consumption Patterns

Consumer behaviour varies across India's regions, reflecting cultural, climatic, and economic differences.

**North India:** Strong demand for ethnic wear and wedding apparel; premium footwear adoption is high in Delhi NCR and Punjab.

**West India:** Maharashtra and Gujarat are leading markets for western wear and festive ethnic categories.

**South India:** Strong ethnic traditions such as sarees and festive attire continue, but Bengaluru and Hyderabad lead in premium casual and western categories.

**East India:** Kolkata remains a hub for traditional ethnic apparel, while urban centres are gradually shifting towards branded casuals.

## **7. Sourcing, Supply Chain and Compliance**

### **7.1 Apparel Sourcing**

India is one of the largest producers of textiles and garments globally, supported by abundant availability of cotton, man-made fibres, and a well-established textile manufacturing base.<sup>41</sup> Apparel sourcing for organised retailers typically follows a combination of domestic vendor networks and imports. Domestic sourcing is prevalent for knitwear, denim, casual wear, and traditional categories. For high-fashion categories and specialised products, imports from Bangladesh, Vietnam, and China are common.

The Production Linked Incentive (PLI) scheme for textiles, launched by the Government of India, aims to encourage investment in man-made fibre and technical textiles, potentially strengthening the sourcing base for domestic retailers.<sup>42</sup> Retailers with vertically integrated supply chains and long-term vendor partnerships are better positioned to manage quality, lead times, and costs.

### **7.2 Footwear Sourcing**

India's footwear industry is supported by manufacturing clusters in Agra, Kanpur, and Tamil Nadu, which specialise in leather and non-leather footwear.<sup>43</sup> However, imports continue to account for a significant share of non-leather, fashion-forward, and low-cost footwear categories. Imports from China, Vietnam, and Bangladesh are prominent in the mass casual segment.

Organised footwear brands are increasingly diversifying their sourcing base to reduce reliance on imports, especially in light of recent Quality Control Orders (QCOs). Domestic vendors are being upgraded to meet compliance requirements, which include Bureau of Indian Standards (BIS) certification for designated footwear categories.<sup>44</sup>

### **7.3 Logistics and Inventory Management**

Retailers typically operate through centralised distribution centres supported by regional warehouses to optimise delivery times. Apparel retailers often follow a “push-pull” model, where new season products are pushed to stores, while replenishment is based on sales velocity. Footwear, particularly in fast-moving categories like sneakers, requires continuous replenishment cycles.

Inventory turnover ratios vary significantly by category. Fast-fashion apparel and athleisure can achieve multiple turns per year, whereas formalwear and wedding apparel turn slower. Sophisticated warehouse management systems and order management systems enable real-time visibility across online and offline channels, supporting initiatives such as ship-from-store and endless aisle.

### **7.4 Regulatory Framework**

**Quality Control Orders (QCOs):** The Ministry of Commerce has mandated QCOs for footwear, requiring BIS certification and marking for covered categories such as leather footwear, sports shoes, and sandals.<sup>45</sup>

**Foreign Direct Investment (FDI):** Up to 100% FDI is permitted under the automatic route in single-brand retail trading, subject to sourcing norms. Multi-brand retail is restricted, with up to 51% FDI permitted under specific conditions.<sup>46</sup>

**Goods and Services Tax (GST):** Apparel and footwear priced up to INR 1,000 attract a 5% GST rate, while products above this threshold are taxed at 12% or 18%, depending on classification.<sup>47</sup>

**Legal Metrology Act:** Mandates disclosure of maximum retail price, country of origin, and other labelling requirements.

**Labour and Establishment Regulations:** Shops and Establishments Acts govern store operating conditions, while labour codes regulate employee conditions in retail and warehousing.

## 8. Seasonality, Pricing and Discounting

### 8.1 Seasonality

Apparel and footwear retail in India is characterised by pronounced seasonality. Sales typically peak during the festive quarter (September–December) coinciding with Diwali, Durga Puja, Navratri, Eid, and the wedding season. For many retailers, this quarter contributes up to 40% of annual sales.<sup>48</sup> A secondary uplift occurs during the summer months (April–June), driven by new season launches and regional festivals such as Baisakhi, Onam, and Pongal.

Weather conditions also influence demand. A weak winter season can adversely affect sales of jackets, sweaters, and boots, while extended monsoons may disrupt supply chains and dampen footfalls. Retailers build demand calendars around these seasonal cycles, aligning marketing campaigns, product launches, and discount events.

### 8.2 Pricing Ladders

The industry follows a tiered pricing structure:

**Value Segment:** Apparel and footwear priced below INR 1,000, catering primarily to mass markets.

**Mid-Premium Segment:** Products priced between INR 1,000–3,000, targeted at urban middle-class consumers.

**Premium Segment:** Products priced between INR 3,000–7,000, capturing aspirational and lifestyle-driven demand.

**Luxury Segment:** Products priced above INR 7,000, typically dominated by international brands.

Each pricing tier has distinct consumer bases, volume profiles, and gross margin structures.<sup>49</sup> Premium and luxury segments, though smaller in volume, contribute disproportionately to value growth.

### 8.3 Discounting Mechanics

Discounting plays a crucial role in Indian apparel and footwear retail. End-of-season sales (EOSS), usually scheduled in January–February and July–August, are significant demand generators. E-commerce platforms host large-scale discount events such as Myntra’s “End of Reason Sale,” Amazon’s “Great Indian Festival,” and Flipkart’s “Big Billion Days.”

Discounting depth varies by channel. Exclusive brand outlets maintain tighter price discipline, while online marketplaces often drive higher discount penetration. Margins are affected by these cycles, making inventory and markdown management central to profitability. Returns and exchanges, particularly in online apparel, further influence net realisation.<sup>50</sup>

## 9. Technology and Data Use

Technology has become integral to apparel and footwear retail across sourcing, distribution, and consumer engagement.

### 9.1 Enterprise Systems

Retailers deploy enterprise resource planning (ERP) systems, warehouse management systems (WMS), and order management systems (OMS) to track inventory, sales, and replenishment. These systems enable unified inventory visibility across online and offline channels, supporting omnichannel services such as buy-online-pick-up-in-store (BOPIS) and ship-from-store.

### 9.2 Consumer Analytics

Data-driven insights are increasingly used for:

**Demand Forecasting:** Predicting category-level demand based on seasonality, regional factors, and macro trends.

**Size Curve Optimisation:** Managing inventory allocation by size profiles across regions.

**Personalisation:** Offering personalised recommendations on apps and websites to improve conversion rates.

**Customer Lifetime Value (CLV) Modelling:** Allocating marketing spend based on CLV rather than per-order contribution.

### 9.3 Digital Marketing and Engagement

Digital channels have become critical for consumer engagement. Influencer marketing, social media campaigns, and live commerce initiatives are being used to target younger demographics. Brand-owned apps enable loyalty programmes, push notifications, and exclusive drops. Virtual try-ons and AI-based size recommendation tools are also being adopted.<sup>51</sup>

### 9.4 Future Technologies

Emerging technologies such as artificial intelligence, machine learning, and augmented reality are expected to further personalise retail experiences. Retailers are experimenting with virtual stores, AI chatbots for customer service, and blockchain for supply chain transparency.

## 10. Competitive Landscape

The Indian apparel and footwear retail sector is characterised by intense competition across multiple segments. Market participants include multinational corporations, large Indian conglomerates, established domestic players, regional retailers, and digital-first brands. Competition is driven by brand positioning, product quality, pricing, consumer experience, store locations, and omnichannel capabilities.

### 10.1 International Sportswear and Athleisure Brands

Brands such as Nike, Adidas, Puma, Skechers, and New Balance dominate the premium sportswear and athleisure segments. Their strategies in India focus on flagship exclusive outlets in metro cities, partnerships with department stores, and strong online presence through marketplaces and D2C channels. These brands benefit from global brand equity and marketing scale, though they face challenges in balancing pricing with local affordability.<sup>52</sup>

### 10.2 Indian Conglomerate-led Brands

Large corporate groups such as Reliance Retail, Aditya Birla Fashion and Retail (ABFRL), and Arvind Fashions operate multiple brands across value, mid-premium, and premium segments. They leverage extensive distribution networks, strategic brand acquisitions, and omnichannel models to scale rapidly. ABFRL, for example, has a strong portfolio across formalwear, casualwear, and ethnic categories, while Reliance Retail continues to expand aggressively into value fashion through Reliance Trends.<sup>53</sup>

### 10.3 Department Stores and Value Retailers

Players such as Shoppers Stop, Lifestyle, V-Mart, and Max Fashion cater to mid-market consumers by offering a wide range of apparel and footwear across price points. Their competitive advantage lies in aggregation of brands and

categories under one roof. However, they face margin pressure from discount-driven online marketplaces and the need to continuously refresh assortments.

#### **10.4 Footwear Specialists**

Established footwear brands such as Bata, Metro Shoes, and Relaxo operate extensive distribution networks across metros and smaller towns. Campus Activewear has emerged as a strong player in the sportswear and athleisure segment, particularly among younger consumers. Competition among footwear specialists is intensifying, with product differentiation, brand image, and pricing being critical factors.<sup>54</sup>

#### **10.5 Digital-first and D2C Brands**

The last five years have seen the rise of digital-first brands in apparel and footwear. Brands such as Bewakoof, Snitch, and sneaker-focused start-ups target younger consumers with aggressive online marketing, influencer collaborations, and direct-to-consumer models. These brands typically operate with asset-light structures, focusing on rapid trend cycles and social media-led customer acquisition.<sup>55</sup>

### **11. Risks and Challenges**

Despite strong structural growth drivers, the apparel and footwear industry in India faces multiple risks:

#### **11.1 Consumer Demand Cyclicity**

As a discretionary category, apparel and footwear demand is sensitive to economic slowdowns, inflationary pressures, and consumer sentiment. Events such as weak monsoons, high food inflation, or global economic shocks can reduce discretionary spending. Retailers mitigate this through conservative open-to-buy policies, controlled inventory depth, and diversified assortments.<sup>56</sup>

#### **11.2 Discounting Pressure**

The prevalence of discount-led sales, both online and offline, exerts continuous margin pressure. Online marketplaces, in particular, drive deep discounting through promotional events, leading to price erosion in the industry. Sustained discounting can condition consumers to expect lower prices, compressing margins. Retailers are responding by focusing on product differentiation, exclusive launches, and tighter markdown discipline.<sup>57</sup>

#### **11.3 Supply Chain Disruptions**

Global supply chain volatility, currency fluctuations, and import dependencies (particularly in non-leather footwear and high-fashion apparel) pose risks. Recent global tariff measures, such as those implemented by the United States on selected categories, illustrate the vulnerability of export-linked clusters.<sup>58</sup> Domestic logistics disruptions, including monsoon-related transport issues, can also affect inventory flow.

#### **11.4 Regulatory and Compliance Risks**

The introduction of QCOs for footwear requires compliance with BIS standards, which can be complex and time-consuming for vendors. Changes in GST slabs, FDI conditions, or legal metrology provisions may impact product pricing, sourcing, and distribution strategies. Non-compliance could result in penalties, supply delays, or reputational risks.<sup>59</sup>

#### **11.5 Returns and Reverse Logistics**

High return rates, especially in online apparel where fit and size issues are prevalent, reduce contribution margins. Reverse logistics adds cost and complexity. Some retailers are investing in size recommendation tools, in-store exchange models, and stricter return policies to mitigate these risks.

#### **11.6 Competitive Intensity**

Intense competition among established players, new entrants, and international brands creates continuous pressure on pricing and consumer acquisition costs. Sustaining brand loyalty and differentiation requires significant investment in marketing, technology, and customer experience.

### **12. Future Outlook**

The outlook for India's apparel and footwear retail industry remains favourable, underpinned by demographic strength, income growth, and structural formalisation of retail.

## 12.1 Growth Projections

Industry estimates suggest that the combined apparel and footwear market in India, currently valued at approximately USD 100 billion, is projected to grow at a CAGR of 8–9% to reach USD 160 billion by 2028.<sup>60</sup> Organised retail's share is expected to expand from around 30% today to 40–45% by 2028. Online channels will contribute a rising share of sales, but physical stores will remain central to discovery and experience.

## 12.2 Structural Drivers

Expansion into tier-II and tier-III markets through cluster-based rollouts.

Premiumisation across apparel and footwear categories.

Greater adoption of omnichannel models, integrating offline and online channels.

Continued formalisation of retail, supported by GST and regulatory enforcement.

Influence of social media and digital marketing on fashion trends.

## 12.3 Emerging Trends

**Athleisure and Sneaker Culture:** Expected to outpace traditional apparel categories.

**Sustainability:** Growing consumer interest in eco-friendly and ethically sourced products.

**Technology Integration:** Wider adoption of artificial intelligence, augmented reality, and data-driven personalisation.

**Experiential Retail:** Increasing emphasis on in-store experiences to complement online channels.

## 12.4 Conclusion

India's apparel and footwear retail industry is at an inflection point. While risks remain in terms of discounting pressures, regulatory compliance, and competitive intensity, the sector's long-term fundamentals are robust. The combination of favourable demographics, rising aspirations, digital adoption, and structural formalisation provides a strong foundation for sustained growth. Companies with disciplined supply chains, differentiated brand portfolios, and strong omnichannel execution are well placed to capture the opportunities ahead.

## OUR VERTICALS

## OFFLINE RETAIL

The Company operates its offline business through two formats – EBOs and MBOs. All these stores follow a Company-Owned and Company-Operated (COCO) model. In this model, the Company undertakes the entire capital and operational responsibility, including store set-up, rentals, staffing, and daily management. This model enables complete control over store operations and customer experience.

Our stores are largely located in high-street markets and shopping malls to ensure access to urban consumer footfall. The Company follows a cluster-based expansion model, opening new stores in cities or districts close to existing operations.

This enables better supply chain efficiency, optimized logistics, inter-store inventory sharing, and localized understanding of consumer preferences.

Inventory across all retail outlets is managed in real-time through an integrated enterprise retail planning (“ERP”) system. Allocation of goods is planned based on past sales patterns, projected demand, seasonality, and special events such as festivals. Stock movement follows standardized processes such as First-in-First-Out and First-Expire-First-Out to minimize waste. Slow-moving items are identified through regular reporting from stores and addressed through clearance measures.

Offline sales contribute a major share of the Company’s domestic sales, with the state of Delhi as the largest contributor, followed by Haryana, Uttar Pradesh and Gujarat in FY 2024-25. In FY 2024-25, sales from our EBO and MBO stores accounted for 21.26% of our total revenue from operations.

### Exclusive Brand Outlets

The Company runs EBOs across various states of India, located in cities such as Ahmedabad, Ambala, Dehradun, New Delhi, Gurugram, Lucknow, Jalandhar, Noida, and Bathinda. These outlets primarily retail the products of “Brand 1,” for which the Company has entered into a non-exclusive distribution agreement.

Each EBO is required to comply with the brand’s layout and furnishing standards as approved by the brand principal/licensor. As of the date of the RHP, the Company operated 14 EBOs.

### E-COMMERCE RETAIL

Our Company has started to build an online presence through its website and partnership with e-commerce platforms to make our products more accessible and boost sales. The Company operates its online business through a combination of e-commerce marketplaces and its own website, enabling access to customers across India beyond its offline store network. Further, the data from online channels is analyzed to plan procurement, manage stock allocation, and adjust marketing strategies.

Our online operations are integrated with the ERP system, enabling synchronization of outlet inventory with online order placement. Real-time inventory visibility reduces the risk of over-selling and allows for efficient order fulfillment.

For e-commerce orders, the Company partners with third-party logistics providers for last-mile delivery. Delivery timelines vary by region, with metro areas typically serviced within shorter lead times compared to Tier II/III cities. Reverse logistics are also managed through these partners to handle product returns and exchanges.

Our online sales are supported by targeted digital marketing, including social media advertising and search engine promotions. Discounts, coupons and festival sales are used to increase customer acquisition and repeat purchases. Additionally, customer data collected through online channels is used to plan campaigns and improve engagement.

Online sales form a growing component of our Company's domestic revenue. The Company generated a revenue of ₹1,021.97 Lakhs from sales through e-commerce channels in FY 2024-25, contributing to 7.29% of our total revenue from operations.

### E-Commerce Marketplaces

The Company sells products through established popular online platforms, among others. Products listed on these marketplaces are sourced from the Company's nearest outlets and shipped either directly by the Company or through marketplace-managed logistics.

Marketplace sales allow the Company to reach a wider customer base, including Tier II and Tier III cities where physical stores are not present. Each marketplace sets its own marketing and promotional calendar, and the Company participates in such campaigns to drive seasonal demand.

## Company Websites

In addition to third-party marketplaces, the Company retails its products through its own e-commerce platform <https://brandmanretail.com/>. Orders placed on the website are fulfilled directly from the Company's outlets through integrated logistics partners.

The website allows the Company to showcase a curated brand mix and offer exclusive collections. The website also provides the Company with direct consumer insights, including browsing patterns, preferences, and feedback.

The Company is also in process of launching its website [www.sneakrz.in](http://www.sneakrz.in) as an online storefront for direct sales to consumers. Once functional, this platform will provide customers with direct access to the Company's product range and will complement its existing online sales channels.

## RESELLER OUTRIGHT SALES – B2B

The re-seller outright sales segment forms a significant part of our operations. Under this model, our Company supplies products in bulk directly to large format retailers and e-commerce platforms. We are engaged in B2B transactions with established online platforms, as well as offline retail chains. These arrangements enable our products to be made available to a wide customer base through the partners' existing distribution and retail networks.

For the Financial Year 2024-25, the B2B business contributed to 57.78% of our total revenue from operations, making it the largest revenue contributor among our business channels. Products supplied under this model are aligned with the merchandising requirements of our B2B partners, and inventory planning is carried out in coordination with them. Orders are serviced through our central warehouse, with dispatches managed in bulk quantities to the respective partner locations.

The B2B model provides the Company with predictable demand volumes and supports efficient utilization of inventory, while also allowing us to expand our reach without operating additional retail infrastructure.

## CONTRACT MANUFACTURING ACTIVITIES

Our Company undertakes contract manufacturing as part of its overall business operations. Under this model, manufacturing processes are outsourced to approved third-party vendors, enabling the Company to manage its production requirements without establishing dedicated in-house facilities. This model helps the Company align production volumes with market demand and manage costs associated with manufacturing activities.

At present, the Company has an exclusive arrangement for the manufacturing, designing, and distribution of the products of one of its brand relationships. Production under this arrangement is carried out through third-party manufacturers, with the Company retaining oversight on product specifications and quality standards. Products are supplied by such manufacturers to the Company as per purchase orders raised by the Company at prices pre-agreed between the parties. Payments for the products supplied are paid for on an order-by-order basis in the following manner:

- (i) An amount equal to 30 percent of the purchase order in advance upon acceptance of Purchase Order by the manufacturer and issuance of a detailed proforma invoice to the Company.
- (ii) Balance amount equal to 70 percent of the purchase order is paid on or before 45 days after the delivery of the products to the Company for which post-dated cheques are issued after the date of delivery.

All such activities are undertaken in compliance with applicable regulations and are subject to periodic quality checks and assessments of the manufacturing partners.

Through this model, the Company is able to reduce fixed capital requirements, adjust output in response to variations in demand, and focus its internal resources on marketing, distribution, and retail operations. Contract manufacturing also enables the Company to expand its product portfolio while maintaining control over quality and delivery timelines. The revenue from contract manufacturing activities is not recognised in the financial statements in light of the outsourcing of manufacturing activities to third party manufacturers. The Company procures the products under these manufacturing agreements and thereafter distributes the same to its customers under its business verticals.

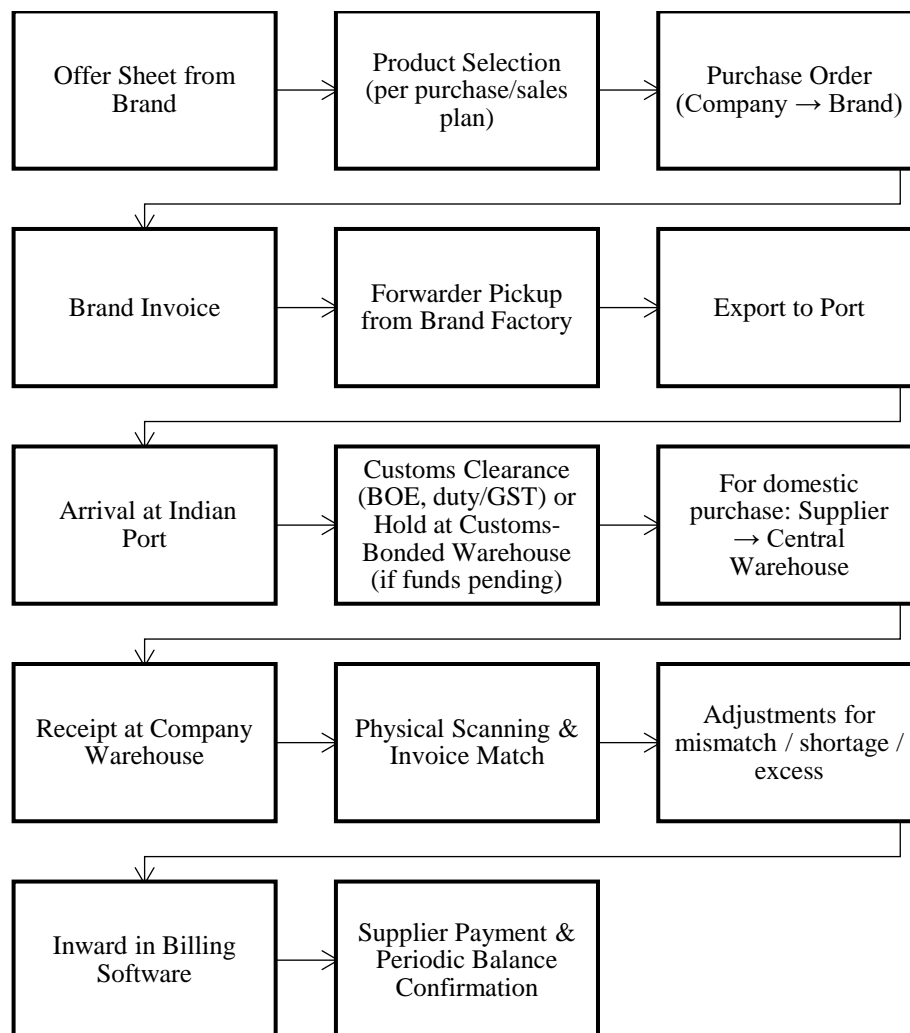

## INVENTORY MANAGEMENT

The Company manages its inventory requirements through a combination of central warehouse stock and store-level stock. Goods are received at the central warehouse from suppliers, where they are inspected, recorded in the ERP system, and subsequently allocated to different stores based on sales trends, demand forecasts, and seasonal requirements. Each store maintains its own inventory, with replenishment decisions supported by real-time sales data integrated through the ERP system. This two-tier approach provides visibility and control over stock movements, helps reduce overstocking or shortages, and allows redistribution of slow-moving goods across outlets.

For the e-commerce business, orders received through marketplaces or the Company's own website are fulfilled either directly from the central warehouse or, from store stock depending on product availability. Products are picked, packed, and dispatched through third-party logistics providers, who also manage returns and exchanges. By managing inventory through both the central warehouse and stores, the Company ensures better alignment with demand across offline and online channels while maintaining operational flexibility.

## BUSINESS PROCESS FLOW

The Company procures goods from its brand suppliers as per the process below:

**Offer Sheet from Brand:** To commence the procurement process, initiation of a request for product selection is made by the Merchandising team of the Company to the relevant brand. **Purchase Order Placement:** The selection of products is confirmed by the Company through placement of a purchase order detailing out the specific category of products and corresponding quantities, delivery location and so forth with the brand.

Post invoicing, the stock is dispatched via transport / logistics service providers.

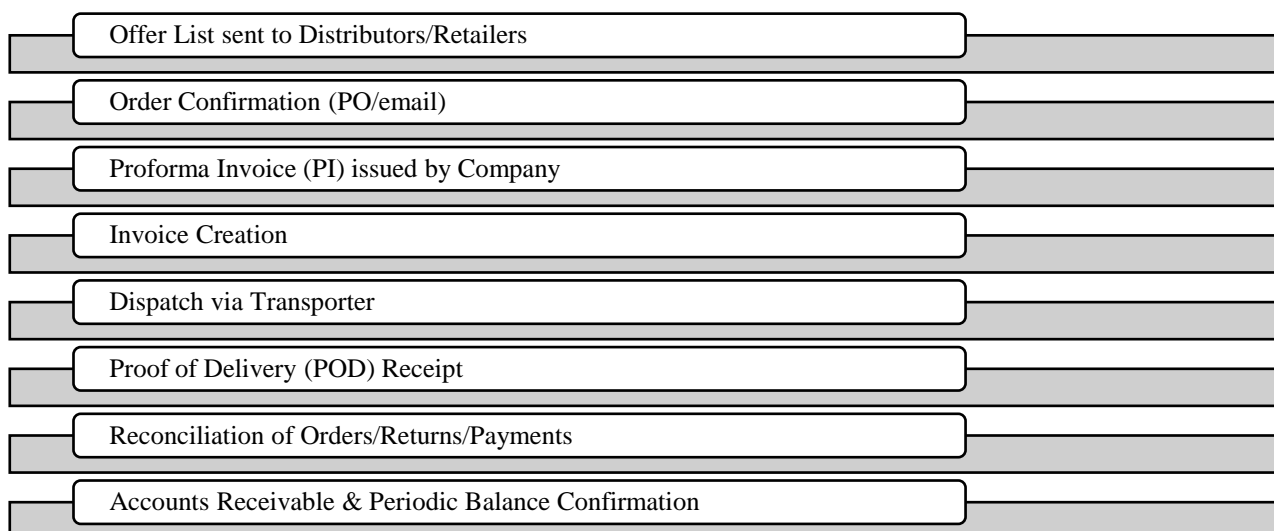

Once received at the relevant EBO / MBO store, the stock received is scanned at the relevant store and processed for inward.

Any discrepancies in the inward stock received at the EBO / MBO store such as shortages or mismatches are reported to the Company's warehouse. Accordingly, replacement stock is dispatched to the relevant EBO or MBO store as the case may be, from the inventory available at the Company's warehouse.

The offer list is thereafter confirmed by the distributor / retailer by virtue of a confirmation via email or by issue of a purchase order in favour of the Company. Upon issuance of confirmation email or purchase order as the case may be, the Company issues a proforma invoice in name of the distributor or retailer based on the total number of confirmed orders. A tax invoice is created by the Company and products are dispatched to the retailer or the distributor as the case may be, via transporters of the Company.

Upon delivery of stock to the distributor / retailer, proof of delivery is obtained.

Upon completion of deliveries and issue of proofs of delivery, the Company undertakes reconciliation of purchase orders, against corresponding payments made, returns that are made and adjustments if any, towards the same.

Account receivables are tracked as per the commercial terms agreed in the purchase order and balance confirmations are obtained by the Company on a periodic basis.

#### **B2B E-Commerce Sales Flow (Buy and Sell with Platform Partner)**

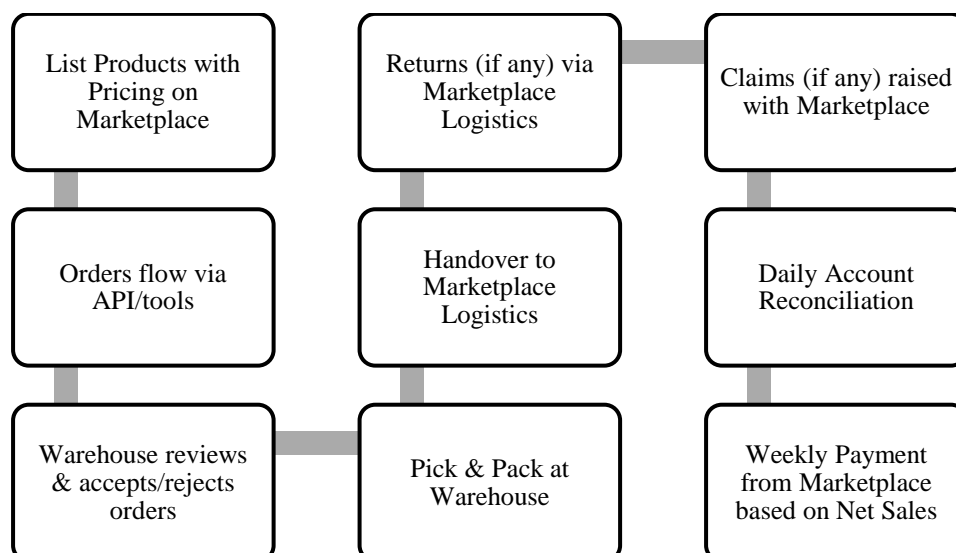

In case of direct sales by the Company to B2B e-commerce platforms, the Company firstly sends an offer list to the e-commerce platform upon a request. Once the offer list is shared, a fast-moving non-moving inventory number is created by the e-commerce retail partner for the listings shared in the offer list. The offer list is thereafter confirmed by the e-commerce platform by virtue of a confirmation via email or by issue of a purchase order in favour of the Company. Upon issuance of confirmation email or purchase order as the case may be, the Company issues a proforma invoice in name of the e-commerce platform based on the total number of confirmed orders. An appointment slot is booked by the Company prior to dispatch of products and thereafter, products are dispatched to the e-commerce platform to its delivery location.

Once the products are delivered, proof of delivery is obtained from the e-commerce platform.

Upon completion of deliveries and issue of proofs of delivery, the Company undertakes reconciliation of purchase orders, against corresponding payments made, returns that are made and adjustments if any, towards the same. Account receivables are tracked as per the commercial terms agreed in the purchase order and balance confirmations are obtained by the Company on a periodic basis.

## E-Commerce Marketplace Sales Flow (Merchant Model)

For its marketplace sales, the Company lists its products along with corresponding prices on the specific marketplace platform. Orders placed by customers for purchase of products are routed through API. The ERP software used by the Company is integrated with the e-commerce marketplace via API in such a manner that once an order is placed with the e-commerce marketplace platform, the same is routed immediately to the Company's warehouse for acceptance or rejection of order. The order once received via the ERP software at the Company's warehouse is reviewed and acceptance or rejections of orders are entered into the software. Accepted orders are packed and kept ready for dispatch to the specific end customer that has placed the order on the e-commerce marketplace. The packed orders are handed over for dispatch to the transport service provide engaged by the e-commerce marketplace. Returns of products (if any) from end-customers are processed via the e-commerce marketplace. The marketplace undertakes returns through its logistics providers and processes claims of the end customer. ### OUR BUSINESS STRATEGY

Our Company's business strategy is aimed at supporting growth and strengthening operations across its business segments, as listed below.

#### Target Market Identification

The Company currently operates 11 EBOs out of a total of 14 EBOs of Brand 1 and 3 MBOs under the trademark Sneakrz. These outlets provide access to customers across key markets. Going forward, the Company plans to expand its presence by opening additional EBOs and MBOs in tier-II cities to strengthen local reach and improve accessibility.

Given the premium nature of Brand 1 and our in-house MBO format "Sneakrz," we have focused on identifying high-potential, premium locations that align with our target demographic—urban, fashion-forward, and brand-conscious consumers. Our strategy prioritizes visibility, accessibility, and customer experience in locations that offer strong footfall and brand synergy.

To this end, we are in the process of launching five new strategically located stores:

1. Navi Mumbai International Airport (MBO): This store aims to capture a diverse customer base with high spending potential, including both domestic and international travellers.
2. New Delhi – Netaji Subhash Place (EBO): Located in a prominent commercial and residential area of Delhi, this store is targeted at the growing segment of urban professionals and affluent consumers.
3. New Delhi – DLF Summit Plaza (MBO): This multi-brand outlet will further strengthen our presence in Delhi NCR and cater to customers seeking variety and a curated selection of premium footwear and athleisure brands under one roof.
4. Mohali – HLP Galleria (MBO): Strategically located in a premium commercial hub, this store benefits from maximum visibility and high footfalls, attracting a mix of residents, working professionals, and young families.
5. Greater Noida – India Expo Plaza (MBO): Positioned within a vibrant retail and entertainment destination, this outlet will cater to a wide consumer base drawn by leading brands such as Reliance Smart, Reliance Digital, Croma, Burger King, Pizza Hut, and Miraj Cinema. The diverse ecosystem of shopping, dining, and leisure makes it an ideal location to showcase our premium offerings and strengthen brand visibility.

### Pricing and Brand Strategy

The Company holds non-exclusive distribution rights for Brand 1 and a license for a brand covering design, manufacturing, and distribution. It intends to build additional brand partnerships through distribution and licensing arrangements in the future. Procurement of goods is managed through negotiations with suppliers to maintain cost efficiency and ensure effective control over purchase prices.

As a part of its pricing and brand strategy, we have recently entered into agreements with three popular brands to distribute their products through Sneakrz multi-brand outlets across India. This strategic move marks an important step in diversifying our brand portfolio while systematically reducing our reliance on Brand 1. By onboarding globally recognized premium brands, we are not only strengthening our market presence but also broadening our product offering to cater to a wider consumer base. Moreover, these partnerships provide us with stronger negotiation leverage, thereby optimizing procurement costs and improving overall cost efficiency.

### **E-Commerce and B2B Sales**

The Company is working to enhance its e-commerce operations by entering into arrangements with digital advisors and specialists to support online sales growth. In the B2B segment, the Company aims to increase volumes through partnerships with established e-commerce platforms and other retailers. To strengthen our e-commerce presence, we have expanded our engagement with e-commerce marketplace by listing our products directly on their platform in addition to our existing B2B wholesale arrangement, thereby enhancing visibility and accessibility to end consumers. In the B2B segment, we have further broadened our reach by onboarding well-known retail company focused on e-commerce branding as a key B2B partner, which supports our objective of increasing volumes and expanding our customer base through established retail networks.

### **Expense Management**

The Company maintains a focus on controlling operating expenses as part of its strategy to support profitability. This includes monitoring costs and aligning resource allocation with business requirements. As our Company operates in the premium and luxury segment, significant expenditure in advertising and marketing which were essential in the initial years to establish our presence and connect with customers in India. However, beginning FY 2025–26, we have strategically reduced these expenses, focusing on cost-effectiveness and strengthening competitiveness while continuing to support brand visibility.

### **OUR MARKETING INITIATIVES**

Our Company undertakes marketing initiatives with the objective of building awareness of the brands it distributes and promoting sales across its retail formats. These initiatives include in-store displays, point-of-sale promotions, and visual merchandising at the EBO and MBO stores. The Company also engages in digital marketing activities such as the use of social media platforms including Instagram, Facebook and LinkedIn, targeted advertisements, and promotional campaigns on e-commerce marketplaces.

In addition, marketing efforts are coordinated with brand principals to ensure consistency with global brand positioning. Seasonal campaigns, product launches, and discount events are organized in collaboration with brand partners to drive footfall and online traffic. These initiatives are undertaken to inform customers about available products across the Company's offline and online channels.

The improvement in gross margins during FY 2024–25 is primarily attributable to higher realisation, which was driven by a combination of Improved product mix and higher average selling prices, resulting in better price realisation per unit sold and Optimisation in quantity sold across higher-margin products, leading to enhanced contribution margins.

Further, although domestic purchases marginally declined from ₹4,970.18 lakh in FY 2023–24 to ₹4,376.60 lakh in FY 2024–25, the discounts received on domestic purchases increased significantly from ₹101.72 lakh to ₹387.85 lakh during the same period. The parent company of Brand 1 is situated outside India and operates in India through such subsidiary. The company started procuring products of Brand 1 domestically through the Brand 1's subsidiary situated in India from FY 2024 onwards which leads to significant increase in domestic purchases from 16.08% in FY 2023 to 39.47% in FY 2024 out of Total Revenue from operations of the relevant financial year. Considering that Brand 1 constitutes a major component of the Company's sales, the origin of its purchases shifted substantially from overseas suppliers to domestic sources, resulting in significant changes to domestic purchases. This shift led to purchase of Stock-in-Trade increasing by ₹ 2,346.33 lakhs, from ₹ 4,854.69 lakhs in FY 2022-23 to ₹ 7,201.02 lakhs in FY 2023-24, contributing a 48.33% impact on the PAT margin.

- (3) **Changes in Inventories of Traded Goods:** The change in inventories of traded goods improved from (-36.64%) in FY 2022-23 to 0.47% in FY 2023-24 primarily due to expansion of retail outlets leading to higher purchases and higher inventory which is required to be maintained at every store.
- (4) **Employee benefits expense:** Employee benefits expense decreased as a percentage of revenue from operation from 6.69% in FY 2022-23 to 3.95% in FY 2023-24, primarily due to higher employee costs in the previous year, contributing a 57.03% positive impact on the PAT margin.
- (5) **Finance Costs:** Finance costs increased as a percentage of revenue from operation from 0.03% in FY 2022-23 to 0.31% in FY 2023-24, resulting in a negative impact of 2274.80% on the PAT margin, mainly on account of higher borrowings to support business operations.
- (6) **Depreciation and Amortisation Expense:** Depreciation and amortisation expense increased as a percentage of revenue from operations from 0.85% in FY 2022-23 to 0.52% in FY 2023-24, resulting in a negative impact of 60.94% on the PAT margin, primarily due to depreciation on fixed assets used for business operations.
- (7) **Other Expenses:** Other expenses increased as a percentage of revenue from operations from 22.92% in FY 2022-23 to 27.46% in FY 2023-24, negatively impacting PAT margin by 219.07%. Other expenses primarily comprise store operating costs, including lease rentals, utilities, maintenance, and security expenses incurred for the expanded retail network, together with increased marketing and advertising spends towards brand promotion and new store launches, as well as higher logistics and distribution costs on account of enhanced freight, transportation, and warehousing requirements to service the enlarged store base.
- (8) **Tax Expenses:** Tax expenses increased as a percentage of revenue from operations from 0.41% in FY 2022-23 to 2.33% in FY 2023-24, negatively impacting PAT margin by 1414.04%, mainly on account of higher taxable profits during FY2023-24

### Qualitative Disclosure about Market Risk

#### Financial Market Risks

Market risk is the risk of loss related to adverse changes in market prices, including interest rate risk. We are exposed to interest rate risk, inflation and credit risk in the normal course of our business.

#### Interest Rate Risk

Our financial results are subject to changes in interest rates, which may affect our debt service obligations and our access to funds.

#### Effect of Inflation

We are affected by inflation as it has an impact on the raw material cost, wages, etc. In line with changing inflation rates, we rework our margins so as to absorb the inflationary impact.

#### Credit Risk

We are exposed to credit risk on monies owed to us by our customers. If our customers do not pay us promptly, or at all, we may have to make provisions for or write-off such amounts.

#### **Reservations, Qualifications and Adverse Remarks**

Except as disclosed in chapter titled “*Restated Financial Statements*” beginning on page 223 of this Red Herring Prospectus, there have been no reservations, qualifications and adverse remarks.

Details of Default, if any, including therein the Amount Involved, Duration of Default and Present Status, in Repayment of Statutory Dues or Repayment of Deposits or Repayment of Loans from any Bank or Financial Institution.

Except as disclosed in chapter titled “*Restated Financial Statements*” beginning on page 223 of this Red Herring Prospectus, there have been no defaults in payment of statutory dues and interest thereon or repayment of deposits and interest thereon or repayment of loans from any bank or financial institution and interest thereon by the Company.

#### **FACTORS THAT MAY AFFECT THE RESULTS OF THE OPERATIONS**

##### **Unusual or infrequent events or transactions**

There are no transactions or events, which in our best judgment, would be considered unusual or infrequent that have significantly affected operations of the Company.

##### **Significant economic changes that materially affected or are likely to affect income from continuing operations**

There are no significant economic changes that materially affected Company’s operations or are likely to affect income from continuing operations. Any slowdown in the growth of Indian economy or future volatility in global commodity prices, could affect the business including the future financial performance, shareholders’ funds and ability to implement strategy and the price of the Equity Shares.

##### **Known trends or uncertainties that have had or are expected to have a material adverse impact on sales, revenue or income from continuing operations**

Other than as disclosed in the chapter titled “*Risk Factors*” beginning on page 32 of this Red Herring Prospectus to our knowledge, there are no known trends or uncertainties that have or had or are expected to have a material adverse impact on revenues or income of our Company from continuing operations.

##### **Future changes in relationship between costs and revenues in case of events such as future increase in labour or material cost or prices that will cause material change**

According to our knowledge, there are no future relationship between cost and income that would be expected to have a material adverse impact on our operations and revenues. However, increase in the cost of the goods in which the Company deals, will affect the profitability of the Company. Further, the Company may not be able to pass on the increase in prices of the services to the customers in full and this can be offset through cost reduction.

##### **The extent to which material increases in net sales or revenue are due to increased sales volume, introduction of new products or services or increased prices**

The increase in revenue is by and large linked to increase in volume of all the activities carried out by the Company.

##### **Total turnover of each major industry segment in which the Issuer Company operates**

Our Company is involved in trading of goods like footwear, Apparels, Accessories and others.

Relevant industry data, as available, has been included in the chapter titled “*Industry Overview*” beginning on page 127 of this Red Herring Prospectus.

##### **Status of any Publicly Announced New Business Segments**

Except as disclosed elsewhere in the Red Herring Prospectus, we have not announced and do not expect to announce in the near future any new business segments.

### **Seasonality of the Business**

The business of our company is not seasonal, hence there is no impact of seasonality on our turnover and operations. However, one of the industries that we cater to, i.e., construction industry slows down its operations typically during monsoon due to unfavourable weather conditions.

### **Any significant dependence on a single or few suppliers or customers**

We depend on external suppliers for all the raw materials required and typically purchase raw materials on a purchase order basis and place such orders with them in advance based on our projected requirements. As a result, the success of our business is significantly dependent on maintaining good relationships with our suppliers. The absence of long-term supply contracts subjects us to risks such as price volatility caused by various factors viz. commodity market fluctuations, currency fluctuations, climatic and environmental conditions, transportation cost, changes in domestic regulatory changes and trade sanctions. If we cannot fully offset the increase in raw material prices with an increase in the prices for our products, we will experience lower profit margins, which in turn may have a material adverse effect on our results of operations, and financial condition and ultimately lead to a liquidity crunch. In the absence of such contracts, we are also exposed to the risk of unavailability of raw materials in desired quantities and qualities, in a timely manner.

### **Competitive Conditions**

We have competition with domestic and international bedding essentials manufacturers who may vertically integrate their supply chains by acquiring or establishing their own distribution operation which reduces the need for independent distributors and create additional competition in the market. We expect competition to intensify due to possible new entrants in the market, existing competitors further expanding their operations and our entry into new markets where we may compete with well-established unorganized companies/ entities. This we believe may impact our financial condition and operations. For details, please refer to the chapter titled “**Risk Factors**” beginning on page 32 of this Red Herring Prospectus.

<b>(i) VAT Appeal No. 45 of 2023</b>	
<b>Section/Code</b>	Section 81 of the Delhi Value Added Tax Act, 2002
<b>Court Authority</b>	High Court of Delhi

<b>Case Details</b>	<p>Our Group Company Sunglass Palace Private Limited (“<b>Appellant</b>”) filed an appeal before the Delhi High Court against the Commissioner of Trade and Taxes, Delhi (“<b>Respondent</b>”). The appeal arises out of a notice of objection dated 17<sup>th</sup> April 2012 filed by the Appellant under the Value Added Tax Act, 2002 (“<b>VAT Act</b>”) to dispute the notice of default assessment of tax and interest under Section 32 of the VAT Act passed by the Assessing Authority for the period between May 01, 2010, to May 31, 2010. The business premises of the Appellant was surveyed by the enforcement branch on May 05, 2010, during which stock variation amounting to ₹ 2,96,11,028/- and cash variation amounting to ₹ 56,461/- was detected. The Appellant claimed that the stock difference was due to goods being sent to purchasing dealers on delivery note DVAT-33 for display in their showroom windows without taking any surety/guarantee/agreements. The original order pertaining to this assessment bearing reference number 040987421112/936 dated December 22, 2011, was followed by a review order on 040037911213 dated April 11, 2012. The assessment amount disputed by the Appellant was a sum of INR 20,28,904/- and for this, the Appellant attached various supporting documents including the reviewed order, original order, sales summary statement, written submissions, stock ledgers, and reconciliation statements. In response to this objection, the Office of the Special Commissioner-1, Government of NCT, Delhi, Department of Trade and Taxes issued its order dated June 23, 2017. The Special Commissioner observed that the Appellant had claimed to have transferred goods to four dealers, two out of which were showing nil tax paid in the year 2010-11. It was in the Special Commissioner’s view, financially implausible that goods (including goods comprising of gold in various quantities) would be sent for sale on approval without any agreement with such dealers. The Special Commissioner rejected the objections filed by the Appellant and upheld the orders passed by the Assessing Authority, finding that the impugned order did not suffer from illegality, infirmity, or misconception. The Appellant thereafter filed an appeal before the Delhi Value Added State Tax Appellate Tribunal (“<b>Appellate Tribunal</b>”). Aggrieved by the order of the Appellate Tribunal, the Appellant has filed this appeal before the Hon’ble Delhi High Court challenging the order passed by the Appellate Tribunal.</p>

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the "UPI Circulars") in relation to streamlining the process of public Issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by Individual Investors through intermediaries with the objective to reduce the time duration from Issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019, or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Individual Investor had the option to submit the Application Form with any of the Designated Intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

**Phase II:** This phase has become applicable from July 1, 2019 and was to initially continued for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by Individual Investors through Designated

Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public Issue closure to listing continues to be six working days during this phase.

**Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023, and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“**T+3 Notification**”). In this phase, the time duration from public Issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

The processing fees for applications made by Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. Accordingly, the Issue has been undertaken pursuant to the processes and procedures under UPI Phase III, subject to any circulars, clarification or notification issued by the SEBI pursuant to the T+3 Notification. The Issue has been advertised in English national newspaper edition of in English National Newspaper Edition of Business Standard (a widely circulated English National Daily Newspaper), Hindi National Newspaper Edition of Business Standard (a widely Circulated Hindi National Daily Newspaper) and Regional Newspaper of Delhi Edition of Pratahkiran (Hindi being the regional language of New Delhi, where our registered office is located), on or prior to the Bid/Issue Opening Date and such advertisement has also been made available to the Stock Exchange for the purpose of uploading on their websites.

The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Individual Applicants into the UPI payment mechanism.

### Collection of Requests

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints in this regard, the relevant SCSB as well as the post – Issue Book Running Lead Manager will be required to compensate the concerned investor.

The processing fees for applications made by Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. ## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has, from time to time, made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade Ministry of Commerce and Industry, GoI, earlier known as Department of Industrial Policy and Promotion (“DPIIT”) issued the Consolidated FDI Policy notified by the DPIIT File No. 5(2) / 2020-FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (the “**Consolidated FDI Policy**”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Rules, any investment, subscription, purchase or sale of equity instruments by entities, investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

As per Consolidated FDI Policy and FEMA Rules, companies which are engaged in single brand retail trading are allowed 100% foreign investment under the automatic route. While for companies which are engaged in multi-brand retail trading, the Consolidated FDI Policy and FEMA Rules prescribe a cap of 51% on foreign investment under the government approval route, subject to specific conditions. For further details, see “**Key Industry Regulations and Policies in India**” on page 183 of this Red Herring Prospectus. With effect from April 1, 2020, the aggregate limits for FPI investments are the sectoral caps applicable to our Company. Each Bidder should seek independent legal advice about its ability to participate in the Issue and in our Company. In the event a prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/ Issue Period.

Given that more than 50% of our Company’s Equity Share capital is owned by resident Indian citizens and our Company is controlled by resident Indian citizens, our Company is a “company owned by resident Indian citizens” and a “company controlled by resident Indian citizens” within the meaning of the FEMA Rules and the Consolidated FDI Policy. Consequently, no investment made by our Company into our Subsidiary is deemed to be ‘indirect foreign investment’ within the meaning of the FEMA Rules and the FDI Policy, and the FEMA Rules and FDI Policy are not applicable to our Subsidiary or our Company’s investment into our Subsidiary.

Any change in our Company’s shareholding within the meaning of Consolidated FDI Policy, FEMA Rules and FEMA Regulations could have an adverse impact on our business and financial condition, and on our Company’s investment in our Subsidiary.

For further details, please see “**Risk Factors - Investors outside India subscribing to this Issue may not be able to enforce any judgment of a foreign court against us, except by way of a suit in India.**” on page 67 of this Red herring Prospectus.

As per existing policy of the Government, OCBs cannot participate in the Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines, etc. as amended by RBI, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not issue, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their

respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

#### **Investment conditions/ restrictions for overseas entities**

Under the current Consolidated FDI Policy 2020, the maximum amount of investment (sectoral cap) by foreign investor in an issuing entity is composite unless it is explicitly provided otherwise including all types of foreign investments, direct and indirect, regardless of whether it has been made for FDI, FPI, NRI/OCI, LLPs, FVCI, investment vehicles and depository receipts under FEMA Rules. Any equity holding by a person resident outside India resulting from conversion of any debt instrument under any arrangement shall be reckoned as foreign investment under the composite cap.

Portfolio investment up to aggregate foreign investment level of 49% or sectoral/ statutory cap, whichever is lower, will not be subject to either Government approval or compliance of sectoral conditions, if such investment does not result in transfer of ownership and/or control of Indian entities from resident Indian citizens to non-resident entities. Other foreign investments will be subject to conditions of Government approval and compliance of sectoral conditions as per FDI Policy. The total foreign investment, direct and indirect, in our Company will not exceed the sectoral/statutory cap.

#### **Investment by FPIs under Portfolio Investment Scheme (PIS)**

With regards to purchase/sale of capital instruments of an Indian company by an FPI under PIS, the total holding by each FPI or an investor group as referred in SEBI FPI Regulations shall not exceed 10% of the total paid-up equity capital on a fully diluted basis or less than 10% of the paid-up value of each series of debentures or preference shares or share warrants issued by an Indian company and the total holdings of all FPIs put together shall not exceed 24% of paid-up equity capital on fully diluted basis or paid-up value of each series of debentures or preference shares or share warrants. The said limit of 10% and 24% will be called the individual and aggregate limit, respectively. However, this limit of 24% may be increased up to sectoral cap/statutory ceiling, as applicable, by the Indian company concerned by passing a resolution by its Board of Directors followed by passing of a special resolution to that effect by its general body.

#### **Investment by NRI or OCI on repatriation basis**

The purchase/ sale of Equity Shares, debentures, preference shares and share warrants issued by an Indian company (hereinafter referred to as “**Capital Instruments**”) of a listed Indian company on a recognised Stock Exchange in India by Non-Resident Indian (“NRI”) or Overseas Citizen of India (“OCI”) on repatriation basis is allowed subject to certain conditions under FEMA NDI Rules.

The total holding by any individual NRI or OCI shall not exceed 5% of the total paid-up equity capital on a fully diluted basis or should not exceed 5% of the paid-up value of each series of debentures or preference shares or share warrants issued by an Indian company and the total holdings of all NRIs and OCIs put together shall not exceed 10% of the total paid-up equity capital on a fully diluted basis or shall not exceed 10% of the paid-up value of each series of debentures or preference shares or share warrants; provided that the aggregate ceiling of 10% may be raised to 24% if a special resolution to that effect is passed by the general body of the Indian company.

#### **Investment by NRI or OCI on non-repatriation basis**

As per current FDI Policy, FEMA NDI Rules, purchase/ sale of Capital Instruments or convertible notes or units or contribution to the capital of an LLP by an NRI or OCI on non-repatriation basis – will be deemed to be domestic investment at par with the investment made by residents. This is further subject to remittance channel restrictions.

**The Equity Shares have not been and will not be registered under the U.S. Securities Act 1933 as amended (“US Securities Act”) or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States only to persons reasonably believed to be “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act and referred to in this Red Herring Prospectus as “U.S. QIBs”, for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in this Red Herring Prospectus as “QIBs”) pursuant to Section 4(a) of the U.S. Securities Act, and (ii) outside the United States in offshore transactions in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.**

Further, no issue to the public (as defined under Directive 2003/71/EC, together with any amendments) and implementing measures thereto, (the “**Prospectus Directive**”) has been or will be made in respect of the Issue in any

member State of the European Economic Area which has implemented the Prospectus Directive except for any such issue made under exemptions available under the Prospectus Directive, provided that no such issue shall result in a requirement to publish or supplement a prospectus pursuant to the Prospectus Directive, in respect of the Issue.
