

## Kross Limited

### Business Update

### Axle Beam Extrusion Plant Commissioning

- First facility in India for producing seamless, single-piece axle beams for HCVs
- Capacity enhancement by 60% from 5000 units per month to 8000 units per month
- Commercial operations to start from April 2026

**27<sup>th</sup> February 2026**

**Kross Limited (Bloomberg Code: KROSS IN | NSE Code: KROSS | BSE Code: 544253)** is pleased to announce a significant milestone in its manufacturing capabilities with the commissioning of its new Axle Beam Extrusion Plant, which has been commissioned today i.e. 27<sup>th</sup> February 2026. This marks a pioneering milestone as the first such facility in India for producing seamless, single-piece axle beams for heavy commercial vehicles. This capacity addition increases the Company's total axle beam production capacity to **8,000 units per month**, reinforcing its commitment to innovation, operational efficiency, and product reliability in the automotive sector. **The enhanced capacity is expected to be commercially operational by April 2026**

In India, the Axle Beam for Heavy Commercial Vehicles is traditionally a fabricated version that is welded. **This new technology eliminates welding, using seamless tube extrusion to form a single-piece Axle Beam which enhances strength, reduces weight, and improves reliability, aligning with our continued focus on advanced manufacturing and customer needs.**

#### **Production Capacity:**

<b>Particulars</b>	<b>Existing Capacity (units/month) (Welded)</b>	<b>Capacity Addition (units/month) (Seamless)</b>	<b>Total Capacity (units/month) (Total Axles)</b>
Axle Beam	5,000	3,000	<b>8,000</b>

#### **Operational Benefit (FY27):**

With an addition of **3,000 units per month**, the Company anticipates improved production efficiency, reduced component weight, and enhanced strength and reliability for heavy commercial vehicles.

This expansion is projected to support growing demand from Medium & Heavy Commercial Vehicles (M&HCVs), tractors, and off-highway vehicles, thereby contributing to overall revenue growth

#### **Outlook:**

The successful commissioning of this facility underscores Kross Limited's steadfast commitment to adopting innovative technologies and achieving greater self-reliance in critical component manufacturing. With a continued emphasis on operational excellence and long-term stakeholder value creation, the Company remains well-positioned for sustained growth.

## **Commenting on this development, Mr. Sudhir Rai – Chairman & Managing Director said**

“We are delighted to announce the commissioning of our new Axle Beam Extrusion Plant, a first-of-its-kind facility in India, representing a strategic initiative designed to optimize production efficiency while reinforcing our commitment to cutting-edge technology and product reliability. This development aligns seamlessly with our long-term goal of advancing innovative practices in the automotive sector, delivering substantial benefits to the company and its stakeholders.

Our unwavering dedication to quality, workplace safety, operational excellence, and a customer-centric approach positions us favourably for enduring success. We are confident that our continued emphasis on innovation, efficiency, and prudent strategic investments will enable us to address evolving market demands and generate sustainable value for our shareholders.”

## **About the company**

Kross Limited is an integrated automotive component manufacturer with over 3 decades of operating history, it specialises in trailer axles, suspension assemblies, and safety-critical forged, cast and machined components for M&HCVs, tractors, and off-highway vehicles. The company is backward integrated across design, forging, casting, heat treatment, machining, and surface coating, and is among the prominent trailer axle & suspension manufacturers in India. Company is a key supplier to various OEMs, including leading players in the commercial vehicle and tractor segments.
