TOXIC TRAIL | **Bullet Train, Metro, & Shivaji Park among pollution-prone sites; M-East ward (Govandi, Mankhurd, Deonar) most polluted; strict rules in force**

129 Hotspots & Counting: City’s air has plenty to worry about

Girish Chitre
MUMBAI

The BMC has identified 129 air pollution hotspots across 17 wards in Mumbai as part of a comprehensive strategy to tackle deteriorating air quality and strengthen enforcement measures at pollution-prone locations.

According to the civic body’s Environment and Climate Change Department, M-East ward accounts for the highest number of identified hotspots at 25, followed by G-South ward with 18.

Major infrastructure projects, including Metro construction, the Mumbai-Ahmedabad Bullet Train, the Goregaon-Mulund Link Road

(GMLR), the Elphinstone Bridge project and ongoing road concreting works, have come under increased scrutiny over their contribution to air pollution.

Construction and demolition activities, road dust, accumulated debris, open burning of garbage and vehicular emissions have been identified as key sources of particulate pollution across the city.

To address these concerns, the BMC has formulated the Air Pollution Control and Enforcement Action Plan-2026, which envisages identifying at least 10 pollution hotspots in every ward, preparing updated location-specific maps and assigning design-

nated officers to oversee pollution mitigation measures.

Among the locations identified are Dharavi in G-North ward and Shivaji Park ground. In G-South ward, the Worli BDD Chawl Redevelopment Project, Metro-3 construction sites, the Nehru Science Centre bridge and several road construction stretches have been brought under the monitoring framework.

The Elphinstone Bridge project and debris storage facilities along Zakaria Bunder Road in Sewri feature among the hotspots in F-South ward. In H-East ward, areas around the Asian Heart Institute in Bandra Kurla Complex and construction

sites associated with the Bullet Train project have also been flagged.

As part of its enforcement strategy, the civic administration intends to implement its existing 28-point pollution-control guidelines for construction and demolition sites more stringently. Dedicated officers will be assigned responsibility for individual hotspots, with regular inspections and punitive action proposed against those found violating prescribed norms.

The effectiveness of the initiative will hinge on measurable improvements in air quality, consistent compliance with pollution-control regulations and sustained enforcement against violators.

M-East Ward
Development works and road concreting for GMLR
T-Ward Eastern Express Highway; 90-Foot Road in Mulund
R-North 5th and 6th railway lines on the Western Railway; Dahisar Transport Hub project
G-North: Shivaji Park
G-South: Worli BDD Chawl Redevelopment Project, Metro-3 works, the Nehru Science Center bridge
F-South Elphinstone Bridge project

Seven RMC plants get 2nd pollution notice

FPJ News Service
MUMBAI

Amid rising air pollution, the BMC’s N Ward issued second warning notices to seven ready-mix concrete (RMC) plants on October 27, giving them seven days to rectify violations or face legal action.

Despite directives issued on October 5, inspections on October 23 revealed lapses in tyre-washing facilities, green-net covers, fogging, water sprinkling and site cleanliness. The plants must submit photographic evidence of compliance.

“The Maharashtra Pollution Control Board (MPCB) has been informed of the violations,” a senior civic official said, warning of strict legal action against non-compliant plants. As of October 22, the BMC had issued 29 stop-work and 270 show-cause notices to construction sites violating pollution guidelines.

₹3.6cr for pre-Diwali road-sweeping drive

FPJ News Service
MUMBAI

The BMC has earmarked Rs15 lakh per ward for an intensive pre-Diwali cleanliness drive from Oct 28 to Nov 7. The drive will target arterial roads and dust-prone stretches through mechanised sweeping, intensive cleaning and water sprinkling. Key stretches include the BKC Connector, SCLR, Eastern and Western Express Highways, JVL, Ghatkopar-Mankhurd Road, SV Road, Link Road, Carter Road and Sion-Mankhurd Road.

The BMC has tasked assistant engineers of solid waste management department with finalising locations and preparing daily action plans in coordination with ward-level Assistant Commissioners.

Officials have been asked to file daily ward-wise reports backed by geo-tagged before-

and-after photographs and video clips to monitor the cleanliness drive. Reports must detail machinery deployment, manpower requirements and waste removal, with zonal engineers tasked with arranging additional resources wherever necessary.

Bio-med waste

The Maharashtra Pollution Control Board has made self-registration on its biomedical waste mobile application and web portal mandatory to maintain accurate, updated information on biomedical waste generators, handlers and treatment facilities across the state. The requirement applies to hospitals, clinics, diagnostic centres, laboratories, blood banks, veterinary institutions, research organisations and all other entities.

Festive rush

Workers prepare traditional Diwali faral at a Prabhadevi workshop as small-scale units across Mumbai work round-the-clock to meet rising demand ahead of the festival – Vijay Gohil

BMC’s ₹18cr road safety plan deferred

Proposal covers 48 accident-prone sites; corporator questions low bid

FPJ News Service
MUMBAI

The BMC’s Rs18-crore road safety project covering 48 accident-prone locations across Mumbai was not taken up at Wednesday’s Standing Committee meeting. The civic body had sought approval to award the contract to a bidder quoting 36% below the estimated cost, raising questions over cost estimates and work quality.

The 48 black spots, identified by the Mumbai Traffic Police, include busy junctions and major traffic corridors where poor road conditions, inadequate pedestrian infrastructure and damaged dividers pose safety risks.

The locations include Amar Mahal Junction, the Eastern Express Highway (EEH)-Jogeshwari-Vikhroli Link Road (JVL) intersection, Sion Circle, King Circle, Saki Naka Junction in Andheri East, Haji Ali Junction, Mith Chowky in Malad, Bindoo Madhav Thackeray Junction in Worli, Mahim Junction and Chheda Nagar Junction.

heavy vehicular and pedestrian movement, with several situated along high-speed corridors and arterial roads connecting different parts of the city. Even minor infrastructure deficiencies at such junctions can endanger motorists and pedestrians. A survey of the black spots revealed uneven road surfaces, inadequate pedestrian space and damaged dividers. Civic officials said, “Stretches of road had uneven surfaces, while pedestrians lacked adequate space to walk safely.” Congress corporator Ashraf Azmi questioned the bidder’s 36% below-estimate quote, warning that it could indicate inflated cost estimates.

Post-Covid strokes among young adults rise by 10-15%

Doctors warn that fewer than 5% of stroke patients reach hospitals within the critical treatment window

Amit Srivastava
MUMBAI

Stroke cases among young adults have reportedly risen 10-15% since Covid-19, increasingly affecting people in their 20s and 30s, Gleneagles Hospital, Parel, doctors said on World Stroke Day. Fewer than 5% of Indian patients reach hospitals within the critical treatment window.

Dr Nitin Dange, Director of Interventional Neurology and Neurosurgery, cited hypertension, diabetes, smoking, alcohol, poor diet, inactivity and stress as risks, noting strokes previously occurred more commonly among people in their 40s and 50s.

About 75-85% of strokes are ischaemic (blocked vessels), while 15-20% are haemorrhagic (brain bleeding). Distinguishing them is essential because clot treatment can worsen bleeding. Eligible patients can receive clot-dissolving drugs within 4.5 hours; selected patients can undergo mechanical thrombectomy within 24 hours.

Rising Threat
Below 5% Patients reaching hospitals in time
7585% Ischaemic strokes
15-20% Haemorrhagic strokes
4.5 hours Window for clot-dissolving drugs
24 hours Thrombectomy window for selected patients
15-20 million Global stroke cases annually
1 in 4 Lifetime stroke risk

Dr Shirish M Hastak, Regional Director of Neurology, Stroke and Neurocritical Care, said 15-20 million people suffer strokes globally annually and one in four will experience one in

their lifetime. He urged blood-pressure monitoring and timely treatment.

On December 1, 2025, Ghatkopar corporate employee Tejal Bhatt, 46, developed left-hand weakness and numbness. Her family reached Gleneagles within 45 minutes. Emergency MRI confirmed a left-brain stroke; thrombolysis followed. Discharged after 12 days, she recovered without disability.

Dr Pankaj Agarwal, Director of Neurology, Stroke and Neurocritical Care, warned against home treatment and urged immediate hospitalisation. CEO Dr Bipin Chevale said the hospital’s Code White protocol mobilises its stroke team for rapid assessment and treatment during emergencies.

Doctors advised people to remember BE FAST to identify warning signs: sudden loss of balance, vision problems, facial drooping, arm weakness and speech difficulties. The final step is time – call an ambulance immediately and reach a stroke-ready hospital without delay.

FDA seizes food worth ₹2.70 lakh

Mumbai: The Maharashtra Food and Drug Administration (FDA) seized 859 kg of food items worth approximately Rs2.70 lakh during inspections across Mumbai on October 27, targeting suspected substandard products, mislabelling and unhygienic storage.

At Yashoda Dairy, officials seized 250.50 kg of milk powder, buffalo milk and paneer valued at Rs76,510. Another 296 kg of broken rice

worth Rs35,520 was seized from Classic Enterprises.

The FDA also seized 72 kg of mohanthal valued at Rs36,000 from Geetanjali Catering Services and 240.50 kg of assorted sweets worth Rs1.22 lakh from Arihant Sweets.

According to the FDA, the assorted sweets are suspected to contain excessive added colouring, prompting further action. The seized food products will undergo scrutiny

under the regulatory process. Officials said the drive aimed to assess food quality and safety, detect violations of standards and check storage conditions and labelling practices. The FDA has been conducting such inspections to identify potentially unsafe food products and initiate action against businesses found violating food safety requirements. The seizures form part of that enforcement effort across the city.

Diwali bonus for BMC staff

Mumbai: The BMC has announced an ex-gratia bonus of Rs33,000 for its officers and employees for Diwali 2026, an increase of Rs2,000 over last year. Mayor Ritu Tawde made the announcement on Wednesday and directed the civic administration to disburse the amount along with November salaries.

A total of 93,509 officers, employees and other eligible workers will benefit. The mayor said group leaders, civic office-bearers and unions unanimously agreed on the amount, considering

the prevailing drought situation in the state.

The beneficiaries include 83,274 full-time officers and employees on regular pay scales, 2,991 teaching and non-teaching staff of aided private primary schools, and 1,145 shikshan sevaks working in BMC and aided private primary schools.

Also eligible are 1,298 teaching and non-teaching employees of aided and unaided secondary schools, 36 shikshan sevaks in secondary schools, and 12 lecturers and non-teaching employees of teacher-training institutes.

Satam alleges supplier nexus in BMC edu dept

FPJ News Service
MUMBAI

Mumbai BJP president and MLA Ameet Satam has alleged a nexus between suppliers and individuals in the BMC education department, demanding that civic schools be equipped with tablets and interactive digital panels from reputed global brands.

In a letter to Mayor Ritu Tawde and BMC Commissioner Ashwini Bhide, Satam alleged that suppliers were providing locally sourced, non-standard devices at inflated prices, leading to complaints over their quality.

He claimed that branded tablets were available at prices comparable to those the BMC had paid for non-standard devices over several years. Satam also alleged that certain suppliers enjoyed a monopoly, while some individuals indirectly controlled the depart-

ment’s functioning. He linked these individuals to the drafting of the school plot public-private partnership (PPP) policy, which was subsequently cancelled.

Satam urged the civic body to procure devices from globally reputed manufacturers that also produce in India, in line with the Centre’s Make in India initiative. He said this would ensure reliable after-sales service and improve students’ digital learning experience.

The BMC introduced its tablet distribution scheme in 2015 to promote digital learning in civic schools. The initiative continued until 2018 before resuming in 2021-22.

In 2017-18, the civic body procured 18,078 tablets, along with maintenance support, for Class 9 students. The devices had a stipulated lifespan from February 2018 to February 2023.
