BENGALURU, INDIA, JULY 30, 2025

Driving digital innovation in city gas: ABB India and THINK Gas announce strategic partnership

- THINK Gas has deployed ABB Ability™ SCADA Advantage system to monitor and control its gas distribution network, which supplies Compressed Natural Gas (CNG) to over 500 fuel stations in India
- ABB's cloud-based automation platform enables centralized price management, gas reconciliation, pressure and flow control, and manpower optimization, resulting in significant cost savings
- By implementing ABB's automation system, THINK Gas says it achieved up to 60 percent reduction in gas distribution operational costs

ABB India Ltd has successfully commissioned its ABB Ability™ SCADA Advantage solution for THINK Gas Pvt. Ltd. (formerly AG&P Pratham), enabling end-to-end automation and digitalization of their City Gas Distribution (CGD) network spanning ten Indian states. The network spans 19 Geographical Areas (GAs) across Andhra Pradesh, Bihar, Himachal Pradesh, Karnataka, Kerala, Madhya Pradesh, Punjab, Rajasthan, Uttar Pradesh, and Tamil Nadu, comprising 500+ CNG stations, approximately 5,50,000 registered DPNG connections, and around 17,000 inch-km of steel pipeline connecting industrial and commercial establishments.

Using ABB's cloud-based automation platform, THINK Gas has centralized operations and real-time visibility of its CGD networks from its control room in Chennai.

“At THINK Gas, we always aim to be at the forefront in adopting global best practices in safety processes, leveraging cutting-edge technology and building robust infrastructure to deliver natural gas to our customers while catering to their diverse energy needs. We are proud to partner with ABB India on this transformative project, ensuring a secure energy supply for millions of Indians,” said Chiradeep Datta, Chief Operating Officer - THINK Gas. “By digitalizing and centralizing our natural gas distribution networks, we have significantly boosted operational efficiency, optimized manpower requirement and leveraged real-time data to make better decisions.”

ABB's SCADA Advantage centralizes and controls the natural gas distribution networks, ensuring efficient energy distribution from the source to end users. The platform enables centralized price management and billing, helps in gas planning and gas reconciliation, pressure and flow control, and improves data accuracy and integrity. With the help of ABB, THINK Gas says it was able to significantly reduce natural gas distribution operational costs, especially operator costs by up to 60 percent. Since implementation, the solution has led to improved process times, enhanced responsiveness and greater control of operational parameters across the CGD network.

“As India scales up its energy initiatives in step with the increasing demand, ABB technology solutions like SCADA Advantage are set to play an important role in achieving operational excellence across the country’s energy value chain,” said G Balaji, SVP of the Energy Industries division at ABB India. “We are proud to lead this effort, having automated and digitalized 80 percent of the country’s City Gas Distribution networks.”

India has announced a commitment to increase natural gas usage, as part of its wider energy mix, to 15 percent by 2030¹. The country has witnessed expansion in its CGD infrastructure over the past decade, supporting the supply of cooking fuel like Piped Natural Gas to households, industrial and commercial units as well as transportation fuel like CNG to vehicles.

ABB is a global technology leader in electrification and automation, enabling a more sustainable and resource-efficient future. By connecting its engineering and digitalization expertise, ABB helps industries run at high performance, while becoming more efficient, productive and sustainable, so they outperform. At ABB, we call this ‘Engineered to Outrun’. The company has over 140 years of history and around 110,000 employees worldwide. ABB’s shares are listed on the SIX Swiss Exchange (ABBN) and Nasdaq Stockholm (ABB). www.abb.com

ABB’s Process Automation business automates, electrifies and digitalizes industrial operations that address a wide range of essential needs – from supplying energy, water and materials, to producing goods and transporting them to market. With its ~20,000 employees, leading technology and service expertise, ABB Process Automation helps process, hybrid and maritime industries outrun – leaner and cleaner. go.abb/processautomation

THINK Gas

The merged entity of AG&P Pratham and THINK Gas, now operating as THINK Gas, is a leading player in the Indian City Gas Distribution (CGD) business. We hold 19 CGD licenses awarded by the Petroleum & Natural Gas Regulatory Board (PNGRB) under the aegis of Ministry of Petroleum and Natural Gas (MoPNG) to exclusively develop CGD infrastructure and provide natural gas across 50 Districts in the 10 states of Andhra Pradesh, Bihar, Himachal Pradesh, Karnataka, Kerala, Madhya Pradesh, Punjab, Rajasthan, Uttar Pradesh and Tamil Nadu.

Our CGD network will supply Compressed Natural Gas (CNG) for use in vehicles as well as Piped Natural Gas (PNG) to domestic households, commercial establishments and industries. Over the next few years, our network will comprise of more than 24,000 inch-km of steel pipelines, 2000+ CNG stations catering to the needs of more than 180 million customers and cover 324,000 square kilometres.

THINK Gas has the largest Foreign Direct Investment (FDI) in greenfield CGD business in India. Our marquee investors include I-Squared Capital, and the Japanese consortium of OSAKA Gas, JOIN, Sumitomo Corporation and Konoike Transport.

We have been recognized for our efforts on various industry forums for our contributions across all business practices – Safety, ESG, Marketing, CRM, Procurement, Sustainability and Risk Management.
