PRESS RELEASE

20 MICRONS™
L I M I T E D

Highlights: Q1 - FY'2013-14

The Q1 results of 20 Microns has shown signs of minor reduction in sales turnover and a slight rise in its manufacturing expense. Our company mainly caters in paints, plastic, paper, rubber industries. The sales were mainly impacted as Paint industry went through an abnormal quarter with single digit growth compared to last year's Q1 which was at its peak. The Paper industry saw a sudden inflow of finished Chinese Paper dumping in India causing stress on the local paper production impacting our product consumption. The Plastics industry went through an unusual case of reduced filler loading in the polymer bags manufacturing causing a disruption in the minerals consumption. Our Bhuj manufacturing location went through an unexpected changeover in fuel from coal gasification to Furnace oil as per new government guidelines causing an unprecedented rise in fuel cost. Now we have developed new technology for the same to reduce the fuel costs at its original levels. All these factors together contributed to a weak quarter which is now showing signs of recovery in Q2, which will have a positive impact on our Company.
