3. *Our major revenue is sourced from Outdoor media and Transit media. Our inability or failure to manage and attract more clients under these services could adversely affect our business.*

Our company is an Out of Home (OOH) advertising company offering a diverse range of advertising solutions including Transit Media, Outdoor Media, Print Media and Digital Media Services. However, majority of our revenue from operations is derived from outdoor and transit media. Our high dependence on these services could be risky for our business operations. Our inability or failure to source new clients for these services could adversely affect our business. However, there were no past instances where our company had suffered from losses due to such dependence.

The services wise revenue bifurcation is given below:

(Amount in lakhs)

For further details regarding the revenue bifurcation, kindly refer to the Chapter Titled “Our Business” on page no 169 of the Red Herring Prospectus.

**4. We had negative cash flows from operating, investing and financing activities as per the restated financial statements in the past and may continue to have negative cash flows in the future.**

Our company has experienced negative cash flow from “Operating Activities” during the financial year ended March 2025 and March 2023, primarily due to an increase in Trade Receivables and a decrease in Trade Payables. Additionally, we have faced negative cash flow from “Investing Activities” in the all the previous financial years, primarily as a result of investments in non-current assets and other non- current assets. Furthermore, we have had negative cash flow from “Financing Activities” in the previous financial year ended March 2024 and 2023 primarily due to the repayment of long-term borrowings. Any continuation of negative cash flow in the future may adversely impact our business, financial position, and operational results. For further details, please refer to the section titled "Financial Information as Restated" on page 266 of this Red Herring Prospectus.

The table given below set forth our cash flows for the year ended 2025, 2024 and 2023 on the basis of its restated financial statements.

**5. We depend on a limited number of customers for a significant portion of our revenues. The loss of a major customer or significant reduction in demand from any of our major customers may adversely affect our business, financial condition, results of operations and prospects.**

At present, the majority of our revenue from operations is concentrated towards a limited number of customers. The details of top customers and their revenue contribution for the last 3 years are as follows:

(Amount in lakhs)

Particulars	For the Financial Year ended on March 31, 2025	For the Financial Year ended on March 31, 2024	For the Financial Year ended on March 31, 2023
Top 1 Customer	2,177.93	2,077.30	1,653.84
<b>% of Revenue from Operations*</b>	<b>15.63%</b>	<b>22.16%</b>	<b>20.83%</b>
Top 5 Customers	5,824.18	5,645.16	4,701.46
<b>% of Revenue from Operations*</b>	<b>41.80%</b>	<b>60.21%</b>	<b>59.21%</b>

<b>% of Revenue from Operations*</b>	<b>61.34%</b>	<b>68.76%</b>	<b>70.81%</b>

*Note: The percentages listed above are calculated as a percentage of Revenue from Operations based on restated financial statement.*

As our business is currently concentrated among relatively few customers, we may experience reduction in cash flow and liquidity and our business would be negatively affected if we lose one or more of our major customers or if the amount of business from one or more of them is significantly reduced for any reason, including as a result of a dispute with or disqualification by a major customer. However, there were no past instances where we have experienced any losses or decrease in revenue due to loss of any major client. For further information, please refer to the chapter titled “Our Business” on page 169 of this Red Herring Prospectus.

**6. *The restated financial statements have been provided by pee- reviewed chartered accountants who are not statutory auditors of our Company.***

The Restated Financial Information of our Company as disclosed in section titled “Restated Financial statements” beginning on Page no. 266 of this Red Herring Prospectus for the period year ended on March 31, 2025, 2024 and 2023, are provided by peer reviewed auditor namely M/s K R A & Co., Chartered Accountants having FRN number 020266N and peer review certificate number 015776, who is not the Statutory Auditor of our Company. Peer-reviewed accountants may not have the same level of access and understanding of our company’s operations and internal controls as the statutory auditors. This limited access could result in incomplete review and potentially miss important risks or errors. There is a risk that material misstatements or errors in the financial statements may not be detected or adequately addressed by peer-reviewed accountants.

**7. *Certain differences exist between the Audited Financial Statements and the Restated Financial Statements of our Company, which may impact investors’ understanding of our financial condition and historical performance.***

There are certain differences between the financial information presented in our Audited Financial Statements and the Restated Financial Statements included in the Red Herring Prospectus. These differences arose primarily due to adjustments made during the restatement process, including but not limited to changes in accounting policies, reclassification of certain items, rectification of prior period errors, and other adjustments as required under the SEBI ICDR Regulations and applicable accounting standards.

Such differences may affect comparability and trend analysis of our historical financial performance. Investors should note that the Audited Financial Statements, which were used for internal decision-making and regulatory filings at the time, may not reflect the same financial position and results as those presented in the Restated Financials.

These discrepancies may raise concerns about the reliability of our financial reporting and internal controls in prior periods.

There can be no assurance that similar adjustments will not be required in the future, or that additional discrepancies will not be identified, which could adversely affect our reputation, result in regulatory scrutiny, or have a material impact on our financial position.

**8. *Conflicts of interest may arise out of common business undertaken by our Company and our promoter Group Companies.***

Some of our Promoter Group companies and entities, including Cash Ur Drive Electric Vehicle Private Limited, Creative Owl Advertising Private Limited, Kolkata Call Taxi Private Limited, All White Communication LLP, US CUD LLP, Acur Media, Frappe Ads, Cityscapes Integrated Media and Trajectore Works are engaged in businesses that are similar to ours, particularly in the areas of advertising, publicity, and marketing services across various media and public platforms. While we have entered into a non-compete agreement dated December 13, 2024, between our Company and the Promoter Group entities or group entities, there can be no assurance that these entities or our Promoters will not engage in competing business activities, either directly or indirectly.

Such potential overlaps may give rise to conflicts of interest, especially where common business opportunities or client segments are involved. Any such conflict could adversely impact our Company's market position, limit our ability to attract or retain customers, or impair our reputation in the industry. In addition, operational overlaps could result in inefficiencies or the diversion of key resources, thereby affecting our financial performance and growth prospects.

**9. *Our Company has entered into certain related party transactions at arm length price in the past and may continue to do so in the future.***

Our Company has entered into several related party transactions with our Promoters, Directors, Promoter Group and entities forming a part of our promoter group. We undertake that the related party transactions entered into by the company are on arm's length basis and in compliance with the provisions of Companies Act, 2013 as amended and applicable laws and rules made thereunder.

While we have entered into related party transactions in the past, we cannot assure you that we may not enter into such transactions in the future. However, we confirm that we will comply with the provisions of the companies Act, 2013 SEBI Regulations and other applicable laws or rules made thereunder in respect of the related party transaction to be entered into by the company in future. Further, there can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future. The details of related party transactions entered into by the company in the last three preceding financial years are as follows:

**10. The related party transactions reported by our group companies and the related party transactions reported in our Restated Financial Statements may vary, which may impact investors' understanding of our financial statements and related party transactions.**

There are certain variations and differences between the related party transactions reported by our group companies and the related party transactions reported in our Restated Financial Statements. Although these differences were primarily due to reclassification of loans and advances given to our group companies as purchases in their books, i.e., treating it as trade payables. However, these differences do not impact our Company's financial position, performance, they may indicate a lack of consistency and coordination in the financial reporting practices across the group or related entities.

Failure to properly reflect these transactions in the financial statements of the group companies could result in regulatory scrutiny, impact audit outcomes, or raise concerns among investors and other stakeholders regarding the integrity of the financial reporting. These reclassifications may raise concerns about the reliability of our financial reporting and internal controls.

**11. Our Company may incur penalties or liabilities for non-compliances with certain provisions of the Companies Act and other applicable laws in the last three (3) Years.**

Our Company have made delays in compliance with certain statutory provisions of the Companies Act, 2013. Such delayed filings may attract penalties and prosecution against the Company and its directors, which could impact the financial position of the Company to that extent.

**Reason for Delays:** The delays were primarily attributable to certain weaknesses and lags in our internal controls, which further contributed to inefficiencies and delays in execution and filings of returns. Our company acknowledge these shortcomings and are actively addressing them to ensure that such delays do not occur in the future.

We regret the delay and assure you of our continued efforts to maintain full compliance in the future by mitigating and taking steps to address and reduce these delays such as:

1. Training and development sessions for the finance team led by Chief Financial Officer.
2. Collaboration with tax consultants and legal advisors, wherever required
3. Purchase of relevant software
4. Preparation of compliance calendar

Further we confirm that if any action is initiated by the competent authority in the future our Company will comply with the same.

**13. Our advertising business is dependent on securing advertising space or sites to display ads across various media platforms. If we are unable to secure advertisement rights and space within time, it could negatively impact our business and financial performance.**

Our main requirement for advertisement in the transit media, outdoor media, electronic media, and print media is accessibility of ad space within each specific media, such as hoarding sites, newspapers, websites, and digital screens. We procure these spots, spaces, or sites through rental agreements, leases, or tender processes from relevant publication houses and agencies.

Presently, as on the date of the Red Herring Prospectus, our company has procured some advertisement rights through long-term agreements. Any disruption in the availability of these spaces/sites for any reason could negatively affect our sales and profitability. Moreover, fluctuations in the pricing of these spaces/sites, coupled with our inability to adapt, could adversely impact on our operational results and profitability. The potential consequences of disruptions in availability of space or a significant increase in prices could impact on our sales and profitability. However, there were no past instances where our company had suffered losses due to the non-availability of advertisement rights and space.

To mitigate these risks, we are actively exploring strategies to adapt to fluctuations in pricing and availability of ad spaces/sites. This includes ongoing negotiations with media agencies for long-term agreements and exploring alternative advertising avenues. Below is a detailed overview of the advertising rights we have acquired under our exclusive media:

**16. Our Company have CARO remarks pertaining to loans and advances given, outstanding dues related to income tax and GST, as highlighted in CARO report of previous financial years, which may result in financial strain, regulatory penalties, and increased scrutiny.**

The Company has received remarks under the Companies (Auditor's Report) Order (CARO) in previous financial years concerning outstanding dues related to income tax and Goods and Services Tax (GST). These remarks indicate that the Company has faced delays or discrepancies in settling its statutory liabilities, which may pose a risk to the Company's financial stability, regulatory compliance, and reputation. Outstanding dues, particularly in respect of tax obligations, may attract penalties, interest, and legal actions from regulatory authorities, leading to further financial strain. Additionally, failure to address these obligations in a timely manner could result in increased scrutiny from tax authorities and other regulatory bodies.

While the Company is taking steps to resolve these outstanding dues, there is a risk that the unresolved liabilities may continue to impact the Company's liquidity, financial position, and its ability to maintain smooth operations.

Further, as per the CARO Report for the financial year ended March 31, 2024, a loan of ₹10.05 lakhs to Mr. Parveen K Khanna, our Whole-time Director, was reported, which was treated as a contravention. This amount has subsequently been treated as advance salary in the Restated Financial Statements, and as on the date of this Red Herring Prospectus, the advance has been fully adjusted. Accordingly, there is no existing contravention of applicable provisions of the Companies Act, 2013. Additionally, the CARO report discloses details of Loans and Advances to related parties in the previous financial year ended 2023, 2024 and 2025.

***18. The object of the issue is to invest in technology and setting up of in house printing facility and any failure to complete the planned investments or delays in implementation could hinder our operational efficiency.***

The object of the issue is to invest in technology and setting up of in house printing facility to enhance and streamline our business processes. However, if our company fails to complete the required investment or faces delays in implementing the planned technological advancements and capex, it could adversely affect our ability to achieve operational efficiency, real-time engagement, and optimized media selection. Such a failure may impact on our business operations, competitiveness, and overall financial performance, which could result in a material adverse effect on our results of operations and growth prospects.

***19. Our funding requirements and proposed deployment of the Net Proceeds have not been appraised by a bank or a financial institution and if there are any delays or cost overruns, we may have to incur additional cost to fund the objects of the Issue because of which our business, financial condition and results of operations may be adversely affected***

We intend to use the Net Proceeds for the purposes described in chapter titled “Objects of the Issue” on page 117. The funding requirements mentioned as a part of the objects of the Issue have not been appraised by any bank or financial institution. While a monitoring agency has been appointed for monitoring the utilisation of net proceeds, the proposed utilisation of the net proceeds is based on the current conditions and internal management estimates and are subject to changes in the external circumstances or costs, or in other financial conditions, business or strategy.

Based on the competitive nature of our industry, we may have to revise our business plan and / or management estimate from time to time and consequently our funding requirements may also change. Our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our funds and may have an adverse impact on our business, financial condition, results of operations and cash flows. Further, pending utilisation of Net Proceeds towards the purposes described in the chapter titled “Objects of the Issue”, our Company will have the flexibility to deploy the Net Proceeds and to deposit the Net Proceeds temporarily in deposits with one or more scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1939. Accordingly, prospective investors in the Issue will need to rely on our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilisation of the Net Proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the Net Proceeds and our business and financial results may suffer.

***20. Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.***

We propose to utilise the Net Proceeds towards the objects of the Company as mentioned in chapter titled “Objects of the Issue” beginning on page 117. In accordance with Sections 13(8) and 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the net Proceeds without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may affect the utilization of IPO proceeds which may adversely affect our business or operations. We hereby confirm that the same will be ‘as per the Companies Act, 2013 and other applicable laws.

Further, our Promoters would be liable to provide an exit opportunity to shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement of our Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the net proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

***21. Our business growth depends on a large extent to the success of our customers. If there is any downturn in the industries in which our customers operate, it may have an adverse effect on our business, financial condition and results of operations.***

We are an out of Home (OOH) advertising company, offering advertisement services on various media platforms. Our Company is significantly dependent on our customers engaged in industries such as, Pharmaceuticals, education, electronics, automobiles, FMCG, apparel, Insurance, housing, hospitals, financial services, aviation, government organizations and more. The demand for our services is directly proportional to the demand of the products and/services of our customers and the success of their respective industries. Therefore, the growth of our business is highly dependent on the commercial viability and success of our customers. Any downturn in the industries or the demand for the products or services of our customers could have a direct impact on the demand of our services.

Also, if our customers are able to find a cheaper alternative for our services, it may conversely result in a reduction in the demand for our services and have an adverse effect on our business, financial condition and results of operations. However, there have been no past instances where we have experienced losses due to such adverse circumstances.

**22. *Our Company has generated revenue from the existing or old customers. Any change or Fluctuation in the number of customers renewed and discontinued in the last three years would adversely affect our revenue from operations.***

A significant portion of our Company's revenue is generated from existing or repeat customers. While this indicates a level of client satisfaction and continued business engagement, our Company's ability to sustain revenue growth is also dependent on acquiring new clients and retaining current ones.

As reflected in the financial data for the last three fiscal years, the proportion of revenue from new versus repeat customers has fluctuated. Any decline in the number of repeat customers or inability to consistently onboard new clients may adversely affect our Company's revenue streams, growth prospects, and financial performance. The revenue generated from repeated and new customers in the last three years are as follows:

<i>(Amount in lakhs)</i>			
Particulars	March 2025	March 2024	March 2023
Repeated Customers	10,263.48	4,445.98	3,861.82
<b>% of total revenue from operations</b>	<b>73.67%</b>	<b>47.42%</b>	<b>48.63%</b>
New Customers	3,668.91	4,929.11	4,078.98
<b>% of total revenue from operations</b>	<b>26.33%</b>	<b>52.58%</b>	<b>51.37%</b>
<b>Total</b>	<b>13,932.39</b>	<b>9,375.09</b>	<b>7,940.80</b>

**23. *Our company's ability to secure advertising contracts through tender bids is subject to competition, pricing strategies, and client requirements, with no guarantee of success. Failure to win key tenders could limit business opportunities and hinder growth prospects.***

Our company participates in various tender bidding processes for securing advertising contracts, including those related to Out-of-Home (OOH) and Digital Out-of-Home (DOOH) advertising. The success of these bids is subject to various factors, including competition, pricing strategies, and client requirements. There is no guarantee that our bids will be successful, and failure to win key tenders could limit our business opportunities, impact revenue generation, and affect our overall growth prospects. Furthermore, any delays or challenges in the tendering process could adversely affect our ability to secure contracts and expand our market presence.

**24. *Our employees play a key role in day-to-day business operations, and we heavily rely on our human resources and their knowledge and experience in operating our business. Further, hire, retain, train, and motivate qualified personnel may adversely effect our operations.***

Our business heavily relies on the experience, and dedication of our employees to manage day-to-day operations effectively. Their knowledge and skills are integral to the smooth functioning and success of our business. As such, our ability to hire, retain, train, and motivate qualified personnel is critical for maintaining operational efficiency and competitive advantage.

A key risk to our operations is the potential difficulty in attracting and retaining skilled employees, which may adversely affect our ability to deliver high-quality services to our clients.

Employee turnover and attrition rates pose significant challenges, as high levels of attrition can lead to a loss of valuable expertise and institutional knowledge, disrupting business continuity. Over the past three years, our company has experienced fluctuation in attrition rates from 66.15% in 2023 and 48.12% in 2024 and 51.61% in 2025 and 10.23% till June 30, 2025. For information, please refer to page 188 of the Red Herring Prospectus.

Further, the high attrition rate in our company over the last three financial years can be attributed to the dynamic and competitive nature of the advertising industry, particularly in the Out-of-Home (OOH) and Digital Out-of-Home (DOOH) sectors. The fast-paced environment, and client demands, often leads to higher turnover. Employees in the advertising industry may seek new opportunities for career advancement, skill development, or better compensation packages, contributing to the higher attrition rate.

If we are unable to effectively manage our workforce and address the risks related to employee satisfaction, engagement, and retention, it may result in decreased operational efficiency, lower client satisfaction, and ultimately, a negative impact on our long-term growth and profitability.

***25. Our prospective customer base may reduce if they choose to carry out advertising, market research, and data analysis in-house, which may adversely impact our business, financial condition and results of operations.***

We are an Out of Home (OOH) advertising company offering a range of services including transit media, outdoor campaigns, digital marketing and more. Our business is dependent on companies outsourcing their advertising, marketing and promotional needs. However, our business and revenue from operations would be adversely affected if the companies choose to establish in-house departments to manage advertising projects, conduct market research and perform data analysis to cater to their marketing requirements internally.

Such a move towards internalizing these functions may reduce the need for external advertising agencies like our company, leading to a shrinking pool of prospective customers. This could have an adverse impact on our revenue generation, business growth and overall operational results. While we continue to adapt to changing industry practices and aim to offer value-added services to retain and attract clients, any significant shift toward in-house advertising by companies may negatively affect our business. However, we have not experienced any material impact from such a shift in the past.

***26. We may be unable to respond to changes in consumer demands and market trends in a timely manner.***

Our ability to sustain and grow our business relies heavily on our capacity to quickly respond to evolving consumer demands and market trends. As consumer preferences shift and new trends emerge, it is crucial for us to identify these changes promptly and accurately to remain competitive. Our success depends on how well we understand market changes and how quickly we can adjust our products and services to match what our customers want. We need to create advertising and marketing strategies that reflect a wide variety of customer preferences to connect with our audience effectively.

However, predicting and reacting to shifts in consumer behaviour is inherently challenging. We cannot guarantee that the demand for our services will continue to increase or that we will consistently meet the rapidly changing expectations of consumers. If we fail to accurately understand market trends or misinterpret consumer preferences, we risk experiencing a decline in revenue. Such delays in adapting to market changes could have significant adverse effects on our business operations, financial stability, and

overall performance. Our inability to effectively address the diverse and evolving demands of consumers in a timely manner may undermine our competitive position and hinder our growth prospects. However, there have been no instances in the past where our company has experienced losses due to such changes.

**27. Any default in our services could incur substantial costs and adverse publicity of our business may create a liability towards our customers, which ultimately affects the value of our brand and decrease the sales of our company.**

Any failure or defect in our services could create a liability towards our customers, regardless of our responsibility for such a failure or defect. While we try to maintain our quality standards, we cannot assure that all our services would be of uniform quality. If we do not fulfil our customers expectation, it may adversely affect the value of our brand and ultimately it will result into decline in sales. Additionally, our business is also dependent on the trust of our customers in the quality of our services and any misleading advertisement of clients' products, brand, or services may affect our reputation. However, there have been no instances in the past where we have experienced losses or reputational damage.

**28. The intellectual Property Rights used by our company are registered in the name of our company. However, any infringement of third-party intellectual property rights or failure to protect our intellectual property rights may adversely affect our business.**

The intellectual property rights (IPR) i.e., the trademark and logo that our company uses is registered in the name of our company. However, Infringement of third-party intellectual property rights or failure to protect our own intellectual property can have negative consequences. In addition, infringement claims can damage our reputation and discourage potential investors, partners, or customers. Additionally, if we fail to protect our own intellectual property, our competitors or other third parties may copy, steal, or misuse our ideas, products, or services. This can lead to lost revenues, decreased market share, or erosion of our competitive advantage. Moreover, any unauthorized use, reproduction, or distribution of our copyrighted material without our permission will result in legal action and may lead to financial penalties or damage to our brand reputation. It is essential for us to protect our copyrighted material and ensure that it is used only with our permission, to avoid any negative impact on our business operations. Defending our intellectual property rights can be expensive and time-consuming, and we may not be able to prevent others from infringing or challenging our rights.

#### 30. Our inability to adequately adapt to competitive pricing models to retain existing clients and attract prospective clients.

Our ability to retain existing clients and attract new business may be adversely affected if we are unable to effectively adapt to competitive pricing models within the advertising industry. The failure to offer pricing structures that are both competitive and flexible, in alignment with everchanging market demands, could result in the loss of clients to competitors or difficulties in acquiring new clients. This could have a direct impact on our revenue growth, market share, and overall business performance.

**31. We depend upon a limited number of suppliers for providing media rights and services. Any dispute with one or more of them may adversely affect our business operations.**

Our company depends upon a limited number of suppliers for buying advertisement rights and providing printing and installation services. However, as on March 31, 2025, our company has experienced a reduction in reliance on the top 10 suppliers, despite previously depending on a limited number of suppliers for these needs.

Though we have not faced any difficulties or loss of any material supplier in the last three preceding financial years. However, we cannot assure you that we will not face any such situations in the future, or the procurement of services and ad space will be on commercially viable terms. Furthermore, any dispute with any of the suppliers may damage our relationship with existing and potential suppliers, and in any such event our operations will be adversely affected. Further it will also affect our profitability and reputation in the market. However, there were no past instances where we have experienced any losses due to the loss of any supplier.

**32. We rely on third party Printing Facility for printing of advertising material, and any interruption or delay in service could impair our ability to execute the orders of our customers.**

Our company is an Out of Home (OOH) advertising company offering a diverse range of advertising solutions, media planning, and design solutions that help our clients in brand building. As on the date of this Red Herring Prospectus we rely on third-party printing facilities for the production of banners, brochures, and other advertising materials. As a result, our business operations are dependent on the continued availability and efficiency of these third-party printing facilities. In the event of any significant disruption to these facilities, such as damage or operational issues, there could be substantial delays in the production of advertising materials, affecting our ability to deliver services to clients in a timely manner. Such disruptions or delays could have an adverse effect on our business operations, financial condition, and results of operations. However, there have been no past instances where our company has experienced such issues.

**33. Our Promoters and management team play a key role in day-to-day business operations and we heavily rely on their knowledge and experience in operating our business. Their involvement is essential to our business's success as they have been instrumental in shaping our growth. Further, our inability to retain our management team, KMPs and SMPs may have an adverse effect on our operations.**

We benefit from our relationship with our Promoters and our success depends upon the continuing services and experience of our Promoters who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Mr. Raghu Khanna, Managing Director and promoter, has experience of 15 years in the media and advertising industry, which turn out to be beneficial for our Company. Their extensive knowledge and established relationships with customers and other stakeholders have played a key role to our achievements. Accordingly, our performance is heavily dependent upon the services of our Promoters.

If our Promoters are unable or unwilling to continue in their current role, finding suitable replacements may prove challenging. The loss of our Promoters could have serious consequences for our business. It could hinder our ability to execute our strategic plans and negatively impact our financial condition, operational results, and future prospects. If they leave, it could also disrupt the important relationships they've developed over the years, making it even harder for us to keep and expand our business.

Further, any inability to retain our management team, key managerial personnel and senior management may have an adverse effect on our operations. We might face challenges in recruiting suitably skilled personnel, particularly as we continue to grow and diversify our operations. In the future, we may also not be able to compete with other larger companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our senior management team, our directors or other key personnel or an inability on our part to manage the attrition levels may materially and adversely impact our business, results of operations, financial condition and growth prospects.

***34. Our insurance coverage in connection with our business may not be adequate and may adversely affect our operations and profitability.***

Our Company has obtained insurance coverage in respect of certain risks. For details in relation to our insurance policies, please refer to the chapter titled "Our Business" beginning on page 169 of this Red Herring Prospectus. The insurance policies are renewed periodically to ensure that the coverage is adequate, however, our insurance policies do not cover all risks. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be affected adversely. While we have not encountered such issues till date, there remains a possibility that we may face such challenges in the future, which could adversely affect our business.

Further, in case of instances which are beyond the scope of coverage under the insurance policies taken by the company, our business, financial condition and results of operations may be affected adversely.

***35. Our company has obtained certain secured loans which may be repayable on demand if called upon. Further, fluctuation of Interest rate may adversely affect the Company's business.***

Further, for meeting the working capital requirement in ordinary course of our business, we have or may enter into certain borrowing agreements to meet those requirements. In the event interest rates increase, the cost of borrowing will also be increased, and any fluctuation in the interest rate may have the adverse effect on cash flow and profitability.

For the year ended March 31, 2025, our company has total outstanding secured borrowings are

aggregating to Rs. 18.33 Lakhs as per the certificate issued by M/s KRA & Co., Chartered Accountants dated July 18, 2025.

- 36. *Our Promoters and promoter group have significant controlling interest over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder. Further they have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.***

Upon completion of this Issue, our promoters along with the promoter group will collectively hold 58.37% of the post issue equity share capital of our Company and also continue to enjoy remuneration, reimbursements of expenses or other benefits. As a result, our Promoter and promoter group will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting.

There can be no assurance that our Promoters and Directors will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

- 37. *As an integral aspect of our business operations, it is necessary for us to provide bank guarantees and additional guarantee to certain clients. Failing to secure these guarantees or the activation of such guarantees has the potential to negatively impact our cash flows and financial standing.***

In alignment with industry norms, our operational framework necessitates the provision of performance bank guarantees in fulfilment of our obligations for our services. Typically, these guarantees are issued to our clients. However, a potential challenge lies in consistently securing new performance bank guarantees to commensurate with our operational requirements.

Difficulties in providing sufficient collateral to underpin these guarantees or letters of credit may impede our capacity to enter into new contracts. Such limitations could lead to a material adverse impact on our business, operational outcomes, and financial standing.

Moreover, the procedural complexities associated with acquiring letters of credit, as well as financial and performance bank guarantees, have a tendency to augment our working capital needs. The occurrence of unforeseen circumstances may render us incapable of meeting any or all our contractual obligations pertaining to ongoing assignments, potentially leading to defaults under our contracts and subsequent invocation of the bank guarantees issued by us. In the event of such an invocation, there exists the potential for a substantial adverse impact on our business and financial performance.

***38. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risk.***

Effective internal controls are necessary for us to prepare reliable financial reports and effectively prevent and detect any fraud or misuse of funds. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may decline over time. There can be no assurance that additional deficiencies or lacks in our internal controls will not arise in the future, or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies or lacks in our internal controls. If internal control weaknesses are identified in a delayed manner, our actions may not be sufficient to correct such internal control weakness. Such instances may also adversely affect our reputation, thereby adversely impacting our business, results of operations and financial condition. However, there were no past instances where our business or operational results were adversely impacted.

***39. Our marketing and advertising activities may not be successful in increasing the popularity of our Company among customers. If our marketing or advertising initiatives are not effective, this may affect the popularity of our Company.***

Our company is an Out of Home (OOH) advertising company offering a diverse range of advertising solutions including Transit Media, Outdoor Media, Print Media and Digital Media Services. In order to increase our reach to the maximum customers, our marketing and advertising strategies play a vital role. Marketing is a cornerstone for our company to create awareness, attract and retain users, differentiate themselves in a competitive landscape, and ensure their offerings meet the ever-evolving needs of the industry. Effective marketing not only leads to business growth but also contributes to the enhancement of customer satisfaction for our clients.

Our marketing team is led by our promoter, and we rely to a large extent on their management's experience i.e., Mr. Raghu Khanna. If senior management leads us to adopt unsuccessful marketing and advertising activities or initiatives, we may fail to attract and engage new clients. For further information regarding our Marketing strategies, please refer to the chapter titled "Our Business" beginning on page no. 169 of this Red Herring Prospectus.

***40. We are dependent on our information technology systems and any disruption, failure, or security breach in these systems could adversely affect our business operations and financial performance. Further, our company has not adopted data security policy.***

Our business operations rely on the efficient functioning of our information technology systems for data management, campaign planning, client communications, financial reporting and internal coordination. Any malfunction, failure, or disruption in our systems, whether due to system failure, human error, natural disaster or other unforeseen reasons, could disrupt our operations and impact our ability to serve

clients efficiently.

Additionally, with increasing digitalization, the threat of cyberattacks, data breaches and other cybersecurity risks has grown significantly. Unauthorized access, hacking or data leaks could lead to the loss of confidential data, damage our reputation, and expose us to legal and regulatory liabilities. Although certain internal security protocols are in place, we have not adopted a formal data security policy, which may increase our vulnerability to such risks.

Any such event could have a material adverse effect on our business operations, client relationships, financial condition, and results of operations. Further, we confirm that the Company has not experienced any major IT-related disruptions, cybersecurity incidents, or data leakage during the past three financial years. Furthermore, there has been no instance of non-compliance in this regard to date.

***41. Our business may be adversely affected by fraud, theft, employee negligence, data theft, cybersecurity breaches, or other similar incidents.***

As part of our operations, we rely on the integrity, conduct, and performance of our employees at various levels. Any instance of fraud, theft, or negligence by employees or third-party service providers may result in financial loss, reputational damage, or legal liability for our Company.

Additionally, as we store and process sensitive client data and business information through digital platforms, there is an inherent risk of cybersecurity threats, data theft, and other forms of malicious digital activity. Despite implementing internal policies, code of conduct guidelines, and security protocols, there can be no assurance that such incidents will not occur in the future. Any such event could result in operational disruption, legal proceedings, loss of customer trust or regulatory scrutiny, all of which may materially and adversely affect our business operations, financial condition and results of operations. However, we have not experienced any material impact from such incidents in the past.

***42. The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.***

Our Promoters' average cost of acquisition of Equity Shares in our Company could be lower than the Issue Price as may be decided by the Company in consultation with the Lead Manager. For further details regarding, average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company. For more details, please refer page no. 108 of this Red Herring Prospectus.

***43. We generally do business with our customers on a purchase order basis and do not enter into long-term contracts with most of them.***

Our business relies on maintaining continuing relationships with our customers. Our Company has not entered into any long-term contract with some of our customers. Any change in the consumption pattern of our end users or disassociation of major customers can adversely affect the business of our Company.

The loss or interruption of work by a customer or a number of customers as well as inability to procure new orders on a regular basis may adversely affect our revenues, cash flows and operations.

***44. Some of our company's Board of Directors do not have experience of listed companies.***

Our company's Board of Directors consists of both executive and non-executive directors. Some of our directors do not have any experience of listed companies. This inexperience gives rise to risks including but not limited to compliance risk making us more prone to fines and penalties or notices from regulatory authorities which in turn give rise to reputational risk and governance risk. Furthermore, directors may not be able to provide effective guidance or give erroneous disclosures or intimation as required due to lack of experience.

***45. Our results of operations and cash flows could be adversely affected if the Company are unable to collect the dues and receivables from the clients.***

Our Company's financial performance, cash flows, and overall business operations could be impacted if we are unable to collect dues and receivables from clients in a timely manner or to invoice for unbilled services. Any failure to collect outstanding payments may result from various factors, including clients' financial difficulties, disputes over services rendered, or delays in client approvals for invoicing. Such delays or non-payments could lead to a reduction in available working capital, affecting the Company's ability to meet its short-term financial obligations, fund operations, or invest in growth opportunities. Persistent issues in collecting dues and invoicing may result in strained client relationships, and potential reputational damage, thereby affecting the Company's long-term profitability and growth prospects.

***46. The results of operations and the key business measures are subject to quarterly variations.***

Our results of operations and key business measures are subject to quarterly fluctuations, which may result from a variety of factors such as demand, changes in client budgets, economic conditions, and market trends. These variations can lead to inconsistent revenue streams and profitability from quarter to quarter. As a result, our Company may experience periods of strong financial performance followed by slower growth or downturns. Such volatility can make it difficult to predict future performance and could impact the Company's ability to meet its financial projections, affect investor sentiment, and potentially lead to challenges in managing working capital and operational efficiency.

***47. We will not receive any proceeds from the Offer for Sale. The Selling Shareholder will receive the entire proceeds from the Offer for Sale.***

This Offer includes an Offer for Sale of up to 2,07,000 Equity Shares aggregating up to Rs. [•] Lakhs by the Selling Shareholders. ***48. One of our directors, Ms. Parveen K Khanna, has over 30 years of experience. However, this has not been formally disclosed due to the non-availability of her experience certificates, which are currently untraceable.***

Ms. Parveen K Khanna, one of our directors, has over 30 years of industry experience. However, the relevant experience certificates are currently not traceable and, as a result, her overall experience has not been formally disclosed in the Red Herring Prospectus. While the director's expertise and involvement in the business are well-recognized, the absence of supporting documentation may present challenges and could impact stakeholder confidence. For more information, regarding the profile of the director, please refer to her profile in chapter titled "Our Management".

**49. *The requirements of being a listed company may strain our resources.***

We are not a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated by the virtue of being a listed company. As a listed company, we will incur considerable legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing compliances and reporting requirements to the Stock Exchanges on which equity shares of our Company will be listed, which require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

**50. *Due to low entry barriers in the marketing and advertising industry, our Company is constantly competing with new entrants providing niche services.***

The marketing and advertising industry has relatively low entry barriers, which exposes our company to constant competition from new entrants offering niche services. These new competitors can quickly gain traction by providing specialized or innovative offerings that appeal to specific market segments. As a result, there is a risk that our market share could be eroded, particularly if we fail to differentiate our services or adapt to evolving industry trends. The entry of new players could intensify pricing pressures and reduce profitability, potentially affecting our ability to retain existing clients and attract new business.

**51. *Compliance with, and changes to, environmental, health and safety laws, as well as various labour and workplace-related regulations, may increase our operational and compliance costs and could adversely affect our business and results of operations.***

Our business operations are subject to various environmental, health and safety, labour and other workplace-related laws and regulations. These include, but are not limited to, provisions under the Environmental Protection Act, Employees' Provident Fund and other applicable legislations. Ensuring compliance with these laws may require us to invest in safety equipment, implement training programs, maintain certain facilities, and engage in periodic inspections and audits. Non-compliance, whether inadvertent or otherwise, may result in penalties, fines, suspension of operations, or reputational damage.

Furthermore, any amendments or stricter enforcement of these laws may lead to increased costs of compliance and operational adjustments. Changes in labour laws or employee benefit regulations could result in increased wage expenses, additional social security contributions, or modified employment terms. Similarly, any new environmental or workplace safety regulations may require capital expenditures for modifications in infrastructure or equipment. These factors may adversely impact our profitability, financial condition, and overall business performance. While we strive to remain fully compliant with all applicable laws, there can be no assurance that future changes will not adversely affect us.

**52. *Our Company's operation and growth is dependent upon successful implementation of our business strategies.***

The success of our business inter alia depends on our ability to effectively implement our business and growth strategies as mentioned in the chapter "our business" on page 169 of the Red Herring Prospectus. In the past, we have generally been successful in the execution of our business strategies but there can be no assurance that we will be able to execute our strategy effectively and within the estimated budget in the future.

Following are factors that can affect our ability to effectively implement our business strategies:

1. Our inability to maintain our working capital requirements.
2. Our inability to qualify for or win bids from governments and to fulfill the specified pre-qualification prerequisites and subsequent engagement in a competitive tendering procedure.
3. Our inability to attract and retain qualified personnel.
4. Our inability to provide quality services.
5. Our inability to update and adapt to new market trends.
6. Our inability to secure long term media rights.

If we are unable to address these factors, there could be a material adverse effect on our business and results of operations.

***53. Certain key performance indicators for certain listed industry peers included in this Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.***

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the “Basis for Issue Price” beginning on page 132 of the Red Herring Prospectus. Although this information is sourced from and relied upon on the audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There may be different methodologies and formulas used to compute various ratios.

***54. Industry information included in this Red Herring Prospectus has been derived from industry reports and information available on various website. The reliability on the forecasts of the reports could be incorrect and would significantly impact our operations.***

We have relied on the reports of certain independent third parties for purposes of inclusion of such information in this Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Red Herring Prospectus.

For the details regarding the sources of the industry, please refer to the chapter “Industry Overview” on the page no. 146 of the Red Herring Prospectus.

***55. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the issue proceeds may delay the implementation schedule.***

Our requirement for proposed funds is Investment in technology, capital expenditure and working capital as described in the section titled “Objects of the Issue” is to be funded from the proceeds of this IPO. Other than this offering, we have not identified any alternate source of funding and any delay or failure to mobilize the required funding or any shortfall in the issue proceeds may delay the implementation schedule. Further, we cannot provide any assurance that we will be able to execute our plans/strategy within the given timeframe. For details, kindly refer to the chapter titled “Object of the Issue” on page 117.

***56. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive, and declaration of dividend will depend upon the financial performance of our Company at the time of declaration. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements (if any) in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past and there can be no assurance that our Company will declare dividends in the future. For further details, please refer to the chapter titled “Dividend Policy” on pages 265 of this Red Herring Prospectus.

***57. We require certain approvals and licenses in the ordinary course of business and the failure to successfully obtain/renew such registrations would adversely affect our operations, results of operations and financial condition.***

We are governed by various laws and regulations for our business operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, when expire.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations. Furthermore, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see “Government and Other Approvals” on page 307 of this Red Herring Prospectus.

***58. Our Company's future funding requirements, in the form of further issue of capital or other securities and/or loans that might be availed by us, may turn out to be prejudicial to the interest of the shareholders depending upon the terms and conditions on which they are raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing shareholders, and such issuance may be done on terms and conditions, which may not be favourable to the existing shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

***This space has been left blank intentionally.***

**EXTERNAL RISK FACTORS:*****59. Changing laws, rules and regulations and legal uncertainties in India and other countries may adversely affect our business and financial performance.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

***60. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.***

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by Centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our services and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

***61. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.***

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

***62. Investors outside India subscribing to this Issue may not be able to enforce any judgment of a foreign court against us, except by way of a suit in India.***

Our Company is a limited liability company incorporated under the laws of India. Our Company's assets are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons in India or to enforce judgments obtained against our Company or such parties outside India. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions, including the United Kingdom, Singapore, UAE, and Hong Kong. A judgment from certain specified courts located in a jurisdiction with reciprocity must meet certain requirements of the Code of Civil Procedure, 1908, as amended ("Civil Procedure Code"). The United States has not been notified as a reciprocating territory.

In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Such amount may also be subject to income tax in accordance with applicable law. Consequently, it may not be possible to enforce in an Indian court any judgment obtained in a foreign court, or effect service of process outside of India, against Indian companies, entities, their directors and executive officers and any other parties resident in India. Additionally, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner.

***63. Any adverse change or downgrading in ratings of India may adversely affect our business, results of operations and cash flows.***

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

***64. Our performance is linked to the stability of policies and the political situation in India.***

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the

trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the construction sector foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

***65. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business***

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

***66. If certain labour laws become applicable, our profitability may be adversely affected.***

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour-related policies.

***67. Financial instability in other countries may cause increased volatility in Indian and other financial markets.***

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in

Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

***68. Under Indian legal regime, foreign investors are subject to investment restrictions that limit our Company's ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares. Accordingly, our ability to raise foreign capital may be constrained.***

As a company incorporated in India, we are subject to exchange controls that govern the borrowings in foreign currencies. Further, under applicable foreign exchange regulations in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified under applicable laws. If share transfer is not in compliance with such requirements and does not fall under any of the permissible exceptions, then prior approval of the relevant regulatory authority is required. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness.

**RISKS RELATED TO THE ISSUE:**

***69. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors***

SEBI and the Stock Exchanges have introduced various pre-emptive surveillance measures in order to enhance market integrity and safeguard the interests of investors, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, enhance the integrity of the market and safeguard the interest of the investors, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple, market capitalization, etc. Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. In the event our Equity Shares are subject to such surveillance measures implemented by the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company.

***70. Equity Shares of our Company have never been publicly traded, and after the Issue, the Equity Shares may be subject to price and volume fluctuations, and an active trading market for the Equity Shares may or may not develop. Further, the Issue Price may not be indicative of the market price of the Equity Shares after the Issue.***

Prior to this Issue of our Company, no public market existed for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation of Equity Shares does not guarantee that a market for the same will develop, or if developed, the liquidity of such market for the Equity Shares cannot be guaranteed. The Issue Price of the equity Shares is proposed to be determined through a book building process in compliance with Schedule XIII of the SEBI ICDR and the same may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The Issue Price will be based on numerous factors, as described in the section “Basis for Issue Price” beginning on page 132. This price may not necessarily be indicative of the market price of our Equity Shares after the Issue is completed. The market price of the Equity Shares may be subject to significant fluctuations in response to, among

other factors, variations in our operating results, market conditions specific to the industry we operate in.

Our Equity Shares are expected to trade on NSE after the Issue, but there can be no assurance that active trading in our Equity Shares will develop after the Issue, or if such trading develops, that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

***71. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid, and the Individual Investors applying for minimum application size are not permitted to withdraw their Bids after closure of the Bid/ Issue Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Individual Investors applying for minimum application size can revise their Bids during the Bid/ Issue Period and withdraw their Bids until the Bid/ Issue Closing Date. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed, including Allotment, within Three Working Days from the Bid/ Issue Closing Date or such other period as may be prescribed by the SEBI, events affecting the investors' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

***72. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.***

The Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in the Issue and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately two Working Days from the Bid/ Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within three Working Days of the Bid/ Issue Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

**73. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position***

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution.

However, if the laws of the jurisdiction the investors are located in does not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emption rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

**74. *A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian law.***

As a listed Indian company, there are provisions in Indian legal regime that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

#### **Development of “Media Planning Platform, Transit Media App and Inventory Management Platform”:**

Our company intends to develop a platform to manage Out of Home (OOH) and Transit Media and outdoor media campaigns efficiently, covering both media planning and inventory management. This platform will cover three key areas: **Transit and Outdoor Media Monitoring, Media Planning, and Inventory Management**. Our company intends to automate and streamline the processes currently done manually, thereby increasing efficiency, allowing real-time engagement and optimized media selection.

The app will help in the following key areas:

##### ***1. Transit and outdoor media app***

This app will help our company in real-time monitoring of various media assets such as vehicles, hoardings, and other advertising spaces used in our campaigns. This app will allow Real-time picture capturing and location tracking for all media spaces, including vehicles and hoardings. Further, it will reduce the need for manual checks and enhances the accuracy of our data collection.

The platform will track how the campaigns are performing in real time, providing immediate feedback, engagement data and lead generation which help in client reporting.

Additionally, the app will regularly capture images of media assets, helping us monitor campaign progress and quickly identify the need for replacements in case of damage, ensuring efficient tracking of campaign execution.

##### ***2. Media Planning platform***

The app will assist in automating media planning for our advertising campaigns based on the data captured from the media assets. The app will suggest the best media channels for advertising, considering the client's budget and preferences.

The app will automatically suggest the most suitable advertising channel for a campaign, ensuring that the chosen channels align with client objectives and available resources.

Currently, our team manages and selects the media for our clients. By leveraging data insights, this app will replace our traditional method of media selection, enabling a more data-driven approach to planning.

### 3. *Inventory Management platform*

The app will help our company to manage the inventory of media rights or ad spaces acquired by our company. Our company is currently shifting its approach of acquiring media rights from a “trade media” to the more efficient and cost-effective “exclusive media” model.

This new approach will help our company to build inventory of media rights, and the app will help in tracking and managing the inventory of these media spaces. For more information regarding trade media and exclusive media, please refer to the chapter “Our Business” on page 169 of the Red Herring Prospectus.

The app will allow us to easily track and manage the available media spaces, ensuring that all ad spaces are being utilized efficiently and further in monetizing the acquired media inventory by ensuring optimal use of the spaces and maximizing revenue potential.

#### **PROPOSED BENEFITS FOR OUR COMPANY:**

- **Real-Time Monitoring and Engagement:** By automating monitoring, the company will have up-to-date insights on the performance of each campaign, allowing for quick adjustments and better client engagement.
- **Optimized Media Planning:** The app will improve decision-making by automating media selection, ensuring that campaigns are placed on the most effective and cost-efficient platforms based on real-time data.
- **Efficient Inventory Management:** The platform will help in managing and monetizing the media inventory more effectively, helping the company maximize its revenue potential from advertising spaces.
- **Data-Driven Media Planning:** With access to AI-powered map-based tools and media asset management, the platform will help in planning campaigns more efficiently, optimizing ad space, and targeting the right audience.
- **Cost and Time Efficiency:** Automation of previously manual processes will save time, reduce human errors, and cut costs associated with media monitoring and planning.

#### **PLATFORM SPECIFICATIONS:**

## 2. Capital Expenditure

Our company intends to deploy Net Proceeds from fresh issue aggregating to Rs. 597.49 Lakh towards capital expenditure for Setting up in-house Printing facility. Further we confirm that we are in compliance with para 9(A)(9) of Schedule VI of SEBI ICDR regulation 2018.

Our company is an integrated media and advertising company, offering media and advertising services across multiple outdoor platforms. These services include creative design preparation and solutions that assist our clients in brand building. To support our services, we require printing facilities for printing banners, brochures, and other advertising materials. At present, we outsource the printing process to third-party vendors and do not maintain in-house resources for this function. To streamline operations, we propose to set up an in-house printing facility to handle these printing needs internally.

The objective of setting up this in-house facility is to reduce the company's costs and improve profit margins. We confirm that no second-hand machinery or equipment will be purchased for establishing the printing facility.

Setting up the printing facility will involve the installation of various plants, machinery, and other essential equipment. This facility will be established on our owned property, the details of which are provided below:

S. No.	Address of Premises	Name of the Seller	Date of Agreement	Area	Status	Purpose
1.	C-37, Sector-02, Noida, Uttar Pradesh- 201301 <sup>(Note)</sup>	Mr. Pradeep Chadha	June 05, 2014	212 Sq. Meters	Owned	- <b>1st and 2nd Floor:</b> Further rented. - <b>3rd Floor:</b> Branch Office. - <b>Basement and Ground Floor:</b> In-house printing facility setup

Note:

- The 1st and 2nd floors of the property are being utilized by our company for further rental purposes.
- The 3rd floor is designated for our Branch Office.
- The basement and ground floors will be developed for setting up an in-house printing facility.

For further details regarding our owned properties, please refer to the chapter titled "Our Business" on page 169 of the Red Herring Prospectus.

The basement and ground floors of the property will be utilized for setting up the printing facility, along with the installation of various plant and machinery necessary for operations.

Our company will install latest state-of-the-art machineries to establish our in-house printing facility. This will provide numerous benefits to our company, including:

1. **Enhanced Operational Efficiency:** By controlling the printing process internally, we can streamline operations and improve productivity.
2. **Cost Reduction:** Outsourced printing expenses will be reduced, leading to substantial savings for the company.
3. **Improved Profit Margins:** With greater control over printing costs, we expect to improve our overall profit margins.

Currently, the printing expenses of our company are as follows:

(Amount in Lakhs)

Particulars	March 2025	March 2024	March 2023
Printing Expenses	1,319.90	639.40	1,281.21
Total Expenditure	11,897.86	8,568.55	7,446.41
% of total expenditure	11.09%	7.46%	17.21%

\*As certified by M/s KRA & Co., Chartered Accountants, by certificate dated July 18, 2025.

During the Financial Year 2023, our Company had outsourced a substantial portion of its printing requirements to third-party vendors, including CUD Digital. These vendors, however, lacked the latest technological infrastructure to meet the evolving and specific demands of our clients. In view of this, our Company has reduced offering printing services to our clients in the Financial Year 2024. Consequently, the printing expenses have significantly reduced from ₹1,281.21 Lakhs in FY 2023 to ₹ 639.40 Lakhs in FY 2024.

While printing services were scaled down in FY 2024 due to limitations in third-party vendor capabilities, our Company provided limited printing services in response to our client needs or increased demand. The rise in printing expenses during FY 2024–25 was in proportion to the overall growth in total expenditure and revenue from operations, indicating that the increase was a natural outcome of expanded business activity.

Further, the Company has proposed to set up an in-house printing facility at Noida, Uttar Pradesh, with the objective of enhancing operational efficiency. However, it is clarified that this facility will primarily serve specific geographic regions, namely Delhi and the northern parts of India.

For more information, please refer to the "Restated financial statements" on page 266 of the Red Herring Prospectus.

### 3. Funding the Working Capital requirement

We propose to allocate ₹3,300.00 lakhs towards funding the working capital gap anticipated in the coming years, driven by an increase in revenue from the Exclusive Media segment. The business model for our advertising services relies on acquiring advertising spaces across various media platforms, including vehicles, hoarding sites, newspapers, charging stations, and digital screens. The advertising rights are categorized as either Trade Media or Exclusive Media. Under the Exclusive Media model, the company is obligated to make payments, either on an advance or recurring basis, irrespective of whether the advertising space is sold. In addition to this, the company is required to furnish security deposits and bank guarantees to secure these rights.

For further information regarding "Our Business," please refer to Page 169 of the Red Herring Prospectus.

We are always trying to bid for new media sites and increase exclusive media, expand our geographical footprint and take new initiatives towards our business as a part of our projects. In light of the above, our Company will require incremental working capital to fund trade receivables, trade payables and arrange margin money for issuance of Performance and Security Deposit Bank Guarantee.

### ***Basis of estimation of incremental working capital requirement***

The estimates of the long term working capital requirements for the Fiscal 2026 and Fiscal 2027 have been prepared based on the management estimates of future financial performance. The projection has been prepared using set of assumptions that include assumptions about future events and management's action that are not necessarily expected to occur. On the basis of estimated and projected working capital requirement of our Company on standalone basis, and assumptions for such working capital requirements for Fiscal 2026 and Fiscal 2027 and the proposed funding of such working capital requirements as set forth below:

(3) The working capital requirements have been certified by M/s. AHS&G & Co LLP, Chartered Accountants, through its certificate dated July 22, 2025.

On the basis of existing and estimated working capital requirement of our Company on standalone basis, and assumptions for such working capital requirements, the company has approved the estimated working capital requirements for Fiscal 2026 and Fiscal 2027, and the proposed funding of such working capital requirements

as set forth below:

#### Assumptions for Working Capital Requirements:

Particulars	FY'23	FY'24	FY'25	FY'26	FY'27
	Audited	Audited	Audited	Projected	Projected
Trade Receivables*	152	140	97	130	120

Exclusive Media operates on a model where it provides security deposits or guarantees to vendors in exchange for exclusive rights to media spaces. These deposits are typically made in the form of fixed deposits or cash equivalents. In addition to these guarantees, the company is required to make regular payments for the media spaces, either on a monthly schedule or based on milestones outlined in the agreements. These payments are tied to a minimum guaranteed commitment specified in the agreements, regardless of whether the media spaces are subsequently sold to clients. As part of the company's vision, the revenue contribution from Exclusive Media has been steadily growing over the years and is expected to rise further in the future. The funds required for increasing revenue from Exclusive Media are primarily needed to reduce trade payable cycle and the acquisition of media rights through the furnishing of bank guarantees.

The Revenue from operations from Exclusive Media has been rising as a component of Total Revenue from Operations as per table below:

Particulars	FY 2025		FY 2024		FY 2023	
	Amount	%age	Amount	%age	Amount	%age
Trade Media	11,282.56	80.98%	8,204.79	87.52%	7,697.53	96.94%
Exclusive Media	2,649.82	19.02%	1,170.30	12.48%	243.27	3.06%
<b>Total</b>	<b>13,932.39</b>	<b>100.00%</b>	<b>9,375.09</b>	<b>100.00%</b>	<b>7,940.80</b>	<b>100.00%</b>

Note: The percentages listed above are calculated as a percentage of Revenue from Operations based on restated financial statements.

A summary of Exclusive Media Rights over the years that the company had are as follows:

As of Date of RHP	Fiscal 2025	Fiscal 2024	Fiscal 2023
<ul style="list-style-type: none"> <li>1,100 E-Buses</li> <li>150 Buses</li> <li>13,575 Cabs</li> <li>87 EV Charging Stations</li> <li>7 Uniplole Clusture</li> <li>36 Public Toilets</li> </ul>	<ul style="list-style-type: none"> <li>1,100 E-Buses</li> <li>150 Buses</li> <li>600 Cabs</li> <li>87 EV Charging Stations</li> </ul>	<ul style="list-style-type: none"> <li>1,100 E-Buses</li> <li>400 Cabs</li> </ul>	<ul style="list-style-type: none"> <li>350 E-Buses</li> <li>400 Cabs</li> </ul>

As we could see that the share of exclusive media in total revenue from operations has been on rising trend. This is also the reason for company's increase in margins as exclusive media gives higher margins. Also, the company's plan to increase the share from Exclusive Media would reduce the trade payable days and increase requirement for deposits and guarantees. To expand its presence in the exclusive media space, our company has secured confirmations through letters of intent and signed agreements with private entities, along with new orders

from government bodies. As part of these arrangements, the company will provide a retention deposit of ₹1,794.60 lakhs and advance rent of ₹1,791.12 lakhs. These commitments cover assets such as 18,550 cabs, unipoles, toilets, EV charging stations, and more. The amounts will be furnished either as security deposits or through bank guarantees.

#### Global economic outlook

Global growth, which had remained stable yet underwhelming through 2024 was projected to remain se in the January 2025, has now been revised downward amid a sharp deterioration in global trade dynamics. However, the landscape has shifted dramatically following the announcement and implementation of sweeping US tariffs on April 2, 2025, and retaliatory measures by trading partners. These actions have pushed global tariff rates to levels not seen in a century, introducing significant uncertainty and a negative shock to global economic activity. As a result, a new “reference forecast” incorporating information as of April 4 projects global growth to decline to 2.8 percent in 2025 and 3.0 percent in 2026 representing a cumulative downgrade of 0.8 percentage point and falling well below the 2000–2019 historical average of 3.7 percent. Growth in advanced economies is expected to slow to 1.4 percent in 2025, with the US decelerating to 1.8 percent 0.9 percentage point below previous projections due to greater policy uncertainty and softening demand. The euro area is forecast to grow by 0.8 percent, while emerging market and developing economies are projected to grow at 3.7 percent in 2025 and 3.9 percent in 2026, with significant downgrades for economies most impacted by recent trade actions, such as China. Inflation is projected to moderate more slowly than anticipated, reaching 4.3 percent in 2025 and 3.6 percent in 2026, reflecting persistent inflationary pressures in advanced economies.

Downside risks have intensified considerably, as escalating trade tensions, elevated policy uncertainty, and limited fiscal and monetary buffers threaten to further weaken global economic resilience. Rapidly shifting policy stances and deteriorating investor sentiment may trigger further asset repricing, currency volatility, and capital flow disruptions, particularly in economies already experiencing debt stress. There is growing concern about potential instability in the international monetary system, while demographic trends such as aging populations and a shrinking foreign labor force could constrain medium-term growth and strain fiscal sustainability. The lingering effects of the recent cost-of-living crisis, coupled with subdued growth prospects and constrained development assistance, may exacerbate social unrest and deepen challenges for low-income economies. In response, global policymakers must act with clarity and coordination. Restoring a stable and predictable trade environment, facilitating debt restructuring, and addressing shared structural challenges are essential.

**Figure ES.1. US Effective Tariff Rates on All Imports (Percent)**

Sources: US Bureau of the Census, *Historical Statistics of the United States, 1789-1945*; US International Trade Commission; and IMF staff calculations.

Note: The Jan. 20-Apr. 1 tariffs in 2025 include 20 percent tariffs on China; 25 percent tariffs on steel and aluminum; 25 percent tariffs on Mexico and Canada; and a 10 percent tariff on Canadian energy imports. A United States-Mexico-Canada Agreement (USMCA) carve-out is assumed to halve the effective tariff increase for Canada and Mexico. The April 2 tariffs include auto sector tariffs and country-specific tariffs, applying exemptions provided in Annex II of the Executive Order per IMF staff judgment. The April 9 tariffs include an increase in the tariffs on China to 145 percent and a reduction in other country-specific tariffs to 10 percent. It also includes exemptions on some electronic products announced on April 11. GATT = General Agreement on Tariffs and Trade.

Domestically, countries must focus on correcting imbalances, rebuilding policy buffers, and implementing structural reforms in labor, product, and financial markets to enhance resilience and potential output. Central banks should remain focused on price and financial stability, adjusting policies with precision in the face of more complex trade-offs, while targeted foreign exchange interventions and macroprudential tools may be necessary to mitigate emerging vulnerabilities.

## Global Prospects and Policies Summary

The analysis explores key trends and uncertainties shaping the global economy as 2025 approaches, focusing on the effects of policy changes, trade tensions, and demographic shifts across different regions. The global economic landscape is increasingly complex and uncertain, leading to a downward revision of the global growth forecast to 2.8% for 2025. This adjustment reflects weaker consumption growth and rising policy uncertainty. The analysis highlights regional disparities, with advanced economies expected to grow more slowly, while emerging markets may sustain relatively higher growth under favourable conditions.

**Figure 1.1. Global Inflation Trends**  
(Percent, year over year)

**Policy Uncertainty Tests Global Resilience:** The global economy is facing heightened policy uncertainty, primarily driven by increased trade tensions and tariff escalations. These disruptions have led to volatility in financial markets and cautious investment behavior.

**The Outlook: A Range of Possibilities:** Economic growth projections are clouded by multiple potential scenarios, depending on trade policy shifts and monetary responses. While some economies are expected to weather uncertainty better than others, downward risks prevail.

**Risks to the Outlook: Tilted to the Downside:** The primary risks to economic stability include persistent inflationary pressures, geopolitical tensions, and financial market fragility. Trade fragmentation and supply chain adjustments contribute to economic vulnerabilities.

**Policies: Navigating Uncertainty and Enhancing Preparedness:** Governments and central banks face the challenge of balancing inflation control with growth stabilization. Strategic fiscal planning and targeted monetary interventions are necessary to ease macroeconomic trade-offs.

**Commodity Special Feature: Market Developments and AI Impact:** Commodity markets are undergoing significant shifts due to evolving global demand patterns. The increasing reliance on artificial intelligence-driven industries is altering energy consumption and market dynamics.

## The Rise of the Silver Economy: Global Implications of Population Aging

The analysis explores the global economic impact of population aging, highlighting both challenges and opportunities. As life expectancy rises and fertility rates fall, the share of older adults is increasing, slowing population and output growth while straining public finances. However, healthier aging trend-such as better physical and cognitive health in older individuals-are enabling longer, more productive working lives.

Despite this, global GDP growth is still expected to decline, with aging accounting for most of the slowdown. Targeted policies, including raising retirement ages, supporting lifelong health and skills, and closing gender gaps,

**Figure 2.1. Global Population Aging**  
(Percent, left axis; years, right axis)

could help offset these effects and boost growth. For low-income countries, stronger institutions and financial access are key to leveraging remaining demographic advantages. While not all impacts are covered, the analysis emphasizes that smart policies can turn the challenges of aging into economic opportunities.

**Uneven Pace of Global Population Aging:** The global population is aging at different rates across regions, with advanced economies experiencing a faster demographic shift compared to emerging markets. Fertility rates are declining, and life expectancy is increasing, leading to a higher proportion of older individuals.

**Healthy Aging and Implications for Labor Markets:** Improved healthcare and lifestyle changes have contributed to healthier aging, allowing older individuals to remain active in the workforce. Cognitive health and physical well-being play a crucial role in determining labor market participation among aging populations.

**Economic Implications of Global Population Aging:** The aging population presents economic challenges, including slower growth, increased fiscal pressures, and shifts in consumption patterns. However, healthier aging trends offer opportunities to extend working lives and enhance productivity.

## JOURNEYS AND JUNCTIONS: SPILLOVERS FROM MIGRATION AND REFUGEE POLICIES

The analysis focuses on the rising global flows of legal migrants and refugees, particularly toward emerging market and developing economies, which now host a significant share—75% of refugees and 40% of migrants. Driven by geopolitical shocks, natural disasters, and policy changes in destination countries, these flows have become a key aspect of globalization, with notable economic implications.

Stricter migration policies in some countries can divert inflows to others, increasing their migrant population by about 10% over five years and boosting output by around 0.2%. However, the overall economic impact is often modest due to resource strain and skills mismatches, especially for refugees. Positive effects are greater when incoming individuals have skills that complement local labor markets.

Better integration policies, particularly in emerging economies, can enhance economic benefits. Investments in public infrastructure and private sector development are essential to manage pressures. Model-based analysis shows that shifts in migration and refugee policies can redistribute flows and modestly affect GDP, labor markets, and wages across regions.

The findings emphasize that while migration policy changes alone can't address root causes like forced displacement, improved domestic integration efforts and international cooperation can help manage flows more effectively and spread economic impacts more equitably.

**Migration and Refugee Patterns and Policies:** The global movement of migrants and refugees has increased significantly, with emerging market and developing economies hosting the majority of displaced populations. Geopolitical shocks and natural disasters have contributed to these trends.

The shaded area corresponds to the period after the global financial crisis, which coincides with the period in which globalization started to slow down. FDI = foreign direct investment; ODA = official development assistance.

**Figure 3.2. Migration Perceptions and Preferences**

**A Primer on Spillovers from Migration and Refugee Policy Changes:** Migration and refugee policies in one country can have significant spillover effects on other economies. Stricter policies in one destination often lead to increased inflows in alternative locations.

**Estimating Spillovers from Migration and Refugee Policy Changes:** Empirical analysis suggests that tighter migration policies in one country can increase inflows to another by 10% over five years. The economic impact varies depending on labor market integration and skill mismatches.

**Modeling Spillovers from Migration and Refugee Policy Changes:** Economic models indicate that migration inflows can boost output in receiving economies, but challenges arise in matching skills with labor market needs.

## INDIAN ECONOMY

### Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at Rs. 33.10 lakh crore (US\$ 3.8 trillion) with growth rate of 9.9%, compared to Rs. 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY25. In FY25, India's exports stood at Rs. 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

### Market size

Real GDP for FY25 is estimated at Rs. 187.95 lakh crores (US\$ 2.2 trillion) with growth rate of 6.5%, compared to Rs. 176.51 lakh crore (US\$ 2.06 trillion) for FY24. As on Jan 2025, there are 118 unicorn startups in India, with a combined valuation of over Rs. 3.0 lakh crore (US\$ 354 billion). The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

## Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy.

In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below:

- The HSBC India Manufacturing PMI increased to 58.4 in April 2025, up from 58.1 in March 2025, based on preliminary estimates. This rise signifies improved operating conditions and represents the most rapid growth pace observed in the past year. Contributing factors include a notable surge in new export orders, which experienced their most significant increase in over fifteen years, alongside a faster expansion in overall new business activity.
- In Q1 CY25, private equity (PE) and venture capital (VC) investments stood at Rs. 1,16,861 crore (US\$ 13.7 billion) across 284 deals.
- India saw a robust 10.35% growth in passengers carried by domestic airlines at 431.98 lakh in FY25, from 391.46 lakh in FY24, according to the Directorate General of Civil Aviation (DGCA).
- As of April 18, 2025, India's foreign exchange reserves stood at Rs. 58,57,537 crore (US\$ 686.70 billion).
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- The gross GST (Goods and Services Tax) revenue collection stood at Rs. 1.84 lakh crore (US\$ 21.57 billion) in February 2025.
- Between April 2000–December 2024, cumulative FDI equity inflows to India stood at Rs. 89.88 lakh crore (US\$ 1.05 trillion).
- In February 2025, the overall IIP (Index of Industrial Production) stood at 151.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 141.9, 148.6 and 194.0, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- Foreign Institutional Investors (FII) inflows in FY25 were close to Rs. 1.27 lakh crore (US\$ 14.89 billion), while Domestic Institutional Investors (DII) bought Rs. 6.00 lakh crore (US\$ 70.34 billion) in the same period.

- India's wheat procurement rose 34% YoY, reaching 22.36 MT as of April 28, 2025, with target of 31 MT in sight. Strong MSP, bonuses, and robust crop output boost sales to government agencies, ensuring food security and potential for open market intervention.

## Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Aatmanirbhar Bharat' and 'Local goes Global'.
- To enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

## Road Ahead

India's economy grew by 6.2% in Q3 FY25. Signs of recovery are now visible, with growth expected to rise to 7.6% in Q4 FY25—indicating a possible turnaround in the coming months. India's comparatively strong position

in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10.0 % to Rs. 11.21 lakh crore (US\$ 131.42 billion) over Rs. 10.18 lakh crore (US\$ 119.34 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total exports of goods and services rose by 5.5% to a record Rs. 69.8 lakh crore (US\$ 820.9 billion) in FY25, compared to Rs. 65.8 lakh crore (US\$ 773.0 billion) in FY24. With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Advertising is the industry that won't sit still. Over the past three decades, the industry has morphed again and again. Brands once reached people primarily through mass media like TV, print, and radio, gaining precious few consumer insights. The internet changed all that with targeted and interactive campaigns online. More recently, Retail Media Networks (RMNs) helped retailers enter the media business. Leveraging shopper and transaction data, RMNs help brands reach prospective customers through their websites, apps, and even off-site channels. Commerce media networks (CMNs) are the latest shift poised for tremendous growth. CMNs are advertising ecosystems that have expanded beyond retail.

For industries as varied as financial services, travel, and even healthcare, CMNs integrate ads directly into customer experience across multiple online and offline channels.

Commerce media in the United States is expected to grow to more than \$100 billion by 2027, representing more than 20 percent of advertising budgets.

Projected evolution of the US commerce media market, 2023-27

Many CMNs use first-party data from transactions, customer behaviors, and loyalty programs to deliver targeted ads, boosting relevance and sales. CMNs are also experiencing extraordinary growth, with a CAGR from 2023 to 2027 expected to be more than 21 percent, outpacing display, connected television, and even search. Based on our triangulated market forecast, we project that by 2027, the US commerce media market will reach more than \$100 billion.

CMNs have gained momentum in recent years as a key source of new revenue and consumer engagement. According to market research company eMarketer, commerce media has already surpassed connected TV in ad spending and is quickly approaching spending levels for traditional TV.<sup>2</sup> Media networks provide access to rich audience insights and privacy-safe targeting opportunities unavailable through traditional media.

**More than half of advertisers plan to increase spending on commerce media networks over the next year.**

As a result, budgets allocated to CMNs are large and continue to grow. Fifty-five percent of our survey respondents say they will increase their overall CMN budget in the next 12 months. As media networks have proliferated, the market has become increasingly competitive. As mentioned earlier, nonretail companies are launching media networks as part of a broader trend to expand revenue streams, unlock more value from customer data, and build more direct relationships with advertisers. While established RMNs like Amazon Ads, Walmart Connect, and Kroger Precision Marketing have been around for over five years, newer players from nonretail sectors are beginning to make their mark. For example, in recent years, several new CMNs have been launched by companies such as Uber (with UberMedia), United Airlines (with Kinective Media by United Airlines), DoorDash (with DoorDash Marketing), and PayPal (with PayPal Ads).

As a result, this surge in CMNs provides brands with a wider array of e-commerce advertising options than ever before. Nearly half of the advertisers we surveyed say they will likely increase spending across travel, last-mile, and finance media networks. This expansion of scope extends to the buy side as well, with more advertisers from a broader range of sectors looking to leverage CMNs to reach highly targeted audiences. When broken down by verticals, 60 percent of CPG advertisers and 70 percent of travel advertisers say they will increase their spending.

**How commerce media network (CMN) spend is expected to change over the next 12 months, by industry, % of advertisers**

As commerce media rapidly expands into new industries, savvy advertisers are branching out, tapping into a greater number and variety of media networks to capture audiences across multiple touchpoints. This wide-net approach helps brands meet consumers wherever they are in the purchase journey. Our research indicates that 53 percent of advertisers use five or more CMNs, up from 38 percent in 2023.

Advertising accounting for 55% of total E&M industry growth over the coming five years, it is poised to become a more important part of companies' business models—even for those that had previously avoided ad revenues. For strategic reasons, all participants in the E&M industry need to become more proficient at selling ads—and more effective at making them generate value for all participants in the ecosystem. Changes to the way businesses approach the ad business will be seen in three key areas: The monetisation of data will fuel more sophisticated advertising models. There will be closer connections between the discovery of products and services and their purchase and consumption. And companies will have to understand how global privacy regulations impact growth.

Despite headwinds including limited ad budgets, discussion of regulation, and continuing geopolitical and economic uncertainties, internet advertising grew 10.1% in 2023, adding US\$52.5 billion in new revenues. After rising at a 9.5% CAGR through 2028, internet advertising will account for 77.1% of total ad spending. And of the ten Outlook components projected to exhibit the fastest growth over the forecast period, most fall under the umbrella of internet advertising. The fastest-growing is retail/other display internet advertising revenue, which consists mostly of non-video display ads on retailers' apps and websites. This pool is growing especially fast in more mature e-commerce markets like the US, where it will rise at a CAGR of 21.6% to US\$31.7 billion in 2028, from US\$11.9 billion in 2023.

## ADVERTISING MARKET TRENDS:

### Digital transformation and online presence

The shift towards online platforms is fundamentally changing how businesses reach and engage with their audiences. As consumers are spending more time online, advertisers are recognizing the need to establish a strong online presence to remain competitive. This factor is characterized by the increasing significance of digital advertising channels, including social media, search engine marketing, and display advertising. Advertisers are leveraging the power of data analytics to target specific demographics and personalize their messaging. Additionally, e-commerce platforms are becoming integral to advertising strategies, driving sales directly from online ads. The increasing investment in digital advertising, with budgets reallocated from traditional media to digital channels, is propelling the growth of the market. Advertisers are embracing the dynamic and data-rich nature of digital advertising, making it a pivotal factor driving the evolution of the advertising market.

Rising utilization of artificial intelligence (AI) Artificial intelligence (AI) is used as a transformative medium in the advertising industry. AI-powered solutions are revolutionizing how advertisers create, deliver, and

optimize campaigns. Machine learning (ML) algorithms enable precise audience targeting and real-time bidding, optimizing ad placements for maximum impact and efficiency. AI-driven tools also enhance ad creatives through content generation, A/B testing, and dynamic ad variations, improving engagement and conversion rates. Moreover, AI-powered analytics provide advertisers with actionable insights, enabling data-driven decision-making and campaign refinements. The ability of AI to process vast amounts of data quickly and accurately positions it as a key driver of advertising effectiveness and efficiency. Advertisers who harness AI technologies are gaining a competitive edge, making AI a dominant factor shaping the advertising market.

### **Shift toward sustainable advertising practices**

Sustainability is becoming a prominent factor driving the advertising market. In addition, the growing consumer demand for ethical and environmentally responsible brands is offering a favourable market outlook. Advertisers are increasingly adopting sustainability as a core element of their messaging and business practices. Sustainable advertising involves showcasing eco-friendly products, promoting ethical sourcing, and transparent supply chains. Brands that prioritize sustainability resonate with environment conscious consumers, fostering brand loyalty and positive public perception. This factor aligns with broader societal trends, which encourage businesses to contribute to a better world. As consumers are becoming more discerning, advertisers who integrate sustainability into their campaigns not only address consumer preferences but also contribute to a sustainable future.

### **Data-driven marketing and personalization**

Data-driven marketing and personalization is offering lucrative growth opportunities to industry investors. In addition, the collection and analysis of consumer data is revolutionizing how advertisers create and deliver campaigns. This factor is characterized by the relentless pursuit of personalization and relevance in advertising efforts. Advertisers are collecting vast amounts of data from various sources, including online behaviour, social media interactions, and purchase history, to gain deep insights into consumer preferences and behaviour. These insights enable the creation of highly targeted and personalized ad campaigns. Personalization not only enhances consumer engagement but also drives higher conversion rates and return on investment (ROI). Advertisers can tailor their messaging, offers, and creative content to resonate with specific audience segments, maximizing the impact of their advertising spend. Furthermore, the rise of marketing automation and customer relationship management (CRM) systems empowers advertisers to automate personalized marketing campaigns at scale. As consumers are increasingly expecting tailored experiences, there is a rise in the demand for data-driven marketing and personalization around the world.

### **A tale of regional growth**

The leading region is not a monolith. Within Asia Pacific, total video games and esports revenue in Indonesia is projected to rise at a CAGR of 16.0% through 2028, which makes it the third-fastest-growing video games market (tied with Pakistan). The Indonesian Government is strongly supporting the industry's development in the country, working to help it resolve challenges in areas such as funding, talent, infrastructure and regulation. In Japan, where video gaming is hugely popular across all age groups, gaming benefits from its close association with the traditional Japanese anime content that is gaining a growing global audience.

As the gaming sector grows, investments in new products, modern technologies and new business models will increase. Nintendo is likely to release the next generation of its popular Switch console in 2025. Appeal to younger demographics, companies are focusing on more compelling collaborative, social game play. And in February 2024, Disney and Epic announced a deal to work together to create an ecosystem that would

envelop Fortnite and the worlds of Pixar, Marvel, and Star Wars.

### **Advertising spending worldwide 2025, by region**

The source forecast that, in 2025, advertising spending in the United States and Canada alone will surpass 342 billion U.S. dollars and account for over 40 percent of the global ad expenditure. The Asia-Pacific (APAC) region and Western Europe will follow with estimated ad spends of about 246 billion and 154 billion dollars, respectively. Most world regions' ad expenditures were projected to expand between 2024 and 2026.

### **Ad corporations' revenues by region**

Some of the world's largest ad media holdings obtain most of their gains in the U.S. or North America. In 2024, Omnicom Group Inc.'s revenue in the U.S., Canada, and Puerto Rico surpassed 8.6 billion dollars – more than in all other markets combined. Similarly, that year, the revenue of the Interpublic Group (IPG) in the U.S. alone exceeded 5.9 billion dollars, while all other regions collectively generated little more than half of that value.

### **World regions' top brands**

Powerful advertisers contribute to ever-higher ad expenditures worldwide. South Korean Samsung and German T-Mobile emerged as the most valuable brands in the APAC and European regions in 2025, each estimated at dozens of billions of dollars. Silicon Valley's darling Apple topped the ranking as the most valuable brand in the Americas at over half a billion dollars. According to another source, Apple's global brand value surpassed one trillion dollars in 2024.

## Growth drivers of media and entertainment sector in India

### Income factor driving growth

- Apart from the impact of rising income, widening of the consumer base will also be aided by the expansion of the middle-class, increasing urbanisation and changing lifestyles.
- The entertainment industry will also benefit from a continued rise in the propensity to spend among individuals. Empirical evidences point to the fact that decreasing dependency ratio leads to higher discretionary spending on entertainment.
- Traditionally, only advertising has been a key source of revenue for the M&E industry, but off late, revenue from subscription and value added services has also contributed significantly. With consumers willing to pay for content and extra services, the subscription segment is going to play an important role in the post-digitisation era.
- Rising per capita incomes have also led to the significant growth of ticketed events, with music concerts, comedy performances, sports and other entertainment events all growing in 2023.
- Brand extensions by large Indian companies and international brand launches, all of which require the reach of TV, as India moves towards becoming one of the top three economies in the world (India's per capita income is expected to grow from approximately US\$ 2,500 in 2022 to US\$ 3,000 by 2025 which will keep driving consumption and grow the middle class significantly).

## India's Influencer market

According to the India Influencer Marketing Report 2025, the country now boasts over 40.6 lakh influencers—a 322% rise since 2020—spanning nano to mega categories. Consumers increasingly rely on influencers not just for product discovery, but for decision-making and action, with 69% acknowledging their role in shaping final purchase choices. This growth is mirrored by an industry now valued at ₹3,600 crore, with a projected 25% growth in 2025.

The report highlights how brands are adopting full-funnel influencer strategies, preferring long-term partnerships over transactional collaborations, and investing in niche micro-influencers for more authentic, targeted engagement.

Platforms like Instagram and YouTube remain central to campaign execution, offering monetization tools and content formats that drive commerce and credibility. As regulatory frameworks tighten and tech-driven platforms gain investor interest, India's influencer ecosystem is maturing—marked by performance-focused outcomes, strategic alignment, and a growing emphasis on trust and storytelling.

## Decoding the Influencer Economy

Offering an overview of the broader ecosystem, the report kicks off by outlining how, in the early 2000s, influence was shaped by personalities in glossy newspapers, guiding trends in fashion, social scenes, and lifestyle. Today, that influence has moved to digital platforms, where modern influencers thrive through diverse content and creativity. The era has evolved into a dynamic digital ecosystem.

Influencer marketing has since become a key brand strategy, fueled by strategic collaborations, industry shifts, and technological progress, leading to the rapid growth of the creator economy. This ecosystem continues to expand in scope and sophistication year after year.

***59% of social media users follow between 1 and 5 influencers, 18% follow 6 to 10, and 13% follow more than 20. These followership patterns are driven not just by product discovery and general information but also by a growing interest in influencer recommendations and associated promotional offers.***

***63% of consumers turn to influencer content for product-related information. This trend is consistent across demographics—62% of female respondents, 64% of Gen Z users, 62% of NCCS A households, and 59% of users in large metros rely on influencers for credible insights, bridging the gap between brand messaging and consumer understanding.***

## India's influencer marketing ecosystem: Platforms

Meta-owned platforms and YouTube continue to serve as the bedrock of India's influencer marketing ecosystem. According to the report, 65% of Facebook followers, 61% of Instagram followers, and 54% of YouTube subscribers follow influencers, making these platforms integral to campaign execution.

This dominance is further reinforced by continuous feature innovations aimed at deepening user engagement and enabling monetization for creators. Instagram, for instance, has introduced features like Subscriptions, which allow creators to offer exclusive content to paying followers, and Partnership Content, which lets branded collaborations be promoted via ads. The Shopping feature, already successful in other regions, is also gaining traction.

On YouTube, Super Thanks enables fans to donate to creators for regular videos, while Channel Memberships, Super Chats, and Super Stickers offer exclusive perks and live-stream interactivity.

### India's influencer marketing ecosystem: Influencers categories

The influencer ecosystem is also becoming more diversified and segmented. While fashion (23%), sports (22%), and food (20%) influencers still dominate in terms of share and traction, niche categories such as gaming, sustainability, and financial education have experienced rapid growth. The report notes that as brands seek more targeted engagement, 51% of marketers surveyed expressed intent to collaborate with niche micro-influencers in 2025—indicating a move toward more community-driven, interest-based influence.

## What are the biggest challenges facing the marketing and advertising industry today?

Navigating the Modern Marketing and Advertising Landscape: Challenges and Solutions. In the ever-evolving world of marketing and advertising, staying ahead of the curve is no easy task. The industry has undergone dramatic transformations in recent years, driven by technological advancements, changing consumer behaviours, and the rise of social media. In this article, we will explore some of the biggest challenges facing the marketing and advertising industry today and discuss potential solutions to overcome them.

### A World of Possibilities

Source: PwC's Global Entertainment & Media Outlook 2024–2028, Omdia

The US, representing more than one-third of global spending in 2023, remains the world's biggest E&M market for the combined advertising and consumer spending markets by a wide margin. But this scale brings with it maturity and hence relatively slower growth, which is projected to run at a 4.3% CAGR through 2028—behind the global rate of 4.6%.

Among the larger markets showing rapid growth, the clear standouts are Indonesia and India, followed by China, at a 7.1% CAGR. By 2028, China's advertising and consumer spending revenues (US\$362.5 billion) will be less than half of those in the US (US\$808.4 billion). Each of these territories has its own distinctive market dynamics. India will be the world's fastest-growing OTT video-streaming market over the forecast period, serving its vast, diverse and widely dispersed population—many of whom are obsessed with sports content in general, and cricket in particular: Reliance's Jio Cinema app attracted a record 32 million viewers for the 2023 Indian Premier League (IPL) final between Chennai Super Kings and Gujarat Titans. And China's continued strong growth means it's steadily closing the gap on the US in terms of market size, although tight government regulation can make investing there more complex than in other territories.

**Technological Integration:** Integration of advanced technologies like artificial intelligence (AI), augmented reality (AR), and virtual reality (VR) into content creation and delivery is critical. Media companies must invest in tech-savvy talent and infrastructure to enhance user experiences and stay competitive in the digital age.

**Economic Uncertainty:** Economic fluctuations and market volatility impact advertising spends and consumer disposable income, influencing media consumption patterns. Adapting to economic cycles and maintaining cost-efficiency are crucial for sustained profitability and growth.

**Talent Acquisition and Retention:** The demand for skilled professionals in digital media, content creation, and technology outstrips supply. Attracting and retaining talent with expertise in digital platforms, analytics, and audience engagement is essential for innovation and competitiveness.

**Global Competition:** Intensifying global competition from digital platforms and streaming services necessitates strategic alliances, content partnerships, and differentiated offerings to retain market share and audience loyalty amidst a crowded digital landscape.

## **MEDIA UNDERWRITING: ACQUISITION OF ADVERTISEMENT RIGHTS**

Our business model for providing advertising services is dependent on securing accessible advertising space across various media platforms such as vehicles, hoarding sites, newspapers, charging stations, and digital screens. The acquisition of advertising rights follows two distinct models:

- 1. Trade media:** This model involves purchasing advertising space from other advertising companies or agencies as needed. In exchange, these third-party providers charge a fixed amount for the duration of time the ad space is used. This approach makes the advertising space relatively costly.
- 2. Exclusive media:** Under this model, we acquire advertising rights directly from media owners in advance. This includes agreements with bus owners, cab operators, and through tender processes, resulting in a fixed monthly rental charge. The exclusive media model allows us to eliminate the intermediary costs, providing a more cost-effective and efficient means of securing advertising spaces.

Over the years, our approach has transitioned from the trade media model to the more efficient and cost-effective exclusive media model. This shift has enabled us to acquire advertising rights, spots, spaces, and sites through direct agreements with media owners or through competitive tender processes.

We believe that ongoing technological advancements will be crucial in managing our pan-India operations effectively, ensuring strict operational and fiscal controls, and continuously improving our customer service levels. At present, our company manually monitors campaigns, plans media, and manages inventory.

The integration of advanced technology will help our company automate manual tasks, provide real-time insights, optimize resource allocation, and enhance decision-making. This will not only improve operational efficiencies but also enable us to respond more swiftly to market dynamics, reduce costs, and deliver a higher level of service to our clients. By leveraging technology, we aim to strengthen our operational framework, ensuring long-term growth and sustainability.

## 3. Setting up an in-house printing facility

Our company intends to establish an in-house printing facility. Currently, we rely on third-party vendors for the printing of advertising materials, as we do not have internal resources and infrastructure dedicated to this function. As an integrated advertising agency, we provide media and advertising services across various outdoor platforms, including creative design and brand-building solutions for our clients. To support these services, we outsource the printing of banners, brochures, and other promotional materials. However, to enhance operational efficiency and reduce service costs, we plan to bring this function in-house. For more information regarding the same, please refer to the chapter titled “object of the issue” on page 117 of the Red Herring Prospectus.

## 4. To Secure Long Term Media Rights

Our main requirement for advertisement in the transit media, outdoor media, electronic media, and print media is dependent on the accessibility of ad space within each specific media, such as Vehicles, hoarding sites, newspapers, Charging stations and digital screens. Our company has adopted a strategic approach to acquiring media rights and spaces for outdoor advertising and transit media. Over the years, our approach has evolved from a trade media to a more cost-effective exclusive media.

**Trade media:** This model involves purchasing advertising space from other advertising companies or agencies as needed. In exchange, these third-party providers charge a fixed amount for the duration of time the ad space is used. This approach makes the advertising space relatively costly.

**Exclusive media:** Under this model, we acquire advertising rights directly from media owners in advance. This includes agreements with bus owners, cab operators, and through tender processes, resulting in a fixed monthly rental charge. The exclusive media model allows us to eliminate the intermediary costs, providing a more cost-effective and efficient means of securing advertising spaces.

For more information regarding trade media and exclusive media, please refer to page 184 of the Red Herring Prospectus.

Our company procures the rights, spots, spaces, or sites through exclusive agreements with media owners, or tender processes from relevant publication houses. Presently, as of the date of the Red Herring Prospectus, we are actively exploring strategies to adapt to fluctuations in pricing and availability of ad spaces/sites. This includes ongoing negotiations with media agencies for long-term agreements and exploring alternative advertising avenues. We have agreements for the advertisement rights for transit media advertisement i.e., Bus branding, cab branding, air and water branding with the following parties for specific durations.

Additionally, our company have advertising rights on EV Charging Stations which are secured from two channels, some of them are secured by our company on its own while some are obtained through an agreement with Cash UR Drive Electric Vehicles Private Limited. This will secure us with advertising rights and strengthen our market position in terms of accessibility of ad space.

Wherever there is a variation of more than 25% between the two reporting periods, an explanation has been provided.

Ratios	31 March 2025	31 March 2024	Variation (%)	Reason for variance if more than 25%
(a) Current Ratio -Times	1.58	0.98	60.79%	The increase in current ratio is due to higher trade receivables and short-term advances, along with a reduction in trade payables, indicating improved working capital position.
(b) Debt-Equity Ratio - Times	0.00	0.02	-83.00%	The debt-equity ratio has improved due to an increase in equity and reduction in borrowings, reflecting strengthened capital structure and lower reliance on external debt
(c) Debt Service Coverage Ratio - Times	58.31	2.42	-2314.13%	The improvement in DSCR is mainly due to higher operating profits and lower debt obligations, indicating better capacity to service debt from operational earnings.
(d) Return on Equity Ratio- Percentage	0.44	0.49	-8.51%	-
(e) Inventory Turnover Ratio - Times	2.00	1.15	73.99%	The increase indicates that inventory is moving faster than before, possibly due to improved sales efficiency or leaner inventory practices during the year.

(f) Trade Receivables Turnover Ratio- Times	3.82	2.72	40.46%	The rise reflects better collection efficiency or tighter credit terms offered to customers, leading to quicker realization of receivables.
(g) Trade Payables Turnover Ratio -Times	2.22	1.37	61.94%	The sharp increase suggests faster settlement of dues to suppliers, which could indicate improved liquidity or renegotiated payment terms.

(f) Trade Receivables Turnover Ratio- Times	2.72	3.57	-23.80%	-
(g) Trade Payables Turnover Ratio -Times	1.37	2.03	-32.59%	The difference is due to the restatement of trade payables during FY 23-24, which has impacted the ratio

**a) Cash Ur Drive Marketing Private Limited Vs. Tripmart International Private Limited**

**Case No:** RFA 58/2021

**Court:** Delhi High Court

**Case type:** Regular First Appeal

The Appellant has preferred an appeal under Section 96 of Code of Civil Procedure, 1908, against the impugned judgment dated July 31, 2020, in CS No. 207468/2016, issued by Sh. Sanjay Sharma Ld.ADJ-05, South-East District, Saket Court, New Delhi.

**Facts of the Case:** The appellant, a provider of branding and promotion services, has lodged an appeal against the impugned judgment dated July 31, 2020, in CS No. 207468/2016, issued by Sh. Sanjay Sharma Ld.ADJ-05, South-East District, Saket Court, New Delhi. The suit was instigated for the recovery of Rs.6,80,000/- along with pendent-lite and future interest at 12% p.a. against the respondent. The respondent had engaged the appellant for promotion at Delhi Airport Terminals, under a purchase order for promotion on 200 Indigo XL Cars at Rs.2,300/- per cab per month for 2 months, with an advance payment of Rs.10,000/-. Despite the appellant invoicing for the promotional services provided, the respondent has neglected payment despite repeated demands. The issues framed encompass the entitlement for the recovery of the suit amount and the other relief sought. The appellant presented its authorized representative and director as witnesses, substantiating with various documents as evidence.

Through its managing director, the appellant presented evidence, including email correspondences and a copy of the advertisement on Cars. The grounds for appeal raise several key points: firstly, the contested provision of services by the appellant; secondly, the omission of mentioning full and final payment by the respondent; thirdly, the failure to acknowledge email correspondence indicating non-payment and the necessity to continue promotional services; fourthly, the dismissal of the suit based on the non consideration of the appellant's issued invoices and reliance on the purchase order; and lastly, the disregard of email evidence and admissions made by the respondent during cross-examination. These grounds collectively advocate for a revaluation of the case, arguing that the evidence and circumstances warrant a different conclusion than that reached in the initial judgment.

**Amount Involved:** Rs. 6,80,000/-

Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by Individual Investor through intermediaries with the objective to reduce the time duration from public issue closure to listing from Six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a. Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual applicant, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be

six Working Days.

- b. Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.
- c. Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023, and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). All SCSBs offering the facility of making applications in public issues are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed Axis Bank Limited as the Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Individual Investors applying for minimum application size into the UPI mechanism.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to Rs. 5,00,000, shall use UPI. ### **Illustration of the Book Building and Price Discovery Process:**

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

<b>Bid Quantity</b>	<b>Bid Amount (₹)</b>	<b>Cumulative Quantity</b>	<b>Subscription</b>
<b>500</b>	24	500	16.67%
<b>1,000</b>	23	1,500	50.00%
<b>1,500</b>	22	3,000	100.00%
<b>2,000</b>	21	5,000	166.67%
<b>2,500</b>	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
