- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “Risk Factors” on page 32 and “Management Discussion and Analysis of Financial Condition and Results of Operations” on page 240 of this Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “Restated Financial Statements”.

INTERNAL RISK FACTORS

- 1. Our Company has been recently formed by conversion of the erstwhile partnership firm into the company, thus we have limited operating history as a Company which may make it difficult for investors to evaluate our historical performance or future prospects.***

Our Company was incorporated as a limited Company under the Companies Act, 2013 with Registrar of Companies, dated July 21, 2024. The Company has been incorporated by conversion of the erstwhile partnership firm; thus, we have limited operating history as a company from which one can evaluate our business, future prospects and viability. Our future business operation and financial position may not be comparable with that of the partnership firm and difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may remain volatile. Although, the said partnership firm has been converted into the public limited company on a going concern basis, but, there can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits post conversion of the partnership firm to company. Any inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects. For further details, see the chapter titled “History and Corporate Structure” and “Restated Financial Statements” on page 165 and 192 respectively of the Red Herring Prospectus.

2. We do not own the registered office, manufacturing units and Experience Centre from which we carry out our business activities. In case of nonrenewal of rent agreements or dispute in relation to use of the said premise, our business and results of operations can be adversely affected.

Our registered office, manufacturing units and experience centre from which we carry out our business activities, are being taken by us on rent. However, Registered office & Manufacturing unit-1 is owned by our group company Safe Enterprises Shopfittings Private Limited. In the event of termination/non-renewal of said agreements, we may be required to vacate the said premises which may cause disruption in our inventory management, corporate affairs and business and impede our effective operations which could temporarily impact on our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled **“Our Business”** beginning on page 131 of this Red Herring Prospectus.

Further, we have moved to a new location for our Manufacturing unit-III, but our lease agreement for the previous location for said unit has not yet expired and the foreclosure of the lease agreement is also not done. In the absence of the foreclosure agreement, the Licensor in this agreement may claim for the rent getting due as per the terms of this agreement and may also file litigations against the company and its authorised officials for this agreement for non-payment of the said rent to them.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favourable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our factory operations which could affect our business, financial condition and results of operations.

3. Our business is dependent on the sale of our products to certain key customers. The loss of any of these customers or loss of revenue from sales to these customers could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We are majorly dependent on our one largest customer for sale of our products who has contributed to approximately 84.44%, 85.86% and 76.37% of our revenue from operations for the Fiscal 2025, 2024 and 2023. Further, during the said periods, revenue generated from our top five customers was Rs.12277.61 lakhs, Rs.8973.46 lakhs and Rs. 6543.88 lakhs which represented 92.49%, 94.03% and 89.77% respectively of our revenues from operations.

We have not entered into long term agreements with our largest customer and other top customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. Customers may also cancel their purchase orders for reasons beyond our control, such as changes in their preferences, their perception of the quality of our products and their financial situation. The loss of our significant top customer or customers could have a material adverse effect on our results of operations. We cannot assure you that we will be able to maintain the historical levels of business from our largest customer or other top customers or that we will be able to substitute the revenues lost by way of termination of work with these customers. Our dependence on our largest customer or other top customers also exposes us to risks associated with their internal management, financial condition and creditworthiness and major events affecting these customers such as bankruptcy, change of management, mergers and acquisitions, reduction in growth or a slow-down in the business of our customers, could adversely impact our business. If our major customer becomes bankrupt or insolvent, we may lose some or all of our business from that customer and our receivables from that customer may have to be written off, adversely impacting our results of operations and financial condition. Further, if such customer does not meet up with our pricing policies, then it may also impact our overall profitability and financial stability. Though we have not faced any such instance in past, there is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfil their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

For details related to sale of our products, kindly refer section titled **“Financial Information of the Company”** beginning on Page 192 of this Red Herring Prospectus

4. Our Company is dependent on limited number of suppliers, including our subsidiary company, within limited geographical locations for procurement of raw materials. Any delay, interruption or reduction in the supply of raw materials required for our products may adversely affect our business, results of operations, cash flows and financial condition.

We procure our raw material from various suppliers including our subsidiary company i.e. Safe Enterprises Retail Technologies Private Limited. For the Fiscal 2025, Fiscal 2024 and Fiscal 2023, purchases from our top ten suppliers amounted to Rs. 3831.66 Lakhs, Rs. 3374.55 Lakhs and Rs. 3015.01 Lakhs respectively, which represented 63.86%, 70.88% and 75.65% of our total raw material purchases, respectively, for the said period. We do not have any long-term supply contracts with these suppliers and therefore, we cannot assure that we shall always have a steady supply of raw material at prices favorable to us.

Further, we also rely on our subsidiary company for procurement of raw material which is our major supplier and accounted for 17.68%, 16.58% and 21.92% of our total raw material purchases, respectively, for the Fiscal 2025, Fiscal 2024 and Fiscal 2023.

Purchasing from a subsidiary company can provide benefits such as cost savings and streamlined operations, but it also presents certain risks such as management biasness, conflict of interest, impact on consolidated financials etc. Any operational or financial challenges faced by our subsidiary could have a direct impact on our ability to meet customer obligations, potentially affecting our revenue and reputation. Moreover, our reliance on Subsidiary for a substantial portion of our supply needs limits diversification in our supplier base, potentially leaving us vulnerable to disruptions if unforeseen circumstances arise at the subsidiary level.

Additionally, we source our raw materials requirement indigenously. Major portion of our purchases of raw materials for the financial year ended March 31, 2025, 2024 and 2023 is from the state of Maharashtra which is 98.42%, 97.63% and 98.26% of the total purchases of raw material, respectively, for the said period. Our cost of materials consumed constituted a significant component of our expenditure and in Fiscal year ending 2025, 2024 and 2023 the same were Rs. 5986.91 Lakhs, Rs. 4725.64 lakhs and Rs. 4048.15 lakhs respectively, which constituted, 66.72%, 67.40% and 68.85%, respectively, of our total expenses. For details related to purchases of raw materials, kindly refer section titled “**Financial Information of the Company**” beginning on Page 192 of this Red Herring Prospectus.

Inadequate supply of raw material caused either by a sudden change in the prices or imposition of any new taxes or loss of any of our existing major vendors for any reason or any adverse change in the policies of Central/State Government may affect the availability of such raw material which could have a material adverse effect on our business operations and profitability. Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or local governments of Maharashtra may affect continuing operations at our manufacturing units and result in significant loss due to an inability to meet production schedules, which could materially affect our business reputation within the industry. If we cannot fully offset increases in the cost of raw materials, through increases in the prices for our products, we would experience lower margins and profitability, which would have a material adverse effect on our financial condition and results of operations. Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and maintain a stable and sufficient supply of raw materials at acceptable prices. Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations.

Though we have not faced any such instance in past, there can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations.

Further our Company has outstanding dues of trade payables for the Fiscal years ending 2025, 2024 and 2023 of Rs. 920.87 Lakhs, Rs. 940.35 lakhs and Rs. 1033.81 Lakhs respectively. Any delay in payment to our creditors in future may impact our long-standing relations with our suppliers and may result in stoppage of timely or at all delivery of raw material. Any such disruption would impact the production and overall financial position of our Company.

5. If there are delays in setting up the Proposed manufacturing unit or if the costs of setting up and the possible time or cost overruns related to the Proposed manufacturing unit or the purchase of plant and machinery for the Proposed manufacturing unit are higher than expected, it could have a material adverse effect on our financial condition, results of operations and growth prospects.

To expand our manufacturing capabilities, we are currently in the process of setting up a new manufacturing unit at Village Nahren, Taluka Ambernath, District Thane, Maharashtra. Additionally, to increase business operations, requisite machineries like HSG Professional Tube Cutting Machine, HSG Sheet Laser Cutting Machine, FS- Curtis - Lubricated Screw Compressors, Smartweld Handheld Laser Welding Machine, Conveyorized Auto Powder Coating Plant, Battery Interlink Set etc. will be purchased and installed. The total cost for setting up new manufacturing unit is estimated to be Rs. 8385.65 lakhs, which includes, land, civil construction to be carried out on said land and purchase of machineries to be installed. The proposed manufacturing facility is planned to be established at Plot No. B11, Lodha Industrial and Logistics Park-2 (LILP-2), admeasuring approximately 16,290 square metres, comprising survey numbers 89/4 (part), 90/1 (part), 90/2, 90/3 (part), 90/4, and 90/5 (part), situated at Village Nahren, Taluka Ambernath, District Thane, Maharashtra, India. The Company has purchased said land vide sale agreement dated May 20, 2025, from Macrotech Developers Limited (formerly known as Lodha Developers Limited). To align with the Company's project execution schedule, the company has purchased said land by availing an Overdraft facility against fixed deposit from SVC Co-Operative Bank Ltd. The Company intends to utilize a portion of the IPO proceeds to repay such overdraft facilities availed for this purpose. The Company intends to utilize a portion of the IPO proceeds to repay the bank loan availed for this purpose. For further details, see “**Objects of the Issue**” on page 95 of this Red Herring Prospectus.

The completion of the setting up of the Proposed manufacturing unit is dependent on our ability to arrange finance through Net Proceeds or otherwise, the performance of external agencies which are responsible for inter alia construction of buildings along with installation and commissioning of plant and machinery. We cannot assure you that we will be able to arrange for such finance on time. Our expansion plans remain subject to the potential problems and uncertainties that construction projects face including cost overruns or delays, labour shortages, increased costs of equipment or manpower, inadequate performance of the equipment and machinery installed in our manufacturing unit, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals, incremental

pre-operating expenses, environment and ecology costs and other external factors which may not be within the control of our management.

There can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. Further, we cannot assure you that the performance of external agencies will meet the required specifications or performance parameters. We may not be able to identify suitable replacement external agencies in a timely manner. If the performance of these agencies is inadequate in terms of the requirements, this may result in incremental cost and time overruns.

The estimated costs for setting up the Proposed manufacturing unit are based on the certificate dated June 06, 2025 given by M/s Vighnagar Industrial Services, Chartered Engineers, and are based on management's estimates and current conditions which are subject to change, owing to prospective changes in external circumstances, costs and other financial conditions.

Our return on our investment depends upon, among other things, successful implementation of our strategy, competition, demand of our products, government policies, interest rates and general economic conditions. If our return on investment does not meet our or market expectations, this could materially and adversely affect our business, cash flows, results of operations and financial condition.

6. *Our Company is yet to place orders for the machinery for the expansion of the proposed manufacturing unit. Any delay in placing orders or procurement of such machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.*

Our Company has received third party quotations for the machineries proposed to be installed at our proposed Manufacturing unit to be established in Thane, Maharashtra. Although, we have identified the type of machineries proposed to be purchased from the Net Proceeds, we are yet to place orders for all the proposed machineries. The cost of the proposed purchase of machinery is based on the quotations received from third party vendors and contractors and such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. For details, please refer to the chapter titled "**Objects of the Issue**" beginning on page 95 of this Red Herring Prospectus.

We cannot assure that we will be able to procure the machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the Machinery or in the event the vendors are not able to provide the machinery in a timely manner, or at all, we may encounter time and cost overruns in expanding the capacity of the Manufacturing unit. Further, if we are unable to procure machinery from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the machinery which satisfy our requirements at acceptable prices. Our inability to procure the machinery at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

Further, after procurement of new machineries, we may face a risk that our expected capacity expansion may not be absorbed by the market, if future sales are insufficient to break even the production from new unit. This could adversely impact the company's existing profitability and the financial position.

7. *We provide fully customized retail fixture solutions tailored to the specific requirements of each customer and accordingly our business is substantially dependent on our projects & Designing teams to accurately carryout the designing, engineering and estimation studies for potential orders. Any deviation during the execution of the order as compared to our estimates could have a material adverse effect on our cash flows, results of operations and financial condition.*

We have developed in-house resources with competencies to deliver our product as per customer specifications which include our qualified project & designing team of 15 employees as on March 31, 2025. Additionally, we have 15 designs registered under the Designs Act 2000. Design and Development is an integral part of our business enabling us to provide innovative and functionally appealing shop fitting components which are used within customised retail fixtures to create unique retail experiences. While our teams have the necessary skill and experience in carrying out designing, estimates and engineering studies, we may not be able to assure the accuracy of such studies.

While we have not faced any design inefficiencies in past, any failure to design our pre-engineered structures in the most efficient manner in future, would reduce our margins and would materially and adversely affect our profitability. Also, ability of our competitors to design a pre-engineered structure in a manner which is more efficient than ours would give our competitor the ability to offer attractive prices to the customers, without affecting their margins. The accuracy of the design and the engineering work are key for the products being accepted by our customers. Further the accuracy of the estimates is dependent on the prices quoted by our suppliers and how accurately we have analysed and estimated the specifications provided by customers. Any deterrence or deviation in the estimation and calculation of the key elements on which we rely before submitting quotations to customers as compared to our estimates during implementation and operation could have a material adverse effect on our cash flows, results of operations and financial condition.

8. *We are subject to strict quality requirements and any failure to comply with quality standards may lead to cancellation of existing and future orders and could negatively impact our reputation and our business and results of operations and future prospects.*

We are engaged in the business of designing and manufacturing of shop fittings and retail fixtures, offering a wide range of customized in-store solutions across multiple retail segments. We provide customized retail fixture solutions (also called Bespoke Solutions) tailored to the specific requirements of each customer. Our approach involves working closely with retailers to understand their unique needs, design preferences and space constraints. Given the nature of our products and the industry in which we operate, we believe that our customers have high standards for product quality and delivery schedules. Adherence to quality standards is a critical factor as a defect in products or failure to comply with the specifications of our customers may, in turn, lead to the faulty end-products. Faults in end products may lead to unknown safety and design defects with respect to our products which could result in directly or indirectly, personal injuries or other adverse effects. This may lead to cancellation of supply orders or receipt of new orders by our customers and at certain instances may impose additional costs in the form of product liability and/or product replacement. While we have not faced any quality defects in past, any negative publicity regarding our Company or our products could adversely affect our reputation, our operations and our results from operations.

9. *We may depend on the performance of outside vendors for timely completion of our projects.*

While undertaking our projects, in addition to in house business operations we also outsource certain manufacturing activities to third-party vendors, depending on the capacity utilization of the company. When there are additional orders which are beyond our manufacturing capacity, we need to fulfil such orders through requisite outsourcing from outside vendors.

Though we segregate the work to be done by third parties between multiple vendors, we may face the risk of our vendors not being able to deliver on time and/or non-delivery of required components. However, no such instance is faced in past, in the event our vendors are not able to make on time deliveries and we are unable to find an alternative vendor on a short notice, our obligations towards our customers for timely completion of the project will be adversely affected.

Further, even though there is a through quality check by our Quality department for the work done by such outside vendors, if they default on their obligations and work specifications to us, we may not be able to perform our services for our customers in accordance with time-lines or specifications pre-agreed with the customer. Any default, non-performance or negligent act by our vendors may result in delay on our obligations with our customers.

10. *Our business is working capital intensive and Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our sales, profitability, cash flow and liquidity.*

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. Though there is no past instance of over or under estimation of inventory, if we misjudge expected customer demand / potential orders, it could cause either a shortage of products or an accumulation of excess inventory. During the fiscal year 2024-25, 2023-24 and FY 2022-23 our inventories were Rs. 672.86 lakhs, Rs. 195.46 lakhs and Rs. 100.85 Lakhs respectively.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. Moreover, since most of our sales are based on orders received from customers as per their requirements, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and/ or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. During the fiscal year 2024-25, FY 2023-24 and FY 2022-23 our trade receivables were Rs. 2108.02 lakhs, Rs. 2157.88 lakhs and Rs. 2062.69 Lakhs respectively. Though there is no past instance on non-recovery of dues from our trade receivables, there can be no assurance that the progress payments and the retention money will be remitted by our customers to us on a timely basis or that we will be able to efficiently manage the level of bad debt arising from such payment practice. The historical holding days of trade receivables had been 62 days, 76 days and 73 days respectively for the Fiscal year ending March 31, 2025, March 31, 2024 and March 31, 2023. We may be subject to working capital risks due to delays or defaults in payment by our customers, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

11. *We generate our major portion of turnover from our operations in certain geographical regions and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.*

We generate a notable portion of our turnover from the State of Maharashtra. For the financial year ended March 31, 2025, March 31, 2024 & March 31, 2023, we derived notable portion of our revenue from the state of Maharashtra i.e. 17.46%, 20.79% and 34.68% of total revenue from operations, respectively and we derived 51.92%, 59.78% and 71.52% of total revenue from operations from top-5 states, respectively, for the financial year ended March 31, 2025, March 31, 2024 & March 31, 2023. For details related to total revenue from operations, kindly refer section titled “*Financial Information of the Company*” beginning on Page 192 of this Red Herring Prospectus.

We carry our entire operations from our manufacturing units located at Thane and Navi Mumbai, Maharashtra. Due to the geographical concentration of our manufacturing units at Maharashtra, our operations are prone to local, regional and environmental factors. Any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the central government or state or local governments, may require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing units could result in significant loss due to an inability to meet customer orders and production schedules, which could materially affect our business reputation within the industry. Though no such events occurred in past, the occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. We also sale our products in the state of Gujarat, Karnataka, Punjab, Rajasthan, Telangana, Uttar-Pradesh etc. Further, we plan to enter into new geographical location in India including exports to countries like UAE, USA etc. in order to capture future growth trends. Many new Purchase Orders have already been initiated by our company and our subsidiary company i.e. Safe Enterprises Retail Technologies Private Limited, with various customers in new areas (within same states) where sales were not made in past years. For instance, the Company has initiated new Purchase orders at new geographical locations which include small towns/city such as Thattanchavdy in Puducherry, Porvarim in Goa, Dimapur in Nagaland etc. in India. Further, apart from India POs has been executed outside India also such as in Selangor state of Malaysia. Thus we are likely to compete with new/existing players in said location, who might have an established presence in the particular region, and are more familiar with the business practices and have stronger relationships with customers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations.

12. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained requisite permits and licenses which are adequate to run our business, however we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

Further, our company have applied for Provisional Fire NoC. Additionally, application for renewal of Shop and Establishment Certificate, for experience Centre situated in Cochin and Fire NoC for our Subsidiary Company i.e. Safe Enterprises Retail Technologies Private Limited is yet to be applied. Also, our company has already made the application for change in its name in some of the required Government approvals, which are not in its name as on the date of this Red Herring Prospectus and same is under the process of approval. Additionally, some of our records related to the registration of our erstwhile firm are not traceable. The original registration certificate of the erstwhile partnership firm is not available, and according to the certificate obtained from the Registrar of Firms (RoF) dated November 7, 2024, the firm registration number is B-117707. The details of the partnership firm available in the certificate are only up to the year 2008. As a result, we do not have a complete trail of all the registered deeds from its inception until its conversion, which is certified by M/s Punit Padalia & Co., Chartered Accountants. Further, there are few Licenses and approvals taken by the Partnership firm and those are yet to be cancelled or discontinued, as a result of dissolution of the Partnership firm due to Conversion into the Company. For details regarding pending approvals, please refer to section titled “*Government and Other Approvals*” beginning on page 254 of the Red Herring Prospectus. There can be no assurance that the relevant authorities will issue or renew these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

13. Our business is dependent on our manufacturing units and the loss or shutdown of operations of any of our manufacturing unit may have a material adverse effect on our business, results of operations, cash flows and financial condition.

Our business is dependent on our ability to manage our manufacturing units situated at Thane & Navi Mumbai, Maharashtra. The core of our business relies on efficient management of the manufacturing units, however our operations face a spectrum of operational risks, such as (i) the risk of substantial disruption or shutdown due to breakdowns or failure of equipment, natural disasters, storms, fires, explosions, earthquakes, floods and other catastrophic events, which could result in power interruptions and water shortages, potential or suspected epidemic outbreaks, terrorist attacks and wars, labour disputes, strikes, lock-outs, loss of suppliers and industrial accidents, (ii) performance below expected levels of output or efficiency, and (iii) obsolescence.

Our manufacturing units are also subject to operating risk arising from any failure to comply with the directives of relevant government authorities or any changes in governmental regulations affecting our business and our facilities, which could lead to a loss of licenses, certifications, permits and the ability to continue operating from our current manufacturing units.

Disruptions caused due to breakdown of machinery installed at our manufacturing units, could also lead to a reduction in our production levels, resulting in a negative impact on our earnings. We cannot assure you that we will always have access to sufficient supply of electricity in the future to accommodate our production requirements and planned growth. In the event of prolonged disruptions at our manufacturing units, we may have to import various supplies and products in order to meet our production requirements, which could affect our profitability. Our facilities and equipment would be difficult and costly to replace on a timely basis and in a cost-efficient manner. Moreover, catastrophic events could also destroy any inventory located at our units. Such disruptions may result in delays in shipments of raw materials from our suppliers to us and shipment of products from us to our customers. Though we have not faced any such instance in past (except COVID 19 pandemic), yet the occurrence of any such catastrophic event in future, could result in the temporary or long-term closure of our manufacturing units, severely disrupting our business operations and materially and adversely affecting our business, results of operations, cash flows and financial condition.

14. We may not be able to adequately protect or continue to use our intellectual property.

As on the date of this Red Herring Prospectus, we have 7 trademark registrations and 13 Design registrations in India in the name of erstwhile partnership firm i.e. M/s Safe Enterprises and application for change of name for these trademarks and designs is already made and is under process.

Further, we have applied for our logo  **Safe Enterprises** SHOPSYSTEMS, in the name of our company, which we are using for our business, vide application no. 6732582 dated November 28, 2024, under class 20 of the Trademarks Act, 1999, which is pending for approval as on the date of this Red Herring Prospectus. This is a new trademark for the company, prior to which

company was using  **INSYNC** SHOPFITTINGS. Along with this we have applied for two more Trademarks under class 20 Trademarks Act,

1999, which are also pending for approval. Further, we have also taken two more Design registrations in the name of the company dated March 06, 2025 and March 18, 2025. We do not have any control over the registration of a trademark and same may also be opposed by third parties that claim to have prior or superior rights. Such actions are not within our control and can severely impact business and may result in requirement to undertake rebranding exercises, all of which result in additional costs for us and could also impact our reputation. We routinely monitor third party trademarks, including domain names, by keeping a check on the use of our trademarks. However, it is possible that we are not aware of misuse of our trademarks and this could potentially cause loss of our reputation, which could impact our business and may even affect our goodwill. The use of a deceptively similar or identical third-party mark may result in a loss/injury to us. Such an action may also become a lengthy and costly exercise for us and may not always be in our favour.

Further, out of total 10 trademarks and 15 Designs, 07 trademarks and 13 Designs, as mentioned above, are registered in the name of our erstwhile partnership firm M/s Safe Enterprises, however, our company has made the applications for changes in trademarks and designs to give effect to the trademark and design assignment agreements in the name of our company, which is under process. For details of our intellectual property rights, see “**Government and Other Approvals**” and “**Our Business**” on page 254 and 131 respectively, of this Red Herring Prospectus.

17. Any failure to adapt to industry trends and evolving technologies to meet our customers' demands may materially and adversely affect our business and results of operations

Changes in customers' preferences, regulatory or industry requirements, or competitive technologies may render certain of our products obsolete or less attractive. Our ability to anticipate and successfully develop and introduce new or enhanced products on a timely basis may impact our revenue and results of operation. Our competition varies by customer requirements, geographic areas and type of product. Our customers consider many factors when choosing suppliers, including product quality, technology, breadth of product portfolio, cost, delivery and service, as well as quality and depth of senior level relationships, and other business factors. There can be no assurance that we will be able to secure the necessary technological knowledge to enable us to develop our product portfolio as planned. Our failure to successfully adopt such technologies in a cost effective and a timely manner may increase our costs and lead to us being less competitive.

18. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. Even though no such instance is faced in past, if any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

19. We share the same premises of our registered office with our Group Company and both of our subsidiary companies also share the same premises of registered office.

We share the same premises of our registered office i.e. Plot No. D-372, TTC MIDC Industrial Area, MIDC Kukshet Village, Sanpada, Thane - 400703, Maharashtra, India, with Our Group Company, Safe Enterprises Shopfittings Private Limited.

Further, both of our subsidiaries i.e. Safe Enterprises Retail Technologies Private Limited & Inscite Advisory Services LLP along with our group company i.e. Inscite Fintech Solutions Private limited and our Promoter group company i.e. Saleem and Munira Salim Merchant charitable foundation shares the same premises as their registered office which is F-205, 2nd Floor, L&T Seawoods Ltd., Plot No. R-1, Sector-40, Seawoods, Navi Mumbai, Thane - 400706, Maharashtra, India. There is no separate sub-lease agreement or rent sharing agreement between these entities. In case of any dispute, we may suffer a disruption in our operations which could have an adverse effect on our business and operations. Any multiple or overlapping use of the said facilities may create some disruption which may affect our business operations.

20. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

Our operations are subject to accidents which are inherent to any business such as risks of employee accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including accidents that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environment. We have taken Bharat Laghu Udyam Suraksha Policy from Bajaj Allianz General Insurance Company Limited for our Registered Office & Manufacturing Unit-I, which provide insurance to Building, Plant & machinery, stock & furniture, against loss from fire, earthquake, terrorism etc. We have also taken FG Bharat Sookshma Udyam Suraksha Policy from Future Generali Total Insurance Solutions for our manufacturing unit-II which provide insurance to Building, Plant & machinery, stock & furniture against loss from fire, earthquake, Storm, Tempest, Flood, and Inundation (STFI) terrorism etc. Additionally, we have taken Office & Professional Establishment Protector Insurance policy (Sookshma Udyam) i.e. Fire and allied perils, Burglary and Other perils, Business interruption, public liability and workmen's compensation policy from Iffco - Tokio General Insurance Co. Ltd. for our manufacturing unit-III. For details of insurance policies, see "**Our Business**" on page 131 of this Red Herring Prospectus.

While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks. We have not insured ourselves for Key managerial person insurance, employee compensation insurance, group personal accident, group medical insurance, product liability claims insurance, vehicle insurance and Cash in Transit insurance. Further, we have not taken insurance in respect of our experience center situated in Cochin, Kerela. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. Though, we have not faced any such instance in past, there can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, Insurance Policies are still in the name of Partnership firm and amendment of the same is yet to be done in the name of Company. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. There are no past instances of a claim exceeding liability insurance cover and for details related to insurance, kindly refer section titled "**Our Business**" beginning on Page 131 of this Red Herring Prospectus

22. If we are unable to manage our growth effectively and further expand into new markets our business, future financial performance and results of operations could be materially and adversely affected.

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including by continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, to strive for cost efficiency, attracting and retaining talented employees and focusing on consistently meeting quality standards. As we continue to grow our business and expand into new markets, we may face several challenges, including as set forth below:

- acquiring new customers;
- identifying customer requirements and preferences in such markets;
- making accurate assessments of the resources we will require;
- preserving a uniform culture, values and work environment;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
- recruiting, training and retaining sufficient skilled management, technical and marketing personnel;
- maintaining high levels of customer satisfaction; and
- adhering to expected performance and quality standards.

In pursuing our growth strategy, we will require additional working capital, which may have a material impact on our cash flows and results of operations. Our operating expenses and working capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and operational capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, further expand into new markets or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

23. Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its business operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past, however there can be no assurance that we will not experience any such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

24. Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain our historical growth rates.

Our business has experienced significant growth in past. Our revenue from operations has increased from Rs. 7721.57 Lakhs in FY 2022-23 to Rs. 10091.49 Lakhs and Rs. 13,831.31 Lakhs in Financial Years 2023-24 and 2024-25 respectively and our Profit after tax has increased from Rs. 1208.90 Lakhs in FY 2022-23 to Rs. 2308.84 Lakhs in FY 2023-24 and Rs. 3918.54 lakhs in FY 2024-25 respectively. Our revenue Growth represents a Compound Annual Growth Rate (CAGR) of 33.84% over the past three years. We cannot assure you that we will be able to sustain the levels of revenue and profit growth that we have had in the past. Further, a number of our strategic initiatives are in initial stages. While we may experience initial success with such initiatives, there is no assurance that these will succeed in the long term.

25. The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.

The fund requirement and deployment, as mentioned in the “*Objects of the Issue*” on page 95 of this Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “*Objects of the Issue*” is at the discretion of our Board of Directors and will be subject to monitoring by an external independent agency appointed for the purpose. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “*Objects of the Issue*” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings

26. Compliance with, and changes in, safety, health and environmental laws and labour regulations may adversely affect our business, prospects, financial condition and results of operations.

Our operations are subject to central, state, and local laws and regulations relating to the protection of the environment and occupational health and safety, including those governing the generation, handling, storage, use, management, transportation and disposal of, or exposure to, environmental pollutants or hazardous materials resulting from our business processes. Due to the nature of our business, along with extensive and increasingly stringent environmental, health and safety laws and regulations, various labour related laws and regulations are also applicable on us.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

27. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a need basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage, shrinkage and our inability to claim

insurance may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

28. *We do not make any provisions for decline in the value of investments made by our Company and the subsidiary company. Any continuous decline in the value of investments made by our company may impact our financial results and condition.*

The value of Investment made by our company and our subsidiary company i.e. Safe Enterprises Retail Technologies Private Limited as of March 31, 2025 stood at Rs. 153.13 Lakhs which represents investment in the unquoted equity shares, quoted mutual funds by our company and Investment in Compulsorily Convertible Preference Shares (Unquoted) by our subsidiary company. There have been no provisions made by the management for fluctuation in the value of investments. For details refer chapter **“Restated Financial Statements”** beginning on page 192 of this Red Herring Prospectus. Any future loss or profit on the sale of the said investment will be included in the account only when the said investments are sold which may have an impact on our financial conditions and results of operations of the company.

29. *We operate in competitive markets and may face competition from different players in the market which may have an adverse effect on our business, cash flows, financial condition and results of operations.*

We operate in highly competitive markets and there are no specific entry barriers to the industry in which we operate. But, high capital requirement, manufacturing setup, product knowledge, customer validation and approvals process, expectation from customers for high quality standards and stringent specifications may act as barriers to new entrants. There are several strategies adopted by our competitors to increase their market shares including pricing, discounts, multi-location operations, multi-level marketing etc.

In India, these competitors include companies which are engaged in the manufacturing of shop-fitting and retail fixtures. To protect our existing market share or capture additional market share in this highly competitive environment, we may be required to increase expenditure for promotions and introduce and establish new products or services. There can be no assurance that our current or potential competitors will not offer products and services comparable or superior to those that we offer at the same or lower prices, adapt more quickly to changes in customer preferences, or expand their operations at a faster pace than we do. Increased competition may result in price reductions, reduced profit margins and loss of market share, thereby causing an adverse effect on our operations, prospects and financial condition

30. *Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.*

Our contingent liabilities as on March 31, 2025, March 31, 2024 and March 31, 2023 is Rs. 2575.20 lakhs, Rs. 0.96 Lakhs and 0.71 Lakhs Respectively. For further details of the contingent liabilities and commitments of our Company as on March 31, 2025, see **“Restated Financial Information”** on page 192 of this Red Herring Prospectus. If a significant portion of these liabilities materialize, fully or partly, it could have an effect on our results of operations and financial condition. Further, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

31. *If we are not able to successfully manage our growth, our business and results of operations may be adversely affected.*

Continued growth of our business and customer base requires us to expand our product portfolio, strengthen our product quality, expand and enhance our sales channels, better manage our supply chain, upgrade our information systems and technologies and devote other resources to our business expansions, among others. As we continue to grow, managing our business will become more complicated as we develop a wider product mix, some of which we may have less experience in. In addition, as we increase our product offerings, we will need to work with a larger number of business partners and maintain and expand mutually beneficial relationships with our existing and new business partners. Our inability to manage the expansion of our products range, customer base and operational capacities, and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

We cannot assure you that we will be able to effectively manage our growth, that our current personnel, infrastructure, systems, procedures and controls or any measures to enhance them will be adequate and successful to support our expanding operations or that our strategies and new business initiatives will be executed successfully. Our failure to manage our anticipated growth effectively could reduce our ability to execute our business strategies, recruit and retain personnel, innovate, and manage costs all of which could adversely affect our business, results of operations, cash flows and financial condition. In addition, the availability of funds plays a crucial role for growth and expansion of the business. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any downgrade in our credit ratings could increase our borrowing costs and adversely affect our access to capital. Further, in case we decide to raise additional funds through the issuance of equity or equity linked instruments, the interests of our shareholders may be diluted. Further, if we decide to meet our capital requirements through debt financing, our interest obligations shall increase and we may be subject to additional restrictive covenants under our respective financing arrangements. If we are

unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations and financial condition could be adversely affected.

32. Our Subsidiary Company i.e. Safe Enterprises Retail Technologies Private Limited operate in the similar line of business as us, which may lead to conflict of interest.

Our Subsidiary company i.e. Safe Enterprises Retail Technologies Private Limited, is in the similar line of business as of our Company. We cannot assure that our Promoters who have common interest in said company will not favour the interest of said company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and this subsidiary company in circumstances where our respective interests' conflict. In cases of conflict, our Promoter may favour this company and there can be no assurance that our Promoters or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours.

However, our Company will ensure necessary procedures and practices as permitted by laws and regulatory guidelines to address situations of conflict of interest as and when they arise. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. For further details, see "**Our Subsidiaries**" and **Annexure 34 - Related Party Transactions**" under Section titled "**Financial Information of the Company**" on page 169 and 192 respectively of this Red Herring Prospectus.

33. Our Group Company had incurred losses and had negative net worth in past and any operating losses in the future could adversely affect the results of operations and financial conditions of our group company.

Our Group Company i.e. Inscite Fintech Solutions Private Ltd., incorporated in September 2021, had incurred loss in F.Y 2021-22, 2022-23 and 2023-24 for an amount of Rs. 0.88 Lakhs, Rs. 4.34 Lakhs and Rs. 40.95 Lakhs, respectively and had negative net worth in FY 2022-23 amounting to Rs. 4.16 Lakhs. Another group company i.e. Safe Enterprises Shopfittings Private Limited, incorporated in January 1991, had incurred loss in FY 2021-22 of Rs. 3.21 Lakhs and had negative net worth of Rs. 1.16 Lakhs and Rs. 12.20 Lakhs in FY 2022-23 and FY 2021-22 respectively. Any operating losses could adversely affect the overall operations of the group and financial conditions and also divert the attention of the management and promoter towards the group company which could have an adverse effect on our operations and financials. For more information, regarding the Company, please refer chapter titled "**Our Group Companies**" beginning on page 265 of this Red Herring Prospectus.

34. We are exposed to foreign currency fluctuation risks, particularly in relation to export of products, which may affect our results of operations, financial condition and cash flows.

We present our financial statements in Indian Rupees. We export our products to USA, UAE, Oman etc. and for the FY ending March 31, 2025, March 31, 2024 and March 31, 2023 we derived revenue from export of 1.32%, 0.85% and 0.97% of our total revenue from operations for respective periods. Although we generally seek to pass exchange rate fluctuations to our customers through increases in our prices, there can be no assurance that we will be able to do so immediately or fully, which could affect our business, financial condition, results of operations and cash flows.

Thus, our global operations expose us to foreign exchange rate risks, arising primarily from our receivables. There can be no guarantee that such fluctuations will not affect our financial performance in the future as we continue to expand our operations globally.

35. We have incurred indebtedness which exposes us to various risks which may have an effect on our business and results of operations.

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on March 31, 2025, our total outstanding indebtedness was Rs. 24.33 lakhs. Further, company availed additional borrowings after March 31, 2025 which includes cash credit facilities from ICICI bank and Overdraft facilities against term deposits from SVC Co-Operative Bank Ltd.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

For further details regarding our indebtedness, see "**Statement of Financial Indebtedness**" on page 238 of this Red Herring Prospectus.

36. Some of the vehicles appearing in our books of accounts are not registered in the name of our Company.

Some of the vehicles recorded in our books of accounts and used by us for business purpose are legally registered in the name of our Promoters Mikdad Saleem Merchant and Huzefa Salim Merchant, while our Company is the beneficial owner of such vehicles.

Though, the promoters have given NOC to our company for use of such vehicles, in case any dispute arises in future regarding ownership or usage of such vehicles, we may not be able to effectively establish ownership of such vehicles, which may affect our financial condition and results of operations.

37. *The emergence of online trade channels may adversely affect the existence of traditional retail channels which may lead to decrease in demand of our products and have an adverse effect on our business operations and financial condition.*

We are engaged in the business of designing, manufacturing, supplying and installation of shop fittings and retail fixtures, across multiple retail segments such as fashion & apparels, electronics, departmental store etc. India has recently witnessed the emergence of online retailers and the market penetration of such online retail is likely to increase further.

The India Quick E-Commerce (Quick Commerce) market is poised for exponential growth, projected to reach US\$ 19,932.5 million driven by rising internet and smartphone penetration, convenience of quick delivery, and accelerated adoption during COVID-19, with diverse product categories and order value segments catering to evolving consumer preferences, and the domination of metropolitan cities presenting significant opportunities for retailers and key players to capitalize on the rapidly expanding market.

Source: <https://www.ibef.org/industry/ecommerce>

Such increase in online retail channels may lead to a decrease in traditional offline retail channels and accordingly demand for our products may decrease which can have an adverse effect on our business operations and financial condition.

38. *We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.*

We have entered into various transactions with our Directors/ Promoters, Promoter Group members, Promoter Group entities and Subsidiaries. These transactions, inter-alia include, remuneration, loans and advances, sales, purchases etc. For details of the percentage of related party transactions as compared to the total revenue, please refer to “**Summary of Related Party Transactions**” under Section titled “**Summary of Red Herring Prospectus**” of this Red Herring Prospectus. Our Company has entered such transactions due to easy proximity and quick execution on arms-length price in compliance with provisions of Companies Act 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

39. *We are dependent upon the experience of our management team and KMPs. If we are unable to attract or retain such team, this could adversely affect our business, results of operations and financial condition.*

We are dependent on the experienced management team for successful business operations. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled personnel. The loss of the services of our key personnel or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects.

In the event that we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, results of operations and financial condition may be adversely affected. For further information, see “**Our Management**” on page 172 of this Red Herring Prospectus.

40. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

41. *Our Company has taken unsecured loans that may be recalled by the lenders at any time.*

Our Company have availed unsecured loans which may be called by its lenders at any time. As on March 31, 2025, we had an outstanding unsecured loan amounting to Rs.24.00 lakhs. In the event that lender seeks a repayment of any such loan, our Company

would need to find alternative sources of financing to the extent of outstanding balance. As a result, any such demand may affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, please refer chapter titled “**Statement of Financial Indebtedness**” beginning on page 238 of this Red Herring Prospectus.

42. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in its first year of operation, there is no guarantee that we can implement the same on time and within the estimated budget going forward or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

43. *None of our Directors possess experience of being on the board of any listed company.*

None of our Directors possess experience of serving on the board of any listed company and accordingly, may not be adequately well-versed with the activities or industry practices undertaken by the listed company. We cannot assure you that this lack of adequate experience will not have any adverse impact on the management and operations of our Company. Further, our Company will also be subject to compliance requirements under the SEBI Listing Regulations and other applicable law post listing of the Equity Share on the Stock Exchanges. Our Board is capable of efficiently managing such compliance requirements including by engaging professionals having expertise in managing such compliances.

44. *We have issued Equity Shares in the last 12 months at a price which could be lower than the Issue Price.*

Except for bonus issue made on November 11, 2024 for 3,42,83,700 Equity Shares of face value of Rs.5 each in the ratio of 1650:1, our Company has not issued any Equity Shares at a price lower than the Issue Price during the period of one year preceding the date of this Red Herring Prospectus. For details, please refer to section titled “**Capital Structure**” on page 69 of this Red Herring Prospectus.

45. *Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders*

Our Promoter and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company or their relatives, dividend entitlement, properties given by them on lease/rental basis or loans advanced by them to the Company, and benefits deriving from the directorship in our Company. There can be no assurance that our Promoter will exercise his rights as shareholder to the benefit and best interest of our Company. Our Promoters along with the promoter group will continue to hold collectively 95.19% of the post issue paid up share capital of the company, thus, exercise significant control over us, being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting.

Further, our promoters and promoter group members have undertaken Secondary sale/transfer of shares, aggregating upto 4.88% of the paid-up equity share capital of the company. The acquirer/allottees of such pre-ipo placement and transaction of shares also includes the relatives of the promoters. The promoters may continue to make such transaction of shares in future, thereby, diluting the shareholding of investors in our Company.

For further information, please refer to the chapters/section titled “**Capital Structure**”, “**Our Business**”, “**Our Promoter & Promoter Group**” and “**Annexure 34 - Related Party Transactions**”, beginning on pages 69, 131, 185 and 192 respectively of this Red Herring Prospectus.

46. *We are subject to the risk of failure of, or a material weakness in, our internal control systems.*

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

47. *Technology failures or Cyber-attacks or other security breaches could have a material adverse effect on our business, results of operation or financial condition.*

IT systems are critical to our ability to manage our operations. Our IT systems enable us to coordinate our operations, from planning, raw material ordering, invoicing, delivery, customer relationship, management and decision support. If we do not allocate and

effectively manage the resources necessary to build and sustain the proper IT infrastructure, we could be subject to transaction errors, processing inefficiencies, customer service disruptions and, in some instances, loss of customers.

We face cyber threats, threats to the physical security of our facilities and employees, the potential for business disruptions associated with IT failures, natural disasters, or public health crises. We have installed anti-virus software to prevent our systems and infrastructure from being infected and crippled by computer viruses. All our internet facing servers installed at all our data centres as well as at all our offices are also secured with firewalls and intrusion preventions systems to prevent hacking. Even though we have always been cautious in managing our IT system and have not faced any cyber threats in past, if we are unable to protect sensitive information in future, our customers could question the adequacy of our threat mitigation and detection processes and procedures. Due to the evolving nature of these security threats, the impact of any future incident cannot be predicted.

48. *Certain key performance indicators for certain listed industry peers included in this Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.*

Pursuant to the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) (Fourth Amendment) Regulations, 2022 dated November 21, 2022, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the “*Basis for Issue Price*” beginning on page 112 of this Red Herring Prospectus. While our business comprises of the manufacturing industry, these listed industry peers are related to associated industry. Although this information is sourced from and relied upon on the audited financial statements of the relevant listed industry peers for as available on the websites of the Stock Exchanges, including the offer document/annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There are different methodologies and formulas used to compute the various ratios. See “*Basis for Issue Price*” for more information.

49. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company’s Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company’s Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company’s major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

50. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement for our Working Capital requirements and Capital expenditure, as detailed in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 95 of this Red Herring Prospectus.

51. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance,

losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

52. The activities carried out at our manufacturing units can cause injury to people or property in certain circumstances.

The activities carried out at our manufacturing units may be potentially dangerous to our employees. While we employ safety procedures in the operation of our manufacturing units and maintain what we believe to be adequate insurance, there is a risk that an accident may occur at our manufacturing units. An accident may result in personal injury to our employees, destruction of property or equipment, delivery delays, environmental damage, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation can be significant. Though we have not faced any such past instance, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects.

53. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder's investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "***Dividend Policy***" on page 191 of this Red Herring Prospectus.

54. We are subject to restrictive covenants under our credit facilities that limit our operational flexibility.

We have entered into agreements for availing debt facilities from lenders after March 31, 2025 which includes cash credit facilities and Overdraft facilities against term deposits. Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lenders, regarding, among other things such as major changes in share capital, management, changes in fixed assets, creation of any other charge, undertake any guarantee obligation etc. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. Though we have taken necessary approvals from our lenders as on the date of this Red Herring Prospectus, there can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements in future. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business.

55. Any Penalty or demand raised by statutory authorities in future will affect financial position of the Company.

Our Company is engaged in the business of designing and manufacturing of shop fittings and retail fixtures offering a wide range of customized in-store solutions across multiple retail segments such as fashion & apparels, electronics, departmental store etc. which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised by the concerned authority in future for late payments or non-payments for any previous year and current year will affect the financial position of the Company.

56. Industry information included in this Red Herring Prospectus has been derived from industry sources. There can be no assurance that such third-party statistical, financial and other industry information is complete, reliable or accurate.

57. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuance by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

58. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of NSE Platform in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of NSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

59. Significant differences exist between Indian GAAP and other accounting principles, such as Ind AS, IFRS and U.S. GAAP, which may be material to investors' assessments of our financial condition, result of operations and cash flows.

Our restated summary statements of assets and liabilities, restated summary statements of profit and loss and cash flows for the Fiscals 2025, 2024 & 2023 have been prepared in accordance with the Indian GAAP. We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. Ind AS, US GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

60. We may be subject to surveillance measures, such as the Additional Surveillance Measures (ASM) and the Graded Surveillance Measures (GSM) by the Stock Exchanges which may adversely affect trading price of our Equity Shares.

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Offer due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation.

In the event our Equity Shares are subject to such pre-emptive surveillance measures implemented by any of the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

61. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop,

or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

62. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the issue within three (3) Working Days from the Bid/ Offer Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the issue or may cause the trading price of our Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

63. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

64. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations. Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

65. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by Centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

66. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

67. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details, please refer to the chapter "**Government and Other Approvals**" on page 254 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations.

68. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or manmade disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

69. Our business is dependent on the retail sector, and any downturns, economic shifts, or supply chain disruptions could reduce demand for our custom shop fixtures business.

Our business, which provides custom-designed furniture and display units for retail stores, is closely tied to the retail sector. Any downturn in the retail market, such as reduced consumer spending, economic recessions, or changes in customer preferences, could result in fewer new store openings or refurbishments, reducing demand for our products. Further, supply chain disruptions or rising material costs could increase production expenses or cause delays, negatively affecting profitability. Increased competition in the custom fixture market could weaken our market position, and delays in retail project timelines or failure to adopt new technologies could hinder our growth. These risks could ultimately affect our business performance and financial outcomes.

70. *Our reliance on Steel industry and wood product industry for purchase of our major components could have an adverse effect on our business.*

The major raw materials required for our products is “steel” i.e. MS (Mild Steel) Tubes Sheets, SS (Stainless Steel) Tubes Sheets etc. and “wood” i.e. Particle Board, MDF (Medium-Density Fibre board), HDHMR (High-Density High-Moisture Resistant Board), Plywood etc. Our company’s reliance is placed to only commercial manufacturers, hence, our revenue from operation is dependent on the commercial steel & wood product industry. Factors affecting steel industry and wood product industry in general, or any of our suppliers in particular, could have a cascading adverse effect on our business, financial condition and results of operations. Such factors include, but are not limited to, our suppliers’ failure to successfully market their products or to compete effectively; change in any registration requirements or non-renewal of registrations or imposition of a regulatory ban, or trade sanctions imposed across the country or any such restrictions on the business or product or loss of market share, which may lead our customers to reduce or discontinue the purchase of our products; economic conditions of the markets in which our suppliers operate; regulatory issues faced by these industries in India and internationally; downturns or industry cycles that impact demand; and changes in technology or consumer tastes and requirements that alter demands for our products.

71. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

72. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

73. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details see section titled “**Key Industrial Regulations and Policies**” beginning on page 154 of this Red Herring Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

74. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

75. *Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

76. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

77. Investors may be adversely affected due to retrospective tax law changes made by the GoI affecting us.

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term "substantially" has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been instances where changes in the Income Tax Act have been made retrospectively and to that extent, there cannot be an assurance that such retrospective changes will not happen again.

Details of Utilization of Net Proceeds

The details of utilization of the Net Proceeds are set forth herein below:

1. Funding the Capital Expenditure requirements towards setting up of a new manufacturing unit

We are engaged in the business of designing, manufacturing, supplying and installation of shop fittings and retail fixtures, offering a wide range of customized in-store solutions across multiple retail segments such as fashion & apparels, electronics, departmental store etc. We are merchandising solution providers addressing challenges that retailers and brand marketers face in the rapidly evolving retail industry for display, placements, storage and safety of the products, thus, providing shop fitting solutions from conceptual design and prototyping to manufacturing and installation, tailored to meet the specific needs of our customers. We also offer the innovative shop fittings solutions including modular, electrified shop fittings that integrate seamlessly with various digital technologies such as LED lighting, digital screens, display stands etc. for retail outlets.

Our company was originally formed as a partnership firm consisting four Partners including one of our promoters i.e. Saleem Shabbir Merchant, vide partnership deed dated August 26, 1976, in the name of M/s Safe Enterprises, and later, the said registered partnership firm bearing registration number B-117707 was converted into a public limited company on July 21, 2024, with the objective of carrying on the business of designing, manufacturing, supplying and installation of shop fittings and retail fixtures, under the name of Safe Enterprises Retail Fixtures Limited, bearing Corporate Identification Number U46493MH2024PLC429137.

Our company is certified with ISO 9001:2015 for Quality Management and ISO-10001:2018 for Quality Management and Customer Satisfaction and has well established manufacturing facilities and design capabilities to create the various different kinds of shop fittings and retail fixtures based on a combination of our standardised engineered components and customer specifications. We have 15 designs registered under the Designs Act 2000. Design and Development is an integral part of our business enabling us to provide innovative and functionally appealing shop fitting components which are used within customised retail fixtures to create unique retail experiences. As of March 31, 2025, we have 15 experienced employees in our design and project team. Our manufacturing units are fully equipped to carry out processes such as prototyping, metal fabrication, wood working, powder coating, painting, assembling, testing, dismantling & packing etc.

We require various machines such as CNC Router, Dust Collector, Bean Saw, Servo Stabiliser, Hydraulic Lift, Panel Saw, Air compressor etc. for manufacturing of various shop-fitting and retail fixtures and as on March 31, 2025 we are operating at a production capacity of 90.14% (for metal works) and 87.90% (for wood works). As a part of our strategy, we intend to expand operations, we therefore intend to utilize a part of the Net Proceeds amounting to Rs. 6,588.59 Lakhs towards setting up of a new manufacturing unit where all the three existing facilities will be shifted. Currently company is operating from three manufacturing units. Now the Company is strategically moving to one bigger manufacturing unit where the entire existing set up (i.e. current manufacturing units) will be shifted under one roof. This will result into carrying out of all the manufacturing processes at one single place whether its metal work or wood work and accordingly would result into more operational economies of scale due to savings in costs related to logistics and transportation, electricity, repair & maintenance and other related costs.

The actual mode of such deployment has not been finalized as on the date of this Red Herring Prospectus. The fund requirements, the deployment of funds and the intended use of the Net Proceeds, for setting up of new manufacturing unit, as described herein are based on our current business plan, current and valid quotations from suppliers, and other commercial and technical factors. However, such total estimated cost and related fund requirements have not been appraised by any bank or financial institution or any other independent agency.

Benefits arising out of the stated object:

To carry out the manufacturing process, as of now the Company buys raw material such as steel in the form of tubes & sheets. In proposed new manufacturing unit, Company will install machines such as Tube cutting and Sheet bending machines, with which it will be able to do tube laser cutting and sheet metal processing & bending activities in house. This way instead of laser cutting and sheet bending activities being done through the outsourced vendors, the cutting process and bending activities will be done in-house which will help in easy adaptations to design changes and modifications as well as making them innovative and creative. We also believe that it will reduce dependency on external parties and potential delays helping us serve customer demands faster. Similarly, Metal painting & Surface treatment activities in new manufacturing unit will be done in-house as related machines are proposed to be purchased in new unit. Currently, such activities cannot be undertaken in existing units due to space constraints. The new manufacturing unit has a bigger area where these machines can be installed and in-house work can be done. Hence, keeping all these benefits in mind and to reap maximum operational economies of scale like increased productivity, reduced unit costs, improved quality etc. the Company is proposing to undertake said capital expenditure.

2. Investment in our Subsidiary, Safe Enterprises Retail Technologies Private Limited for financing its capital expenditure requirements in relation towards installation of additional plant and machinery.

As on the date of this Red Herring Prospectus, existing factory unit of our subsidiary company is located at Gat No. 95, Aalandi-Markal Road, Solu near Bharat Petroleum, Tal-Khed, 412105, Maharashtra, India. For further details, see ***“History and Certain Corporate Matters – Our Subsidiaries”*** on page 165 of this Red Herring Prospectus. Safe Enterprises Retail Technologies Private Limited is accredited with UL Certification and offers the development and distribution of innovative shop fittings solutions such as electrified shop fittings including LED lighting, digital screens, display stands etc. The manufacturing unit of this company is situated in Pune, Maharashtra. The second subsidiary is in the name of Inscite Advisory Services LLP, which was incorporated on January 23, 2018, provides financial consultancy and advisory services.

As a part of our strategy, we intend to expand our operations, through our subsidiary Safe Enterprises Retail Technologies Private Limited, we therefore intend to utilize a part of the Net Proceeds amounting to Rs. 699.02 Lakhs towards capital expenditure requirements in relation to installation of additional plant and machinery at its factory unit located at Gat No. 95, Aalandi-Markal Road, Solu near Bharat Petroleum, Tal-Khed, 412105, Maharashtra, India. The infusion of funds by our Company in our Subsidiary is proposed to be undertaken in the form of equity or debt or a combination of both or in any other manner as may be decided by our Company. The actual mode of such deployment has not been finalized as on the date of this Red Herring Prospectus.

Benefits arising out of the stated object:

Subsidiary company is investing in Laser machines i.e. Tube & Sheet Laser machines, Laser welding machines along with sheet bending machines, which will result into an increase in overall capacity and capability expansion. These machines will result into an automatic sheet bending without the use of various components and tools which currently the company is using in existing machines. This will result into cost saving related to such tools and components along with enhanced production in less time. Additionally, entire wood work plant is being installed within the factory premises which is a completely new dimension in terms of new capabilities as currently the same is outsourced from other vendors. Thus, In-house wood work will reduce reliance on external suppliers, which can lower material costs and improve profit margins.

Hence, keeping all these benefits in mind and to reap maximum operational economies of scale like increased productivity, reduced unit costs, improved quality etc. the Company is proposing to undertake said capital expenditure.

Assumptions for working capital requirements

The following table sets forth the details of the holding period (with days rounded to the nearest whole number) considered for the financial years ended March 31, 2025, March 31, 2024 and March 31, 2023, as well as estimated for financial year ended March 31, 2026.

Particulars	Unit	March 31, 2023	March 31, 2024	March 31, 2025	March 31, 2026
		Audited (Standalone Restated)			Estimated
Debtors	Days	73	76	62	96
Creditors	Days	79	76	60	51
Inventories	Days	10	12	30	52

Justification:

Debtors	<p>The historical holding days of trade receivables has been ranging from 62 days to 76 days during Fiscal 2023 to Fiscal 2025. As per the current credit terms and prevalent trend of the industry & in order to expand company's operations, the holding level for debtors is anticipated at 96 days of total revenue from operations during fiscal 2026.</p> <p>We have witnessed significant growth in past. The revenue from operations has increased from Rs. 7721.57 lakhs in financial year 2022-23 to Rs. 10091.49 Lakhs and Rs. 12613.83 Lakhs in Financial Years 2023-24 and 2024-25 respectively, representing a Compound Annual Growth Rate (CAGR) of 27.81% over the past three years. To accommodate this growth and to further achieve higher growth in sales we wish to extend more favourable credit terms to our customers which require adequate working capital to support extended credit facilities to our customers. This expansion is crucial for meeting the rising demand in the market and seizing new opportunities for growth in untapped market.</p> <p>Currently, we are operating at maximum capacity and more than 90% of total revenue from operations is from our one largest customer. Due to capacity constraints we are not able to serve demand orders from many other customers and accordingly we are planning to establish a new manufacturing unit with additional machineries which will increase our overall plant capacity. With increased plant capacity and expansion new orders from other customers will also be served very efficiently. As of now, our largest customer provides us with approx. 50% advance payment but from other customers no advance payment is received and payments are realized once installation is successfully done and verified which varies from 60 to 90 days. Further, customers retain 10% of total order amount for a period of 3 to 6 months which results into blockage of the funds with the customers for long. Thus, as per the current credit terms and in order to expand company's operations, the holding level for debtors is anticipated at 96 days of total revenue from operations during Fiscal 2026, respectively. By offering this flexibility, we expect to stimulate increased sales volume and foster stronger customer relationships. This adjustment aligns with our strategy to expand operations while ensuring financial sustainability.</p>
Creditors	<p>Past trend of Trade payables holding days has been in the range of 60 days to 79 days approximately during Fiscal 2023 to 2025. However, with additional working capital funding, our Company intends to reduce trade payable to 51 days during Fiscal 2026 to avail competitive purchase price to increase overall profitability of our Company.</p>

	<p>In past also we have been benefited in terms of price quotations from same suppliers when we had reduced the payment cycle time for them. Such reduction in payment days helps us in getting better discounted prices, thus, improving our overall cost of production and profitability. Our Company plans to streamline its payable processes to its vendors enabling it to negotiate for better rates and thereby the holding levels are expected to reduce to 51 days in Fiscal 2026. Prompt payments empower us to negotiate more favourable terms and prices, fostering stronger supplier relations and bolstering our bottom line.</p> <p>Additionally, looking ahead to fulfil bulk orders from our customers, we are expecting to procure the products in bulk quantities to avail bulk order discounts and make early payments to the vendors in future, which will again help us in getting better prices, improve our business prospects and face competition in a better manner. Thus, Prompt payments empower us to negotiate more favourable terms and prices, fostering stronger supplier relations.</p>
Inventories	<p>Inventories include raw material, WIP and finished goods. The historical holding days of inventories has been in range of 10 days to 30 days during Fiscal 2023 to 2025. We have witnessed increased sales in past with a Compound Annual Growth Rate (CAGR) of 27.81% over the past three years and with the perspective to increase business operations in future, the Company estimates inventories holding days to be around 52 days Fiscal 2026. As business operations are expected to increase in Fiscal 2026, it will additionally require higher levels of inventory to meet the required demand and achieve operational efficiency.</p> <p>Further, as a part of our strategy we intend to expand our operations and therefore we intend to utilize a part of the Net Proceeds towards setting up of a new manufacturing unit. The establishment of this new manufacturing unit will require additional levels of inventory to meet increased demand and sales from business operations. We have already acquired new customers in our subsidiary company but these customers are served only innovative solutions through our subsidiary. They also need traditional fixtures which we are unable to serve due to capacity constraints in our company. This growth in business will evidently require us to hold more inventory. With increase in executable orders and to successfully deliver all our orders, we would need higher levels of working capital funds to secure ready inventory which is usually collected at the initiation of the orders. This strategic approach aligns with our goal of sustaining growth while efficiently managing inventory levels to meet order demands effectively.</p> <p>Additionally, as per the requirements of the customers, we need to hold ready stock equivalent to the requirements for various stores of our customers at various locations for an immediate supply to them at the time of opening of the stores which may vary from time to time and even could get extended from the decided timelines. This requirement has led to an increase in holding days of inventory.</p> <p>Thus, the Inventories projected for FY 2025-26 are in line with the Business requirements based on estimated sales and requirements of our customers to hold ready stock in hand. We believe that the investment in working capital to the tune of inventories, will need to be done first and which will further result in successful increase in the turnover. Thus, the infusion of funds will help the Company in holding sufficient inventories which in turn will help in timely fulfilment of orders.</p>

Rationale for the increase in working capital requirement from Rs. 919.51 lakhs in FY 2025 to Rs. 5176.51 Lakhs in FY 2026:

In the intervening period i.e. period of F.Y 2025-26 being the period before the new factory is ready for commercial production, the company will still need to continue with its orders and since its utilized capacity is already at 90% level, it will outsource part of the production to vendors.

As per the nature of the business of the company, outsourcing basically means that it procures components at a finished or semi-finished stage rather than the usual process of procuring materials at raw material stage and doing the manufacturing processes in house. For example, the company usually procure large size boards and sheets and convert them into required dimensions and shapes using in-house machinery but in case of the cutting and bending processes having a bottleneck constraint, company would procure exact cut sizes from vendors. The outsourcing or making production in-house depends upon the requirement of components along with capacity utilization of the company.

Such vendors who are fulfilling these requirements of exact cut sizes of boards & sheets, generally require immediate or early payments, ranging between 0-15 days. Thus, the company will fulfil orders of customers and serve the estimated increased demand through a combination of in-house manufacturing and outsourcing, for which it will require additional working capital.

4. Investment in our subsidiary Safe Enterprises Retail Technologies Private Limited to meet working capital requirements

Our subsidiary i.e. Safe Enterprises Retail Technologies Private Limited propose to utilize towards to fund our working capital gap majorly for investment in trade receivables, inventories and payment to trade payables and funding day to day operations. The Company will meet the requirement to the extent of ₹1000.00 Lakhs from the Net Proceeds of the Issue and balance from borrowings at an appropriate time. The infusion of funds by our Company in our Subsidiary is proposed to be undertaken in the form of equity or debt or a combination of both or in any other manner as may be decided by our Company. The actual mode of such deployment has not been finalized as on the date of this Red Herring Prospectus

Thus, the infusion of funds will help the Company in holding sufficient inventories which in turn will help in timely fulfilment of orders.</p>

Rationale for increase in working capital requirements for estimated period FY 2026:

Subsidiary company has experienced growth in last three financial years. The revenue from operations has increased Rs. 2481.88 lakhs in financial year 2022-23 to Rs. 4111.23 Lakhs and Rs. 4249.47 Lakhs in Financial Years 2023-24 and 2024-25 respectively. Hence, the company foresees a rise in working capital needs on account of this continuous increase in the revenue from business operations of the company.

Further, the increase in working capital requirements is driven by the company's expansion initiatives, particularly due to capital expenditure requirements towards installation of additional plant and machinery for increasing the production capacity. With the increase in volume of business, there is a corresponding need for more funds to finance inventory, labour and other operational expenses. To accommodate this growth, the company aims to maintain its debtor cycle which require adequate working capital to support extended credit facilities to its customers. This expansion is crucial for meeting the rising demand in the market and seizing new opportunities for growth in untapped market.

Accordingly, due to expected increase in revenue of operations and for timely fulfilment of its orders, company will be in requirement of greater Inventories in FY 2025-26 of Rs. 569.82 lakhs. As per the requirements of the customers, company needs to hold ready stock equivalent to the requirements for various stores at various locations for an immediate supply to them at the time of opening of the stores. To successfully deliver all the orders company needs to maintain reasonable levels of inventories. This increase in inventory will lead to increase in requirement of working capital.

Further, in FY 2025-26, trade receivables of the Company are expected to increase to Rs. 1424.54 Lakhs, due to extension of more favourable credit term to customers, involving more funds getting blocked in Trade Receivables. Increase in credit terms is primarily driven by the characteristics of our customer base which predominantly comprises of retail industry, where, customers typically prefer to make payments after the completion of work. This will result into more amount getting blocked under trade receivables, thus, resulting into an increase in working capital requirement.

Additionally, company is reducing the trade payable days to 29 days in FY 2025-26 to avail competitive purchase price and to increase overall profitability of our Company. Hence, above mentioned capital expenditure, increase in Inventories and Trade Receivables on one hand and reduction in payment days of Trade Payables on other hand, has led to an increase in the working capital requirement in FY 2026.

GLOBAL ECONOMIC OUTLOOK

Global growth is expected to hold steady at 2.7 percent in 2025-26. However, the global economy appears to be settling at a low growth rate that will be insufficient to foster sustained economic development—with the possibility of further headwinds from heightened policy uncertainty and adverse trade policy shifts, geopolitical tensions, persistent inflation, and climate-related natural disasters. Against this backdrop, emerging market and developing economies (EMDEs)—which fuel 60 percent of global growth—are set to enter the second quarter of the twenty-first century with per capita incomes on a trajectory that implies substantially slower catch-up toward advanced-economy living standards than they previously experienced. Without course corrections, most low-income countries are unlikely to graduate to middle-income status by the middle of the century. Policy action at both global and national levels is needed to foster a more favorable external environment, enhance macroeconomic stability, reduce structural constraints, address the effects of climate change, and thus accelerate long-term growth and development.

Global outlook

Global growth is stabilizing as inflation returns closer to targets and monetary easing supports activity in both advanced economies and emerging market and developing economies (EMDEs). This should give rise to a broad-based, moderate global expansion over 2025-26, at 2.7 percent per year, as trade and investment firm. However, growth prospects appear insufficient to offset the damage done to the global economy by several years of successive negative shocks, with particularly detrimental outcomes in the most vulnerable countries. From a longer-term perspective, catch-up toward advanced economy income levels has steadily weakened across EMDEs over the first quarter of the twenty-first century. Heightened policy uncertainty and adverse trade policy shifts represent key downside risks to the outlook. Other risks include escalating conflicts and geopolitical tensions, higher inflation, more extreme weather events related to climate change, and weaker growth in major economies. On the upside, faster progress on disinflation and stronger demand in key economies could result in greater-than-expected global activity. The subdued growth outlook and multiple headwinds underscore the need for decisive policy action. Global policy efforts are required to safeguard trade, address debt vulnerabilities, and combat climate change. National policy makers need to resolutely pursue price stability, as well as boost tax revenues and rationalize expenditures in order to achieve fiscal sustainability and finance needed investments. Moreover, to raise longer term growth and put development goals on track, interventions that mitigate the impact of conflicts, lift human capital, bolster labor force inclusion, and confront food insecurity will be critical.

Regional prospects

Against a backdrop of heightened trade restrictive measures and subdued global growth, EMDE regions face varying growth prospects this year. Growth is projected to moderate in East Asia and Pacific, amid weak domestic demand in China, as well as in Europe and Central Asia due to decelerations in some large economies following strong growth last year. In contrast, a pickup is anticipated in Latin America and the Caribbean, the Middle East and North Africa, South Asia, and SubSaharan Africa, partly underpinned by robust domestic demand. In 2026, growth is expected to strengthen in most regions. The year 2025 will mark the end of the first quarter of the twenty-first century—a good time to review the performance of emerging and developing economies since 2000 and assess their prospects. This edition of the Global Economic Prospects report features two analytical chapters that offer a quarter-century report card. One chapter provides insights into the prospects and challenges of middle-income emerging and developing economies; the other covers the performance of the poorest countries.

The global economic context has become modestly more favorable since last June, following several years characterized by overlapping negative shocks. Inflation appears to be moderating without a substantial slowdown in key economies, and monetary policy easing has now become widespread. In the next couple of years, deceleration in the two main engines of the global economy—the United States and China—is expected to be offset by firming growth elsewhere, including in many emerging market and developing economies (EMDEs; figure 1.1.A). In all, the post-pandemic global economic expansion is forecast to remain on a steady path. However, the global economy appears to be settling at a relatively low level of growth—one insufficient to foster sustained economic development and catchup in per capita incomes—with the possibility of further headwinds from heightened policy uncertainty, growing trade fragmentation, slower-than-anticipated progress in reducing inflation, and weaker activity in major economies.

Global trade growth rebounded last year, despite weak manufacturing activity in some key advanced economies. The recovery was driven by goods trade, which firmed in the third quarter of last year, partly owing to inventory buildups. Meanwhile, services trade growth continued to moderate. In 2025-26, trade growth is set to pick up further but will still remain below its 2010-19 average pace

in nearly two-thirds of economies (figure 1.1.B). Recourse to trade restrictions remains prevalent—with the number of new measures implemented in 2024 five times higher than the 2010-19 average.

Aggregate commodity prices softened by about 3 percent in 2024, primarily reflecting improving supply conditions for energy and food commodities, despite heightened geopolitical tensions. Commodity prices are projected to ease further over the forecast horizon. A small decline in oil prices last year reflected ample potential oil supply amid decelerating global oil consumption (figure 1.1.C). A significant further decrease in oil prices is expected in 2025-26 as production expands while global oil demand growth remains modest. Base metals prices are set to stabilize over the forecast horizon, mirroring steady global growth. Meanwhile, prices for staple food crops, having fallen notably in 2024, are expected to post a small further decline.

B. Share of economies with average trade growth in 2025-26 lower than in 2010-19

C. Annual change in oil demand

Global headline inflation has continued to gradually ease, in part reflecting falling commodity prices and the lagged effects of monetary tightening. Inflation is now close to targets in many advanced economies and EMDEs, with the share of economies with above-target inflation on a downward trend and set to reach in 2025 its lowest level since the peak in 2022 (figure 1.1.D). Core inflation briefly edged up in some EMDEs and advanced economies at about the middle of last year on persistent strength in services inflation. However, it has since generally resumed a gradual decline.

Global financial conditions have eased slightly, in aggregate, since mid-2024, mainly owing to the onset of monetary easing in the United States and generally robust risk appetite. Advanced-economy policy rates are expected to decline somewhat further this year but remain well above the unusually low levels of the 2010s (figure 1.1.E). For much of last year, improving investor sentiment translated into capital inflows and improving financial conditions in EMDEs. Following the U.S. presidential election, risk appetite in the United States strengthened further.

However, a general appreciation of the U.S. dollar, rising U.S. bond yields, and various idiosyncratic domestic risks pared back the easing in EMDE financial conditions late in the year, with many EMDE currencies weakening amid debt and equity outflows. Growing debt-service burdens continue to pose considerable headwinds to economic activity in countries with elevated financial vulnerabilities, particularly in many low income countries (LICs). Among middle-income countries with weak credit ratings, sovereign spreads normalized substantially last year, although borrowing costs remain far higher than in the 2010s. Fiscal policy is estimated to have been broadly neutral for global growth in 2024, with previously expected fiscal consolidation plans delayed in some major economies. Going forward, fiscal policy is generally anticipated to be modestly contractionary. The pace of fiscal consolidation is expected to pick up in EMDEs excluding China, and in some advanced economies—although not in the United States—as governments intensify efforts to realign spending with revenues. This is likely to exert a modest drag on near-term global growth.

The global outlook is surrounded by substantial uncertainty, and the balance of risks remains tilted to the downside. Global growth could be weaker than projected on account of potential adverse changes in trade policies and heightened policy uncertainty. A surge in trade-distorting measures, implemented mainly by advanced economies but often disproportionately affecting EMDEs, poses a risk to global trade and economic activity (figure 1.1.F).

INDIAN ECONOMY OUTLOOK

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at Rs. 33.10 lakh crore (US\$ 3.8 trillion) with growth rate of 9.9%, compared to Rs. 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY25. In FY25, India's exports stood at Rs. 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing.

In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback. India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP for FY25 is estimated at Rs. 187.95 lakh crores (US\$ 2.2 trillion) with growth rate of 6.5%, compared to Rs. 176.51 lakh crore (US\$ 2.06 trillion) for FY24. As on Jan 2025, there are 118 unicorn startups in India, with a combined valuation of over Rs. 3.0 lakh crore (US\$ 354 billion). The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to

GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- The HSBC India Manufacturing PMI increased to 58.4 in April 2025, up from 58.1 in March 2025, based on preliminary estimates. This rise signifies improved operating conditions and represents the most rapid growth pace observed in the past year. Contributing factors include a notable surge in new export orders, which experienced their most significant increase in over fifteen years, alongside a faster expansion in overall new business activity.
- In Q1 CY25, private equity (PE) and venture capital (VC) investments stood at Rs. 1,16,861 crore (US\$ 13.7 billion) across 284 deals.
- India saw a robust 10.35% growth in passengers carried by domestic airlines at 431.98 lakh in FY25, from 391.46 lakh in FY24, according to the Directorate General of Civil Aviation (DGCA).
- As of April 18, 2025, India's foreign exchange reserves stood at Rs. 58,57,537 crore (US\$ 686.70 billion).
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- The gross GST (Goods and Services Tax) revenue collection stood at Rs. 1.84 lakh crore (US\$ 21.57 billion) in February 2025.
- Between April 2000–December 2024, cumulative FDI equity inflows to India stood at Rs. 89.88 lakh crore (US\$ 1.05 trillion).
- In February 2025, the overall IIP (Index of Industrial Production) stood at 151.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 141.9, 148.6 and 194.0, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- Foreign Institutional Investors (FII) inflows in FY25 were close to Rs. 1.27 lakh crore (US\$ 14.89 billion), while Domestic Institutional Investors (DII) bought Rs. 6.00 lakh crore (US\$ 70.34 billion) in the same period.
- India's wheat procurement rose 34% YoY, reaching 22.36 MT as of April 28, 2025, with target of 31 MT in sight. Strong MSP, bonuses, and robust crop output boost sales to government agencies, ensuring food security and potential for open market intervention.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase

in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Aatmanirbhar Bharat' and 'Local goes Global'.
- To enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

Road Ahead

India's economy grew by 6.2% in Q3 FY25. Signs of recovery are now visible, with growth expected to rise to 7.6% in Q4 FY25—indicating a possible turnaround in the coming months. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10.0 % to Rs. 11.21 lakh crore (US\$ 131.42 billion) over Rs. 10.18 lakh crore (US\$ 119.34 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total exports of goods and services rose by 5.5% to a record Rs. 69.8 lakh crore (US\$ 820.9 billion) in FY25, compared to Rs. 65.8 lakh crore (US\$ 773.0 billion) in FY24. With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

MANUFACTURING INDUSTRY IN INDIA

Introduction

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market. Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive

industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity. India's manufacturing sector reached a 16-year high in March, with the HSBC Manufacturing Purchasing Managers' Index (PMI) rising to 59.1, driven by strong increases in output, new orders, and job creation across various goods sectors. India has the potential to become a global manufacturing hub for wind power components. India is well-positioned to cater to 10% of the global wind energy demand by 2030, leveraging its manufacturing capacity, technology, and global reputation. With 17% of the nation's GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy's output come from manufacturing by 2025.

India now has the physical and digital infrastructure to raise the share of the manufacturing sector in the economy and make a realistic bid to be an important player in global supply chains. A globally competitive manufacturing sector is India's greatest potential to drive economic growth and job creation this decade. Due to factors like power growth, long-term employment prospects, and skill routes for millions of people, India has a significant potential to engage in international markets. Several factors contribute to their potential. First off, these value chains are well positioned to benefit from India's advantages in terms of raw materials, industrial expertise, and entrepreneurship. Second, they can take advantage of four market opportunities: expanding exports, localising imports, internal demand, and contract manufacturing. With digital transformation being a crucial component in achieving an advantage in this fiercely competitive industry, technology has today sparked creativity. Manufacturing sector in India is gradually shifting to a more automated and process driven manufacturing which is expected to increase the efficiency and boost production of the manufacturing industry. India is gradually progressing on the road to Industry 4.0 through the Government of India's initiatives like the National Manufacturing Policy which aims to increase the share of manufacturing in GDP to 25 percent by 2025 and the PLI scheme for manufacturing which was launched in 2022 to develop the core manufacturing sector at par with global manufacturing standards. The Union Minister for Finance and Corporate Affairs, Ms. Nirmala Sitharaman announced the "National Manufacturing Mission" in the Union Budget 2025-26 to boost "Make in India" by supporting industries of all sizes with policy frameworks, ease of business, MSME growth, future-ready workforce, and clean tech manufacturing.

According to MeitY, India's digital economy is projected to grow at twice the rate of the overall economy, accounting for 20% of the national income by 2029-30, surpassing both agriculture and manufacturing, driven by digital platforms and widespread digitalisation across sectors. FDI in India's manufacturing sector has reached Rs. 14,34,224 crore (US\$ 165.1 billion), a 69% increase over the past decade, driven by production-linked incentive (PLI) schemes. In the last five years, total FDI inflows amounted to Rs. 33,31,465 crore (US\$ 383.5 billion). India is planning to offer incentives of up to Rs. 18,000 crore (US\$ 2.2 billion) to spur local manufacturing in six new sectors including chemicals, shipping containers, and inputs for vaccines. India ranked among the top five countries in services export growth in FY25 (April-November), rising to 12.8% from 5.7% in FY24, with computer and business services contributing around 70%. Major players like Apple and its contract manufacturers, along with Dixon Technologies, are expanding their workforce to meet growing production needs.

Market Size

India's exports grew 6% YoY to Rs. 52,90,225 crore (US\$ 602.6 billion) in April-December 2024, driven by strong growth in non-petroleum goods and services, with key contributions from pharmaceuticals, electronics, engineering goods, chemicals, and the e-commerce sector. By 2030, Indian middle class is expected to have the second-largest share in global consumption at 17%.

India's e-commerce exports are projected to grow from Rs. 8,757 crore (US\$ 1 billion) to Rs. 35,02,800 crore (US\$ 400 billion) annually by 2030, aiding in achieving Rs. 1,75,14,000 crore (US\$ 2 trillion) in total exports.

India's smartphone exports hit a record Rs. 20,395 crore (US\$ 2.44 billion) in November 2024, marking a 92% surge from Rs. 10,634 crore (US\$ 1.27 billion) in November 2023.

India's smartphone exports surged by 42% in FY24, reaching Rs. 1,35,517.20 crore (US\$ 15.6 billion), with the US as the top destination, reflecting the success of the Production-Linked Incentive (PLI) scheme in boosting the sector.

As per the survey conducted by Reserve Bank of India, capacity utilisation in India's manufacturing sector stood at 76.8% in the third quarter of FY24, indicating a significant recovery in the sector.

India's GDP surged by 8.4% in the October-December quarter, surpassing expectations. GDP growth was driven by robust performances in the manufacturing and construction sectors, with the manufacturing sector expanding by 11.6% annually and the construction sector growing by 9.5%. India's total exports during April-December 2024 is estimated at Rs. 52,35,134 crore (US\$ 602.64 billion) registering a positive growth of 6.03%.

Capacity Utilisation in Manufacturing Sector (in %)

RETAIL INDUSTRY IN INDIA

Introduction

Indian retail industry has emerged as one of the most dynamic and fast-paced industries due to the entry of several new players. It accounts for over 10% of the country's gross domestic product (GDP) and around 8% of the employment. India is the world's fifth-largest global destination in the retail space. India is the world's fifth-largest global destination in the retail space and ranked 63 in the World Bank's Doing Business 2023.

The sizeable middle class and nearly unexplored retail market in India are the main enticing factors for international retail behemoths seeking to move into newer markets, which will help the Indian retail business grow more quickly. The urban Indian consumer's purchasing power is increasing, and branded goods in categories like apparel, cosmetics, footwear, watches, beverages, food, and even jewellery are gradually evolving into business and leisure that are well-liked by the urban Indian consumer. The retail sector in India is expected to reach a whopping US\$ 2 trillion in value by 2032, according to a recent analysis by the Boston Consulting Group (BCG).

India is one of the most promising and developing marketplaces in the world.

There is a great deal of desire among multinational corporations to take advantage of the consumer base in India and to enter the market first. Nearly 60 shopping malls encompassing a total retail space of 23.25 million sq. ft are expected to become operational during 2023-25.

India ranks among the best countries to invest in Retail space. Factors that make India so attractive include the second largest population in the world, a middle-income class of ~158 households, increasing urbanization, rising household incomes, connected rural consumers, and increasing consumer spending.

As of December 2022, there were 7.8 billion daily e-commerce transactions. Online shoppers in India are expected to reach ~500 million in 2030 from 150 million in 2020. Online shoppers in India are expected to reach ~500 million in 2030 from +150 million in 2020. The E-Commerce market is expected to touch US\$ 350 billion in GMV by 2030.

India's retail sector was experiencing exponential growth with retail development taking place not just in major cities and metros, but also in small cities. Healthy economic growth, changing demographic profile, increasing disposable income, urbanisation, and changing consumer tastes and preferences have been some of the factors driving growth in the organised retail market in India.

To improve the business climate and make it simpler for foreign companies to register fully owned subsidiaries in India, the Indian government has implemented a number of rules, regulations, and policies.

Growth Drivers for retail in India

- Favourable Demographics: India's large and young population, Rising Middle Class, Urbanization, Changing Lifestyle and Consumption Patterns and favourable government initiatives prove to be a growth engine for the retail industry.
- Rise in income and purchasing power: As of the most recent Purchasing Power Parity (PPP) calculations by the World Bank and the International Comparison Programme (ICP), India ranks 3rd in the world in terms of GDP by PPP. Along with improvements in general purchasing power of the middle class, and a low cost of living, India has also almost completely eradicated extreme poverty at the global PPP poverty level of US\$ 1.9.
- Change in consumer mindset: The transition from traditional retail to online platforms in India has spurred a shift in consumer mindset. This change is characterized by a prioritization of convenience, a wider product selection, increased price sensitivity, growing trust in online transactions, reliance on reviews and recommendations, evolving loyalty dynamics, a greater embrace of technology, and heightened expectations for fast delivery.
- Brand consciousness: Brand consciousness in India is a multifaceted phenomenon shaped by economic, cultural, and technological factors. As consumer expectations continue to evolve, brands must remain agile and responsive to changing trends, ensuring that they deliver value, innovation, and authenticity to maintain their competitive edge in the market.
- Easy consumer credit and increase in quality products: Share of unsecured retail loans grew to 25.2% from 22.9% in March 2021-2023, while secured loans eased from 77.1% to 74.8%. Banks' unsecured loan portfolio amounted to close to Rs. 12 lakh crore (US\$ 144.58 billion) as of July 2023.

Road Ahead

The COVID-19 pandemic has caused changes in consumer preferences, habits, and attitudes over the past few years. This has a significant impact on how people buy and consume goods and services. Global retailers are now using cutting-edge business strategies to take advantage of new retail opportunities. Consumers no longer distinguish between offline and online consumption channels. Due to this, major companies are experimenting with different ways to design seamless retail experiences that are integrated across all channels. By utilising both established e-commerce platforms and traditional techniques, retailers are also experimenting with revenue models to improve their customer value offer.

E-commerce is expanding steadily in the country. Customers have the ever-increasing choice of products at the lowest rates. E-commerce is probably creating the biggest revolution in retail industry, and this trend is likely to continue in the years to come. Retailers should leverage digital retail channels (E-commerce), which would enable them to spend less money on real estate while reaching out to more customers in tier II and tier III cities.

INTERIOR DESIGN INDUSTRY IN INDIA

Interior design encompasses understanding, organising and enhancing the internal architecture of human-made spaces, thus combining the arts and science. It includes activities such as conceptual development, site assessment, research, project management, spatial planning and design execution.

Interior decorators then perform these activities after analysing interior space requirements. The decorators select stylistic elements such as colour schemes, lighting or materials for comfort, and functionally efficient yet visually pleasing environments. As a result, there is now widespread acceptance of interior design in both residential and commercial structures, driven by enhanced space efficiency and functionality.

Evolution of India's Interior Design Industry

India's interior design industry has experienced a transformation over the past few decades. Driven by rapid urbanisation, rising disposable incomes and evolving lifestyle preferences, the industry has emerged as a crucial contributor to the country's economy.

Source: Medium research

The future of the Indian interior design market appears exceptionally promising, with industry experts projecting a market size of US\$ 81.2 billion by 2030, translating into a significant CAGR of 14.3%.

Commercial property being a major contributor to industry growth

The interior design market can be classified by application into the residential and commercial segments.

Source: Medium research

The commercial interior design segment is the largest market with a share of around 75% as of 2023; it is also the fastest-growing segment in the country. Growth in this segment is driven by India's booming commercial real estate market. Also, India is experiencing a transition in its work culture, in which the office interior plays an important role. Professional interior design helps make office spaces more comfortable and aligned with the client's brand philosophy. Professionals can always advise on better utilisation of office space, which reflects the nature of work and the work environment.

Factors Contributing to the Success of Interior Design Market in India

- **Economic growth and increasing disposable income**

India's expanding middle class with its higher-than-before disposable incomes has played an important role in the development of the interior design industry. The spending power of people has increased, leading to an upsurge in demand for services such as interior design. This has resulted in more opportunities for interior designers and companies, thus driving competition and promoting innovation within the industry.

- **Booming real estate market**

India's urban population is growing rapidly. Data from the World Bank shows that India's urban population increased from 31.16% of the overall population in 2011 to 34.03% by 2020 and is estimated to reach 40.0% by 2030. The increase in urban population has fuelled a surge in the need for residential properties while increasing workforce amid a booming economy has compelled companies to invest more in their infrastructure.

According to research by the IMARC Group, India's real estate market was worth US\$ 280 billion in 2023 and is set to rise to US\$ 562 billion by 2032. The rise in urban population and growth in real estate market directly links with interior design service requirements as homeowners and businesses always seek attractive and functional workspaces. Property sales in India in CY2023 reached record highs, hitting 26% YoY growth with 271,818 units sold across the top seven cities in the country.

As real estate prices soar, effective space management becomes essential. Professional interior designers optimise smaller areas, thus enhancing functionality and aesthetics, making the most of limited space in modern living

- **Influence of social media and technological innovations**

The demand for interior designers is also driven by the trends of smart homes, social media and changing lifestyles. Homes and businesses prefer theme-based designs with trends such as Mediterranean, European or Ethnic Indian styles. New technologies such as virtual reality have disrupted the interior design industry, enabling both clients and designers to visualise and experiment with ideas, although these technologies are not adopted by mass due to their high costs.

- **Changing lifestyle preferences**

Modern Indian consumers are increasingly exposed to global trends and lifestyles. Platforms like Instagram and Pinterest have become significant trend influencers, showcasing the latest in interior design and home décor. This exposure has led to a shift in consumer preferences, with a growing emphasis on contemporary and innovative design solutions.

OUR BUSINESS PROCESS-

The business process depicted in the above diagram is explained as follows:

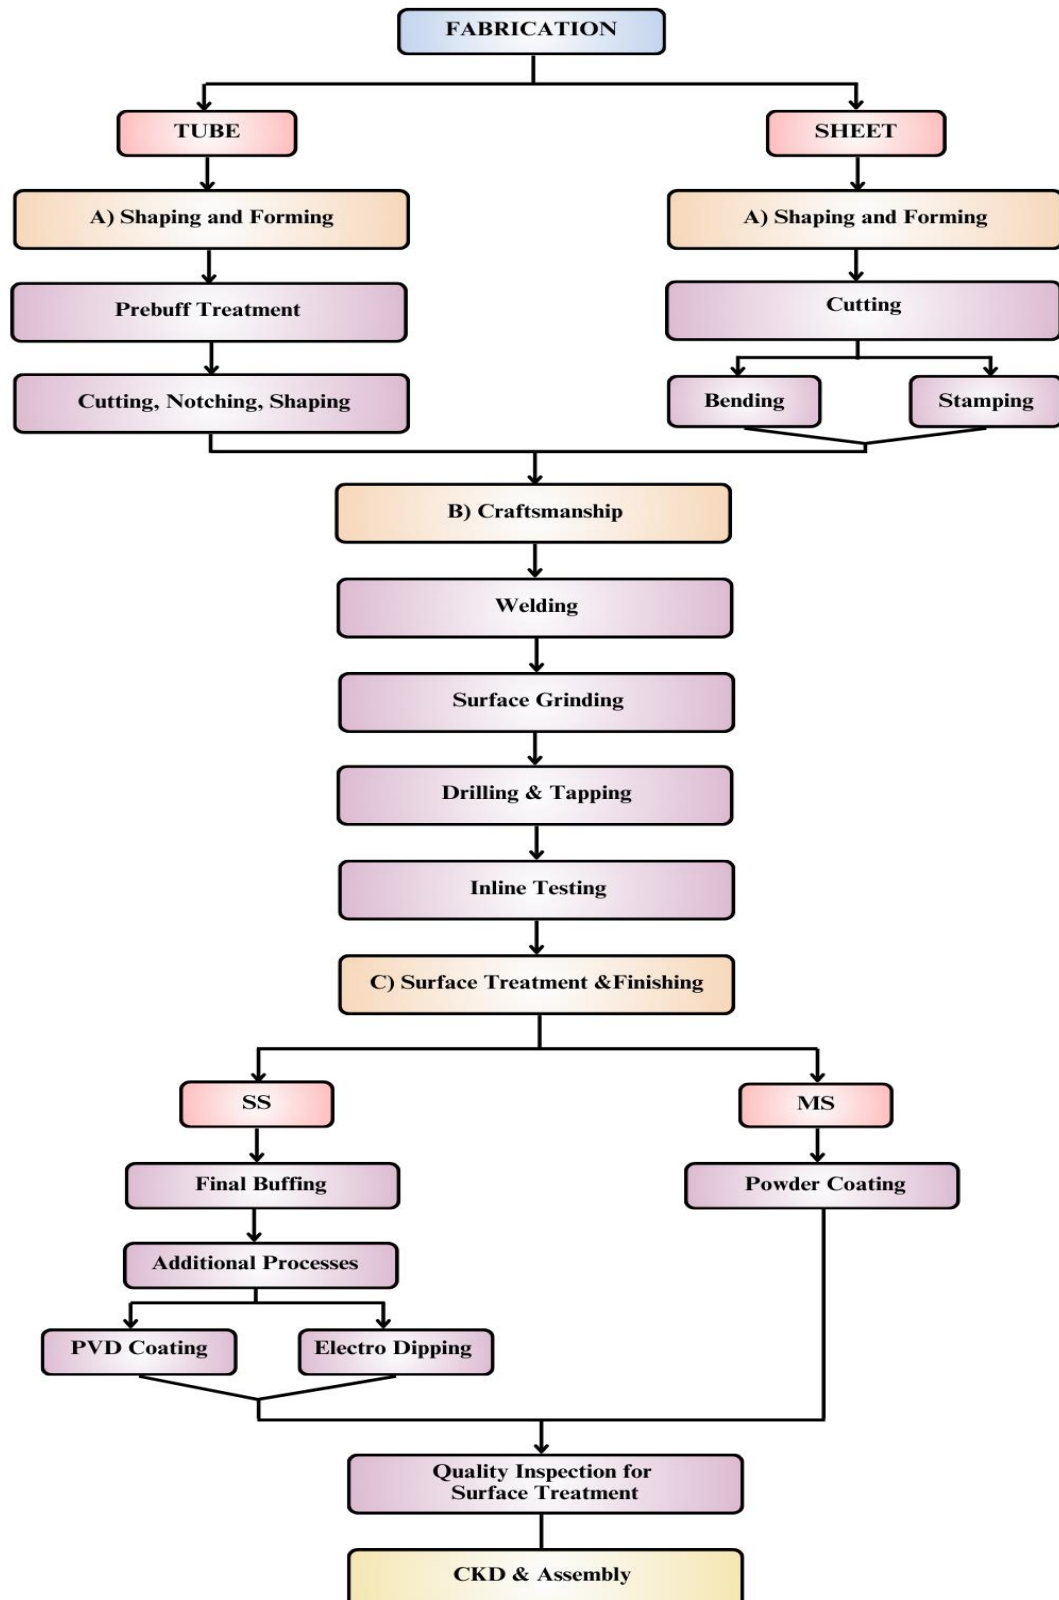

1. **Customer Enquiry & PO Generation:** The process begins when a customer reaches out with their retail store fixture requirements. Our team discusses their needs, provides cost estimates and once the customer agrees, they issue a Purchase Order (PO).
2. **Design Confirmation:** Once the PO is received, the design phase begins. The design team works on creating detailed technical drawings and 3D models of the fixtures, ensuring they meet the customer's needs. After multiple iterations, the customer approves the final design, confirming all specifications are accurate before moving forward.
3. **Purchase of Raw Materials:** With the design confirmed, procurement begins. The necessary raw materials like wood, metal, and other components are sourced from reliable vendors. Quality checks are performed to ensure that all materials meet industry standards and the specific requirements of the project.
4. **Manufacturing Process (Metal Works & Wood Works):** In manufacturing process, we transform raw materials into the actual fixture components. We have separate production lines for metal and wood items, which is explained below.

5. **CKD (Complete Knock Down) & Assembly Process:** After manufacturing process from wood or metal, this is the final convergence point for all finished components. It includes following processes:
- **Assembly Testing :**All components from various processing units are brought together and assembled into their final form as per design specifications. This initial assembly ensures all parts fit together perfectly and function as intended. During this stage, comprehensive quality checks are performed on the assembled unit to verify structural integrity and functionality.
 - **Final Sign Off :**Quality control team performs a thorough final inspection of all components, verifying part counts, finish quality and documentation completeness.
 - **Dismantling:** After successful testing, the assembled unit is carefully disassembled into its component parts. Each component is organized and grouped logically for efficient reassembly at the installation site. This stage includes preparing detailed documentation of the assembly sequence for installation guidance.
 - **Packing:** Components are carefully packed using appropriate protective materials to ensure safe transit. Each package is labelled with contents and assembly sequence information, with special attention given to protecting finished surfaces during transport. From this stage, products can either move directly to dispatch for immediate delivery or proceed to warehouse storage.
6. **Storage:** When immediate dispatch is not required, packed items are systematically stored within the manufacturing unit.
7. **Dispatch:** Products either arrive directly from the packing or are retrieved from the warehouse as per the dispatch schedule. Final verification of package count and documentation is performed before the products are loaded for delivery to the customer's location.
8. **Site Installation and Order Closure:** Once the products arrive at the customer location, the installation team reassembles the components on-site following the documentation provided. After ensuring everything is installed correctly and functioning as per the design, the project is marked complete, and the order is closed.

OUR MANUFACTURING PROCESS:

Our shop fittings and retail fixtures are manufactured using both metal based and wood based raw materials. These sets of raw materials go through distinct processes as detailed below:

METAL BASED FABRICATION:

The manufacturing process described through above diagram is explain as follows:
 We use raw materials such as MS (Mild Steel) Tubes Sheets, SS (Stainless Steel) Tubes Sheets, Copper Sheets and PVD Sheets for this process.

Process Flow Description:

A) Shaping and Forming

FOR TUBE

1. Prebuff Treatment: Using Surface Polishing and Buffing Machine, the raw tubes first undergo initial surface preparation. This step removes any surface imperfections; mill scale or irregularities present on the raw tubes. Creates a clean, uniform surface that ensures quality in subsequent processing steps.

2. Cutting, Notching, shaping: Using cutting machines, the pretreated tubes are precisely cut to required lengths. The cutting process also includes notching (creating specific cutouts or patterns) wherever needed. Simultaneous shaping operations can be performed, creating precise angles and formations in the tube as per design specifications.

FOR SHEET

1. Cutting: Utilizing cutting machines, metal sheets are cut into specific shapes and sizes according to product requirements.

2a. Bending: Using Five Axis CNC Press Break or CNC Panel Bender, the cut materials are bent and formed into desired shapes. Different angles and bends are achieved based on product design specifications;

2b. Stamping: Using Hydraulic Power Press, sheets undergo stamping to create specific patterns, indentations or raised formations, essential for both functional and decorative elements in the final product.

The subsequent process is the same for both Tubes and Sheets.

B. Craftsmanship:

3. Welding: Using Laser Welding or Robotic Welding Arm, components are joined together with high precision. The welding process ensures strong, durable joints. Each weld is carefully executed to meet both structural and visual requirements

4. Grinding: After welding, grinding wheels are used to smooth out rough edges, seams or any surface imperfections that may have occurred during welding. This ensures both functional and visual quality of the components

5. Drilling & Tapping: Precise holes are drilled and threads are created wherever required. This step prepares the components for future assembly and attachment points.

6. Inline Testing: The products are tested for dimensional accuracy and the strength of the welds to ensure they meet the required standards.

C. Surface Treatment & Finishing:

7a. For SS (Stainless Steel):

- Final Buffing - Final Buffing process creates a premium, mirror-like finish on stainless steel surfaces
- Additional Processes - PVD Coating or Electro Dipping is applied to enhance durability and provide desired color finishes

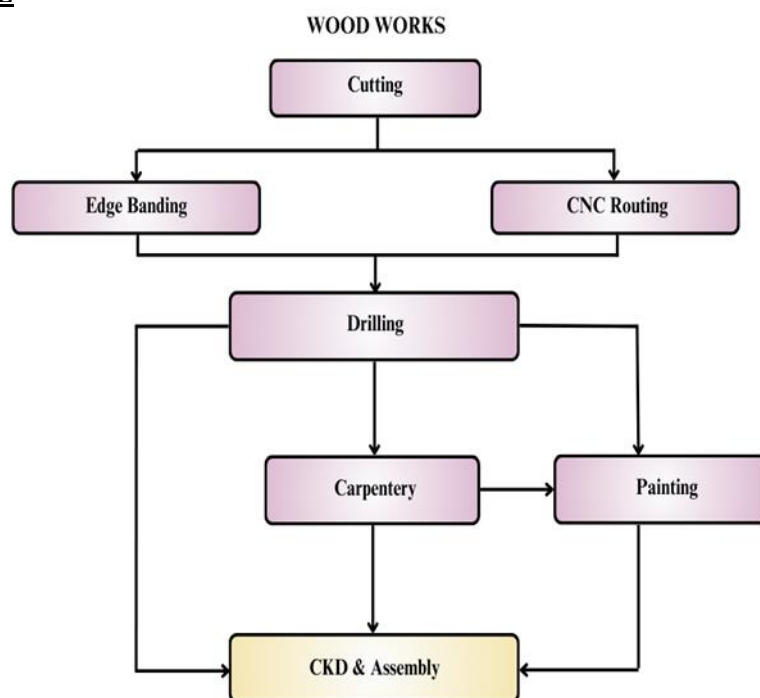

OR

7b. For MS (Mild Steel): Powder Coating applied for protection against corrosion and wear, available in various colors and textures.

8. Quality Inspection for Surface treatment: The quality inspection for surface treatment includes a final check to ensure all specifications and requirements are met, verifying that the treated surfaces comply with the required standards.

9. CKD & Assembly: All finished components from both tube and sheet processing lines converge at the CKD and Assembly for final processing and packaging.

WOOD BASED MATERIAL

The manufacturing process described through above diagram is explain as follows:

We use raw materials such as Particle Board, MDF (Medium-Density Fibre board), HDHMR (High-Density High-Moisture Resistant Board), Plywood and Solid Wood for this process.

Process Flow Description:

1. **Cutting:** The raw wood materials are first cut into precise shapes and sizes using a Beam Saw. This machine ensures accurate, clean cuts, preparing the wood for further processing based on product requirements.
2. **Edge Banding:** After cutting, the edges of the wood panels are covered using a **Through Feed Edge Bander** to apply a protective strip. This step ensures a clean and durable edge finish, typically for boards.

OR

CNC Routing: Using a Four Axis CNC Router, intricate designs, shapes, or holes are created on the wood surface. This step is essential for creating detailed, precise patterns or cutouts in the wood for both functional and decorative purposes.

3. **Drilling:** Holes are drilled into the wood panels wherever required. This step prepares the components for further assembly, providing space for screws or other fastening methods. Some products that do not require additional processing can proceed directly to CKD and Assembly after drilling.
4. **Carpentry:** Skilled carpentry work is performed on the cut and drilled wood. Here, HPL (High-Pressure Laminate) Pasting or other solid surface treatments are applied to enhance the durability of the wood panels. Some products that do not require additional processing can proceed directly to CKD and Assembly after Carpentry.
5. **Painting:** The wood components are painted in a controlled Atmospherically Sealed Paint Chamber to ensure an even application. To achieve a smooth and glossy finish, we follow various processes like surface treatment, surface layering, buffing, second layering etc.
6. **CKD & Assembly:** After the wood components are completed, they move to the CKD & Assembly for final assembly, quality inspection, dismantling, and packing.

PLANT AND MACHINERY:

We require various machines such as CNC Router, Dust Collector, Bean Saw, Servo Stabiliser, Hydraulic Lift, Panel Saw, Air compressor etc., which are owned by the company, for manufacturing of various shop-fitting and retail fixtures.

Under this method, the investment is initially recognized at cost and subsequently adjusted for the Company’s share of the associate’s post-acquisition profits or losses and other comprehensive income.

During the reporting period, the Group experienced changes in its investment structure with the addition of two entities as:

- a. On May 3, 2023, Safe Enterprises Retail Technologies Private Limited became an associate of the Company.
- b. On November 6, 2024, Inscite Advisory Services LLP became a subsidiary of the Company.
- c. On November 26, 2024, Safe Enterprises Retail Technologies Private Limited, previously classified as an associate, became a subsidiary of the Company.

From the date of acquisition of subsidiaries, the Company consolidates the financial statements of the subsidiary on a line-by-line basis. This includes the recognition of all assets, liabilities, income, and expenses of the subsidiary, with

corresponding adjustments for non-controlling interests, if any. All intra-group balances, transactions, income, and expenses are fully eliminated upon consolidation to present the financial statements of the Group as those of a single economic entity.

D. Accounting Convention

The Company follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Sales of goods are recognized on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers.

Income from Services is recognized as the service is performed and the right to ultimate collection is reasonably assured.

Interest Income is Recognized on a time proportion basis taking into account the amount outstanding and the rate applicable i.e. on the basis of matching concept.

Dividend income is accounted for when the right to receive is established.

2. Property, Plant and Equipment and Intangible Assets

i. Property, Plant & Equipment:

- a) Property, Plant and Equipment are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any; Costs directly attributable to acquisition are capitalized until the Property, Plant and Equipment are ready for use, as intended by the management;
- b) Subsequent expenditures relating to Property, Plant and Equipment are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;
- c) The cost and related accumulated depreciated are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
- d) Depreciation on fixed assets will be calculated using the Straight Line Method (SLM) method, which involves applying depreciation rates prescribed under Schedule II to the Companies Act 2013. to the carrying amount of the asset. The carrying amount is reduced each year by the amount of depreciation charged.
- e) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;

ii. Intangible assets:

Intangible assets are stated at cost of acquisition net of recoverable taxes less accumulated amortisation and Impairment. All costs, including financing costs till commencement of commercial production, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the intangible assets are capitalised. Depreciation on Intangible assets is calculated on Straight Line method.

3. Capital Work in Progress

Projects under which assets are not ready for their intended use are disclosed under Capital Work-in-progress. Property, Plant and Equipment under construction or installation, included in capital work-in-progress are not depreciated.

4. Impairment

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

5. Inventories

Raw material, Work in Progress and finished goods :

Raw Materials -Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on First in First out (FIFO) basis.

Finished goods and Work in progress are valued at the lower of cost and net realisable value. Cost is determined on First in First out (FIFO) basis.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and the estimated costs necessary to make the sale.

6. Foreign Exchange Transactions

All transactions in foreign currency are recorded at the rates of exchange prevailing at the date of transaction. Any gain/ loss on account of the fluctuation in the rate of exchange is recognized in the statement of Profit and Loss.

Monetary items in the form of Loans, Current Assets and Current Liabilities in foreign currencies outstanding at the close of the year are converted in Indian currency at the appropriate rates of exchange prevailing on the date of Balance Sheet. Resultant gain or loss on account of the fluctuation in the rate of exchange is recognized in the statement of Profit and Loss.

7. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non- cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. Borrowing Costs

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to statement of profit and loss.

9. Income Tax

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. Earnings Per Share

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. Provisions and Contingent Liabilities

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

12. Cash and Cash Equivalents

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

13. Investments

Investment which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as non-current investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

14. Government Grants and Subsidies

Government grants and subsidies are recognised when there is reasonable assurance that the Company will comply with the conditions attached to them and the grants / subsidy will be received. Government grants whose primary condition is that the Company should purchase, construct or otherwise acquire capital assets are presented by deducting them from the carrying value of the assets. The grant is recognised as income over the life of a depreciable asset by way of a reduced depreciation charge.

When the grant or subsidy relates to an expense item, it is recognized as income over the periods necessary to match them on a systematic basis to the costs, which it is intended to compensate.

15. Contingencies and events occurring after the Balance Sheet date

Events that occur between balance sheet date and date on which these are approved, might suggest the requirement for an adjustment(s) to the assets and the liabilities as at balance sheet date or might need disclosure. Adjustments are required to assets and liabilities for events which occur after balance sheet date which offer added information substantially affecting the determination of the amounts which relates to the conditions that existed at balance sheet date.

16. Related Party Transactions

Related parties as defined under Accounting Standard - 18 'Related Party Disclosures' have been identified based on representations made by management and information available with the Company. All transactions with related parties are in the ordinary course of business and on arms' length basis.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government.  - a. to be registered himself as holder of the share; or
 - b. to make such transfer of the share as the deceased or insolvent member could have made.
 - ii. The Board shall, in either case, have the same right to decline or suspend registration as it would have had, if the deceased or insolvent member had transferred the share before his death or insolvency.
 - i. If the person so becoming entitled shall elect to be registered as holder of the share himself, he shall deliver or send to the company a notice in writing signed by him stating that he so elects.
 - ii. If the person aforesaid shall elect to transfer the share, he shall testify his election by executing a transfer of the share.

- iii. All the limitations, restrictions and provisions of these regulations relating to the right to transfer and the registration of transfers of shares shall be applicable to any such notice or transfer as aforesaid as if the death or insolvency of the member had not occurred and the notice or transfer were a transfer signed by that member.

A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the company:

Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the share, until the requirements of the notice have been complied with.

FORFEITURE OF SHARES

If a member fails to pay any call, or installment of a call, on the day appointed for payment thereof, the Board may, at any time thereafter during such time as any part of the call or installment remains unpaid, serve a notice on him requiring payment of so much of the call or installment as is unpaid, together with any interest which may have accrued.

- b. state that, in the event of non-payment on or before the day so named, the shares in respect of which the call was made shall be liable to be forfeited.

If the requirements of any such notice as aforesaid are not complied with, any share in respect of which the notice has been given may, at any time thereafter, before the payment required by the notice has been made, be forfeited by a resolution of the Board to that effect.

- i. A forfeited share may be sold or otherwise disposed of on such terms and in such manner as the Board thinks fit.
- ii. At any time before a sale or disposal as aforesaid, the Board may cancel the forfeiture on such terms as it thinks fit.
- i. - iv. The transferee shall not be bound to see to the application of the purchase money, if any, nor shall his title to the share be affected by any irregularity or invalidity in the proceedings in reference to the forfeiture, sale or disposal of the share.

The provisions of these regulations as to forfeiture shall apply in the case of non-payment of any sum which, by the terms of issue of a share, becomes payable at a fixed time, whether on account of the nominal value of the share or by way of premium, as if the same had been payable by virtue of a call duly made and notified.

- the holders of stock shall, according to the amount of stock held by them, have the same rights, privileges and advantages as regards dividends, voting at meetings of the company, and other matters, as if they held the shares from which the stock arose; but no such privilege or advantage (except participation in the dividends and profits of the company and in the assets on winding up) shall be conferred by an amount of stock which would not, if existing in shares, have conferred that privilege or advantage.
- such of the regulations of the company as are applicable to paid-up shares shall apply to stock and the words “share” and “shareholder” in those regulations shall include “stock” and “stock-holder” respectively.
