Dear sir/Madam,

We wish to intimate that, Our Company has won a big multi-crore order from a leading OEM in Mexico for its Car Visualiser Product. The Car Visualiser product is a unique solution which provides extremely high quality multi-media content for the desktop and more importantly, the mobile market. It is the only product in its class which can deliver high quality multimedia even over low telecom bandwidths. This innovative product is a result of the company's investment in new product development over the last 2 years.

The Company expects many more such order wins in the current financial year.

Thanking You,
For IZMO Ltd
