Total borrowings have increased from ₹978.12 lakhs in fiscal 2023 to ₹2,251.37 lakhs for the period ended September 30, 2025. This was primarily due to increase in working capital requirement of the company as a result of flexible credit scheme offered by the company in fiscal 2023, fiscal 2024 and fiscal 2025. However, from fiscal 2025 company has been very selective in giving the credit scheme to customers.

The Company recognizes income across four stages: Stimulation, Egg Pick-Up, Embryo Creation, and Embryo Transfer. In line with this, the Company recognizes 75% of the total income up to the Embryo Creation stage.

However, under the Company's credit scheme, only 20% of the total revenue (Average Rs 2 lakhs per case) is collected from patients up to the Embryo Creation stage, with the remaining amount collected at the time of Embryo Transfer. The time gap between Embryo Creation and Embryo Transfer results in an increase in trade receivables.

If these were to fully materialize or materialize at a higher than we expect, it may materially and adversely impact our business, results of operations and financial condition. However, our promoter i.e. Dr. Manika Khanna, has

given an undertaking through a letter dated September 29, 2025, stating that in case if this liability arises, she will infuse the funds by way of unsecured Debt/Equity to meet the shortfall amount not being met by the Company.

For further details on contingent liability, please see section titled “*Restated Consolidated Financial Information –Note no. 39 - Contingent Liability*” on page 266. Further, we cannot assure you that we will not incur similar or increased levels of contingent liabilities in the future.

2. **The Company is engaged in the business of providing healthcare services mainly rendering various fertility treatments such as In Vitro Fertilization (IVF), intrauterine insemination (IUI), intracytoplasmic sperm injection (ICSI), Egg Freezing, laser assisted embryo implantation amongst others and is subject to various operational, reputational, medical and legal risks associated with the operations of healthcare services. An inability to provide quality healthcare catering to the needs of the customers could adversely affect the reputation, business prospects and financial performance of the Company.**

The fertility care industry includes several operational, reputational, medical and legal risks. Healthcare quality is measured by factors such as expertise of doctors, quality of medical care and support provided by doctors and staff, waiting times and ease of access to doctors, nurses and pharmacists, and the overall inpatient and outpatient experience with the Company. The methods of providing fertility treatments are evolving based on medical advancements and this requires the Company to keep up with such advancements by upgrading their technology and expertise. If the Company is unable to provide high quality services to the customers, fails to maintain a high level of customer satisfaction, or its practice experiences a high rate of mortality, medical complications or medical malpractice claims, the brand or reputation of the Company could be damaged. Any damage to the reputation and/or brand of the Company caused by any of the foregoing factors could have a material adverse effect on its ability to attract new and repeat customers and, as a result, adversely affect its business, financial condition, results of operations and prospects.

From time to time, the Company may be subject to complaints from the customers, or be involved in litigation alleging, among other things, medical negligence by the doctors and other healthcare professionals and quality and cost of healthcare services offered. Complaints may be filed against the doctors and show cause notices may be issued, or inquiries may be initiated by regulatory or adjudicating authorities with respect to the treatment and other services provided to its patients by the Company. In addition, the Company may be liable for the medical negligence of the doctors and other healthcare professionals of the Company. An adverse outcome in such proceedings could lead to the suspension or removal of the doctors from the register of medical practitioners or have financial consequences for the Company and the doctors and/or expose the Company or the doctors to criminal or other liability.

A complaint was filed by one of our patients and is currently pending before the Hon’ble District Consumer Disputed Redressal Commission (East), Saini Enclave, Karkardooma, Delhi, as mentioned under the chapter titled “Outstanding Litigation and Material Developments” on page 288 of the RHP. Further, a complaint was filed against Gaudium IVF and Gynae Solutions, the proprietor firm of our Promoter, Dr. Manika Khanna, which has been acquired by our Company. The complaint was against an advertisement issued by Gaudium IVF and Gynae Solution, which was in violation of the Drugs and Magic Remedies Act and the Drugs and Cosmetics Rule. The complaint was heard by the Delhi Medical Council through its Disciplinary Committee and an Order dated March 21, 2024 was passed in which a direction was given stating that our Promoter, Dr. Manika Khanna must not indulge in unprofessional practices in the future for self-advertisement which was in contravention of Regulation 6.1.1 of Indian Medical Council (Professional Conduct, Etiquette and Ethics), Regulations, 2002.

We may also be subject to complaints related to product negligence and product liability for medical devices or pharmaceuticals the Gaudium International Private Limited sells. Medical products that we sell, or use could become subject to contamination, tampering, mislabeling or other damage due to reasons such as inappropriate storage conditions. In addition, errors in any form, including in the dispensing and packaging of pharmaceuticals could lead to serious injury, illness or even death. Product liability claims may be asserted against us with respect to any of the products or pharmaceuticals and the treatment services the Company sell. There have been no past instances of contamination, tampering, mislabeling, or damage to medical products, nor any issues related to improper storage, dispensing, packaging, or handling that could cause serious injury, illness or even death. Product liability claims may be asserted against us with respect to any of the products or pharmaceuticals that we

sell.

The Company may face inquiries or investigations from regulatory authorities, which could impact its operations. The outcomes of these legal matters are uncertain, and they could materially affect the Company's business, financial position, and cash flows in both the short and long term. Despite its strong defense against claims and lawsuits, the Company may still incur substantial damages or settlements, exceeding any insurance recoveries. These challenges could harm the Company's reputation and goodwill, increase expenses and insurance premiums. Additionally, the Company may need to take on debt to cover any liabilities resulting from these issues.

The existence of any such claims may harm the professional standing and market reputation of the Company and/or that of the doctors and medical professionals involved in the Company. While the Company seeks to mitigate against such risks by striving to deliver healthcare by establishing IVF centers with advanced medical infrastructure with medical equipment and technology as the well as employ highly skilled and experienced healthcare professionals to offer quality medical services to customers, there is no assurance that the Company will be successful in doing so. See “*Outstanding Litigation and Material Developments*” and — “*Internal Risks*” on pages 319 and 30, respectively.

- 3. The Company is highly dependent on doctors, nurses and other healthcare professionals and the business will be impacted significantly if the Company is unable to attract / retain such professionals. The attrition rate of the employees during the period ended September 30, 2025, Fiscal 2025, Fiscal 2024 and Fiscal 2023 was 31%, 63%, 51% and 51%. Further, the Professional and Consultation fees paid to doctors as a percentage of our total expenses were 6.08% 8.28%, 12.23% and 13.78%, for the period ended September 30, 2025 and for Fiscal 2025, Fiscals 2024 and Fiscal 2023.**

Performance and growth strategy of the Company in this industry depends on the ability to attract and retain experienced doctors, embryologists, gynecologist, nurses and other healthcare professionals in a highly competitive industry. The Company compete with other healthcare providers, including other single-specialty hospitals in the same industry or multi-specialty hospitals, fertility clinics, to attract and retain doctors and embryologists from a limited pool of candidates. The key factors that doctors consider for their place of employment include the reputation of the centers, the quality of the facilities, the ability to attract customers, research and teaching opportunities, and compensation. The Company may not compare favorably with other healthcare providers on one or more of these factors.

The Company also needs to identify, attract and retain other healthcare professionals, such as nurses, outsourced laboratory technicians, pediatricians, nutritionists, and pharmacists, to support the services provided at the centers. The limited supply of healthcare professionals may cause salaries and wages to rise which would lead to an increase in costs to recruit and retain these healthcare professionals. If the Company fails to attract or retain medical personnel as required, the Company may not be able to maintain the quality of its services, which may adversely impact revenue and reputation of the Company.

The following table sets forth the information on the number of doctors, nurses and other healthcare professionals that have been employed by the Company for the period ended September 30, 2025 and their total average experience at each center:

The Company may, as a result, be unable to effectively utilize their time and expertise in providing services to the customers. These arrangements may also give rise to conflicts of interest, including how these doctors allocate their time and other resources between the centers and other clinics or hospitals at which they work. Such conflicts may prevent them from providing a high quality of service at the IVF centers.

The following table sets forth certain information in relation to the attrition rate of full-time doctors, nurses and other healthcare professionals for the periods indicated:

Further, we cannot assure you that we will receive similar terms in our related party transactions in the future. While that all such related party transactions that we have entered in past are legitimate business transactions and were conducted on an arm's length basis and company is complying with Companies act, 2013 and other applicable laws, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Any further transactions with our related parties could involve conflicts of interest. Further, we cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on business and financial results, including because of potential conflicts of interest or otherwise.

The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework including specific compliance requirements such as obtaining prior approval from the audit committee, board of directors and shareholders for certain related party transactions. All of our related party transactions of our Company shall be conducted in compliance with the applicable accounting standards, provisions of Companies Act, 2013, as amended, provisions under the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, and other applicable law as applicable. However, we cannot assure you that in the future related party transactions, individually or in the aggregate, will not have an adverse effect on our business, financial condition, results of operations, cash flows and prospects, including as a result of potential conflicts of interest or otherwise. For more information regarding our related party transactions, see "*Restated Consolidated Financial Information– Note – 42 - Related Party Disclosure*" on page 251.

5. We are dependent on limited embryologists and the loss of or our inability to attract or retain such personnels could adversely affect our business, financial condition and results of operations.

We have seven centers across India, with embryo transfer (ET) procedures performed at seven locations. As at September 30, 2025, our Company's operations are dependent on the expertise of five embryologists, each capable of managing up to 120 cycles per month. The Company manages logistical challenges by scheduling cases in planned batches, enabling efficient deployment of embryologists across locations without operational disruption. This limited staffing may restrict our ability to rapidly adopt and implement advancements in embryology technologies and specialized procedures. If our embryologists' skill sets do not evolve with industry standards, we may risk technological loss, loss of competitiveness, and a potential decline in patient volume. Furthermore, the lack of personnel with diverse and specialized skill sets may impede our ability to introduce new and beneficial procedures. Our reliance on these five key personnel exposes us to significant operational risks. The Mumbai, Patna and Bangalore centers have one dedicated embryologist each, while the Delhi center has two embryologists; one of these embryologists travels to the Ludhiana and Srinagar centers to carry out cycles in batches. The loss of even one embryologist could materially disrupt our service delivery. Recruiting and retaining qualified embryologists is highly competitive, and we may face challenges in attracting or retaining suitable replacements in a timely manner. Any such disruption could lead to operational inefficiencies, delays in patient treatment, and substantial financial losses.

Further, the attrition rate in relation to the embryologist during the period ended September 30, 2025 and in Fiscal 2025, Fiscal 2024 and Fiscal 2023 was NIL

The table below presents information regarding the expenses paid to the four embryologists for period ended September 30, 2025, Fiscal 2025, Fiscal 2024 and Fiscal 2023:

Period	Amount (In Rs. lakhs)
Period Ended September 30, 2025	31.83
Fiscal 2025	48.52
Fiscal 2024	55.61
Fiscal 2023	54.66

6. The business of the Company depends on the strength of the brand and reputation of the Company. Failure to maintain and enhance the brand and reputation, and any negative publicity and allegations in the media against the Company, even if untrue, may adversely affect the brand, reputation and trust in, services of the Company, which could result in a material adverse impact on business, financial condition, results of operations and prospects of the Company.

The Company's brand and reputation are critical to the success of the Company. Many factors, some of which are beyond the control of the Company, are important to maintain and enhance its brand and may negatively impact its brand and reputation if not properly managed, such as its ability to:

- maintain a bespoke and quality customer experience as customer preferences evolve and as the Company intends to expand presence in existing and Indian markets and cities;
- effectively control the quality of service in the centers, maintain clinical excellence and to monitor their performance as the Company continues to expand its network;
- increase brand awareness among existing and potential customers through various means of marketing and promotional activities, and maintain the reputation of the Company through word-of-mouth;
- adopt new technologies, or adapt to emerging industry standards in order to maintain the customer experience; and
- maintain and renew existing accreditations or to apply for additional accreditations as the Company expand its network.

Regardless of their validity, negative publicity arising from such adverse claims against the Company may adversely impact the number of prospective mothers visiting our healthcare facilities and the revenue therefrom. Despite the efforts to manage and supervise healthcare professionals in the IVF centers of the Company, they may fail to meet the requirements and their contractual obligations with the Company for reasons beyond the control of the Company. They may misrepresent their qualifications, may not possess the permits or qualifications required by the relevant laws and regulations at all times, or they may fail to meet other regulatory requirements for their operations. The Company could also be the subject to complaints from customers who are dissatisfied with the quality and cost of the services. The Company may not have complete control over the actions of its healthcare professionals. Its brand and reputation may be adversely impacted if healthcare professionals of the Company engage in medical malpractice or receive complaints from customers, violate internal protocols of the Company, government laws or regulations, commit fraud or misappropriate funds, harm a customer or mishandle personal healthcare information in breach of its internal protocols, in addition to any impact that such development would have on the business, financial conditions, results of operations and prospects of the Company.

The following table depicts the expenses incurred by us on Advertisement (Brand Promotion) as a percentage of our total expenses during period ended September 30, 2025 and for Fiscals 2023, 2024 and 2025:

(₹in lakhs)

Particulars	Period ended September 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
Advertisement	314.72	584.89	570.14	329.69
Percentage of Advertisement	9.55%	12.84%	18.09%	12.71%
Total Expenses	3,296.68	4,553.59	3,152.15	2,594.78

Further, brand promotion efforts of the Company may fail to effectively promote the brand or generate additional revenue. Failure to maintain and enhance the brand and reputation of the Company may materially and adversely affect the level of market recognition of, and trust in, the services of the Company. This could materially and adversely affect business, financial condition and results of operations and prospects of the Company.

7. The Company may face challenges in further expanding operations in cities where the Company currently operate in or in other cities that the Company intend to commence operations, which could have an adverse effect on the business prospects and future financial performance.

With a PAN-India presence, the Company operates in 30+ locations, which comprises 7 hubs and 28 spokes. The registered office of the Company is located in one of its centers in B-1/51, Janakpuri, New Delhi, India, 110058. The Company have been growing and expanding its hubs and spokes since the Company established its first IVF center in Janakpuri, Delhi in 2015. The Company continues to follow a growth strategy of increasing the density of its centers in a particular city or region, as well as strategically expand into metros and cities which have high growth potential to expand its operations in various parts of India.

While the Company conducts necessary due diligence, research and assessments for our expansion plans, the Company may face risks with respect to commencement of operations in new cities in which the Company has no prior operating experience and therefore is less familiar with local socio-economic conditions, culture and customer expectations. Factors such as labour availability and supply chain, floods, natural disasters and such acts of nature can result in delays in establishment of its centers. As a result, understanding the demands of and marketing to these new communities require additional attention from its management and costs, and the Company cannot assure you that these new centers will perform the well in the future. If the Company is unable to identify suitable sites, facilities, medical equipment, healthcare professionals and personnel for reasons beyond its control, or are unable to enter into necessary arrangements at commercially acceptable terms, its growth strategy may be adversely impacted.

The Company may also face difficulty or delays in obtaining necessary regulatory approvals for its centers in a timely manner. The Company may receive lower demand for its services in these new markets than anticipated. In addition, competitors may already have established operations in such cities and regions and have stronger brand recall than us in these markets, and the Company may find it difficult to attract customers in such new cities and regions. The Company may not be able to successfully manage the risks of such an expansion, which could have a material adverse effect on the business, financial condition, results of operations and cash flows.

8. Our Company has experienced negative cash flows in the past. We cannot assure that business will achieve positive cash flow and would not continue to incur losses going forward.

We have experienced negative cash flows from investing activities during period ended September 30, 2025 and in Fiscals 2025, Fiscal 2024 and Fiscal 2023, negative cash flow from financing activities in Fiscal 2024 and a net decrease in cash and cash equivalents during period ended September 30, 2025 and in Fiscal 2025 and Fiscal 2024. Our cash flow during period ended September 30, 2025 and for Fiscals 2025, 2024 and 2023 are set forth in the table below:

(₹ in lakhs)				
Particulars	Period ended September 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
Net Cash Flow Generated from Operating Activities	235.56	871.76	344.06	2,385.34
Net Cash Flow from Investing Activities	(544.12)	(1,517.42)	(540.16)	(1,562.68)
Net Cash Flow from Financing Activities	248.92	181.66	(124.11)	525.45
Net Increase/(Decrease) In Cash and Cash Equivalents	(59.63)	(464.00)	(320.21)	1,348.11

In fiscal 2023, Net Cash Flow Generated from Investing Activities was negative to the extent of ₹1,562.68 lakhs primarily due to increase in Purchase of Property, Plant and Equipment and Intangible Assets including ROU by ₹1,525.64 lakhs. In fiscal 2024, Net Cash Flow Generated from Investing Activities was negative to the extent of ₹540.16 lakhs primarily due to increase in Purchase of Property, Plant and Equipment and Intangible Assets including ROU by ₹278.66 lakhs. Also, in fiscal 2024, Net Cash Flow from Financing Activities was negative to ₹124.11 lakhs, primarily due to dividend payment of ₹635.00 lakhs. In fiscal 2025, Net Cash Flow Generated from Investing Activities was negative to the extent of ₹1,517.42 lakhs primarily on account of Purchase of Property, Plant and Equipment and Intangible Assets including ROU assets of ₹887.84 lakhs, investments in non-

current investments of ₹500.00 lakhs. For the period ending September 30, 2025, Net Cash Flow Generated from Investing Activities was negative to the extent of ₹544.12 lakhs, primarily on account of Purchase of Property, Plant and Equipment and Intangible Assets including ROU to the extent of ₹567.36 lakhs which was adjusted for sale of investment of ₹20.00 lakhs and interest received amounting to ₹3.24 lakhs.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans, meet enhanced working capital requirements and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations.

We cannot assure you that our net cash flows will be positive in the future. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected. For further details, see “Restated Consolidated Financial Information” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Significant Factors Affecting our Financial Condition and Results of Operations” on pages 225 and 282, respectively.

9. The failure to identify, understand and adapt to rapidly evolving technological advancements related to our medical equipment and technology could adversely affect our business prospects and financial performance.

The Company uses state of the art and expensive medical equipment such as cryo storage tanks, incubators, microscopes, laminar flow hoods, centrifuges, in its centres to provide its services. With evolving scientific research, there may be technological advancements and developments in the equipment used in the field in which services are provided by the Company. The technology, devices and equipment used in IVF centres are fast and constantly evolving and, as a result, manufacturers and distributors continue to offer new and upgraded products to healthcare providers such as the Company on an ongoing basis. As industry standards evolve, the Company may be required to enhance and develop its internal processes, procedures and training, as well as medical equipment, from time to time, in order to comply with the standards required for operating in this industry, and in order to maintain the accreditations that its healthcare facilities have received. To provide its customers with the best care and compete effectively, the Company must continually assess its technology and equipment needs. In particular, its specialty facilities require continuous upgrades and new technological advancements may render its existing equipment obsolete, and cost constraints may impact its ability to access latest technologically advanced equipment. Consequently, its reputation as a quality healthcare provider could suffer.

Furthermore, as industry standards evolve, the Company may be required to enhance and develop the internal processes, procedures and training, as well as equipment, to comply with such standards and maintain the accreditations that the healthcare facilities have received. There is no assurance that the Company will have sufficient funds to continually invest in such equipment and facilities or access to the latest technology on a timely basis, or at all, or that its prevailing systems may not be sufficiently robust to capture or adapt to the latest changes and updates. While the Company seek to mitigate against such risks by keeping abreast of and evaluating the latest medical equipment and upgrading its medical equipment, there is no assurance that the Company will be successful in doing so. In the event that the Company cannot keep up to date with the current trends and needs of the healthcare industry, its facilities may lose their competitiveness and market share, which may adversely affect its revenue, and have a material adverse impact on its business, financial condition, results of operations and prospects.

10. For our business, we rely heavily on our Promoters namely, Dr. Manika Khanna and Dr. Peeyush Khanna. Our business performance may have an adverse effect by their departure or by our failure to recruit or keep them.

Our Promoters Namely Dr. Manika Khanna and Dr. Peeyush Khanna are in charge of our day-to-day operations, strategy, and business expansion. They are also responsible for the execution of our business plan. The Promoters have been a part of our Company since its inception and it may be challenging to find a suitable replacement for

one or more of our Promoter Directors in a timely and economical manner if they are unable to continue in their current roles. Our ability to keep the Promoter Directors on board cannot be guaranteed. Our ability to grow, execute our strategy, build brand awareness, raise capital, make strategic decisions, and oversee the day-to-day operations of our business could be hampered by the loss of our Promoter Directors or our inability to find suitable replacements. Further, there could be a materially negative effect on our operations, financial position, cash flows, and business.

The following table provides the details of the professional fees, reimbursements and perquisites provided to Dr. Manika Khanna and Dr. Peeyush Khanna, our Promoters, for the period ended September 30, 2025 and for fiscal 2025, 2024 and 2023:

Financially, GAAT development costs are recorded as Intangible Assets Under Development, amounting to ₹738.50 lakhs as of March 31, 2025. During Fiscal 2024, ₹250.00 lakhs was paid in advance to Dr. Manika Khanna, as professional fees related to GAAT's development. The Advance of ₹250.00 lakhs was given to Dr. Manika Khanna in Fiscal 2024 as a professional fee for development of GAAT Module which is presented as Advance to Supplier in Fiscal 2024 financials. Further, in Fiscal 2025 it is accounted as development cost of Intangible Asset Under Development.

Further, our Promoter namely Dr. Manika Khanna and the Company have entered into a Deed of Assignment dated February 17, 2023 for assignment of 61 trademarks in our favour, out of which, there are 3 trademarks are pending for registration. The Company has also filed the requisite application with the Trademarks Registry to bring on record the assignment of such trademarks in favour of the Company which applications are pending in respect of some of the assigned trademarks. For further details, see "Government and Other Statutory Approvals" on page 444 of this Red Herring Prospectus.

11. The Company has a IVF success rates of 58.74%, 58.23%, 58.03% and 57.01% for the period ended September 30, 2025 and in Fiscal 2025, Fiscal 2024 and Fiscal 2023, respectively, however, the success rates in In-Vitro Fertilization (IVF) procedures may fluctuate and are subject to factors beyond direct control, which could negatively impact reputation and business.

The success of IVF services is a critical factor in attracting and retaining patients. However, IVF outcomes are inherently complex and influenced by a multitude of variables, many of which are beyond control. While the industry as a whole strives to maintain high standards of care and employs advanced technologies, there can be no guarantee of a consistent success rate.

Please see below our success rate for the services provided by us during period ended September 30, 2025 and in Fiscals 2025, 2024 and 2023 are set forth in the table below:

Particulars	Period ended September 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
No. of Embryo Transfers	509	1,913	1,482	2,345
No. of Success	299	1,114	860	1,337
Success Rates	58.74%	58.23%	58.03%	57.01%

Furthermore, industry-wide success rates for IVF vary, and comparing our performance to broader industry averages may not accurately reflect our specific patient demographics or treatment protocols. There is no assurance that our success rate will remain at or above any specific level. Investors should be aware of the inherent uncertainties and risks associated with IVF success rates and their potential impact on our business.

12. If the Company fails to achieve favourable pricing from its suppliers or vendors, fail to negotiate favourable terms with its doctors, or fail to pass on any cost increases to the customers, its business, financial condition and profitability may be adversely impacted. Our key expenses as a percentage of our total expenses were 55.29%, 69.76%, 51.00% and 62.71%, during period ended September 30, 2025 and for Fiscal 2025, Fiscals 2024 and Fiscal 2023.

The Company operates in an industry with high expenses including professional fees to consultant doctors, embryologists, gynecologists, electricity, housekeeping expenses, information technology, medical consumables, cost of pharmaceuticals and medical equipment. Profitability of the Company is also affected by the ability to achieve favourable pricing from its suppliers, including through negotiations for supplier rebates. As these supplier negotiations are continuous and reflect the ongoing competitive environment, the variability in timing and amount of incremental supplier discounts and rebates can affect profitability of the Company. Further, such increased costs may negatively impact ability to deliver quality care to the customers of the Company at competitive prices.

Some of our key expenses include professional fees to consultant doctors, cost of materials consumed, employee benefits expense and housekeeping expenses. The following table depicts our key expenses as a percentage of our total expenses during period ended September 30, 2025 and for Fiscal 2023, 2024, and 2025:

If the Company is unable to adopt alternative means to deliver value to its customers or fails to pass on cost increases to the customers, the profitability could be materially and adversely affected and the objective to deliver the fertility treatment at affordable price could also become meaningless. If the Company experiences an increase in costs, or if the Company is not able to grow its revenue in line with its costs, its profitability would be impacted, particularly during a period of economic decline or in the event of a reduction in its revenues, which could have a material adverse effect on the business, financial condition, cash flows and results of operations.

13. Failure or malfunction of our medical or other equipment, could adversely affect our ability to conduct our operations.

The operations of the Company are subject to risks inherent in the use of advanced medical equipment for the fertility treatment. Any failure, accident, defects, faulty maintenance or repair, or improper use or lack of timely servicing of equipment, or inability to maintain appropriate temperature and customer environment at the Company's facilities, either beyond the control or otherwise, may result in an injury to the employees or customers or other individuals of the Company. While there have been no past instance of malfunction or breakdown of the equipment which has impact on the business of the company, however, any significant malfunction or breakdown of the equipment also may entail significant repair and maintenance costs and cause disruptions in the operations of the Company. While the Company follows stringent protocols relating to maintenance and use of the medical equipment, any injury resulting from malfunction or improper usage of such equipment due to defects, accident or improper maintenance or operation could subject the Company to significant liability claims.

The Company has entered into an agreement with a third party to provide maintenance services for hospital medical equipment at the Janakpuri IVF center/hospital. As part of this agreement, the third party is required to conduct four service visits to inspect the equipment, address any issues that can be repaired, and provide reports, along with other agreed terms and conditions. Additionally, the Company has also entered into an Annual Maintenance Contract (AMC) with the third party for maintenance of its IVF lab equipment at its IVF centers in Janakpuri, Mumbai, Bangalore, Patna, Ludhiana, and Srinagar. The AMC includes four service visits, along with other agreed terms and conditions. While we seek to mitigate risks associated with equipment by conducting regular checks and service visits through the third party for medical equipment at various centres of the Company, along with an Annual Maintenance Contract (AMC) for lab equipment, to ensure the equipment is properly adjusted and functioning correctly and maintain the accuracy and reliability of all tests and procedures, there is no assurance that we will be successful in doing so. For further information, please see "Our Business – Our Infrastructure & Facilities" on page 163. Any inability to respond to failures or malfunctions of our medical or other equipment in a timely manner or at an acceptable cost could result in harm to our employees and customers, the inability to provide services, or damage to our reputation, any of which could have a material adverse impact on our business, financial condition, results of operations and prospects.

Due to the high costs of such medical equipment, the Company may face the difficulty of the unavailability of spare parts and servicing, or experience equipment obsolescence. Therefore, even though the Company generally obtain warranties for its equipment, if such equipment is damaged or breaks down, its ability to provide services to its customers may be impaired, which could adversely affect its business.

14. Our Company, one of its Promoter/Directors are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.

There are outstanding legal proceedings involving our Company and Promoters which are pending at various levels of adjudication before various courts, tribunals and other authorities. *The aforementioned amounts have been recorded to the extent they are quantifiable.

Further, except as disclosed in “Outstanding Litigation and Material Developments” on page 319 of this Red Herring Prospectus. We do not have any other pending litigations against our Company, Promoter, Director, Subsidiaries, Group Company.

If any of any future litigations are decided against our Company, we may need to make provisions in our financial statements that could increase our expenses and current liabilities. In this regard, we may be subject to penalties and regulatory actions including the suspension of our business. There can be no assurance that these litigations will be decided in favour of our Company or in the favour of our Promoter or Directors and such proceedings may divert management time and attention and consume financial resources in their defence or prosecution. An adverse outcome in any of these proceedings may affect our reputation, standing and future business, and could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

15. Proposed New IVF Centres of the Company may experience delays in construction, development and completion. Any delays in New IVF Center setup, due to unforeseen events, may lead to cost overruns and implementation delays, impacting our business growth.

Our Company is proposing to expand its IVF services by proposing to establish new IVF centers across India, aimed at enhancing accessibility to reproductive care in underserved regions. The Company proposes to utilize ₹ 5,000.00 lakhs with potential for higher costs due to delays or unforeseen circumstances for establishing 10, 8 and 1 new IVF centers in Fiscal 2027, Fiscal 2028 and Fiscal 2029, respectively. As on date the company has not finalized the premises for these proposed IVF centers. For further details, please refer to the chapter titled “Objects of the Offer” on page 98 of this Red Herring Prospectus.

While we have procured quotations from vendors in relation to the capital expenditure to support our expanding operations, we have not placed any firm orders for any of them. Such quotations are valid as on date of this Red Herring Prospectus and may be subject to revisions, and other commercial and technical factors. We cannot assure that we will be able to undertake such capital expenditure at the costs indicated by such quotations or that there will not be cost escalations over and above the contingencies proposed to be funded out of the Net Proceeds. Further, the actual amount and timing of our future capital requirements may differ from our estimates as a result of, among other things, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes and technological changes. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or in the event the vendors are not able to provide the equipment and services in a timely manner, or at all, we may encounter time and cost overruns. Moreover, any variation in the objects of the offer including amount, time and period of utilization would need shareholders' approval.

Further, if we are unable to procure or avail services from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the similar kind of services, which satisfy our requirements at acceptable prices. Alternatively, if we in future get better quotes from the alternate vendors then we may buy from such alternate vendors. Delays in obtaining necessary governmental approvals can hinder timely launches. Additionally, external factors like labour shortages and material costs may disrupt construction timelines, impacting our operational capacity. Our inability to procure the equipment, labour, raw material and services at acceptable prices or in a timely manner or obtain the requisite approvals in a timely manner, may result in an increase in capital expenditure, extension or variation in the proposed schedule of implementation and deployment of the Net Proceeds, thereby resulting in an adverse effect on our business, prospects and results of operations.

16. Our proposed expansion for setting up of 19 new centers could rely on leased or agreement-based premises, and termination of these arrangements could materially and adversely affect our business and future growth.

Our Company proposes an increase in its presence across India by establishing 19 new IVF centers which would help to improve accessibility of IVF treatments for the clients. Our Company has mapped its current and future expansion plan across India in order to ensure that IVF services are accessible to a wider population, particularly in underserved regions, while optimizing resource management. Our Company proposes to establish 19 new IVF centers, with a proposed investment of Rs. 2,631.58 lakhs during Fiscal 2026, Rs. 2,105.26 lakhs during Fiscal 2027 and Rs. 263.16 lakhs during Fiscal 2028 from the proceeds of the fresh issue, however, our Company has

not currently identified the premises to establish its 19 new IVF centers. The premises that could be used by our Company may be taken on lease or leave and license basis. Periodic renewals of such lease or leave and license may increase our costs, since it is subject to rent escalation. Our failure to pay fixed annual lease or leave and license charges per annum for our registered office and IVF centers could adversely affect our operations. Any termination of the relevant lease or leave and license agreement in connection with such property or our failure to pay annual lease rental, the same could lead to increased costs, loss of investment and reduced profitability and may adversely affect our growth prospects.

In the event if we would be required to vacate the premises, we would be required to make alternative arrangements for new premises and other infrastructure and facilities. We cannot assure that the new arrangements will be on terms that are commercially favorable to us. If we are required to relocate our business operations, we may suffer a disruption in our operations, loss of business opportunities or would have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

Further, the Company has opened seven centres since its incorporation and proposes to open 19 new IVF centres. This accelerated expansion involves risks related to execution, availability of skilled personnel, capital deployment, and timely achievement of expected patient volumes and profitability. Any adverse developments may impact the Company's business and financial performance.

17. Our dependence on the consultant Agreement with our Promoter i.e. Dr. Manika Khanna, along with variability in fees and related party risks, may adversely affect our business operations and financial performance.

The Company has entered into a consultant agreement dated March 1, 2021 with Dr. Manika Khanna, Managing Director & Promoter of the Company, for providing health services to the clients. The agreement is terminable by either party and any termination or disruption may adversely affect the Company's operations and service delivery. The consultancy fees are determined annually and are not fixed on a long-term basis, which may result in cost uncertainties. As Dr. Manika Khanna is a Managing Director, this arrangement constitutes a related party transaction and may attract increased regulatory and investor scrutiny. Any perception of conflict of interest or non-compliance with applicable regulations could impact the Company's reputation. The Company has paid consultancy fees to the Dr. Manika Khanna during the last three fiscal years and the stub period ended September 30, 2025, details of which are disclosed herein.

(₹ in lakhs)

Particulars	For the period ended September 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
Professional fees paid	90.00	180.00	180.00	138.00

Any increase in such fees or adverse regulatory observations may adversely affect the Company's financial condition and results of operations.

18. We have limited historical experience in the pharmaceutical business, with pharmacy services contributing 28.85%, 16.57%, 4.08% and 0.50% of our revenue from operations during period ended September 30, 2025 and in Fiscal 2025, 2024 and 2023, respectively. Any failure to effectively manage or expand this business could adversely affect our financial condition and results of operations

We have entered into a new line of business by acquiring Gaudium International Private Limited, which is engaged in the pharmaceutical business, pursuant to a Share Purchase Agreement dated February 2, 2023. The pharmaceutical business is subject to distinct regulatory requirements, operational risks, pricing controls, and compliance obligations, with which we have limited historical experience.

The table set forth the revenue generated from services offered by our company in the last three fiscal years;

(₹ in Lakhs)

Services offered	Period ended September 30, 2025	% of revenue from operations	Fiscal 2025	% of revenue from operations	Fiscal 2024	% of revenue from operations	Fiscal 2023	% of revenue from operations
Pharmacy	1427.99	28.85%	1,172.24	16.57%	195.20	4.08%	22.26	0.50%

Our ability to successfully integrate and scale this business depends on effective management, regulatory compliance, and realization of expected synergies. Any failure to manage the operations, comply with applicable laws, or achieve anticipated benefits from this acquisition could adversely affect our business, financial condition, and results of operations.

19. Our operating results, including EBITDA and Profit After Tax (“PAT”), have experienced fluctuations in the past and may continue to remain volatile in the future. Any decline or variability in our operating performance could adversely affect our business, financial condition, results of operations and cash flows.

Historically, Our EBITDA and Profit After Tax (“PAT”) margins have experienced fluctuations over the past three fiscal years, and we cannot assure you that our operating results will not decrease or remain volatile in the future. For instance, our EBITDA margin was 45.36% in Fiscal 2023, decreased to 40.25% in Fiscal 2024, increased to 40.48% in fiscal 205 and decreased to 38.29% for the period ended September 30, 2025. Similarly, our PAT margins 30.56%, 21.43%, 26.96% and 25.14% in Fiscals 2023, 2024, 2025 and for the period ended September 30, 2025 respectively.

Our future profitability may be adversely affected by factors such as changes in revenue recognition policies, increases in COGS, higher operating and administrative expenses, pricing, changes in input costs, and competitive intensity. Any inability to effectively manage costs or maintain revenue growth could result in further decline in margins and profitability. Consequently, fluctuations in our operating results may negatively impact investor confidence and the market price of our equity shares.

20. Our Promoters will continue to retain significant shareholding in our Company after the Offer, which will allow them to exercise influence over us.

After the completion of the Offer, our Promoters will continue to hold 71.30 % of the paid-up Equity Share capital of our Company. Further, the involvement of our Promoters in our operations, including through strategy, direction and customer relationships have been integral to our development and business and the loss of any of our Promoters may have a material adverse effect on our business and prospects.

Our Promoters will continue to exercise influence over all matters requiring shareholders’ approval, including the composition of our Board of Directors, the adoption of amendments to our constitutional documents, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, investments and capital expenditures. This concentration of ownership may also delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of our Promoters. The interests of our Promoters could conflict with our Company’s interests, your interests or the interests of our other shareholders. There is no assurance that our Promoters will act to resolve any conflicts of interest in our Company’s or your favor.

21. A pending civil litigation disclosed as a contingent liability may affect the issuer's financial position.

A civil litigation is pending against the Company, the amount involved in the litigation is below the materiality threshold prescribed under the Materiality Policy. However, the litigation has been disclosed as a contingent liability in the financial statements of the Company. While the matter is not considered material, any adverse outcome may result in financial liabilities, including outflows of cash, which could have an impact on the Company's financial position and results of operations. The disclosure of the pending civil litigation is as follows:

On May 20, 2022, Smt. Sarika Sakshi (the “**Complainant**”) had served a legal notice against our Company (the “**Legal Notice**”). The Complainant alleged that she had received wrong and insufficient treatment in relation to In-Vitro Fertilization (IVF) at Gaudium Women Hospital. Based on the Legal Notice, she had asked our Company to pay a total sum of ₹ 52.71 lakhs for mental and physical loss of Complainant with medical and legal expenses incurred.

Upon service of the Legal Notice, the Complainant had filed a complaint (bearing Case No. DC/78/CC/439/2022) against our Company before the Hon'ble District Consumer Disputes Redressal Commission, Delhi (“**Hon'ble DCDRC**”) (the “**Complaint**”) on August 6, 2022. The Complaint was filed by the Complainant under section 35 of Consumer Protection Act, 2019, based on the contentions and amounts raised in the Legal Notice.

In response to the Complaint, on March 14, 2023, our Company had filed a reply (the “**Reply**”) with the Hon'ble DCDRC seeking dismissal of the Complaint on the ground that it was baseless and misconceived. Our Company, in its Reply, also contended that the Complainant was duly counselled regarding realistic IVF success rates. Consent form acknowledging the average success rates and associated costs were executed by the Complainant and her husband, prior to the treatment. With respect to the allegation of medical negligence, Company, in its Reply had stated that it was ought to be first adjudicated by the Delhi Medical Council before being considered by the Hon'ble DCDRC. Additionally, our Company had sought recovery of ₹ 1.37 lakhs from the Complainant as a legitimate amount allegedly due her.

In response to the Reply, the Complainant had filed a rejoinder on June 02, 2023, refuting the claims made by our Company and requested the Hon'ble DCDRC to allow the Complaint in its entirety. The matter is currently pending and is scheduled to be next heard on May 14, 2026, by the Hon'ble DCDRC.

22. Our revenues are dependent on the number of new and existing patients undergoing for ovum pick-up (“OPU”), embryo transfer (“ET”) procedures and the total number of cycles performed. Any fluctuation in patient inflow, conversion of consultations into procedures, or repeat cycles by existing patients may materially impact our operating performance and financial condition.

Historically, we have experienced volatility in our average revenue per patient (“ARPP”), which is influenced by the mix of services availed, number of cycles undertaken per patient, treatment outcomes, discounting or flexible payment schemes and changes in pricing.

Below are the details of ARPP for the period September 30, 2025, Fiscal 2025, Fiscal 2024 and Fiscal 2023;

Particulars	Period ended September 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
No of ET	509	1,913	1,482	2,345
No of OPU	1,315	1,563	2,229	1,167
No of Cycle Performed	1,824	3,476	3,711	3,512
ARPP (in ₹ in Lakhs)	2.58	3.55	1.89	3.44

Such fluctuations indicate that our revenue per patient is susceptible to variations arising from both internal operational factors and external market dynamics.

Similarly, the number of cycles performed by us has also exhibited variability. We performed 3,512 cycles in Fiscal 2023, which increased to 3,711 cycles in Fiscal 2024, declined to 3,476 cycles in Fiscal 2025 and was

1,824 cycles for the period ended September 30, 2025.

There can be no assurance that our ARPP, number of cycles performed will remain stable or increase in the future. Any sustained decline in patient volumes, lower conversion rates, reduced repeat cycles, adverse clinical outcomes, increased competition, regulatory changes, or changes in patient affordability or preferences could adversely affect our revenues, profitability, cash flows and overall financial performance.

23. Failure to arrange donor, and to procure regulatory approvals and any other related permissions by the patients could adversely affect our ability to conduct surrogacy arrangement.

The surrogacy arrangement facilitated by the Company is dependent on the patient's ability to (i) secure a suitable donor; (ii) obtaining the relevant regulatory approvals from relevant authorities; and (iii) fulfilling all other legal, administrative and logistical requirements. These responsibilities are borne by the patients. However, they can become challenging and time-consuming processes with unforeseen obstacles. Any delays or failures on the patient's part, in procuring of a donor, securing of the relevant regulatory and other approvals and permissions can significantly compromise the planned surrogacy arrangement. Such issues could lead to delays, increased costs for the patient and the inability to proceed with the surrogacy arrangement altogether.

During the period ended September 30, 2025 and Fiscal 2025, 2024 and 2023, revenue generated from the surrogacy cases is as mentioned below;

(₹ in lakhs)

Patient	Period ended September 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
1	10.00	1.50	-	-
2	1.80	2.50	-	-
3	1.00	-	-	-

While the Company has no responsibilities and liabilities involved in the surrogacy process in relation to arranging the suitable donors, procurement of regulatory approvals and other requirements, for carrying out the surrogacy arrangement, delays or failures on the part of the patient to obtain relevant permissions and arrange for donors, may in turn adversely affect the business and operations of the Company.

24. We rely on centralized medical and clinical expertise for our service delivery model, and any disruption therein may adversely affect our business and financial performance

We rely on centralized medical and clinical expertise, including standardized treatment protocols, clinical governance, quality control, training, and oversight functions, to deliver consistent and effective services to our patients across our centers. This centralized model enables us to maintain uniform clinical standards, optimize resource utilization and ensure compliance with applicable medical and regulatory requirements.

Any disruption in the availability or functioning of such centralized medical and clinical expertise, whether due to attrition of key medical professionals, inability to recruit or retain qualified personnel, operational inefficiencies, technological failures, pandemics, regulatory actions or other unforeseen events, could impair our ability to deliver services in a timely and consistent manner. Such disruption may result in variations in clinical outcomes, decline in service quality, increased operational costs, patient dissatisfaction, reputational harm and potential regulatory scrutiny.

If we are unable to effectively manage and sustain our centralized medical and clinical functions, or transition to alternative arrangements in a timely manner, our business, financial condition, cash flows and results of operations may be materially and adversely affected.

25. We do not own the business premises where our centers are located. Our Registered office and our all IVF centres are located on leased premises. Any termination, or inability to renew or inability to terminate our agreements, or breach of our agreements by the counterparty, for our Registered office or IVF centres may lead to disruptions in our operations and affect our business operations.

All the premises used by our Company for our business purposes are taken on lease basis. For more details on

properties taken on lease by our Company, see “Our Business –Properties” on page 163 of this Red Herring Prospectus. If any such lease agreements under which we occupy the premises are not renewed on terms and conditions that are favourable to us, or at all, we may suffer a disruption in our operations which could have a material adverse effect on our business, financial condition and results of operations. If we do not comply with certain conditions of the lease, the lessor may terminate the lease, which could have an adverse effect on our operations and the same could lead to loss of investment and reduced profitability that may adversely affect our growth prospects. There can be no assurance that renewal of lease agreements with the owner will be entered into. While, in the past there have been no instance whereby the premises has been vacated due to factors beyond the control of the company, however, in the event of non-renewal of lease arrangements, we may be required to shift our business premises to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one. Except the registered office of the Company which is taken on lease basis from our Promoter and Director, Dr. Manika Khanna, as such there is no conflict of interest between the Company, its Promoters and Director in respect of any property leased from them.

26. Compliance with applicable safety, health and environmental regulations may be costly and adversely affect the competitive position and results of operations of the Company. Regulatory reforms in the healthcare industry and associated uncertainty may adversely affect its business, results of operations and financial condition.

The healthcare industry in India, particularly in fertility care and Assisted Reproductive Technology, is heavily regulated by numerous acts and regulations established by the Central Government. Any changes in these laws can significantly impact business operations. The Company must adhere to various statutory rules and standards, with non-compliance risking the loss of operational permissions. For details on key regulations, refer to the chapter titled “Key Industry Regulations and Policies” in the RHP.

India’s health and safety laws have tightened over time, and further increases in stringency are likely. The Bio-Medical Waste Rules, 2016 impose mandatory reporting and authorization for establishments handling Biomedical Waste. The Assisted Reproductive Technology (Regulation) Act, 2021 mandates registration for fertility clinics, imposes obligations regarding counseling and record-keeping, and establishes penalties for non-compliance. Other laws, such as the Pre-Natal Diagnostic Techniques (Prohibition of Sex Selection) Act, 1994 (“PNDT Act”), and the Medical Termination of Pregnancy Act, 1971 (“MTP Act”), aim to regulate maternity and child healthcare.

The PNDT Act specifically prohibit sex selection and regulate the use of prenatal diagnostic techniques to prevent misuse. Registration with authorities is mandatory for genetic clinics, and non-compliance can lead to penalties. Similarly, the MTP Act regulates the conditions under which pregnancy termination can occur, requiring qualified

practitioners and appropriate facilities.

Compliance with these extensive regulations incurs substantial costs and poses challenges for the Company, which must maintain full adherence at all times. While there has been no instance of any action taken or ongoing proceedings by relevant authorities during the period ended September 30, 2025 and in past three fiscal, however, Non-compliance can lead to regulatory actions, penalties, or civil and criminal proceedings, adversely affecting the Company's reputation and prospects.

Healthcare professionals are also subject to strict regulatory oversight, and failures to comply with laws or internal protocols can result in penalties or loss of licenses, further impacting the Company's operations. Additionally, labor laws govern employee relations, including minimum wage and working conditions. Non-compliance can lead to enforced shutdowns and sanctions, complicating human resource management and potentially harming the Company's financial health.

We operate under various laws and regulations that control our operations, and stricter interpretations or increased enforcement could lead to higher costs and necessary changes to maintain compliance. This may impact our business, financial condition, and results of operations. Additionally, we must adhere to employee-related regulations, including wages and working conditions, and failure to comply could result in shutdowns or sanctions, further harming our reputation and financial health.

27. Intellectual property rights are important to our business. We may be unable to protect them from being infringed by others, including our current and / or future competitors/employees which may adversely affect our business value, financial condition and results of operations.

Our Promoter Namely Dr. Manika Khanna and the Company have entered into a Deed of Assignment dated February 17, 2023 for assignment of 61 trademarks in our favour, out of which, there are 3 trademarks are pending for registration. In consideration of such assignment our Company had paid a sum of Rs. 1,025 lakhs to our Promoter, Dr. Manika Khanna for such assignment, all rights, title and interest in the assigned trademarks, which now vests with the Company. The company is not required to pay any royalty towards such assignment of trademarks. The Company has also filed the requisite application with the Trademarks Registry to bring on record the assignment of such trademarks in favour of the Company which applications are pending in respect of some of the assigned trademarks. For further details, see "Government and Other Statutory Approvals" on page 327 of this Red Herring Prospectus. Our efforts to protect our Intellectual Property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may also lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations.

Further, if we do not maintain our brand name and identity, which is a principal factor that differentiates us from our competitors, we may not be able to maintain our competitive edge in India. If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brand name is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source in India and abroad. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position in India and abroad.

Further, while we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty that we are not infringing any existing third-party intellectual property rights and we may also be susceptible to claims from third parties asserting infringement and other related claims in India and abroad.

For further details, pertaining to our intellectual property, see "Our Business" and "Government and Other Statutory Approvals" on pages 163 and 327 of this Red Herring Prospectus.

28. Operations of the Company could be impaired by failure of its third- party technology service providers.

IT systems of the Company are essential to the day-to-day clinical, administrative and procurement needs and other areas including accounting and financial reporting, billing and collecting accounts; and compliance, clinical systems, medical records and document storage, inventory management, negotiating, pricing and administering managed care contracts and supply contracts; and monitoring quality of care and collecting data on quality measures. These systems are maintained and operated by the IT team of the Company and a third-party technology service provider. The Company has engaged a third-party technology service provider for the implementation of its IT systems. As part of this engagement, the Visaccare System with OPD Management functionality has been installed. OPD Management refers to the oversight and administration of the outpatient department (OPD) within a center, encompassing processes such as appointment scheduling, billing, queue management, and other operations designed to optimize the efficiency of the OPD. Additionally, the third-party service provider also offers an Annual Maintenance Contract (AMC).

The Company has invested significantly in these resources, and its ability to continue to use these platforms will depend on ongoing license fees payable and capital expenditure which the Company may be required to incur from time to time. There has been no instance in the past, however, Business of the Company will be significantly impacted if there are failures in its IT systems, the maintenance and operation by the third-party technology service provider, or if the Company is unable to negotiate favorable terms with its external technology service provider going forward. Further, the Company may face the risk of losing or corrupting customer data due to factors beyond its control in relation to its third-party technology service providers, such as faulty transfer of data when the Company changes service providers or the lack of data backup.

Any technical failure that causes an interruption in service or availability of the its systems could adversely affect operations or delay the collection of revenue or cause interruptions in its ability to provide services to its customers. Corruption of certain information/ data could also lead to delayed or inaccurate diagnoses in the treatment of customers and could result in damage to the health of its customers. The Company and its third-party technology service provider may be subject to cyberattacks and other cybersecurity risks and threats, including computer break-ins, phishing, and social engineering, while there has been no such instance in the past, however, the Company may be subject to liability as a result of any theft or misuse of personal information stored on its systems including medical data. Although the Company have implemented network security measures, its servers are vulnerable to computer viruses, hacking, break-ins and similar disruptions from unauthorized tampering, which could result in unauthorized dissemination of sensitive information such as medical data, which could materially and adversely affect its reputation. Any breach of its confidentiality obligations to its customers, including due to data leakages or improper use of such medical information notwithstanding the safeguards that the Company have implemented, could expose us to fines, potential liabilities and legal proceedings, such as litigation or regulatory proceedings, which would adversely impact its reputation.

Compliance with new and evolving privacy and security laws, regulations and requirements may result in increased operating costs and may constrain or require the Company to alter its business model or operations, which may in turn affect business, financial condition, results of operations and prospects of the Company.

29. The industry in which the Company operates is fairly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by competitive pricing and other factors.

The healthcare services business faces a challenge in providing quality healthcare in a competitive environment and managing costs at the same time. The competition for customers among hospitals, pharmacies, clinics and other healthcare service providers in the area of maternity and childcare has intensified in recent years. In some cases, competing hospitals may be more established than some of our IVF centers. Some of our competitors may be more established and have greater financial, personnel and other resources than us, and may also enjoy greater economies of scale. They may therefore be able to provide healthcare services at a lower cost compared to us and exert pricing pressures on us. We may also need to compete with any future healthcare facilities established by our competitors in the cities or areas in which we operate. If we are unable to identify and adapt to changes in customer demands and the specific needs of the communities in which we serve, we may lose our competitive

edge over our competitors, which can adversely affect our business, results of operation and market share.

Further, we face competition from other healthcare services providers such as stand-alone ob-gyn clinics and fertility clinics. We may also face competition from international healthcare chains which have commenced providing services in India. New or existing competitors, including smaller hospitals, stand-alone clinics and other hospitals, may price their services at a significant discount to our prices, exert pricing pressure on some or all of our services and also compete with us for doctors and other medical professionals. Some of our competitors may also have plans to expand their hospital networks, which may exert further pricing and recruiting pressure on us. If we are forced to reduce the price of our services or are unable to attract customers with our value proposition, our business, revenues, profitability and market share may be adversely affected.

In addition, we compete with other hospital-based pharmacies and stand-alone pharmacies for customers. The competition we face from other healthcare services providers, stand-alone pharmacies and other firms may result in a decline in our revenues, and adversely impact our results of operation and market share.

30. The IVF industry faces structural, regulatory, and operational challenges that may affect growth. High costs, competition, and patient sensitivities could impact demand and margins. Disruptions in technology, skilled professionals, or regulations may affect business performance.

According to Infomerics Research report on the “IVF and Fertility Services Industry” dated September 25, 2025, the in-vitro fertilization (“IVF”) industry has experienced rapid growth and is gaining increasing global significance; however, it continues to face several structural and regulatory challenges that may affect its long-term growth and sustainability. The sector is highly dependent on advanced medical technology, the availability of skilled professionals and compliance with evolving ethical and legal standards.

Any disruption in technological infrastructure, shortage of trained specialists or changes in applicable regulations could lead to operational challenges and adversely impact business performance.

Additionally, the industry is characterized by rising competition, high treatment costs, and sensitivity to success rates, which may limit accessibility for a broader population and exert pressure on margins. Patients seeking fertility treatments may also be impacted by cultural stigmas and the psychological stress associated with such procedures, which could influence demand for services. Cross-border reproductive tourism further exposes patients to legal and ethical vulnerabilities, which may impact clinic operations and reputation.

Market Restraints and Impact Assessment (FY2026–FY2032)

Restraint	Impact		
	1–2 Years	3-4 Years	5-7 Years
High Cost of IVF Treatment	High	High	Medium
Lack of Regulatory Framework and Uniform Regulations	Medium	High	High
Vulnerability of Women in Cross-Border Reproductive Tourism	Medium	High	High
Cultural Stigmas	Medium	Medium	Low
Psychological Impact on Patients	Medium	High	High

(Source: Infomerics Research Report)

While these threats and challenges may materially affect our business, financial condition, results of operations, and growth prospects, no such adverse events or disruptions have occurred during the past three financial years or the stub period

31. In the event we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, including due to any default on the part of the owners of the properties we lease and manage, our business, cash flows and results of operations may be adversely affected.

Our Company has obtained various approvals required to carry on its business activities. Many of these approvals are granted for a fixed period of time and are required to be renewed from time to time. Non-renewal of the said

permits and licenses would adversely affect our operations, thereby having a material effect on our business, results of operations and financial condition.

To foster our growth, our Company may also consider entering into different jurisdictions wherein we may be required to fulfil the state-wise respective compliances, laws and regulatory norms which differ from state to state. In addition, we may need to apply for more approvals, including the renewal of approvals which may expire from time to time, and approvals in the ordinary course of business. We cannot assure you that such approvals will be issued or granted to us in a timely manner, or at all. If we fail to obtain or retain any of these approvals or licenses or renewals thereof, in a timely manner or at all, our business may be adversely affected. For instances, we have applied for registration for an ART Clinic under the Assisted Reproductive Technology (Regulation) Act, 2021; registration for (i) Genetic Clinic/Ultrasound Clinic and (ii) Genetic Counselling Center/ Genetic Laboratory/ Genetic Clinic/Ultrasound Clinic/ Imaging Centre under the provisions of Pre-Natal Diagnostic Techniques (Regulation and Prevention of Misuse) Act, 1994 and the Pre-Natal Diagnostic Techniques (Regulation and Prevention of Misuse) Rules, 1996; and (iii) registration for a Clinical Establishment under the Clinical Establishments (Registration and Regulation) Act, 2010. As per the provisions of the Acts and Rules, our Company would not be able to carry out their operations at the concerned centers situated at (i) Mumbai, Maharashtra; (ii) Bangalore, Karnataka; (iii) Patna, Bihar; and (iv) Srinagar, Jammu and Kashmir, respectively, thereby would suffer operational and financial loss. There can be no assurance that such penal actions would not be taken against the Company.

Further, the approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Furthermore, any unfavorable changes in or interpretations of existing laws, or the promulgation of new laws, governing our business and operations could require us to obtain additional licenses and approvals. Regulatory authorities could also impose notices and other orders on us if we fail to obtain any required licenses or approvals. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. For details in relation to the approvals required for our business and the status of the same, see “Government and Other Statutory Approvals” on page 327 Further, for details of certain laws and regulations applicable to our business, see “Key Regulations and Policies” on page 182.

32. Our insurance coverage may not be adequate to protect us against all potential losses, which may have a material adverse effect on our business, financial condition, cash flows and results of operations.

Our operations are subject to various risks inherent to the health care industry including IVF services and other fertility treatments. We have obtained insurance policies that are customary in our industry and provide for commercially appropriate insurance coverage for a variety of risks. Our insurance policies currently cover certain risks, including, among other, Money Insurance, Fire and Special Perils Insurance, Burglary & Robbery Insurance, Plate Glass Insurance, Neon Sign Insurance, Public Liability Insurance and Business Interruption Insurance and Building including Plinth & Foundation.

The table below shows the total amount of our insurance coverage and its percentage contribution to our tangible assets for the period ended September 30, 2025 and for the Fiscal 2025, Fiscal 2024 and Fiscal 2023 respectively:

Particulars	Period Ended September 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
Amount of insurance coverage (in ₹ lakhs)	3,832.19	3,833.87	4,604.95	4,573.20
Total Tangible asset (in ₹ lakhs)	679.75	640.90	579.09	379.08
% contribution of insurance coverage to tangible assets	563.76	598.20	795.20	1,206.39

The aggregate insured value exceeds the carrying value of Property, Plant and Equipment (PPE) as reported in the Consolidated Financial Statements. This difference arises on account of insurance coverage obtained by the Company for the Janakpuri premises, which is held on lease. Since the building is not owned by the Company, it is not capitalized under PPE;

however, the insurance premium in respect thereof is borne by the Company. Consequently, the insured value is higher than the PPE value.

There are possible losses, which we may not have insured against or covered or wherein the insurance cover in relation to the same may not be adequate. While, in the past, the Company has not suffered any losses that were not covered under the insurance policies taken by it; however, if we were to incur a serious uninsured loss or a loss that significantly exceeds the limits of our insurance policies, it could have a material adverse effect on our business, financial condition, results of operations and cash flows. For details, see “Our Business –Insurance” on page 163.

Our policies are subject to standard limitations that apply to the length of the interruption covered and the maximum amount that can be claimed. Therefore, insurance might not necessarily cover all losses incurred by us and we cannot provide any assurance that we will not incur losses or suffer claims beyond the limits of, or outside the relevant coverage of, insurance policies. We cannot assure you that the operation of our business will not be affected by any of the risks. In addition, our insurance may not provide adequate coverage in certain circumstances including losses arising due to third-party claims that are either not covered by insurance or the values of which exceed insurance limits, economic or consequential damages that are outside the scope of insurance coverage and claims that are excluded from coverage. If our arrangements for insurance are not adequate to cover claims, we may be required to make substantial payments and our results of operations, financial condition and cash flows may therefore be adversely affected. In addition, we may not be able to renew certain of our insurance policies upon their expiration, either on commercially acceptable terms or at all. Any of the above could materially harm our financial condition and future results of operations and cash flows. There can be no assurance that any claims filed will be honored fully or in a timely fashion under our insurance policies.

33. IVF Centers of the Company are susceptible to risks arising on account of fire, natural disasters or other incidents.

Any serious disruption at any of the facilities that the Company own or invest in due to fire, natural disasters or other accidents, including due to factors outside of control of the Company, could impair ability to use such facilities, among other negative effects and, accordingly, have a material adverse impact on the revenues and increase the costs and expenses of the Company. The Company store, handle and use certain chemicals, such as alcohol, sanitizers, gases, fuel and other inflammable materials in its IVF centers. In addition, any short circuit of power supply for the equipment and machines including air conditioning plants, power supplies, could result in accidents and fires that could result in injury or death to the employees, customers, and other persons present at facilities of the Company. We have not suffered any such incidents in the past but we cannot assure you that these incidents will not occur in the future. Our safeguards for prevention, detection and control of fire, as well as our insurance against damage may not adequately cover all losses or liabilities that may arise from our operations, including, but not limited to, when the loss suffered is not easily quantifiable. In addition, incidents such as these typically receive wide media coverage and, as a result, may negatively impact our reputation significantly. While we insure against certain business interruption and other risks such insurance may not adequately compensate us for all direct and indirect losses incurred as a result of natural or other disasters. Any such event may have a material adverse impact on our business, financial condition, results of operations and prospects.

34. The Company could be exposed to risks relating to the handling of personal information, including medical data.

The Company could be exposed to significant risks associated with the handling of personal information of patients. As a healthcare provider, we collect, store, and process sensitive personal data, which includes detailed medical histories, genetic information, and treatment records. Although, we have not experienced any breach of data in the past, however, any breach of this data in future, whether through cyberattacks, system failures, or unauthorized access, could lead to severe legal and financial repercussions, including hefty fines and litigation costs.

Additionally, patients may be hesitant to share their personal information if they are lack of security, which could impact our ability to attract and retain customers. As technology evolves, so do the methods used by malicious

entities to exploit vulnerabilities in our data handling processes. Thus, continuous investment in data security measures and employee training is essential, yet these costs could strain our financial resources.

35. The objects of the Offer for which the funds are being raised have not been appraised by any bank or financial institutions. Any variation in the utilization of our Net Proceeds as disclosed in this Red Herring Prospectus would be subject to certain compliance requirements, including prior Shareholders' approval.

We propose to use the Net Proceeds towards setting up of IVF centers, Repayment/pre-payment, in full or in part, of certain outstanding loans availed by our Company and for General Corporate Purposes, as set forth in “*Objects of the Offer*” on page 98. The utilization of the Gross Proceeds will be monitored by the Monitoring Agency. Our management estimates may differ from the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws, and may have an adverse impact on our business, financial condition, results of operations and cash flows. The proposed deployment of Net Proceeds has not been appraised by any bank or financial institution or other independent agency and is based on internal management estimates based on current market conditions and historic level of expenditures.

Various risks and uncertainties outlined in this section may hinder our ability to effectively use the Net Proceeds for profitable growth, potentially delaying project implementation. Increased costs could exceed management estimates, requiring additional funding that may not be secured on favorable terms. We may also encounter delays or added expenses due to regulatory approvals, technical challenges, or unforeseen circumstances. Changes in interest rates, input costs, and other operational factors could necessitate revisions to our estimates and business plans. Therefore, prospective investors should rely on our management's judgment regarding the use of Net Proceeds, as delays or inefficiencies could adversely impact our business operations and results.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Offer or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, or vary the terms of any contract referred to in this Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

36. Capital expenditure to the amount of ₹ 5,000.00 lakhs required towards the setting up of various IVF centres would be funded out of the Net Proceeds of the Offer. Hence, we have not made any alternate arrangements for the same. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

We are proposing to utilize an amount of ₹ 5,000.00 lakhs for capital expenditure towards establishment of new IVF centers from the proceeds of the Fresh Issue and as on date of this Red Herring Prospectus, we have not made any alternate arrangements for meeting our capital requirements for the said objects of the Offer. In the past, we have met our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Gross Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Offer*” beginning on page 98 of this Red Herring Prospectus.

37. Our inability to meet our obligations, including financial and other covenants under our debt financing arrangements could adversely affect our business, results of operations and financial condition.

As at September 30, 2025, our total outstanding borrowings were ₹ 2,251.37 lakhs. For further details, see “*Financial Indebtedness*” on page 280. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our business, which depends on the timely payment by our clients. If our future cash flows from operations and other capital resources become insufficient to pay our debt obligations or our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. While there have been no such instances in the three preceding Fiscals, our failure to meet our obligations under our financing agreements could have an adverse effect on our business, results of operations and financial condition. If the obligations under any of our financing agreements are accelerated, we may have to dedicate a substantial portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our business operations. Our future borrowings may also contain similar restrictive provisions.

38. There are certain defaults/ delay in payment of statutory dues by us. Any further default/ delay in payment of statutory dues may attract financial penalties from the respective government authorities and in turn may have a material adverse impact on our financial condition and cash flows.

Our Company has at times in the past made a delay in the payment of statutory dues such as provident fund, Tax Deducted at source and ESIC to relevant authorities. These delays were due to administrative and technical issues on the Portal during these periods. Following is the list of delay in payment of statutory return/dues:

There were no defaults in the payment of statutory and unpaid statutory dues of the Company as on September 30, 2025.

There are no defaults in payment of statutory dues and unpaid statutory dues of the Company as on March 31, 2024 except for the following:

(₹ in lakhs)

1	Provident Fund	0.11	-	There was Aadhaar mismatch for two employees which couldn't be linked on the Provident Fund Website. Accordingly, the Company is unable to make the payment of PF for such employees.
2	Labour Welfare Fund	0.03	0.03	The Registration under Labour Welfare Fund was obtained on September 3, 2024 and the due amount of ₹ 0.02 was paid on September 6, 2024. The excess provision of ₹ 0.01 has been reversed.

There are no instances of non-payment, default and overdue of statutory dues by the Company as on March 31, 2023. As at September 30, 2025, contingent liabilities (to the extent not provided for) as disclosed in the notes to Restated Consolidated Financial Information aggregated to ₹ 3,734.08 lakhs (excluding interest and penalties) with respect to demand received under the provisions of the Income-tax Act, 1961. There are no instances of contingent liabilities in the nature of Statutory Dues that have not been disclosed in the Restated consolidated financial information. Further, there are no instances of non-payment, default or overdue of statutory dues by the subsidiaries Gaudium International Private Limited and EKK Global Private Limited* as on September 30, 2025, 31st March 2025, 31st March 2024 and 31st March 2023.

*(EKK Global Private Limited ceased to be subsidiary w.e.f. 5th August 2025)

While our Company has paid the interest, as applicable on delays in payment of statutory dues, we cannot assure you there will be no delays in payment of statutory dues by our Company. While no actions have been initiated against our Company in relation to the abovementioned non-compliances or delays in the past, our Company cannot assure that any regulatory or statutory actions will not be initiated against our Company in relation to the said non-compliance in the future. Further, our Company cannot assure you that it will be able to adhere to all the necessary compliances, in a timely manner or at all, under various labour or tax legislations in the future. In case any regulatory actions are initiated against the company, we may face issues in the brand image & profitability of our company.

39. Any change in our statutory auditors, including resignations, may be viewed adversely by investors and regulatory authorities as it relates to continuity in financial reporting and audit quality. Such changes could lead to increased scrutiny of our financial statements and internal controls.

In the past we have had change in the statutory auditors, for instance, initially on July 23, 2024 we had appointed M/s. Brahmayya & Co. as Statutory Auditor for Fiscal 2025 and was subsequently reappointed for a period of five years at the AGM held on September 20, 2024. However, the auditor resigned on July 20, 2025, due to non-recovery of a reasonable portion of their time costs and therefore in order to fill the resulting casual vacancy, the members of the company in their meeting held on August 04, 2025 appointed S K G N & Associates LLP as the Statutory Auditor for Fiscal 2025. Further, at the AGM held on September 27, 2025, S K G N & Associates LLP was reappointed as the Statutory Auditor for a term of five years, covering Fiscal 2026 to Fiscal 2030.

While the above resignation were not on account of any disagreement on accounting principles or audit matters, however, frequent changes in our statutory auditors may create perceived uncertainty regarding our financial reporting practices. Any future resignation, delays in appointment of auditors or similar developments could increase compliance costs, divert management's attention, and adversely affect investor confidence. There can be no assurance that such events will not recur in the future, and any such occurrence could have a material adverse effect on our business, results of operations, and financial condition.

40. Our performance depends to a large extent on the efforts and abilities of our individual Promoters, Directors, Key Managerial Personnel. The loss of or diminution in the services of our individual Promoter, Directors or Key Managerial Personnel could have a material adverse effect on our business, financial condition and results of operations.

Our business is highly dependent on our Promoters, Directors and Key Managerial Personnel for setting our strategic business direction, managing the business, retaining skilled professionals, expanding our business operations, to meet business challenges, to attract, recruit and retain experienced, talented and skilled professionals.

The attrition rate in respect of our Promoters/Directors/KMPs and employees are as under:

Particulars	Period ended September 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
Promoters	0%	0%	0%	0%

Particulars	Period ended September 30, 2025	Fiscal 2025	Fiscal 2024	Fiscal 2023
Directors	0%	50%	0%	66.67%
KMPs	0%	0%	0%	0%
Total Employees	31%	63%	51%	51%

We may or may not experience similar attrition rates in the future. A significant increase in the attrition rate among skilled employees could decrease our operating efficiency and productivity and could lead to a decline in the profitability of our Company. We may also be required to increase employee compensation more rapidly than in the past to remain competitive in attracting and retaining suitable employees. the loss of the services of such persons may have an adverse effect on our business and operations. For information relating to changes in our Board of Directors and Key managerial personnel, kindly refer chapter “Our Management – Changes in our Board of Directors during the last three years and Changes in Key Managerial Personnel during the last three years on page 199 of the Red Herring Prospectus.

41. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks. Despite our internal control systems, we may be exposed to operational risks, including fraud, petty theft and embezzlement, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.

Our management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by it while taking into account the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions.

While our management would be responsible for design, implementation and maintenance of adequate internal financial controls to ensure the orderly and efficient conduct of our business, any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may adversely impact our ability to accurately report, or successfully manage, our financial risks, and to avoid fraud, each of which may have an adverse effect on our business, financial condition, results of operations and cash flows. Notwithstanding that the auditors’ report issued on the internal financial controls over financial reporting of our Company during period ended September 30, 2025 and for Fiscal 2025, Fiscals 2024 and Fiscal 2023 did not contain a qualified opinion or disclaimer of opinion, there can be no assurance that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls.

Notwithstanding the internal controls that we have in place, we may be exposed to the risk of fraud or other misconduct by employees, contractors, clients or suppliers. Fraud and other misconduct can be difficult to detect and deter. Certain instances of fraud and misconduct may go unnoticed or may only be discovered and successfully rectified after substantial delays. Even when we discover such instances of fraud or theft and pursue them to the full extent of the law or with our insurance carriers, there can be no assurance that we will recover any of the amounts involved in these cases. In addition, our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.

42. Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.

As at September 30, 2025, we had 122 employees (including 3 consultancy doctors) across our operations. For further details, see “see “Our Business –Human Resource” on page 170. While our employees are not currently

unionized, we cannot assure you that our employees will not unionize in the future. Union organizing efforts or collective bargaining negotiations could lead to work stoppage and/or slowdowns and/or strikes by our employees, which could have a material adverse effect on our business, financial condition, results of operations, cash flows and prospects. Furthermore, in the event that all or part of our employees are represented by one or more labor union, we may face higher employee costs and increased risks of work stoppages, slowdowns and/or strikes, which could have a material adverse effect on our business, financial condition, results of operations, cash flows and prospects.

Although we have not experienced any strikes or labor unrest in the past three Fiscals, we cannot assure you that we will not experience disruptions in future due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. In the event our employee relationships deteriorate, or we experience significant labor unrest, strikes and other labor action, work stoppages could occur and there could be an adverse impact on our operations. We are also subject to, and may continue to contest, regulatory claims alleging defaults in relation to employee wage payments and contributions. Any such actions could adversely affect our business, results of operations and financial condition.

We are also subject to a number of stringent labour laws that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes financial obligations on employers upon retrenchment. For further details, see, “*Key Regulations and Policies*” on page 182. If labour laws become more stringent, it may become more difficult for us to maintain flexible human resource policies, discharge employees or downsize, any of which could have a material adverse effect on our business, financial condition, results of operations, cash flows and prospects.

44. Our Directors and Promoters may enter into ventures which are in businesses similar to ours.

The interests of our Directors or Promoters may not align with the interests of our other Shareholders due to their involvement in other ventures which are in businesses similar to ours or that may compete with our business or may benefit from preferential treatments when doing business with our Company. Our Directors, or Promoters, as applicable, may, for business considerations or otherwise, in transactions with other ventures where they have

interest, cause our Company to take actions, or refrain from taking actions, in order to benefit themselves instead of our Company's interests or the interests of its other Shareholders and which may be harmful to our Company's interests or the interests of our other Shareholders, which may materially adversely impact our business, financial condition, results of operations and cash flows.

As a result, conflicts of interest may arise when we sell our solutions to such Promoter Group at lower prices, or give it any other form of preferential treatment. There can be no assurance that our Promoters or any company controlled by our Promoters will not enter into businesses similar to ours or compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations, cash flows and financial condition.

45. Our Promoters, Directors and Promoter Group hold 6,13,85,084 Equity Shares in our Company comprising 99.98% of the total issued, subscribed and paid-up equity share capital of the Company and are therefore, interested in our Company's performance in addition to reimbursement of expenses incurred and normal remuneration or benefits.

Our Promoters and Directors may be regarded as having an interest in our Company other than reimbursement of expenses incurred and normal remuneration, commission or benefits. Certain Directors and Promoters may be deemed to be interested to the extent of Equity Shares, as applicable, held by them and by members of our Promoter Group, to the extent applicable, as well as to the extent of any dividends, bonuses or other distributions on such Equity Shares. Certain of our promoters and directors are interested in the promotion of our Company. There can be no assurance that our Promoters and Directors will exercise their rights as Shareholders to the benefit and best interest of our Company. For further details, see "*Capital Structure*", "*Our Promoters and Promoter Group*" and "*Our Management*" on pages 88, 218 and 199, respectively.

46. We cannot assure payment of dividends on the Equity Shares in the future.

A formal dividend distribution policy of our Company was approved and adopted by our Board on April 20, 2023 and further amended on November 04, 2024 ("*Dividend Policy*"). Our Company has declared a dividend of ₹ 635.00 lakhs, representing a rate of 641.26% on each fully paid-up Equity Share of ₹ 10/- each, out of the profits for the financial year ending March 31, 2023. This declaration was approved by the Board of Directors on June 21, 2023, and subsequently approved by the members on July 14, 2023.

In terms of the Dividend Policy, the dividend, if any, will depend on a number of internal and external factors, including but not limited to, the profits earned during the financial year and the profits earned for any previous financial year, profit available for distribution, business expansion and growth, macroeconomic environment, regulatory changes, taxation policy and other factors considered by our Board. The Articles of Association also provides discretion to our Board to declare and pay interim dividends.

Dividend would be declared on the face value of the Equity Shares and on per share basis of the Company. Parameters for dividend payments in respect of any other class of shares will be as per the respective terms of issue and in accordance with the applicable laws and will be determined, if and when the Company decides to issue other classes of shares. Therefore, dividend declared will be distributed amongst all shareholders, based on their shareholding on the record date.

Our ability to pay dividends may also be restricted under certain financing arrangements that we may enter into. Price of the Equity Shares will be determined by our Company, in consultation with the Book Running Lead Manager through the Book Building Process. These will be based on numerous factors, including those described under “Basis for Offer Price” on page 120, and may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchange.

The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

48. We have presented certain supplemental information of our performance and liquidity which is not prepared under or required under Ind AS.

This Red Herring Prospectus includes our Return on Net Worth, Return on Capital Employed and EBITDA (collectively “**Non-GAAP Measures**”) and certain other industry measures related to our operations and financial performance, which are supplemental measures of our performance and liquidity and are not required by, or presented in accordance with, Ind AS, IFRS or U.S. GAAP. For further details in relation to reconciliation of Non-GAAP Measures, see “*Other Financial Information*” on page 278.

Further, these Non-GAAP Measures and industry measures are not a measurement of our financial performance or liquidity under IND AS, IFRS or U.S. GAAP and should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the years/ period or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with IND AS, IFRS or U.S. GAAP. In addition, such Non-GAAP Measures and industry measures are not standardized terms, and may vary from any standard methodology that is applicable across the Indian financial services industry, and therefore may not be comparable with financial or industry related statistical information of similar nomenclature computed and presented by other companies, and hence a direct comparison of these Non-GAAP Measures and industry measures between companies may not be possible. Other companies may calculate these Non-GAAP Measures and industry measures differently from us, limiting its usefulness as a comparative measure. Although such Non-GAAP Measures and industry measures are not a measure of performance calculated in accordance with applicable accounting standards, our Company’s management believes that they are useful to an investor in evaluating us as they are widely used measures to evaluate a company’s operating performance. 49. Significant differences exist between IND AS and other accounting principles, such as US GAAP and International Financial Reporting Standards (“IFRS”), which investors may be more familiar with and consider material to their assessment of our financial condition.

Our Restated Consolidated Financial Information are derived from our consolidated audited financial statements as at September 30, 2025 and for the years ended March 31, 2025, March 31, 2024 and March 31, 2023, prepared in accordance with IND AS, and all restated in accordance with requirements of Section 26 of Part I of Chapter III of Companies Act, SEBI ICDR Regulations, and the Guidance Note on “Reports in Company Prospectuses (Revised 2019)” issued by ICAI. IND AS differs in certain significant respects from IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from IND AS and Indian GAAP. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Red Herring Prospectus should accordingly be

50. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.

SEBI and the Stock Exchanges have introduced various pre-emptive surveillance measures in order to enhance market integrity and safeguard the interests of investors, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple and market capitalization.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company.

External Risk Factors

53. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

54. Political, economic or other factors that are beyond our control may have an adverse effect on our business, cash flows and results of operations.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our solutions may be adversely affected by an economic downturn in domestic, regional and global economies. Our results of operations are significantly affected by factors influencing the Indian economy. Economic growth in India is affected by various factors including:

- domestic consumption and savings, and prevailing income conditions among consumers and corporations in India;
- any increase in Indian interest rates or inflation;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;

- volatility in, and actual or perceived trends in trading activity on India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- balance of trade movements, namely export demand and movements in key imports (oil and oil products);
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets;
- global economic uncertainty and liquidity crisis and volatility in exchange currency rates; and
- other significant regulatory or economic developments in or affecting India or its flexible workspace industry.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins. Any of the abovementioned factors could affect our business, financial condition, cash flows and results of operations.

55. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Investors were not permitted to withdraw their Bids after Bid/ Offer Closing Date.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and were not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Therefore, QIBs and Non-Institutional Bidders would not be able to withdraw or lower their Bids, notwithstanding adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition, or otherwise, between the dates of the submission of their Bids and the Allotment.

Retail Individual Investors can revise their Bids during the Bid/ Offer Period and withdraw their Bids until Bid/ Offer Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Offer within three Working Days from the Bid/ Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

56. We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could in turn adversely affect our business and cash flows.

The Competition Act was enacted for the purpose of preventing practices that have or are likely to have an adverse effect on competition in India and has mandated the Competition Commission of India to regulate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition is void and attracts substantial penalties.

Further, any agreement among competitors which, directly or indirectly, involves determination of purchase or sale prices, limits or controls production, or shares the market by way of geographical area or number of subscribers in the relevant market is presumed to have an appreciable adverse effect in the relevant market in India and shall be void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Central Government notified and brought into force the Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations ("Combination Regulations") under the Competition Act with effect from June 1, 2011. The Combination Regulations require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the Competition Commission of India. Additionally, on May 11, 2011, the Competition Commission of India issued the Competition Commission of India (Procedure

for Transaction of Business Relating to Combinations) Regulations, 2011, which sets out the mechanism for implementation of the merger control regime in India. The Competition Act aims to, among other things, prohibit all agreements and transactions which may have an appreciable adverse effect in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the Competition Commission of India has extraterritorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect in India.

However, the impact of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. We do not have any outstanding notices in relation to non-compliance with the Competition Act or the agreements entered into by us.

The Government of India has also passed the Competition (Amendment) Act, 2023, which has proposed several amendments to the Competition Act, such as introduction of deal value thresholds for assessing whether a merger or acquisition qualifies as a “combination”, expedited merger review timelines, codification of the lowest standard of “control” and enhanced penalties for providing false information or a failure to provide material information.

However, if we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the Competition Commission of India, or any adverse publicity that may be generated due to scrutiny or prosecution by the Competition Commission of India or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business and cash flows.

57. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has in a decision clarified the components of basic wages which need to be considered by companies while making provident fund payments, which resulted in an increase in the provident fund payments to be made by companies. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations.

Further, any future amendments may affect our tax benefits such as exemptions for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemptions for interest received in respect of tax-free bonds, and long-term capital gains on equity shares. The Government of India has announced the union budget for Fiscal 2025, and the Finance Act, 2024 was tabled before the Lok Sabha, which has proposed certain amendments to taxation laws in India. We have not fully determined the impact of these recent and proposed laws and regulations on our business. We cannot predict whether the amendments made pursuant to the Finance Act, 2024 would have an adverse effect on our business, financial condition, future cash flows and results of operations.

Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance. For further discussion on capital gains tax, see “-Investors may be subject to Indian taxes arising out of income arising from distribution of dividend and sale of the Equity Shares” on page 125.

We cannot predict the impact of any changes in or interpretations of existing, or the promulgation of, new laws, rules, and regulations applicable to us and our business. Unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us, our business, operations, or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and expend resources relating to compliance with such new requirements, which may also require significant management time, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation, or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent

may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

58. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other exceptions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If a transfer of shares, which are sought to be transferred, is not in compliance with such requirements and fall under any of the exceptions specified by the RBI, then the RBI's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Rules, investments where the beneficial owner of the equity shares is situated in or is a citizen of a country which shares a land border with India, can only be made through the Government approval route, as prescribed in the Consolidated FDI Policy dated October 15, 2020 and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or conditions or at all. For further information, see "*Restrictions on Foreign Ownership of Indian Securities*" on page 402.

59. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

60. Our Equity Shares have never been publicly traded, and after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the Offer Price may not be indicative of the market price of the Equity Shares after the Offer.

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market for our Equity Share on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Furthermore, the Offer Price of the Equity Shares will be determined through the Book Building Process. These will be based on numerous factors, including factors as described under "Basis for Offer Price" on page 120 and may not be indicative of the market price for the Equity Shares after the Offer.

For further details, see "Other Regulatory and Statutory Disclosures – Disclosure of Price Information of latest Issues handled by Sarthi Capital Advisors Private Limited in the past 3 years" commencing on page 359. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, the failure of security analysts to cover the Equity Shares after this Offer, or changes in the estimates of our performance by analysts, the activities of competitors and suppliers, future sales of the Equity Shares by our Company or our shareholders, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. We cannot assure you that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the

Equity Shares will be traded after listing.

In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. There can be no assurance that the investor will be able to resell their Equity Shares at or above the Offer Price.

61. Investors may be subject to Indian taxes arising out of income arising from distribution of dividend and sale of the Equity Shares.

Under the current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied both at the time of transfer and acquisition of the equity shares (unless exempted under a prescribed notification), and the STT is collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months, are subject to long term capital gains tax in India at specified rates, depending on certain factors, such as STT paid, the quantum of gains and any available treaty exemptions.

The Finance (No. 2) Bill, 2024 ("the Finance Bill"), which has received the President's assent on August 16, 2024, seeks to amend certain sections of the Income Tax Act, 1961, with effect from July 23, 2024. Accordingly, long term capital gains exceeding the exempted limit of ₹ 125,000 arising from the sale of listed equity shares on the stock exchange are subject to tax at the rate of 12.5% (plus applicable surcharge and cess). Unrealized capital gains earned on listed equity shares up to January 31, 2018 continue to be tax-exempted in such cases. Further, STT will be levied and collected by an Indian stock exchange if the equity shares are sold on a stock exchange. With respect to capital gains arising in an off market sale, long term capital gains are subject to tax at the rate of 10% (plus applicable surcharge and cess) without the exemption of ₹ 100,000.

Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. Short-term capital gains, arising from the sale of such equity shares on a stock exchange would be subject to tax at the rate of 15% (plus applicable surcharge and cess) for transfers taking place before July 23, 2024. However, per the amendment sought by the Finance Bill, short-term capital gains will be taxed at 20% for transfers taking place after July 23, 2024.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020. It clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, is specified at 0.015% (on a delivery basis) and 0.003% (on a non-delivery basis) of the consideration amount. As such, there is no certainty on the effect that the Finance Act, 2019 may have on our business and operations.

In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Additionally, the Finance Act, 2020 does not require dividend distribution tax to be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and are likely be subject to tax deduction at source. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at the source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in our Equity Shares.

We cannot predict whether any tax laws or other regulations impacting our business and operations will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have an adverse effect on our business, financial condition, cash flows and results of operations

62. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer holders of its Equity Shares pre-emptive rights to subscribe and pay for a proportionate number of Equity Shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution. However, if the laws of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, you may suffer future dilution of your ownership position and your proportional interests in our Company would be reduced.

63. Future issuances or sales of Equity Shares, or convertible securities or other equity-linked securities could adversely affect the trading price of the Equity Shares.

Our future issuances of Equity Shares, convertible securities or securities linked to the Equity Shares by us (including under employee stock option plans) or the disposal of Equity Shares by our Promoter or any of our other principal shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India, may significantly affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber the Equity Shares. Any future issuances could also dilute the value of your investment in our Company.

64. Fluctuation in the exchange rate of the Rupee and other currencies could have an adverse effect on the value of our Equity Shares, independent of our operating results.

Subject to requisite approvals, on listing, our Equity Shares will be quoted in Rupees on the Stock Exchanges. Any dividends, if declared, in respect of our Equity Shares will be paid in Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to such investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders.

The exchange rate of the Rupee has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

65. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Offer.

Subject to requisite approvals, the Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately two Working Days from the Bid / Offer Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within three Working Days of the Bid/Offer Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods. For further details, see "*Offer Procedure*" on page 379.

The company operates 30+ locations, which comprises of 7 hubs (centers) and 28 spokes (company has entered into a strategic alliance with Spokes i.e Infertility Expert to achieve the mutual goal of spreading awareness about ART and IVF treatment), for further details, see “*Our Business*” on page 163.

This implies India’s share of the global market is set to rise from ~4.8% in 2024 to ~8.3% by 2034, positioning it as one of the fastest-growing IVF markets worldwide.

Recognizing the opportunity, the Company therefore plans to increase its presence across India by establishing new IVF center which will improve accessibility to high-quality IVF treatments for the patients, particularly in underserved regions. The Company has mapped its current and future expansion plan across India in order to ensure that IVF services are accessible to a wider population, particularly in underserved regions, while optimizing resource management. For further details, see “*Our Business – Our growth Strategy*” on page 164.

Our Company propose to establish 19 new IVF centers across India, for which the Company proposes to deploy an amount of ₹ 5,000.00 lakhs towards the establishment of 10 new IVF centers proposed to be opened in Fiscal 2027, 8 new IVF centers proposed to be opened in Fiscal 2028 and 1 new IVF center proposed to be opened in Fiscal 2029. Our Board by its resolution dated September 29, 2025 has approved the proposal for expansion of new IVF Center.

CARE Analytics and Advisory Private Limited (“CAAPL”) has been appointed for evaluation of Establishment of the New Centers.

Justification of Opening 19 new IVF center

The journey of Dr. Manika Khanna began in 2009 with the establishment of her first IVF clinic, where she developed deep clinical expertise in assisted reproductive technology until 2015. During this period, the foundation for building a Pan-India IVF platform was laid. The expansion journey commenced with the launch of the Greater Kailash (Delhi) center in 2016, followed by centers in Ludhiana in 2017, Patna in 2019, Mumbai in 2022, Bengaluru and Srinagar in 2023 and 2024, respectively. Over the years, Dr. Khanna’s transition from a dedicated doctor to Entrepreneur and subsequently spear heading the business has been instrumental in building a strong management framework and a proven, scalable business model.

Through this journey, Gaudium has evolved into a trusted brand in IVF treatment across major Indian cities, supported by robust medical infrastructure, clinical expertise, and consistent success rates. Over the years, the Company has developed and implemented comprehensive standard operating procedures (SOPs) to mitigate dependence on the star doctor model, thereby ensuring consistency in clinical outcomes and operational excellence across centers.

The Company has demonstrated its expansion capabilities through the successful implementation of a hub-and-spoke model, currently operating seven centers supported by 28 spoke locations. During its expansion journey, the Company encountered and effectively addressed key business and operational challenges, enabling the development of a standardized and replicable operating model across geographies.

With established systems, processes, and clinical protocols in place, the Company is now well-positioned to replicate its proven SOP-driven model and expand. At this stage the company has proposed to enter 19 new locations based on their internal assessment of various factors namely, demography, population, fertility rate, competition etc, expand into additional regions, and scale operations while maintaining high standards of clinical outcomes and patient care.

The Company has successfully addressed region-specific challenges in the past relating to:

- Human Resource Management
- Quality and Clinical Governance
- Operational Controls
- SOP-Driven Processes
- Development of a Non-Doctor-Centric Operating Model

Standardized SOP's, proven and tested business model and past experience enables company to expand faster and taking whole business to a new scale by entering new 19 location across India in a phased manner where 10 new IVF centers are planned in Fiscal 2027, 8 new IVF centers in Fiscal 2028 and 1 IVF center in fiscal 2029. These 19 location will be drive by hub and spoke model to penetrate underserved market.

The proposed expansion is aligned with industry growth, execution capability, referral strength, and long-term scalability. Accordingly, the planned expansion represents a prudent, data-driven, and experience-backed growth strategy.

Furthermore, following are the factors supporting expansion plan:

- i. **Market growth:** According to Infomerics Research Report, the Indian IVF market is rapidly expanding, driven by increasing infertility rates, greater awareness, and technological advancements, with a projected growth to USD 4.54 billion by the year FY34 reflecting of CAGR of 13.13%.
- ii. **Favorable Environment:** According to Infomerics Research Report, Government initiatives, growing medical tourism and pocket friendly advance treatment, provides a supportive environment for expansion. In the United States, IVF treatments can range from \$15,000 to \$20,000, while in India, the same procedures are available for approximately \$3,000 to \$4,000. This stark price difference has attracted numerous international clients seeking affordable options
- iii. **Population and Demography:** According to Infomerics Research Report, According to the World Bank, India's population is estimated to have reached approximately 1.44 billion in 2024, reaffirming its position as the world's most populous country, ahead of China. India has one of the youngest populations globally, nearly one-fifth of the world's youth resides in India with median age of around 29 years. Urbanization, too, is transforming India's socio-economic fabric. The urban population rose from 413 million in 2013 (32% of total population) to 519.5 million in 2023 (36.4%), and further to approximately 535 million in 2024 (36.9%). Change in demography, high career aspiration, increasing lifestyle diseases, late marriages and delayed parenthood is continuously impacting health of young population in India.
- iv. **Fertility:** Fertility rate in India continues to decline over the past years, fertility rate in 16 states including union territories is below 1.8 which is a cause of concern. Company has strategically chosen 19 locations where the fertility rate is low, ranging from 1.1 to 1.9 based on National Family Health Survey NFHS 5, 2019-21.
- v. **Competition:** The Company has internally assessed the competitive landscape by evaluating key parameters such as market penetration, geographic presence, pricing strategy, clinical advancements and medical infrastructure. The IVF industry in India remains largely fragmented and partially unorganized, with numerous standalone clinics operating alongside organized chains and hospital-based fertility centers. Furthermore, several Tier-2 and Tier-3 cities remain underserved, with limited access to established brands and advanced medical expertise, thereby presenting both competitive challenges and growth opportunities.
- vi. **Brand Trust:** The success of the initial seven centers has established strong brand recognition and patient trust, facilitating easier market entry for new centers. In India, market is fragment and unorganized and in such a market, brand reputation, clinical credibility, and patient trust play a critical role in influencing treatment decisions of patient.

- vii. Experience & Efficiency:** The Company has refined its operations and business model over the last decade, making it easier to scale new centers efficiently by implementing proven and tested SOP's.

Our Company has currently not identified the premises where the new IVF treatment will be established, however the same will be undertaken basis an analysis primarily focused on the demographics of such location, accessibility, existing businesses in the surrounding areas, etc. We further confirm that no portion of the issue proceeds will be utilised or earmarked towards the establishment of these facilities until the premises are finalized.

We are in the process of identifying and finalizing the specific locations for our proposed new center in the towns mentioned herein below:

6	Digital Test Tube Warmer	A digital test tube warmer is used in IVF and IUI treatments to maintain samples like semen, oocytes, and culture media at a consistent, precise temperature of 37°C outside of a standard incubator.
7	Heating Plate for container	<p>A heating plate provides a stable, physiological temperature (typically 37°C) for culture dishes, test tubes, or other containers used during IVF procedures. This ensures that the biological materials remain in conditions similar to the human body, preventing temperature-induced stress or damage to oocytes, sperm, and embryos.</p> <p>During Oocyte Collection: Keeps collected oocytes at 37°C before fertilization.</p> <p>During Micromanipulation: Provides a warm surface under the microscope for procedures like ICSI (Intracytoplasmic Sperm Injection).</p> <p>During Embryo Handling/Transfer: Maintains embryo culture dishes at body temperature when moving between workstations or incubators.</p>
8	Andrology Incubator	<p>Key applications in andrology</p> <p>Sperm sample preparation & maintenance: After semen collection, the sperm may need to be processed (e.g., sperm washing for IUI/IVF) and kept at precise temperature so as not to degrade motility or viability.</p> <p>Culture or incubation of sperm under optimal conditions: For advanced testing such as sperm DNA fragmentation, motility/functional assays, etc., maintaining correct temperature ($\approx 37^{\circ}\text{C}$) is critical.</p> <p>Stabilising environmental conditions: The incubator helps protect the sample from fluctuations (temperature, contamination, etc) which could impair sperm quality. For example, a tender document for an IVF lab specified an “andrology incubator bench top ... precise temperature control $37^{\circ}\text{C} \pm 0.5^{\circ}\text{C}$”.</p> <p>aiimsjodhpur.edu.in</p> <p>Quality control: Ensuring sperm samples are held in standardised conditions enables reproducible assessments of motility, morphology, viability, and other sperm parameters.</p>
9	Alfa Series Clean Air Integrated LAF (4 X2)	Deploying a large- footprint laminar airflow clean-air module (4×2) within an IVF laboratory provides a controlled clean zone for critical embryology work. It supports better air quality, improved stability, reduced contamination risk — all of which contribute to better outcomes in IVF cycles. Implementation, however, requires careful integration with the lab’s HVAC, workflow, validation and maintenance.

Controlled Aspiration</p> <p>Analog pumps allow fine control of suction pressure by the operator, minimizing the risk of follicle collapse or oocyte damage.</p> <p>Ideal for delicate cases, e.g., small or fragile follicles</p>
12	CO2 Incubator	<p>A CO₂ incubator plays a crucial role in in vitro fertilization (IVF) by providing an optimal environment for the growth and development of embryos outside the human body. Its application can be summarized as follows:</p> <p>1. Maintaining Physiological Conditions:</p> <p>The incubator maintains a controlled temperature (usually 37°C), humidity, and CO₂ concentration (around 5–6%) to mimic the natural conditions of the female reproductive tract.</p> <p>The CO₂ helps maintain the pH of the culture medium, which is critical for embryo viability.</p>

Sl. No.	Product	Application of Product
		<p>2. Supporting Embryo Development:</p> <p>Eggs and embryos are cultured in specialized media inside the incubator.</p> <p>A stable environment ensures proper cell division, blastocyst formation, and overall embryo quality.</p> <p>3. Minimizing Stress:</p> <p>By reducing fluctuations in temperature, gas composition, and pH, the incubator minimizes stress on gametes and embryos, increasing the likelihood of successful implantation.</p>
13	Double Stage CO ₂ Regulator & N ₂ Regu.	<p>Double-Stage CO₂ Regulator-</p> <p>Maintains precise CO₂ levels in incubators and culture media. Critical for controlling pH in embryo culture media (CO₂ reacts with bicarbonate to maintain physiological pH ~7.2–7.4).</p> <p>N₂ (Nitrogen) Regulator-</p> <p>Provides nitrogen gas to maintain an inert atmosphere in tri-gas incubators (CO₂ + O₂ + N₂).</p> <p>Helps adjust oxygen concentration (typically 5%) to mimic in vivo conditions in the female reproductive tract</p>
14	Stereozoom Microscope	<p>A stereozoom microscope (also called a stereomicroscope with zoom capability) is widely used in In Vitro Fertilization (IVF) laboratories because it provides a 3D, high-resolution view at variable magnifications. Here's a brief overview of its applications in IVF:</p> <p>1. Oocyte (Egg) Retrieval and Assessment</p> <p>Helps embryologists identify and select mature oocytes from the follicular aspirate.</p> <p>Allows detailed inspection of the zona pellucida, cytoplasm, and polar body to assess oocyte quality before fertilization.</p> <p>2. Embryo Handling and Manipulation</p> <p>Used during micromanipulation procedures such as ICSI or assisted hatching.</p> <p>Provides precise 3D visualization to prevent damage to oocytes or embryos.</p> <p>3. Embryo Quality Assessment</p> <p>Allows observation of cell division, fragmentation, and blastocyst formation at early stages.</p> <p>Helps select the most viable embryos for transfer or cryopreservation.</p> <p>4. Cryopreservation</p>

15	Planer Benchtop Incubator	<p>A planer benchtop incubator in IVF (In Vitro Fertilization) treatment is used primarily to create and maintain an optimal environment for gametes (sperm and eggs) and embryos outside the human body.</p> <p>Here's a brief application summary:</p> <p>1. Controlled Culture Conditions:</p> <p>Maintains stable temperature (typically 37°C), CO₂ concentration (5–6%), and humidity, which are crucial for cell survival and embryo development.</p> <p>2. Embryo Culture:</p> <p>Provides a protected environment for fertilized eggs to develop into embryos before transfer to the uterus.</p> <p>Supports early cleavage and blastocyst formation by mimicking in vivo conditions.</p> <p>3. Fertilization Monitoring:</p> <p>Allows embryologists to monitor fertilization and early embryo growth under sterile, controlled conditions without disturbing the culture.</p> <p>4. Reduced Contamination Risk:</p> <p>Benchtop design ensures a compact, closed system, minimizing the chance of contamination compared to larger, shared incubators</p>
16	IVFtech Benchtop Incubator 6 Chamber	<p>Post- fertilisation embryo culture</p> <p>After fertilization (either via standard IVF or ICSI), embryos are placed in culture dishes and incubated. The six - chamber system allows multiple sets of embryos (e.g., from different patients or different culture conditions) to be incubated simultaneously under tightly controlled conditions. The independent chambers also reduce risk of cross - contamination.</p> <p>Extended culture to blastocyst stage</p> <p>Many clinics culture embryos to Day 5/6 (blastocyst) before transfer or freezing. The stable temperature and gas environment provided by the incubator support optimal embryo development (gas: lower O₂ , appropriate CO₂ ; temperature ~37 °C). The datasheet mentions its use for culture up to blastocyst (N5/N6)</p>

1. GLOBAL MACROECONOMIC SCENARIO

The global economy is projected to experience a deceleration in growth, with global GDP expanding by 2.8% in CY 2025, down from 3.3% in CY 2024. This slowdown is attributed to escalating trade tensions, particularly due to new U.S. tariffs, and heightened policy uncertainties. Global headline inflation is expected to decline to 4.3% in CY 2025 and further to 3.6% in CY 2026, as inflationary pressures ease across advanced economies, aided by tighter monetary policy, improved labour market conditions, and the resolution of supply disruptions. However, global trade growth is forecasted to slow significantly to 1.7% in CY 2025, reflecting the effects of escalating trade barriers and geopolitical instability.

In China, economic prospects remain constrained as the IMF downgraded its CY 2025 GDP growth forecast to 4.0%, due to persistent challenges in the real estate sector, weak consumer demand, and trade-related pressures. In Europe, growth is expected to stagnate, with Germany’s GDP forecast at 0.0% in CY 2025, amidst trade disruptions and domestic weaknesses. The EU is actively seeking to address these challenges through renewed trade dialogue with the U.S.

Meanwhile, India continues to show resilience, with the IMF projecting stable real GDP growth of 6.2% in CY 2025, followed by a slight uptick to 6.3% in CY 2026. This is supported by robust rural consumption and sustained infrastructure investment. The IMF notes that India remains one of the fastest-growing major economies, driven by favourable demographics, expanding digital infrastructure, and rising investment activity. Consumer price inflation in India is projected to moderate to 4.2% in CY 2025, staying within the Reserve Bank of India’s (RBI) target range of 2–6%, which helps maintain purchasing power and economic stability. The IMF also highlights the importance of continued structural reforms in India, particularly in labour markets, logistics, and capital formation, to sustain medium-term growth momentum.

Overall, while inflation is declining globally, the economic outlook remains clouded by geopolitical uncertainty, trade fragmentation, and region-specific structural challenges. However, India’s relative macroeconomic stability, demographic advantage, and ongoing investment cycle place it in a strong position amid global headwinds.

1.1 Global GDP Growth Scenario

The global economy began to recover from its lowest levels following the lifting of lockdowns in 2020 and 2021. The pandemic-induced lockdown was a key factor that severely disrupted economic activities, leading to a recession in CY 2020, where global GDP contracted by -2.7%.

In CY 2021, supply chain disruptions significantly impacted both advanced economies and low-income developing economies. The rapid spread of the Delta variant and the threat of new variants in mid-2021 further heightened uncertainty in the global economic environment.

Global economic activity saw a sharper-than-expected slowdown in CY 2022. The highest inflation in decades, observed in 2022, forced most central banks to tighten their monetary & fiscal policies. Russia's invasion of Ukraine exacerbated global food supply issues, further increasing the cost of living.

Despite initial resilience in early CY 2023, marked by a rebound from the pandemic and progress in curbing inflation from the previous year's highs, the situation remained precarious. Economic activity continued to lag its pre-pandemic trajectory, especially in emerging markets and developing economies, leading to widening regional disparities. Several factors impeded recovery, including the lasting impacts of the pandemic, geopolitical tensions, tightening monetary policies to combat inflation, reductions in fiscal support amid high debt levels, and extreme weather conditions. As a result, global growth slowed from 3.6% in CY 2022 to 3.5% in CY 2023.

The global economy maintained moderate momentum in CY 2024, with real GDP growth estimated at 3.3%, supported by easing inflationary pressures, recovering supply chains, and resilient consumer demand in some major economies. Advanced economies, particularly the U.S., benefitted from strong labour markets and improved private consumption. However, growth remained uneven across regions, with emerging markets facing tighter financial conditions and subdued export demand. Inflation declined faster than anticipated in many regions, enabling some central banks to consider gradual monetary easing by the end of the year.

1.2 Historical GDP Growth Trends

F – Forecast, Source – IMF World Economic Outlook April 2025

Note: Advanced Economies and Emerging & Developing Economies are as per the classification of the World Economic Outlook (WEO). This classification is not based on strict criteria, economic or otherwise, and it has evolved

over time. It comprises of 40 countries under the Advanced Economies including the G7 (the United States, Japan, Germany, France, Italy, the United Kingdom, and Canada) and selected countries from the Euro Zone (Germany, Italy, France etc.). The group of emerging market and developing economies (156) includes all those that are not classified as Advanced Economies (India, China, Brazil, Malaysia etc.)

In the current scenario, global GDP growth is projected to decelerate to 2.8% in CY 2025, reflecting mounting economic pressures across both advanced and emerging markets. This marks a significant slowdown driven by intensifying trade fragmentation, the impact of new U.S. tariffs, and elevated geopolitical tensions. Structural weaknesses such as the ongoing real estate crisis in China, stagnant growth in the Eurozone, and tight financial conditions in major economies are expected to weigh heavily on global output. Additionally, stress in housing and banking sectors, coupled with subdued industrial activity, is contributing to a muted growth outlook. On the inflation front, the IMF projects global headline inflation to decline to 4.3% in CY 2025, continuing a disinflationary trend as energy prices stabilize and supply-side disruptions ease. The softening of labour markets—reflected in lower job vacancy rates and modest increases in unemployment—is also expected to help reduce core inflation. This provides room for some central banks to initiate cautious interest rate cuts, although the broader economic outlook remains uncertain due to persistent global risks.

1.3 Global Economic Outlook

At the midpoint of the year, so far in 2025 the global economy continues to exhibit mixed performance, with divergence in outcomes across regions due to differences in economic growth, inflation dynamics, and policy responses. The global GDP growth is projected at 2.8% in CY 2025, down from an estimated 3.3% in CY 2024. While short-term prospects have improved since early 2024 due to easing inflation and gradual loosening of monetary policy in several regions, the broader environment remains challenging. Structural headwinds, such as tighter credit conditions, supply-side bottlenecks, and lingering geopolitical risks, are keeping global growth below historical averages.

The United States has continued to outperform other advanced economies, with growth projected at 1.8% in 2025, though slightly down from 2.8% in 2024, as the economy absorbs the lagged effects of previous monetary tightening and persistent inflation. In contrast, the Euro Area remains subdued, with GDP growth expected to 0.8% in 2025, supported by the European Central Bank's first-interest rate cuts since 2019 (implemented in June 2024) and stronger domestic demand. However, countries like Germany, France, and Italy continue to struggle due to weak manufacturing performance, whereas Greece and Spain have benefited from robust tourism activity.

In China, growth has held up at a projected 4.0% for CY 2025, supported by targeted stimulus and a gradual recovery in the real estate sector. Growth in the rest of Asia is also benefiting from a revival in global trade and domestic demand. India remains one of the strongest performers globally, with GDP growth forecasted at 6.2% in 2025, supported by robust consumption, capital investment, and favourable demographics.

In Latin America and the Caribbean, growth is more uneven. Larger economies like Brazil and Mexico are seeing moderate expansions, but the overall regional outlook is weaker, with GDP growth forecast at 2.0% in 2025, due to external headwinds, commodity price volatility, and political uncertainty. Meanwhile, Sub-Saharan Africa's growth is expected to slow slightly to 3.8%, as global financial conditions tighten, and oil-exporting nations face declining revenues. The Middle East and North Africa (MENA) region is also seeing tempered prospects, with growth revised down to 2.6%, influenced by lower oil prices and ongoing geopolitical pressures.

Globally, industrial production has remained sluggish through the first half of 2025, constrained by high interest rates, trade fragmentation, and lingering supply chain disruptions. However, a mild recovery is anticipated in the second half of the year as global trade stabilizes and domestic demand for goods strengthens. Central banks in several advanced economies—including the Eurozone, Switzerland, Sweden, and Canada—have begun cutting rates to support demand, though inflation trends remain uneven. Disinflation has progressed slower than expected, particularly in services and wage-heavy sectors, making monetary easing cautious and data-dependent.

Overall, the global economy appears to be stabilizing, but growth in CY 2025 remains below historical averages. Advanced economies continue to grow modestly under the weight of tight policies and weak external demand, while

emerging markets, particularly in Asia, show stronger but slowing momentum. The outlook for the remainder of 2025 depends significantly on geopolitical developments, the trajectory of inflation, and the pace of monetary easing.

2. INDIA’S MACROECONOMIC SCENARIO

2.1 Gross Domestic Product (GDP)

India Expected to Grow at Twice the Pace of Global Economic Growth

The global economy continues to face persistent challenges, including the lingering effects of the COVID-19 pandemic, heightened geopolitical tensions, and climate-related disruptions that have affected energy and food supply chains. Global real GDP growth is projected at 2.8% in 2025, indicating a moderation in global momentum. In contrast, India's real GDP is projected to grow at 6.2% in 2025, continuing its trend of significantly outpacing global averages and reaffirming its position as the fastest-growing major economy. This implies that India is expected to grow at more than twice the pace of global GDP, supported by strong domestic demand, structural reforms, and increased infrastructure investment. India’s resilience among the G20 economies further strengthens its role as a key driver of global economic growth in the coming years.

India’s Economic Growth Momentum Remains Strong - Surpassed USD 4 Trillion.

In FY 2024-25, India was the fifth-largest economy globally, with an estimated real Gross Domestic Product (GDP) at constant prices of INR 184.88 lakh crore, against the Provisional Estimate of GDP for the year 2023-24 of INR 173.82 lakh crore registering a GDP growth rate of 6.4% as compared to 8.2% in FY 2023-24. Since FY 2005, India’s GDP growth has consistently outpaced global economic growth, often growing at nearly twice the global average, and this trend is expected to continue over the medium term.

India, Top 4 Global Economies GDP Growth Forecast

Note: P = Projections, Source: IMF World Economic Outlook April 2025 update.

In September 2024, India achieved a significant milestone by overtaking Japan to become the third most powerful nation in the Asia-Pacific region, as per the Asia Power Index 2024. India's overall score rose to 39.1, reflecting a 2.8-point increase from the previous year, driven by growing influence across economic, military, and diplomatic dimensions.

Key factors behind India's rise include its strong economic performance, expanding and youthful workforce, and increasing strategic engagement across the region. India's Economic Capability improved significantly, supported by its position as the world's third-largest economy in terms of purchasing power parity (PPP). Additionally, a notable increase in its Future Resources score highlights the demographic advantage that is expected to sustain its growth trajectory in the coming years.

2.2 Gross Value Added (GVA)

Gross Value Added (GVA) is the measure of the value of goods and services produced in an economy. GVA gives a picture of the supply side whereas GDP represents consumption.

Industry and Services sector leading the recovery charge

- India's economy demonstrated robust growth across various sectors. The gap between GDP and GVA growth turned positive. The positive gap between GDP and GVA growth indicates robust tax collections contributing to GDP growth.
- India's sector-wise economic performance in FY 2024–25 reveals a shift in momentum across its primary, secondary, and tertiary sectors, with notable differences compared to the previous fiscal year.
- The Primary Sector—comprising agriculture, livestock, forestry, fishing, and mining & quarrying—registered a growth of 3.6% in FY25, showing a notable improvement from the 2.1% growth in FY24. This uptick can be attributed to stronger performance in agriculture and allied activities, along with moderate gains in mining and quarrying. However, erratic monsoon patterns and rising input costs may have constrained agricultural output during the year.
- In contrast, the Secondary Sector—which includes manufacturing, electricity, gas, water supply & other utilities, and construction—recorded a solid growth of 6.5% in FY25, though lower than the impressive 9.7% growth seen in the previous year. This resilient performance was primarily driven by a notable recovery in manufacturing and robust momentum in infrastructure-related segments like construction and utilities.
- The Tertiary Sector or services sector posted 7.2% growth in FY25, slightly lower than the 7.6% achieved in FY24, yet it remained a major pillar of overall economic growth. Strong performances were observed in trade, hotels, transport, financial services, real estate, and professional services. However, public administration and defence services saw more modest growth, slightly dampening the overall momentum in this segment.
- Overall, growth in India's real Gross Value Added (GVA) in FY25 was primarily driven by the resurgence of the secondary sector and sustained strength in key segments of the services sector, even as the primary sector showed signs of moderation.

2.3 Consumer Price Index (CPI)

Inflation Stable Inflationary Environment

In fiscal year 2025 (FY25), India's General Index inflation, as measured by the Consumer Price Index (CPI), averaged 4.6%, marking the lowest annual inflation rate since 2018–19. This moderation in inflation reflects a significant improvement in the country's price stability post-COVID. In March 2025, CPI Inflation stood at 3.34%, the lowest monthly rate since August 2019, indicating sustained disinflationary momentum in recent months.

Source: - RBI, Annual Report-Inflation, Money and Credit Dated May 29th, 2025

Several key factors contributed to this decline in inflation:

The Reserve Bank of India (RBI) pursued a pro-growth monetary policy, aiming to strike a balance between supporting economic recovery and containing inflation. In parallel, the government actively intervened in food

markets, particularly by augmenting buffer stocks of essential commodities and releasing them strategically to stabilize prices. These coordinated efforts helped ease supply-side pressures, especially on food inflation. Looking ahead, projected CPI inflation for FY26 to average around 4%, signalling continued focus on maintaining price stability. In support of this trajectory, the RBI recently announced a cut in the repo rate, which is expected to result in a more accommodative monetary policy stance in the coming months. This environment of low inflation and easing interest rates may provide a favourable backdrop for economic expansion in the near term.

2.4 India Per Capita GDP Forecast

Per capita GDP growth for India is estimated at 9.19 % CAGR between FY 2025-FY 2030. Increased individual incomes are expected to create additional discretionary spending, which may be beneficial for the sector.

2.5 Private Final Consumption Expenditure (PFCE)

Private Final Consumption Expenditure (PFCE) represents the total spending by resident households on final consumption of goods and services, serving as a key indicator of consumer demand and overall economic well-being. It reflects the extent of household consumption and plays a crucial role in driving GDP growth. In FY2025, PFCE at constant prices rose to 56.7% of GDP, up from 56.1% in FY2024, indicating a gradual improvement in household spending patterns. This increase suggests stronger consumer confidence, supported by factors such as easing inflation, improving income levels, and a favourable consumption environment.

2.6 Overview on Key Demographic Parameters

2.6.1 Population growth and Urbanization

India’s economic growth and expanding private consumption are intrinsically linked to its demographic and urbanization trends. According to the World Bank, India’s population is estimated to have reached approximately 1.44 billion in 2024, reaffirming its position as the world’s most populous country, ahead of China. This continued growth reflects an expanding labour force and consumer base, both of which are critical to sustaining long-term economic development.

A key metric in demographic analysis—the age dependency ratio, defined as the ratio of dependents (individuals aged below 15 or above 64) to the working-age population (15–64 years)—has been on a downward trajectory for several decades. From a high of 76% in 1983, the dependency ratio declined to 47% in 2023 and is estimated at 50.2% in 2024. This decline signifies that for every 100 working-age individuals, there are only about 50 dependents, indicating a favourable demographic dividend. A greater share of the population is now within the working-age group, potentially contributing to enhanced economic productivity and income generation.

Source: World Bank Database

However, a parallel trend is emerging in the form of a rising old-age dependency ratio—the proportion of individuals aged 65 and above relative to the working-age population. This figure has gradually increased, reaching 10.4% in 2024, suggesting the onset of an aging demographic shift. This highlights the growing need for robust healthcare systems, pension reforms, and social security mechanisms to address future challenges associated with an aging population.

India's youthful demographic remains one of its most significant advantages. With a median age of around 29 years, India has one of the youngest populations globally. Nearly one-fifth of the world's youth resides in India, and as millions enter the workforce each year, this demographic bulge offers enormous potential—provided it is met with adequate job creation, education, and skills training.

Urbanization, too, is transforming India's socio-economic fabric. The urban population rose from 413 million in 2013 (32% of total population) to 519.5 million in 2023 (36.4%), and further to approximately 535 million in 2024 (36.9%), according to World Bank estimates. This rapid growth in urban areas underscores the need for sustainable urban planning, investment in infrastructure, and development of smart cities to accommodate and benefit from the shifting population dynamics.

1.7.2 Breakdown of Employment by Sector

According to the Periodic Labour Force Survey (PLFS) 2023–24, the employment distribution across various sectors exhibits distinct gender-based patterns. A significant portion of male workers are engaged in agriculture, followed by notable participation in construction, manufacturing, and trade-related activities. In contrast, female workers are predominantly employed in agriculture, with considerable involvement in manufacturing and other services sectors. While female representation in trade and construction is lower compared to males, Additionally, a substantial proportion of employed women are self-employed, often contributing as unpaid helpers in household enterprises or operating small businesses, indicating a reliance on informal employment avenues.

Percentage distribution of workers by broad industry division 2023-24

Sector wise	Male	Female
Agriculture	36.3	64.4
Mining and Quarrying	0.3	0.1
Manufacturing	11.4	11.6
Electricity, Water etc.	0.7	0.2
Construction	16.4	3.7

Trade, Hotel and Restaurant	15.5	6.1
Transport, Storage and Communications	8.1	1.1
Other Services	11.3	13

1.7.3 Disposable Income and Consumer Spending

Gross National Disposable Income (GNDI) represents the total income available to a nation's residents for consumption and saving after accounting for income transfers with the rest of the world. In FY24, Per capita GNDI grew by 9.85%, followed by a moderate growth of 8.05% in FY25. This steady increase indicates that households and businesses had more income at their disposal, which is critical for supporting both consumption and savings—key components of economic resilience and expansion.

The rise in GNDI has translated into higher consumer spending, as reflected in the growth of Private Final Consumption Expenditure (PFCE), which measures the total value of goods and services consumed by households. Per Capita PFCE grew by 8.04% in FY24 and further accelerated to 10.09% in FY25, highlighting strong consumer confidence and robust domestic demand.

1.8 Concluding Remarks about Macroeconomic Scenario

The major headwinds to global economic growth remain significant, with escalating geopolitical tensions, volatile global commodity prices, high interest rates, inflationary pressures, instability in international financial markets, climate change, rising public debt, and the rapid evolution of new technologies. Despite these challenges, India's economy is relatively well-positioned compared to other emerging markets. According to the latest IMF forecast, India's GDP growth is expected to be 6.2% in 2025, maintaining its position as the fastest-growing major economy globally, well above the global growth projection of 2.8%. Key positive factors for the Indian economy include continued strong domestic demand, robust government support for capital expenditure, moderating inflation, growing investments in technology, and improving business confidence.

India's strategic position as a manufacturing hub is further strengthened by government initiatives, a skilled labour force, and a dynamic startup ecosystem, all of which bolster the country's economic outlook. The ongoing reforms and focus on innovation are enabling India to seize emerging opportunities, making it a growing player in the global

manufacturing landscape. In addition, several high-frequency growth indicators—such as the Purchasing Managers' Index (PMI), E-way bills, bank credit, toll collections, and GST collections—have shown a positive trajectory in FY25. The normalization of employment post-economic reopening is expected to provide further support to consumption expenditure.

Public investment is also poised to grow, with the government allocating a significant ₹11.21 lakh crore for capital expenditure in FY25. The private sector's investment intentions are showing positive signs, as evidenced by increased new project investments and a strong import of capital goods. Furthermore, rural demand is likely to improve, bolstered by healthy sowing, better reservoir levels, and the positive progress of the southwest monsoon, coupled with the government's push for infrastructure investment and other policy measures. These factors are expected to further support the investment cycle and strengthen India's economic resilience in the coming years.

3. Industry Overview – IVF Industry

Some imagine IVF as a highly clinical process involving test tubes, petri dishes, and complex laboratory procedures, while others see it as a deeply personal journey filled with hope, patience, and resilience. Today, with an expanding range of assisted reproductive technologies, treatments, and supportive services, it is possible for many couples and individuals to pursue their dream of parenthood. It is therefore unsurprising that the IVF industry has become one of the most dynamic and fast-growing segments of global healthcare. Fertility care is no longer limited to a niche medical service—it has become a critical contributor to healthcare innovation, social progress, and human well-being across the world.

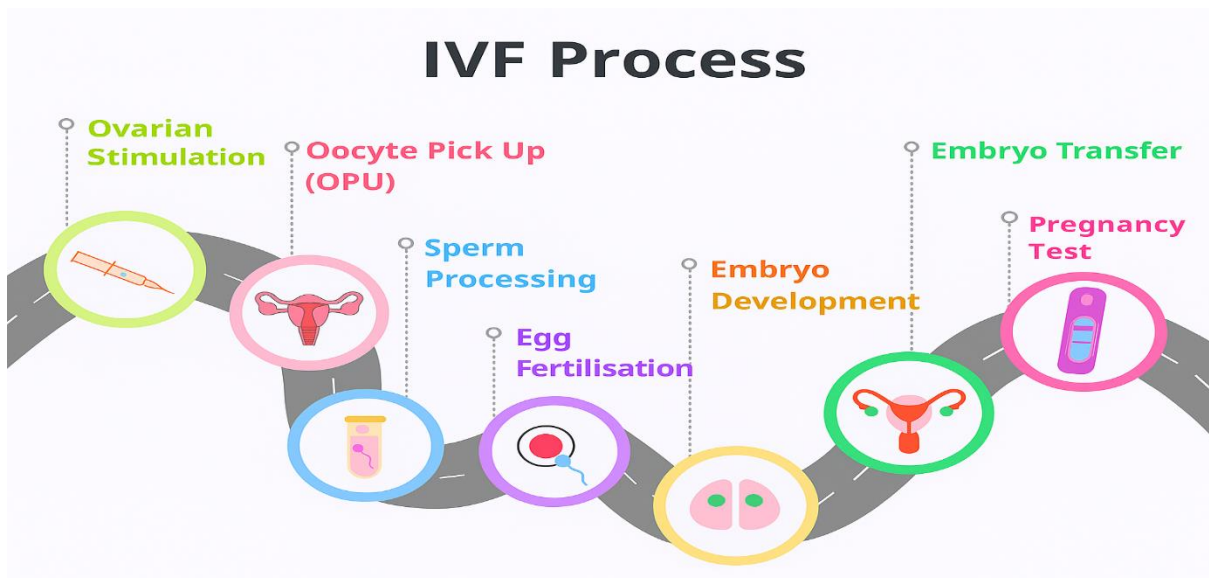

In Vitro Fertilization (IVF) is a medical procedure that offers hope to couples struggling with infertility. It involves combining eggs and sperm in a laboratory to achieve fertilization. If this process is successful, the resulting fertilized egg, or embryo, develops for several days before one or more healthy embryos are implanted into the uterus, aiming for a successful pregnancy. With increasing awareness of infertility issues and advancements in IVF techniques, conversations around reproductive challenges and the success rates associated with treatment are becoming more open and accepted. Couples now have expanded options such as egg and sperm donation, cryopreservation for future use, and embryo testing through advanced genetic screening.

While IVF represents a breakthrough in reproductive medicine, the process can be emotionally and financially demanding. The physical challenges of egg retrieval, hormonal shifts, and uncertainty of outcomes often contribute to stress and anxiety. Many couples also experience feelings of isolation or societal pressure, making mental health support an important component of fertility care. Nevertheless, with advancements in medical technology, supportive care frameworks, and initiatives to improve accessibility, the IVF services market is poised for robust growth.

3.1 IVF Process

In Vitro Fertilization (IVF) is a multi-step assisted reproductive technology designed to aid couples experiencing infertility. The process involves careful hormonal stimulation, gamete handling, and embryo transfer, ensuring maximum success rates while minimizing medical risks.

[Remainder of page left intentionally blank]

Source: Infomerics Analytics & Research
 The key steps in the IVF process are as follows:

1. Ovarian Stimulation

- The process begins with controlled ovarian stimulation using hormonal medications to induce the development of multiple mature eggs.
- Regular monitoring through ultrasound and hormone assessments ensures optimal follicle growth and timing for egg retrieval.

2. Oocyte Pick-Up (OPU)

- Once the eggs reach maturity, they are retrieved from the ovaries using a minimally invasive procedure, typically under sedation.
- The collected oocytes are then prepared for fertilization in the laboratory.

3. Sperm Processing

- Semen samples are collected from the male partner or donor.
- The sperm is processed to isolate the most viable and motile spermatozoa, which are then used for fertilization.

4. Egg Fertilization

- Processed sperm is combined with the eggs either through conventional IVF or via Intracytoplasmic Sperm Injection (ICSI) depending on the infertility cause.
- Fertilization is monitored under laboratory conditions to ensure embryo formation.

5. Embryo Development

- Fertilized eggs develop into embryos over a period of 3–5 days in a controlled laboratory environment.
- Embryo quality is assessed, and in some cases, Preimplantation Genetic Testing (PGT) may be performed to screen for genetic abnormalities.

6. Embryo Transfer

- Selected healthy embryos are transferred into the recipient's uterus at an optimal time in the menstrual cycle.

- The procedure is minimally invasive and usually performed under ultrasound guidance.

7. Pregnancy Test and Follow-Up

- Approximately two weeks after embryo transfer, a pregnancy test is conducted to confirm implantation success.
- Ongoing monitoring continues to ensure the health of the pregnancy and manage any complications.
- The IVF process integrates advanced reproductive technologies with clinical monitoring to maximize fertilization and implantation success. Variations such as frozen embryo transfer (FET), donor egg cycles, and ICSI are applied based on patient-specific fertility challenges.

3.2 Market Size – IVF Industry

The global IVF market is estimated at USD 27.49 billion in 2024 and is projected to reach USD 54.60 billion by 2034, reflecting a CAGR of 7.10%. Within this landscape, the Indian IVF market is expected to expand from USD 1.32 billion in 2024 to USD 4.54 billion by 2034, registering a robust CAGR of 13.13%. This implies India's share of the global market is set to rise from ~4.8% in 2024 to ~8.3% by 2034, positioning it as one of the fastest-growing IVF markets worldwide.

Note: E-Estimated, P-Projected

Growth in India is underpinned by structural and demographic shifts. Rising infertility prevalence, delayed marriages, changing lifestyle patterns, and increasing maternal age have expanded the addressable patient pool. Greater awareness of assisted reproductive technologies (ART), particularly IVF, across urban and semi-urban centres is expected to accelerate adoption.

In addition, technological advancements such as AI-enabled embryo selection, preimplantation genetic testing, cryopreservation, and improved clinical protocols are enhancing success rates and patient confidence. Supportive regulatory frameworks, including the ART and Surrogacy Acts, along with the potential inclusion of fertility treatments under insurance, are expected to broaden affordability and access.

Collectively, these factors position India as a critical growth hub within the global IVF landscape, supported by favourable demographics, medical expertise, and rising affordability.

3.3 Fertility rate among different countries in world

Source: World Bank Group, Infomerics Analytics & Research

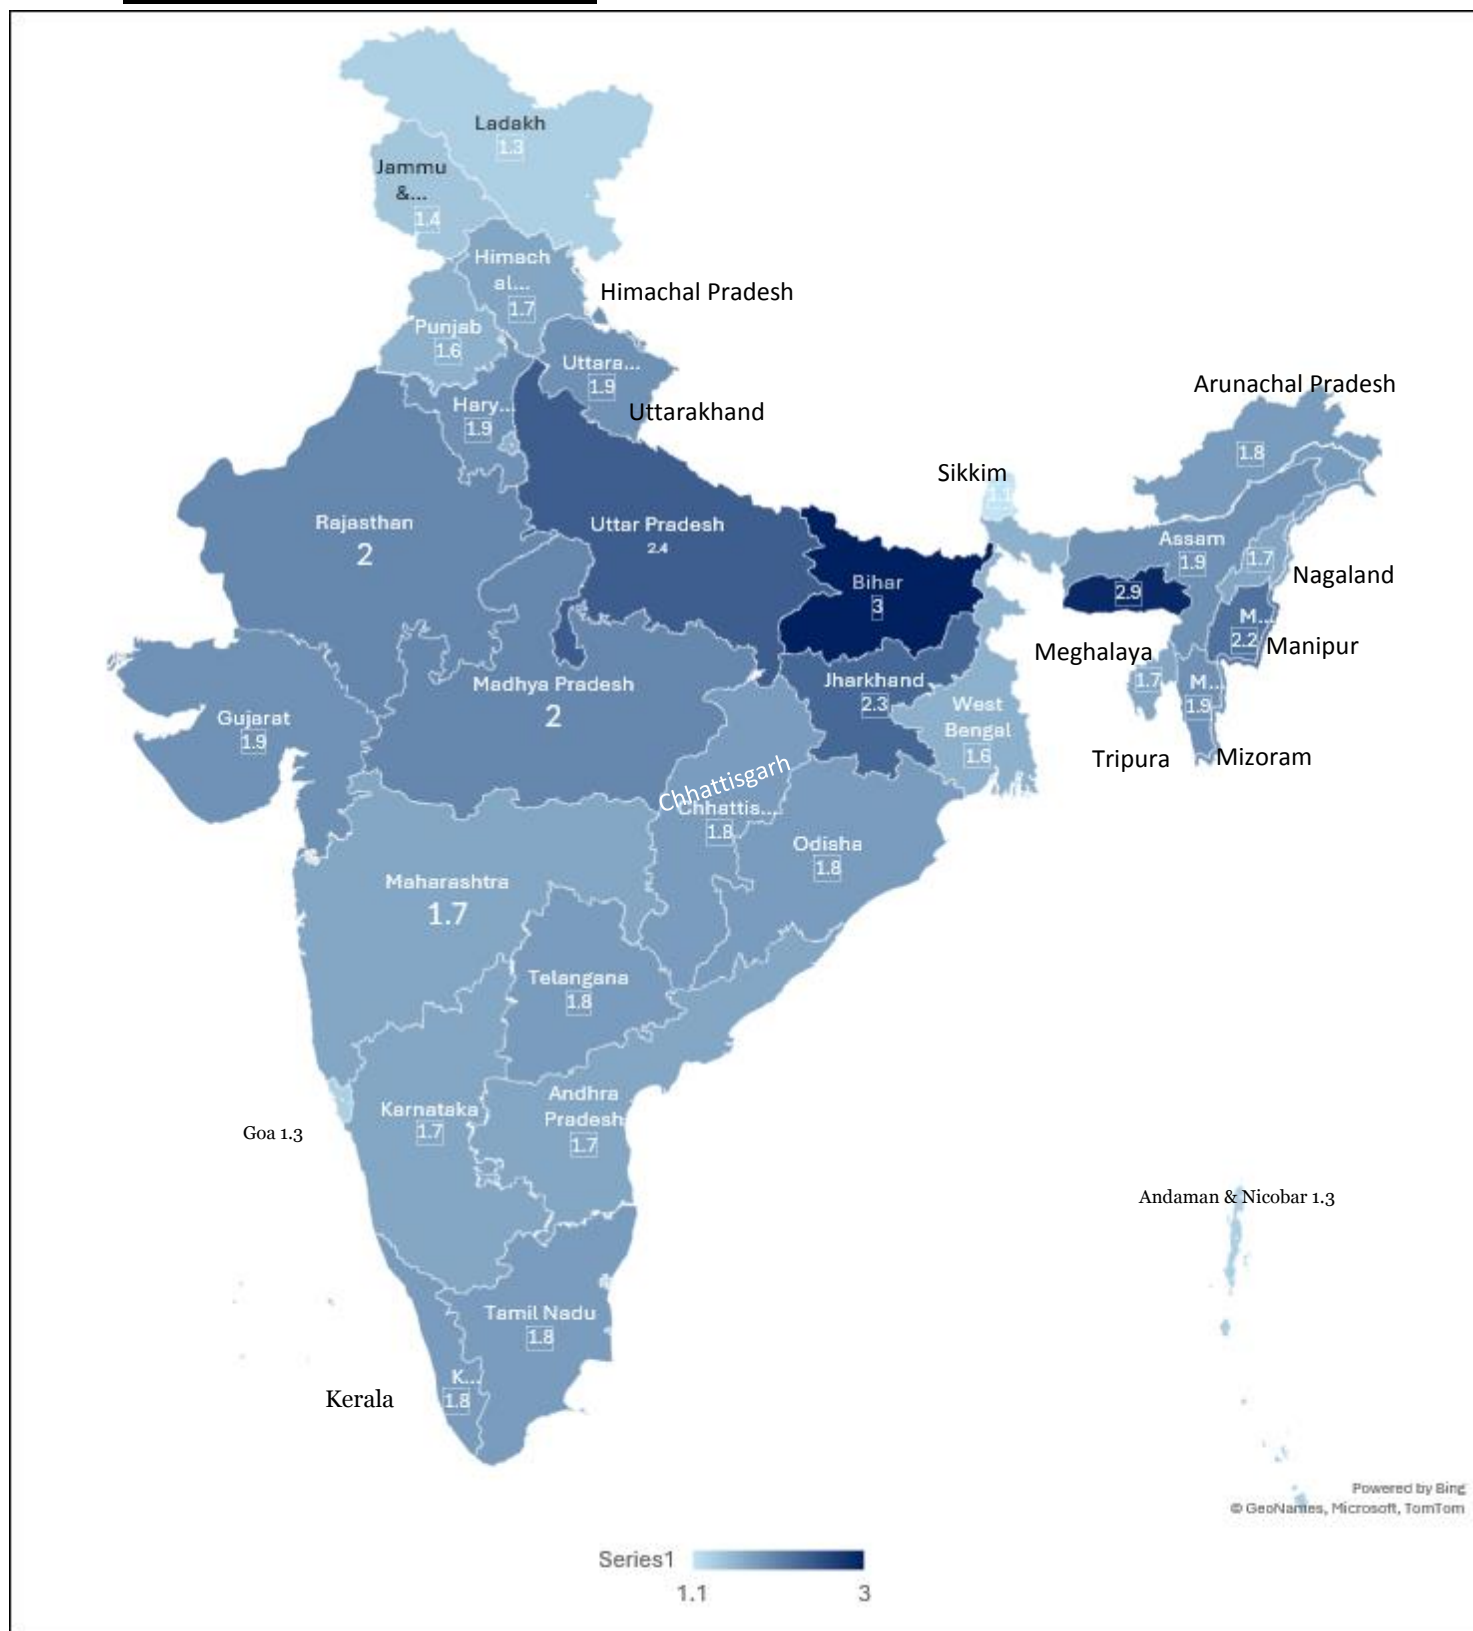

While the global population is projected to continue expanding in the coming decades, the pace of growth is slowing significantly due to declining fertility rates worldwide. Fertility rate refers to the average number of children born per woman. Globally, this has fallen from around 3.0 births per woman in 2003 to 2.4 births in 2023, reflecting a sustained downward trend.

Across countries, the decline has occurred at varying rates. Australia's fertility rate dropped from 1.7 in 2003 to 1.5 in 2023, while China saw a sharper decline from 1.6 to 1.0 over the same period. Similarly, the United Kingdom moderated from 1.7 in 2003 to 1.6 in 2023, and the United States declined from 2.0 to 1.6. India, though still above replacement levels, experienced a significant reduction, from 3.1 births per woman in 2003 to 2.0 in 2023. (World Bank Group).

This structural decline in fertility across both developed and developing economies underscores the growing demand for assisted reproductive technologies, including IVF. Countries with rates at or below the replacement level of 2.1 are increasingly turning to medical interventions to address infertility and sustain birth rates, highlighting the relevance and growth potential of the IVF industry.

3.4 State wise fertility rate in India

Note: Jammu & Kashmir is Union Territory excluding Ladakh (UT)

Source: NFHS 5(2019-21), MoH&FW, Infomerics Analytics & Research

The Total Fertility Rate (TFR), which indicates the average number of children a woman is expected to have over her lifetime, exhibits notable variation across Indian States and Union Territories (UTs). According to the latest data, most States and UTs have achieved fertility levels at or below the replacement rate of 2.1, reflecting significant progress in family planning and demographic transition. Low fertility is observed in UTs and states such as Andaman and Nicobar Islands (1.3), Goa (1.3), Ladakh (1.3), Lakshadweep (1.4), Chandigarh (1.4), and Jammu & Kashmir (1.4), indicating early transition and widespread adoption of reproductive health measures. Southern and western states such as Andhra Pradesh (1.7), Karnataka (1.7), Maharashtra (1.7), Himachal Pradesh (1.7), Tamil Nadu (1.8), Kerala (1.8), Telangana (1.8), Chhattisgarh (1.8), and Odisha (1.8) show moderate fertility rates, generally below replacement level. In contrast, higher fertility persists in several northern, eastern, and northeastern states, including Bihar (3.0), Uttar Pradesh (2.4), Jharkhand (2.3), Meghalaya (2.9), and Manipur (2.2), reflecting slower demographic transition in these regions. States like Haryana (1.9), Assam (1.9), Gujarat (1.9), Uttarakhand (1.9), and Rajasthan (2.0) fall in the intermediate range, indicating gradual movement towards replacement-level fertility. Overall, this data underscores regional disparities in population growth, with lower fertility concentrated in urbanized and economically advanced regions, while traditional and rural areas maintain relatively higher fertility levels. These patterns have important implications for healthcare infrastructure, maternal and child health programs, and policy interventions targeting population stabilization across India.

3.6 Market Segmentation – IVF Industry

The IVF industry can be segmented on the basis of source of infertility, technology type, and procedure type. Each segment reflects distinct patient demographics, treatment preferences, and evolving technological adoption.

[The remainder of this page has intentionally been left blank]

3.6.1 Segmentation by Source of Infertility

Around 17.5% of the adult population – roughly 1 in 6 worldwide – experience infertility. (WHO) Infertility may originate from male, female, or combined/unexplained factors, each requiring different medical interventions.

Source: Infomerics Analytics & Research

1. Male Infertility

- Causes include low sperm count, poor sperm motility, abnormal morphology, genetic disorders, or complete absence of sperm (azoospermia).
- Treatments often require advanced procedures such as:
 - **ICSI (Intracytoplasmic Sperm Injection)**, which bypasses natural fertilization by injecting a single sperm into an egg.
 - **TESA (Testicular Sperm Aspiration)**, where sperm is surgically retrieved from the testes in cases of azoospermia.
- Demand for male-focused IVF treatments is expected to rise as lifestyle-related issues (stress, obesity, smoking, pollution) increasingly impact male reproductive health.

2. Female Infertility

- Female infertility stems from conditions such as **Polycystic Ovary Syndrome (PCOS)**, blocked fallopian tubes, endometriosis, ovulation disorders, diminished ovarian reserve, and advanced maternal age.
- IVF treatments may involve **fresh or frozen cycles**, ovarian stimulation protocols, and, in certain cases, **donor egg IVF** when natural oocytes are not viable.
- With urbanization and delayed childbearing, the prevalence of female infertility is rising, making this the largest segment of demand for IVF procedures.

3. Combined/Unexplained Infertility

- In some cases, infertility results from multiple contributing factors across both partners, or the cause remains medically unexplained despite testing.
- This segment often requires advanced diagnostic tools, genetic screening, and combined treatments (such as IVF with PGT).
- Increasing awareness and adoption of diagnostic technologies are helping address unexplained infertility cases, thereby expanding the scope of treatment cycles.

Trend: Male infertility is no longer underdiagnosed and now accounts for a **significant share of IVF demand**, driving adoption of ICSI and TESA-based interventions.

3.5.2 Segmentation By Technology Type

Technological advancements in assisted reproduction have diversified treatment approaches:

1. Conventional IVF (Non-ICSI)

- The standard approach where eggs and sperm are combined in a laboratory dish for natural fertilization.
- Effective for couples without severe male-factor infertility but declining in relative share due to lower fertilization success compared to ICSI.

2. Intracytoplasmic Sperm Injection (ICSI)

- Involves injecting a single sperm directly into the egg.
- Particularly critical in male infertility, cases of poor sperm quality, or when conventional IVF yields low fertilization rates.
- Today, ICSI accounts for the majority of IVF cycles globally, reflecting its high success rates.

3. Frozen Embryo Transfer (FET)

- Embryos created through IVF are cryopreserved and later thawed for implantation.
- Increasingly preferred due to reduced risk of ovarian hyperstimulation, flexibility in scheduling, and comparable or higher success rates than fresh transfers.

4. Preimplantation Genetic Testing (PGT)

- A genetic screening method performed on embryos before transfer to detect chromosomal abnormalities or hereditary disorders.
- Adoption is rising among older women and couples with a family history of genetic diseases.

5. Intrauterine Insemination (IUI)

- A less invasive, lower-cost technique where concentrated sperm is placed directly in the uterus.
- While success rates are lower than IVF, it remains popular as a first-line treatment.

6. Egg Freezing (Oocyte Cryopreservation)

- Allows women to preserve eggs for future use, especially those delaying pregnancy for career, health, or personal reasons.
- This technology is witnessing strong growth in urban markets with greater awareness of fertility preservation.

7. TESA (Testicular Sperm Aspiration)

- A minimally invasive surgical method to retrieve sperm directly from testicular tissue.
- Primarily used in cases of azoospermia or where no sperm is present in ejaculate.

Trend: ICSI dominates the technology landscape, particularly in male infertility, while **FET and egg freezing** are increasingly adopted among women seeking reproductive flexibility.

3.6.2 Segmentation by Procedure Type

IVF procedures vary depending on source and handling of gametes/embryos:

1. Fresh Donor Cycle

- IVF treatment using freshly retrieved donor eggs.
- Selected when the recipient cannot produce viable eggs due to advanced age or medical conditions.

2. Fresh Non-Donor Cycle

- IVF cycle using the patient's own freshly retrieved eggs, transferred immediately after fertilization.
- Once the dominant procedure, it is gradually being replaced by frozen cycles due to safety and scheduling advantages.

3. Frozen Donor Cycle

- Involves using cryopreserved donor eggs.
- Offers flexibility and eliminates the need for synchronization between donor and recipient cycles.

4. Frozen Non-Donor Cycle

- Utilizes a woman's previously frozen eggs or embryos, later thawed and implanted.
- Increasingly preferred as it reduces risks and improves outcomes compared to fresh cycles.

5. Donor Egg IVF Cycle

- Involves fertilization of donor eggs for women with diminished ovarian reserve, ovarian failure, or hereditary conditions.
- Common in women above 38 years, where natural egg quality declines.

6. Other IVF Cycles

- Includes donor sperm cycles, surrogacy-based IVF, and hybrid approaches combining multiple ART techniques.
- Although smaller in volume, these cycles are growing due to changing family structures and social acceptance of assisted reproduction.

Trend: Frozen cycles—both donor and non-donor—are surpassing fresh cycles, driven by reduced medical risks, better embryo viability, and higher patient convenience.

4. Market Dynamics

4.1 Key Growth Drivers

The In-Vitro Fertilization (IVF) industry is undergoing structural transformation driven by demographic shifts, delayed parenthood, rising infertility rates, technological advancements, and supportive regulatory frameworks. Between FY2026 and FY2033, the sector is expected to benefit from both cyclical and secular demand levers, supported by growing awareness, affordability of treatments, and expansion of specialized healthcare infrastructure.

Detailed Overview:

1. Growth of Reproductive Tourism

India's significant cost advantage (IVF at ~\$3,000–4,000 vs. \$15,000–20,000 in the US) is driving a steady inflow of international patients. Accessibility of egg donors, comprehensive surrogacy options, and less restrictive regulations on procedures like gender selection add to India's appeal.

2. Advancements in IVF Technology

New techniques such as assisted hatching, vitrification, and sperm retrieval are improving success rates. Innovations like embryo scope (time-lapse imaging) and AI-based embryo selection tools (e.g., Ivy) are expected to become industry standards over the medium to long term.

3. Supportive Government Initiatives

Low-interest loans for fertility clinics, medical supply subsidies, and issuance of medical visas are enhancing India's position as a reproductive healthcare hub. Policy-driven support is expected to play a stronger role in the long term.

4. Delayed Family Planning

Urban couples increasingly prioritize education and careers before marriage and childbirth. The rising average maternal age and growing demand for egg freezing are expected to escalate IVF dependency over the next decade.

5. Rising Fertility Issues

Lifestyle-related infertility (stress, smoking, alcohol, sedentary habits) combined with late pregnancies has resulted in higher incidence rates. With declining natural conception rates, IVF demand is expected to remain structurally high across all timeframes.

6. Growing Awareness and Acceptance

Public awareness campaigns, corporate wellness programs, and digital platforms are reducing stigma around infertility. In the medium to long term, wider acceptance is expected to normalize IVF as a mainstream treatment option.

7. Expansion of Healthcare Infrastructure

The growth of fertility centers in Tier-II and Tier-III cities, coupled with international collaborations, is widening geographic access. Infrastructure improvements will progressively lift penetration and patient inflows.

8. Rising Disposable Incomes & Medical Financing

Increasing affordability through rising incomes, EMI-based financing, and partial insurance coverage is expected to significantly reduce cost barriers. This will expand IVF access beyond premium urban segments.

9. Increasing Role of Corporate & Social Support Systems

Corporate policies covering IVF, egg freezing, and maternity-related treatments, along with NGO support, will continue to encourage adoption. The long-term impact is expected to be high as fertility benefits become a standard HR practice.

4.2 Threats and Challenges

Despite its rapid expansion and rising global relevance, the IVF industry faces several structural and regulatory challenges that could influence its long-term growth trajectory and sustainability. The sector's dependence on advanced medical technology, skilled specialists, and evolving ethical as well as legal frameworks creates a complex operating environment for fertility clinics and healthcare providers. Additionally, rising competition, high treatment costs for patients, and sensitivity to success rates may exert pressure on margins and limit accessibility for a broader population segment.

Market Restraints and Impact Assessment (FY2026–FY2032)

Restraint	Impact		
	1–2 Years	3–4 Years	5–7 Years
1. High Cost of IVF Treatment	High	High	Medium
2. Lack of Regulatory Framework and Uniform Regulations	Medium	High	High
3. Vulnerability of Women in Cross-Border Reproductive Tourism	Medium	High	High
4. Cultural Stigmas	Medium	Medium	Low
5. Psychological Impact on Patients	Medium	High	High

Source: Infomerics Analytics & Research

Detailed Overview:

1. High Cost of IVF Treatment

Even with government subsidies, IVF treatments remain financially burdensome due to uncovered costs such as consultations, storage, and travel. This deters many couples from seeking treatment in the short to medium term, though affordability initiatives and financing options may ease the burden over the long term.

2. Lack of Regulatory Framework and Uniform Regulations

Fragmented regulations around ART, donor guidelines, surrogacy, and ethical norms create compliance risks and erode patient confidence. This challenge is likely to intensify as cross-border reproductive care grows, demanding stricter oversight in the long term.

3. Vulnerability of Women in Cross-Border Reproductive Tourism

Women acting as surrogates in developing economies often face health risks, limited legal recourse, and post-birth neglect. As international demand for affordable surrogacy rises, this challenge will deepen unless clear protections and safeguards are enforced.

4. Cultural Stigmas

Infertility remains a social taboo in many regions, discouraging couples from seeking treatment. Although rising awareness campaigns are gradually reducing stigma, the impact will remain medium-term before declining as IVF becomes normalized.

5. Psychological Impact on Patients

The emotional toll of infertility and IVF failures contributes to stress, depression, and strained relationships. Inadequate access to counselling services exacerbates this challenge, and its significance is expected to persist unless holistic patient support becomes standard practice.

5. GOVERNMENT INITIATIVES AND POLICY SUPPORT

The Indian Assisted Reproductive Technology (ART) and surrogacy ecosystem has transitioned from an unregulated market to one governed by a structured legal framework. The Government of India enacted two landmark legislations—the **Assisted Reproductive Technology (Regulation) Act, 2021 (“ART Act”)** and the **Surrogacy (Regulation) Act, 2021 (“Surrogacy Act”)**—which came into full effect by 2022 and have significantly reshaped the IVF industry. These laws have been formulated to safeguard patient rights, ensure ethical practices, protect surrogate mothers and gamete donors, and maintain transparency across clinics and ART banks.

5.1 Assisted Reproductive Technology (Regulation) Act, 2021

The ART Act establishes the regulatory framework for IVF clinics, ART banks, gamete donation, and related services such as intrauterine insemination (IUI), in vitro fertilization (IVF), and intracytoplasmic sperm injection (ICSI).

Key Provisions:

- **Mandatory Registration:** All ART clinics and banks must be registered with the National Registry of Banks and Clinics of India. Clinics must meet prescribed standards relating to infrastructure, equipment, and qualified staff.
- **Informed Consent:** Clinics are legally obligated to provide patients with detailed written information (procedure, risks, costs, alternatives) in a language they understand, prior to obtaining informed consent.
- **Patient Confidentiality:** Patient identity and treatment details must remain confidential, with disclosure permitted only to the National Registry (which also maintains confidentiality).
- **Rights of the Child:** A child born through ART is legally recognized as the biological child of the commissioning couple/individual and enjoys full inheritance and legal rights.
- **Gamete Donor Regulations:**
 - *Egg Donors:* Must be ever-married women aged 23–35 years, with at least one living child (minimum 3 years old). Donation is limited to once in a lifetime.
 - *Sperm Donors:* Must be men aged 21–40 years. Donation frequency is regulated to prevent consanguinity risks.
 - *Screening:* Mandatory medical, genetic, and psychological screening of all donors.
 - *Anonymity:* Donor and recipient identities remain confidential; only non-identifiable donor information may be shared.
- **Ethical Provisions:** Prohibition of sex selection, embryo trading, or commercial exploitation.
- **Grievance Redressal:** Establishment of State and National Boards to address complaints against clinics.

The ART Act ensures accountability, improves patient confidence, and standardizes service quality, though it has increased compliance costs for smaller clinics.

5.2 Surrogacy (Regulation) Act, 2021

The Surrogacy Act governs the practice of surrogacy in India, shifting the model from commercial to altruistic surrogacy. The law aims to prevent exploitation of surrogate mothers while ensuring ethical practices.

Key Provisions:

- **Ban on Commercial Surrogacy:** Monetary compensation, beyond medical expenses and insurance, is prohibited. Only altruistic surrogacy is permitted.
- **Eligibility of Intended Parents:**
 - Must be an Indian married couple (minimum 5 years of marriage).
 - Female: 23–50 years; Male: 26–55 years.
 - Must not have a surviving biological/adopted child (with certain exceptions for life-threatening conditions).

- Must obtain a medical certificate proving infertility/medical necessity.
- **Eligibility of Surrogate Mother:**
 - Must be a close relative of the intending couple.
 - Ever-married woman aged 25–35 years, with at least one biological child of her own.
 - Can act as a surrogate only once in her lifetime.
 - Must be medically and psychologically fit.
- **Child's Legal Status:** The child born through surrogacy is deemed the biological child of the intending couple.
- **Insurance Coverage:** Comprehensive health insurance for the surrogate mother (as prescribed, minimum 36 months).

The ban on commercial surrogacy has substantially reduced the number of surrogacy cases, limiting demand to altruistic cases within families. This has reduced foreign medical tourism for surrogacy and narrowed the pool of eligible surrogate mothers.

5.3 Impact on Industry Stakeholders

- **Clinics:** Must upgrade infrastructure and reporting mechanisms; compliance costs have increased but credibility has improved.
- **Patients:** Legal safeguards enhance trust, ensuring rights and confidentiality.
- **Donors & Surrogates:** Protected from exploitation but face stricter eligibility norms.
- **International Patients:** Restrictions on surrogacy and donor anonymity have reduced cross-border fertility tourism to India.

The ART Act and Surrogacy Act represent a paradigm shift in India's IVF industry, bringing transparency, ethical accountability, and legal protection. While these regulations have reduced unregulated practices and patient vulnerability, they have also narrowed eligibility criteria for surrogacy and increased compliance obligations for clinics. In the long term, these laws are expected to strengthen India's IVF ecosystem by fostering patient trust and aligning industry practices with global ethical standards.

6. TECHNOLOGY & DIGITAL TRANSFORMATION

The IVF industry is witnessing a wave of technological and digital innovations that are transforming both clinical practices and patient care. These advancements aim to improve success rates, enhance efficiency, and make fertility treatment more accessible and patient-friendly.

6.1 Advancements in Clinical Technology

- **AI and ML Applications:** Enhancing embryo selection, sperm analysis, and predicting IVF success rates.
- **Time-lapse Imaging:** Continuous monitoring of embryo development without disturbance, improving precision in selection.
- **Automation and Robotics:** Streamlining lab procedures to reduce human error and improve efficiency.

6.2 Digital Transformation in Patient Care

- **Telemedicine & Mobile Platforms:** Expanding access to fertility consultations, especially in underserved regions.
- **Fertility Management Software:** Integration of electronic medical records and patient portals to streamline workflows and improve transparency.
- **Wearables & Remote Monitoring:** Supporting personalized treatment plans through continuous data tracking.

These innovations are making IVF more **data-driven, accessible, and patient-centric**, while lowering costs and enhancing success rates.

7. PESTLE Analysis of the Industry

The IVF industry operates within a complex external environment shaped by regulatory, economic, social, technological, legal, and environmental factors. Understanding these dimensions is critical for assessing growth opportunities, potential risks, and long-term sustainability of the sector.

8. Competitive Landscape

India’s IVF industry has evolved into a rapidly growing and increasingly competitive ecosystem. The sector is marked by the presence of specialized fertility clinics, hospital-based IVF units, and emerging pan-India chains that provide standardized treatment protocols. In addition to domestic players, international fertility brands are also entering the

Indian market, driven by rising demand, medical tourism, and regulatory clarity. Clinics cater to a diverse patient base including urban couples, individuals with infertility challenges, and international patients seeking cost-effective solutions.

8.1 Key Factors Shaping Competition

- **Quality of Clinical Outcomes:** Success rates of IVF cycles remain a primary differentiator, with clinics investing in advanced technologies such as AI-driven embryo selection, time-lapse monitoring, and genetic testing to improve live birth rates.
- **Regulatory Compliance:** Adherence to the ART (Regulation) Act, 2021 and the Surrogacy (Regulation) Act, 2021 is now a key competitive factor, as only compliant clinics with registered ART banks and qualified personnel are permitted to operate.
- **Technology Adoption:** Digitally enabled platforms, electronic health records, and teleconsultation services are increasingly leveraged to improve patient engagement and expand reach beyond metropolitan cities.
- **Cost and Accessibility:** Price sensitivity remains high in India. Clinics offering transparent pricing models, installment plans, and cost-effective packages are better positioned to capture middle-income patients.
- **Brand Reputation and Trust:** Word-of-mouth referrals, patient testimonials, and accreditation from reputed medical bodies play a critical role in attracting patients in this trust-sensitive domain.
- **Medical Tourism and International Presence:** India's cost advantage is driving inbound reproductive tourism. Clinics with international tie-ups and multilingual patient support gain an edge in attracting foreign patients.
- **Consolidation and Scale:** Larger, well-capitalized players are expanding through acquisitions and establishing multi-city networks, enabling standardization of practices and brand recognition across regions.

8.2 Competitive Strategies

Players in the Indian IVF industry adopt diverse strategies to strengthen their market position, improve patient outcomes, and expand their geographic reach. Competition is shaped by differentiation in clinical quality, technology integration, cost efficiency, and brand trust.

8.2.1 Focus on Clinical Excellence

- Integration of **telemedicine, fertility apps, and electronic medical records** enhances accessibility and transparency.

- Automation in laboratories and adoption of digital fertility management tools streamline clinical processes, reducing human error and turnaround time.

8.2.4 Patient-Centric Pricing Models

- With cost being a key barrier, players are introducing **package-based treatments, installment schemes, and bundled services** to appeal to middle-income groups.
- Transparent pricing and flexible financing options strengthen trust and widen the patient base.

8.2.5 Brand-Building and Trust Creation

- Clinics invest in **awareness campaigns, patient education programs, and testimonials** to reduce stigma and position themselves as reliable partners in the fertility journey.
- Accreditation from medical associations and adherence to ethical practices enhance brand reputation.

8.2.6 Leveraging Medical Tourism

- India's cost advantage attracts international patients. Clinics adopt strategies such as multilingual support, concierge services, and international collaborations to cater to this segment.
- Tie-ups with overseas agencies and hospitals also help build a steady flow of foreign patients.

8.2.7 Compliance and Ethical Practices

- Strict adherence to the **ART (Regulation) Act, 2021** and the **Surrogacy (Regulation) Act, 2021** has become a critical strategy, as regulatory non-compliance can result in closure or penalties.
- By aligning operations with ethical and legal frameworks, players build credibility with both patients and regulators.

8.3 Barriers to Entry

While the IVF industry in India presents significant growth opportunities, new entrants face considerable challenges in establishing and sustaining operations. These barriers arise from regulatory requirements, capital intensity, clinical expertise, and patient trust considerations.

8.3.1 Regulatory and Compliance Requirements

- The ART (Regulation) Act, 2021 and the Surrogacy (Regulation) Act, 2021 mandate strict registration, reporting, and operational standards for IVF clinics and ART banks.
- Compliance with donor eligibility norms, data reporting to national registries, and patient rights obligations create substantial administrative and legal hurdles for new entrants.

•

8.3.2 High Capital and Infrastructure Costs

- Establishing an IVF clinic requires significant investment in specialized infrastructure, laboratory equipment (e.g., incubators, cryopreservation units), and high-quality consumables.
- Maintaining international-grade facilities with uninterrupted power, sterile environments, and advanced technologies results in high fixed costs.

8.3.3 Requirement of Skilled Manpower

- The industry depends heavily on highly skilled embryologists, fertility specialists, and trained lab technicians.
- The scarcity of such expertise and the cost of retaining qualified professionals act as barriers for small or new entrants.

8.3.4 Brand Trust and Reputation

- IVF is a trust-sensitive industry, where patient decisions are influenced by clinic reputation, success rates, and word-of-mouth referrals.
- New entrants without proven track records may find it difficult to build credibility in the early years.

8.3.5 Technology and R&D Dependence

- Continuous investments in emerging technologies such as AI-based embryo selection, time-lapse imaging, and genetic testing are critical to remain competitive.
- Smaller players may find it challenging to keep pace with innovation due to cost constraints.

8.3.6 Ethical and Social Sensitivities

- IVF services are subject to social scrutiny and ethical debates, particularly around gamete donation, embryo handling, and surrogacy.
- New entrants face the dual challenge of ensuring compliance while managing societal perceptions and cultural sensitivities.

8.3.7 Market Consolidation

- The trend of consolidation, with larger players acquiring smaller clinics, increases competitive pressure.
- Established chains benefit from economies of scale, brand visibility, and patient trust, making market penetration harder for new entrants.

8.4 Consolidation Trends in the IVF Industry

The IVF industry in India is witnessing increasing consolidation as larger players expand their footprints and smaller clinics align with organized networks. This trend is driven by rising compliance costs, the need for advanced technology, and patient preference for established brands with standardized practices.

8.4.1 Drivers of Consolidation

- **Regulatory Pressures:** The implementation of the ART (Regulation) Act, 2021 and the Surrogacy (Regulation) Act, 2021 has increased compliance requirements, pushing smaller unregistered clinics either to shut down or merge with larger, compliant players.
- **Capital and Technology Requirements:** Advanced IVF technologies such as AI-driven embryo selection, pre-implantation genetic testing, and time-lapse imaging require significant investments that are more feasible for well-capitalized players.
- **Patient Trust and Brand Building:** Larger chains leverage brand reputation, success rate data, and accreditation to attract patients, making it difficult for standalone clinics to compete.

8.4.2 Forms of Consolidation

- **Mergers and Acquisitions:** Leading IVF chains are acquiring regional clinics to build multi-city networks and enhance geographical reach.
- **Strategic Partnerships:** Tie-ups between IVF clinics and multispecialty hospitals are growing, enabling integration of fertility services into broader healthcare offerings.
- **Franchise Models:** Some players are expanding through franchise-based models, providing smaller clinics with access to brand name, protocols, and technology.

8.4.3 Implications of Consolidation

- **Standardization of Practices:** Consolidation is leading to uniform treatment protocols, centralized data management, and improved quality of care.

- **Operational Efficiencies:** Larger networks benefit from shared infrastructure, bulk procurement of consumables, and specialized manpower, lowering costs per cycle.
- **Competitive Landscape Shift:** Smaller standalone clinics face margin pressures and reduced patient flow, accelerating further consolidation.
- **Access Expansion:** Organized players with pan-India presence are extending IVF services to Tier II and Tier III cities, improving accessibility beyond metros.

8.5 Key Industry Players

1. Nova IVF Fertility

Nova IVF Fertility (NIF) is among India's largest fertility service providers, operating more than 100 centres across 70+ cities. Established over a decade ago, it has facilitated over 90,000 successful IVF pregnancies. The company offers a wide range of treatments, including IUI, IVF, andrology services, vitrification for egg/embryo preservation, Endometrial Receptor Array (ERA), embryoscope, IMSI, and ICSI. Its approach is anchored in Self-cycle™ IVF, which prioritises the use of a couple's own eggs and sperm, reflecting adherence to ethical and standardized treatment practices.

The company was the first Indian chain to introduce several advanced technologies and protocols, including Magnetic-Activated Cell Sorting (MACS), and has been instrumental in driving adoption of international-quality embryology standards in India. Its clinical model is supported by trained embryologists, IVF specialists, and protocol-driven laboratory practices.

In 2023, Nova IVF Fertility was acquired by Asia Healthcare Holdings (AHH), a TPG-incubated platform, with the acquisition expected to drive further expansion and integration benefits. With established scale and standardised practices, Nova IVF is positioned as one of the leading organised players in the Indian IVF market, though it continues to face competitive pressures from other large chains expanding in Tier I and Tier II cities.

2. Birla Fertility & IVF

Birla Fertility & IVF is part of the C.K. Birla Group, a diversified Indian conglomerate with multi-billion-dollar revenues, over 35,000 employees, and a global presence across technology, automotive, home and building products, and healthcare. Headquartered in Gurugram, Haryana, Birla Fertility & IVF represents the Group's focused entry into advanced reproductive healthcare.

The company employs over 200 professionals, including fertility specialists with experience across more than 120,000 IVF cycles. Its IVF laboratories are designed to meet international standards and offer treatments such as IVF, IUI, ICSI, fertility preservation, egg and embryo freezing, sperm freezing, cancer-related fertility preservation, and surgical interventions including TESA, PESA, and laparoscopy.

Birla Fertility & IVF has differentiated itself through fixed-cost treatment packages and transparent pricing models, enabling patients to plan their treatment with greater clarity. Leveraging the financial strength and brand equity of the C.K. Birla Group, the company is positioned to scale operations in India and expand globally. However, compared to established incumbents such as Nova IVF and Indira IVF, it remains an emerging player with a smaller nationwide footprint.

3. Indira IVF Hospital Limited

Indira IVF Hospital Limited is India's largest specialised fertility services provider, with a network of more than 160 centres across 20+ states. Founded in Udaipur, the company has scaled rapidly over the last decade and has facilitated over 160,000 successful IVF pregnancies. Its service portfolio includes IVF, ICSI, IUI, blastocyst culture, vitrification, and surgical infertility procedures such as laparoscopy and hysteroscopy.

The company's operating model is characterised by protocol-driven embryology labs and a standardised approach across its network. Internal training programmes for embryologists and clinicians support scalability and consistent outcomes.

In 2023, BPEA EQT, part of the EQT Group, acquired a majority stake in Indira IVF at an enterprise valuation of approximately USD 1.1 billion, providing capital for growth, technology adoption, and enhanced governance. The company has also filed a confidential draft with SEBI for a proposed IPO in 2025.

Indira IVF’s key strengths include its large-scale presence in Tier II and Tier III markets, brand equity, and an asset-light rollout model. However, sustaining consistent clinical outcomes at scale, evolving regulatory oversight in ART, and intensifying competition from national players such as Nova IVF and Birla Fertility remain ongoing considerations.

9. Future Outlook

The IVF industry is entering a phase of accelerated and sustained growth, shaped by demographic, technological, and policy-driven factors. Rising infertility rates, delayed marriages, changing lifestyle patterns, and a shift toward late parenthood are creating a strong and expanding demand base for fertility solutions. Increasing social acceptance of assisted reproductive technologies (ART), coupled with growing awareness, is further driving adoption across both metropolitan and non-metropolitan regions.

From a market perspective, the Indian IVF sector is expected to significantly outpace global trends. The market is projected to expand from USD 1.32 billion in 2024 to USD 4.54 billion by 2034, registering a robust CAGR of 13.13%, compared to the global IVF market which is expected to grow from USD 27.49 billion in 2024 to USD 54.60 billion in 2034 at a CAGR of 7.10%. This divergence underscores India’s unique position as one of the fastest-growing fertility markets worldwide.

Technological advancements will be a key enabler of this growth. The adoption of AI-enabled embryo selection, preimplantation genetic testing (PGT), cryopreservation techniques, and minimally invasive fertility procedures is expected to improve clinical outcomes, success rates, and patient confidence. Such innovations also help reduce treatment cycles, enhance cost-effectiveness, and align Indian providers with global best practices, thereby strengthening competitiveness.

Policy and regulatory developments are another critical driver. The implementation of the ART and Surrogacy Acts has provided greater legal clarity, improving patient trust and standardising clinical practices. Looking forward, the potential inclusion of fertility treatments under insurance coverage could materially improve affordability and expand the addressable patient base. At the same time, sustained government focus on women’s health and reproductive care is likely to support further institutionalisation of the industry.

On the demand side, three factors are expected to shape the next decade of growth:

1. **Tier-II and Tier-III Market Penetration** – The hub-and-spoke model will allow operators to expand beyond metros, tapping into large, underserved populations with rising disposable incomes and growing awareness.
2. **Medical Tourism** – India’s cost advantage, clinical expertise, and internationally benchmarked protocols position the country as a leading fertility tourism destination in Asia.
3. **Fertility Preservation** – Increasing awareness of egg freezing, embryo banking, and onco-fertility services is expected to generate new service lines and revenue streams.

In summary, the IVF industry is poised to benefit from a strong confluence of demand growth, technology adoption, regulatory support, and evolving business models. With India projected to outpace global market growth by a wide margin, the sector is set to emerge as a critical hub within the global IVF landscape, offering long-term opportunities for both domestic and international participants.

SERVICES OFFERED

Fertility Treatment

- 1. IVF treatment, or in vitro fertilization:** It is designed to offer couples the possible chance of having a child in a safe and smooth manner. At Gaudium IVF, we understand that each journey to parenthood is unique. That's why we tailor every IVF treatment plan to the individual circumstances of each couple. Our commitment to innovation and excellence ensures that patients receive the most effective care. Equipped with advanced medical expertise and the latest technology, we focus on all aspects of fertility, supporting our patients medically, physically, and emotionally. Our goal is to turn patients into parents, meeting and exceeding the expectations placed on us. The cost of IVF treatment varies based on individual case and complexity. We maintain complete transparency regarding treatment costs. The cost of IVF treatment includes consultations, ultrasounds, biological examinations, hormonal treatments, oocyte sampling, embryo replacement, and freezing. Additional treatments may incur extra charges.
- 2. Intrauterine Insemination (IUI):** Intrauterine insemination (IUI), also known as artificial insemination, is a fertility treatment where sperm are placed directly inside a woman's uterine cavity to enhance the chances of fertilization. For couples facing challenges with natural conception, IUI offers a simple, affordable, and effective solution. By selecting healthy sperm and introducing them directly to the mature female egg, IUI is especially helpful for mild issues with male fertility.

Intrauterine insemination (“**IUI**”, is used to treat both male and female fertility issues, but it is especially effective for mild male infertility or unexplained infertility.

Intrauterine insemination (“IUI”) is used for:

Male Fertility Issues

- Low sperm count (oligospermia)
- Low sperm motility (asthenospermia)
- Ejaculatory dysfunction
- Mild sperm morphology issues

Female Fertility Issues

- Mild endometriosis

- Cervical mucus problems (which can prevent sperm from reaching the egg)
- Ovulation issues (often combined with ovulation-inducing medications)
- Unexplained Infertility

3. **Intracytoplasmic Sperm Injection (ICSI):** It is a highly effective fertility treatment commonly combined with IVF (in vitro fertilization). ICSI is a key part of our comprehensive infertility treatment options, particularly helpful for mild issues with male fertility. ICSI allows for the selection and direct injection of healthy sperm into mature eggs, overcoming issues such as low sperm count or poor sperm movement. Unlike traditional IVF, where sperm and eggs are mixed in a dish for fertilization, ICSI makes sure that even small sperm problems doesn't affect successful fertilization.
4. **Polycystic Ovarian Syndrome (PCOS), also known as polycystic ovarian disease (PCOD):** It is a hormonal condition affecting women of reproductive age. It disrupts the natural hormone balance, often leading to infertility issues. In women with PCOS, the ovaries develop numerous follicles, but these often fail to mature properly, leading to irregular ovulation or lack of ovulation altogether. This irregularity results in irregular menstrual cycles and difficulty conceiving. At Gaudium IVF we have expert doctors to treat patient with PCOS or PCOD.
5. **Male Infertility:** Male fertility issues are like sexual dysfunction, sperm disorder, hormonal imbalance etc. which leads to fertility problems in male. We recognize the seriousness of male infertility and offer advanced treatments tailored to address these challenges effectively.

The Company offers advanced treatment for male infertility such as Testicular Sperm Aspiration (“TESA”), Intracytoplasmic Sperm Injection (“ICSI”), and Intracytoplasmic Morphologically Selected Sperm Injection (“IMSI”), particularly in cases of severe sperm abnormalities.

a) Testicular Sperm Aspiration (“TESA”)

- A minor surgical procedure where sperm is extracted directly from the testes using a fine needle.
- Used for men with azoospermia (absence of sperm in semen) due to blockages or low sperm production.
- Often performed alongside ICSI for fertilization.

b) Intracytoplasmic Sperm Injection (“ICSI”)

- A single, high-quality sperm is injected directly into the egg to facilitate fertilization.
- Used in cases of low sperm count, poor motility or abnormal morphology.
- A key technique in IVF to improve fertilization chances.

c) Intracytoplasmic Morphologically Selected Sperm Injection (“IMSI”)

- A more advanced version of ICSI, where sperms are examined under high-magnification microscopy to select the healthiest one.
- Improves success rates in men with severe sperm abnormalities or recurrent IVF failures

6. **Endometriosis Treatment:** Endometriosis is a medical condition where the tissue lining the uterus grows outside the uterine walls, typically in the lower abdomen. While non-malignant, this abnormal growth can impair ovarian and fallopian tube function, leading to infertility. At Gaudium IVF we have expert doctors for Endometriosis treatment.

Endometriosis treatment can be medicinal, surgical, or a combination of both, depending on the severity of symptoms, the extent of the disease, and whether fertility is a concern.

a) Medicinal Treatment (Non-Surgical Approach)

- Used to manage pain and slow disease progression but does not cure endometriosis;
- Pain Management: NSAIDs (e.g., ibuprofen) for pain relief;

- Hormonal Therapy (to suppress endometrial tissue growth);
- Birth control pills (oral contraceptives);
- Progestins (e.g., Depo-Provera, Mirena IUD);
- GnRH agonists (e.g., Lupron) to induce temporary menopause;
- Aromatase inhibitors (e.g., Letrozole)

b) Surgical Treatment

- Recommended for severe cases, infertility, or when medications do not provide relief;
- Laparoscopy (Minimally Invasive Surgery);
- Used to diagnose and remove endometrial lesions, cysts, and adhesions;
- Improves fertility outcomes if endometriosis affects reproductive organs;
- Laparotomy (Open Surgery);
- Performed in rare, extensive cases;
- Hysterectomy (Last Resort);
- Removal of the uterus (and sometimes ovaries) for severe cases with no future pregnancy plans.

- 7. Ovulation Induction (OI):** Ovulation is the monthly release of a single egg from one of the ovaries. Successful fertilization of this egg results in a missed menstrual period, indicating a potential pregnancy. Ovulation Induction involves stimulating the ovaries to release eggs, typically through oral or injectable medications. Essentially, ovulation induction is a proactive step taken by fertility specialists to facilitate natural conception.
- 8. Laser Assisted Embryo Implantation:** Laser-assisted hatching is a modern lab technique that uses lasers to help embryos attach better in the uterus during IVF or ICSI treatments. This procedure makes the embryo's outer shell thinner, making it easier for the embryo to hatch and attach to the uterus, which can increase the chances of a successful pregnancy.
- 9. Infertility Surgeries:** We offer advanced surgical treatments for infertility, catering to both male and female patients. These surgeries are recommended when other treatments have failed or when the condition necessitates surgical intervention.
- 10. Surrogacy:** We only provide medical/fertility treatment required for surrogacy for women, who is medically unfit to conceive, arranging donor, regulatory approvals and all other related permissions are done by the patient itself.

Process Flow

The brief process is explained below:

Lead Generation: Leads are generated through referrals from doctors, existing patients, direct inquiries, and walk-in customers. The company has entered into a strategic alliance with Spokes (Gaudium Infertility Expert) to achieve the mutual goal of spreading awareness about Assisted Reproductive Technology (ART) and IVF treatment. We conduct Advertising and Marketing campaigns to build trust, educate the public, and drive new patient engagement.

Patient Onboarding: Registration of patient is done at the center and appointment is fixed with the consultant doctor according to the time and date opted by the client. We provide free OPD and ultrasound on first visit of the patient. After going through the details of USG and other reports, we discuss the nature and complexity of problem with the patient and prescribe the treatment accordingly.

Fixing Treatment Package: Our finance counselor provide various packages for different treatments that varies from patient to patient, where one can opt the package according to their affordability and various payment option mode like lumpsum payment, payment in installment, online or cash mode.

IVF Process Starts: After the payment terms and condition are agreed upon by the client, we start our treatment by various test and reports and accordingly we start injection module to stimulate egg formation. One or more eggs are collected from the ovary and then fertilised with sperm in the lab. Embryo are then cultured in lab for 3 to 5 days and when embryo are fully ready, then it is transferred to ovary via day care procedure. If the pregnancy is successful then patient advised with routine checkups and wait till the delivery date. In unsuccessful IVF cycle, patient is guided for next IVF cycle.

Pregnancy and Delivery: Successful IVF patient can opt to deliver at our hospital which is located in Delhi or they can opt wherever they find it fit according to their convenience and affordability. At our hospital we offer delivery packages in which price varies according to the room selection, along with this we also provide routine support from 4 to 9 months of pregnancy.

Procedure

IVF Process

1. **Consultation & Testing:** Consultation is done for the patient eligible for IVF treatment and testing and preparing them for IVF. Number of tests are performed like blood test, semen analysis etc. to assess fertility challenges and possibilities.
2. **Ovary Stimulation:** Ovarian stimulation is a crucial part in the process of egg production for assisted reproduction. Fertility medications, both oral and injectable, are commonly prescribed to enhance egg development and improve the chances of a successful pregnancy. Hormonal treatments may also be incorporated to achieve favorable outcomes. The maturation of eggs is typically monitored using transvaginal ultrasound to determine the appropriate timing for egg retrieval.
3. **Ovum Pickup (OPU)/ Egg Retrieval:** Egg retrieval is conducted in a controlled surgical environment under intravenous sedation. During the procedure, doctors use a thin needle to take fluid from ovarian follicles. They guide the needle with a special imaging tool called transvaginal ultrasound, which helps them see inside the body. Once the follicles are collected, the embryologist carefully examines the follicular fluid to identify all available eggs. The retrieved eggs are then placed in a specialized culture medium and stored in an incubator to maintain optimal conditions until the insemination process.

4. **Egg Fertilization:** Once the eggs are transferred to the laboratory, they are examined under a microscope and prepared for fertilization using either fresh or frozen sperm. A technique known as Intracytoplasmic Sperm Injection (ICSI) is then employed, in which a single healthy sperm is carefully injected into each viable egg to facilitate fertilization.
5. **Embryo Transfer (ET):** Embryo transfer is done generally 5 – 6 days' post fertilization of egg. Embryo transfer is a simple procedure that does not require any anesthesia. Embryos are loaded in a soft catheter and are placed in the uterine cavity through the cervix under ultrasound guidance and are placed into women's womb.
6. **Successful Pregnancy:** Two weeks after the embryo transfer, a blood test is performed to determine pregnancy. A small sample is taken from the patient and sent to a laboratory to measure the levels of human chorionic gonadotropin (HCG), a hormone that indicates pregnancy. If HCG is detected above a certain threshold, it confirms pregnancy. If the result is negative, the patient will consult with their fertility specialist to discuss potential next steps.

Further, Post pregnancy, the patient gets the routine support like monitoring, testing including vaccine from 4 – 9 months. Additional, if a patient has a miscarriage after the embryo transfer (ET), Gaudium IVF provides care and support. If the patient wants to try again, we help them with the next embryo transfer cycle and offer different package options.

	Total No. of Cycle performed (ET+OPU)	1,824		3,476		3,711		3,512	

Reason for considering OPU and ET as separate cycle:

A cycle refers to entire sequence from initial patient OPD test, → Ovarian Stimulation → Egg Retrieval → Embryo Culture → Embryo Transfer → Pregnancy test, this refers to a complete cycle in medical terminology, but for financial and MIS purpose Company considers process till OPU as one cycle and ET process as another cycle.

The IVF treatment is primarily recommended for couples experiencing medical challenges with conception. However, with increasing awareness, evolving life goals, and the trend of delayed marriages, more women at their best health

are opting to freeze their ovum for future use. This approach differs from the conventional IVF cycle, where embryo transfer typically follows the ovum pick-up (OPU) procedure within the same cycle.

There have been such instances in the medical history of IVF treatment, wherein the unmarried women at their best health opt to perform OPU process before marriage and then follow up with Embryo transfer once they are married and ready for conceiving a child.

Given these evolving patient preferences and advancements in treatment protocols, it is both practical and appropriate to consider OPU and ET as distinct and separate cycles in modern IVF practices.

Below is the number of patients for whom both Pickup and ET are performed for the same patient in that year and both ET and Pickup as one cycle

In-house Development of GAAT for Advanced Genome-Based IVF Treatment

The Gaudium Advanced Analysis and Treatment (GAAT) module, developed by Gaudium IVF and Women Health Limited, is a proprietary process designed to enhance IVF success rates in complex infertility cases through the application of genome sequencing across multiple stages of the IVF cycle. Aimed at improving outcomes for high-risk patients, such as those with recurrent implantation failure, recurrent miscarriages, poor ovarian reserve, genetic predispositions, or advanced parental age (above 42 years).

GAAT enables a highly personalized treatment approach. The process involves three categories of analysis: female partner, male partner, and embryo. Genetic insights from these analyses guide hormone therapy customization, identify sperm DNA abnormalities, and assist in selecting the healthiest embryos, thereby improving implantation and pregnancy rates.

Financially, GAAT development costs are recorded as Intangible Assets Under Development, amounting to ₹738.50 lakhs as of March 31, 2025. During Fiscal 2024, ₹250.00 lakhs was paid in advance to Dr. Manika Khanna, as professional fees related to GAAT's development which was capitalized in the fiscal 2025.

Apart from the consideration as stated above which has been paid to Dr. Manika Khanna, the company is not paying any Royalty or any other consideration to Dr. Manika Khanna for GAAT Development historically or in future.

Cryopreservation, also known as cryobanking, is the process of preserving cells, tissues, or organs at ultra-low temperatures to maintain their viability for future use. Cryopreservation halts biological degradation by rapidly lowering the temperature, effectively pausing all cellular processes. This allows biological materials to be stored for extended periods without deterioration. The temperature for cryopreservation is typically between -196°C and -80°C.

Cryopreservation is widely used in medical research, clinical treatments, and reproductive medicine. Cryopreservation is also use in Fertility & IVF (Semen, eggs, and embryos are cryopreserved for future use), offering flexibility in fertility treatments.

The most advanced method of cryopreservation in IVF today is vitrification, a rapid freezing technique that prevents ice crystal formation, ensuring higher survival rates for frozen eggs and embryos.

All Gaudium IVF labs utilize this vitrification method, enhancing the success rates of assisted reproductive treatments. Lab temperature are maintained at 22°C temperature and this is the part of the sterile frozen gametes and are stored in cryocans filled with liquid nitrogen (-196°C) which are kept in the sterile area of the Lab OT complex

- c) **Surgical Suite:** Proper equipped surgical suite for egg retrieval and embryo transfer.

3. Specialized Equipment's:

- a) **Incubators:** Incubators serves as temporary housing of embryos that are transferred back to the female for implantation. IVF incubators are special machines that create conditions like those inside a woman's uterus. They help embryos grow and develop properly during the IVF process.
- b) **Microscopes:** Latest microscopes are used for examination of eggs, sperm, and embryos.

- c) **Laminar Flow Hoods:** Laminar flow hoods are special workspaces that keep the area clean by blowing filtered air in one direction. This helps protect against dust and other particles, making it safer for sensitive work, like handling eggs and embryos in IVF.
- d) **Centrifuges:** These devices are very secure and maintain a steady temperature. They help keep semen and embryos safe from dust and airborne germs, protecting them during the IVF process.
- e) **Cryo Storage Tank:** A cryo storage tank is used to freeze and store fertilized eggs (embryos) so they can be saved for future use.

4. Maintenance of Equipment:

- c) **Staff Rooms:** For clinical and administrative staff.

6. Compliance & Safety:

- a) **Biohazard Disposal Units:** They are special containers which are used for safely disposing of medical waste. They ensure that harmful materials, like used needles and other biohazardous items, are handled safely

National Ethical Guidelines for Biomedical and Health Research Involving Human Participants, 2017 (“ICMR Code”)

The Indian Council of Medical Research has issued the ICMR Code which envisages that medical and related research using human beings as research participants must only be carried out after due consideration of all alternatives and the use of human participants is considered to be essential for the proposed study. The ICMR Code lays down the requirement of ensuring privacy and confidentiality along with ensuring that such studies are conducted in a transparent and environmentally friendly manner. As required by the ICMR Code, it is mandatory that all proposals on biomedical research involving human participants should be cleared by an appropriately constituted independent and impartial institutional ethics committee to safeguard the welfare and the rights of the participants. The committee should preferably have 7 to 15 persons while maintaining a balance between medical and non-medical/ technical and non-technical members, depending upon the needs of the institution. These ethics committees are entrusted with the initial review of research proposals prior to their initiation, and also have a continuing responsibility to regularly monitor the approved research to ensure ethical compliance during the conduct of research. Such an on-going review has to be in accordance with the international guidelines wherever applicable and the Standard Operating Procedures of the World Health Organization.

The ICMR Code also provides that the human participants may be paid for the inconvenience and time spent, and should be reimbursed for expenses incurred, in connection with their participation in the research. They may also receive free medical services. During the period of research, if any such participant requires treatment for complaints other than the one being studied necessary, free ancillary care or appropriate treatments may be provided. However, the ethics committee is entrusted to ensure that payments should not be so large or the medical services so extensive as to make a prospective participant’s consent readily to enrol in research against their better judgment, which would then be treated as undue inducement.

(Refer Note 39)

b) Historical Cost Convention

The Restated Consolidated Financial Information have been prepared on a historical cost basis, except for the following:

- Certain financial assets and liabilities (including derivative instruments) and contingent consideration that is measured at fair value or amortized cost;
- Defined benefit plans – plan assets measured at fair value;

c) Current / Non-Current Classification

Any asset or liability is satisfied as current if it satisfies any of the following conditions:

- Asset / Liability is expected to be realised / settled in the Group's normal operating cycle
- Asset is intended for sale or consumption
- Asset / Liability is held primarily for the purpose of trading
- Asset is a cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date
- In case of a Liability, the Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date

For the purpose of this classification, the Group has ascertained its normal operating cycle as twelve months, which is based on the nature of business and time between acquisition of assets and inventories for processing and their realisation in cash and cash equivalents.

d) Use of Material Accounting Estimates and Judgements

Estimates, assumptions concerning the future and judgements are made in the preparation of the financial statements. They affect the application of the Group's accounting policies, reporting amounts of assets, liabilities, income and expense and disclosures made. Although these estimates are based on management's best knowledge of current events and actions, actual result may differ from those estimates.

The critical accounting estimates and assumptions used and areas involving a high degree of judgements are described below:

3.1 Use of estimation and assumption

In the process of applying the entity's accounting policies, management had made the following estimation and assumptions that have the significant effect on the amounts recognized in the financial statements. The estimates and assumptions used in accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as on the date of the financial statements, reviewed on an ongoing basis. Any revision to accounting estimates is recognized prospectively in current and future periods.

a) Property, Plant and Equipment & Intangible Assets

Key estimates related to long-lived assets (property, plant and equipment and intangible assets) include useful lives, recoverability of carrying values and the existence of any retirement obligations. As a result of future decisions, such estimates could be significantly modified. The useful lives as mentioned in Note No. 4.2 and Note No. 4.3 is applied as per Schedule II of Companies Act, 2013 and estimated based upon our historical experience, technical estimates and industry information. These estimates include an assumption regarding periodic maintenance and an appropriate level of annual capital expenditures to maintain the assets.

b) Employee Benefits - Measurement of Defined Benefit Obligation (DBO)

Management assesses post-employment and other employee benefit obligations using the projected unit credit method based on actuarial assumptions which represent management's best estimates of the variables (such as standard rates of inflation, medical cost trends, mortality, discount rate and anticipation of future salary increases) that will determine the ultimate cost of providing post-employment and other employee benefits. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

c) Income Taxes

The Group recognizes tax liabilities based upon self-assessment as per the tax laws. When the final tax outcome of these matters is different from the amounts that were initially recognized, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

3.2 Critical judgements made in applying accounting policies

a) Revenue

The Group recognizes revenue from contracts with customers based on a five-step model as per Ind AS 115 which involves judgements such as identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables. The management exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. It considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Revenue from services which is recognized over time using percentage-of-completion method. The management uses judgement to estimate the services provided as on reporting date as a proportion of total services provided which is used to determine the degree of the completion of the performance obligation.

b) Recognition of Deferred Tax Assets

The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilized. In addition, significant judgement is required in assessing the impact of any legal or economic limits or uncertainties in various tax jurisdictions.

c) Recognition of Deferred Tax Liabilities on Undistributed Profits

The extent to which the Group can control the timing of reversal of deferred tax liability on undistributed profits of its subsidiaries requires judgement.

d) Evaluation of Indicators for Impairment of Assets

The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.

e) Expected Credit Losses

Expected credit losses of the Group are based on an evaluation of the collectability of receivables. A considerable amount of judgement is required in assessing the ultimate realization of these receivables, including their current credit worthiness, past collection history of each customer and ongoing dealings with them. If the financial conditions of the counterparties with which the Group contracted were to deteriorate, resulting in an impairment of their ability to make payments, additional expected credit loss may be required.

f) Useful Life of Depreciable/Amortizable Assets

Management reviews its estimate of the useful lives of depreciable/amortizable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical and economic obsolescence that may change the utility of certain software, customer relationships, IT equipment and other plant and equipment.

g) Fair Value Measurements

Management applies valuation techniques to determine the fair value of financial instruments (where active market quotes are not available) and non-financial assets. This involves developing estimates and assumptions consistent with how market participants would price the instrument. Management uses the best information available. Estimated fair values may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date.

h) Provisions

At each balance sheet date, basis the management judgement, changes in facts and legal aspects, the Group assess the requirement of the provisions. However, the actual future outcome may be different from this judgement.

i) Leases

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised. The Group has several lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain or not to exercise the option to renew or terminate the lease. That considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.

4. Material Accounting Policy Information

4.1 Basis of Consolidation

Subsidiaries

The Subsidiaries, Gaudium International Private Limited and EKK Global Private Limited, are the Entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. The Subsidiary is fully consolidated from the date on which control is transferred to the Group. It is deconsolidated from the date that control ceases. Profit or loss and other comprehensive income ('OCI') of subsidiary acquired or disposed of during the period are recognized from the effective date of acquisition, or up to the effective date of disposal, as applicable. The subsidiary has a consistent reporting date of that of the Holding Company.

The Group combines the financial statements of the parent and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intergroup transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of the subsidiaries is aligned where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests, if any, presented as part of equity, represent the portion of a subsidiary's profit or loss and net assets that is not held by the Group. Profit or loss and each component of OCI are attributed to the equity holders of the Holding Company and to the non-controlling interests, if any, even if this results in the non-controlling interests having a deficit balance. The Group attributes total comprehensive income or loss of subsidiaries between the owners of the parent and the non-controlling interests, if any, based on their respective ownership interests.

The Group treats transactions with non-controlling interests, if any that do not result in a loss of control as transactions with equity owners of the group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiaries. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognized within equity.

Business Combinations

The Group applies the acquisition method in accounting for business combinations. The consideration transferred by the Group to obtain control of a subsidiary is calculated as the sum of the acquisition-date fair values of assets transferred, liabilities incurred and the equity interests issued by the Group, which includes the fair value of any asset or liability arising from a contingent consideration arrangement. Acquisition costs are expensed as incurred.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their acquisition date fair values.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the difference is recognized in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognizes the gain directly in equity as capital reserve, without routing the same through OCI.

Annexure-V- Consolidated Summary of Material Accounting Policies and Other Explanatory Information

Where settlement of any part of cash consideration is deferred, the amount payable in the future is discounted to their present value as at the date of exchange. The discount rate used is the Group's incremental borrowing rate, being the rate at which the similar borrowing could be obtained from an independent financier under comparable terms and condition.

Contingent consideration is classified either as equity or financial liability. Amount classified as financial liability are subsequently re-measured to fair value with changes in fair value recognized in profit or loss.

Business combinations involving entities or businesses under common control have been accounted for using the pooling of interest's method. The assets and liabilities of the combining entities are reflected at their carrying amounts. No adjustments have been made to reflect fair values, or to recognize any new assets or liabilities except changes made to harmonize the accounting policies.

4.2 Property, Plant and Equipment and Depreciation

Initial Recognition

All items of property, plant and equipment are initially measured at cost. The cost of an item of plant and equipment is recognized as an asset if, and only if, it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Cost includes its purchase price (after deducting trade discounts and rebates), import duties & non-refundable purchase taxes, any costs directly attributable to bringing the asset to the location & condition necessary for it to be capable of operating in the manner intended by management, borrowing costs on qualifying assets and asset retirement costs.

The activities necessary to prepare an asset for its intended use or sale extend to more than just physical construction of the asset. It may also include technical (DPR, environmental, planning, Land acquisition and geological study) and administrative work such as obtaining approvals before the commencement of physical construction.

The cost of replacing a part of an item of property, plant and equipment is capitalized if it is probable that the future economic benefits of the part will flow to the Group and that its cost can be measured reliably. The carrying amount of the replaced part is derecognized.

Costs of day-to-day repairs and maintenance costs are recognized into the statement of profit and loss account as incurred.

Subsequent measurement

Subsequent to recognition, property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

The residual values, estimated useful lives and depreciation method are reviewed at each financial year-end, and adjusted prospectively, if appropriate.

Depreciation

Depreciation is provided on Straight Line Method, as per the provisions of Schedule II of the Companies Act, 2013 or based on useful life estimated on the technical assessment. Asset class wise useful lives are as under:

Type of Assets	Useful Life
Plant and Machinery	15 years
Operation Theatre Equipment	13 years
Furniture and Fixtures	10 years
Electrical Equipment	10 years
Motor Vehicles	8 years
Office Equipments	5 years
Computers	3 years
Leasehold Improvements	Over Lease Term

Annexure-V- Consolidated Summary of Material Accounting Policies and Other Explanatory Information

In respect of additions / deletions to the fixed assets / leasehold improvements, depreciation is charged from the date the asset is ready to use / up to the date of deletion.

De-recognition

An item of plant and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset is recognized in the profit or loss in the year the asset is derecognized.

Capital Work in Progress and Capital Advances

Cost of asset not ready for intended use and assets under installation or under construction as at the Balance Sheet date will be shown as Capital Work in Progress. Advances given towards acquisition of fixed assets outstanding at each Balance Sheet date are disclosed as Other Non-Current Asset in accordance with Schedule III to the Companies Act, 2013.

4.3 Intangible Assets & Amortization

Initial Recognition

Intangible assets acquired separately are initially measured at cost. Intangible assets are recognized if and only if, it is probable that the future economic benefits that are attributable to the asset will flow to the Group and the cost of the asset can be measured reliably.

Cost of separately acquired intangible assets includes its purchase price (after deducting trade discounts and rebates), import duties & non-refundable purchase taxes, any costs directly attributable to preparing the asset for its intended use.

Subsequent measurement and Amortization

Intangible assets are stated at cost of acquisition less accumulated amortization and accumulated impairment losses, if any. Subsequent expenditure related to an item of intangible assets are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

The carrying values of intangible assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

The residual values, estimated useful lives and amortization method are reviewed at each financial year-end, and adjusted prospectively, if appropriate

The useful lives of intangible assets are assessed as either finite or indefinite. Finite-life intangible assets are amortised on a straight-line basis over the period of their estimated useful lives. Estimated useful lives by major class of finite-life intangible assets are as follows

Intangible Assets	Method of Amortization	Estimated Useful life
Trademarks	on straight-line basis	10 years
Software	on straight-line basis	3 years

The amortization expense is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Indefinite life intangible assets comprises of those assets for which there is no foreseeable limit to the period over which they are expected to generate net cash inflows. These are considered to have an indefinite life, given the strength and durability of the Company and the level of marketing support.

De-recognition

The amortization expense is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset. Indefinite-life intangible assets comprises of those assets for which there is no foreseeable limit to the period over which they are expected to generate net cash inflows.

These are considered to have an indefinite life, given the strength and durability of the Group and the level of marketing support.

For indefinite life intangible assets, the assessment of indefinite life is reviewed annually to determine whether it continues, if not, it is impaired or changed prospectively based on revised estimates.

4.4 Intangible Asset Under Development

Recognition and Initial Measurement

Intangible development costs are capitalized **only when** the following criteria are met:

- Technical and commercial feasibility is demonstrated
- Future economic benefits are probable
- The company intends and is able to complete and use or sell the asset
- The costs can be measured reliably

Development costs are capitalized as an intangible asset if it can be demonstrated that prescribed capitalisation criteria are met, the project is expected to generate future economic benefits, it is probable that those future economic benefits will flow to the Company and the costs of the asset can be measured reliably, else it is charged to the Statement of Profit and Loss.

Intangibles under development represent the costs incurred in the development of Gaudium Advanced Analysis and Treatment (GAAT)

4.5 Inventories

Inventories of medicines, medical consumables and drugs are valued at lower of cost and net realizable value. Cost of inventory includes cost of purchase and other costs incurred in bringing them to their present location and condition. Net Realizable Value in respect of consumables is the estimated current procurement price in the ordinary course of the business. Cost is determined on First in First Out (FIFO) basis.

4.6 Impairment of Non – Financial Assets

At each reporting date, the Group assesses whether there is any indication that an asset may be impaired. Where an indicator of impairment exists, the Group makes a formal estimate of recoverable amount. Where the carrying amount of an asset exceeds its recoverable amount the asset is considered impaired and is written down to its recoverable amount.

Recoverable amount is the greater of fair value less costs to sell and value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses of continuing operations, including impairment on inventories, are recognized in the statement of Profit and Loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognized in OCI up to the amount of any previous revaluation surplus.

After impairment, depreciation or amortization is provided on the revised carrying amount of the asset over its remaining useful life.

The impairment assessment for all assets is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the

asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit or loss.

4.7 Financial Assets

Financial assets comprise of investments in equity and debt securities, mutual funds, loans, trade receivables, cash and cash equivalents and other financial assets.

Initial Recognition

All financial assets except investments in associates and joint venture are recognized initially at fair value. However, trade receivables that do not contain a significant financing component are measured at transaction price. Purchases or sales of financial asset that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the assets.

Subsequent Measurement

a. Financial assets measured at amortized cost:

Financial assets held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding are measured at amortised cost using effective interest rate (EIR) method. The EIR amortization is recognized as finance income in the Statement of Profit and Loss.

The Group while applying above criteria has classified the following at amortised cost:

- a. Loans
- b. Trade Receivable
- c. Cash and Cash Equivalents
- d. Other Financial Assets

b. Financial assets at fair value through other comprehensive income (FVTOCI):

Financial assets held within a business model whose objective is to hold financial assets in order to collect contractual cash flows, selling the financial assets and the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding are measured at FVTOCI. Fair Value movements in financial assets at FVTOCI are recognized in other comprehensive income. Equity instruments held for trading are classified at fair value through profit or loss (FVTPL). For other equity instruments the Company classifies the same either at FVTOCI or FVTPL on instrument to instrument basis. The classification is made on initial recognition and is irrevocable. Fair value changes on equity investments at FVTOCI, excluding dividends are recognized in other comprehensive income (OCI).

c. Financial assets at fair value through profit or loss (FVTPL)

Financial assets are measured at fair value through profit or loss if it does not meet the criteria for classification as measured at amortised cost or at fair value through other comprehensive income. All fair value changes are recognized in the statement of profit and loss.

- d. Investments in joint ventures & associates, if any, are carried at cost in the Restated Consolidated Financial Information. However, a provision for diminution in value is made to recognize a decline other than temporary in value of the investments.

Impairment

Financial assets are tested for impairment based on the expected credit losses in accordance with Ind AS 109 on the following financial assets:

a. Trade Receivables

An impairment analysis is performed at each reporting date. The expected credit losses over life time of the asset are estimated by adopting the simplified approach using a provision matrix on its portfolio of trade receivables, which is based on historical

loss rates reflecting current condition and forecasts of future economic conditions. In this approach assets are grouped on the basis of similar credit characteristics such as customer segment, past due status and other factors which are relevant to estimate the expected cash loss from these assets.

b. Other financial assets

Other financial assets are tested for impairment based on significant change in credit risk since initial recognition and impairment is measured based on probability of default over the life time when there is significant increase in credit risk.

De-recognition

A financial asset is derecognized only when:

- The Group has transferred the rights to receive cash flows from the financial asset or
- The contractual right to receive cash flows from financial asset is expired or
- Retains the contractual rights to receive the cash flows of the financial asset but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset and transferred substantially all risks and rewards of ownership of the financial asset, in such cases the financial asset is derecognized. Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is also derecognized if the Group has not retained control of the financial asset.

4.8 Cash and Cash Equivalents

Cash and cash equivalents comprise cash at bank (including deposits with banks with original maturity of three months or less) and cash in hand and short-term investments with an original maturity of three months or less. Deposits with banks are subsequently measured at amortized cost and short-term investments are measured at fair value through statement of profit & loss account.

4.9 Financial Liabilities

Initial Recognition

Financial liabilities are recognized when, and only when, the Group becomes a party to the contractual provisions of the financial instrument. The Group determines the classification of its financial liabilities at initial recognition. All financial liabilities are recognized initially at fair value plus any directly attributable transaction costs, such as loan processing fees and issue expenses.

Subsequent Measurement - at amortised cost

After initial recognition, financial liabilities are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognized in profit or loss when the liabilities are de recognized, and through the amortization process.

De-recognition

A financial liability is de recognized when the obligation under the liability is discharged or cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

4.10 Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset.

Capitalisation of borrowing cost is suspended in the period during which the active development is delayed due to other than temporary interruption. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest, exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost and other costs that an entity incurs in connection with the borrowing of funds.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

4.11 Employee benefits

Employee benefits are charged to the Statement of Profit and Loss for the year.

Retirement benefits in the form of Provident Fund are defined contribution scheme and such contributions are recognized, when the contributions to the respective funds are due. There is no other obligation other than the contribution payable to the respective funds

Gratuity liability is defined benefit obligation and is provided for on the basis of actuarial valuation on projected unit credit method made at the end of each financial year. Re measurement in case of defined benefit plans gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income and they are included in the statement of changes in equity.

Compensated absences are provided for on the basis of actuarial valuation on projected unit credit method made at the end of each financial year. Re measurements as a result of experience adjustments and changes in actuarial assumptions are recognized in statement of profit or loss account.

The amount of Non-current and Current portions of employee benefits is classified as per the actuarial valuation at the end of each financial year.

4.12 Income Taxes

Income tax expense is comprised of current and deferred taxes. Current and deferred tax is recognized in net income except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income. Current income tax relating to items recognized outside profit and loss is recognized outside profit and loss (either in other comprehensive income or in equity). Current income taxes for the current period, including any adjustments to tax payable in respect of previous years, are recognized and measured at the amount expected to be recovered from or payable to the taxation authorities based on the tax rates that are enacted or substantively enacted by the end of the reporting period.

Deferred income tax assets and liabilities are recognized for temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax base using the tax rates that are expected to apply in the period in which the deferred tax asset or liability is expected to settle, based on the laws that have been enacted or substantively enacted by the end of reporting period.

Deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable income nor the accounting income. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable income will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and reduced accordingly to the extent that it is no longer probable that they can be utilized.

Deferred tax assets and liabilities are offset when there is legally enforceable right of offset current tax assets and liabilities when the deferred tax balances relate to the same taxation authority. Current tax asset and liabilities are offset where the entity has legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. Deferred Tax relating to items recognized outside profit or loss is recognized outside profit and loss (either in other comprehensive income or in equity).

4.13 Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group assesses whether a contract is or contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- i. the contract involves the use of an identified asset
- ii. the Group has substantially all of the economic benefits from use of the asset through the period of the lease, and
- iii. the Group has the right to direct the use of the asset

The Group's lease assets consist of the following:

Asset Description	Useful life
Leasehold Building	As per Lease period

At date of commencement of leases, the Group recognized a right -of-use of asset (ROU) and a corresponding lease liability for all the lease arrangements, except for those with a term of twelve month or less (short term leases) and leases of low value assets. For these leases, the Group recognizes lease payments as an operating expense on straight line basis over the lease term.

Initial Measurement

ROU assets are initially measured at cost that comprises of the initial amount of lease liability adjusted for any lease payments made at or prior to the date of commencement, initial direct costs and lease incentives (if any).

Lease Liability is initially measured at the present value of future lease payments that are not paid at that date. The lease payments shall be discounted using the interest the interest rate implicit in the lease or, if not readily determinable, incremental borrowing rate.

Subsequent Measurement

ROU assets are subsequently measured at cost less accumulated depreciation and impairment loss, if any. ROU is depreciated from the date of commencement on a straight-line basis over the shorter of lease term or useful life of the underlying asset.

Lease Liability is subsequently measured by increasing the carrying amount to reflect interest and reducing the carrying amount to reflect the lease payments made.

The carrying amount of lease liability is remeasured to reflect any reassessment or lease modification such as change in lease term.

ROU asset and lease liability are separately presented in the balance sheet and lease payments have been classified as financing cash flows.

Group as a lessor

Leases for which the Group is a lessor is classified as finance or operating lease. Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Lease income from operating leases is recognized in the statement of profit and loss income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

4.14 Provisions

A provision is recognized if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

The Group recognizes decommissioning provisions in the period in which a legal or constructive obligation is incurred. A corresponding decommissioning cost is added to the carrying amount of the associated property, plant and equipment, and it is depreciated over the estimated useful life of the asset.

4.15 Contingent Liabilities

Contingent liability is disclosed in case of:

- A present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation;
- A present obligation arising from past events, when no reliable estimate is possible;
- A possible obligation arising from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group where the probability of outflow of resources is not remote.

4.16 Contingent Assets

Contingent assets are not recognized but disclosed in the financial statements when an inflow of economic benefits is probable.

4.17 Fair Value Measurements

Group follows the following mentioned underneath hierarchy for determining fair values of its financial instruments:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (prices) or indirectly (derived from prices); and
- Level 3 – Inputs for the asset or liability that are not based on observable market data.

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting dates. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The fair value for these instruments is determined using Level 1 inputs.

The fair value of financial instruments that are not traded in an active market (for example, over the counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is fair valued using level 2 inputs.

If one or more of the significant inputs is not based on observable market data, the instrument is fair valued using Level 3 inputs. Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments
- The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves
- The fair value of forward foreign exchange contracts is determined using forward exchange rates at the reporting dates, with the resulting value discounted back to present value
- Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

4.18 Revenue Recognition

Sale of Services: The Group derives revenues primarily from business of providing IVF treatment in bundled packages which includes injections, Ovum/Egg pickup, Embryo Creation and Embryo Transfer. Revenue from service transactions is usually recognised as the service is performed, either by proportionate completion method or by the completed service contract method.

Annexure-V- Consolidated Summary of Material Accounting Policies and Other Explanatory Information

Sale of Products: Revenue is measured at the fair value of the consideration received or receivable for goods supplied, net of returns and discounts to customers. Revenue from sale of goods is recognised on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers.

The Group recognizes revenue from contracts with customers based on a five-step model, such as to, identifying the contracts with a customer, identifying the performance obligations in the contract, determine the transaction price, allocate the transaction price to the performance obligations in the contract and recognize revenue when (or as) the entity satisfies a performance obligation at a point in time or over time.

The Group satisfies a performance obligation and recognizes revenue over time, if one of the following criteria is met:

- The customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs; or
- The Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- The Group's performance does not create an asset with an alternative use to the Group and the entity has an enforceable right to payment for performance completed to date.

For performance obligations where one of the above conditions are not met, revenue is recognized at the point in time at which the performance obligation is satisfied.

Revenue is recognized upon transfer of control of promised products or services to customers in an amount that reflects the consideration we expect to receive in exchange for those products or services.

4.19 Other Income

Interest Income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Group estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in finance income in the statement of profit and loss.

Interest income on fixed deposits is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate.

Dividend income

Dividend income is recognized at the time when right to receive the payment is established, which is generally when the shareholders approve the dividend and it is probable that the economic benefit associate with the dividend will flow to the Group, and the amount of the dividend can be measured reliably.

4.20 Foreign currency transactions

Functional and presentation Currency

The Financial statements are presented in Indian Rupee (₹) which is also the functional and presentation currency of the Group.

Transaction and Balances

Transactions in foreign currencies are translated to the functional currency of the Group, at exchange rates in effect at the transaction date. At each reporting date monetary assets and liabilities denominated in foreign currencies are translated at the exchange rate in effect at the date of the financial statement. The translation for other non-monetary assets and liabilities are not updated from historical exchange rates unless they are carried at fair value.

4.21 Earnings per share

Basic earnings per share are calculated by dividing the profit attributable to owners of the Group by the weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements in equity shares issued during the year and excluding treasury shares.

Diluted earnings per share adjust the figures used in the determination of basic earnings per share to take into account, the after income tax effect of interest and other financing costs associated with dilutive potential equity shares and the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

4.22 Segment Reporting

Operating segments are identified and reported in a manner consistent with the internal financial reporting provided to the chief operating decision makers responsible for allocating resources and assessing performance of the operating segments.

4.23 Events after reporting date

Where events occurring after the Balance Sheet date provide evidence of conditions that existed at the end of the reporting period, the impact of such events is adjusted within the Restated Consolidated Financial Information. Non adjusting events after the Balance Sheet date which are material in size or nature are disclosed separately in the Restated Consolidated Financial Information.

45 Financial Risk Management Objectives and Policies**a. Financial Risk Management Framework**

The Group's principal financial liabilities comprise trade payables and Other financial liabilities. The main purpose of these financial liabilities is to finance the Group's operations. The Group's principal financial assets include Trade receivables, loans, cash and bank balances and other financial assets.

Risk Exposures and Responses

The Group is exposed to market risk, credit risk and liquidity risk. The Board of Directors reviews policies for managing each of these risks, which are summarised below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments and deposits, foreign currency receivables, payables and borrowing.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group has constantly monitoring mechanism for credit markets and rebalances its financing strategies to achieve an optimal maturity profile and financing cost. Interest rate risk is managed by the Group on an on-going basis with the primary objective of limiting the extent to which interest expense could be affected by an adverse movement in interest rates. There are no hedging instruments to mitigate this risk.

Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows of a financial instruments will fluctuate because of changes in foreign exchange rates. The Group is not exposed to material foreign exchange risk arising from transactions i.e. imports of materials, recognised liabilities denominated in a currency that is not the Group's functional currency. The Group's foreign currency risks are identified, measured and managed at periodic intervals in accordance with the Group's policies.

ii. Credit risk

Credit risk is the risk of financial loss to the Group if the customer or that counterparty to the financial instrument fails to meet its contractual obligations and arises principally from the Group's receivables from customers, loans and investments. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the credit worthiness of counterparty to which the Group grants credit terms in the normal course of business.

Credit risk management

The finance function of the Group assesses and manages credit risk based on internal credit rating system. Internal credit rating is performed for each class of financial instruments with different characteristics. The Group assesses the credit risk for each class of financial assets based on the assumptions, inputs and factors specific to the class of financial assets.

The risk parameters are same for all financial assets for all periods presented. The Group considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an on-going basis throughout each reporting period. In general, it is presumed that credit risk has significantly increased since initial recognition if the payments are more than 30 days past due. A default on a financial asset is when the counterparty fails to make contractual payments when they fall due. This definition of default is determined by considering the business environment in which entity operates and other macro-economic factors.

Trade Receivables: The Group has exposure to credit risk from trade receivables. The Group has used expected credit loss (ECL) model for assessing the impairment loss. For the purpose, the Group uses a provision matrix to compute the expected credit loss amount (if any). The provision matrix takes into account external and internal risk factors and historical data of credit losses from various customers. The Group ensures that there is no significant concentration of exposure to credit and therefore does not significantly impair the financial assets since the customers are individuals from whom payment is received as the services are provided.

iii. Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they become due. The Group manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Group's reputation. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Due to the nature of the business, the Group maintains flexibility in funding by maintaining availability under committed facilities. The Group's treasury team is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Group's liquidity position through rolling forecasts on the basis of expected cash flows.

The following table details the remaining contractual maturities of the Group's financial liabilities at the end of the reporting period, which are based on the contractual undiscounted cash flows and the earliest date the Group is required to pay:

46 Fair value measurements**(i) Fair value hierarchy**

Financial assets and financial liabilities measured at fair value in the financial statement are grouped into three Levels of a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (prices) or indirectly (derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data.

(b) The fair value of the remaining financial instruments is determined based on the following methods:

i. Net assets value method

ii. Valuation of investment in unquoted equity shares has been made using the Discounted cash-flow method and Net assets value method, as deemed fit by the Group's management.

Risk adjustments specific to the counterparties (including assumptions about credit default rates) are derived from credit risk grading determined by the Group's internal credit risk management group.

Ratio	Numerator	Denominator	As at 30th September 2025	As at 31st March 2025	As at 31st March 2024	As at 31st March 2023	% Variance	Remarks
Current Ratio (in times)	Total Current Assets	Total Current Liabilities	2.43	A 1.42	B 1.50	C 1.92	=(A-B)/B 71.52%	
Debt- Equity Ratio (in times)	Debt consists of borrowings and lease liabilities	Total equity	0.41	0.45	0.64	0.51	-8.01%	The ratio improved due to a reduction in total borrowings, especially current borrowings. Equity increased on account of retained earnings during the period.
Debt service coverage ratio (in times)	Earning for Debt Service = Net Profit after taxes + Non cash operating expenses (Dep and Amortization) + Interest + Other non-cash adjustments	Debt service = Interest lease payments + Principal repayments	2.39	1.21	0.89	1.89	97.32%	DSCR improved due to higher earnings available for debt servicing. Finance costs and repayment obligations reduced compared to the previous period.
Return on equity ratio (in %)	Profit for the year less Preference dividend (if any)	Average total equity	23.79%	52.20%	41.50%	84.47%	-54.43%	ROE declined primarily due to lower profit after tax for the period ended September 2025. The equity base increased, resulting in dilution of returns.
Inventory Turnover Ratio	Sales	Average Inventory	8.22	15.16	26.59	48.22	-45.78%	The inventory turnover ratio declined due to higher inventory levels during the period. Cost of consumption and sales volumes were comparatively lower.
Trade receivables turnover ratio (in times)	Revenue from operations	Average trade receivables	1.18	3.04	6.61	11.95	-61.21%	The ratio declined mainly due to a significant increase in trade receivables. Extended credit terms were offered to customers during the period.
Trade payables turnover ratio (in times)	Cost of rendering of Services + Other expenses	Average trade payables	1.97	4.71	24.70	16.37	-58.21%	The decrease in payables turnover ratio was due to higher outstanding trade payables. The Company availed longer credit periods from suppliers.

Net capital turnover ratio (in times)	Revenue from operations	Average Working capital (i.e. Total current assets less Total current liabilities)	2.05	5.52	5.14	5.39	-62.85%	The Net Capital Turnover Ratio declined from 5.52 times to 2.06 times, representing a 63% decrease. This was primarily due to a significant increase in average working capital during the year, driven by higher current asset and relatively stable current liabilities, while revenue from operations remained flat or declined marginally.
Net profit ratio (in %)	Profit for the year	Total Income	25.14%	26.96%	21.43%	30.56%	-6.75%	Net profit margin declined due to increase in operating expenses, including employee and other costs.
Return on capital employed (in %)	Profit before tax + finance costs - interest income	Capital employed = Net worth + Borrowings + Lease liabilities + Deferred tax liabilities	21.03%	39.37%	38.74%	54.40%	-46.57%	Finance costs also impacted profitability. The Return on Capital Employed reduced from 39% to 21%, mainly on account of lower profit before tax and finance costs during the year, while the capital employed base remained relatively stable. This reflects reduced efficiency in deploying capital to generate pre-tax returns.
Return on Investment (in %)	Net Profit after taxes	Average Total Assets = Average of Opening Total Assets and Closing Total Assets excluding revaluation impact	12.82%	27.42%	23.55%	49.73%	-53.25%	The Return on Investment dropped from 27.42% to 12.59%, largely due to a decline in net profit after tax, while the average total assets increased marginally. This indicates a lower yield on the asset base during the year.

a) Historical Cost Convention

The Restated Consolidated Financial Information have been prepared on a historical cost basis, except for the following:

- Certain financial assets and liabilities (including derivative instruments) and contingent consideration that is measured at fair value or amortized cost;
- Defined benefit plans – plan assets measured at fair value;

b) Current / Non-Current Classification

Any asset or liability is satisfied as current if it satisfies any of the following conditions:

- Asset / Liability is expected to be realised / settled in the Group's normal operating cycle
- Asset is intended for sale or consumption
- Asset / Liability is held primarily for the purpose of trading
- Asset is a cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date
- In case of a Liability, the Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date

For the purpose of this classification, the Group has ascertained its normal operating cycle as twelve months, which is based on the nature of business and time between acquisition of assets and inventories for processing and their realisation in cash and cash equivalents.

c) Use of Material Accounting Estimates and Judgements

Estimates, assumptions concerning the future and judgements are made in the preparation of the financial statements. They affect the application of the Group's accounting policies, reporting amounts of assets, liabilities, income and expense and disclosures made. Although these estimates are based on management's best knowledge of current events and actions, actual result may differ from those estimates.

The critical accounting estimates and assumptions used and areas involving a high degree of judgements are described below:

3.1 Use of estimation and assumption

In the process of applying the entity's accounting policies, management had made the following estimation and assumptions that have the significant effect on the amounts recognized in the financial statements. The estimates and assumptions used in accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as on the date of the financial statements, reviewed on an ongoing basis. Any revision to accounting estimates is recognized prospectively in current and future periods.

a) Property, Plant and Equipment & Intangible Assets

Key estimates related to long-lived assets (property, plant and equipment and intangible assets) include useful lives, recoverability of carrying values and the existence of any retirement obligations. As a result of future decisions, such estimates could be significantly modified. The useful lives as mentioned in Note No. 4.2 and Note No. 4.3 is applied as per Schedule II of Companies Act, 2013 and estimated based upon our historical experience, technical estimates and industry information. These estimates include an assumption regarding periodic maintenance and an appropriate level of annual capital expenditures to maintain the assets.

b) Employee Benefits - Measurement of Defined Benefit Obligation (DBO)

Management assesses post-employment and other employee benefit obligations using the projected unit credit method based on actuarial assumptions which represent management's best estimates of the variables (such as standard rates of inflation, medical cost trends, mortality, discount rate and anticipation of future salary increases) that will determine the ultimate cost of providing post-employment and other employee benefits. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

c) Income Taxes

The Group recognizes tax liabilities based upon self-assessment as per the tax laws. When the final tax outcome of these matters is different from the amounts that were initially recognized, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

3.2 Critical judgements made in applying accounting policies

a) Revenue

The Group recognizes revenue from contracts with customers based on a five-step model as per Ind AS 115 which involves judgements such as identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables. The management exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. It considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Revenue from services which is recognized over time using percentage-of-completion method. The management uses judgement to estimate the services provided as on reporting date as a proportion of total services provided which is used to determine the degree of the completion of the performance obligation.

b) Recognition of Deferred Tax Assets

The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilized. In addition, significant judgement is required in assessing the impact of any legal or economic limits or uncertainties in various tax jurisdictions.

c) Recognition of Deferred Tax Liabilities on Undistributed Profits

The extent to which the Group can control the timing of reversal of deferred tax liability on undistributed profits of its subsidiaries requires judgement.

d) Evaluation of Indicators for Impairment of Assets

The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.

e) Expected Credit Losses

Expected credit losses of the Group are based on an evaluation of the collectability of receivables. A considerable amount of judgement is required in assessing the ultimate realization of these receivables, including their current credit worthiness, past collection history of each customer and ongoing dealings with them. If the financial conditions of the counterparties with which the Group contracted were to deteriorate, resulting in an impairment of their ability to make payments, additional expected credit loss may be required.

f) Useful Life of Depreciable/Amortizable Assets

Management reviews its estimate of the useful lives of depreciable/amortizable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical and economic obsolescence that may change the utility of certain software, customer relationships, IT equipment and other plant and equipment.

g) Fair Value Measurements

Management applies valuation techniques to determine the fair value of financial instruments (where active market quotes are not available) and non-financial assets. This involves developing estimates and assumptions consistent with how market participants would price the instrument. Management uses the best information available. Estimated fair values may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date.

h) Provisions

At each balance sheet date, basis the management judgement, changes in facts and legal aspects, the Group assess the requirement of the provisions. However, the actual future outcome may be different from this judgement.

i) Leases

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised. The Group has several lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain or not to exercise the option to renew or terminate the lease. That considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.

4. Material Accounting Policy Information

1.1. Basis of Consolidation

Subsidiaries

The Subsidiaries, Gaudium International Private Limited and EKK Global Private Limited, are the Entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. The Subsidiary is fully consolidated from the date on which control is transferred to the Group. It is deconsolidated from the date that control ceases. Profit or loss and other comprehensive income ('OCI') of subsidiary acquired or disposed of during the period are recognized from the effective date of acquisition, or up to the effective date of disposal, as applicable. The subsidiary has a consistent reporting date of that of the Holding Company.

The Group combines the financial statements of the parent and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intergroup transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of the subsidiaries is aligned where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests, if any, presented as part of equity, represent the portion of a subsidiary's profit or loss and net assets that is not held by the Group. Profit or loss and each component of OCI are attributed to the equity holders of the Holding Company and to the non-controlling interests, if any, even if this results in the non-controlling interests having a deficit balance. The Group attributes total comprehensive income or loss of

subsidiaries between the owners of the parent and the non-controlling interests, if any, based on their respective ownership interests.

The Group treats transactions with non-controlling interests, if any that do not result in a loss of control as transactions with equity owners of the group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiaries. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognized within equity.

Business Combinations

The Group applies the acquisition method in accounting for business combinations. The consideration transferred by the Group to obtain control of a subsidiary is calculated as the sum of the acquisition-date fair values of assets transferred, liabilities incurred and the equity interests issued by the Group, which includes the fair value of any asset or liability arising from a contingent consideration arrangement. Acquisition costs are expensed as incurred.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their acquisition date fair values.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the difference is recognized in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognizes the gain directly in equity as capital reserve, without routing the same through OCI.

Where settlement of any part of cash consideration is deferred, the amount payable in the future is discounted to their present value as at the date of exchange. The discount rate used is the Group's incremental borrowing rate, being the rate at which the similar borrowing could be obtained from an independent financier under comparable terms and condition.

Contingent consideration is classified either as equity or financial liability. Amount classified as financial liability are subsequently re-measured to fair value with changes in fair value recognized in profit or loss.

Business combinations involving entities or businesses under common control have been accounted for using the pooling of interest's method. The assets and liabilities of the combining entities are reflected at their carrying amounts. No adjustments have been made to reflect fair values, or to recognize any new assets or liabilities except changes made to harmonize the accounting policies.

1.2. Property, Plant and Equipment and Depreciation

Initial Recognition

All items of property, plant and equipment are initially measured at cost. The cost of an item of plant and equipment is recognized as an asset if, and only if, it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Cost includes its purchase price (after deducting trade discounts and rebates), import duties & non-refundable purchase taxes, any costs directly attributable to bringing the asset to the location & condition necessary for it to be capable of operating in the manner intended by management, borrowing costs on qualifying assets and asset retirement costs.

The activities necessary to prepare an asset for its intended use or sale extend to more than just physical construction of the asset. It may also include technical (DPR, environmental, planning, Land acquisition and geological study) and administrative work such as obtaining approvals before the commencement of physical construction.

The cost of replacing a part of an item of property, plant and equipment is capitalized if it is probable that the future economic benefits of the part will flow to the Group and that its cost can be measured reliably. The carrying amount of the replaced part is derecognized.

Costs of day-to-day repairs and maintenance costs are recognized into the statement of profit and loss account as incurred.

Subsequent measurement

Subsequent to recognition, property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

The residual values, estimated useful lives and depreciation method are reviewed at each financial year-end, and adjusted prospectively, if appropriate.

Depreciation

Depreciation is provided on Straight Line Method, as per the provisions of Schedule II of the Companies Act, 2013 or based on useful life estimated on the technical assessment. Asset class wise useful lives are as under:

Type of Assets	Useful Life
Plant and Machinery	15 years
Operation Theatre Equipment	13 years
Furniture and Fixtures	10 years
Electrical Equipment	10 years
Motor Vehicles	8 years
Office Equipments	5 years
Computers	3 years
Leasehold Improvements	Over Lease Term

In respect of additions / deletions to the fixed assets / leasehold improvements, depreciation is charged from the date the asset is ready to use / up to the date of deletion.

De-recognition

An item of plant and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset is recognized in the profit or loss in the year the asset is derecognized.

Capital Work in Progress and Capital Advances

Cost of asset not ready for intended use and assets under installation or under construction as at the Balance Sheet date will be shown as Capital Work in Progress. Advances given towards acquisition of fixed assets outstanding at each Balance Sheet date are disclosed as Other Non-Current Asset in accordance with Schedule III to the Companies Act, 2013.

1.3. Intangible Assets & Amortization

Initial Recognition

Intangible assets acquired separately are initially measured at cost. Intangible assets are recognized if and only if, it is probable that the future economic benefits that are attributable to the asset will flow to the Group and the cost of the asset can be measured reliably.

Cost of separately acquired intangible assets includes its purchase price (after deducting trade discounts and rebates), import duties & non-refundable purchase taxes, any costs directly attributable to preparing the asset for its intended use.

Subsequent measurement and Amortization

Intangible assets are stated at cost of acquisition less accumulated amortization and accumulated impairment losses, if any. Subsequent expenditure related to an item of intangible assets are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

The carrying values of intangible assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

The residual values, estimated useful lives and amortization method are reviewed at each financial year-end, and adjusted prospectively, if appropriate

The useful lives of intangible assets are assessed as either finite or indefinite. Finite-life intangible assets are amortised on a straight-line basis over the period of their estimated useful lives. Estimated useful lives by major class of finite-life intangible assets are as follows

Intangible Assets	Method of Amortization	Estimated Useful life
Trademarks	on straight-line basis	10 years
Software	on straight-line basis	3 years

The amortization expense is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Indefinite life intangible assets comprises of those assets for which there is no foreseeable limit to the period over which they are expected to generate net cash inflows. These are considered to have an indefinite life, given the strength and durability of the Company and the level of marketing support.

De-recognition

The amortization expense is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset. Indefinite-life intangible assets comprises of those assets for which there is no foreseeable limit to the period over which they are expected to generate net cash inflows. These are considered to have an indefinite life, given the strength and durability of the Group and the level of marketing support.

For indefinite life intangible assets, the assessment of indefinite life is reviewed annually to determine whether it continues, if not, it is impaired or changed prospectively based on revised estimates.

1.4. Intangible Asset Under Development

Recognition and Initial Measurement

Intangible development costs are capitalized **only when** the following criteria are met:

- Technical and commercial feasibility is demonstrated
- Future economic benefits are probable
- The company intends and is able to complete and use or sell the asset
- The costs can be measured reliably
- Development costs are capitalized as an intangible asset if it can be demonstrated that prescribed capitalisation criteria are met, the project is expected to generate future economic benefits, it is probable that those future economic benefits will flow to the Company and the costs of the asset can be measured reliably, else it is charged to the Statement of Profit and Loss.

Intangibles under development represent the costs incurred in the development of Gaudium Advanced Analysis and Treatment (GAAT)

1.5. Inventories

Inventories of medicines, medical consumables and drugs are valued at lower of cost and net realizable value. Cost of inventory includes cost of purchase and other costs incurred in bringing them to their present location and condition. Net Realizable Value in respect of consumables is the estimated current procurement price in the ordinary course of the business. Cost is determined on First in First Out (FIFO) basis.

4.5 Impairment of Non – Financial Assets

At each reporting date, the Group assesses whether there is any indication that an asset may be impaired. Where an indicator of impairment exists, the Group makes a formal estimate of recoverable amount. Where the carrying amount of an asset exceeds its recoverable amount the asset is considered impaired and is written down to its recoverable amount.

Recoverable amount is the greater of fair value less costs to sell and value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses of continuing operations, including impairment on inventories, are recognized in the statement of Profit and Loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognized in OCI up to the amount of any previous revaluation surplus.

After impairment, depreciation or amortization is provided on the revised carrying amount of the asset over its remaining useful life.

The impairment assessment for all assets is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit or loss.

4.6 Financial Assets

Financial assets comprise of investments in equity and debt securities, mutual funds, loans, trade receivables, cash and cash equivalents and other financial assets.

Initial Recognition

All financial assets except investments in associates and joint venture are recognized initially at fair value. However, trade receivables that do not contain a significant financing component are measured at transaction price. Purchases or sales of financial asset that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the assets.

Subsequent Measurement

a. Financial assets measured at amortized cost:

Financial assets held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding are measured at amortised cost using effective interest rate (EIR) method. The EIR amortization is recognized as finance income in the Statement of Profit and Loss.

The Group while applying above criteria has classified the following at amortised cost:

- a. Loans
- b. Trade Receivable
- c. Cash and Cash Equivalents
- d. Other Financial Assets

b. Financial assets at fair value through other comprehensive income (FVTOCI):

Financial assets held within a business model whose objective is to hold financial assets in order to collect contractual cash flows, selling the financial assets and the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding are measured at FVTOCI. Fair Value movements in financial assets at FVTOCI are recognized in other comprehensive income. Equity instruments held for trading are classified at fair value through profit or loss (FVTPL). For other equity instruments the Company classifies the same either at FVTOCI or FVTPL on instrument to instrument basis. The classification is made on initial recognition and is irrevocable. Fair value changes on equity investments at FVTOCI, excluding dividends are recognized in other comprehensive income (OCI).

c. Financial assets at fair value through profit or loss (FVTPL)

Financial assets are measured at fair value through profit or loss if it does not meet the criteria for classification as measured at amortised cost or at fair value through other comprehensive income. All fair value changes are recognized in the statement of profit and loss.

- d. Investments in joint ventures & associates, if any, are carried at cost in the Restated Consolidated Financial Information. However, a provision for diminution in value is made to recognize a decline other than temporary in value of the investments.

Impairment

Financial assets are tested for impairment based on the expected credit losses in accordance with Ind AS 109 on the following financial assets:

a. Trade Receivables

An impairment analysis is performed at each reporting date. The expected credit losses over life time of the asset are estimated by adopting the simplified approach using a provision matrix on its portfolio of trade receivables, which is based on historical loss rates reflecting current condition and forecasts of future economic conditions. In this approach assets are grouped on the basis of similar credit characteristics such as customer segment, past due status and other factors which are relevant to estimate the expected cash loss from these assets.

b. Other financial assets

Other financial assets are tested for impairment based on significant change in credit risk since initial recognition and impairment is measured based on probability of default over the life time when there is significant increase in credit risk.

De-recognition

A financial asset is derecognized only when:

- The Group has transferred the rights to receive cash flows from the financial asset or
- The contractual right to receive cash flows from financial asset is expired or
- Retains the contractual rights to receive the cash flows of the financial asset but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset and transferred substantially all risks and rewards of ownership of the financial asset, in such cases the financial asset is derecognized. Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is also derecognized if the Group has not retained control of the financial asset.

4.7 Cash and Cash Equivalents

Cash and cash equivalents comprise cash at bank (including deposits with banks with original maturity of three months or less) and cash in hand and short-term investments with an original maturity of three months or less. Deposits with banks are subsequently measured at amortized cost and short-term investments are measured at fair value through statement of profit & loss account.

4.8 Financial Liabilities

Initial Recognition

Financial liabilities are recognized when, and only when, the Group becomes a party to the contractual provisions of the financial instrument. The Group determines the classification of its financial liabilities at initial recognition. All financial liabilities are recognized initially at fair value plus any directly attributable transaction costs, such as loan processing fees and issue expenses.

Subsequent Measurement - at amortised cost

After initial recognition, financial liabilities are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognized in profit or loss when the liabilities are de recognized, and through the amortization process.

De-recognition

A financial liability is de recognized when the obligation under the liability is discharged or cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de

recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

4.9 Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. Capitalisation of borrowing cost is suspended in the period during which the active development is delayed due to other than temporary interruption. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest, exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost and other costs that an entity incurs in connection with the borrowing of funds.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

4.10 Employee benefits

Employee benefits are charged to the Statement of Profit and Loss for the year.

Retirement benefits in the form of Provident Fund are defined contribution scheme and such contributions are recognized, when the contributions to the respective funds are due. There is no other obligation other than the contribution payable to the respective funds

Gratuity liability is defined benefit obligation and is provided for on the basis of actuarial valuation on projected unit credit method made at the end of each financial year. Re measurement in case of defined benefit plans gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income and they are included in the statement of changes in equity.

Compensated absences are provided for on the basis of actuarial valuation on projected unit credit method made at the end of each financial year. Re measurements as a result of experience adjustments and changes in actuarial assumptions are recognized in statement of profit or loss account.

The amount of Non-current and Current portions of employee benefits is classified as per the actuarial valuation at the end of each financial year.

4.12 Income Taxes

Income tax expense is comprised of current and deferred taxes. Current and deferred tax is recognized in net income except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income. Current income tax relating to items recognized outside profit and loss is recognized outside profit and loss (either in other comprehensive income or in equity). Current income taxes for the current period, including any adjustments to tax payable in respect of previous years, are recognized and measured at the amount expected to be recovered from or payable to the taxation authorities based on the tax rates that are enacted or substantively enacted by the end of the reporting period.

Deferred income tax assets and liabilities are recognized for temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax base using the tax rates that are expected

to apply in the period in which the deferred tax asset or liability is expected to settle, based on the laws that have been enacted or substantively enacted by the end of reporting period.

Deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable income nor the accounting income. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable income will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and reduced accordingly to the extent that it is no longer probable that they can be utilized.

Deferred tax assets and liabilities are offset when there is legally enforceable right of offset current tax assets and liabilities when the deferred tax balances relate to the same taxation authority. Current tax asset and liabilities are offset where the entity has legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. Deferred Tax relating to items recognized outside profit or loss is recognized outside profit and loss (either in other comprehensive income or in equity).

4.13 Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group assesses whether a contract is or contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- i. the contract involves the use of an identified asset
- ii. the Group has substantially all of the economic benefits from use of the asset through the period of the lease, and
- iii. the Group has the right to direct the use of the asset

The Group's lease assets consist of the following:

Asset Description	Useful life
Leasehold Building	As per Lease period

At date of commencement of leases, the Group recognized a right -of-use of asset (ROU) and a corresponding lease liability for all the lease arrangements, except for those with a term of twelve month or less (short term leases) and leases of low value assets. For these leases, the Group recognizes lease payments as an operating expense on straight line basis over the lease term.

Initial Measurement

ROU assets are initially measured at cost that comprises of the initial amount of lease liability adjusted for any lease payments made at or prior to the date of commencement, initial direct costs and lease incentives (if any).

Lease Liability is initially measured at the present value of future lease payments that are not paid at that date. The lease payments shall be discounted using the interest the interest rate implicit in the lease or, if not readily determinable, incremental borrowing rate.

Subsequent Measurement

ROU assets are subsequently measured at cost less accumulated depreciation and impairment loss, if any. ROU is depreciated from the date of commencement on a straight-line basis over the shorter of lease term or useful life of the underlying asset.

Lease Liability is subsequently measured by increasing the carrying amount to reflect interest and reducing the carrying amount to reflect the lease payments made.

The carrying amount of lease liability is remeasured to reflect any reassessment or lease modification such as change in lease term.

ROU asset and lease liability are separately presented in the balance sheet and lease payments have been classified as financing cash flows.

Group as a lessor

Leases for which the Group is a lessor is classified as finance or operating lease. Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Lease income from operating leases is recognized in the statement of profit and loss income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

4.14 Provisions

A provision is recognized if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

The Group recognizes decommissioning provisions in the period in which a legal or constructive obligation is incurred. A corresponding decommissioning cost is added to the carrying amount of the associated property, plant and equipment, and it is depreciated over the estimated useful life of the asset.

4.15 Contingent Liabilities

Contingent liability is disclosed in case of:

- A present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation;
- A present obligation arising from past events, when no reliable estimate is possible;
- A possible obligation arising from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group where the probability of outflow of resources is not remote.

4.16 Contingent Assets

Contingent assets are not recognized but disclosed in the financial statements when an inflow of economic benefits is probable.

4.17 Fair Value Measurements

Group follows the following mentioned underneath hierarchy for determining fair values of its financial instruments:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (prices) or indirectly (derived from prices); and
- Level 3 – Inputs for the asset or liability that are not based on observable market data.

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting dates. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The fair value for these instruments is determined using Level 1 inputs.

The fair value of financial instruments that are not traded in an active market (for example, over the counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is fair valued using level 2 inputs.

If one or more of the significant inputs is not based on observable market data, the instrument is fair valued using Level 3 inputs. Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments
- The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves
- The fair value of forward foreign exchange contracts is determined using forward exchange rates at the reporting dates, with the resulting value discounted back to present value
- Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

4.18 Revenue Recognition

Sale of Services: The Group derives revenues primarily from business of providing IVF treatment in bundled packages which includes injections, Ovum/Egg pickup, Embryo Creation and Embryo Transfer. Revenue from service transactions is usually recognised as the service is performed, either by proportionate completion method or by the completed service contract method.

Sale of Products: Revenue is measured at the fair value of the consideration received or receivable for goods supplied, net of returns and discounts to customers. Revenue from sale of goods is recognised on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers.

The Group recognizes revenue from contracts with customers based on a five-step model, such as to, identifying the contracts with a customer, identifying the performance obligations in the contract, determine the transaction price, allocate the transaction price to the performance obligations in the contract and recognize revenue when (or as) the entity satisfies a performance obligation at a point in time or over time.

The Group satisfies a performance obligation and recognizes revenue over time, if one of the following criteria is met:

- The customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs; or
- The Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- The Group's performance does not create an asset with an alternative use to the Group and the entity has an enforceable right to payment for performance completed to date.

For performance obligations where one of the above conditions are not met, revenue is recognized at the point in time at which the performance obligation is satisfied.

Revenue is recognized upon transfer of control of promised products or services to customers in an amount that reflects the consideration we expect to receive in exchange for those products or services.

4.19 Other Income

Interest Income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Group estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in finance income in the statement of profit and loss.

Interest income on fixed deposits is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate.

Dividend income

Dividend income is recognized at the time when right to receive the payment is established, which is generally when the shareholders approve the dividend and it is probable that the economic benefit associate with the dividend will flow to the Group, and the amount of the dividend can be measured reliably.

4.20 Foreign currency transactions

Functional and presentation Currency

The Financial statements are presented in Indian Rupee (₹) which is also the functional and presentation currency of the Group.

Transaction and Balances

Transactions in foreign currencies are translated to the functional currency of the Group, at exchange rates in effect at the transaction date. At each reporting date monetary assets and liabilities denominated in foreign currencies are translated at the exchange rate in effect at the date of the financial statement. The translation for other non-monetary assets and liabilities are not updated from historical exchange rates unless they are carried at fair value.

4.21 Earnings per share

Basic earnings per share are calculated by dividing the profit attributable to owners of the Group by the weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements in equity shares issued during the year and excluding treasury shares.

Diluted earnings per share adjust the figures used in the determination of basic earnings per share to take into account, the after income tax effect of interest and other financing costs associated with dilutive potential equity shares and the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

4.22 Segment Reporting

Operating segments are identified and reported in a manner consistent with the internal financial reporting provided to the chief operating decision makers responsible for allocating resources and assessing performance of the operating segments.

4.23 Events after reporting date

Where events occurring after the Balance Sheet date provide evidence of conditions that existed at the end of the reporting period, the impact of such events is adjusted within the Restated Consolidated Financial Information. Non adjusting events after the Balance Sheet date which are material in size or nature are disclosed separately in the Restated Consolidated Financial Information.

Financial Risk Management Objectives and Policies

I. Financial Risk Management Framework

The Group's principal financial liabilities comprise trade payables and Other financial liabilities. The main purpose of these financial liabilities is to finance the Group's operations. The Group's principal financial assets include Trade receivables, loans, cash and bank balances and other financial assets.

The Group is exposed to market risk, credit risk and liquidity risk. The Board of Directors reviews policies for managing each of these risks, which are summarised below:

1. Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments and deposits, foreign currency receivables, payables and borrowing.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group has constantly monitoring mechanism for credit markets and rebalances its financing strategies to achieve an optimal maturity profile and financing cost. Interest rate risk is managed by the Group on an on-going basis with the primary objective of limiting the extent to which interest expense could be affected by an adverse movement in interest rates. There are no hedging instruments to mitigate this risk.

Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows of a financial instruments will fluctuate because of changes in foreign exchange rates. The Group is not exposed to material foreign exchange risk arising from transactions i.e. imports of materials, recognised liabilities denominated in a currency that is not the Group's functional currency. The Group's foreign currency risks are identified, measured and managed at periodic intervals in accordance with the Group's policies.

2. Credit risk

Credit risk is the risk of financial loss to the Group if the customer or that counterparty to the financial instrument fails to meet its contractual obligations and arises principally from the Group's receivables from customers, loans and investments. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the credit worthiness of counterparty to which the Group grants credit terms in the normal course of business.

Credit risk management

The finance function of the Group assesses and manages credit risk based on internal credit rating system. Internal credit rating is performed for each class of financial instruments with different characteristics. The Group assesses the credit risk for each class of financial assets based on the assumptions, inputs and factors specific to the class of financial assets.

The risk parameters are same for all financial assets for all periods presented. The Group considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an on-going basis throughout each reporting period. In general, it is presumed that credit risk has significantly increased since initial recognition if the payments are more than 30 days past due. A default on a financial asset is when the counterparty fails to make contractual payments when they fall due. This definition of default is determined by considering the business environment in which entity operates and other macro-economic factors.

Trade Receivables: The Group has exposure to credit risk from trade receivables. The Group has used expected credit loss (ECL) model for assessing the impairment loss. For the purpose, the Group uses a provision matrix to compute the expected credit loss amount (if any). The provision matrix takes into account external and internal risk factors and historical data of credit losses from various customers. The Group ensures that there is no significant concentration of exposure to credit and therefore does not significantly impair the financial assets since the customers are individuals from whom payment is received as the services are provided.

3. Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they become due. The Group manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Group's reputation. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Due to the nature of the business, the Group maintains flexibility in funding by maintaining availability under committed facilities. The Group's treasury team is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Group's liquidity position through rolling forecasts on the basis of expected cash flows.

The following table details the remaining contractual maturities of the Group's financial liabilities at the end of the reporting period, which are based on the contractual undiscounted cash flows and the earliest date the Group is required to pay:

Fair value measurements

I. Financial instruments by category

Financial assets and financial liabilities measured at fair value in the financial statement are grouped into three Levels of a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (prices) or indirectly (derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data.

II. Assets and Liabilities which are measured at Amortised Cost for which Fair Values are Disclosed

Phased implementation of Unified Payments Interface for Bids by UPI Bidders as per the UPI Circulars

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019, and was to initially continue for a period of six months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: this phase has become applicable on a voluntary basis for all Offers opening on or after September 1, 2023 and on a mandatory basis for all Offers opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public Offer closure to listing has been reduced to three Working Days.

The Offer is made under UPI Phase III of the UPI Circular on mandatory basis. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**UPI Streamlining Circular**"), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streamlining Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. The DPIIT also issues the Consolidated Foreign Direct Investment Policy (“**FDI Policy**”) from time to time. The regulatory framework pertaining to foreign investment, over a period of time, thus, consists of acts, regulations, master circulars, press notes, press releases, and clarifications among other amendments.

India’s current FDI Policy issued by the DPIIT with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT till October 15, 2020. All the press notes, press releases, clarifications on FDI issued by DPIIT till October 15, 2020 stand rescinded as on October 15, 2020. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

Our Company is engaged in the business of providing healthcare services mainly rendering various fertility treatments such as In Vitro Fertilization (IVF), intrauterine insemination (IUI), intracytoplasmic sperm injection (ICSI), Egg Freezing, laser assisted embryo implantation amongst others.
