Dear sirs,

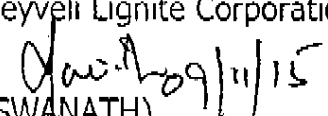

In terms of Clause 36 of the Listing Agreement, we write to inform that the Cuddalore / Neyveli region has been experiencing excessive rainfall since 08th November 2015 with around 200mm of rainfall in the last one day. As per the weather report further down pour and cyclonic storm are expected for the next 24 hours. Neyveli Mines being open cast Mine, the mining activities have been affected due to the above rainfall resulting in lower power generation in all linked Power Stations. Pumping out of excess water from the mines is in progress. Contingency and disaster management plans are in operation and the normalcy in mining operation and power generation is expected to be restored shortly. This is not an unusual occurrence as, this occurs usually during North-east monsoon between October and December every year.

This is for your information and record.

Thanking you,

Yours faithfully,

for Neyveli Lignite Corporation Ltd

(K.VISWANATH)
