SECTION III: RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of This Offer including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider immaterial to our operations.

Unless otherwise stated in the relevant risk factors set forth below, we are not able to specify or quantify the financial or other implications of any of the risks mentioned herein. Unless otherwise stated, the financial information of our Company used in this section is derived from our Restated Consolidated Financial Statements prepared in accordance with Indian GAAP and the Companies Act and restated in accordance with the SEBI (ICDR) Regulations, 2018. The following factors have been considered for determining the materiality of Risk Factors:

- Some events may not be material individually but may be found material collectively.
- Some events may have material impact qualitatively instead of quantitatively.
- Some events may not be material at present but may have material impact in future.

The financial and other related implications of the risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, the financial information of the Company used in this section is derived from our financial statements under Indian GAAP, as restated in this Red Herring Prospectus. Unless otherwise stated, we are not able to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “***Definitions and Abbreviations***” beginning on page 4 of this Red Herring Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as Internal and External for clarity and better understanding.

INTERNAL RISKS

A. BUSINESS RELATED RISKS

1. *We are heavily dependent on the performance of the Automobile Sector*

We manufacture automotive components, and our business is closely tied to the performance of the automobile industry, both in India and internationally. Since our major customers come from this sector, any changes in the market whether political, economic, social, or technological can have a direct impact on us. Factors like quality, innovation, reliability, performance, and cost also play a crucial role in shaping demand. If the automotive sector faces challenges, it could significantly affect our business, financial health, and operations. A slowdown in demand or market conditions that make selling our components less viable could directly impact our revenue and profitability.

The industry is influenced by many factors, including changes in government policies, economic trends, employment levels, consumer spending, and interest rates. If these conditions shift unfavorably, demand for our products could decline, potentially affecting our growth and stability.

2. *Our business depends on the smooth operation of our manufacturing facilities and workforce availability, with any disruptions such as strikes, equipment failure, or regulatory changes potentially impacting our financial condition and operational results.*

Our business is heavily dependent on the continuous functioning of our manufacturing facilities and the availability of skilled manpower. The efficient operation of our facilities Gurugram, Pune, Kancheepuram & Ranipet is critical to our success.

However, our manufacturing processes and operations are subject to several risks, including equipment breakdowns, obsolescence, severe weather, natural disasters, disruptions in power supply, unavailability of spare parts, or other operational inefficiencies. Any prolonged shutdown of our manufacturing unit whether for maintenance, capacity expansion, regulatory compliance, or other reasons could disrupt our production, leading to a significant adverse impact on our profitability, financial condition, and operational results.

Labour availability is another crucial factor for our operations. We rely on both permanent employees and contract labourers. Shortages in manpower, disputes with contractors, strikes, work stoppages, or increased wage demands could delay production schedules, disrupt operations, and increase costs. Changes in labour laws, such as upward revisions to minimum wages, working conditions, or employee welfare requirements, could further inflate manpower costs, eroding our margins and competitiveness.

Moreover, any regulatory non-compliance related to our manufacturing facility or workforce practices could result in mandatory shutdowns or fines, adversely affecting our operations. Despite past efforts to avoid significant disruptions, we cannot guarantee immunity from future interruptions caused by industrial accidents, labour disputes, or external factors like local social unrest or environmental regulations. Any such disruptions could harm our reputation, restrict our ability to fulfill commitments, and materially impact on our financial health and business continuity.

However, there have been no such occurrence or instances of the disclosed event in the past. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company. Additionally, we implement preventive maintenance and contingency plans, the risk of sudden failures cannot be entirely mitigated. Further, we have not encountered any labour related disputes in the past, there is no guarantee that such issues will not arise in the future. Any such disruptions/disputes could have an adverse impact on our business operations and overall performance.

3. *Delay in delivery of the products due to breakdown of machinery.*

Any breakdown or defect in our machinery or equipment could disrupt the manufacturing process, potentially causing delays in production and missed delivery deadlines especially if repairs or replacements are not completed in a timely manner. Factors contributing to machinery breakdown risks include wear and tear, lack of spare parts availability, power failures, and regulatory compliance requirements for maintenance. Disruptions caused due to breakdown of machinery installed at our manufacturing facilities could lead to a reduction in our production levels, resulting in a negative impact on our earnings. There can be no assurance that our manufacturing facilities will remain unaffected by interruption caused by breakdowns. Further, our machinery and equipment would be difficult and costly to replace on a timely basis and in a cost-efficient manner. Catastrophic events could also destroy any machineries located at our facilities. Such breakdowns and disruptions may result in delays in shipments of raw materials from our suppliers to us and shipment of products from us to our customers. The occurrence of any such catastrophic event could result in the temporary or long-term closure of any of our manufacturing facilities, which could result in severely disrupting our business operations, loss of customers and materially and adversely affecting our business, results of operations, cash flows and financial condition.

However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company. Additionally, we implement preventive maintenance and contingency plans, the risk of sudden failures cannot be entirely mitigated. If we are unable to repair or replace critical machinery within a relevant timeframe, our ability to meet customer commitments may be compromised, which could adversely impact our financial performance and market reputation. Further we have not encountered significant machinery failures in the past, there is no guarantee that such issues will not arise in the future. Any such disruptions could have an adverse impact on our business operations and overall performance.

For further information on machinery, see “*Our Business*” on page 152 of this Red Herring Prospectus.

4. *We derive a majority portion of our revenue from operations from our top 10 customers, contributing towards our total gross sales.*

We derive a significant portion of our revenue from a concentrated group of top customers, with our top 10 customers contributing a major share of our gross sales for the financial years ending March 31, 2025, March 31, 2024 and March 31, 2023. This heavy reliance on a limited customer base presents a risk of revenue volatility. The loss of one or more of these key customers, or a reduction in the volume of business due to reasons such as non-renewal of arrangements, disputes, adverse economic conditions, changes in customer supply chain strategies, or a shift to competitors, could significantly impact our business operations, financial condition, and cash flows. Additionally, since our business is conducted on a purchase-order basis without long-term agreements, we face the risk of inconsistent order volumes and uncertainty in maintaining historical levels of business with these customers.

Our ability to secure regular orders and maintain stable relationships with these customers is critical to our operations. However, the absence of formal long-term contracts, coupled with reliance on a limited customer base, heightens the risk of dependency and limits predictability in revenue streams. Changes in market conditions, evolving industry trends, customer preferences, or failure to meet quality and service expectations could also adversely impact our operations. Furthermore, we do not have exclusive agents, dealers, or distributors, nor do we rely on intermediaries for marketing, making our direct customer relationships crucial. The inability to adapt to shifting demands or secure new orders consistently could have a material adverse effect on our revenues, cash flows, and overall business sustainability.

The following table summarizes the revenue proportion of our top 10 customers for the respective period:

(₹ in Lakhs)

Note: Top-10 Customers for each period are considered separately.

5. Risk of Unsustainability of PAT Margin Increase in FY 24 and FY 25

The Company's increase in its Profit After Tax (PAT) margin in FY 24 and for FY 25, may not be sustainable in the future. The improvement in PAT margin achieved during this period may have been influenced due to increase in average selling price, proportionate share of profit of associate entity, changes in inventory level and nominal changes in other incomes and expenses which may not continue in future. For further details, please refer to chapter titled **"Management's Discussion and Analysis of Financial Condition and Result of Operations"** on page 274 of this Red Herring Prospectus.

The Company may face increased competitive pressures, changes in consumer demand, or evolving regulatory requirements that could erode its ability to maintain these margin levels. Consequently, there is no assurance that the current PAT margin will be replicable in future fiscal periods, and the Company may experience volatility in its profitability, making the sustainability of the current margin levels uncertain.

6. Our Company, Promoters, Directors and Group Companies are involved in certain legal proceedings. An adverse outcome in any of these proceedings may adversely affect our reputation, business, results of operations, financial condition and cash flows.

In the ordinary course of our business, our Company, Promoters, Directors and Group Companies are involved in certain legal proceedings, which are pending at varying levels of adjudication before different forums. The summary of the outstanding matters set out below includes details of criminal proceedings, tax proceedings, statutory and regulatory actions and other material pending litigation involving our Company and Promoters. The following table

sets forth a summary of the proceedings involving our Company and Promoters or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

Involvement in such proceedings could consume financial resources and divert time and attention from the management of our Company and Promoters. For further details on the proceedings involving our Company and Promoters, see “**Outstanding Litigation and Material Developments**” beginning on page 296. We cannot assure you that any of the outstanding litigation matters will be settled in favor of our Company and Promoters, as applicable, or that no additional liability will arise out of these proceedings. An adverse outcome in any of these proceedings may affect our reputation, business, which could have an adverse effect on our financial condition, results of operations and cash flows.

7. We are unable to trace the Bank Statement of the Company for allotments made in past.

The absence of a bank statement for the shareholders including promoters poses several significant risk factors for the business. It raises concerns about the financial transparency and credibility, which may undermine confidence among investors, creditors, and stakeholders. Below are the transactions for which we are unable to trace the bank statement of the shareholders and of the company as mentioned below:

Allotment, at the time of incorporation, dated April 6, 2004, made to Sushil Kumar Poddar for which we are unable to trace the bank statement of the company and the shareholders. The details of allotment made on April 6, 2004 is as follows:

Sr. No	Names of Allottees	Number of Equity Shares*	% of shareholding as on the date of allotment	% of shareholding as on the date of RHP
1	Mr. Sushil Kumar Poddar	5,000	50.00%	0.05%

*The equity share capital was sub-divided from ₹ 100.00 to ₹ 10.00 at the Extra-Ordinary General Meeting of members of the Company held on December 23, 2006.

Allotment dated October 29, 2009, made to Arvind Exports and Arvind Chemicals Limited for which we are unable to trace the bank statement of the company and the shareholders. The details of allotment made on October 29, 2009 is as follows:

Sr. No	Names of Allottees	Number of Equity Shares	% of shareholding as on the date of allotment*	% of shareholding as on the date of RHP
1	M/s. Arvind Chemicals Limited*	8,10,000	10.34%	0.00%^
2	Arvind Exports	70,000	0.89%	0.00%^

*The name of 'Arvind Chemicals Limited' was changed to 'Gujarat Metallic Coal & Coke Limited'

^The shares were transferred on December 11, 2017 from 'Gujarat Metallic Coal & Coke Limited' (formally known as Arvind Chemicals Limited) to Sushil Kumar Poddar.

^^The shares were transferred on April 22, 2014 from Arvind Exports to Anupama Bajoria.

Furthermore, the absence of bank records may make it more difficult for the business to find investors or obtain funding. Before investing money, lenders and investors usually need a clear picture of the Company's financial stability in order to gauge risk levels. In the absence of such paperwork, the Company would find it difficult to gain the trust of possible investors, which could restrict access to funding or raise borrowing prices. Regulatory or compliance concerns may also result from this lack of documentation, particularly if the company is asked to produce thorough financial records for reporting or auditing purposes.

8. We have had certain inaccuracies in relation to regulatory filings and our company has made non-compliances of certain provision under applicable law.

We have delayed in depositing the EPF/ESIC with the offices concerned of the departments on a few instances. While no- show cause notice has been issued against our Company till date, in the event of any cognizance being taken by the concerned authorities in respect of above delays in filings, actions may be taken against our Company and its directors, which could impact our business and financial performance.

Details of such delays including period of delay, range of delays as per payment dates and reason for delay is tabulated as below:

(₹ in Lakhs)

Financial Year	Location	Due Date of Payment	Date of Payment	Reason for delay
PF				
2021-22	Gurgaon	15-Jun-21	16-Jun-21	Technical issue while filing
2023-24	Ranipet	15-May-23	11-Aug-23	Inadvertent error
	Ranipet	15-Jun-23	11-Aug-23	
	Ranipet	15-Jul-23	11-Aug-23	
ESIC				
2023-24	Ranipet	15-Aug-23	16-Aug-23	Technical issue while filing

However, the Company strives to prevent such delays by planning in advance and creating an awareness about the applicability and timeliness of the statutory payment.

9. Our Company has higher debt-equity ratio which requires significant cash flows to service our debts obligations, and this, together with the conditions and restrictions imposed by our financing arrangements, fluctuations in the interest rates may limit our ability to operate freely and grow our business.

The table below sets forth the details of our total outstanding borrowings and debt to equity ratio for the financial year ended on March 31, 2025, 2024 and 2023:

(₹ in Lakhs)

Particulars	For the Financial year ended on		
	March 31, 2025	March 31, 2024	March 31, 2023
Total Borrowings ⁽¹⁾	3,800.27	3,169.01	3,002.44
Debt-Equity Ratio ⁽²⁾	0.81	0.96	1.11

(1) Total Borrowings is the total of Long-Term Borrowings and Short-Term Borrowings as per Consolidated Restated Financial Statements.

(2) Debt to Equity ratio is calculated as Total Debt divided by Net worth.

Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated from our business, which depends on the timely repayment by our customers. Our financing agreements and instruments contain certain restrictive covenants that limit our ability to undertake fund raising activities, any of which could adversely affect our business, results of operations and financial condition. If our future cash flows from operations and other capital resources become insufficient to pay our debt obligations or our

contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets, our financial condition at such time and the terms of our other outstanding debt instruments. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest or principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our creditworthiness or credit rating, which could harm our ability to incur additional indebtedness on acceptable terms.

10. *We rely on contractors for the recruitment of contract labourers and are therefore exposed to execution risks and liability towards labourers under applicable Indian laws.*

We engage with Independent contractors through whom we engage contract labourers for the performance of certain functions at our Manufacturing Facilities. Although we do not engage these labourers directly, we are responsible for any wage and statutory payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and our financial conditions. In addition, we may be liable for or exposed to litigations, sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors.

Our dependence on such contract labour may result in significant risks to our operations, relating to the availability of such contract labourers, especially during peak periods in labour-intensive sectors such as ours or in case of other disruptions. While we have not had any instances of labour shortages or unavailability in the past, we cannot assure you that we will not face any labour shortages for factors within and beyond our control, in the future. If we are not able to deploy adequate labourers on our projects, it might have an adverse effect on our business prospects, results of operations and cash flows.

11. *The success of our business operations is dependent on our Promoter and Managing Director, and on Directors, Key Managerial Personnel and Senior Management as well as our ability to attract, train and retain employees.*

The success of our business operations is attributable to our Key Managerial Personnel and senior management. We believe that the experience of our Senior Management team has enabled us to experience growth and profitability as well as a robust liquidity and capital position. Our Promoter and Managing Director, Mr. Saurabh Poddar, has been instrumental in setting up our business and the brand image of our Company since the acquisition and he has played a key role in the growth and profitability of our business.

Our ability to sustain our growth depends upon our ability to attract and retain key personnel, developing managerial experience to address emerging business and operating challenges and ensuring a high standard of client service. The relationships we maintain with various clients, sectors, and funds are deeply dependent on our Key Managerial Personnel, Senior Management and Mr. Saurabh Poddar. Their industry expertise, strategic vision, and ability to foster and nurture these relationships have been fundamental to securing and retaining our client base. The trust and confidence our clients place in us are largely a reflection of the skills, reputation, and leadership provided by our Key Managerial Personnel, Senior Management and Mr. Saurabh Poddar. Our business and its growth are therefore significantly dependent on Mr. Saurabh Poddar and our Key Managerial Personnel and our Senior Management.

We also face attrition of our existing workforce because of increased competition or other factors relating to our businesses. The following table sets forth the attrition rate of the periods indicated below:

Particulars	For the Financial Year ended on		
	31-March-25	31-Mar-24	31-Mar-23
Change in the number of KMP & SMP	1	Nil	Nil
KMP at the end of the Financial Year	3	2	2
SMP at the end of the Financial Year	5	5	5
Attrition rate (in %)	0%	0%	0%

Our management's domain expertise, leadership skills and market insights provide us with a competitive advantage which help us implement our business strategies. Our employees have experience in merchant banking, research, equity sales, trading and investment advisory services. They also market our services and develop and maintain relationships with clients and various stakeholders including intermediaries. India has stringent labor legislation that protects the interests of employees, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution, and employee removal, and legislation that imposes certain financial obligations on employers upon retrenchment. Factors that affect our ability to attract and retain such employees include our ability

to match or better the compensation and benefits offered by our competitors, and our brand reputation. As a significant portion of the compensation that we pay to our employees is in the form of year-end discretionary bonuses, decline in the volume of transactions executed and closed by us in a particular financial year or decline in our profitability, or in the outlook for our future profitability, as well as regulatory limitations on compensation levels and terms, can negatively impact our ability to hire and retain highly qualified employees. If we cannot hire additional qualified personnel or retain them, our ability to expand our business will be impaired and our revenue could decline. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to the ever-evolving regulatory environment, internal controls and risk management procedures. Failure to train and motivate our employees properly may result in an increase in employee attrition rates, require additional hiring, reducing the quality of client service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us. Any inability to attract and retain talented employees, or the resignation or loss of key management personnel, may have an adverse impact on our business and future financial performance.

12. *There are certain discrepancies / errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.*

Following discrepancies have been identified in the forms filed by the Company with the Registrar of Companies under provisions of Companies Act, 2013:

There are certain discrepancies / errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956 / 2013. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.

Our Company was incorporated in the year 2004 under the Companies Act, 1956, hence we are unable to trace certain corporate and other documents in relation to our Company including forms filed with the Registrar of Companies. Due to change in methods of record keeping over the years, certain forms filed with ROC could not be traced by our Company. As such under the circumstances elaborated above, our Company cannot assure you that the filings were made in a timely manner or the information gathered through other available documents of the Company are correct. While no legal proceedings or regulatory action has been initiated against us in relation to the unavailable filings and statutory lapses as of the date of this Red Herring Prospectus, we cannot assure you that such proceedings or regulatory actions will not be initiated against us in the future in relation to the missing filings and corporate records. We cannot assure you that any such proceedings will not have a material adverse effect on our financial condition or reputation. Further, there are certain forms which are filed with delayed fees with RoC. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such noncompliance in future by any regulatory authority could affect our financial conditions to that extent.

There are the following discrepancies have been mentioned in the forms filed by the company with the Registrar of Companies under provisions of Companies Act, 2013 / 1956:

1. We have observed an inconsistency in the Master Data section of the Ministry of Corporate Affairs (MCA) portal, where the appointment date of one of our Directors, Mr. Saurabh Poddar, is incorrectly recorded as May 24, 2005, instead of the correct date, May 24, 2004. Despite having duly filed the physical Form 32 with the Registrar of Companies, this discrepancy remains unresolved. While we have initiated corrective action by reaching out to the MCA Portal help desk via email on December 26, 2024, such discrepancies, if not rectified promptly, could lead to potential regulatory hurdles, delays, and challenges that may impact on our corporate governance framework and compliance standing.
2. As per Ministry of Corporate Affairs (MCA) Master Data on MCA Portal, the date of appointment of Mr. Saurabh Poddar shows as May 24, 2005. However, the date of appointment is May 24, 2004. Change request form has been filed with MCA and awaiting approval for the same.
3. The details of Mr. Ajay Shanker Bhatnagar is not mentioned in the name of directors in the Annual Return i.e. Form 20B filed by the Company for the Financial Year March 31, 2006 as required pursuant to section 159 of Companies Act, 1956.
4. Mr. Ravi Kumar Jajodia was appointed as Additional Director on March 18, 2009 till the conclusion of next Annual General Meeting, however he was not regularized in the AGM held for Financial Year 2008-2009 as required pursuant section 260 of Companies Act, 1956.

5. The Company did not comply with the provisions of SS-1 and SS-2 of the Companies Act, 2013 when preparing the documents for form filing. However, after identifying this non-compliance, the Company is now adhering to these regulations.
6. There was a delay in filing Form 20B/MGT-7/MGT-7A pursuant to Companies Act, 1956/2013 for filing Annual Return. However, the Company has filed the form, paying the required additional fees as per the Companies Act, 1956/2013.
7. There was a delay in filing Form 23AC/23ACA/AOC-4 pursuant to Companies Act, 1956/2013 for filing Financial Statements. However, the Company has filed the form, paying the required additional fees as per the Companies Act, 1956/2013.
8. MGT-8 does not contain correct and adequate information w.r.t. amendments in MOA & AOA as required pursuant to Section 92(2) of Companies Act, 2013
9. There was a delay in filing Form 23B/ADT-1 pursuant to Companies Act, 1956/2013 for appointment of Auditor. However, the Company has filed the form, paying the required additional fees as per the Companies Act, 1956/2013.
10. Effect of Alteration is not noted in Altered Memorandum of Association which is filed for increase in authorised Capital and for change in name of the company as required pursuant to Section 40 of the Companies Act, 1956.
11. There was a delay in filing Form 5 and 23 pursuant to Companies Act, 1956 for increase in authorised Capital. However, the Company has filed the form, paying the required additional fees as per the Companies Act, 1956.
12. There was a delay in filing the form MGT-14 pursuant to Companies Act, 2013 for filing of the resolution with the Registrar. The Company has filed the form, paying the required additional fees as per the Companies Act, 2013.

While no legal proceedings or regulatory action has been initiated against our Company in relation to such non-compliance or instances of non-filings or incorrect filings or delays in filing statutory forms with the Registrar of Companies as of the date of this Red Herring Prospectus, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by concerned regulatory authorities in this respect. Therefore, if the authorities impose

We have also updated our internal database with latest circulars and amendments to ensure future compliance. Additionally, we have strengthened our governance framework by appointing a qualified Company Secretary to oversee compliance and corporate governance.

14. *Our KMP has been associated with our Company for less than one year.*

Our Key Management Personnel, Company Secretary & Compliance Officer have been associated with the Company for a period of less than one year therefore they may not have been accustomed to the Company affairs till date. For details of Key Management Personnel and their appointment see "**Our Management**" beginning on page 296 of this Red Herring Prospectus.

15. *Information relating to the historical installed capacities of our Manufacturing is based on certain assumptions and estimates by the chartered engineer which may vary and future production and capacity utilisation may vary.*

Information relating to our installed capacities and the historical capacity utilisation of our Manufacturing Facilities included in this Red Herring Prospectus may be based on certain assumptions and estimates, including assumptions relating to availability and quality of raw materials and assumptions relating to potential utilization levels and operational efficiencies. While we have obtained a certificate dated April 18, 2025 from Ashok Bhilothra, Chartered Engineer, in relation to installed and utilized capacity. Future capacity utilisation may vary from the historical

capacity utilisation. In addition, capacity utilisation is calculated differently in different companies, countries, industries and for the kinds of products we manufacture.

Actual utilisation rates may differ from the estimated installed capacities or historical estimated capacity utilization information of our facilities. We make decisions, including determining the levels of business that we shall seek and accept, production schedules, personnel requirements and other resource requirements, based on our internal estimates and targets and strive to ensure that our production capacity is, at all times, utilized at optimum levels. If we are unable to fully utilize our installed capacities in the future, there could be a negative impact on our cost and profitability and thereby adversely affecting our financial condition. Undue reliance should therefore not be placed on our installed capacity or historical capacity utilisation.

16. *We operate in a highly competitive industry and increased competition may lead to a reduction in our revenues, reduced profit margins or a loss of market share.*

We compete with other companies engaged into manufacturing of customized components for the automotive, non-automotive and white goods industries that produce and sell machines similar to our company.

Few of our competitors are larger than we are, and some competitors have greater financial and other resources than we do and other economic advantages as compared to our business. Among other things, our competitors may:

- have presence, or expand their presence, in higher number of geographic markets than we are present in.
- reduce, or offer discounts on, their prices for similar products as ours; while we may respond by matching their prices, by offering comparable or more attractive commercial terms or by increasing our advertising and promotions in order to retain or attract customers, it may increase our costs and limit our ability to maintain our operating margins or growth rate.
- target the same products or applications as us or develop different products that compete with our current solutions.
- attract or retain a key managerial or sales personnel with relationships with a key customer or confidential information regarding our future product pipeline and growth plans.
- be able to source raw materials at more competitive prices.
- harness better process technology or improved process yield and respond more quickly and effectively than we do to new or changing opportunities, applications, technologies, standards, or customer requirements.
- benefit from a wider range of products and services and a broader customer base needed to bring competitive solutions to the market.
- possess greater economies of scale if they are larger than us and operating efficiencies such as higher production capacities; or
- possess greater financial resources than we do and may be able to devote greater resources to pricing and promotional programs.

If any or a combination of the foregoing factors occur, we may not be able to maintain our growth rate and our revenues and operating margins may decline. We cannot assure you that we will continue to effectively compete with our competitors in the future, and our inability to compete effectively could affect our ability to retain our existing customers or attract new customers, which may in turn materially and adversely affect our business, financial condition, results of operations and prospects.

17. *Potential Challenges Arising from Independent Directors' Limited Experience in Listed Companies.*

The company currently has seven directors out of which four directors Mr. Sushil Kumar Poddar, Mr. Sarabjit Singh Mokha, Mr. Amit Gupta and Mr. Deepak Navinchandra Tanna does not possess any past experience in listed entities and Mr. Saurabh Poddar, Ms. Mayuri Kaustubh Dhavale and Ms. Savani Arvind Laddha possess limited experience in listed entities. Hence, there might be a potential inadequacy in navigating the complexities of corporate governance and regulatory compliance specific to listed entities. This lack of experience may hinder their ability to provide meaningful oversight of management, assess risks appropriately, and engage in strategic decision-making. Consequently, the board may face challenges in addressing issues related to financial reporting, regulatory obligations, and shareholder communications. Such deficiencies could lead to mismanagement, compliance breaches, and reputational harm, ultimately undermining investor confidence and adversely impacting the company's performance and market valuation.

18. *We are subject to strict quality requirements and any failure to comply with quality standards may lead to cancellation of existing and future orders, product recalls, product liability, warranty claims and other disputes and claims.*

All our products are customised as per requirement of our customers and manufacturing processes are subject to stringent quality standards and specifications. Any failure on our part to maintain the applicable standards and manufacture products according to prescribed specifications, may lead to loss of reputation and goodwill of our Company, cancellation of orders and even lead to loss of customers. Our customers may reject our products, cancel their orders or choose our competitors over us if we fail to perform our contractual obligations or meet the quality or performance standards set out with our customers, which may in-turn harm our reputation.

Failure by us to comply with applicable quality standards could also result in our products failing to perform as expected or alleged to result in property damage if our products are defective or are used incorrectly by our customers (or by their customers or end-users). The occurrence of any such events could expose us to product warranty, product recall or product liability claims.

We may also be required to indemnify customers against losses occurring because of defective products and reimburse our customers for administrative, labour, material and other such costs. We may also become subject to legal proceedings and commercial or contractual disputes. Potential product recalls could cause disruption to our business and result in reputational harm and the costs and expenses associated with warranties, product recalls and product liability claims could adversely affect our results of operations and financial condition. If we incur significant liabilities for which there is no or insufficient insurance coverage our business, financial condition and results of operations could be adversely affected.

19. Certain non-GAAP financial measures and certain other financial information relating to our operations and financial performance have been included in this offer document. These non-GAAP financial measures are not measures of operating performance or liquidity defined by Accounting Standards and may not be comparable.

Certain non-GAAP financial measures and certain other statistical information relating to our operations and financial performance including EBITDA, EBITDA margin, Return on Capital Employed, Profit after Tax Margin, Debtors' Turnover Ratio, Inventory Turnover Ratio, Debt Service Coverage Ratio and Interest Coverage Ratio have been included in this offer document. These non-GAAP Measures are not a measurement of our financial performance or liquidity under Accounting Standards, Indian GAAP, or IFRS and should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the year/ period or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Accounting Standards, Indian GAAP, or IFRS.

These non-GAAP financial measures and other information relating to our operations and financial performance may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to financial measures and statistical information of similar nomenclature that may be computed and presented by other companies and are not measures of operating performance or liquidity defined by Accounting Standards and may not be comparable to similarly titled measures presented by other companies.

20. We are exposed to counterparty credit risk and any delay in receiving payments or non-receipt of payments may adversely impact the results of operations.

We are exposed to counterparty credit risk, as a significant portion of our operations involves extending credit to customers for the sale of products. Delays in receiving payments or non-receipt of payments could adversely impact our financial performance. Due to industry practices, we often face high levels of outstanding receivables, and there is no assurance that we will be able to accurately assess the creditworthiness of our customers. Macroeconomic conditions, such as a global financial crisis or credit market disruptions, could further exacerbate the risk of delayed or defaulted payments, potentially resulting in financial difficulties for our clients, including insolvency or bankruptcy. As a result of such industry conditions, we have and may continue to have high levels of outstanding receivables.

Trade Receivables	3,006.24	2,166.29	2,335.72

Ageing of above table has been shown below:

	March 31, 2025	March 31, 2024	March 31, 2023
Less than 6 months	2,985.36	2,136.77	2,299.55

More than 3 years	1.69	0.64	1.68
Total	3,006.24	2,166.29	2,335.72

Such events could lead to extended payment terms, increased receivables, or the need to modify payment schedules, which would strain our cash flows. Although we have not faced significant payment issues in the past, any delay or default in payment would have a direct impact on our ability to fund operations, execute our growth plans, or meet financial obligations. This exposure to delayed or non-payment by customers poses a material risk to our cash flows and overall financial health.

- 21. *There might be the availability of counterfeit products, which could result in a loss of market share for the company. Additionally, failure to maintain the confidentiality of technical knowledge may lead to significant financial losses and harm to the company's competitive position.***

The company is exposed to the risk of counterfeit products entering the market, which could potentially damage brand reputation, erode consumer trust, and lead to financial losses. These counterfeit goods may also present safety and regulatory challenges, further impacting the company's market position and profitability.

Additionally, there is a risk of unauthorized disclosure or theft of proprietary technical knowledge, such as trade secrets, designs, or technological processes. Failure to protect this confidential information could result in intellectual property theft, loss of competitive advantage, and legal ramifications, all of which could adversely affect the company's financial performance and long-term viability. Robust protective measures and confidentiality protocols are crucial to mitigating these risks.

- 22. *We might infringe upon the intellectual property rights of others and any misappropriation of our intellectual property could harm our competitive position***

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty as to whether we are infringing on any existing third-party intellectual property rights, which may require us to alter our technologies, obtain licenses or cease some of our operations. We may also be susceptible to claims from third parties asserting infringement and other related claims. If such claims are raised, those claims could adversely affect our relationships with current or future customers, result in costly litigation, cause supplier delays or stoppages, divert management's attention and resources, subject us to significant liabilities, require us to enter into potentially expensive royalty or licensing agreements and require us to cease certain activities. While in the past we have not been involved in litigation or incurred litigation expenses in connection with our intellectual property rights, in the case of an infringement claim made by a third party, we may be required to defend such claims at our own cost and liability and may need to indemnify and hold harmless our customers. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. In addition, we may decide to settle a claim or action against us, which settlement could be costly. We may also be liable for any past infringement that we are not aware of. Any of the foregoing could adversely affect our business, results of operations and financial condition.

- 23. *Our Company is yet to place orders for the equipment, plant and machinery for the expansion of the Manufacturing Facility. Any delay in placing orders or procurement of such equipment, plant and machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.***

Our Company has received third party quotations for the equipment, plant and machinery proposed to be installed in the manufacturing facility located at Gurgaon. Although, we have identified the type of equipment, plant and machinery proposed to be purchased from the Net Proceeds, we are yet to place orders for the proposed equipment, plant and machinery. The cost of the proposed purchase of equipment, plant and machinery is based on the quotations received from third party vendors such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors.

We cannot assure that we will be able to procure the equipment, plant and machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or in the event the vendors are not able to provide the equipment in a timely manner, or at all, we may encounter time and cost overruns in expanding the capacity of our Manufacturing Facility. Further, if we are unable to procure machinery and equipment from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the machinery and equipment which satisfy our requirements at acceptable prices. Our inability to procure the machinery and equipment at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the

proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations

24. *The Automotive Industry is highly competitive with limited market players. The Pricing pressure from customers may adversely affect our gross margin, profitability and ability to increase our prices.*

The automotive industry where price competitiveness is crucial for retaining key customers and expanding our market share. To secure bulk orders, we may need to offer price reductions or discounts on certain products. While such strategies can help increase overall sales volume, they may also compress profit margins, potentially impacting on our financial stability and future growth prospects. At times, we are required to reduce prices to retain key customers or expand our market share within existing client relationships. However, any reduction in our product prices impacts on our profit margins, potentially leading to material adverse effects on our financial condition, operational results, and long-term business prospects.

If we are unable to offset customer price reductions through increased volumes, improved operating efficiencies, sourcing alternatives and other cost reduction initiatives, our results of operations, cash flows and financial condition may be materially adversely affected. Further, our competitors may resort to aggressive pricing strategies to gain a larger market share which may exert downward pressure on our pricing levels and profit margins and as a result, we may be required to reduce our prices which in turn may have an adverse impact on our results of operations, cash flows and financial conditions

25. *We may be unable to growth effectively and further expand our business into new markets, future financial performance and results of operations could be materially and adversely affected. The success of our business will depend on our ability to effectively implement our business and growth strategy.*

As part of our growth strategy, we aim to continue to grow our businesses as and when opportunities exist including by continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, to strive for cost efficiency, attracting and retaining talented employees and focusing on consistently meeting quality standards. As we continue to grow our business and expand into newer markets, we may face several challenges, including but not limited to acquiring new customers, identifying customer requirements and preferences in such markets, obtaining approvals and certifications for our products in such jurisdictions, making accurate assessments of the resources we will require, developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems, maintaining high levels of customer satisfaction, and adhering to expected performance and quality standards. In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. Our operating expenses and capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, further expand into new markets or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

26. *Our Company is subject to numerous labour and employment-related laws and regulations in India, including but not limited to, the Factories Act, 1948, the Employees' Provident Funds and Miscellaneous Provisions Act, 1952, the Employees' State Insurance Act, 1948, the Contract Labour (Regulation and Abolition) Act, 1970, the Payment of Gratuity Act, 1972, the Minimum Wages Act, 1948, and other applicable statutes, rules and guidelines. These laws regulate the terms of employment, working conditions, welfare, health and safety measures, social security benefits, and other labour welfare obligations.*

We are also required to make contributions towards employee welfare schemes and maintain detailed records of our workforce and compliance activities. Although we seek to operate in material compliance with such laws, there can be no assurance that we are or will be in full compliance at all times. Instances of past or future non-compliance, including delays or defaults in regulatory filings, contributions, or documentation, may result in regulatory actions, penalties, or prosecutions.

Furthermore, these laws are subject to amendments, reforms, and evolving interpretations by judicial and regulatory authorities. For instance, the implementation of the new labour codes passed by the Central or the State Government may lead to changes in our cost structure and human resource policies, the impact of which is currently uncertain.

Any adverse action by statutory authorities or litigation initiated by employees, labour unions or third parties may disrupt our operations and adversely impact our reputation, business continuity, and financial performance.

- 27. *If design and development efforts do not succeed and we are unable to respond changing customer preferences in timely and effective manner or current technologies becomes obsolete due to changes in technology which we are not able to achieve it may have an adverse effect on our business, cash flows, results of operations and financial condition.***

The success of our business depends upon our ability to meet customer preferences, offering products that customers require and, on our ability to develop and manufacture our products in a timely and cost-effective manner. Additionally, such customer preferences are influenced by a number of factors beyond our control, such as the prices of alternative products and prevailing economic conditions. We constantly seek to develop our innovation capabilities to distinguish ourselves from our competitors to enable us to provide customized product as per requirement ensuring the best quality of the products.

Although we seek to identify trends and provide customized products, we recognise that customer preferences cannot be predicted with certainty and can change rapidly, and that there is no certainty that these will be commercially viable or effective or accepted by our customers. We cannot assure you that we will be able to successfully make timely and cost-effective enhancements and additions to our technological infrastructure, keep up with technological improvements in order to meet our customers' needs or that the technology developed by others will not render our products less competitive or attractive. Our failure to successfully adopt such technologies in a cost effective and a timely manner could increase our costs and lead to us being less competitive in terms of our prices or quality of products we sell which could adversely affect our business, results of operations, financial condition and cash flows.

- 28. *Non-compliance with and adverse changes in applicable health, safety, labour and environmental laws may adversely affect our business, results of operations and financial condition.***

We are subject to safety, health, labour and environmental protection laws and regulations, all of which we are required to comply with in the course of our operations. Environmental regulations impose controls on air and water release or discharge, noise levels, storage handling and the treatment, processing, handling, storage, transport or disposal of hazardous materials. In case of any change in environmental regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and other expenditure to comply with environmental standards. Any failure on our part to comply with any existing or future regulations may result in legal proceedings, including public interest litigation being commenced against us, third party claims or the levy of regulatory fines. Further, any violation of the environmental laws and regulations may result in fines, criminal sanctions, revocation of operating permits, or shutdown of our facilities.

We are also subject to the laws and regulations governing employees in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and termination of employees, and work permits. There is a risk that we may fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products. We cannot assure you that we will not be involved in future litigation or other proceedings, or be held liable in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which may be significant.

32. *Our company operates without a formal order book or binding long-term agreements for its domestic and export operations in the automotive components sector.*

Our company operates without a formal order book or binding long-term agreements for its domestic and export operations in the automotive components sector.

This reliance on spot orders exposes us to significant risks, including revenue unpredictability and demand uncertainty. Customers are not obliged to place orders or maintain long-term purchasing arrangements, making us vulnerable to fluctuations in demand, changes in customer preferences, or adverse market conditions. Such events could lead to sudden disruptions in sales volumes, impacting our financial performance.

Additionally, the absence of a confirmed order pipeline limits our ability to forecast revenues, plan production schedules, and manage inventory and working capital effectively. This could result in operational inefficiencies, the underutilization of capacity, or an inability to meet unexpected demand spikes, ultimately affecting our profitability and industry reputation.

33. *Difference in the details mentioned in the KYC documents of Mr. Sarabjit Singh Mokha, our Executive Director of the Company.*

There is discrepancy in one KYC details with respect to address of our Executive Director, which could pose potential risks to our regulatory compliance and business operations. Specifically, Mr. Sarabjit Singh Mokha's address on his Aadhar Card does not match other KYC documents. This inconsistency may result in administrative and legal challenges, including delays in obtaining regulatory approvals, if any, complications in verifying the identities of key individuals, and difficulties in legal or contractual processes. Ensuring accurate and consistent KYC information is critical to maintaining the smooth functioning and compliance of our Company.

34. *Our Registered Office is not owned by us. The same is occupied by us on an authorization letter granting permission for its use by our Managing Director and Promoter, Mr. Saurabh Poddar. There is no lease agreement between our Company and Mr. Saurabh Poddar.*

Our registered office is situated at 208, Plot No. C-5, Abhishek Building, Dalia Estate, New Link Road, Andheri (W), Mumbai, Maharashtra, India, 400053. This property is owned by our Managing Director and Promoter, Mr. Saurabh Poddar, and is used by the Company based on an authorization letter dated January 26, 2004. The authorization permits the use of the premises for business purposes without any consideration and does not grant ownership, tenancy, or any other rights to the Company. The authorization is revocable and subject to compliance with applicable laws and regulations.

Given the absence of a formal lease or ownership agreement, the Company is reliant on the continued consent of Mr. Saurabh Poddar to use this property. Any revocation of the authorization or disputes over its terms could necessitate the relocation of our registered office, leading to operational disruptions, unexpected relocation costs, and potential regulatory challenges. This reliance exposes us to the risk of interruption in our operations, which may adversely affect our business performance, financial condition, and reputation.

35. *The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability more than our reserves or indemnities could result in additional costs, which would reduce our profits.*

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, which could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us. However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company.

36. Our Factories are not owned by us. The same is occupied on lease. Disruption of our rights as lessee or termination of the agreement with lessor would adversely impact our operations and, consequently, our business.

We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, it would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable / favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or must pay higher charges, we have not faced any such instances in the past however no assurance can be given that it will not happen in future.

37. *We generate our major portion of sales from our operations in certain geographical regions especially Haryana, Karnataka, Maharashtra and Tamil Nadu. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.*

For the Financial Year ended March 31, 2025, March 31, 2024 and March 31, 2023, Our Company generated major sales from our customers situated at Haryana, Karnataka, Maharashtra, Tamil Nadu. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in these regions to expand our operations in other parts of India and overseas markets, should we decide to further expand our operations. Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us.

Our inability to expand into areas outside the above-mentioned states may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise to mark its presence in other markets going forward, investors should consider our business and prospects considering the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance.

- 38. Our Company has a negative cash flow in its investing activities in Financial year 2025, 2024 and 2023 and in its Financing Activities in the financial year 2024, details of which are given below. Sustained negative cash flow could impact our growth and business.**

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Consolidated Financial Statements and the same are summarized as under:

(₹ In lakhs)

Particulars	For the Financial Year ended on		
	March 31, 2025	March 31, 2024	March 31, 2023
Cash generated from / (used in) Operating Activity	2,136.20	1,089.01	199.31
Cash generated from / (used in) Investing Activity	(2,832.08)	(937.42)	(609.39)
Cash generated from / (used in) Financing Activity	694.92	(159.51)	408.35

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations. For further details, please refer to “*Management’s Discussion and Analysis of Financial Condition and Result of Operations*” beginning on page 274 of this Red Herring Prospectus.

- 39. We rely heavily on the availability of key raw materials to procure them. As we have not established long-term agreements with these suppliers, any inability to secure sufficient raw materials at competitive prices could adversely impact our business, financial condition, and operational results. Any fluctuations in prices, availability of raw material or storage in supply of raw material for manufacturing of our products would adversely impact our business.**

Our reliance on availability of raw materials poses significant operational risks. These materials are sourced from pool of vendors within our operational region, and we lack long-term binding agreements with them, leaving us vulnerable to supply disruptions or unfavourable pricing adjustments. Any delay, shortage, or quality issues in raw material supply could significantly impact our production schedules and financial performance.

The availability of key raw materials, including Plastic Granules, Sealant, Tape, Foam, Release Paper, Felt, PVC, and MS Rod, is essential for our operations, particularly in the production of Screen Sealing Parts, Foam Components, Plastic Injection Moulded Parts, Stickers & Labels, Polyurethane Foam Moulding (PU Foam), EPP Parts, and other customized solutions for both automotive and non-automotive applications. Disruptions in the supply chain, price fluctuations, and regulatory requirements related to environmental compliance present significant challenges in maintaining a stable and cost-efficient supply of these materials. Additionally, any shortage or inconsistency in the quality of these raw materials could hinder our production timelines and impact on our ability to fulfill customer orders effectively.

- 40. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.**

Post this Issue, our Promoters and Promoter Group will collectively hold [●] % of the post-offer paid-up share capital of the Company. This significant ownership stake grants them the ability to exercise considerable influence over key decisions that require the approval of the majority shareholders, including matters such as the election of Board members. Consequently, this concentration of ownership may delay, prevent, or deter any potential change in control of our Company. Furthermore, our Promoters and Promoter Group could take actions that may conflict with the interests of the Company or some of our minority shareholders, and there is no guarantee that such actions will not adversely affect our future financial performance, operations, or the price of our Equity Shares.

This control by our Promoters may also affect the decision-making process in the Company, as their significant stake allows them to have a substantial impact on the Company's direction, which may not always align with the interests of minority shareholders or other stakeholders. While we ensure that their actions are in the best interest of the Company, there is no guarantee that any such action will have a material adverse effect on our financial results or market performance.

41. The average cost of acquisition of Equity Shares by the Promoters may be less than the Offer price.

The average cost of acquisition of Equity Shares by the Promoters may be less than the Offer price. The details of the average cost of acquisition of Equity shares held by the Promoters are set out as below:

Name of the Promoters	Average Cost of Acquisition (₹)^
Mr. Saurabh Poddar	9.68
Mr. Sushil Kumar Poddar	11.85
Ms. Pooja Poddar	10.00
M/s. Saurabh Marketing Private Limited	8.56
M/s. Sushil Kumar Poddar (HUF)	10.71

^As certified by V. B. Jain & Co., Chartered Accountants, pursuant to their certificate dated July 17, 2025.

42. We face foreign exchange risks that could adversely affect our results of operations and cash flows

Our revenue from operations also includes revenue from export of our products. This gives us exposure to foreign currencies while we prepare our financial statements in Indian Rupees. We set below details of our revenue from exports, foreign exchange currency gains and % of our revenues based on our Restated Consolidated Financial Statements for the Financial Year ended on March 31, 2025, March 31, 2024 and March 31, 2023.

(₹ in Lakhs)

Particulars	For the Financial Year ended on					
	March 31, 2025		March 31, 2024		March 31, 2023	
	Amount	% of revenue from operations	Amount	% of revenue from operations	Amount	% of revenue from operations
Total Exports	504.82	3.11%	222.33	1.61%	64.46	0.49%
Foreign exchange gains	16.38	0.10%	31.91	0.23%	104.50	0.79%

There can be no assurance that we will continue to record exchange gains only from foreign exchange fluctuations or any hedging measures which we may take will enable us to avoid the effect of any adverse fluctuations in the value of the Indian Rupee against the foreign currencies.

In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on the results of operations and cash flows. Further, changes in export policies or an economic slowdown in countries to which we export our products may have a significant adverse impact on our business, financial condition and results of operations.

43. We have entered related party transactions in the past and may continue to do so in the future

We are engaged in various related party transactions, both in the past and in the future. We have entered these transactions on an arms' length basis and in compliance with the Companies Act, 2013, Accounting Standards, and other statutory requirements, we cannot guarantee that we will continue to receive similar terms in the future. Additionally, such transactions could potentially involve conflicts of interest, which may arise even though no conflicts have occurred with our equity shareholders to date. Although we have conducted these transactions with due diligence, there is no assurance that these transactions could not have been more favorable had they been conducted with unrelated parties. Further, we cannot guarantee that the continued engagement in related party transactions will not have any adverse effects on our business or financial results. Potential conflicts of interest could emerge, and any such transactions, whether individually or collectively, could impact on our financial position or operations.

For further information on our related party transactions, see "Consolidated Financial Statement – Annexure - XXXI" on page 272 of this Red Herring Prospectus.

44. Guarantees from Promoters as well as others have been taken in relation to the debt facilities provided to us.

In the event any of the guarantors withdraws or terminates this guarantee, the lender for such facilities may ask for alternate guarantee/s, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition.

For further details see “**Statement of Financial Indebtedness**” beginning on page 291 of this Red Herring Prospectus.

45. Our insurance coverage may not adequately protect us against losses, and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.

Our operations are subject to risks inherent in manufacturing facilities such as risk of equipment failure, work accidents, fire, burglary, earthquakes, flood and other force majeure events, acts of terrorism and explosions including hazards that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. Our significant insurance policies consist of, among others, insurance policy of Business Guard - Commercial Policy Package (Small Business Solutions) – Retail, Group Medishield Insurance Policy, Policy Schedule for Burglary (Multiple Locations with Specified Sum Insured, Single Location & Floater Insurance, Business Interruption (Fire) Policy, New India Bharat Flexi Laghu Udyam Suraksha, Sales Turn Over Policy, New India Bharat Flexi Sookshma Udyam Suraksha. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

For further information refer to Insurance Policies head under “**Our Business**” beginning on page 152 of this Red Herring Prospectus.

46. Brand recognition is important to the success of our business, and our inability to build and maintain our brand name will harm our business, financial condition and results of operation.

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant number of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand name will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

47. The objects of the Offer have not been appraised by any bank or financial institution and we cannot assure you that the objects of the Offer will be achieved within the expected time frame, or at all, and any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.

Our Company proposes to utilise the Net Proceeds towards the following objects:

Sr. No.	Particulars	Total Estimated Amount (₹ in Lakhs)
1	Capital Expenditure towards purchase of Plant & Machinery, Infrastructure Development and Other Auxiliary Equipments ⁽¹⁾	1,239.85
2	Funding the Working Capital Requirements of the Company	1,000.00
3	General Corporate Purposes ^{(2)*}	●
	Total	●

(1) Applicable taxes, to the extent required, have been excluded in the estimated cost.

(2) To be finalized upon determination of the Offer price and updated in the Prospectus prior to filing with the RoC.

*To be finalized upon determination of the Offer price and updated in the Prospectus prior to filing with the RoC. The amount utilized for general corporate purposes shall not exceed 15% of the Gross Proceeds or ₹ 10 crores whichever is lower.

Our proposed objects of the Offer are set forth under “**Objects of the Offer**” on page 103 of this Red Herring Prospectus. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic

conditions or other factors beyond our control. In accordance with Sections 13(8) and 27 of the Companies Act 2013, we cannot undertake any variation in the utilisation of the Net Proceeds without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to Shareholders who do not agree with our proposal to change the objects of the Offer or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter our Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, or vary the terms of any contract referred to in the Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

48. *We depend significantly on third-party logistics provider to provide transport facilities. A loss of, or a significant decrease in services provided by logistics provider could adversely affect our business and profitability.*

The Company does not own any vehicles for logistics services, we rely on third-party logistics provider to provide transportation services. This dependence exposes the Company to the risks associated with the performance and stability of the logistics providers.

Any disruptions or significant decreases in the transportation industry could impact these services' availability, reliability, and cost, directly affecting the Company's ability to fulfil its contractual obligations and meet customer demands. If the Company loses any logistics provider, it may be difficult to find a suitable replacement quickly and at competitive rates. Consolidation within the transportation industry could lead to reduced competition and increased prices for services, impacting the Company's profitability. A downturn in the transportation industry could lead to decreased demand for services, putting pressure on the Company's margins and revenue.

49. *The shortage or non-availability of power facilities may adversely affect our business and have an adverse impact on our results of operations and financial condition.*

The consistent availability of power is critical to our business operations, particularly for the continuous functioning of our factories, which have significant electricity requirements. Our operations rely on a steady supply from the following:

Sr. No.	State	City	Place	Power supply provided by
1	Maharashtra	Mumbai	Registered Office	Tata Power Company Limited
		Pune	Plant	Maharashtra State Electricity Distribution Co. Ltd.
2	Haryana	Gurugram	Plant- 1	Dakshin Haryana Bijli Vitran Nigam
			Plant - 2	
3	Tamil Nadu	Ranipet	Plant – 1 & R & D Facility	Tamil Nadu Generation and Distribution Corporation Limited
		Kancheepuram	Plant - 2	
4	Gujarat	Ahmedabad	Warehouse	Uttar Gujarat Viji Company Limited

Any disruption in power delivery could adversely affect production schedules, impacting our profitability and turnover. While we have backup systems such as diesel generators in place to mitigate the risks of power outages, these come with limitations.

Additionally, our dependence on third-party electricity providers poses challenges. The limited number of suppliers in the region where we operate restricts our ability to negotiate better tariffs or switch providers in the event of substantial price increases. Unexpected hikes in electricity costs could raise production expenses, potentially impacting on our pricing competitiveness if these costs cannot be passed on to customers. Furthermore, significant

capital investment and high per-unit electricity generation costs limit our ability to establish independent power generation facilities.

Given our reliance on external power sources, any sustained interruption or sharp cost escalation could negatively impact our business performance, financial condition, and operational results. To maintain competitiveness and profitability, managing these power-related risks remains an ongoing priority for the Company.

50. *Major fraud lapses of internal control, system failures, theft, or similar incidents could adversely impact the Company's business.*

Our Company is vulnerable to risks arising from the failure to adhere to approved procedures, system controls, or breaches in security, including fraud, theft, system failures, information disruptions, or communication failures during transmission through external networks.

As an ISO 27001:2013 ISMS-certified company since September 2022, we prioritize data security for our business, customers, and suppliers. Our adoption of TISAX further strengthens our cybersecurity measures to meet global standards. Despite our efforts to implement security measures and internal controls, there is no guarantee that we can completely avoid instances of fraud, negligence, or security lapses. Such occurrences could lead to significant financial losses, negatively affecting our business performance and reputation.

While we have insurance coverage to mitigate losses due to theft, fire, or other damage, the coverage may not fully offset the financial impact of such events, especially if the losses exceed the insurance limits. In the past, we have not faced any such incidents, but we cannot assure that similar incidents will not occur in the future. Any such breaches or failures could result in operational disruptions and reputational damage, ultimately impacting on our financial performance.

51. *Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.*

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. Continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our product;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

52. *Employee fraud and Misconduct or errors by manpower engaged by us could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to

the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance carriers, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

Misconduct or errors by manpower engaged by us could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such misconduct includes breach of security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective.

The risks associated with the deployment of manpower engaged by us include, among others, possible claims relating to:

- actions or inactions, including matters for which we may have to indemnify our clients;
- our failure to adequately verify personnel backgrounds and qualifications resulting in deficient services;
- failure of manpower engaged by us to adequately perform their duties or absenteeism;
- errors or malicious acts or violation of security, privacy, health and safety regulations; and
- damage to our clients' facilities or property due to negligence or criminal acts.

These claims may give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and adversely impact our reputation and brand name. We may also be affected in our operations by the acts of third parties, including sub-contractors and service providers. Any claims and proceedings for alleged negligence as well as regulatory actions may in turn materially and adversely affect our brand and our reputation, and consequently, our business, financial condition, results of operations and prospects. However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company.

53. *Our operations may be adversely affected in case of industrial accidents at our working sites.*

Usage of heavy machinery, handling of sharp parts of machinery by labour during production processor otherwise, short circuit of power supply for machines, etc. may result in accidents and fires, which could cause indirect injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Further, our plant and machinery and personnel may not be covered under adequate insurance for occurrence of types of accidents which could adversely hamper our cash flows and profitability. However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company.

54. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders' investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate.

For further details of see “**Dividend Policy**” beginning on page 271 of this Red Herring Prospectus.

55. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve the expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of

internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management's time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

56. *Our future funds requirements, in the form of a fresh offer of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh offer of shares or convertible securities would dilute the shareholding of the existing shareholders, and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

57. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.*

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

58. *The deployment of funds raised through This Offer shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.*

Since, the Offer size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Offer. The deployment of these funds raised from this Offer, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company's management will have flexibility in applying the proceeds of the Offer and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Offer is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Offer Proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of This Offer and prepare the statement for utilization of the proceeds of this Offer. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Offer without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

60. The requirements of being a public listed company may strain our resources and impose additional requirements.

As we transition to being a publicly listed company, we anticipate encountering new challenges and responsibilities that were not present before. These include heightened scrutiny from shareholders, regulators, and the public, resulting in increased legal, accounting, and corporate governance expenses. Moreover, we will need to adhere to listing agreements with stock exchanges, necessitating the regular filing of unaudited financial results. Meeting these obligations will require significant resources and management oversight, potentially diverting attention from other aspects of our business. There is also the need to strengthen our management team with individuals possessing public company experience and accounting expertise. However, the timely acquisition of such talent is not guaranteed. Overall, this transition may pose obstacles to our business operations and could impact on our ability to promptly report changes in our financial performance compared to other listed companies.

61. Our actual results could differ from the estimates and projections used to prepare our financial statements.

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

62. Our lenders have charge over our immovable and movable properties in respect of finance availed by us.

We have provided security in respect of loans / facilities availed by us from banks by creating a charge over our immovable and movable properties. The total amounts outstanding and payable by us as secured loans were ₹ 3,800.27 lakhs as on March 31, 2025. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be subject to forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further details of secured loans of our Company, please refer the chapter titled “*Statement of Financial Indebtedness*” on page 291 of this Red Herring Prospectus.

63. Our Promoters and Executive Directors hold Equity Shares in our Company and are therefore interested in the Company’s performance in addition to their remuneration and reimbursement of expenses.

Our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information on the interest of our Promoters and Directors of our Company,

other than reimbursement of expenses incurred or normal remuneration or benefits, see “**Our Management**” on page 233 of this Red Herring Prospectus.

Offer Specific Risks:

64. *There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders’ ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any time.

65. *After this Offer, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate because of the factors, including:

- a) Volatility in the Indian and global capital market.
- b) Company’s results of operations and financial performance.
- c) Performance of Company’s competitors,
- d) Adverse media reports on Company or pertaining to the agriculture Industry.
- e) Changes in our estimates of performance or recommendations by financial analysts.
- f) Significant developments in India’s economic and fiscal policies; and
- g) Significant developments in India’s environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for Equity Shares and the prices of the Equity Shares may fluctuate after this Offer. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after This Offer or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market after this Offer.

66. *The Offer price of our Equity Shares may not be indicative of the market price of our Equity shares after the offer.*

The Offer price of our equity Shares has been determined by the Book Built Method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuation after the Offer and may decline below the offer price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer price. For further details you may refer chapter titled “**Basis for Offer price**” beginning on the page 118 of this Red Herring Prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.
- Changes in revenue.
- Variations in the growth rate of our financial indicators such as earnings per share, income, profit etc.
- General Market Condition
- Domestic and International Economy.

EXTERNAL RISKS

Industry Related Risks:

67. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and the results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

68. *Malpractices by some players in the industry affect overall performance of emerging Companies*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

69. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares are generally taxable in India. Any capital gain realized on the sale of listed equity shares on a recognized stock exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains tax in India at the specified rates depending on certain factors, such as the quantum of gains, and any available treaty relief, among others. Any capital gain realized on sale of listed equity shares on a recognized stock exchange held for not more than 12 months immediately preceding the date of transfer will be subject to short term capital gains tax.

The Government of India announced the interim union budget for Financial Year 2024-2025, following which the Finance Bill, 2024 ("**Finance Bill**") was introduced in the Lok Sabha on February 1, 2024. The Finance Bill received the assent from the President of India and became the Finance Act, 2024, with effect from April 1, 2024 ("**Finance Act 2024 I**"). Subsequently, upon announcement of the union budget for Financial Year 2024-2025 after the general elections, the Government of India notified the Finance Act (No.2) Act, 2024 ("**Finance Act 2024 II**").

Pursuant to amendments notified by the Finance Act 2024 II, long term capital gains exceeding the exempted limit of ₹125,000 arising from the sale of listed equity shares on the stock exchange are subject to tax at the rate of 12.5% (plus applicable surcharge and cess), without benefit of indexation. Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax at the rate of 20% (plus applicable surcharges and cess) for transfers taking place after July 23, 2024. A securities transaction tax ("STT") will be levied on and collected by an Indian stock exchange on which our Equity Shares are sold.

Any gain realized on the sale of our Equity Shares other than on a recognized stock exchange (where no STT has been paid), will also be subject to short term capital gains tax or long-term capital gains tax, at such rates as may be applicable under the Income Tax Act. Further, capital gains arising from the sale of our Equity Shares will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident, subject to certain conditions being met. Subject to any relief available under an applicable tax treaty or under the laws of their own jurisdictions, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of our Equity Shares. Investors are advised to consult their own tax advisors to understand their tax liability as per the laws prevailing on the date of disposal of Equity Shares.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities

through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, inter alia, amended the tax regime, including a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, and that such dividends are likely to be subject to tax deduction at source. Further, pursuant to the Finance Act 2024 II, any payment received by the shareholders from the Company pursuant to buyback of shares undertaken after October 1, 2024 on account of buy back of shares shall be taxable as dividend and no deduction from such dividend income shall be allowed.

Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, we cannot predict whether any amendments made pursuant to the Finance Act 2024 II or any subsequent legislation would have an adverse effect on our business, results of operations and financial condition. Unfavourable changes in or interpretations of existing laws, rules and regulations, or the promulgation of new laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

70. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI (ICDR) Regulations, 2018 contained in this Red Herring Prospectus.*

As stated in the reports of the Auditor included in this Red Herring Prospectus under chapter “**Consolidated Financial Statements as Restated**” beginning on page 273 the financial statements included in this Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI (ICDR) Regulations, 2018, and no attempt has been made to reconcile any of the information given in this Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Red Herring Prospectus. Accordingly, the degree to which the financial information included in this Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI (ICDR) Regulations, 2018. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

71. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations.

72. *Financial instability in Indian Financial Markets could adversely affect our Company’s results of operation and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

73. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Red Herring Prospectus.*

While facts and other statistics in this Red Herring Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “***Our Industry***” beginning on page 152 of this Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy elsewhere.

74. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Our business is highly exposed to global and domestic economic and political factors beyond our control, which directly affect our performance. These factors include interest rates, economic growth rates, fiscal and monetary policies, inflation, foreign exchange fluctuations, and consumer confidence. Changes in these conditions—such as a shift in government policies, fluctuating inflation, or consumer debt levels—can lead to significant market volatility, which in turn may impact consumer spending, business investments, and overall market stability.

In addition, India’s economic and political environment significantly influences our business operations. Factors such as macroeconomic policies, inflation, interest rates, and foreign direct investment affect consumer confidence and market dynamics. For instance, higher inflation or rising interest rates could dampen consumer spending, impact financial savings, or increase our operational costs. Furthermore, the global economic conditions can also have a ripple effect on India’s market, leading to rapid changes in market conditions, including volatility in capital markets and the attractiveness of India as an investment destination. This unpredictability in economic and financial conditions can adversely affect the profitability and growth of our business, potentially leading to fluctuations in stock prices and financial performance.

75. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI, or any other government agency, can be obtained on any terms or at all.

76. *Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

77. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade the global equity markets as well generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

78. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

79. *Our business and activities are regulated by the Competition Act.*

The Competition Act, 2002 (the "Competition Act") was enacted for the purpose of preventing practices having an adverse effect on competition in India and has mandated the Competition Commission of India (the "CCI") to regulate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to adversely affect competition in India is void and may result in substantial penalties. Any agreement among competitors which directly or indirectly determines purchase or sale prices, directly or indirectly results in bid rigging or collusive bidding, limits or controls production, supply, markets, technical development, investment or the provision of services, or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or types of goods or services or number of clients in the relevant market or any other similar way, is presumed to adversely affect competition in the relevant market in India and shall be void. The Competition Act also prohibits the abuse of dominant position by any enterprise. Further, if it is proved that any contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and may be punished.

Consequently, all agreements entered by us may fall within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination adversely affects competition in India. The applicability of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, may adversely affect our business, results of operations and prospects.

80. *We may not receive final listing and trading approvals from the Stock Exchanges, and you will not be able to sell immediately on an Indian Stock Exchange any of the Equity Shares you are allotted in the Offer.*

Consequently, the Equity Shares you purchase in the Offer may not be credited to your dematerialized electronic account with Depository Participants until approximately three working days after the Bid/Offer Closing Date. In addition, pursuant to India regulations, certain actions are required to be completed before the Equity Shares can be listed and trading may commence. Investors' book entry or dematerialized electronic accounts with Depository Participants in India are expected to be credited only after the date on which the Offer and allotment is approved by our Board of Directors. There can be no assurance that the Equity Shares allocated to prospective Investors will be credited to their dematerialized electronic accounts, or that trading will commence on time after allotment has been approved by our Board of Directors, or at all.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67%
1000	23.00	1500	50.00%
1500	22.00	3000	100.00%
2000	21.00	5000	166.67%
2500	20.00	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Offer price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Offer price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Justification for Holding Period Levels

Particulars	Detail
Trade Receivables	The trade receivable holding periods of the company are in line with the past trends and the same is maintained in the projections. Our trade receivable holding period was 65 days in FY 22-23 which was reduced to 57 days in FY 23-24 being normal holding days of the company due to better trade receivable management. Trade receivable holding period raised to 67 days FY 24-25 which we further intend to maintain at normal level being 57 days in FY 25-26.
Inventories	Our inventory comprises of raw materials, work-in-progress and finished goods. This classification depends upon the status of unexecuted orders at the year end. We maintain delivery level depending upon our demand and delivery schedules. Our inventory holding level is 50 days in FY 22-23. The revenue increased drastically in FY 22-23 which resulted in reduction in inventory as a result inventory holding days was comparatively lower. Further company again maintained the inventory holding period to 65 days to ensure that the company has sufficient stock to meet the demand. The inventory levels are expected to increase in line with the business volumes and projected business activity. Hence, the said holding period is increased to 73 days for FY 24-25 which we further expect to increase to 72 days in FY 25-26.
Short Term Loan & advances	Short term loans and advances includes Loans and Advances to related parties and others and Advances to suppliers for Raw materials and Capital Goods. Our short term loans and advances holding days was 14 days in FY 22-23. Since the revenue of the company increased drastically in FY 22-23 the raw material procurement increased which lead to payment to suppliers on time and hence advances are reduced. The said level was further maintained in FY 23-24 at 17 days and 18 days in FY 24-25. It is expected to maintain at 15 days for FY 25-26.
Other Current Assets	Other Current Assets comprises of Balance with Revenue Authorities and Prepaid Expenses. There are no major fluctuations in the other current assets of the company and holding level is inline between 5-10 days. The holding period was 7 days in FY 22-23 and 6 days to 23-24. It is slightly increased to 15 days due to increase in balance with government authorities FY 24-25 which is further expected reduced and maintained to past trends to 5 days in FY 25-26.
Trade Payables	Our trade payable holding period was 59 days in FY 22-23. This has significantly improved to Trade Payable Days to 46 days in FY 23-24 which is further maintained to 56 days in FY 24-25. The company added additional short-Term Borrowings of ₹415.84 Lakhs during FY 2023 which strengthened our working capital position and enabled us to make timely payments to suppliers, ensuring smoother operations and avoiding potential cash flow constraints despite an increase in purchases to meet higher product demand. We expect to maintain the holding level at 40 days in FY 25-26.
Other Current Liabilities	Our other current liabilities holding period was 33 days in FY 22-23, 36 days in FY 23-24 which is further increased to 65 days in FY 24-25. We expect to reduce the proportionate statutory liabilities of GST due to additional Input Tax Credit of capital expenditure to be made by the company in FY 2025-26 and hence our other current liabilities holding period is expected to 21 days in FY 2025-26.
Short-term Provisions	Short term provision includes provision for employee benefits and provision for income tax. The short term provisions are gradually increasing over the years due to increase in profits which results in increase in tax payable. Short term provision levels for FY 22-23 is 3 days , 4 days for FY 23-24 and 7 days in FY 24-25. We expect to maintain this level to 7 days for FY 25-26.

ANNEXURE TO THE STATEMENT OF POSSIBLE SPECIAL TAX BENEFITS AVAILABLE TO SELLOWRAP INDUSTRIES LIMITED (“THE COMPANY”) AND IT’S SHAREHOLDERS UNDER THE APPLICABLE TAX LAWS IN INDIA

Outlined below are the possible special tax benefits available to the Company and its shareholders as per the Income tax Act, 1961 (“IT Act”) as amended from time to time and applicable for financial year 2025-26 relevant to assessment year 2026-27 (AY 2026-27) and Indirect Tax Laws as amended from time to time and applicable for financial year 2025-26. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in the Equity Shares particularly since certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

I. Under the IT Act

1. Special Tax Benefits to the Company

a) Lower corporate tax rate on income of domestic companies under Section 115BAA of the ITA

The Taxation Laws (Amendment) Act, 2019 introduced section 115BAA wherein domestic companies are entitled to avail a concessional tax rate of 22% (plus applicable surcharge and cess) on fulfillment of certain conditions.

The option to apply for this tax rate is available from Financial Year (FY’) 2019-20 relevant to Assessment Year (‘AY’) 2020-21 and the option once exercised through filing of Form 10IC on the Income tax portal shall apply to subsequent assessment years. The concessional tax rate of 22% is subject to the company not availing any of the following deductions under the provisions of the ITA:

- Section 10AA: Tax holiday available to units in a Special Economic Zone.
- Section 32(1)(iia): Additional depreciation.
- Section 32AD: Investment allowance.
- Section 33AB/3ABA: Tea coffee rubber development expenses/site restoration expenses
- Section 35(1)/35(2AA)/ 35(2AB): Expenditure on scientific research.
- Section 35AD: Deduction for capital expenditure incurred on specified businesses.
- Section 35CCC/35CCD: expenditure on agricultural extension /skill development
- Chapter VI-A except for the provisions of section 80JJAA and section 80M.

The total income of a company availing the concessional rate of 25.168% (i.e., 22% along with surcharge of 10% and health and education cess of 4%) is required to be computed without set off any carried forward loss and depreciation attributable to any of the aforesaid deductions/incentives. A company can exercise the option to apply for the concessional tax rate by filing Form 10IC on or before the due date of filing return of income under section 139(1) of the ITA. Further, provisions of Minimum Alternate Tax (‘MAT’) under section 115JB of the ITA shall not be applicable to companies availing this reduced tax rate, thus, any carried forward MAT credit also cannot be claimed. The provisions do not specify any limitation/condition on account of turnover, nature of business or date of incorporation for opting for the concessional tax rate. Accordingly, all existing as well as new domestic companies are eligible to avail this concessional rate of tax.

Note: The Company has not yet opted the lower rate under section 115BAA of the ITA.

b) Deductions in respect of employment of new employees under Section 80JJAA of the ITA

As per section 80JJAA of the ITA, where a company is subject to tax audit under section 44AB of the ITA and derives income from business, it shall be allowed to claim a deduction of an amount equal to 30% of additional employee cost incurred in the course of such business in a previous year, for 3 consecutive assessment years including the assessment year relevant to the previous year in which such additional employment cost is incurred.

The eligibility to claim the deduction is subject to fulfilment of prescribed conditions specified in sub-section (2) of section 80JJAA of the ITA. The company is presently not claiming deduction under section 80JJAA of the ITA.

c) Deduction with respect to inter-corporate dividends –Section 80M of the ITA

As per the provisions of section 80M of the ITA, inserted with effect from 01 April 2020 i.e., AY 2021-22, a domestic company shall be allowed to claim a deduction of dividend income earned from any other domestic company or a foreign company or a business trust. The amount of deduction so claimed should not exceed the amount of dividend distributed by it on or before the due date. In this case, due date means one month prior to the due date of furnishing return of income under sub section (1) of section 139 of the ITA.

The company has one associate and one group company on which company has invested and thus, the company should be eligible to claim deduction under section 80M of the ITA in respect of dividends received (if any) from these and further distributed to its shareholders subject to fulfillment of other conditions.

2. Special Tax Benefits available to Shareholders

a) Dividend Income

Dividend income earned by the shareholders would be taxable in their hands at the applicable rates. However, in the case of domestic corporate shareholder, benefit of deduction under section 80M of the ITA would be available on fulfilling the conditions. Further, Finance Act 2021 restricted surcharge to 15% in respect of dividend income

NOTES:

- The above statement of Possible Special Tax Benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
- The above statement covers only certain Special Tax Benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This statement also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
- The above statement of Possible Special Tax Benefits is as per the current Direct Tax Laws relevant for the assessment year 2024-25. Several of these benefits are dependent on the Company or its Shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
- In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.

II. Under the Indirect Tax Laws

1. Special Indirect Tax Benefits available to the Company

a) Benefits under the Central Goods and Services Act, 2017, respective State Goods and Services Tax Act, 2017, Integrated Goods and Services Tax Act, 2017 (read with relevant Rules prescribed thereunder)

- Under the GST regime, all supplies of goods and services which qualify as export of goods or services are zero-rated, that is, these transactions attract a GST rate of zero per cent.
- There are two mechanisms for claiming refund of accumulated ITC against export. Person can export under Bond/ Letter of Undertaking (LUT) as zero-rated supply and claim refund of accumulated Input Tax Credit or person may export on payment of integrated Goods and Services Tax and claim refund thereof as per the provisions of Section 54 of Central Goods and Services Tax Act, 2017.
- Thus, the GST law allows the flexibility to the exporter (which will include the supplier making supplies to SEZ) to claim refund upfront as integrated tax (by making supplies on payment of tax using ITC) or export

without payment of tax by executing a Bond/LUT and claim refund of related ITC of taxes paid on inputs and input services used in making zero rated supplies.

- The Company is exporting the goods without payment of Integrated GST under LUT as well as with payment of Integrated GST for the Financial Year 2024-25 and is entitled to claim refund of accumulated ITC on such exports in terms of GST law.

b) Benefits of Duty Drawback scheme under the Customs Act, 1962

Duty drawback is the export benefit given to rebate the custom duties charged on imported materials which are used for manufacture of exported goods.

The Company is currently availing benefit under this scheme.

2. Special Tax Benefits available to Shareholders

Shareholders of the Company are not eligible to special tax benefits under the provisions of the Central Goods and Services Act 2017 (read with Central Goods and Services Tax Rules, circulars, notifications), respective State Goods and Services Tax Act, 2017 (read with respective State Goods and Services Tax Rules, circulars, notifications), Integrated Goods and Services Tax Act, 2017 (read with Integrated Goods and Services Tax Rules, circulars, notifications), The Foreign Trade (Development and Regulation) Act, 1992 (read with Foreign Trade Policy 2015-20), Customs Act, 1962 (read with Custom Rules, circulars, notifications), Customs Tariff Act, 1975 (read with Custom Tariff Rules, circulars, notifications)

The Shareholders of the Company are not entitled to any Special Tax Benefits under indirect tax laws.

INVESTORS ARE ADVISED TO CONSULT THEIR OWN TAX CONSULTANT WITH RESPECT TO THE TAX IMPLICATIONS OF AN INVESTMENT AND CONSEQUENCES OF PURCHASING, OWNING AND DISPOSING OF EQUITY SHARES IN THE SECURITIES, PARTICULARLY IN VIEW OF THE ACT THAT CERTAIN RECENTLY ENACTED LEGISLATION MAY NOT HAVE A DIRECT LEGAL PRECEDENT OR MAY HAVE A DIFFERENT INTERPRETATION ON THE BENEFITS, WHICH AN INVESTOR CAN AVAIL IN THEIR PARTICULAR SITUATION.

We hereby give our consent to include our above referred opinion regarding the tax benefits available to the Company and to its shareholders in the offer document.

SECTION VIII: ABOUT THE ISSUER COMPANY

OUR INDUSTRY

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the Offer has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed, and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL ECONOMY AT LARGE

The global economy continues to display resilience amid moderating inflation and a rebound in global trade. Easing price pressures have supported real household incomes, though consumer confidence remains below pre-pandemic levels in several regions. Labor markets are softening, yet unemployment rates remain near historic lows. While looser monetary policy is expected to support demand, tighter FY policies could present mild headwinds. Global GDP is projected to grow by 3.2% in 2024 and 3.3% in 2025 and 2026. However, geopolitical tensions in the Middle East and Eastern Europe, along with rising trade protectionism among major economies, pose significant downside risks. A further escalation in conflicts could disrupt energy and commodity supplies, fuelling inflation, particularly in import-dependent nations. Additionally, restrictive trade policies may elevate import costs, squeeze corporate margins, and erode consumer purchasing power. Structural vulnerabilities—including elevated debt levels, stretched asset valuations, weakening credit quality in segments such as commercial real estate, and the growing footprint of unregulated non-bank financial institutions—heighten the risk of financial contagion across market segments.

World Economic Outlook - Real GDP growth (in %) - International Monetary Fund

Global growth is projected to remain steady yet subdued at 3.3% in both 2025 and 2026, below the historical average of 3.7% (2000–19). Beneath the stable headline, however, lie divergent regional trends and a fragile global growth profile.

Among advanced economies, the *United States* is expected to grow by 2.7% in 2025, driven by resilient domestic demand, strong wealth effects, a less restrictive monetary policy stance, and supportive financial conditions. Growth is set to moderate toward potential in 2026.

In the *Euro area*, growth is forecast at 1.0% in 2025, hampered by weak late-2024 momentum—particularly in manufacturing—and heightened geopolitical and policy uncertainty. A gradual recovery to 1.4% is projected in 2026 as domestic demand strengthens, financial conditions ease, and confidence improves.

Emerging market and developing economies are expected to maintain steady growth through 2025 and 2026. *China's* growth is forecast at 4.6% in 2025, supported by FY stimulus and momentum from 2024, offsetting pressures from trade tensions and a sluggish property market. Growth is projected to hold at 4.5% in 2026 as policy uncertainty eases and labour force decline slows due to recent retirement age reforms.

India's economy remains a bright spot, with growth projected at a robust 6.5% in both 2025 and 2026, in line with its potential.

Growth in the *Middle East and Central Asia* is expected to improve, though less than previously anticipated, largely due to a 1.3 %age point downgrade for *Saudi Arabia* stemming from extended OPEC+ production cuts.

In *Latin America and the Caribbean*, growth is projected to edge up to 2.5% in 2025, despite slowing momentum in the region's largest economies. *Sub-Saharan Africa* is also expected to see a pickup, while *emerging and developing Europe* faces a slowdown.

Key Considerations

1. Stable Global Growth, Services Outpacing Manufacturing

Global GDP growth remains resilient, projected at 3.2% in 2024 and 3.3% in 2025-26, reflecting steady expansion despite macroeconomic headwinds. The services sector continues to outperform manufacturing, bolstered by strong consumer demand, while industrial activity faces lingering supply chain constraints.

2. Labor Market Cooling but Still Robust

Employment growth is projected to moderate, aligning with a weaker labour force expansion. Job vacancy rates have declined, yet unemployment remains at or near historic lows in most major economies, supporting household income and consumption.

3. Inflation Nears Central Bank Targets, but Risks Persist

Inflation has continued its downward trajectory, approaching central bank targets in several advanced economies. However, persistent services inflation and elevated housing costs in some regions may prolong the disinflation process, keeping interest rates elevated for longer than expected.

4. Household Finances Improve but Confidence Lags

Real household disposable income in some economies has surpassed pre-pandemic levels, while household savings rates continue to rise amid cautious consumer sentiment. A further decline in food and energy prices relative to core items could provide relief and restore confidence.

5. Global Trade Faces Headwinds Despite Recovery

Trade activity has rebounded from the 2023 slowdown, yet surveys of new export orders suggest slower growth ahead. Rising shipping costs and trade restrictions may limit further expansion, though their impact on inflation is expected to be modest.

6. Easing Financial Conditions Support Credit Expansion

Global financial conditions have continued to ease, with sovereign bond yields declining and market volatility stabilizing. Bank credit growth has stabilized, while corporate bond issuance has picked up, ensuring continued access to capital for businesses.

7. Geopolitical and Trade Risks Pose Structural Challenges

Elevated geopolitical tensions, particularly in the Middle East and Eastern Europe, alongside increasing trade policy uncertainty, present significant downside risks. Any escalation could disrupt commodity supplies, fuelling inflationary pressures, particularly in import-dependent economies.

8. Rising Private Credit and Non-Banking Risks

Non-bank financial institutions have expanded significantly, becoming more interconnected with traditional banking systems. The growth of private credit in advanced economies raises concerns over financial stability, as leveraged lending increases systemic risk exposure.

OVERVIEW OF THE INDIAN ECONOMY

As of March 2025, India's Gross Domestic Product (GDP) is estimated to be \$4.3 trillion, having doubled from \$2.1 trillion in 2015, according to the latest data published by the International Monetary Fund. Several High Frequency Indicators for the 4th quarter of 2024-25 indicate that the Indian economy has recovered from the moderation in momentum witnessed in Q2, driven by strong festival activity and a sustained upswing in rural demand. Consumer confidence was boosted by higher optimism for the year ahead, breaking out of the sequential moderation in the current assessment of conditions. Supply chain pressures remained below historical average levels.

Real GDP grew by 6.5% in FY 2024–25, with Q4 growth recorded at 7.4%. This momentum is set to be sustained at similar rates throughout FY 2025-26 and 2026-27 positioning India as the fastest growing major economy in the world.

High Frequency Indicators - Industry

Notes: 1. The y-o-y growth (in per cent) has been calculated for all indicators (except for PMI).
2. The heat map translates the data range for each indicator into a colour gradient scheme with red denoting the lowest values and green corresponding to the highest values of the respective data series.
3. Heat map is applied on data from April 2023 till May 2025 other than for IIP and Electricity Generation: Renewable, where the data is till April 2025.
4. All PMI values are reported in index form. A PMI value >50 denote expansion; <50 denote contraction; and =50 denote 'no change'. In the PMI heat maps, red denotes the lowest value, yellow denotes 50 (or the no change value), and green denotes the highest value in each of the PMI series.

India's economy has continued its robust growth trajectory into FY2024-25, reflecting a resilient domestic demand environment, strong public investment, and improving external balances. According to the Provisional Estimates from the Ministry of Statistics and Programme Implementation (MoSPI), nominal GDP grew by 9.8% in FY25, following a 12.0% growth in FY24. This upward momentum highlights a recovery-led expansion rather than a purely base-effect-driven spike.

Private Final Consumption Expenditure (PFCE), which accounts for over 60% of GDP, grew by 12.0% in FY25—an acceleration from 9.7% in the previous year. This uptick is underpinned by rising discretionary spending in urban India, recovery in rural consumption (helped by easing food inflation and better kharif harvests), and continued momentum in auto, FMCG, and housing sectors. High-frequency indicators like GST collections and UPI transaction volumes support this trend, both recording double-digit growth in the second half of FY25.

Government Final Consumption Expenditure (GFCE), however, saw moderated growth of 6.4% in FY25 compared to 12.6% in FY24. The moderation is likely a result of consolidation efforts, where the Union Government has been focusing on rationalizing revenue expenditure to meet the 5.1% deficit target. That said, capex remains prioritized, as reflected in increased outlays for roads, railways, and defence.

Gross Fixed Capital Formation (GFCF), which measures investment in infrastructure, machinery, and equipment. GFCF registered a healthy ₹98.86 lakh crore in FY25, growing at 7.9% over the previous year. While the growth rate has moderated from 9.2% in FY24, the absolute rise continues to reflect India’s strong infrastructure push. The government’s capital expenditure, which rose 28% YoY in FY24, continues to stimulate private investment activity via crowding-in effects.

Gross National Income (GNI) and Gross National Disposable Income (GNDI) also saw robust expansions of 9.7% each. This surge in GNDI especially reflects improved net factor income from abroad and rising remittances, helping bolster consumption and savings. Correspondingly, Per Capita GNDI rose by an impressive 8.6%, suggesting improving income levels at the household level—a positive signal for both e-commerce and the broader retail sector.

Per Capita PFCE, growing at 10.9%, supports the narrative of expanding middle-class demand, with implications for the retail sector.

Sectoral Composition of GVA: Building Blocks of India’s Growth Story

India's GVA at Current Prices is estimated to rise 9.5% in FY2024–25, following an 11.2% increase in FY2023–24. While the tertiary sector continues to anchor growth, the Primary and Secondary sectors have witnessed structural shifts that hold strong relevance for the broader industrial and manufacturing ecosystem.

Primary Sector (↑9.5% YoY in FY25): Buoyed by Agricultural Resilience

The Primary Sector witnessed a notable pickup to 9.5% growth in FY25, led by a sharp rebound in Agriculture, Livestock, Forestry & Fishing (↑10.4%). This comes on the back of favourable monsoon distribution, enhanced MSP-led procurement, and improved horticulture output. Despite ongoing rural distress in select pockets, rising real rural wages and healthy kharif yields supported income stabilization. However, Mining & Quarrying grew marginally at 1.6% (↓from 4.2%) due to sluggish coal and mineral ore production and continued logistical constraints in transporting bulk commodities—indirectly dampening cost efficiency for heavy industries reliant on these inputs.

Secondary Sector (↑7.2% YoY in FY25): Normalization after an Infra-led Surge

The Secondary Sector's growth has moderated from 10.9% in FY24 to 6.3% in FY25—indicating a transition from post-COVID recovery highs to normalized, base-adjusted expansion.

1. Manufacturing GVA grew at 6.3%, reflecting mixed industrial momentum. High-capacity utilization and PLI scheme tailwinds supported capital goods and automotive segments, while consumer durables and textiles remained sluggish amid uneven consumption recovery.
2. Electricity, Gas, Water Supply & Other Utility Services, which posted a striking 25.8% growth in FY24 due to base effect and a surge in energy demand, expanded modestly at 5.3% in FY25. The deceleration signals stabilization in power demand despite India's continuing electrification drive.
3. Construction maintained a solid 9.4% growth after a 10.6% rise in FY24. Strong government-led infrastructure push in roads, railways, and affordable housing continued to drive this growth. Capex-heavy states (e.g., UP, Maharashtra, Gujarat) recorded strong project execution rates.

Tertiary Sector (↑10.6% YoY in FY25): Backbone of Service-led Resilience

The Tertiary Sector remained the largest contributor to GVA (~54%) and grew at 10.6% in FY25, underscoring the strength of India's services economy:

1. Financial, Real Estate & Professional Services saw robust 10.2% growth on the back of rising credit offtake, continued traction in commercial real estate (especially in Tier I/II cities), and stable BFSI sector performance.
2. Public Administration, Defence & Other Services maintained strong double-digit growth at 13.4%, reflecting continued government expenditure, social scheme disbursements, and capital-intensive defence procurement.
3. Trade, Transport, and Communication Services grew 8.9%, in line with improving domestic logistics, e-commerce penetration, and retail sales.

AUTOMOTIVE COMPONENTS: DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH

The automotive component industry is an important sector of the Indian economy and a major foreign exchange earner for the country. There are around 400 major players in the auto component sector. Most of them are distributed in the north, south, and western parts of India around major Automotive Vehicle Manufacturers (AVMs). These AVMs contributed largely towards the development of component suppliers through technical and or financial collaborations.

The automotive component industry manufactures a wide range of parts including castings, forgings, finished, semi-finished components, assemblies, and subassemblies for all types of vehicles produced in India.

Presently, the Indian automotive component industry is highly fragmented. This industry can be divided into the organized and the unorganized categories of manufacturers. The organized component manufacturers supply components to at least one of the Original Equipment (OE) vehicle manufacturers. They also have access to technology due to their tie-ups with some of the foreign collaborators or through associate AVM. The unorganized sector predominantly caters to the

The OE market is predominantly catered to by the organized sector. The 400 odd, organized producers contribute around 80 percent to this market. Presently, these manufacturers have grown in size and numbers beyond the control of OE manufacturers. They control about 65 percent of the aftermarket

There are 402 medium and large key players in auto components in the organized sector along with 6000 ancillary units. However, in the unorganized sector there are approximately 5000 SSIs. The direct employment generated by the medium and large firms in the organized sector is 2,50,000. No figures are available for the unorganized sector.

The geographical spread of medium and large companies as per records of Automotive Component Manufacturers Association of India (ACMA) is as under

Tamil Nadu current annual output in the automotive sector is estimated to be \$3-3.5 billion with an estimated share of 25 per cent in the Indian automotive Industry and its contribution to the State's Gross State Domestic Product is 7-8 per cent. Tamil Nadu's auto components sector constitutes 35 per cent of India's auto component production that is produced in units situated in Chennai. The Tamil Nadu State government plans to transform the state into one of the top three manufacturing hubs for automotive and auto ancillary in Asia by 2015.

There are 107 key players in Tamil Nadu's Auto Component Industry with an investment of about ₹36000 million (\$ 800 million). The output is US \$ 1,2 billion out of which the exports are US \$ 140 million. The auto component industry in Tamil Nadu provides employment to about 45,000 people. More than 50% of the companies are ISO certified while 26% are QS certified.

The Key OEM customers of auto component industry in Tamil Nadu are GM, Ford, Daimler Chrysler, BMW, Volvo, Nissan, Piaggio and New Holland.

Kerala, however, does not have a very well-developed auto components industry.

AUTOMOBILE INDUSTRY REPORT IN INDIA

The Indian automobile industry has historically been a good indicator of how well the economy is doing, as the automobile sector plays a key role in both macroeconomic expansion and technological advancement. The two-wheelers segment dominates the market in terms of volume, owing to a growing middle class and a huge percentage of India's population being young. Moreover, the growing interest of companies in exploring the rural markets further aided the growth of the sector. The rising logistics and passenger transportation industries are driving up demand for commercial vehicles. Future market growth is anticipated to be fueled by new trends including the electrification of vehicles, particularly three-wheelers and small passenger automobiles.

India enjoys a strong position in the global heavy vehicles market as it is the largest tractor producer, second-largest bus manufacturer, and third-largest heavy truck manufacturer in the world. India's annual production of automobiles in FY23 was 25.9 million vehicles. India has a strong market in terms of domestic demand and exports. In September 2024, the total production of passenger vehicles*, three-wheelers, two-wheelers, and quadricycles was 27,73,039 units. In FY23, total automobile exports from India stood at 47,61,487. This sector's share of the national GDP increased from 2.77% in 1992-1993 to around 7.1% presently. It employs about 19 million people directly and indirectly.

India is also a prominent auto exporter and has strong export growth expectations for the near future. In addition, several initiatives by the Government of India such as the Automotive Mission Plan 2026, scrappage policy, and production-linked incentive scheme in the Indian market are expected to make India one of the global leaders in the two-wheeler and four-wheeler market by 2022.

MARKET SIZE

The Indian passenger car market was valued at US\$ 32.70 billion in 2021, and it is expected to reach a value of US\$ 54.84 billion by 2027 while registering a CAGR of over 9% between 2022-27. The global EV market was estimated at approximately US\$ 250 billion in 2021 and by 2028, it is projected to grow by 5 times to US\$ 1,318 billion.

In September 2024, the total production of passenger vehicles*, three-wheelers, two-wheelers, and quadricycles was 27,73,039 units. In April - September FY25*, the total production of passenger vehicles, commercial vehicles, three-wheelers, two-wheelers, and quadricycles was 1,56,22,388 units.

In April-September FY25, the total production of passenger vehicles, commercial vehicles, three-wheelers, two-wheelers, and quadricycles was 1,56,22,388 units.

India accomplished a significant milestone, with the sale of 13,25,112 EVs in FY24 (till January 2024).

The Electric Vehicle (EV) market is estimated to reach US\$ 7.09 billion (₹ 50,000 crore) in India by 2025. A study by CEEW Centre for Energy Finance recognised a US\$ 206 billion opportunity for electric vehicles in India by 2030. This will necessitate a US\$ 180 billion investment in vehicle manufacturing and charging infrastructure.

According to NITI Aayog and the Rocky Mountain Institute (RMI), India's EV finance industry is likely to reach US\$ 50 billion (₹ 3.7 lakh crore) by 2030.

A report by the India Energy Storage Alliance estimated that the EV market in India is likely to increase at a CAGR of 36% until 2026. In addition, the projection for the EV battery market is expected to expand at a CAGR of 30% during the same period.

Indian automotive industry is targeting to increase the export of vehicles by five times during 2016-26. In FY23, total automobile exports from India stood at 47,61,487. Indian automobile exports of two-wheelers stood at 36,52,122 in FY23.

INVESTMENTS

To keep up with the growing demand, several auto makers have started investing heavily in various segments of the industry during the last few months. The automobile sector received a cumulative equity FDI inflow of about US\$ 35.65 billion

between April 2000 - December 2023. India is on track to become the largest EV market by 2030, with a total investment opportunity of more than US\$ 200 billion over the next 8-10 years.

ROAD AHEAD

The automobile industry is dependent on various factors such as the availability of skilled labour at low cost, robust R&D centres, and low-cost steel production. The industry also provides great investment opportunities and direct and indirect employment to skilled and unskilled labour. The electric vehicles industry is likely to create five crore jobs by 2030.

Addressing the automotive industry's needs, MHI has extended the tenure of the Production Linked Incentive (PLI) Scheme for Automobile and Auto Components by one year, offering incentives for determined sales over five consecutive financial years from 2023-24 to 2027-28, with disbursement occurring in the subsequent financial year.

The scheme has proven successful, attracting proposed investments of US\$ 8.1 billion (₹ 67,690 crore) against the target estimate of US\$ 5.1 billion (₹ 42,500 crore) over five years, with US\$ 1.6 billion (₹ 13,037 crore) already invested by December 31, 2023.

As per Economic Survey 2023-24, the Production Linked Incentive scheme (PLI) for automobile and auto components has so far attracted a proposed investment of ₹ 67,690 crore (US\$ 8.18 billion).

In August 2022, the Indian government launched India's first double-decker electric bus in Mumbai. Looking long term, the government feels it is necessary to overhaul the country's transportation system. It is working to create an integrated Electric Vehicle (EV) mobility ecosystem with a low carbon footprint and high passenger density with an emphasis on urban transportation reform. The government's strategy and policies are intended to promote greater adoption of electric vehicles in response to growing customer demand for cleaner transportation options.

AUTO COMPONENTS INDUSTRY IN INDIA

INTRODUCTION

India has become the fastest-growing economy in the world in recent years. This fast growth, coupled with rising incomes, a boost in infrastructure spending and increased manufacturing incentives, has accelerated the automobile industry. The two-wheeler segment dominated the automobile industry because of the Indian middle class, with automobile sales standing at 23.85 million units in FY24.

Significant demand for automobiles also led to the emergence of more original equipment and auto components manufacturers. As a result, India developed expertise in automobiles and auto components, which helped boost international demand for Indian automobiles and auto components. Hence, the Indian automobile industry has a considerable impact on the auto component industry.

In 2024, India produced 100,000 electric cars and 900,000 electric two wheelers. However, Internal Combustion Engine (ICE) vehicles still dominate with 20 million two wheelers and 5 million cars produced. India's auto component industry is an important sector driving macroeconomic growth and employment. The industry comprises players of all sizes, from large corporations to micro entities, spread across clusters throughout the country.

The auto components industry accounted for= 2.3% of India's GDP and provided direct employment to more than 1.5 million people. By 2026, the automobile component sector will contribute 5-7% of India's GDP. The Automotive Mission Plan (2016-26) projects to provide direct incremental employment to 3.2 million by 2026.

The industry is a leader in exports and provides jobs to over 3.7 crore people. In 2023-24, the export value of auto components/parts was estimated at US\$ 21.2 billion. North America, which accounts for 32% of total exports, increased by 5%, while Europe and Asia, which account for 33% and 24% of total exports, increased by 12% and growth for Asia

remained flat, respectively. The key export items included drive transmission and steering, engine components, body/chassis, suspension and braking etc.

MARKET SIZE

India's auto components industry's market share has significantly expanded, led by increasing demand for automobiles by the growing middle class and exports globally. Due to the Oz670 growth in demand for Indian auto components, several Indian and international players have entered the industry. India's auto component industry is broadly classified into organised and unorganised sectors. While the unorganised sector consists of low-valued items and mostly serves the aftermarket category, the organised sector serves OEMs and includes high-value precision instruments.

The automobile component industry turnover stood at ₹ 6.14 lakh crore (US\$ 74.1 billion) during FY24, registering a revenue growth of 9.8% as compared to FY23. Domestic OEM supplies contributed ~54% to the industry's turnover, followed by domestic aftermarket (~10%) and exports (~18%), in FY24. The component sales to OEMs in the domestic market grew by 8.9% to ₹ 5.18 lakh crore (US\$ 62.4 billion). The aftermarket for auto components grew by 10.0% during FY24 reaching ₹ 9.38 lakh crore (US\$ 11.3 billion). Over FY16 to FY24, the automotive components industry registered a CAGR of 8.63%, reaching US\$ 74.1 billion in FY24.

The auto component industry exported US\$ 21.2 billion and imported US\$ 20.9 billion worth of components during 2023-24, resulting in the trade surplus of US\$ 300 million.

As per the Automobile Component Manufacturers Association (ACMA) forecast, auto component exports from India are expected to reach US\$ 30 billion by 2026. The auto component industry is projected to record US\$ 200 billion in revenue by 2026. Strong international demand and resurgence in the local original equipment and aftermarket segments are predicted to help the auto component industry grow 20-23% in FY22.

In fiscal year 2023-24 (April-January), the total number of automobiles sold was 19.72 million units. In (April-January) 2023-24, the total production of passenger vehicles, commercial vehicles, three wheelers, two wheelers, and quadricycles was 23.36 million units.

The number of charging stations stood at 1,800 in March 2021 and is expected to reach 4 lakh by 2026. This would make it easier for the auto component industry to take advantage of the EV opportunity and expertise in EV components manufacturing, thus helping India on a global scale. The Indian government is exempting imports of capital goods and machinery essential to produce lithium-ion cells used in EV batteries from customs duty. This, coupled with the shift in global supply chains, will help the Indian global automotive component trade to expand 4-5% yearly to US\$ 80 billion by 2026. Moreover, the Indian auto component industry is the third largest in the world.

Market Overview

India Plastic Moulding Market was valued at USD 45.13 Million in 2024 and is expected to reach USD 53.64 Million by 2030 with a CAGR of 3.12% during the forecast period. Plastic moulding is a manufacturing technique that produces components and products from plastic materials by shaping molten or softened plastic into specific forms using moulds. This method is extensively utilized across various industries, including automotive, consumer goods, electronics, packaging, and medical devices, owing to its efficiency, versatility, and cost-effectiveness.

The Indian plastic moulding market is a key segment of the country's manufacturing landscape, propelled by rapid industrialization, urbanization, and a growing consumer base. The Indian plastic processing industry currently consists of around 30,000 facilities that employ techniques such as injection moulding, blow moulding, extrusion, and calendaring to manufacture a diverse array of products. Government initiatives like "Make in India" and support for the manufacturing sector have stimulated investment in this industry. The expanding middle class and rising disposable incomes are driving demand for consumer products, resulting in increased adoption of plastic moulding technologies.

Growth of the Automotive Sector

As vehicle demand continues to rise, Indian automotive manufacturers are significantly increasing their production capacity, driven by both domestic and export markets. This expansion necessitates a greater use of plastic components, valued for their lightweight and versatile properties. According to IBEF, total production of passenger vehicles, three-wheelers, two-wheelers, and quadricycles reached 2,358,041 units in April 2024. Automakers are increasingly integrating lightweight materials, including plastics, to enhance fuel efficiency and reduce emissions. This shift boosts demand for moulded plastic parts such as bumpers, dashboards, and interior trims. For instance, plastic dashboards facilitate complex designs and the integration of electronic components, while moulded plastic bumpers are lighter and better at absorbing impacts compared to traditional materials.

The transition to electric vehicles (EVs) is transforming the automotive landscape, as EVs require specialized components, many of which are made from plastics. This includes battery casings, which are lightweight and durable, helping to improve overall vehicle range and efficiency. Plastic moulding technologies like injection moulding and blow moulding provide significant design flexibility, allowing automotive designers to create intricate shapes and features that enhance both aesthetics and functionality. Manufacturers can produce customized parts tailored to specific vehicle models or consumer preferences. Additionally, plastic components exhibit excellent durability and corrosion resistance, making them suitable for various automotive applications. India is emerging as a key hub for automotive manufacturing, catering to both domestic and export needs.

Government initiatives such as "Make in India," along with supportive policies like the allocation of USD 31.98 Million to the FAME II scheme in the Union Budget 2024, are encouraging foreign investment and collaboration in the sector. For example, In December 2023, Autotech-Sirmax India announced plans to expand its production capacity by adding four new extrusion lines, which will boost output by 15,000 tonnes annually and effectively double the site's capacity. Additionally, with the establishment of a third plant in southern India by 2026, the total capacity in the region is expected to reach 82,000 tonnes per year. This growth in both domestic and export markets is driving demand for plastic moulded parts, further contributing to the overall expansion of the plastic moulding industry.

MANUFACTURING PROCESS

a. PLASTIC INJECTION MOULDING PROCESS

Preheating: Raw material (plastic resin or granules) is preheated to remove any residual moisture, ensuring proper flow and preventing defects during moulding.

Moulding: The heated raw material is injected into the mould cavity under high pressure using an injection moulding machine. It then cools and solidifies to form the desired component.

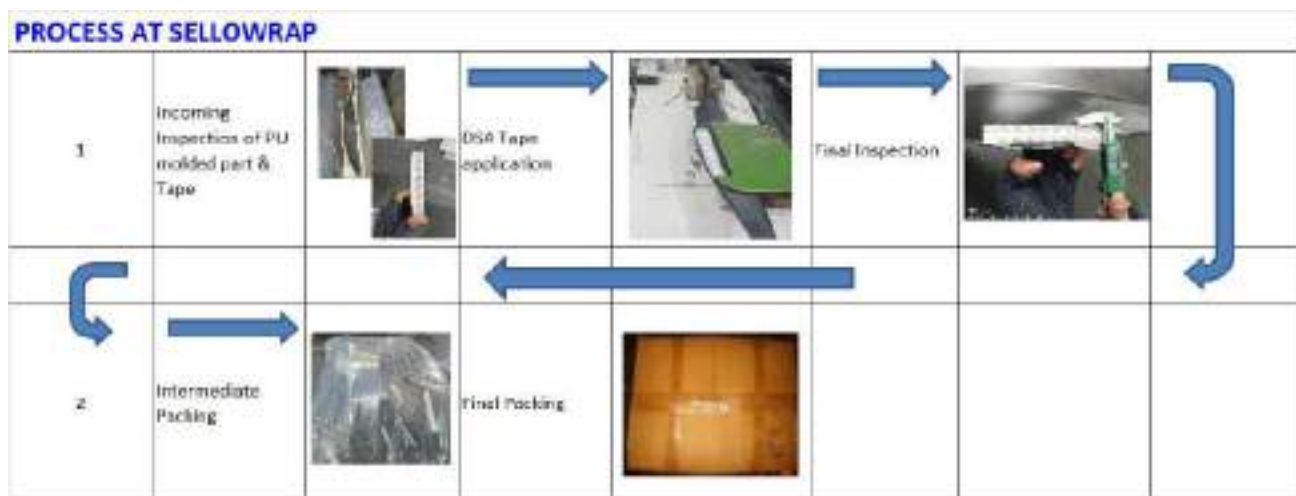

Annealing: The moulded parts are subjected to controlled heating and cooling to relieve internal stresses, enhance durability, and improve mechanical properties.

Assembly: Depending on the product, some components may require further assembly with additional parts, such as clips, fasteners, or inserts.

Final Inspection: Each finished part undergoes a thorough inspection to check for dimensional accuracy, surface finish, structural integrity, and other critical quality parameters.

Packing: Approved components are carefully packed as per customer requirements to ensure safe handling and transportation.

b. PU-Foam-Moulding

Incoming Inspection: PU molded foam parts such as fender foam engine cover , seal hood received from supplier then check the quality parameter such as density , profile , length etc.

Incoming Inspection of Double side tape(DSA): Check tape thickness, grade, adhesive strength and heat bearing limit

DSA tape application on PU molded parts: Apply the tape over the PU moulded parts as per drawing location

Final Inspection: Check the parts dimension, profile, material properties and tape location in gauge

c. FOAM PARTS & STICKERS PROCESS

Foam Parts Process

Incoming of Foam Sheet: Foam sheets are procured and checked for quality parameters such as thickness, density, and surface finish.

Coating: A layer of adhesive or specialized coating is applied to the foam sheet, enhancing its functionality

Rolling: The coated foam sheets are rolled into compact rolls for easier handling and further processing.

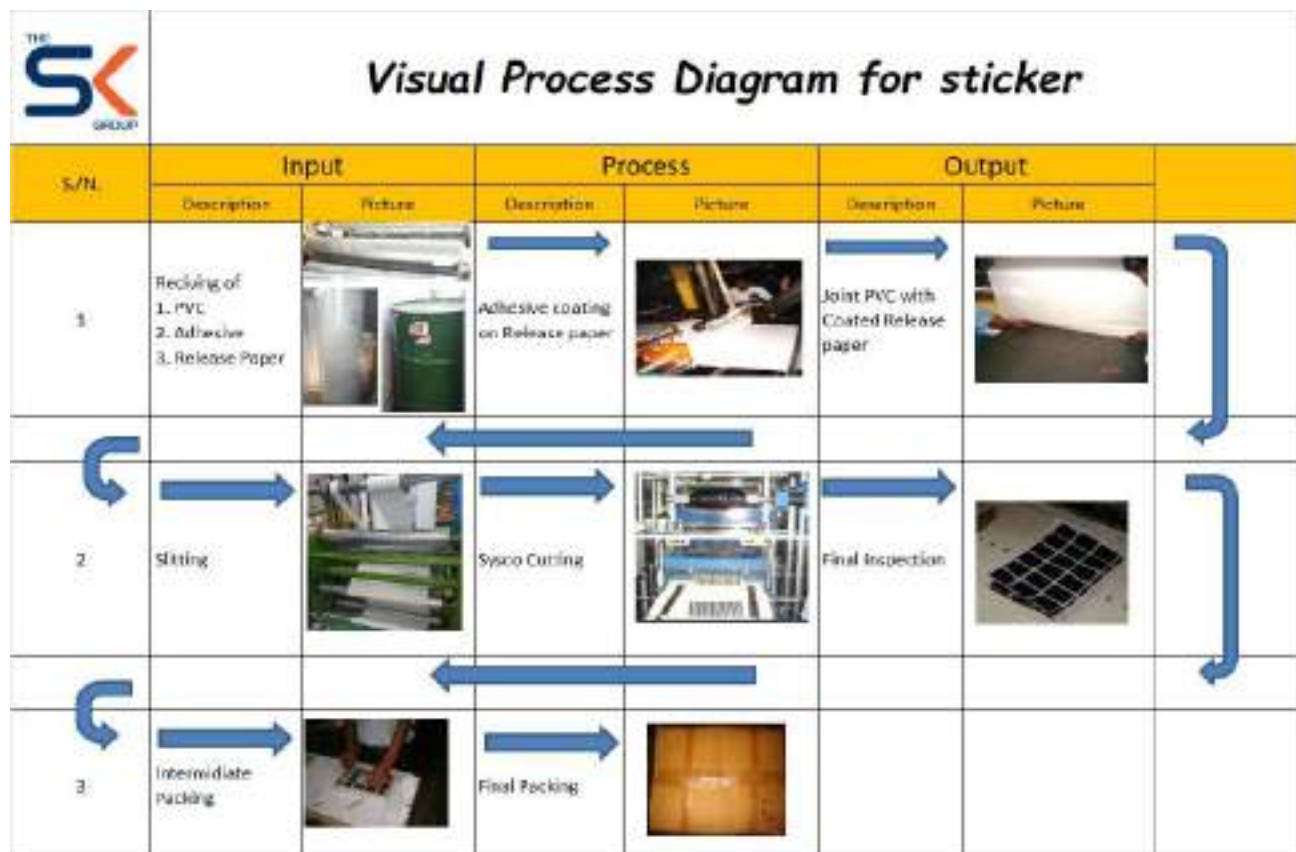

Inspection: The rolled foam is inspected for uniform coating, surface defects, and other critical quality standards.

Profile Cutting: The foam is cut into specific shapes or profiles using automated cutting machines (like die cutters or CNC routers) as per product design.

Blinking: Excess material is removed (flashing or trimming) to ensure precise dimensions and clean edges.

Packing: The finished foam parts are packed according to customer specifications, ensuring safe transport and storage.

Sticker Process

Incoming Inspection of PVC, Adhesive and Paper: Quality check of PVC such as GSM, thickness, tensile strength and elongation

Quality check in release paper such as GSM (Gram per square meter), thickness and release value Quality check in Adhesive such as Viscosity, Adhesive strength etc.

Coating: Adhesive are applied on PVC through adhesive roller and it has passed through heating conveyer at specified temperature and conveyer speed for curing of adhesive then apply release paper and form coated roll

Slitting of Coated roll: Big width coated roll silted into small roll width as per cutting die size

Cutting on Sysco machine: Silted roll loaded on machine and fixed the machine feed and cutting depth to cut the parts as desired shape according to die

Final Inspection: Parts dimensions, Dimension, profile check and adhesive strength through testing equipment's

d. SCREEN SEALING PARTS PROCESS

FILM PARTS WITH WELDING & BUTYL

- *Butyl is not an abbreviation, Butyl is a type of adhesive made from butyl rubber. It's a pressure-sensitive adhesive (PSA) that's permanently tacky, flexible, and weather-resistant*

Incoming of LDPE: Low-Density Polyethylene (LDPE) rolls are received and checked for quality compliance, ensuring proper thickness and flexibility.

Profile Cutting on Press: The LDPE is cut into desired profiles using a press machine to match the product design requirements.

Storage of Blown Rolled Film: The blown LDPE film rolls are stored in designated areas, ready for further processing.

Thermo Welding of Cup: The cut LDPE profiles are thermo-welded to form a cup-like structure using specialized welding machines.

Extra Material Cutting from Thermoformed Parts: Excess material from the thermoformed parts is trimmed to achieve the final shape and clean edges.

Thermoforming of Cup: The pre-cut profiles undergo a thermoforming process, where they are heated and moulded into the required 3D shape of the cup.

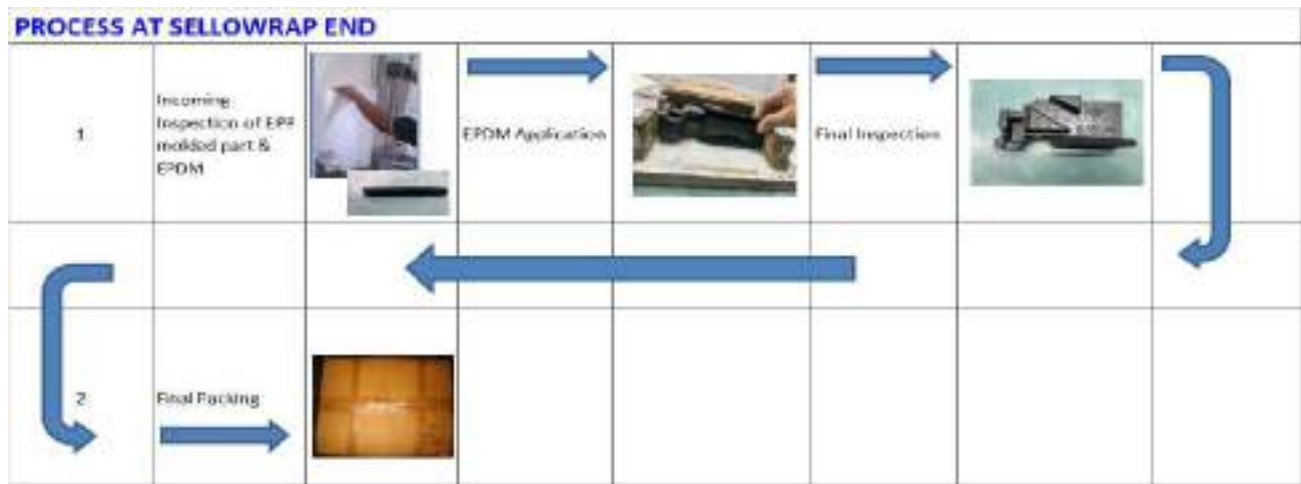

Intermediate Packing: The thermoformed parts are packed temporarily to ensure safe handling during further processes.

Final Inspection & Final Parts: A thorough inspection is conducted to check the dimensions, welding quality, and overall finish of the final parts.

Butyl Application: Butyl adhesive is applied to specific sections of the final parts for enhanced sealing and vibration damping.

Final Packing: The inspected parts, after butyl application, are packed according to customer specifications for delivery.

e. EPP Moulding

Incoming Inspection of EPP Moulded parts, Tape and foam: Procurements of all material from different supplier and quality check such as dimension, density, tensile, compression and adhesive strength

Press Cutting of Tape and Foam: Tape/Foam is cut on hydraulic press through die on desired share for assly on EPP parts

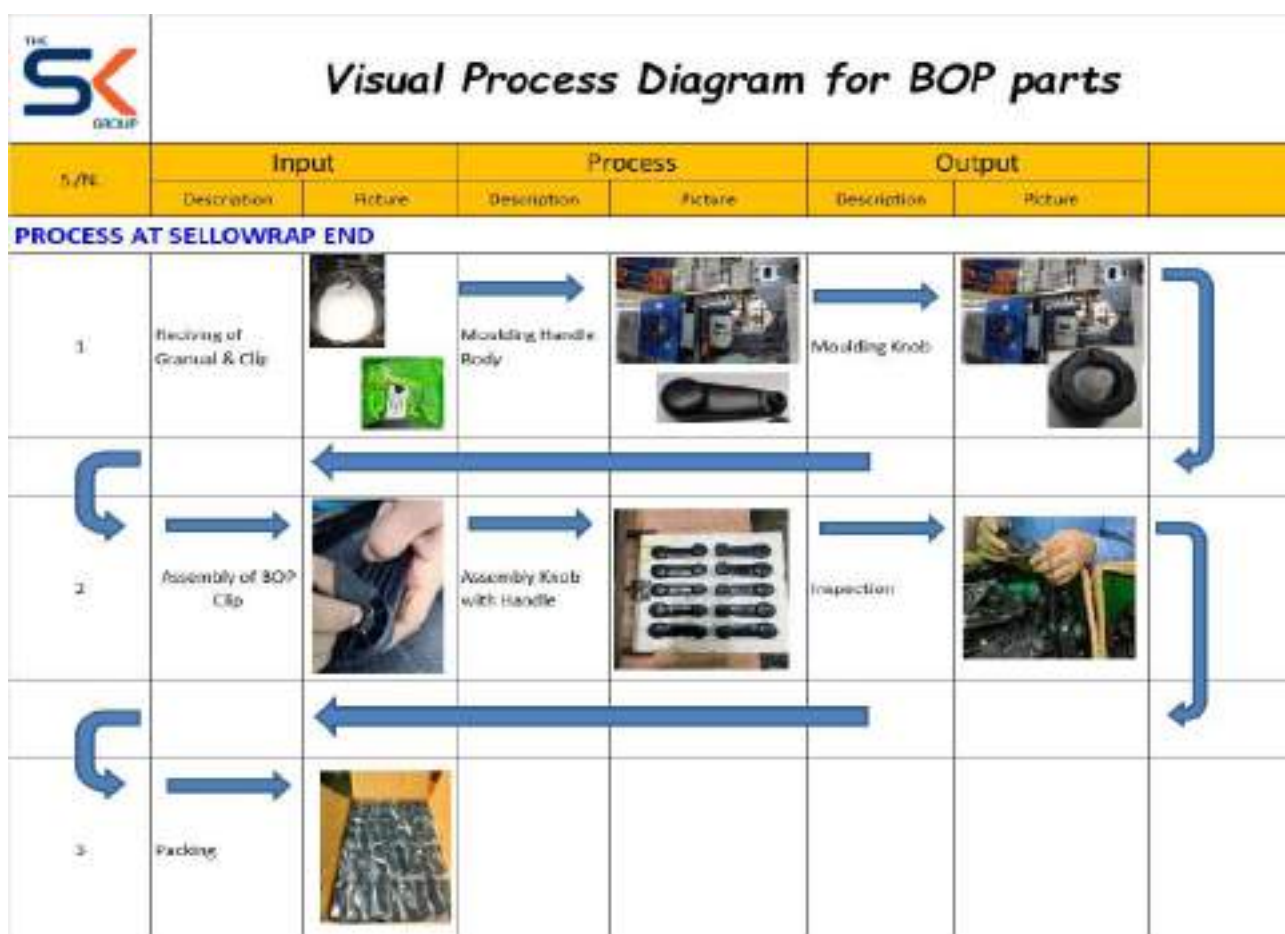

Assly of Tape on EPP moulded part: Paste the catted Tape on EPP moulded parts through fixture on desired location as per drawing

Final Inspection: Parts dimensions, location of tape and profile check through testing equipment's and gauge

f. BOUGHT OUT PRODUCTS

“Brought Out Parts’ (BOP) are components or materials that a company purchases from external suppliers instead of manufacturing them in-house. These parts are used in the manufacturing process to come out as final product.

a. Metal Clip

Incoming Inspection of Clip and Granules: Clip dimension, material and shape are check and for the granules check density, melt flow index and colour are checked

Moulding of handle, Knob and Insert: Injection moulding process done with different grade of material at different machine to make child parts for assly

Assly of Hansle, Insert, knob and clip: All child parts and BOP parts are assembled through Special purpose machine and make final window handle regulator parts

Final Inspection: Inspection of dimension. actual movements, load and appearance as per inspection standard

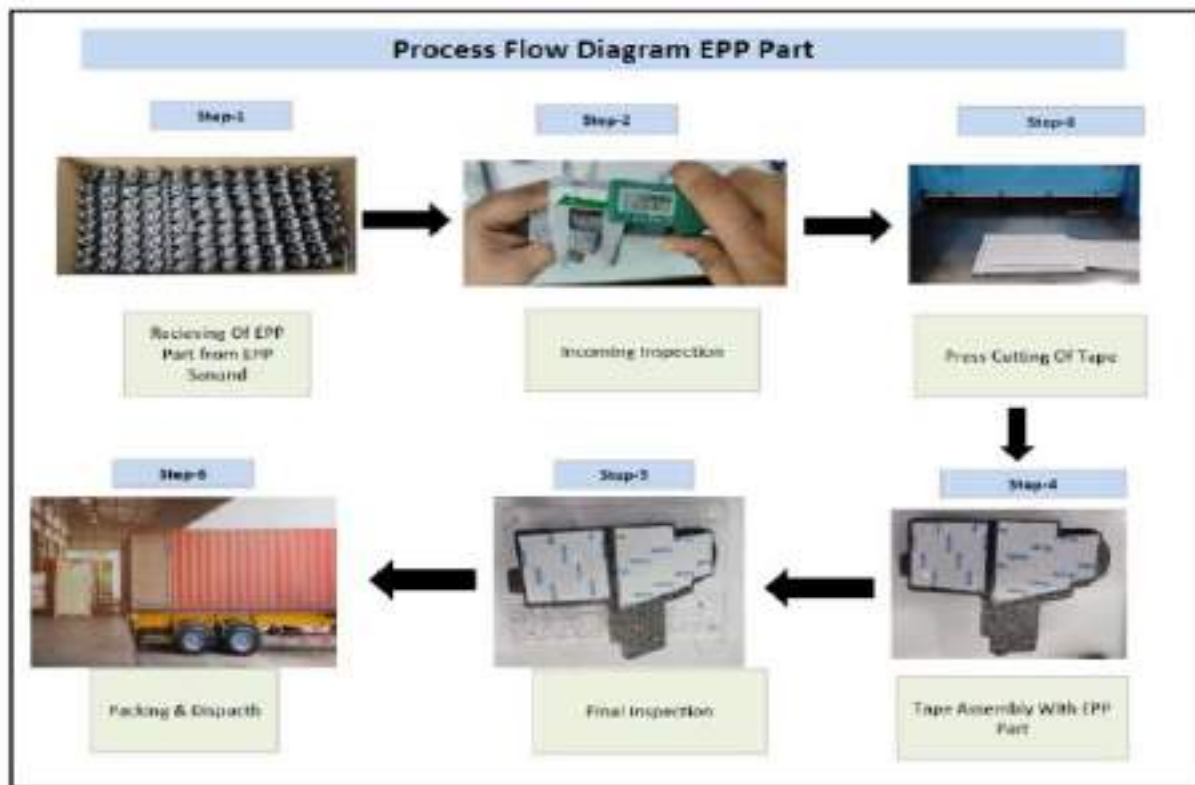

b. BOP parts - EPP molded

Incoming Inspection of EPP Moulded parts, Tape and foam: Procurements of all material from different supplier and quality check such as dimension, density , tensile , compression and adhesive strength

Press Cutting of Tape and Foam: Tape/Foam is cu on hydraulic press through die on desired share for assly on EPP parts

Assly of Tape on EPP moulded parts: Paste the catted Tape on EPP moulded parts through fixture on desired location as per drawing

Final Inspection: Parts dimensions, location of tape and profile check through testing equipment's and gauge

c. Bought Out - PU moulding

Process flow of Pu Moulding: Procurements of ISO, Polyol and TPU film from sub supplier then keep the TPU on mould and pour the mixture of Iso and polyol on mould it will form PU moulded components.

PROCUREMENT OF RAW MATERIALS

CORPORATE SOCIAL RESPONSIBILITY

In line with our vision for sustainable growth and societal development, we have constituted a Corporate Social Responsibility (CSR) Committee as part of our Board. This committee oversees our CSR policy, which follows the requirements of Section 135 of the Companies Act, 2013, and the Companies (Corporate Social Responsibility Policy) Rules, 2014. For further information regarding the composition of our CSR Committee and its responsibilities, see “**Our Management**” beginning on page 291 of this Red Herring Prospectus.

Although our statutory CSR obligation starts from FY 2024-25, we voluntarily started contributing to CSR activities from FY 2023-24 onwards to support social well-being. Our efforts focused on areas like healthcare, education, and social welfare.

We are dedicated to creating a positive impact on society and have consistently supported CSR initiatives, either through donations or direct contributions, as part of this commitment.

CSR Highlights: Community Engagement Initiatives

Tree Plantation Drive:

In partnership with the residents of Valathottam Village, the local government schoolteacher, and 100 students, we launched a tree plantation program benefiting 300 households in the vicinity of Kancheepuram. This initiative provided 300 saplings to households, and we actively participated in the plantation activities. Over the next three years, we will collaborate with the village community and the Panchayat President to ensure proper maintenance of these plantations.

School Support Program:

At the Government School near our Kancheepuram Plant, we conducted a CSR activity focused on promoting safety awareness and educational support. We distributed 100 school bags equipped with essential items like pencils and lunch boxes to students, ensuring a meaningful and lasting impact.

Blood Donation Camps:

We take immense pride in the commitment of our employees to supporting the community. As a part of our CSR initiatives, we organized blood donation camps at our factory sites. These camps saw participation that exceeded our expectations, highlighting the spirit of community and compassion among our workforces. We extend our heartfelt gratitude to the humane blood donors whose life-saving contributions have made a profound impact on the community.

Sellowrap, as part of its CSR initiative in the year 2023-2024, has provided donations to the Academy to provide cricket equipment to the Dream11 Vengsarkar Cricket Academy. This contribution aims to support aspiring young cricketers by equipping them with the necessary resources to enhance their skills and pursue their passion for the sport.

Sellowrap has undertaken an initiative by making donations to the Apna Ghar Foundation. This foundation, established by the Rama Ganesh Charitable Trust on June 10, 2007, in Vasai, Palghar district, Maharashtra, provides critical support to helpless and destitute individuals, often found in harsh and painful conditions on roadsides, near religious and public places.

Through its ashram, "Apna Ghar Ashram," the foundation offers essential services, including medical treatment, food, clothing, and other necessities, delivered with compassion and care. Sellowrap's contribution reflects its commitment to supporting the underprivileged and fostering community welfare.

These initiatives reflect our commitment to driving positive change while aligning with the Sustainable Development Goals, building stronger communities, and promoting environmental sustainability.

The Duty Drawback Scheme is a government initiative under the Customs Act, 1962

The Duty Drawback Scheme is a government initiative established under the Customs Act to refund duties paid on imported or domestically procured inputs used in the production of exported goods. It aims to boost export competitiveness by reimbursing customs and excise duties incurred during manufacturing, thereby reducing the financial burden on exporters. Under this scheme, exporters can claim refunds when goods manufactured with duty paid inputs are exported, provided the export proceeds are realized in foreign exchange within a specified timeframe. The process involves submitting an electronic shipping bill supported by documents such as import invoices and proof of duty payment. The scheme operates through two mechanisms; the all Industry Rate, which offers a standardized refund percentage based on average duty

incidence across sectors, and the Brand Rate, which allows exporters to claim customized rates for specific products. By offsetting input costs, the scheme ensures exporters remain price-competitive in global markets, aligning with broader national objectives to enhance trade and economic growth. Certain restrictions apply, such as exclusions for goods procured duty-free under other export promotion programs. Overall, the Duty Drawback Scheme serves as a critical financial tool to incentivize exports and strengthen India's position in international trade.

IV Sensitivity analysis method

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate and expected salary increase rate. Effect of change in mortality rate is negligible. Please note that the sensitivity analysis presented below may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumption would occur in isolation of one another as some of the assumptions may be correlated.

The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public offers, whichever is later (“UPI Phase II”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public offer from existing 6 working days to 3 working days from the date of the closure of the issue. PHASED IMPLEMENTATION OF UPI FOR BIDS BY INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the "UPI Circulars") in relation to streamlining the process of public offer of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public offer closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public offers, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an Individual Investor had the option to submit the Application Form with any of the Designated Intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public offer closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019, and was to initially continue for a period of three months or floating of five main board public offers, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public offer closure to listing continues to be six working days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023, and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public offer closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Offer is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering the facility of making applications in public offers shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Individual Applicants into the UPI payment mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Book Running Lead Manager.

Pursuant to the SEBI UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the SEBI UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – issue Book Running Lead Manager will be required to compensate the concerned investor.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Offer price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Offer price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.
