BENGALURU, INDIA, APRIL 02, 2025

ABB India delivers integrated automation and digital technology for India's largest pipeline network of IndianOil

- ABB India has delivered automation and digital solutions for IndianOil's cross-country pipeline network
- Spanning over 20,000 km, the pipeline caters to the energy security needs of multiple states in India
- ABB Ability™ SCADA Advantage provides real-time monitoring of pipelines, boosting system availability and securing critical data for better decision-making

ABB India Ltd has successfully delivered an integrated scope of advanced automation and digital solutions for Indian Oil Corporation Ltd.'s (IndianOil) countrywide oil and gas pipeline network. Spanning over 20,000 kilometers across multiple states in India, the network is vital to supporting the country's energy needs, transporting 125 million metric tons of oil and 49 million metric standard cubic meters of gas annually.

ABB's solutions will be at the core of supporting IndianOil's Centralized Pipeline Information Management System (CPIMS). The project involved the design, engineering, supply and commissioning of the ABB Ability™ SCADA Advantage digital platform, which features robust cyber security and disaster recovery systems hosted on the cloud. The scope also included digital solutions for centralized management of IndianOil's pipelines across the country. Additionally, ABB is providing a 10-year ABB Care contract to ensure all existing pipelines are unified under CPIMS and to provide long-term service support for IndianOil's pipeline infrastructure.

"CPIMS has been envisioned to address the complexities associated with the maintenance and operation of the cross-country pipeline network. By leveraging cutting edge technology, this project aims to eliminate manual operations and enhance the efficiency, productivity, and availability of the pipeline network" said Mr. Senthil Kumar N, Director (Pipelines), IndianOil. "At IndianOil, we value our enduring partnership with ABB, which spans over a decade."

“With energy demand growing in line with population increases, ABB is committed to supporting global energy security, while making existing energy systems leaner and cleaner. We are proud to partner with IndianOil on the CPIMS project, which marks a significant leap in pipeline operations’ efficiency, safety, integrity and cyber security,” said G Balaji, Head of ABB Energy Industries in India. “Our advanced SCADA and cyber security solutions support real-time data monitoring and help protect the critical assets of pipeline networks.”

ABB was awarded the CPIMS project contract in February 2024. Within one year, ABB designed and delivered its integrated solutions for managing the pipeline network, which is under commissioning.

ABB is a global technology leader in electrification and automation, enabling a more sustainable and resource-efficient future. By connecting its engineering and digitalization expertise, ABB helps industries run at high performance, while becoming more efficient, productive and sustainable so they outperform. At ABB, we call this ‘Engineered to Outrun’. The company has over 140 years of history and around 110,000 employees worldwide. ABB’s shares are listed on the SIX Swiss Exchange (ABBN) and Nasdaq Stockholm (ABB). www.abb.com

ABB’s Process Automation business automates, electrifies and digitalizes industrial operations that address a wide range of essential needs – from supplying energy, water and materials, to producing goods and transporting them to market. With its ~20,000 employees, leading technology and service expertise, ABB Process Automation helps process, hybrid and maritime industries outrun – leaner and cleaner. go.abb/processautomation

IndianOil is one of the largest and most trusted corporates. The company is among the top-ranked Indian energy PSU in the Fortune 500 rankings, with a Revenue from Operations of ₹8,66,345 crores for the financial year 2023-24. A diversified, integrated energy major, IndianOil has a presence in almost all the streams of oil, gas, petrochemicals, and alternative energy sources. With around 30000-plus workforce, extensive refining, distribution & marketing infrastructure, and advanced R&D facilities, IndianOil touches the lives of over a billion-plus Indians every day through its ever-expanding network of customer touchpoints, currently numbering over 61,000 across the country. The brand’s global aspirations are fulfilled through its strong business forays in Sri Lanka, Mauritius, the UAE, and other countries.
