Dear Sirs,

Tata Power and Gamesa India enter into a contract for commissioning 100 MW turnkey wind project in Andhra Pradesh

Gamesa India has announced its maiden turnkey project with Tata Power. The 100 MW turnkey project will entail the supply, erection and commissioning of 50 units of G97-2.0 MW T104 wind turbines, specifically designed for low wind markets, at Nimbagallu site in Andhra Pradesh by May 2017. This apart, Gamesa is further contracted to offer long term Operations & Maintenance agreement to ensure smooth functioning of the wind farm.

The Press Release to be issued by the Company is attached for your ready reference.

Yours faithfully,
For The Tata Power Company Limited

Tata Power and Gamesa India enter into a contract for commissioning 100 MW turnkey wind project in Andhra Pradesh

- **This is Gamesa's maiden order with Tata Power and will be commissioned at Nimbagallu site in Andhra Pradesh by May 2017**

Chennai, December 16, 2015. Gamesa India, country's leading renewable energy company, has announced its maiden turnkey project with Tata Power, one of the country's leading Independent Power Producers.

The 100 MW turnkey project will entail the supply, erection and commissioning of 50 units of G97-2.0 MW T104 wind turbines, specifically designed for low wind markets, at Nimbagallu site in Andhra Pradesh by May 2017. This apart, Gamesa is further contracted to offer long term Operations & Maintenance agreement to ensure smooth functioning of the wind farm.

Speaking about the order win **Mr. Ramesh Kymal, Chairman and Managing Director, Gamesa India** said, "We are happy to announce our first project with Tata Power, one of the most prestigious power producers in the country. Not only does this order boost our confidence significantly but also encourages us to continuously offer value for our growing elite client base through innovative tailor made solutions. Having bagged several orders in the last two quarters, some new partnerships and other repeat projects, we are already on track towards achieving the wind targets for 2015 while continuing to maintain our market leadership."

Commenting on the deal, **Mr. Rahul Shah, CEO & Executive Director, Tata Power Renewable Energy Limited said, "We are delighted to be working with Gamesa, a global leader in wind turbine technology, for the 100 MW project at Nimbagallu in Andhra Pradesh. We are encouraged by the progressive policies and renewable energy aspirations of Andhra Pradesh, and will work closely with the nodal agencies for making them a success. In line with our goals for sustainable growth, we look forward to forging a strong, long term partnership with Gamesa that will see us setting up significant wind capacity in coming years."**

About Tata Power Renewable Energy Limited

Tata Power Renewable Energy Ltd. (TPREL) is a wholly owned subsidiary of The Tata Power Company Ltd (Tata Power). TPREL is Tata Power's primary investment vehicle for the clean and renewable energy based power generation capacity. TPREL's present operating capacity is 214 MW, comprising 160 MW wind and 54 MW solar, located in the states of Maharashtra, Gujarat and Rajasthan. In order to aggregate its clean and renewable energy portfolio, Tata Power has initiated the process to carve out around 500 MW of assets from its books to TPREL. TPREL is seeking to grow its portfolio in India and in select international markets through organic and inorganic opportunities.

About Tata Power:

Tata Power is India's largest integrated power company with a growing international presence. The Company together with its subsidiaries and jointly controlled entities has an installed gross generation capacity of [8669] MW and a presence in all the segments of the power sector viz. Fuel Security and Logistics, Generation (thermal, hydro, solar and wind), Transmission, Distribution and Trading. It has successful public-private partnerships in Generation, Transmission and Distribution in India namely "Tata Power Delhi Distribution Limited" with Delhi Vidyut Board for distribution in North Delhi, 'Powerlinks Transmission Ltd.' with Power Grid Corporation of India Ltd. for evacuation of Power from Tala hydro plant in Bhutan to Delhi and 'Maithon Power Ltd.' with Damodar Valley Corporation for a 1050 MW Mega Power Project at

Jharkhand. Tata Power has developed the country's first 4000 MW Ultra Mega Power Project at Mundra (Gujarat) based on super-critical technology. It is also one of the largest renewable energy players in India. Its international presence includes strategic investments in Indonesia through a 30% stake in the leading coal company PT Kaltim Prima Coal (KPC), 26% stake in mines at PT Baramulti Suksessarana Tbk ("BSSR") and a geothermal project; in Singapore through Trust Energy Resources to securitise coal supply and the shipping of coal for its thermal power generation operations; in South Africa through a joint venture called 'Cennergi' to develop projects in South Africa, Botswana and Namibia; in Australia through investments in enhanced geothermal and clean coal technologies and in Bhutan through a hydro project in partnership with The Royal Government of Bhutan. With its track record of technology leadership, project execution excellence, world class safety processes, customer care and driving green initiatives, Tata Power is poised for a multi-fold growth and committed to 'lighting up lives' for generations to come. Gamesa in India

In recent years, India has emerged as one of the most promising wind power markets: installed capacity is expected to increase from close to 23,000 MW today to 40,000 MW by the end of 2019, driven by huge pent-up demand for electricity, according to sector consultancy BTM's estimates.

The new orders obtained by Gamesa in India reinforce its solid commercial positioning: according to MAKE CONSULT, the company ended 2014 as the leading OEM in the country for the second year running, with a market share of 25% in 2014, compared to 21% in 2013, when it also was the market leader.

Gamesa's presence in India - as technology provider and wind farm developer - dates back to 2009. To date, Gamesa has installed over 2,100 MW and services more than 1,700 MW under O&M agreements. In addition, in its capacity as wind farm developer, it has developed over 1300 MW.

About Gamesa (www.gamesacorp.com)

With a track record stretching back 21 years and installation of close to 33,000 MW in 54 countries under its belt, Gamesa has established itself as a world technology leader in the wind power industry. Its end-to-end value chain presence encompasses wind turbine design, manufacture, installation and operations and management (over 20,500 MW). Gamesa is also a global benchmark in the development, construction and sale of wind farms, having installed more than 7,000 MW in Europe, the Americas and Asia.
