Mindtree Recognized as a Leader in NelsonHall's Software Testing Services NEAT Report 2016

Demonstrated Testing Services leadership across three categories

Bangalore (India) and Warren (NJ), July 27, 2016 – Mindtree, a leading digital transformation and technology services company, today announced that it has been recognized as an overall leader in software testing services by global research and advisory firm NelsonHall, in its latest Vendor Evaluation and Assessment (NEAT) Report 2016.

The NEAT Report analyzes the overall performance of 24 vendors offering software testing services, with a specific focus on testing capabilities across consulting, digital transformation and efficiency.

Mindtree is a leader in this sector through its specialized testing offerings across a range of solutions including digital, automation, performance engineering and product engineering. Intellectual property investments supporting these offerings as well as the establishment of its end-to-end Dynamic Test Engineering Platform (DTEP) have contributed to the strong rating. This rating reflects Mindtree's expansion of its service portfolio to include innovative offerings around end-user experience measurement, behavior-driven development supporting Agile, Bluetooth testing and IoT.

Dominique Raviart, IT Services Research Director, NelsonHall, said, "Mindtree continues to demonstrate its investment in proprietary automation tools. With DTEP, Mindtree is investing in a DevOps platform, with features including Continuous Integration and Continuous Deployment. This makes DTEP relevant to the digital world."

"Supporting our client's business growth in a dynamic world requires a very smart and agile portfolio of Business Assurance services. Our specialized offerings have enabled us to provide next generation testing services to meet the demands of a hyper-connected world." said Manas Chakraborty, Vice President and Global Head, Business Assurance Services at Mindtree, "We are delighted to be recognized as a leader in the digital & transformation focus areas, and positioned as a leader for overall testing services by NelsonHall."
