## INTERNAL RISK FACTORS

### **BUSINESS RELATED RISKS**

- 1. Our Company is increasingly dependent on a domestic market for its sales and any downturn in it could dent our market share.***

We have historically derived majority of our revenues from sales in the domestic market. Our Company is majorly dependent on domestic sales for their product sales while our products are also sold in Bangladesh and Nepal. Thus, the sales of our company are widely dispersed throughout the domestic and any failure to maintain such dispersion may impact sales, revenues, and consequently, the financial performance of the company. Details for the revenue generated from domestic market and through export as per restated financials are as follow:

Particulars	Domestic Sales		Export Sales		Total Sales
	Sales (₹ in Lakhs)	% of Sales	Sales (₹ in Lakhs)	% of Sales	Amt (₹ in Lakhs)
February 28, 2025	18,751.86	99.96	8.32	0.04	18,760.18
Fiscal 2024	19,174.41	98.93	207.71	1.07	19,382.12
Fiscal 2023	15,010.63	99.49	76.50	0.51	15,087.13
Fiscal 2022	13,073.30	97.68	310.82	2.32	13,384.12

Further, any failure in expanding our geographical presence in the international market will lead to loss of opportunity in earning higher revenue thereby effect our growth and profit in the Company. Loss of all or a substantial portion of sales to any of our customer from these countries for any reason (including, due to any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments in these countries, occurrence of COVID- 19 infection or any such kind and strict curbs), could further have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects export destination countries may also enter into free trade agreements or regional trade agreements with countries other than India. Such agreements and alteration of existing tax treaties may lead to increased competition or may even place us at a competitive disadvantage compared to manufacturers in other countries. India is also a party to, and is currently negotiating, free trade agreements with several countries and if we export our products to such countries, any revocation or alteration of those bilateral agreements may also adversely affect our ability to export. Occurrence of any of these events may adversely affect our business, financial condition and results of operations. Further, changes in import policies or an economic slowdown in countries to which we export our products may have a significant adverse impact on our business, financial condition and results of operations.

- 2. We operate all our manufacturing facilities from concentrated geographic areas therefore, any localized social unrest, natural disaster or breakdown of services or any other natural disaster in and around or any disruption in production at, or shutdown of, all our manufacturing units could have material adverse effect on our business and financial condition.***

All of our existing manufacturing facilities are strategically located in Dhulagarh, West Bengal, and Jhajjar, Haryana. We are also planning further expansion in Dhulagarh, West Bengal. Any materially adverse social, political or economic development, natural calamities, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Our business is dependent upon our ability to manage our manufacturing activities, which are subject to various operating risks, including political instability, productivity of our workforce, compliance with regulatory requirements, difficulties with production costs and yields, product quality and those beyond our control, such as the breakdown and failure of equipment or industrial accidents, disruption in electrical power or water resources, severe weather conditions, natural disasters and an outbreak of pandemic such as COVID-19. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. Moreover, some of our products are permitted to be manufactured only at such facility which has received specific approvals, and any shutdown of such facility will result in us being unable to manufacture a product for the duration of such shutdown. Our inability to effectively respond to any shutdown or slowdown and rectify any disruption, in a timely manner and at an acceptable cost, could lead to delays in the entire production cycle and an inability to comply with our customers' requirements and lead to loss of revenue to us and our customers.

Although we have not experienced any strikes or labor unrest in the past three years, we cannot assure you that we will not experience disruptions in work in the future due to disputes or other problems with our work force. Any labor unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations, which in turn could adversely affect our business, results of operations, financial condition and cash flows.

**3. *We have been unable to locate certain of our historical corporate records. Our Company was incorporated in 1997 and certain corporate records and documents filed by us with the RoC are not traceable.***

The secretarial records such as certain returns of past allotments of Equity Shares made by our Company, share transfer forms, could not be traced. While we have undertaken extensive search for our records at registered office of the company and on the MCA portal maintained by the Ministry of Corporate Affairs, we have not been able to trace the aforementioned corporate records. In this regard, we have relied on the minutes, statutory registers and search report dated June 03, 2024 prepared by an independent practicing company secretary, named M/s. Khusbu & Co., Company Secretary, which was prepared based on their physical search of the documents available with the Registrar of Companies, Kolkata and search of the information and records available on the portal of the Ministry of Corporate Affairs. Accordingly, we have included the details of the build-up of the share capital of the Company and the build-up of the Promoters' shareholding in our Company in this RHP, by placing reliance on other corporate records such the annual reports filed by corporate entities who were the erstwhile shareholders of our Company and the documents such as Annual Return filed by our Company with the Registrar of Companies.

We cannot assure you that the filings were made in a timely manner or at all. We cannot assure you that, in future, we will not be subjected to any liability on account of non-availability of such records. Although no legal proceedings or regulatory actions have been initiated or pending against us in relation to such untraceable secretarial and other corporate records and documents, if we are subject to any such liability, it may have adverse effect on our compliant status, financial condition, cash flows and results of operations. Further, there can be no assurance that there will be no such delays or non-compliances in the future and our Company will not be subject to adverse actions by the authorities.

**4. *We require certain approvals and licenses in the ordinary course of business and the failure to successfully obtain/renew such registrations would adversely affect our operations, results of operations and financial condition.***

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous.

Additionally, we have applied for certain approvals, licenses, registrations and permits, which are necessary for us to continue our business. For instance, Consent to Operate under Sub-rule (1) of Rule 6 of the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and Application for renewal of Approval of Welding Consumables- Classic 6013 PLUS Classic LH-7018 and Classic MIG 70S.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which are, pending receipt or renewal, see "**Government and Other Approvals**" on page 238 of this Red Herring Prospectus

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

There can be no assurance that we will be able to successfully obtain or renew our registration in a timely manner or at all, which may affect our ability to use the trademark in the future. We may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted.

Pending the registration of these trademarks, any third party may use the above-mentioned trademarks and we may have a lesser recourse to initiate legal proceedings to protect our intellectual property. Further, our applications for the registration of trademarks may be opposed by third parties, and we may have to incur significant cost in relation to these oppositions. In the event we are not able to obtain registrations due to opposition by third parties or if any injunctive or other adverse order is issued against us in respect of any of our trademarks for which we have applied for registration, we may not be able to use such trademarks and / or avail the legal protection or prevent unauthorized use of such trademarks by third parties, which may adversely affect our goodwill and business. We may be required to devote management and financial resources in the defence or prosecution of such legal proceedings. Should any new developments arise, including a change in Indian laws or rulings against us by the appellate courts or tribunals, we may face losses and we may have to make further provisions in our financial statements, which could increase our expenses and our liabilities. Decisions in such proceedings, adverse to our interests, may have a material adverse effect on our business, cash flows, financial condition, and results of operations. Failure to successfully defend these or other claims, or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subject to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure you that similar proceedings will not be initiated in the future. Any adverse order or direction in these cases by the concerned authorities, even though not quantifiable, may have an adverse effect on our reputation, brand, business, results of operations and financial condition. For further details, please refer to "**Outstanding Litigation and Material Developments**" on page 232 of this RHP.

**7. *The restated examination report by our peer review auditor on special purpose financial statements has provided a matter of emphasis paragraph for the company has not accounted for interest provisions as per MSMED Act, 2006.***

The company has not accounted for interest provisions as per MSMED Act, 2006. The company has made payments to MSME vendors within contractual period mutually agreed between the parties which is exceeding the contractual time limit as per MSMED Act, 2006 and the amount payable to them are agreed between the company and the vendors considering the mutual contractual credit period, hence no interest is payable according to the company. Hence, the company has not accounted for interest provisions as per MSMED Act, 2006 as they had contractual credit period of more than stipulated period of MSMED Act, 2006. However, the company should have accounted for interest as per provisions of MSMED Act, 2006 and as a result of which the profit would have been lower by the interest amount as payable as per the provisions of MSMED Act, 2006. The interest for the period April 2024 to February, 2025 as per MSMED Act, 2006 is Rs 3.52 Lakhs. The Statutory Auditors of the company have included a matter of emphasis in their Audit Report on our financial statements for the period ended February 28, 2025 and for Fiscal 2024, 2023 and 2022. For further details refer '**Financial Information**' chapter on page 202 of RHP. While the company has made payments to MSME vendors within contractual period mutually agreed and not accounted for interest provisions as per MSMED Act, mutually agreed, we cannot assure that our business, financial condition and results of operations will not be materially and adversely affected. The company confirms that for future transactions, the company will adhere to the rules and regulations mentioned for the contractual time limit as per MSMED Act, 2006.

No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future, or our Company will not commit any further delays or defaults in relation to payments to be made to MSME vendors, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

**8. *If there are delays in setting up the proposed expansion or if the costs of setting up and the possible time or cost overruns related to the proposed facilities or the purchase of plant and machinery for the proposed facilities are higher than expected, it could have a material adverse effect on our financial condition, results of operations and growth prospects.***

We are in the process of expanding existing manufacturing facility located in Dhulagarh, West Bengal, which would require substantial capital expenditure. The completion of proposed expansion is dependent on our ability to arrange finance through Net Proceeds or otherwise, the performance of external agencies which are responsible for inter alia construction of structure, installation and commissioning of plant and machinery and supply and testing of equipment etc. We cannot assure you that we will be able to arrange for such finance on time. Further, we cannot assure you that the performance of external agencies will meet the required specifications or performance parameters. We may not be able to identify suitable replacement external agencies in a timely manner. If the performance of these agencies is inadequate in terms of the requirements, this may result in incremental cost and time overruns. However, if we decide to raise additional funds through the issuance of equity or equity-linked instruments, the interests of our shareholders may be diluted. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business prospects could be adversely affected.

Some of the plant, machinery and equipment to be purchased may be required to be shipped to the proposed expansion site, as the case may be, from other regions. Any delay in the transportation of such assets or damage to the assets acquired due to inter alia defaults by transportation agencies may further result in cost and time overruns in the commissioning of the proposed expansion.

The estimated costs of plant and machinery purchased/ to be purchased are verified from invoices/ quotations of vendors respectively and based on management's estimates on current conditions which are subject to change, owing to prospective changes in external circumstances, costs and other financial conditions. There could be delays in setting up the proposed expansion as a result of, amongst other things, requirement of obtaining approvals from statutory or regulatory authorities, contractors' or external agencies' failure to perform, exchange rate fluctuations, unforeseen engineering problems, disputes with workers, increase in input costs of construction materials and labour costs, incremental preoperative expenses, taxes and duties, interest and finance charges, cost escalation and/ or force majeure events (including the continuing impact of the COVID-19 pandemic, geopolitical tensions, etc.), any of which could give rise to cost overruns and delays in our implementation schedules.

If the actual capital expenditures on setting up the proposed expansion significantly exceed our budgets, we may not be able to achieve the intended economic benefits of the proposed expansion, as applicable, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. There can be no assurance that we will be able to complete the aforementioned expansion or commissioning of our plants and additions in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

**9. *Our business and profitability is substantially dependent on the availability and cost of our raw materials and any disruption to the timely and adequate supply or volatility in the prices of raw materials may adversely impact our business, results of operations, cash flows and financial condition.***

We are engaged in the manufacturing of complex and high precision engineered components, requiring raw materials having certain technical specifications. The table below provides cost of raw materials and components consumed as a percentage of our total revenue in the years/ periods indicated:

(Rs. in Lakhs)

Particulars	February 28, 2025		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amt (₹ in Lakhs)	% of total Revenues	Amt (₹ in Lakhs)	% of total Revenues	Amt (₹ in Lakhs)	% of total Revenue s	Amt (₹ in Lakhs)	% of total Revenue s
Cost of Raw Materials and Components Consumed	8,851.23	47.18%	8,657.32	44.67%	7,634.89	50.61%	6,298.28	47.06%

We may experience volatility in the cost or availability of raw materials. A major portion of raw materials comprises of metals including iron and steel, nickel, Titanium Wires and Titanium Oxide, Quartz, Chemicals such as Carbonates, Sodium, Hydrogen Bicarbonate etc. The prices of such raw materials are volatile and are dependent on a number of factors, such as, their availability, fluctuations in domestic and international demand and supply, international production and capacity, fluctuation in the volume of metal imports, transportation costs, protective trade measures and various social and political factors, in the economies in which the metal producers sell their products. For instance, Fiscal 2023 was a challenging year for the steel sector due to the Russia-Ukraine conflict, which began in the last quarter of Fiscal 2022. This conflict led to a sharp increase in the prices of coking coal, iron

ore, pig iron, and steel, with all these commodities reaching record highs. As a result, domestic demand was adversely affected, and procurement decisions in the end-use segments were directly impacted during the first quarter of Fiscal 2023. (Source: CRISIL Report) While our arrangements with customers allow us to seek an upward revision in pricing, our cash flows may still be adversely affected because of any gap in time between the date of procurement of those primary raw materials and date on which we can reset the prices for our customers, to account for the increase in the prices of such raw materials. Our ability to pass through costs or otherwise mitigate these cost increases could adversely affect our business. From time to time, commodity prices may also fall rapidly. If this happens, suppliers may withdraw capacity from the market until prices improve which may cause periodic supply interruptions. If these supply interruptions occur, our costs for procuring our raw materials could increase, and our business, cash flows and results of operations could be adversely affected.

Any increase in prices of raw materials could have an impact on our working capital as we would require additional funds to procure the necessary steel at the higher prices. As a result, we may be required to allocate a larger portion of our working capital towards purchasing raw materials to maintain our production levels. This increased allocation towards purchase can potentially strain our working capital availability.

**10. Our inability to collect receivables and default in payment from our customers could result in the reduction of our profits and affect our cash flows.**

We largely sell on open credit & the payment terms are between 30 to 120 days. While we generally monitor the ability of our customers to pay these open credit arrangements and limit the credit, we extend to what we believe is reasonable based on an evaluation of each customer's financial condition and payment history, we may still experience losses because of a customer being unable to pay. As a result, while we maintain what we believe to be a reasonable allowance for doubtful receivables for potential credit losses based upon our historical trends and other available information, there is a risk that our estimates may not be accurate.

(Rs. in Lakhs)

Particulars	February 28, 2025	Fiscal 2024	Fiscal 2023	Fiscal 2022
	Amt (₹ in Lakhs)	Amt (₹ in Lakhs)	Amt (₹ in Lakhs)	Amt (₹ in Lakhs)
<b>Unsecured, Considered Good</b>				
Trade Receivable more than six months	628.12	585.38	574.73	740.23
Trade Receivable less than six months	4283.72	2,835.79	2,712.19	2,001.77
<b>Unsecured, Considered Doubtful</b>				
Trade Receivable more than six months	-	-	-	-
<b>Total</b>	<b>4911.84</b>	<b>3,421.17</b>	<b>3,286.92</b>	<b>2,742.00</b>

Any increase in our receivable turnover days will negatively affect our business. If we are unable to collect customer receivables or if the provisions for doubtful receivables are inadequate, it could have a material adverse effect on our business, results of operations and financial condition. We confirm that there has been no such instance during the last 3 financial years.

Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers, and as a result could cause customers to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements, or default on their payment obligations to us. An increase in bad debts or in defaults by our customer, may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our results of operations and cash flows.

**11. Any non-compliance or delays in GST Return Filings may expose us to penalties from the regulators.**

As a Company, we are required to file GST returns with the respective authorities. However, there are certain inadvertent delays in filling of GST returns in the past for which the Company have paid the penalties amounting to Rs. 68,317/- (Sixty-Eight Thousand Three Hundred and Seventeen only) for the FY 21-22 and FY 23-24. The company has taken steps to improve the internal system for payment of GST to mitigate the technical difficulties. However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including

monetary penalties by statutory authorities on account of any inadvertent discrepancies in our GST filling in future, which may adversely affect our reputation and goodwill of the company.

**12. *Any non-compliance or delays in EPF Return Filings may expose us to penalties from the regulators.***

As a Company, we are required to file EPF returns with the respective authorities. However, there are certain inadvertent delays in filling of EPF returns in the past for which the company has received penalties amounting to Rs. 10,404/- (Ten thousand four hundred and four only) for the period from FY 21-22 to FY 24-25 which is duly paid and the company has taken steps to improve the internal system for payment of EPF to mitigate the technical difficulties. However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our EPF filling in future, which may adversely affect our reputation and goodwill of the company.

**13. *Out of total cost of Plant & Machinery worth ₹ 1079.92 lakhs, we have not yet placed order for ₹ 85.31 lakhs of such Plant & Machinery.***

Out of total cost of Plant & Machinery worth ₹ 1079.92 lakhs, we are yet to place an order for ₹ 85.31 lakhs of such Plant and Machinery. Although the validity of the quotations are valid as on the date of filing this Red Herring Prospectus or going to expire in due course of time. Promoter and management are confident that such plant and machineries will be available at the price as per the quotation given by various suppliers. In case, at the time of placing the order, our company would not be able to acquire such plant and machinery at the expected price, we are subject to risks on account of inflation in the price of machineries, for further details of plant and machinery please refer the section “Object of the Issue” on page no. 99 of this Red Herring Prospectus. In case of increase in price of such plant and machinery our company shall require to arrange the additional fund for completion of the project. If we are not able to arrange such additional funds in due time which may result in delay in implementation of our project and which may result into adversely affects the profitability and financial results of the company.

**14. *A significant portion of our revenues are derived from a certain geographical region and any adverse developments affecting such region could have an adverse effect on our business, cash flows, results of operation and financial condition.***

A significant portion of our revenue from operations is derived from our services offered to customers in West Bengal. For period ended February 28, 2025 and Fiscals ended 2024, 2023 and 2022 our revenue generated from operations in West Bengal was ₹ 13,134.25 Lakhs, ₹ 14,137.63 Lakhs, ₹ 10,505.06 Lakhs and ₹ 8,646.83 Lakhs respectively, which represented 70.01%, 72.94%, 69.63%, and 64.61% of our revenue from operations for such periods respectively. Any decrease in revenue from West Bengal, including due to increased competition or supply, or reduction in demand, or our inability to extend or renew subsisting contracts at commercially viable terms, may have an adverse effect on our business, cash flows, results of operation and financial condition. Further, any significant disruption, including due to social, political or economic factors or natural calamities or civil disruptions, impacting this geographical region may adversely affect our business. Additionally, changes in the policies of the state or local governments of this region may require us to change our business strategy. We cannot assure you that we will be able to address our reliance on this geographical region, in the future.

**15. *Our business is working capital intensive. Any insufficient cash flows from our operations or inability to borrow to meet our working capital requirements, it may materially and adversely affect our business and results of operations.***

Our business demands substantial working capital, mainly because there is a significant time gap between the purchase of raw materials and the receipt of sale proceeds from our finished products. As a result, we are required to maintain sufficient stock at all times in order to meet manufacturing requirements, thus increasing our storage and working capital requirements.

There could be situations where the total funds available may not be sufficient to fulfil our commitments, and hence we may need to incur additional indebtedness in the future, or utilize internal accruals to satisfy our working capital needs. Further, we require a substantial amount of capital and will continue to incur significant expenditure in maintaining and growing our existing infrastructure and any additional fund raise, equity or debt, could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could

limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding.

Presently, we meet our working capital requirements through a mix of internal accruals and working capital facilities from banks and financial institutions. As on February 28, 2025 our sanctioned working capital facilities was ₹ 5725.00 Lakhs for funds-based limit and ₹ 850 Lakhs for non-funds-based limit, aggregating to a total limit of ₹ 6575.00 Lakhs. We intend to utilise ₹ 1,660 Lakhs (as part of the Net Proceeds) towards funding our incremental working capital requirements in Fiscal 2025 and Fiscal 2026. For further information on the use of Net Proceeds, see “*Objects of the Issue*” on page 99 of this RHP. The actual amount of our future capital requirements may differ from estimates as a result of, among other factors, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, economic conditions, technological changes and additional market developments. Further, our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions and the effect of events such as credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner.

Management of our working capital requirements involves the timely payment of, or rolling over of, our short-term indebtedness and securing new and additional loans on acceptable terms, or re-negotiation of our payment terms for, our trade payables, collection of trade receivables and preparing and following accurate and feasible budgets for our business operations. If we are unable to manage our working capital requirements, our business, results of operations and financial condition could be materially and adversely affected. For further information on the working capital facilities currently availed of by us, see “*Financial Indebtedness*” on page 204 of this RHP.

**16. We do not have long-term agreements with our suppliers for raw materials and any inability to procure the desired quality, quantity of our raw materials in a timely manner and at reasonable costs, or at all, may have a negative impact on our business, results of operations, financial condition and cash flows.**

Our raw material purchases are concentrated among a select group of suppliers, with our top 10 suppliers accounting for a significant portion of our total raw material purchases, as reflected in our restated standalone financial statements.

\*Supplier Count is given in place of Supplier’s Names as supplier party names are confidential, this table represents top 10 suppliers as a percentage of total purchases for the period ended February 28, 2025 and Fiscal 2024, 2023 and 2022 respectively.

Further, some of our suppliers are our related parties and have been disclosed in “*Annexure XXXVI – Related Party Transactions*” in the chapter titled “*Restated Financial Statements*” on page 202 of this Red Herring Prospectus. Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and

maintain a stable and sufficient supply of raw materials at acceptable prices. Our major raw materials include metals including iron and steel, nickel, titanium wires and titanium oxide, quartz, chemicals such as Carbonates, Sodium, Hydrogen Bicarbonate etc. in electrodes manufacturing, among many others. For further information, see “**Our Business – Procurement of Raw Materials**” on page 132 of this Red Herring Prospectus. We depend on external suppliers for all the raw materials required and typically purchase raw materials on a purchase order basis and place such orders with them in advance based on our requirements. As a result, the success of our business is significantly dependent on maintaining good relationships with our raw material suppliers. The absence of long-term supply contracts subjects us to risks such as price volatility caused by various factors viz. commodity market fluctuations, currency fluctuations, climatic and environmental conditions, transportation cost, changes in domestic as well as international government policies, regulatory changes and trade sanctions. Some part of our raw materials are also imported from Australia during the previous two fiscal years out of three. As a result, we continue to remain susceptible to the risks arising out of foreign exchange rate fluctuations as well as import duties, which could result in a decline in our operating margins. If we cannot fully offset the increase in raw material prices with increase in the prices for our products, we will experience lower profit margins, which in turn may have a material adverse effect on our results of operations, financial condition and ultimately lead to a liquidity crunch. In the absence of such contracts, we are also exposed to the risk of unavailability of raw materials in desired quantities and qualities, in a timely manner.

There can be no assurance that in future we will be able to procure the required quantities and quality of raw materials commensurate with our requirements. There can also be no assurance that a particular supplier will continue to supply us with raw materials in the future. Any delay in supplying finished products to customers in accordance with the terms and conditions of the purchase orders, such as delivery within a specified time, as a result of delayed raw material supply, could result in the customer refusing to accept our products, which may have an adverse effect on our business and reputation. Further, we do not enter into agreements with suppliers which could have an adverse effect on our ability to source raw materials in a commercially viable and timely manner as well as the commitments to our customers, which may impact our business and profitability. Further, as we generally receive purchase orders for the supply of our products to customers, we rely on historical trends and other indicators to purchase the required quantities of raw materials. We, therefore, run the risk of purchasing more raw materials than necessary, which could expose us to risks associated with prolonged storage of some of these materials, and materially affect our results of operations. In addition, if all or a significant number of our suppliers for any particular raw material are unable or unwilling to meet our requirements or if our estimates fall short of the demand, we could suffer shortages or significant cost increases. Continued supply disruptions could exert pressure on our costs, and we cannot assure you that all or part of any increased costs can be passed along to our customers in a timely manner or at all, which could negatively affect our business, overall profitability and financial performance.

**17. *If we fail to manage our growth effectively, we may be unable to execute our business plan or maintain high levels of service and satisfaction, and our business, results of operations, cash flows and financial condition could be adversely affected.***

We have experienced significant growth in our revenue from operations and profitability in the last three Fiscals and anticipate that we will continue to potentially grow, expand into new geographies and take advantage of market opportunities. Our revenue from operations has grown from ₹ 5,862.04 Lakhs in Fiscal 2014 to ₹ 19,382.12 Lakhs in Fiscal 2024, registering a CAGR of 12.70 % in last 10 years. Our PAT has grown from ₹ 48.21 Lakhs in Fiscal 2014 to ₹ 1,229.79 Lakhs in Fiscal 2024, registering a CAGR of 37.92% in last ten years.

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy includes growing our product portfolio, strengthening our brand, deepening our penetration in existing markets and expanding our presence in select new territories and expanding our manufacturing capacities. For further information, see “**Our Business – Proposed Expansion Plan**” on page 132 of this Red Herring Prospectus.

Many factors may contribute to a decline in our revenue growth rates, including increased competition, slowing demand for our product from existing and new customers, inability to attract new customers, general economic conditions, government actions and policies, a failure by us to continue capitalizing on growth opportunities, changes in the regulatory framework, availability of an alternate to our product, non-availability of raw materials at competitive pricing and the maturation of our business, among others. We cannot assure you that our current and planned systems, policies, procedures and controls, personnel and third-party relationships will be adequate to support our future operations. Our inability to effectively manage any of these issues may adversely affect our business growth and, as a result, impact our business, financial condition, results of operations and prospects.

To manage operations and personnel growth, we will need to continue to grow and improve our operational, financial, and management controls and our reporting systems and procedures. We will require significant funds and allocation of valuable management resources to expand our technology and infrastructure without any assurances that our net revenue will increase. Failure to manage our anticipated growth and organizational changes in a manner that preserves the key aspects of our culture could reduce our ability to recruit and retain personnel, innovate, operate effectively, and execute on our business strategy, potentially adversely affecting our business, results of operations, cash flows and financial condition.

We will need to adapt and upgrade our controls, policies, procedures and overall operations to accommodate our growing operations and supporting personnel. Moreover, the speed with which our internal controls and procedures are implemented or adapted to changing regulatory or commercial requirements may be inadequate to ensure full and immediate compliance, leaving us vulnerable to inconsistencies and failures that may have a material adverse effect on our business, results of operations, cash flows and financial condition.

In addition, there may be delays in the anticipated timing of activities related to such growth initiatives, strategies and operating plans; increased difficulty and cost in implementing these efforts; and the incurrence of other unexpected costs associated with operating the business. Any of these factors could adversely impact our results of operations. If, for any reason, the benefits we realize are less than our estimates or the implementation of these growth initiatives, strategies and operating plans adversely affect our operations or cost more or take longer to effectuate than we expect, or if our assumptions prove inaccurate, our results of operations may be materially adversely affected.

***19. Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.***

The success of any capacity expansion and expected return on investment on capital expenditure is subject to, among other factors, the ability to procure requisite regulatory approvals in a timely manner; recruit and ensure satisfactory performance of personnel to further grow our business; and the ability to absorb additional infrastructure costs and develop new expertise. Our ability to maintain our profitability depends on our ability to optimize the product mix to support high-margin products and products with consistent long-term demand and the demand and supply balance of our products in the principal and target markets. In particular, the level of our capacity utilization can impact our operating results. Capacity utilization is also affected by our product mix and the demand and supply balance.

For further information, see “***Our Business - Capacity and Capacity Utilization***” on page 132 of this Red Herring Prospectus. These ratios are not indicative of future capacity utilization rates, which are dependent on various factors, including demand for our products, availability of raw materials, our ability to manage our inventory and improve operational efficiency. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at our manufacturing facility, the availability of raw materials, industry/ market conditions, as well as by the product requirements of, and procurement practice followed by, our distributors. In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facility, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition. Our proposed expansion plans are based on demand forecasts that are subject to various assumptions including product trends in the industry and management estimates that are based on prevailing economic conditions. Adequate utilization of our expanded capacities is therefore subject to various factors beyond our control and in case of oversupply in the industry or lack of demand, we may not be able to utilise our expanded capacities efficiently. The success of any capacity expansion and expected return on investment on capital invested is subject to, among other factors, the ability to procure requisite regulatory approvals in a timely manner; recruit and ensure satisfactory performance of personnel to further grow our business; and the ability to absorb additional infrastructure costs and develop new expertise and utilize the expanded capacities as anticipated. Please also see “Risk Factor no. 8 - *If there are delays in setting up the proposed expansion or if the costs of setting up and the possible time or cost overruns related to the proposed facilities or the purchase of plant and machinery for the proposed facilities are higher than expected, it could have a material adverse effect on our financial condition, results of operations and growth prospects.*” on page 39 of this Red Herring Prospectus.

**20. *We intend to utilise a portion of the Net Proceeds for funding our capital expenditure requirements. We are yet to place orders for such capital expenditure machinery.***

We intend to utilise a portion of the Net Proceeds for funding capital expenditure requirements towards expansion of our existing manufacturing facility at Dhulagarh, West Bengal. Accordingly, orders worth ₹ 85.31 lakhs of the machinery and equipment in relation to setting up the proposed expansion are yet to be placed. There can be no assurance that we will be able to place orders for such plant and machinery, in a timely manner or at all. We have not entered into any definitive agreements to utilize the Net Proceeds for these objects of the Issue and have relied on the quotations received from third parties for estimation of the cost. While we have obtained the quotations from various vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. Additionally, in the event of any delay in placement of such orders, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. For details, see “***Objects of the Issue***” on page 99 of this RHP.

The objects of the Issue have not been appraised by any bank or financial institution, and our funding requirement is based on current conditions, internal estimates, estimates received from the third-party agencies and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of our industry, we may have to revise our business plan and/ or management estimates from time to time and consequently our funding requirements may also change. Such internal estimates may differ from the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws. In case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements, and may have an adverse impact on our business, results of operations, financial condition and cash flows. Accordingly, investors in the Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds. Further, pursuant to Section 27 of the Companies Act, any variation in the Objects of the Issue would require a special resolution of the shareholders and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Issue, at such price and in such manner in accordance with applicable law.

Our Company, in accordance with the applicable law and to attain the objects set out above, will have the flexibility to deploy the net proceeds. Pending utilisation of the Net Proceeds for the purposes described above, our Company

may temporarily deposit the Net Proceeds within one or more scheduled commercial banks included in the Second Schedule of RBI Act as may be approved by our Board.

**21. Most of our Directors do not have any prior experience of being a director in any other listed company in India.**

Our current board comprises of nine directors which includes four (4) executive directors out of which one (1) is Managing Director and five (5) non-executive directors out of which four (4) are independent directors, one (1) out of independent directors is a woman director. Few of our board of directors do have prior experience of being a director in any other listed company in India. While our Board members are qualified and have relevant experience in their respective field, not having any prior experience as being a director in any other listed company in India may present some potential challenges to our Company in effectively meeting with good corporate governance norms and practices. Additionally, having lack of such experience amongst the board of directors may impact our Company's credibility and reputation among the investors and other stakeholders. For further details, please see chapter titled “*Our Management*” on page no. 171 of this Red Herring Prospectus.

**22. Our Promoters has extended personal guarantee in connection with some of our debt facilities to our company. There can be no assurance that such personal guarantee will be continued to be provided by our Promoters in future or can be called at any time, affecting the financial arrangements.**

Our Promoters, Mr. Hanuman Prasad Agarwal, Mr. Sunil Kumar Mittal, Sushil Kumar Agarwal, Nitesh Agarwal and Alltime Suppliers Private Limited has provided personal guarantee to secure our existing borrowings which are continuing and are in force as on the date of Red Herring Prospectus. In the event any of default under any of the aforesaid facilities, there is a risk that the relevant lender for such facilities may require invoke our Promoters' guarantee(s) or require additional guarantees or collateral or may enforce its rights against our Promoters. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. In addition, our Promoters may be required to liquidate their respective shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. Accordingly, our business, the financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company's borrowings.

**23. We are dependent on a few customers for a portion of our revenues. Further we generally do not enter into long-term arrangements with our customers and any failure to continue our existing arrangements could adversely affect our business and results of operations.**

We presently do not have any long-term or exclusive arrangements with any of our customers. We cannot assure you that we will be able to sell the quantities we have historically supplied to such customers. In the event our competitors' products offer better margins to such customers or otherwise incentivize them, there can be no assurance that our customers will continue to place orders with us. Most of our transactions with our customers are typically on a purchase order basis without any commitment for a fixed volume of business. There can also be no assurance that our customers will place their orders with us on current or similar terms. Further, our customers could change their business practices or seek to modify the terms that we have customarily followed with them, including in relation to their payment terms. In addition, our customers may also cancel purchase orders at short notice or without notice, which could have an impact on our inventory management. In the event of frequent cancellations of purchase orders, the same could have a material adverse effect on our business, financial condition, results of operations and cash flows.

**24. Robotics and automation are being deployed in welding industry capital good.**

Our Company's operations are closely tied to the integration of robotics and automation within the welding industry's capital goods sector. While the adoption of advanced technologies offers notable benefits, investors should be cognizant of the inherent risks associated with this dependency.

Our Company's reliance on robotics and automation exposes it to the risk of technological obsolescence. Failure to stay abreast of industry innovations or an inability to adapt to emerging technologies may impact the Company's competitiveness and market share. The integration of robotics and automation in welding operations often requires substantial capital investments. The Company's financial performance may be subject to fluctuations in capital expenditure requirements, and any constraints in securing necessary funds for technological upgrades could impede the execution of strategic initiatives. The deployment of robotics and automation introduces complexities to operational processes. Unforeseen technical glitches, system failures, or cyber threats may disrupt manufacturing processes, leading to production delays, increased downtime, and potential financial losses. The successful implementation of robotics necessitates a skilled workforce proficient in operating and maintaining automated systems. A shortage of skilled personnel or challenges in workforce transition may hinder the Company's ability to fully capitalize on the benefits of automation, affecting operational efficiency. The utilization of robotics and automation in the welding industry is subject to evolving regulatory frameworks and safety standards. Non-compliance with these regulations may result in legal consequences, fines, or restrictions, impacting the Company's operations and financial standing. The Company's ability to navigate these risks, remain technologically agile, and address potential disruptions will significantly influence its long-term success in the welding industry's capital goods sector.

**25. The shortage or non-availability of power may adversely affect our business, result of operations, financial conditions and cash flows.**

We require substantial power for our manufacturing facilities. The following tables set forth below our power expenses in the years/ periods indicated:

Particulars	February 28, 2025		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amt (₹ in Lakhs)	% of Direct Expenses	Amt (₹ in Lakhs)	% of Direct Expenses	Amt (₹ in Lakhs)	% of Direct Expenses	Amt (₹ in Lakhs)	% of Direct Expenses
Power Expenses	306.31	31.07	264.09	31.40	208.29	31.14	168.56	28.62

We have our manufacturing facility Unit I at Dhulagarh, West Bengal and Unit II at Jhajjar, Haryana which depends on the delivery of an adequate and uninterrupted supply of electrical power. We rely upon diesel generator sets for certain units to ensure continuity of operations in case of power outage. There have been no major instances of power failure in the last three years. For further details, see “**Our Business - Our Units**” on page 132 of this Red Herring Prospectus. There can be no assurance that electricity supplied to our existing manufacturing facilities would be sufficient to meet our requirements or that we would be able to procure adequate and uninterrupted power supply in the future at a reasonable cost. If the per unit cost of electricity is increased by the state electricity board our power cost will increase. Any changes in government policies or local power and water shortages could adversely affect our production facility and ultimately our operations or financial condition may be adversely affected. A prolonged suspension in production could materially and adversely affect our business, financial condition, results of operations or cash flows.

**26. Our Company had negative cash flows during certain fiscal years in relation to our investing and financing activities. Sustained negative cash flows in the future would adversely affect our results of operations and financial condition.**

We have in the period ended February 28, 2025 and three preceding fiscal years, and may in future, experience negative cash flows from investing and financing activities. Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations. We experienced negative cash flows in the following periods as indicated in the table below:

Particulars	February 28, 2025	Fiscal 2024	Fiscal 2023	Fiscal 2022
Net cash used/ generated from operating activities	124.22	285.95	168.25	124.51
Net cash used/ generated from investing activities	(330.50)	(97.35)	(196.27)	(401.21)
Net cash used/ generated from financing activities	216.61	(196.74)	31.26	275.79
Net increase/ (decrease) in cash and cash equivalent	10.33	(8.14)	3.24	(0.91)

We cannot assure you that our net cash flows will be positive in the future. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, prospects, results of operations and financial condition may be materially and adversely affected. For further details, see “*Restated Financial Statements*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on pages 202 and 211 respectively.

Our manufacturing activities are labour intensive and expose us to the risk of various labour related issues. Whilst we have not faced any strike by our workforce, we cannot assure you that we will not be subject to work stoppages, strikes, lockouts or other types of conflicts with our employees or contract workers in the future. The success of our operations depends on availability of labour and maintaining a good relationship with our workforce. As of February 28, 2025, we have employed about 95 workmen and employees across our units. We do not have any trade union registered under the Trade Unions Act, 1926. In the past three years, we have not experienced any labour dispute except the ongoing dispute with labour, details whereof have been disclosed in chapter titled “***Outstanding Litigations and Material Developments***” on page 232 of this RHP. We do not have any formal policy for redressal of labour disputes. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We may also have to incur additional expenses to train and retain skilled labour. We are also subject to a number of stringent labour laws that protect the interests of workers, including legislation that imposes financial obligations on employers upon retrenchment. There can be no assurance that we will not experience labour unrest in the future, which may delay or disrupt our operations. In the event of any prolonged delay or disruption of our business, results of operations and financial condition could be materially and adversely affected.

Our Country India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits.

**30. *Our operations are subject to environmental and health and safety laws and other government regulations which could result in increased liabilities and increased capital expenditures.***

We are subject to environmental, health and safety and other regulatory and/ or statutory requirements in the jurisdictions in which we operate. Our manufacturing processes and products are subject to stringent quality, environmental and occupational health and safety standards. We are subject to various national, state, municipal and local laws and regulations concerning environmental protection in India. In India, these include the Factories Act, 1948, Contract Labour (Regulation and Abolition) Act, 1970, Payment of Wages Act, 1936, etc. A failure by us or our contractors to comply with the relevant labour regulations, could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products. We may be involved in future litigation or other proceedings or be held liable in any litigation or proceedings including in relation to labour, safety, health and environmental matters, the costs of which may be significant. Environmental laws and regulations in India are becoming more stringent and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment and emissions management.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. A risk of environmental liability is inherent in our manufacturing activities, and we are subject to numerous environmental laws and regulations in the countries

in which we operate. We have availed public liability industrial risks insurance policy, we cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations, financial condition, or cash flows. In addition, we could incur substantial costs, our products could be restricted from entering certain markets and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with applicable regulations. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs under environmental laws are difficult to predict.

**31. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with our Shareholders.***

In the ordinary course of our business, we enter into and will continue to enter into transactions with related parties. For further information on our related party transactions, please see “*Annexure XXXVI – Related Party Transactions*” in the chapter titled “*Restated Financial Statements*” on page 202 of this RHP. While that all such related party transactions that we have entered into are conducted on an arms’ length basis in accordance with the Companies Act and other applicable regulations pertaining to the evaluation and approval of such transactions and all related party transactions that we may enter into post-listing, will be subject to board or shareholder approval, as necessary under the Companies Act and the Listing Regulations, in the interest of our Company and its minority shareholders and in compliance with the Listing Regulations, we cannot assure you these arrangements in the future, or any future related party transactions that we may enter into, individually or in the aggregate, will not have an adverse effect on our business, financial condition, results of operations, cash flows and prospects.

**33. *Restrictions on import of raw materials may impact our business and results of operations.***

We had imported some portion of our raw materials in the year 2022. The raw material imports are regulated by certain specific laws and regulations that permit concerned authorities to stop any import if it is deemed that the goods proposed to be imported may be hazardous. While the raw materials we import may not be hazardous in nature, we cannot assure you that such regulations will not be made applicable to us or that such regulations will not evolve into more stringent regulations, which would place onerous requirements on us and consequently restrict our ability to import raw materials. While we have not in the recent past experienced any challenges in importing such materials, we cannot assure you that we will not experience any such challenges in the future. For the Fiscals 2022, our purchase of imported raw materials and components consumed amounted to ₹ 743.27 lakhs, representing 10.99%, of our total raw material purchase on restated financial statement. If the available supply of such parts is

insufficient to meet the needs of our business or if there is an interruption in supply from our international suppliers, including due to any unanticipated outage, shutdown and/or suspension of production at their facilities, change in political relationship or implementation of laws and policies impacting our relationship with our international suppliers, our ability to manufacture and sell our products could be limited due to such sudden shortage of parts in the market which could result in order cancellations for our products and have an adverse effect on our business and results of operations. We are unable to assure you that such regulations would not be made more stringent which would consequently restrict our ability to import raw materials from other jurisdictions. Any restriction on import of raw materials could have an adverse effect on our ability to deliver products to our customers, business and results of operations.

**34. *There is no monitoring agency appointed by our Company and deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.***

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is mandatory only for Issue size above Rs. 50 Crores. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

Further, we propose to utilize the Net Proceeds for purposes identified in the section titled “*Objects of the Issue*” on page 99 of the RHP. The manner of deployment and allocation of such funds is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the Companies Act.

**35. *There may be problems with the products we manufacture that could result in liability claims against us, reduced demand for our products and damage to our reputation.***

We manufacture and sell welding electrodes and Mig Wires for core industries based on a portfolio of standardised diverse range of SKUs (Stock Keeping Unit) under our own brand name, many of which are highly complex, particularly when catering to end use industries such as cement, steel, sugar and power, that have higher risk profiles. Despite our quality control and quality assurance efforts, problems may occur, or may be alleged, in the design or manufacturing of these products, including as a result of business continuity issues. Any failure on our part to manufacture above mentioned standardised products could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect.

Whether or not we are responsible for the problems in the products we manufacture, be it real or alleged, or caused by faulty customer specifications, or in the manufacturing or design processes, servicing, or a component defect, may result in delayed shipments to our customers or, reduction or cancellation of customer orders. If any such problems were to occur in large numbers or too frequently, our business reputation may also be affected. These potential claims may include damages for the recall of a product or injury/bodily harm and other damages caused to person or property. We may also be required to repair the defective product or replace it with a new conforming product and the costs may also be required to be borne by us, or if they are borne by the customer, may be capped. The successful assertion of any claim could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

While we seek to secure contractual protection and/or to insure against many of these risks, we may not have practical recourse against certain suppliers, and contractual protections, insurance coverage or supplier warranties, as well as our other risk mitigation efforts, may be inadequate, costly, or unavailable. Further, while we have not faced such a situation in the past three fiscals and the current fiscal, we may incur costs defending claims in the future, and any such disputes could adversely affect our business relationships. We cannot assure you that any product defects will not arise in the future, whether on our account or on account of defective components provided by a supplier. If such cases arise, our customers may cancel orders, refuse to renew contracts, make adverse claims against us which, if litigated, may be decided against us. Any future product defects or defaults may have a material adverse impact on our business, results of operations, financial condition, cash flows and future prospects.

**36. *We have incurred borrowings from commercial banks and any non-compliance with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.***

We have entered into agreements with banks for short-term and long-term borrowings. As of February 28, 2025, we have total borrowings (consisting of borrowings under non-current liabilities, current maturities of long-term debts and borrowings under current liabilities) of ₹ 6017.77 lakhs, respectively, which comprises of secured loans ICICI

Bank, Yes Bank, Standard Chartered Bank, SIDBI, unsecured loans and vehicle loans etc. Our ability to pay interest and repay the principal for our indebtedness is dependent upon our ability to manage our business operations and generate sufficient cash flows to service such debt. Certain agreements that we have entered into contain restrictive covenants, including requirements that we obtain consent from the lenders prior to undertaking certain matters such as availing any changes in capital structure, formulate any scheme of amalgamation or reconstruction, fresh credit facility, giving fresh loans and advances, opening/ maintaining new bank accounts, issuing corporate guarantee etc. Any failure to service such indebtedness, or otherwise perform any obligations under such financing agreements may lead to a termination of one or more of our credit facilities or incur penalties and acceleration of payments under such credit facilities, which may adversely affect our business and financial condition. Further, any fluctuations in the interest rates may directly impact the interest costs of such loans and could adversely affect our financial condition. Additionally, we are required to, among other obligations, comply with certain financial covenants including maintaining the prescribed inventory margins, insurance covers on the hypothecated properties and lien creation. Our hypothecated assets comprise of our stock of raw materials, semi-finished and finished goods, consumable stores and spares and such other movable current assets including book debts, bills whether documentary or clean, outstanding monies, receivables, both present and future. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain necessary consents to take the actions that we are required to operate and grow our business. Any fluctuations in the interest rates may directly impact the interest costs of such loans, and affect our business, financial condition, results of operations and prospects. Our ability to make repayments and refinance our indebtedness will depend on our continued ability to generate cash from our future operations. We may not be able to generate enough cash flow from operations or obtain enough capital to service our debt.

Our financing agreements also generally contain certain financial covenants including the requirement to maintain, among others, specified debt-to-equity ratios. Additionally, if we default on our credit facilities, the lenders may have the right to foreclose on and sell our assets. For further information including in relation to hypothecated properties, please see “*Financial Indebtedness*” beginning on page 204 of this Red Herring Prospectus.

### **37. *Industry sensitive to general economic downturn.***

Our Industry is inherently sensitive to general economic downturns. Any adverse developments affecting the industry can have a significant impact on our business, prospects, financial condition, and results of operations. Our business is highly vulnerable to regional conditions and economic downturns, making it susceptible to unforeseen events or circumstances that negatively affect the industry, leading to material adverse effects on our sales and profitability. These factors encompass a range of elements, including changes in demographics, population, and income levels. Moreover, our business is exposed to risks associated with regional natural disasters and other catastrophic events, such as telecommunications failures, cyber-attacks, fires, riots, and political unrest. Any materially adverse social, political, or economic development, natural calamities, civil disruptions, or changes in the policies of local governments within the industry could adversely affect operations at our manufacturing facility. Specifically, natural disasters such as earthquakes, extreme weather conditions like floods, droughts, or region-specific diseases, may disrupt the supply chain, affecting the availability of raw materials, end-products, and local transportation. These disruptions would have a significant and adverse impact on our business, profitability, and overall reputation.

### **38. *We operate in a competitive and fragmented industry with low barriers to entry and may be unable to compete with a range of unorganized sector.***

In the dynamic landscape of the engineering business, one of the significant challenges we face is competition from the unorganized sector. Operating in the highly competitive and fragmented welding industry, we contend with numerous unorganized players at both the national and regional levels. Further, while we have an expanding portfolio of products, our competitors may have the advantage of focusing on concentrated products. Further, we compete against established players also, which may have greater access to financial, technical and marketing resources and expertise available to them than us in the products and services in which we compete against them. Further, industry consolidation may affect competition by creating larger, more homogeneous and potentially stronger competitors in the markets in which we compete. Our competitors may further affect our business by entering into exclusive arrangements with our existing or potential clients. There can be no assurance that we will be able to compete successfully against such competitors or that we will not lose our key core employees, associates or clients to such competitors. Additionally, our ability to compete also depends in part on factors outside our control, such as the availability of skilled resources, pricing pressures in the staffing industry and the extent of our competitors’ responsiveness to their client’s needs. Our continued success depends on our ability to compete effectively against our existing and future competitors. With the potential entry of new competitors, given the low entry barriers in the industry where we operate, our ability to retain our existing clients and to attract new clients is critical to our continued success. As a result, there can be no assurance that we will not encounter increased competition in the future nor can

there be any assurance that we will, in light of competitive pressures, be able to effectively compete with our competition in the various product and service segments we operate in, whether on the basis of pricing, quality or range of services or otherwise, which could have material adverse effect on our business, results of operations and financial condition.

**39. *We are dependent on third-party transportation providers for the supply of raw materials and delivery of our finished products and any failure to maintain a continuous supply of raw materials or to deliver our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.***

As a manufacturing business, our success depends on the smooth supply and transport of the various raw materials required for our manufacturing facilities and of our products from our manufacturing facilities to our customers, or delivery points and further to our distributors, which are subject to various uncertainties and risks. We transport our raw materials and our finished products by road. We use third-party freight and transportation providers for the delivery of our products. Transportation strikes, if any, could have an adverse effect on supplies and deliveries to and from our distributors and suppliers. Further, on account of the COVID-19 pandemic, our manufacturing operations were shut down and our third-party transportation providers' operations were also closed during the lockdown imposed by the Government.

Further, raw materials and finished products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be a delay in delivery of raw materials and products which may also affect our business and results of operations negatively. A failure to maintain a continuous supply of raw materials or to deliver our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations. Any compensation received from insurers or third-party transportation providers may be insufficient to cover the cost of any delays and will not repair damage to our relationships with our affected customers. We may also be affected by an increase in fuel costs, as it will have a corresponding impact on freight charges levied by our third-party transportation providers. This could require us to expend considerable resources in addressing our distribution requirements, including by way of absorbing these excess freight charges to maintain our selling price, which could adversely affect our results of operations or passing these charges on to our customers, which could adversely affect demand for our products.

**40. *We engage contract workers for carrying out certain functions of our business operations. In the event of non-availability of such contract workers at reasonable cost, any adverse regulatory orders or any default on payments to them by the agencies could lead to disruption of the manufacturing facilities and our business operations.***

We engage independent contractors through whom we engage contract workers for performance of certain functions at our manufacturing units and at our offices. While we have not faced any breach of agreements executed with such independent contractors in the last three Fiscals and in the current Fiscal until the date of this Red Herring Prospectus, there is no assurance that such breach will not occur in the future. Further, while we have not encountered such instance in the past, we cannot assure that we will be able to renew the engagement with our independent contractors at commercially viable terms or at all. As of February 28, 2025, we engaged a total of 20 contract workers/ temporary employees. Although we do not engage these contract workers directly, we are responsible for any wage payments to be made to such laborers in the event of default by their respective independent contractors. Any requirement to fund such defaulted wage requirements may have an adverse impact on our business, results of operations, financial condition, cash flows and future prospects.

Our industry is labour intensive and our dependence on contract labour may result in significant risks for our operations, relating to the cost, availability and skill of such contract labourers in India, as well as contingencies affecting availability of such contract labour during peak periods in labour intensive industries such as ours. There can be no assurance that we will have adequate access to skilled and unskilled workmen at reasonable rates. Any increase in the cost of labour or failure to procure availability of labour due to any other reason, will adversely affect our business, results of operations, financial condition, cash flows and future prospects.

In addition, pursuant to the Contract Labour (Regulation and Abolition) Act, 1970, as amended, the appropriate government may, after consultation with the Central Advisory Contract Labour Board or the State Advisory Contract-Labour Board, as the case may be prohibit, by notification, the employment of contract labour in any process, operation or other work in any establishment. We cannot assure you that such a notification will not be issued by the appropriate government in respect of the locations of our manufacturing facilities. If such a notification prohibiting the employment of contract labour is issued with respect to our operations, it will have an adverse impact on our

ability to employ contract labour in our manufacturing and other operations, and may adversely affect our business, results of operations, financial condition, cash flows and future prospects.

**41. *Our overall margins may fluctuate as a result of the product manufactured by us.***

Our overall margins may fluctuate depending on the products manufactured. For example, the gross margin of any given product could depend on the total volume manufactured, complexity of manufacturing processes, technology deployed, and other factors. As a result, a change in product mix may decrease the gross margins and operating margins of our Company, which could have a material adverse effect on our business, financial condition and results of operations. Our ability to maintain our profitability depends on our ability to optimize the product mix to support high-margin products and products with consistent long-term demand and the demand and supply balance of our products in the principal and target markets.

Furthermore, our different lines of business present different levels of profitability and opportunity for growth. If we fail to increase or maintain the proportion of certain products that are profitable in our portfolio this may lead to a reduction in our profitability. If we are not able to attract a sufficient market share of products in growing sectors, we may also not be able to continue to grow our business which may lead to a loss of our market position.

**42. *Unplanned slowdowns or shutdowns of our manufacturing operations could have an adverse effect on our business, results of operations, financial condition, cash flows and future prospects.***

Our business is dependent upon our ability to efficiently manage our manufacturing facilities, which is subject to various operating risks, including productivity of our workforce, increase in employee costs, compliance with regulatory requirements and circumstances beyond our control, such as the breakdown and failure of equipment or industrial accidents, severe weather conditions, natural disasters and infectious disease outbreaks such as the COVID-19 pandemic. Any malfunction or breakdown of our machinery may require significant repair costs and consequently cause delays in our operations. We may also face protests from local citizens at our existing manufacturing facilities or while setting up new facilities, which may delay or halt our operations. There are no instances of unplanned slowdowns or shutdowns in the manufacturing operations of our Company in the last three Fiscals and in the current Fiscal until the date of this Red Herring Prospectus, except for instance due to COVID-19.

Our operations also require a significant amount and continuous supply of electricity, and any shortage or non-availability of such utilities may adversely affect our operations. We have significant power requirements and any disruption to power sources could increase our production costs and adversely affect our results of operations. Any interruption in the continuous supply electricity may negatively impact the quality of the final products manufactured by us, which may result in delays in delivery of our products or non-delivery, resulting in loss of revenue and adversely affecting our reputation or customer relationships. A prolonged interruption of electricity supply can also result in manufacturing slowdown or shutdowns, increased costs associated with restarting manufacturing and the loss of manufacturing in progress. The occurrence of any such event in the future could have an adverse effect on our business, results of operations, financial condition, cash flows and future prospects. Our inability to effectively respond to any shutdown or slowdown and rectify any disruption, in a timely manner and at an acceptable cost, could lead to an inability to comply with our customers' requirements and result in us breaching our contractual obligations.

**43. *We may not have adequate insurance coverage for protecting us against any material hazards.***

Our operations are subject to various risks inherent in the manufacturing industry including defects, malfunctions and failures of manufacturing equipment, fire, riots, strikes, explosions, loss-in-transit for our products, accidents and natural disasters. The occurrence of any one of these events may result in our being named as a defendant in lawsuits asserting claims for substantial damages, including for cleanup costs, personal injury and property damage and fines and/ or penalties. Our total insurance cover includes Building, Plant and Equipment, Furniture, Fixture and Fittings Stocks and inventory, as on the period ended February 28, 2025, the total insurance coverage maintained by the company is ₹ 8997.25 Lakhs. We generally perform scheduled and unscheduled maintenance and operating and other asset management services. The manufacturing of products involves handling of certain risky material which, if not handled properly, can be dangerous. Our insurance may not be adequate to completely cover any or all of our risks and liabilities. There have been no instances in the last three years.

We maintain an amount of insurance protection that we consider adequate including insurance policy covering fire, damage to buildings, plant and machinery, stocks (raw materials and finished goods), vehicles and policy covering damage to goods in domestic transit. We may not have identified every risk and further may not be insured against every risk because such risks are either uninsurable or not insurable on commercially acceptable terms, including

operational risk that may occur and the occurrence of an event that causes losses in excess of the limits specified in our policies, or losses arising from events or risks not covered by insurance policies such as COVID-19 and other pandemics, or due to the same being inadequate, could materially harm our cash flows, financial condition and future results of operations. Further, while there has been no past instance of inadequate insurance coverage for any loss, we cannot assure that we will continue to accurately ascertain and maintain adequate insurance for losses that may be incurred in the future. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. Any claim brought against us, with or without merit, could result in reputational damage, and even unsuccessful claims could result in substantial costs and diversion of management resources. A successful claim not fully covered by our insurance could have a negative impact on our reputation, financial condition, and results of operations. For further information on our insurance arrangements, see **“Our Business – Insurance”** on page 132 of this Red Herring Prospectus.

**44. Significant failure or disruption of our information technology systems could adversely impact our business, results of operations and financial condition.**

We have implemented various information technology (“IT”), enterprise resource planning (“ERP”) solutions to cover key areas of our operations, R&D, quality control, procurement, dispatch and accounting. We also have various automation systems and software that automate our manufacturing and production. Although we have not had any material incidents in the Fiscal 2024, Fiscal 2023 and Fiscal 2022, these systems are potentially vulnerable to damage or interruption from a variety of sources, which could result from (among other causes) cyberattacks on or failures of such infrastructure or compromises to its physical security, as well as from damaging weather or other acts of nature. A significant or large-scale malfunction or interruption of one or more of our IT, ERP or manufacturing automation systems could adversely affect our ability to keep our operations running efficiently and affect product availability, particularly in the country, region or functional area in which the malfunction occurs, and wider or sustained disruption to our business cannot be excluded. In addition, it is possible that a malfunction of our data system security measures could enable unauthorized persons to access sensitive business data, including information relating to our intellectual property or business strategy or those of our customers. Such malfunction or disruptions could cause economic losses for which we could be held liable or cause damage to our reputation. Any of these developments, alone or in combination, could have a material adverse effect on our business, results of operations and financial condition. Further, unavailability of, or failure to retain, well trained employees capable of constantly servicing our IT, manufacturing automation systems and/or ERP systems may lead to inefficiency or disruption of our operations and thereby adversely affecting our business, results of operations and financial condition.

**45. In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding in our Company.**

Our Promoters and Directors may be deemed to be interested in addition to regular remuneration or benefits and reimbursement of expenses from our company, and such interests are to the extent of the equity shares held by them, or their relatives or our group entities, and benefits deriving from their directorship and shareholding in our company. Our Promoters are interested in the transactions entered into between our Company and themselves as well as between our company and our group entities. For the payments that are made by our Company to related parties including remuneration to our Directors, see **“Summary of the Issue Document – Annexure XXXVI -Summary of Related Party Transactions”**, **“Our Management”** **“Our Promoter and Promoter Group”** on page 25, 171 and 188 respectively. Additionally, our Promoters, Mr. Hanuman Prasad Agarwal, Mr. Sunil Kumar Mittal, Sushil Kumar Agarwal, Nitesh Agarwal has provided personal guarantee for certain of our borrowings, which has been sanctioned ₹ 7952.37 lakhs as of February 28, 2025 and our business, financial condition, results of operations and prospects may be adversely affected by the revocation of all or any of the guarantees provided by our Promoters in connection with our Company’s borrowings. For more information, see **“Financial Indebtedness”** on page 204 of this Red Herring Prospectus.

**46. There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.**

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the stock exchanges within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

**47. *The activities carried out at our manufacturing facilities, including any hazardous activity, can cause injury to people or property in certain circumstances.***

The activities carried out at our manufacturing facilities may be potentially dangerous to our employees. While we provide a safe and healthy working environment which is compliant with applicable occupational health and safety management system and environmental management system regulations, we believe to be adequate insurance including insurance policies for accidents, there is a risk that an accident may occur at our manufacturing facilities.

An accident may result in personal injury to our employees, or the labour deployed at our manufacturing facilities, destruction of property or equipment, manufacturing or delivery delays, environmental damage, or may lead to suspension of our operations and/or imposition of liabilities. We have not encountered any fatalities or any employee injuries in the last three Fiscals and in the current Fiscal until the date of this Red Herring Prospectus. However, any such future accident may result in litigation, the outcome of which is difficult to assess or quantify, the cost to defend such litigation can be significant and our insurance may not be sufficient to provide complete coverage. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, results of operations, financial condition, cash flows and future prospects. Our operations are subject to operating risks associated with manufacturing, including related to handling and storage of raw materials used in our manufacturing processes. Despite compliance with requisite safety requirements and standards, our operations are subject to significant hazards, including:

- explosions;
- fires;
- mechanical failures and other operational problems
- inclement weather and natural disasters; and
- discharges or releases of hazardous substances, chemicals or gases.

The occurrence of any of these hazards could result in a suspension of operations and the imposition of civil or criminal liabilities. We may also face claims and litigation, in India or overseas, filed on behalf of persons alleging injury predominantly as a result of occupational exposure to hazards at our manufacturing facilities. If these claims and lawsuits, individually or in the aggregate, are resolved against us, our business, results of operations and financial condition could be adversely affected.

## **EXTERNAL RISK FACTORS**

**48. *The Issue Price, market capitalization to total revenue multiple and price to earnings ratio based on the Issue Price of our Company, may not be indicative of the market price of the Equity Shares on listing or thereafter.***

The market price of the Equity Shares, market capitalization to total revenue multiple and price to earnings ratio based on the Issue Price may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

**49. *A slowdown in economic growth in India could adversely affect our business.***

The structure of the Indian economy has undergone considerable changes in the last decade. These include increasing importance of external trade and of external capital flows. Any slowdown in the growth of the Indian economy or any future volatility in global commodity prices could adversely affect our business, financial condition and results of operations. India's economy could be adversely affected by a general rise in interest rates, fluctuations in currency exchange rates, adverse conditions affecting housing, tourism and electricity prices or various other factors. Further, conditions outside India, such as slowdowns in the economic growth of other countries, could have an impact on the growth of the Indian economy and government policy may change in response to such conditions. The Indian economy and financial markets are also significantly influenced by worldwide economic, financial and

market conditions. Any financial or political turmoil or war especially in the United States, Europe or China or Asian emerging market countries, may have an impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss of investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets, and could have an adverse effect on our business, financial condition and results of operations and the price of the Equity Shares.

**50. *If inflation were to rise further in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has initiated fiscal measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

**51. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.***

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. India's sovereign rating is Baa3 with a "negative" outlook (Moody's), BBB- with a "stable" outlook (S&P) and BBB- with a "stable" outlook (Fitch). Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

**52. *Financial Instability and disruptions in Indian financial markets could materially and adversely affect our results of operations and financial condition.***

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investor's reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

**53. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.***

The company is subject to various regulations and policies. For details see section titled —"**Key Industry Regulations and Policies**" beginning on page no. 158 of this Red Herring Prospectus. The company's current businesses and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that it will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which could have a material adverse effect on the business, financial condition and results of operations.

**54. *Natural calamities and force majeure events may have a negative impact on the Indian economy and cause our business to suffer.***

India has experienced natural calamities such as earthquakes, tsunamis, floods and drought in the past few years. These natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Further prolonged spells of deficient or abnormal rainfall or other natural calamities in the future could have a negative impact on the Indian economy, adversely affecting our business and the price of the Equity Shares.

**55. *We cannot assure that prospective investors will be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Offer***

In accordance with Indian law and practice, final approval for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until our Equity Shares have been issued and allotted. Such approval will require the submission of all other relevant documents authorizing the issuance of our Equity Shares. In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the Stock Exchanges within a prescribed time. Accordingly, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all and there could be a failure or delay in listing our Equity Shares on the Stock Exchanges, which would adversely affect your ability to sell our Equity Shares.

**56. *Volatile conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.***

The Indian securities markets have experienced significant volatility from time to time. The regulation and monitoring of the Indian securities market and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the United States, Europe and certain economies in Asia. Instability in the global financial markets has negatively affected the Indian economy in the past and may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy, financial sector and business in the future. For instance, recent concerns relating to the United States and China trade tensions have led to increased volatility in the global capital markets. In addition, the United States, the United Kingdom and Europe are some of India's major trading partners, and there are rising concerns of a possible slowdown in these economies.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to improve the stability of the global financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts is uncertain, and they may not have had the intended stabilising effects. Adverse economic developments overseas in countries where we have operations or other significant financial disruptions could have a material adverse effect on our business, future financial performance and the trading price of the Equity Shares.

**57. *You may be subject to Indian taxes arising out of capital gains on sale of the Equity Shares, which will adversely affect any gains made upon sale of Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any capital gain exceeding ₹100,000, realized on the sale of listed equity shares on a recognized stock exchange, held for more than 12 months immediately preceding the date of transfer, will be subject to long term capital gains in India, at the rate of 10% (plus applicable surcharge and cess). This beneficial rate is, inter alia, subject to payment of Securities Transaction Tax ("STT"). Further, any gain realized on the sale of equity shares in an Indian company held for more than 12 months, which are sold using any platform other than a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India at the rate of 10% (plus applicable surcharge and cess).

Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. Such gains will be subject to tax at the rate of 15% (plus applicable surcharge and cess), subject to STT being paid at the time of sale of such shares. Otherwise, such gains will be taxed at the applicable rates. Capital gains arising from the sale of the

Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

Similarly, any business income realized from the transfer of Equity Shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller.

**58. *Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.***

Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We have not paid any dividend in the past and we cannot assure you that we will be able to pay dividends in the future.

**59. *Foreign investors are subject to restrictions prescribed under Indian laws that may limit their ability to transfer shares and thus our ability to attract foreign investors, which may have an adverse impact on the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure investors that any required approval from the RBI or any other government agency can be obtained on any particular terms or at all. For further information, please refer section titled "***Restrictions on Foreign Ownership of Indian Securities***" and "***Issue Procedure***", beginning on pages 306 and 274, respectively, of this Red Herring Prospectus. Our ability to attract further foreign investment, or the ability of foreign investors to transact in the Equity Shares may accordingly be limited, which may also have an impact on the market price of the Equity Shares.

**60. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non - Institutional Bidders are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. While we are required to complete Allotment, within such period from the Bid/Offer Closing Date as may be prescribed by the SEBI, events affecting the investors' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

#### **Illustration of the Book Building and Price Discovery Process:**

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below

₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

#### **Assumptions for our estimated working capital requirements**

The table below sets forth the details of holding levels (in days) as of and for the period ended February 28, 2025 and for the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022 on the basis of audited standalone financial statements and the estimated holding levels (in days) for the Fiscal 2025 and Fiscal 2026:

Particulars	Holding levels					
	Fiscal 2022 (Restated)	Fiscal 2023 (Restated)	Fiscal 2024 (Restated)	Period Ended 28.02.2025 (Restated)	Fiscal 2025 (Provisional)	Fiscal 2026 (Estimated)

Trade Receivables	65	73	63	74	68	66
Trade Payables	19	21	11	19	13	12

#### **Key justifications**

The table below sets forth the key justifications for holding levels:

Sr. No.	Particulars	Details
<b>Current assets</b>		
1.	Inventories	<p>In Fiscal 2022 and 2023, inventory days remained stable at 58 and 57 days, reflecting efficient supply chain management and steady procurement.</p> <p>By Fiscal 2024, inventory days increased marginally to 59 days, driven by rising raw material price fluctuations and supply chain uncertainties, prompting a cautious approach to stock levels. This ensured production continuity without unexpected disruptions. As of the period ended February 2025, inventory days increased more significantly to 73 days. This rise was a result of deliberate strategic stockpiling in anticipation of upcoming demand surges and potential procurement delays amidst evolving global supply chain dynamics.</p> <p>The trend continued into Fiscal 2025 (Provisional) and Fiscal 2026 (Estimated), with inventory days stabilize at 74 days in both the years, reflecting a sustained focus on ensuring uninterrupted operations amid supplier-side uncertainties.</p>

Sr. No.	Particulars	Details
2.	Trade receivables	<p>In Fiscal 2022 &amp; Fiscal 23, receivable days increased from 65 days to 73 days as extended payment timelines were offered to key customers to strengthen long-term business relationships. Additionally, a shift in the customer base led to longer settlement periods, temporarily impacting overall collection speed.</p> <p>By Fiscal 2024, receivable days declined to 63 days, supported by structured payment mechanisms such as M1 Exchange and Letter of Credit transactions, ensuring faster realization of dues. Improved invoicing processes and focused follow-ups further streamlined collections, making inflows more predictable. However, as of the period ended February 2025, receivable days increased temporarily to 74 days, reflecting a combination of sales concentration toward the end of the period and extended credit arrangements offered to select customers as part of large-value contract negotiations.</p> <p>However, for Fiscal 2025 (Provisional) and Fiscal 2026 (Estimated), receivable days are expected to be stabilize around 68 and 66 days respectively indicate a decrease due to a changing sales mix and streamlined payment cycles for customers.</p>
<b>Current liabilities</b>		
1.	Trade payables	<p>In fiscal 2022, trade payables stood at 19 days, increasing slightly to 21 days in fiscal 2023.</p> <p>However, this period dropped to 11 days in fiscal 2024 on account of timely vendor payments. As market conditions stabilized, the company prioritized timely payments to enhance profitability, manage cash flow effectively, and secure better terms with suppliers. The closing creditors remained steady despite increased volumes of purchases.</p> <p>For period ended February 2025, the trade payable rose to 19 days. Due to bulk purchases made during the later stages, higher value of creditors remained outstanding during end of the period as the company thought fit to utilize entire credit period before making vendor payments.</p> <p>The company further projected payable days to decline to 13 days and 12 days in fiscal 2025 and fiscal 2026 respectively. This trend highlights a shift toward quicker payments, primarily influenced by the need to secure raw materials in advance and benefit from early payment discounts, which positively impact procurement costs.</p>

### GLOBAL ECONOMY

#### *Macroeconomic Environment*

Global growth is projected to fall from an estimated 3.3 percent in 2024 to 2.8 percent in 2025, before recovering to 3 percent in 2026. This is lower than the projections in the January 2025 WEO Update, by 0.5 percentage point for 2025 and 0.3 percentage point for 2026, with downward revisions for nearly all countries. The downgrades are broad-based across countries and reflect in large part the direct effects of the new trade measures and their indirect effects through trade linkage spillovers, heightened uncertainty, and deteriorating sentiment. For advanced economies, growth is projected to drop from an estimated 1.8 percent in 2024 to 1.4 percent in 2025 and 1.5 percent in 2026. Growth for 2025 is now projected to be 0.5 percentage point lower relative to that in January 2025 WEO Update projections. The forecasts for 2025 include significant downward revisions for Canada, Japan, the United Kingdom, and the United States and an upward revision for Spain. For emerging market and developing economies, growth is projected to drop to 3.7 percent in 2025 and 3.9 percent in 2026, following an estimated 4.3 percent in 2024. This is 0.5 and 0.4 percentage point lower, respectively, compared with the rate projected in the January 2025 WEO Update.

### GROWTH PROJECTIONS

Growth in the euro area is expected to decline slightly to 0.8 percent in 2025, before picking up modestly to 1.2 percent in 2026. Rising uncertainty and tariffs are key drivers of the subdued growth in 2025. Offsetting forces that support the modest pickup in 2026 include stronger consumption on the back of rising real wages and a projected fiscal easing in Germany following major changes to its fiscal rule (the “debt brake”). Within the region, Spain’s momentum contrasts with the sluggish dynamics elsewhere. The growth projection for 2025 for Spain is 2.5 percent, an upward revision of 0.2 percentage point from that in the January 2025 WEO Update. This reflects a large carryover from better-than-expected outturns in 2024 and reconstruction activity following floods.

The Middle East and Central Asia is projected to come out of several years of subdued growth, with the rate accelerating from an estimated 2.4 percent in 2024 to 3.0 percent in 2025 and to 3.5 percent in 2026 as the effects of disruptions to oil production and shipping dissipate and the impact of ongoing conflicts lessens. Compared with that in January, the projection is revised downward, reflecting a more gradual resumption of oil production, persistent spillovers from conflicts, and slower than-expected progress on structural reforms.

## WORLD ECONOMIC OUTLOOK

Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labour market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions.

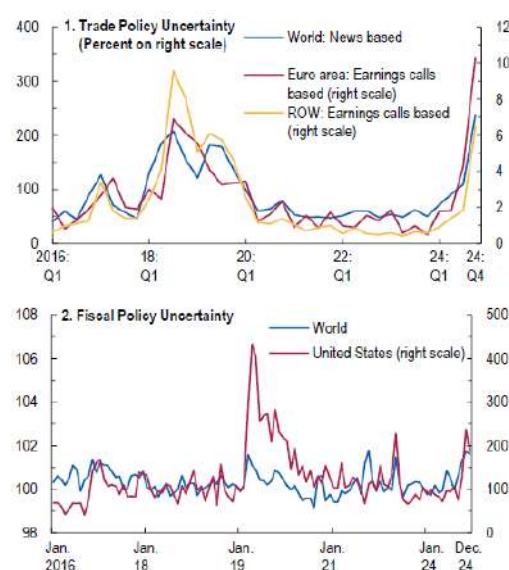

Equities in advanced economies have rallied on expectations of more business-friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries. Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

In the Middle East and Central Asia, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3%-point downward revision to 2025 growth in Saudi Arabia, mostly driven by the extension of OPEC+ production cuts. In Latin America and Caribbean, overall growth is projected to accelerate slightly in 2025 to 2.5%, despite an expected slowdown in the largest economies of the region. Growth in sub-Saharan Africa is expected to pick up in 2025, while it is forecast to slow down in emerging and developing Europe.

## INDIAN ECONOMY

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at Rs. 33.10 lakh crore (US\$ 3.8 trillion) with growth rate of 9.9%, compared to Rs. 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY25. In

### India's Gross Domestic Production (in Us billion)

FY25, India's exports stood at Rs. 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs from 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

With the announcement of the implementation of the recommendations of the Eighth Pay Commission, which will be in effect from FY27, there is a possibility that the momentum towards achieving fiscal consolidation targets may be delayed. The fiscal deficit and debt targets, as per the GoI's 2018 amended FRBMA, are 3% and 40% of GDP, respectively. However, achievement of both of these targets is likely to be delayed because of the additional pressure on revenue expenditures due to revised salaries and pensions of government employees. A similar impact would also be felt by the states.

In FY26, the main fiscal policy intervention required would be an attempt to restore infrastructure expansion momentum to support real GDP growth. There would be some positive movement on fiscal consolidation both in FY25 and FY26. Some other changes in the FY26 budget may relate to the revision of import tariffs and some rationalization of personal income tax rate and its deduction structure.

In the medium-term, in view of the impact of Eighth Pay Commission recommendations, the path of fiscal consolidation would lose momentum. We consider that, in the medium-term, real GDP growth can still be maintained at 6.5% and nominal GDP growth at 10.5% with some inter-year variations. A combination of slower nominal GDP growth in FY24 and FY25 and pressure on the INR may push the US\$5 trillion Indian economy

milestone from FY28 to FY30. To address this, nominal GDP growth must recover to at least 10.5% beyond FY25, and INR depreciation against the US\$ must be moderated.

### ***Trend in Capital Expenditure***

Capital expenditure is the money spent by the government on the development of machinery, equipment, building, health facilities, education, etc. It also includes the expenditure incurred on acquiring fixed assets like land and investment by the government that gives profits or dividend in future.

Capital expenditure, which leads to the creation of assets are long-term in nature and allow the economy to generate revenue for many years by adding or improving production facilities and boosting operational efficiency. It also increases labour participation, takes stock of the economy and raises its capacity to produce more in future.

### ***Foreign Exchange Reserves***

India's total foreign exchange reserves stood at USD 688.13 billion as on April 25, 2025, reflecting a stable and healthy external sector position. The reserves almost rose by \$11.83 billion in a month. As of April 4, 2025, India's foreign exchange reserves stood at \$676.3 billion, per the PIB press release.

As of April 25, 2025, India's forex reserves of USD 688.13 billion reflect sound macroeconomic fundamentals and robust reserve management on the part of the RBI. The position of having such elevated reserves indicates the health of India's external sector, reflected in the presence of a controllable current account register, capital inflows that are unaffected and a recovering export performance. It is also a sign of India's greater monetary resilience, that is, a substantial buffer for the central bank to use for interventions in the currency market, if necessary. This serves to stabilize the rupee under conditions of global volatility.

A strong forex reserve position provides better trade resilience as forex reserves stand above 10 months of imports and help to protect against external shocks. "It attracts foreign investment as it lends confidence and is a hedge against sovereign risk premiums. It supports inflation management as the Reserve Bank of India can intervene in the forex market to limit imported inflation, especially from spikes in oil prices as well as commodity prices.

India's reserves are diversified across the following assets:

- **Foreign Currency Assets (FCAs):** The largest component, these assets provide liquidity and comprise the major G-10 currencies. It is the first in line in terms of protecting against exchange rate movements. Currently, FCAs stand at \$580.66 billion.
- **Gold:** The yellow metal, which stands at \$84.37 billion, provides a hedge against weakness in the dollar and in terms of substitutability in cases of geopolitical risks, particularly during uncertain times globally.
- **Special Drawing Rights (SDRs):** Allocated by the IMF for additional liquidity, SDRs can be converted to usable currencies, should the need arise. The SDRs reserves are at \$18.59 billion.
- **Reserve Tranche Position (RTP):** These reserves stood at \$4.51 billion. All these reserves add to a diversification that protects against concentration risk and promotes economic stability. It provides policy flexibility, while maintaining confidence on the part of global investors and credit agencies.

### ***Road ahead for the Indian Economy***

India's economy grew by 6.2% in Q3 FY25. Signs of recovery are now visible, with growth expected to rise to 7.6% in Q4 FY25—indicating a possible turnaround in the coming months. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10.0 % to Rs. 11.21 lakh crore (US\$ 131.42 billion) over Rs. 10.18 lakh crore (US\$ 119.34 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total exports of goods and services rose by 5.5% to a record Rs. 69.8 lakh crore (US\$ 820.9 billion) in FY25, compared to Rs. 65.8 lakh crore (US\$ 773.0 billion) in FY24.

Key priorities include:

- **Boosting Consumption:** Wage growth, employment initiatives, and targeted welfare programs are essential to reviving domestic demand.
- **Encouraging Private Investment:** Streamlined policies, reduced tariffs, and greater ease of doing business can attract both domestic and foreign investors.
- **Expanding Global Trade:** Lowering trade barriers and enhancing export competitiveness are crucial to capturing a larger share of global markets.
- **Sustaining Reforms:** Addressing inefficiencies in the informal sector, agriculture, and traditional industries will ensure more balanced growth.
- **Monetary Policy Adjustments:** While rate cuts may provide short-term relief, they must be complemented by structural measures to stimulate demand and investment.

### Region-wise share in global welding consumables market

### Key drivers and trends in the global welding industry

#### ➤ *Infrastructure development & urbanization*

With increased urbanization and disposable incomes in developing countries, the infrastructure sector is likely to receive significant investment. Developing countries' industrial sectors are increasing at a healthy rate, in addition to construction. Welding is crucial component of construction and industrial sectors, leading to increased consumption and growth in the welding consumables market.

#### ➤ *Growing energy consumption*

As global energy consumption grows, so will the number of oil and natural gas pipelines. Welding is essential for oil and natural gas pipeline infrastructure, as it connects multiple pipes for transit. As a result of rising energy demand due to increased population, industrialization, and mobility, investments in the oil and gas industry will help to drive growth in the welding consumables market.

#### ➤ *Automotive sector*

The automobile business is expanding rapidly in both developed and emerging countries, fueled by economic expansion, rising population, and infrastructural investment. In addition, the automotive industry is seeing an increase in the utilization of welding processes as demand for bespoke goods grows. As a result, increased demand in the automotive industry will drive expansion in the welding consumables market.

### Welding consumables market in India

Manufacturing in India mainly relies on welding consumables as a primary technique for combining metals, as no other process provides such broad benefits. Welding consumables, which are materials which foster the joining of two metals or alloys, are crucial components of welding processes because they determine the quality and strength of the connection. Because different welding consumables have varied features and characteristics,

consumable selection varies depending on the type of metal being welded, the welding technique, and the ultimate product application.

### ***Key Product Segments in the Indian welding consumables industry***

#### ***1. Filler Wire***

These wires and metals are utilized to form a strong link between the two metal parts during the welding process. When heated, these metals melt and flow into the area between the two near fittings, creating a junction. Filler wires reinforce and strengthen weld joints, reducing the possibility of cracking under stress or strain. Filler wires are available in various configurations for MIG, TIG, and SAW welding techniques.

Three common forms of filler wires are metal-cored, flux-cored, and solid wires. Copper coating is commonly used on solid wires to prevent oxidation, improve electrical conductivity, and extend the lifespan of welding contact tips. Flux-cored wires employ an electric arc fuse to link two pieces of metal. These wires shield the welds from contaminants and oxidation. Metal-cored wires are tubular wires packed with metallic powder, alloys, and arc stabilizers. Its use offers benefits such as greater duty cycles, faster travel speeds, lower fume emissions, and cost-effectiveness.

Filler metals are often used to improve weld quality and reduce porosity. To minimize post-welding concerns, choose a filler metal with a similar chemical composition to the base material. This ensures similar characteristics between the weld pool, weld deposit, and base material, reducing cracking and distortion.

#### ***2. Welding Electrodes***

A welding electrode is a metallic rod containing two different metals, wires, or filler materials. Welding machines use extreme electrical heat to melt the base metal, allowing for robust and smooth connecting of different parts.

There are three types of welding electrodes: bar electrodes, light coated electrodes, and shielded arc electrodes. Bare electrodes are commonly used in applications where a coated electrode is unneeded. Lightly coated electrodes are an improved version of bare electrodes, with a small layer of coating measuring a few tenths of a millimeter thick. Shielded arc electrodes have a thick layer of covering. These electrodes are used to produce high-quality welding metal by inhibiting the production of oxides and nitrides via a thick coating layer.

The use of these electrodes increases melting speed, which accelerates the welding process. Electrode coatings provide insulation and enable for high current use. These electrodes allow for easy overhead vertical welding tasks. Additionally, the electrodes are protected from contamination through coating.

### Market size of the welding consumables industry in India

In 2023, the welding consumables market was valued at US\$ 1.17 billion. Looking ahead, International Market Analysis Research Analysis and Consulting Group forecasts that the market will reach US\$ 1.57 billion by 2028, with a compound annual growth rate (CAGR) of 6.1% from 2023 to 2028.

Infrastructure development, including roads, bridges, ports, and airport is attracting significant investment due to increased demand. Investing in infrastructure is a key development driver for the consumables sector. This investment in infrastructure is one of the key growth drivers for the welding consumables sector, because welding indispensable in the construction industry, as it provides strong and reliable joining solutions for structural components.

The growth of the welding consumables sector is further aided by the rise of businesses including heavy engineering, energy, oil and gas, shipbuilding, railroads, power, transportation, and automotive, as these industries require ongoing plant construction and maintenance. As India strives to become a global manufacturing hub, the need for welding consumables would surge. Government initiatives such as the National Infrastructure Pipeline, which will invest approximately ₹111 lakh crore in infrastructure from fiscal years 2020 to 2025 in sectors such as heavy engineering, roads, urban infrastructure, and railways, as well as industrial reforms such as 'Make in India' and 'Atmanirbhar Bharat', will support growth in the welding consumables sector.

### Key Business Process:

The broad categorization for process of manufacturing is as below:

1. Manufacturing of Welding Electrodes
2. Manufacturing of MIG Wires

#### 1. Manufacturing of Welding Electrodes

Welding Electrode consists essentially of a core wire which has been covered with a silicate bound flux coating. The welding characteristics of electrodes are determined by the chemical composition of the flux and the diameter of the core wire.

**Welding Electrodes are manufactured in a composite unit having two main sectors of its production sequence :-**

- 1) Preparation of Core Wire
- 2) Preparation of Coating Wire

### **Preparation of Core Wire:**

Generally, for the purpose of manufacturing G.P.M.S. Welding Electrodes, Electrode Quality Core Wire of IS : 2879 (BIS) specification is used which is manufactured and sold by major Steel Producers like TISCO, SAIL, JSW.

Raw Material is available in the form of 5.5 mm diameter to 8.0 mm diameter EWNr and E.Q.M.S. Wire Rods, which are drawn in Wire Drawing Machine to achieve the finished size of wire that will be coated by flux.

Electrodes are sold in market by the size of the wire diameter like 6.3, 5.0, 4.0, 3.15, 2.5 & 2.0 mm etc.

Wire Rod Coils are drawn in Wire Drawing Machines and cut and straightened into required lengths of 300, 350, 400, 450 mm in the Wire Straightening and Cutting Machine.

Cut Wires are checked for straightness, roundness, length, burr or any foreign material on the surface.

Passed cut wire will be sent for production duly marked O.K.

Stainless Steel Wires shall form the Core Wire for Stainless Steel Electrodes as per composition required for the chemical composition of finished electrodes. Finished size core wire of Stainless Steel will be purchased.

### **Preparation of Coating Flux**

Flux, which is coated on Core Wire consists of several different ingredients as specified by the required chemistry of the weld metal. Generally, flux ingredients are: -

- a) Rutile Sand, Zircon, Ilmenite, TiO<sub>2</sub>.
- b) Ferro Alloys, Ferro Metals.
- c) China Clay, Ball Clay, Bentonite Clay.
- d) Mica, Fledspar, Quartz, Calcite, Marble Powder,
- e) Cellulose, Wood Flour, Jute Powder, Starch.
- f) CMC, Suresh Jelly, Weeds, Gum.
- g) Fluorospars, Iron Powder.
- h) Graphite, Iron Oxide, Silicon, Calcium Fluoride, Carbon Black.
- i) Caustic Potash, Magnesite, Titanate, Iron Carbonate etc.

Flux ingredients are received from manufacturers, suppliers with chemical analysis certificate. The material is tested for their chemical composition before accepting.

The materials are then mixed as per design ratio of the electrode to be made in the Dry Mixer Machine for about 45 minutes. The mixed material is sieved before storing in gunny/PVC bags and batch number is assigned. Sample is drawn for testing.

The following processes are done in the Electrode Processing Line:

- a) Wet Mixing
- b) Slugging/ Briquetting
- c) Wire Feeding
- d) Extrusion
- e) Take off and Conveyor
- f) Tip End Cleaning and Brushing
- g) Printing
- h) Storing in trays and air drying
- i) Baking
- j) Testing
- k) Packing
- l) Storing

**The elaborated process of Electrodes manufacturing is as follows:**

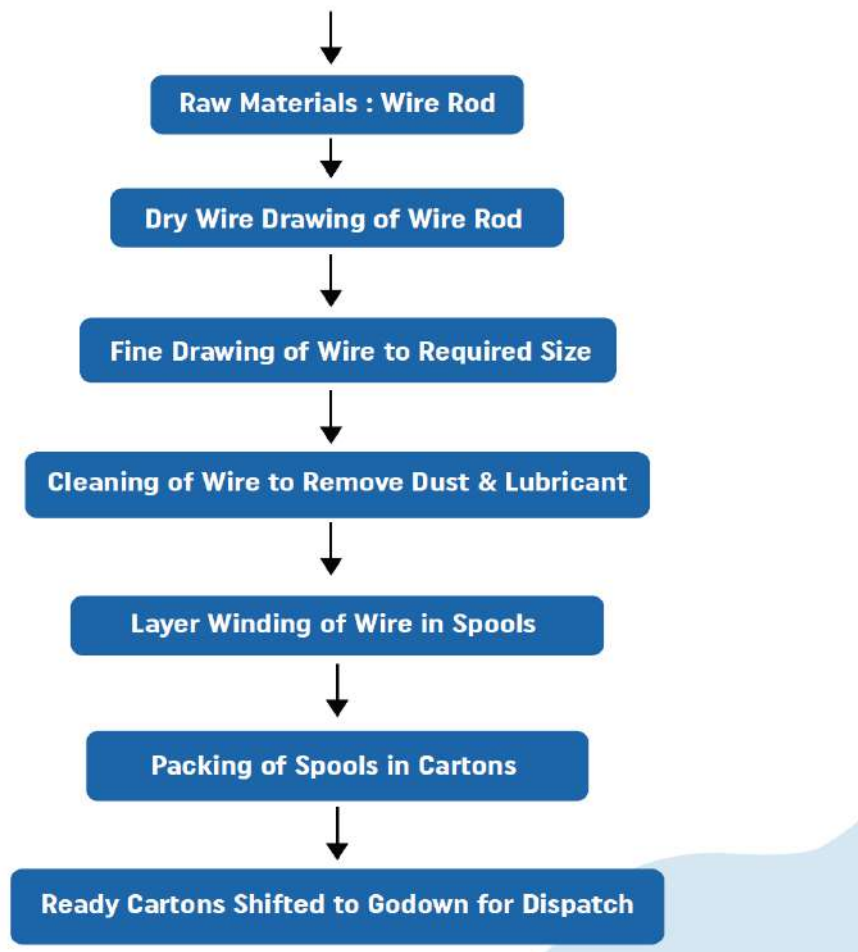

1. The process of electrode manufacturing involves three types of materials i.e. core wire; blend powder & liquid binders (silicates).
2. The core wire is obtained from drawing of higher diameter rod coils of Electrode Quality Mild Steel to specified diameter of the core wire.
3. This drawn wire is then straightened and cut to specified length.
4. The blend powder is obtained by mixing various items like Rutile Sand, Potassium Feldspar, Ferro Manganese, etc. in powdery form as per specified formulation.
5. This blend powder is then made to paste by addition of liquid silicates and pressure mixing.
6. This hard paste is then put in cylinder and a round briquette is made.
7. This briquette is fed to hydraulically operated extrusion machine where the paste is extruded at high pressure on continuously fed cut -lengths of the core wire and gives well bonded coating on the core-wire.
8. The wet electrodes are then carried through conveyers and collected on steel trays.
9. After specified time for air-drying the trays are put inside ovens and electrodes are subjected to a specified drying or baking cycle.
10. The dried or baked electrodes are then packed into suitable shrink-wrapped paper or plastic packets.
11. The packets are then packed again inside shrink-wrapped paper cartoons and put it in storage area.

In each step of manufacturing specified quality control checks are being carried out to ensure the quality of the final products.

#### **FACTORS AFFECTING OUR RESULT OF OPERATIONS:**

Except as otherwise stated in this Red Herring Prospectus and the Risk Factors given in the Red Herring Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

##### ***We do not have long-term agreements with our suppliers for raw materials***

Our purchases of raw materials are concentrated from a few suppliers with our top 10 suppliers contributing of the total purchases of raw materials on restated financial statement are as follows:

Period	Amt (₹ in Lakhs)	% of total Purchase
2024	13958.22	89.71
2023	12600.26	96.91
2022	11,266.41	96.06

Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and maintain a stable and sufficient supply of raw materials at acceptable prices. Our major raw materials include metals including Iron and Steel, Nickel, Titanium Wires and Titanium Oxide, Quartz, Chemicals such as Carbonates, Sodium, Hydrogen Bicarbonate etc. We depend on external suppliers for all the raw materials required and typically purchase raw materials on a purchase order basis and place such orders with them in advance based on our requirements. As a result, the success of our business is significantly dependent on maintaining good relationships with our raw material suppliers. The absence of long-term supply contracts subjects us to risks such as price volatility caused by various factors viz. commodity market fluctuations, currency fluctuations, climatic and environmental conditions, transportation cost, changes in domestic as well as international government policies, regulatory changes and trade sanctions. Some portions of the raw materials were imported during the last two Fiscal years from Australia. As a result, we continue to remain susceptible to the risks arising out of foreign exchange rate fluctuations as well as import duties, which could result in decline in our operating margins. If we cannot fully offset the increase in raw material prices with increase in the prices for our products, we will experience lower profit margins, which in turn may have a material adverse effect on our results of operations, financial condition and ultimately lead to a liquidity crunch. In the absence of such contracts, we are also exposed to the risk of unavailability of raw materials in desired quantities and qualities, in a timely manner.

##### ***Our inability to collect receivables and default in payment from our customers could result in the reduction of our profits and affect our cash flows.***

We sell at our standard terms with payment due before dispatch and conduct our business on the basis of various milestone payments. A small percentage of our sales are to customers on an open credit basis, with standard payment terms of generally between 30 to 90 days. While we generally monitor the ability of our customers to pay these open credit arrangements and limit the credit we extend to what we believe is reasonable based on an evaluation of each customer's financial condition and payment history, we may still experience losses because of

a customer being unable to pay. As a result, while we maintain what we believe to be a reasonable allowance for doubtful receivables for potential credit losses based upon our historical trends and other available information, there is a risk that our estimates may not be accurate.

Particulars	As at February 28, 2025	Fiscal 2024	Fiscal 2023	Fiscal 2022
	Amt (₹ in Lakhs)	Amt (₹ in Lakhs)	Amt (₹ in Lakhs)	Amt (₹ in Lakhs)
<b>Unsecured, Considered Good</b>				
Trade Receivable more than six months	628.12	585.38	574.73	740.23
Trade Receivable less than six months	4283.72	2,835.79	2,712.19	2,001.77
<b>Unsecured, Considered Doubtful</b>				
Trade Receivable more than six months	-	-	-	
<b>Total</b>	<b>4911.84</b>	<b>3,421.17</b>	<b>3286.92</b>	<b>2742.00</b>

Any increase in our receivable turnover days will negatively affect our business. If we are unable to collect customer receivables or if the provisions for doubtful receivables are inadequate, it could have a material adverse effect on our business, results of operations and financial condition.

Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers, and as a result could cause customers to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements, or default on their payment obligations to us. An increase in bad debts or in defaults by our customer, may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our results of operations and cashflows.

### ***Regulatory Framework***

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

***Our business and profitability is substantially dependent on the availability and cost of our raw materials and any disruption to the timely and adequate supply or volatility in the prices of raw materials may adversely impact our business, results of operations, cash flows and financial condition***

We are engaged in the manufacturing of complex and high precision engineered components, requiring raw materials having certain technical specifications. The tables below provide cost of raw materials and components consumed as a percentage of our total revenue in the years/ periods indicated:

Particulars	February 28, 2025		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amt (₹ in Lakhs)	% of total Revenues	Amt (₹ in Lakhs)	% of total Revenues	Amt (₹ in Lakhs)	% of total Revenues	Amt (₹ in Lakhs)	% of total Revenues
Cost of Raw Materials and Components Consumed	8851.23	47.18%	8657.32	44.67%	7,634.89	50.61%	6,298.28	47.06%

We may experience volatility in the cost or availability of raw materials. A major portion of raw materials comprises of metals including iron and steel, nickel, Titanium Wires and Titanium Oxide, Quartz, Chemicals such

as Carbonates, Sodium, Hydrogen Bicarbonate etc. The prices of such raw materials are volatile and are dependent on a number of factors, such as, their availability, fluctuations in domestic and international demand and supply, international production and capacity, fluctuation in the volume of metal imports, transportation costs, protective trade measures and various social and political factors, in the economies in which the metal producers sell their products. For instance, in Fiscal 2023 proved to be a tumultuous year for the steel sector as the Russia-Ukraine conflict that started in the last quarter of fiscal 2022 pushed up the prices of coking coal, iron ore, pig iron and steel. Prices of all these commodities hit new all-time highs, hurting the domestic demand. The prices directly impacted the procurement decisions of the players in the end-use segments in the first quarter of fiscal 2023. (Source: CRISIL Report) While our arrangements with customers allow us to seek an upward revision in pricing, our cash flows may still be adversely affected because of any gap in time between the date of procurement of those primary raw materials and date on which we can reset the prices for our customers, to account for the increase in the prices of such raw materials. Our ability to pass through costs or otherwise mitigate these cost increases could adversely affect our business. From time to time, commodity prices may also fall rapidly. If this happens, suppliers may withdraw capacity from the market until prices improve which may cause periodic supply interruptions. If these supply interruptions occur, our costs for procuring our raw materials could increase, and our business, cash flows and results of operations could be adversely affected.

Any increase in prices of raw materials could have an impact on our working capital as we would require additional funds to procure the necessary steel at the higher prices. As a result, we may be required to allocate a larger portion of our working capital towards purchasing raw materials to maintain our production levels. This increased allocation towards purchase can potentially strain our working capital availability.

### ***Ability of Management***

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of any member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

### ***Market & Economic conditions***

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown, the demand falls which has adverse impact on our business.

### ***Competition***

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc. are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing market players would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we may face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

### ***COVID-19 Pandemic***

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "Risk Factors" on Page No. 57 - Risk Factor No. 42- *Unplanned slowdowns or shutdowns of our manufacturing operations could have an adverse effect on our business, results of operations, financial condition, cash flows and future prospects.* We are continuing to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

#### **Phased implementation of Unified Payments Interface**

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by IIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Individual Bidders using the UPI.

The processing fees for applications made by Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

**Illustration of the Book Building and Price Discovery Process:** Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries / departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“**DPIIT**”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Under the current FDI Policy, 100% foreign direct investment is permitted in the manufacturing, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investor**”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

**The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sales occur.**

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.
