PSBs Recover ₹6.4 L cr of NPAs, Written-off Loans Since FY15

Provision coverage ratio of the banks has improved to 86.9% at end of March 2022

Our Bureau

New Delhi: The public sector banks (PSBs) have recovered ₹6.4 lakh crore of non-performing loans and written-off loans since FY15 and filed suits against 39.5% of wilful defaulters, data available with the government showed.

Due to FY16 to FY21, the government has infused ₹3.36 lakh crore of capital in PSBs while the banks themselves have raised an additional ₹2.96 lakh crore from the market.

The provision coverage ratio of the PSBs, a measure of health that captures amounts set aside to cover bad loans, has improved to 86.9% at the end of March 2022 from 85% at the end of March 2015. The state-run banks have recovered ₹5.17 lakh crore in non-performing assets (NPAs) and ₹1.24 lakh crore in written-off accounts since FY15.

The gross NPA ratio of PSBs has fallen from 14.5% on March 31, 2016, to 7.4% on March 31, 2022, while the net NPA ratio

declined from 8% to 2% over the period. Stressed assets are down from 15.3% to 6.7%.

"Banks continue to pursue recovery actions initiated in written-off accounts through various recovery mechanisms available," a senior government official said.

These include recovery suits in civil courts or Debt Recovery Tribunals, action under the Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002, cases in the National Company Law Tribunal under the Insolvency and Bankruptcy Code, 2016, or through negotiated settlement compromise, and through the sale of NPAs.

The occurrence of fraud as a proportion of the gross advances of PSBs dropped from a peak of 1.38% during the financial year 2013-14 to 0.65% during the financial year 2021-22.

The improved detection and reporting accompanied with the comprehensive steps taken to check frauds have resulted

in a decline in the occurrence of such frauds," the above-quoted official added. Out of 12,265 designated wilful defaulters as of March 31, 2022, suits have been filed against 12,076 (98.5%). FIRs have been lodged against 6,12% and SARFAESI action in listed against 25.2%.

"The government has further provided a conducive business environment and healthy competition which has encouraged private sector banks to flourish in the country," the official said pointing to the fall in the share of PSBs in gross advances from 74.29% in 2011-12 to 58.34% in 2021-22.

There has been a further decline in the NPA ratio for the banking system from 7.61% in Q1 FY22 to 6.96% in Q1 FY23 which is a drop of around 85 bps, according to a research report by the Bank of Baroda. In the case of PSBs the ratio has come down from 9.39% in June 2021 to 7.18% which is a drop of 221 bps, the report said noting that PSBs had a share of almost 60% in NPAs, which has not changed much since last year.

IOC, HPCL, BPCL Log ₹18,480 cr Q1 Loss on Holding Fuel Prices

Press Trust of India

New Delhi: State-owned Indian Oil Corporation (IOC), Hindustan Petroleum Corporation Ltd (HPCL) and Bharat Petroleum Corporation Ltd (BPCL) posted a combined loss of ₹18,480 crore on holding petrol and diesel prices despite rise in cost.

According to stock exchange filings by the three fuel retailers, the losses were due to erosion in the marketing margin on petrol, diesel and domestic LPG.

This wiped away gains from the record refining margin. IOC, HPCL and BPCL, which are supposed to revise petrol and diesel prices daily in line with cost, have not changed prices for four months now despite global oil prices shooting up.

They have also not changed cooking gas LPG rates in tandem with cost. IOC on July 29 reported a net loss of ₹3,965.3 crore for April-June quarter.

On Saturday HPCL reported its highest ever quarterly loss of ₹10,999.9 crore and BPCL posted a loss of ₹2,514.8 crore. The combined loss at ₹18,480 crore is the highest ever for any quarter including the era when petrol and diesel prices were regulated and the government used to give sub-

sidies to the three retailers.

During April-June, IOC, HPCL and BPCL did not receive petrol and diesel prices in line with rising costs to help the government contain inflation which had topped 7 percent.

The basket of crude oil India imports during the quarter averaged USD 109 per barrel but the retail pump rates were aligned to about USD 85-86 a barrel cost. While the government has maintained that oil companies are free to revise retail prices, the three state-owned firms haven't explained the reasons for freezing the retail prices.

Typically, oil companies calculate a refinery gate price based on import parity rates. But if the marketing division sells at a price less than import parity, a squeeze is booked.

State fuel retailers are supposed to align prices with an international cost every day. But they have periodically frozen prices before crucial elections.

IOC, BPCL and HPCL stopped revising rates ahead of assembly elections in states like Uttar Pradesh last year. That 27-day freeze ended in late March with prices being raised by ₹10 per litre each before another round of freeze came in force in early April.

This is despite international

oil prices soaring to multi-year high on supply concerns following Russia's invasion of Ukraine. The government in May cut excise duty on petrol and diesel which was passed on to consumers instead of be-

ing used to square off mounting losses on the two fuel sales. The current freeze on petrol and diesel prices, excluding the reduction due to a cut in excise duty, is now 120 days old.

STERLING GENERATORS

POWERING THE FUTURE TOGETHER.

Powering critical infrastructure and industries, Sterling generators powered by Baudouin diesel engines provides reliable, hassle-free power backup across the Data Centers, Infrastructure projects (roads, tunnels, metros, airports), Warehouse and cold storages, Healthcare, Residential/Commercial reality, IT parks, Malls, Manufacturing sectors. So your world functions the way it should, with trust and efficiency.

Product Range: 250 kVA - 4000 kVA

- Engine cooling systems comply to 50° C
- Best in class power-to-weight ratio
- High Pressure Common Rail (HPCR) system ensuring best in class fuel efficiency
- Advanced electronic platform engines compliant to CPCB II emission norms and future ready for CPCB IV+
- Standard warranty 2 years/5000 hrs and 5 years / 5000 hrs warranty coverage for 5C (Cylinder Block, Crankshaft, Camshaft, Con Rod and Cylinder Head)

China's Trade Surplus at Record as Exports Beat Expectations

Beijing: China's trade surplus rose to a record as exports grew faster than expected, easing some concerns over rising global demand and providing support for an economy battling periodic Covid outbreaks and property woes.

The nation's trade balance climbed to about \$100 billion in July, surpassing the previous record set in June, according to government figures released Sunday. That's the highest in data compiled since 1987.

Exports in dollar terms grew 10% from a year earlier, beating economists' estimates for a 14.1% gain.

"The strong export growth continues to help China's economy in a difficult year as domestic demand remains sluggish," said Zhang Zhiwei, president and chief economist at Shanghai Asset Management.

Robust growth boosts confidence in the yuan exchange rate, which helps deter capital outflows, he said.

China's imports rose by 2.5%, compared with a 1% gain in June. That was lower than the median estimate for an increase of 4%, indicating weak domestic demand. Inbound shipments of commodities including soybeans, natural gas and copper declined on a monthly basis. Crude oil imports climbed, however.

NEW RECORD
China's trade balance climbed to \$101b in July, surpassing the previous record set in June

China Eases Rules for International Covid Flight Suspensions

Beijing: China has shortened the length of suspensions for inbound airline flights carrying passengers infected with Covid-19, the latest sign that the nation may be ready to ease virus-control measures for international travellers.

Authorities changed the suspended circuit-breaker mechanism for air traffic, cutting to one week the period that incoming flights will be suspended if they carry five Covid-positive passengers, or 4% of the total, according to a statement printed on the website of the Civil Aviation Administration of China.

'Nearly 85% of Indian Children Cyberbullied'

New Delhi: Around 85% of Indian children have reported being cyberbullied as well as having cyberbullied someone else at rates well over twice the international average, according to a McAfee Cyberbullying report released on Sunday. Cyberbullying includes racism, trolling, personal attacks and sexual harassment, among others.

The survey was conducted between June 15 to July 5 covering 1,600 parents and their children across 10 countries. "Cyberbullying in India reaches alarming heights as more than one in three kids face cyber racism, sexual harassment, and threats of physical harm as early as the age of 10," making India the number one nation for reported cyberbullying in the world," McAfee chief product officer Gagan Singh said in the report. —PTI

Irdai's Grievance Redressal Portal to be Revamped

New Delhi: Insurance regulator Irdai will soon launch a revamped grievance redressal mechanism to make complaint redressal more efficient with the option of customers filing their complaints in regional languages. The Integrated Grievance Redressal System (IGRS), launched in 2011, is being up-graded to make it more convenient for customers. It is to be renamed as Bharat Grievance Redressal System (BGRS), sources said.

The new portal will not only be a gateway for registering and tracking grievances online but also act as an industry-wide grievance repository for the Insurance Regulatory and Development Authority of India (IRDAI) to monitor disposal of grievances by insurance companies, the sources said. —PTI

Rahul, Priyanka detained as Cong protests price rise

Party stages demonstrations across country; Houses adjourned amid ruckus

ADITI PHADNIS
New Delhi, 5 August

Orders of Congress leaders, including Rahul Gandhi, Priyanka Gandhi Vadra and leader of Opposition in the Rajya Sabha, Mallikarjun Kharge, all wearing black, were on Friday detained as they protested against inflation and Goods and Services Tax (GST) in Delhi and across the country. They were released after about six hours.

The police dragged Priyanka away from barricades erected near the Congress office at 24 Akbar Road in Delhi and showed her into a van as she said: "The government thinks it can silence us. It thinks that by showing its force, it can make us quietly sit in buses... But we have a purpose," she said.

She told reporters that high prices were pushing people into desperation, and the Narendra Modi government "had distributed largesse to all his friends". She could be seen arguing with the police who urged her to end the protest and go home as no permission had been given for the demonstration. However, she hurried down on the road and refused to move.

Elsewhere in the country, the police used water cannons to disperse protests. In Chandigarh, Punjab and

Congress leader Priyanka Gandhi during a protest as part of the party's nationwide protest over price rise, GST hike on essential items, and unemployment in New Delhi on Friday. PHOTO: PTI

Haryana, Congress members were drenched with water as they marched towards Raj Bhavans. In Mumbai, Congress leaders were detained at the Azad Maidan police station.

Congress MPs created a ruckus in both Houses of Parliament over the alleged misuse of probe agencies and the government "ignoring people's issues". Proceedings were adjourned in both Houses. Clad in black, Congress president Sonia Gandhi led party MPs out of Parliament, as Rahul Gandhi and other MPs shouted slogans. As the MPs proceeded towards Rashtrapati Bhavan, they were bundled into buses. Gandhi and some of his colleagues were taken to the Kingsway Camp police station and

released later.

Before Parliament started, Rahul held a press conference at 9.30 am to attack the Modi government. "What India has built brick by brick, starting almost a century ago, is being destroyed in front of your eyes. Anybody who stands up against this idea of dictatorship is viciously attacked, jailed, arrested and beaten up," he said. "Prices of everything are going up. But the Finance Minister seems unable to see this. Maybe she's been told: 'Just keep talking. Go to any village, town, and they'll tell you high prices is the central livelihood issue. The reality is one thing, and the perception is another. The government is trying to create a perception that everything is ok'."

Shah: Protests send anti-Ram temple message

Home Minister Amit Shah on Friday linked Congress leaders' protest in black clothes over the issues of price rise and unemployment to the party's "appeasement" politics to convey its opposition to the Ram temple foundation laying by Prime Minister Narendra Modi on this day in 2020. PTI

Rahul said institutions were being undermined. "The opposition fights in a democracy on the basis of having institutions back it. The judicial structure, electoral structure, media... the opposition stands on the basis of these institutions. All of them have been captured by the government. No institution in India is independent."

"There is financial monopoly and institutional monopoly, that is why the opposition is not effective," he said. On BJP's claim that they have been winning elections, he said, "Hitler also used to win elections. He had the entire institutional structure with him. Give me the power on the institutions and I will show you how elections are won."

Govt: US, Australia among 6 countries interested in Tejas

The US, Australia, Indonesia, and the Philippines are among six countries, which have shown interest in India's Tejas aircraft, while Malaysia has already shortlisted the jet under its acquisition programme, the government said on Friday. The other two countries that have evinced interest in the aircraft are Argentina and Egypt, according to Minister of State for Defence Ajay Bhatt. Tejas, manufactured by Hindustan Aeronautics, is a single-engine multi-role fighter aircraft capable of operating in high-threat air environments. PTI

MONSOON SESSION IN THE HOUSE

Railways provided 350K jobs since '14

The Indian Railways had provided employment to 350,204 people so far between 2014 and 2022 and the Ministry of Railways said on Friday. The railways had recruited 14,000 more in 2020-21 and 14,000 more in 2021-22. Railway Minister Ashwini Vaishnaw told the Rajya Sabha. He also said in this year alone 18,000 jobs had been provided. PTI

Bill to strengthen antitrust watchdog tabled in Lok Sabha

The Competition (Amendment) Bill, which seeks structural changes in the governing structure of the Competition Commission of India (CCI), was introduced in the Lok Sabha on Friday. Minister of State for Corporate Affairs Ravi Shankar Prasad introduced the Bill. The bill seeks to amend the provisions to allow the CCI to address the needs of new-age markets. The CCI has in recent times ordered probes and passed orders over alleged unfair business practices in the growing digital market. The New Delhi International Arbitration Centre (Amendment) Bill was also introduced in the Lok Sabha. PTI

FROM PAGE 1

Modi, CMs..

According to sources, discussions on urban governance are likely to include tax reforms which help in raising revenue-generating powers of urban local bodies like municipal corporations and councils, thus making them more financially independent.

It will be the first in-person meeting between Prime Minister Narendra Modi and chief ministers on a common platform since July 2019. The last governing council meeting, in February 2021, was held virtually on account of the pandemic.

Modi during his stint as chief minister of Gujarat was trying to understand what needs to be done to bring them in. "We are looking at whatever disability they have in manufacturing in India and what other access, such as market aggregation, they require to make them invest in India. It is an area of focus," he said.

The PM and CMs are also expected to devote considerable time to agriculture and related subjects, including measures to lower import dependency on several food items. On the National Education Policy (NEP), the official statement said that the implementation of NEP-school education and NEP-higher education could be discussed separately. The success of the NEP depends on the active participation and cooperation of states as education largely falls within the domain of state governments. Also, the NEP has been a contentious issue with some southern states, such as Tamil Nadu, which has declined to implement it on the grounds that its education system and standards are far ahead of the requirement mentioned in the NEP. In the case of crop diversification, too, states have to play a dominant role as agriculture is predominantly a state subject. Here too, the emphasis will be on key cereal-growing

states of Punjab, Haryana, UP, MP, and a few others diversifying from wheat and rice towards more lucrative and in-demand crops, such as pulses and oilseeds. It has been learnt.

Meity looks..

However, these companies have shown interest in shifting part of their capacity at least to India. Apple has already done this for mobile devices. "We believe now that there is a tremendous interest from these companies and others to move some of the production to India and we are engaged with them and we would definitely want to welcome them," said Chandrasekhar.

He said the government is trying to understand what needs to be done to bring them in. "We are looking at whatever disability they have in manufacturing in India and what other access, such as market aggregation, they require to make them invest in India. It is an area of focus," he said. "Disability" is a reference to the gap between the cost of production in India and the cost in countries like China and Vietnam. The aim is substantially to reduce it as was done in mobile devices through the incentive scheme. HP and Dell are already eligible players under the existing PLI scheme for IT hardware. When contacted, Dell said it could not comment as it was in a "silent period". Apple did not respond to the query.

HP India MD Ketan Patel said: "We are discussing various initiatives with the government to increase local value addition in manufacturing. HP has been manufacturing in India since 2006 and last year, we significantly expanded our manufacturing operations in India, adding a whole range of laptops." Chandrasekhar pointed out that once the national data centre policy is implemented, the cloud in India will grow, as will demand for servers, PCs

and laptops. The government is also looking at creating a secured government cloud in an innovative way and that will also drive demand for IT hardware.

The move is significant as India has been heavily dependent on IT hardware through imports and most of them are from China. According to the latest numbers released by the India Cellular & Electronics Association, imports of laptops and tablet categories to India have seen a sharp 50 per cent increase in the April-June quarter from ₹600 crore in 2020-21 to ₹1,000 crore in 2021-22. Also, a study undertaken by EY pegged the total market for laptops in India in 2019-20 at \$4.85 billion out of which imports accounted for 86 per cent of the market at \$4.21 billion. The domination of Chinese imports is reflected in the fact that the market value of its imports was \$3.65 billion.

Mahindra..

The business leader, who's active on social media, stated that the government is trying to do its bit. "It has announced plans to hire 1 million in government jobs by 2023. Given that we have a 900-million-strong workforce, there's a lot more to do," he said.

The Indian unemployment rate is hovering around 7.8 per cent, he said citing data from CMIE. "This is because job growth has not kept pace with GDP growth," he said. Mahindra raised the issue of employability too. Only 40 per cent of the labour force that is capable of working is actually working or looking for work, he said. In contrast, the labour participation rate is more than 60 per cent in the US, he added. Job creation is happening mainly at the lower end of the economy - drivers for Uber delivery for Zomato, that sort of thing in the private sector, he emphasised. "This is not nearly

enough," said Mahindra, adding that the manufacturing needs to be boosted to create jobs on a mass scale and to take advantage of the global factors that are moving in India's favour. Like most of the manufacturing firms, MKM has been at the receiving end of the supply chain disruption. This has been one of the key reasons for the long waiting period for delivery of vehicles. The availability of semiconductors had slowed down to a trickle, he said. On Friday, MKM reported a revenue of ₹9,617 crore for its standalone business, up 67 per cent year-on-year for the June quarter. Its profit after tax was ₹1,430 crore, up 67 per cent YoY.

Elaborating on supply chain issues, he said, "those lamenting the demise of a global supply network are ignoring the fact that the disruption is in the China-dominated global supply network rather than in the true global supply chain."

"Unshackling ourselves from China is a good development for the rest of the world and long overdue. Nature abhors a vacuum, and other countries, including ours, will rush to fill it." Around 60 per cent of companies and 82 per cent of manufacturers now report their production slowed during the present outbreak, due to lack of employees, inability to obtain supplies, or explicit factory halts resulting from the lockdowns, he said. Companies have learnt the hard way that it is crucial to keep monitoring the supply chain situation, to keep a finger on the pulse and get early signals of any possible disruptions, Mahindra said. "This points to the need for greater digitisation and reliable monitoring software, including perhaps blockchain." He expressed confidence that capital will flow from the West "as global interest in supporting the economically strong India grows".

Mahindra..

The business leader, who's active on social media, stated that the government is trying to do its bit. "It has announced plans to hire 1 million in government jobs by 2023. Given that we have a 900-million-strong workforce, there's a lot more to do," he said.

The Indian unemployment rate is hovering around 7.8 per cent, he said citing data from CMIE. "This is because job growth has not kept pace with GDP growth," he said. Mahindra raised the issue of employability too. Only 40 per cent of the labour force that is capable of working is actually working or looking for work, he said. In contrast, the labour participation rate is more than 60 per cent in the US, he added. Job creation is happening mainly at the lower end of the economy - drivers for Uber delivery for Zomato, that sort of thing in the private sector, he emphasised. "This is not nearly

enough," said Mahindra, adding that the manufacturing needs to be boosted to create jobs on a mass scale and to take advantage of the global factors that are moving in India's favour. Like most of the manufacturing firms, MKM has been at the receiving end of the supply chain disruption. This has been one of the key reasons for the long waiting period for delivery of vehicles. The availability of semiconductors had slowed down to a trickle, he said. On Friday, MKM reported a revenue of ₹9,617 crore for its standalone business, up 67 per cent year-on-year for the June quarter. Its profit after tax was ₹1,430 crore, up 67 per cent YoY.

Elaborating on supply chain issues, he said, "those lamenting the demise of a global supply network are ignoring the fact that the disruption is in the China-dominated global supply network rather than in the true global supply chain."

"Unshackling ourselves from China is a good development for the rest of the world and long overdue. Nature abhors a vacuum, and other countries, including ours, will rush to fill it." Around 60 per cent of companies and 82 per cent of manufacturers now report their production slowed during the present outbreak, due to lack of employees, inability to obtain supplies, or explicit factory halts resulting from the lockdowns, he said. Companies have learnt the hard way that it is crucial to keep monitoring the supply chain situation, to keep a finger on the pulse and get early signals of any possible disruptions, Mahindra said. "This points to the need for greater digitisation and reliable monitoring software, including perhaps blockchain." He expressed confidence that capital will flow from the West "as global interest in supporting the economically strong India grows".

Rahul, Priyanka detained as Cong protests price rise

Party stages demonstrations across country; Houses adjourned amid ruckus

ADITI PHADNIS
New Delhi, 5 August

Hordes of Congress leaders, including Rahul Gandhi, Priyanka Gandhi Vadra and leader of Opposition in the Rajya Sabha, Mallikarjun Kharge, all wearing black, were on Friday detained as they protested against inflation and Goods and Services Tax (GST) in Delhi and across the country. They were released after about six hours.

The police dragged Priyanka away from barricades erected near the Congress office at 24 Akbar Road in Delhi and showed her into a van as she said: "The government thinks it can silence us. It thinks that by showing its force, it can make us quietly sit in buses... But we have a purpose," she said.

She told reporters that high prices were pushing people into desperation, and the Narendra Modi government "had distributed largesse to all his friends". She could be seen arguing with the police who urged her to end the protest and go home as no permission had been given for the demonstration. However, she hurried down on the road and refused to move.

Elsewhere in the country, the police used water cannons to disperse protests. In Chandigarh, Punjab and

Congress leader Priyanka Gandhi during a protest as part of the party's nationwide protest over price rise, GST hike on essential items, and unemployment in New Delhi on Friday

Haryana, Congress members were drenched with water as they marched towards Raj Bhavans. In Mumbai, Congress leaders were detained at the Azad Maidan police station.

Congress MPs created a ruckus in both Houses of Parliament over the alleged misuse of probe agencies and the government "ignoring people's issues". Proceedings were adjourned in both Houses. Clad in black, Congress president Sonia Gandhi led party MPs out of Parliament, as Rahul Gandhi and other MPs shouted slogans. As the MPs proceeded towards Rashtrapati Bhavan, they were bundled into buses. Gandhi and some of his colleagues were taken to the Kingsway Camp police station and

released later.

Before Parliament started, Rahul held a press conference at 9.30 am to attack the Modi government. "What India has built brick by brick, starting almost a century ago, is being destroyed in front of your eyes. Anybody who stands up against this idea of onset of dictatorship is viciously attacked, jailed, arrested and beaten up," he said. "Prices of everything are going up. But the Finance Minister seems unable to see this. Maybe she's been told: 'Just keep talking. Go to any village, town, and they'll tell you high prices is the central livelihood issue. The reality is one thing, and the perception is another. The government is trying to create a perception that everything is ok'."

Shah: Protests send anti-Ram temple message

Home Minister Amit Shah on Friday linked Congress leaders' protest in black clothes over the issues of price rise and unemployment to the party's "appeasement" politics to convey its opposition to the Ram temple foundation laying by Prime Minister Narendra Modi on this day in 2020.

Rahul said institutions were being undermined. "The opposition fights in a democracy on the basis of having institutions back it. The judicial structure, electoral structure, media... the opposition stands on the basis of these institutions. All of them have been captured by the government. No institution in India is independent."

"There is financial monopoly and institutional monopoly, that is why the opposition is not effective," he said. On BJP's claim that they have been winning elections, he said, "Hitler also used to win elections. He had the entire institutional structure with him. Give me the power on the institutions and I will show you how elections are won."

Govt: US, Australia among 6 countries interested in Tejas

The US, Australia, Indonesia, and the Philippines are among six countries, which have shown interest in India's Tejas aircraft, while Malaysia has already shortlisted the jet under its acquisition programme, the government said on Friday. The other two countries that have evinced interest in the aircraft are Argentina and Egypt, according to Minister of State for Defence Ajay Bhatt. Tejas, manufactured by Hindustan Aeronautics, is a single-engine multi-role fighter aircraft capable of operating in high-threat air environments.

MONSOON SESSION IN THE HOUSE

Railways provided 350K jobs since '14

The Indian Railways had provided employment to 350,204 people so far between 2014 and 2022 and the Ministry of Railways was currently under way, Railway Minister Ashwini Vaishnaw told the Rajya Sabha. He also said in this year alone 18,000 jobs had been provided.

Bill to strengthen antitrust watchdog tabled in Lok Sabha

The Competition (Amendment) Bill, which seeks structural changes in the governing structure of the Competition Commission of India (CCI), was introduced in the Lok Sabha on Friday. Minister of State for Corporate Affairs Ravi Shankar Prasad introduced the Bill. The bill seeks to amend the Competition Act, 2002 to strengthen the CCI. The bill also seeks to amend the Competition Act, 2002 to strengthen the CCI. The bill also seeks to amend the Competition Act, 2002 to strengthen the CCI.

FROM PAGE 1

Modi, CMs..

According to sources, discussions on urban governance are likely to include tax reforms which help in raising revenue-generating powers of urban local bodies like municipal corporations and councils, thus making them more financially independent.

It will be the first in-person meeting between Prime Minister Narendra Modi and chief ministers on a common platform since July 2019. The last governing council meeting, in February 2021, was held virtually on account of the pandemic.

Modi during his stint as chief minister of Gujarat is trying to understand what needs to be done to bring them in. "We are looking at whatever disability they have in manufacturing in India and what other access, such as market aggregation, they require to make them invest in India. It is an area of focus," he said.

The PM and CMs are also expected to devote considerable time to agriculture and related subjects, including measures to lower import dependency on several food items. On the National Education Policy (NEP), the official statement said that the implementation of NEP-school education and NEP-higher education could be discussed separately. The success of the NEP depends on the active participation and cooperation of states as education largely falls within the domain of state governments. Also, the NEP has been a contentious issue with some southern states, such as Tamil Nadu, which has declined to implement it on the grounds that its education system and standards are far ahead of the requirement mentioned in the NEP. In the case of crop diversification, too, states have to play a dominant role as agriculture is predominantly a state subject. Here too, the emphasis will be on key cereal-growing

states of Punjab, Haryana, UP, MP, and a few others diversifying from wheat and rice towards more lucrative and in-demand crops, such as pulses and oilseeds. It has been learnt.

Meity looks..

However, these companies have shown interest in shifting part of their capacity at least to India. Apple has already done this for mobile devices. "We believe now that there is a tremendous interest from these companies and others to move some of the production to India and we are engaged with them and we would definitely want to welcome them," said Chandrasekhar.

He said the government is trying to understand what needs to be done to bring them in. "We are looking at whatever disability they have in manufacturing in India and what other access, such as market aggregation, they require to make them invest in India. It is an area of focus," he said. "Disability" is a reference to the gap between the cost of production in India and the cost in countries like China and Vietnam. The aim is substantially to reduce it as was done in mobile devices through the incentive scheme. HP and Dell are already eligible players under the existing PLI scheme for IT hardware. When contacted, Dell said it could not comment as it was in a "silent period". Apple did not respond to the query.

HP India MD Ketan Patel said: "We are discussing various initiatives with the government to increase local value addition in manufacturing. HP has been manufacturing in India since 2006 and last year, we significantly expanded our manufacturing operations in India, adding a whole range of laptops." Chandrasekhar pointed out that once the national data centre policy is implemented, the cloud in India will grow, as will demand for servers, PCs

and laptops. The government is also looking at creating a secured government cloud in an innovative way and that will also drive demand for IT hardware.

The move is significant as India has been heavily dependent on IT hardware through imports and most of them are from China. According to the latest numbers released by the India Cellular & Electronics Association, imports of laptops and tablet categories to India have seen a sharp 50 per cent increase in the April-June quarter from 76,000 crore in 2021-22 to 1,10,000 crore in 2022-23. Also, a study undertaken by EY pegged the total market for laptops in India in 2019-20 at \$4.85 billion out of which imports accounted for 86 per cent of the market at \$4.21 billion. The domination of Chinese imports is reflected in the fact that the market value of its imports was \$3.65 billion.

Mahindra..

The business leader, who's active on social media, stated that the government is trying to do its bit. "It has announced plans to hire 1 million in government jobs by 2023. Given that we have a 900-million-strong workforce, there's a lot more to do," he said.

The Indian unemployment rate is hovering around 7.8 per cent, he said citing data from CMIE. "This is because job growth has not kept pace with GDP growth," he said. Mahindra raised the issue of employability too. Only 40 per cent of the labour force that is capable of working is actually working or looking for work, he said. In contrast, the labour participation rate is more than 60 per cent in the US, he added. Job creation is happening mainly at the lower end of the economy - drivers for Uber delivery for Zomato, that sort of thing in the private sector, he emphasised. "This is not nearly

enough," said Mahindra, adding that the manufacturing needs to be boosted to create jobs on a mass scale and to take advantage of the global factors that are moving in India's favour. Like most of the manufacturing firms, MKM has been at the receiving end of the supply chain disruption. This has been one of the key reasons for the long waiting period for delivery of vehicles. The availability of semiconductors had slowed down to a trickle, he said. On Friday, MKM reported a revenue of ₹9,617 crore for its standalone business, up 67 per cent year-on-year for the June quarter. Its profit after tax was ₹1,430 crore, up 67 per cent YoY.

Elaborating on supply chain issues, he said, "those lamenting the demise of a global supply network are ignoring the fact that the disruption is in the China-dominated global supply network rather than in the true global supply chain."

"Unshackling ourselves from China is a good development for the rest of the world and long overdue. Nature abhors a vacuum, and other countries, including ours, will rush to fill it." Around 60 per cent of companies and 82 per cent of manufacturers now report their production slowed during the present outbreak, due to lack of employees, inability to obtain supplies, or explicit factory halts resulting from the lockdowns, he said. Companies have learnt the hard way that it is crucial to keep monitoring the supply chain situation, to keep a finger on the pulse and get early signals of any possible disruptions, Mahindra said. "This points to the need for greater digitisation and reliable monitoring software, including perhaps blockchain." He expressed confidence that capital will flow from the West "as global interest in supporting the economically strong India grows".

Rahul, Priyanka detained as Cong protests price rise

Party stages demonstrations across country; Houses adjourned amid ruckus

ADITI PHADNIS

New Delhi, 5 August

Hordes of Congress leaders, including Rahul Gandhi, Priyanka Gandhi Vadra and leader of Opposition in the Rajya Sabha, Mallikarjun Kharge, all wearing black, were on Friday detained as they protested against inflation and Goods and Services Tax (GST) in Delhi and across the country. They were released after about six hours.

The police dragged Priyanka away from barricades erected near the Congress office at 24 Akbar Road in Delhi and showed her into a van as she said: "The government thinks it can silence us. It thinks that by showing its force, it can make us quietly sit in buses... But we have a purpose," she said.

She told reporters that high prices were pushing people into desperation, and the Narendra Modi government "had distributed largesse to all his friends". She could be seen arguing with the police who urged her to end the protest and go home as no permission had been given for the demonstration. However, she hurried down on the road and refused to move.

Elsewhere in the country, the police used water cannons to disperse protests. In Chandigarh, Punjab and

Congress leader Priyanka Gandhi during a protest as part of the party's nationwide protest over price rise, GST hike on essential items, and unemployment in New Delhi on Friday

Shah: Protests send anti-Ram temple message

Home Minister Amit Shah on Friday linked Congress leaders' protest in black clothes over the issues of price rise and unemployment to the party's "appeasement" politics to convey its opposition to the Ram temple foundation laying by Prime Minister Narendra Modi on this day in 2020.

Haryana, Congress members were drenched with water as they marched towards Raj Bhavans. In Mumbai, Congress leaders were detained at the Azad Maidan police station.

Congress MPs created a ruckus in both Houses of Parliament over the alleged misuse of probe agencies and the government "ignoring people's issues". Proceedings were adjourned in both Houses. Clad in black, Congress president Sonia Gandhi led party MPs out of Parliament, as Rahul Gandhi and other MPs shouted slogans. As the MPs proceeded towards Rashtrapati Bhavan, they were bundled into buses. Gandhi and some of his colleagues were taken to the Kingsway Camp police station and

released later.

Before Parliament started, Rahul held a press conference at 9.30 am to attack the Modi government. "What India has built brick by brick, starting almost a century ago, is being destroyed in front of your eyes. Anybody who stands up against this idea of onset of dictatorship is viciously attacked, jailed, arrested and beaten up," he said. "Prices of everything are going up. But the Finance Minister seems unable to see this. Maybe she's been told: 'Just keep talking. Go to any village, town, and they'll tell you high prices is the central livelihood issue. The reality is one thing, and the perception is another. The government is trying to create a perception that everything is ok'."

Rahul said institutions were being undermined. "The opposition fights in a democracy on the basis of having institutions back it. The judicial structure, electoral structure, media... the opposition stands on the basis of these institutions. All of them have been captured by the government. No institution in India is independent."

"There is financial monopoly and institutional monopoly, that is why the opposition is not effective," he said. On BJP's claim that they have been winning elections, he said, "Hitler also used to win elections. He had the entire institutional structure with him. Give me the power on the institutions and I will show you how elections are won."

Govt: US, Australia among 6 countries interested in Tejas

The US, Australia, Indonesia, and the Philippines are among six countries, which have shown interest in India's Tejas aircraft, while Malaysia has already shortlisted the jet under its acquisition programme, the government said on Friday. The other two countries that have evinced interest in the aircraft are Argentina and Egypt, according to Minister of State for Defence Ajay Bhatt. Tejas, manufactured by Hindustan Aeronautics, is a single-engine multi-role fighter aircraft capable of operating in high-threat air environments.

MONSOON SESSION IN THE HOUSE

Railways provided 350K jobs since '14

The Indian Railways had provided employment to 350,204 people so far between 2014 and 2022 and the process of recruiting 140,000 more was currently underway, Railway Minister Ashwini Vaishnaw told the Rajya Sabha. He also said in this year alone 18,000 jobs had been provided.

Bill to strengthen antitrust watchdog tabled in Lok Sabha

The Competition (Amendment) Bill, which seeks structural changes in the governing structure of the Competition Commission of India (CCI), was introduced in the Lok Sabha on Friday. Minister of State for Corporate Affairs Rao Inderjit Singh introduced the Bill seeking substantive provisions to allow the CCI to address the needs of new-age markets. The CCI has in recent times ordered probes and passed orders over alleged unfair business practices in the growing digital market. The New Delhi International Arbitration Centre (Amendment) Bill was also introduced in the Lok Sabha.

FROM PAGE 1

Modi, CMs..

According to sources, discussions on urban governance are likely to include tax reforms which help in raising revenue-generating powers of urban local bodies like municipal corporations and councils, thus making them more financially independent.

It will be the first in-person meeting between Prime Minister Narendra Modi and chief ministers on a common platform since July 2019. The last governing council meeting, in February 2021, was held virtually on account of the pandemic.

Modi during his stint as chief minister of Gujarat was actively advocating improving the revenue collection potential of urban local bodies. "The meeting could work towards achieving some sort of consensus on the issue of reforms and financial health of urban local bodies," said an official.

The PM and CMs are also expected to devote considerable time to agriculture and related subjects, including measures to lower import dependency on several food items. On the National Education Policy (NEP), the official statement said that the implementation of NEP-school education and NEP-higher education could be discussed separately. The success of the NEP depends on the active participation and cooperation of states as education largely falls within the domain of state governments. Also, the NEP has been a contentious issue with some southern states, such as Tamil Nadu, which has declined to implement it on the grounds that its education system and standards are far ahead of the requirement mentioned in the NEP. In the case of crop diversification, too, states have to play a dominant role as agriculture is predominantly a state subject. Here too, the emphasis will be on key cereal-growing

states of Punjab, Haryana, UP, MP, and a few others diversifying from wheat and rice towards more lucrative and in-demand crops, such as pulses and oilseeds. It has been learnt.

Meity looks..

However, these companies have shown interest in shifting part of their capacity at least to India. Apple has already done this for mobile devices. "We believe now that there is a tremendous interest from these companies and others to move some of the production to India and we are engaged with them and we would definitely want to welcome them," said Chandrasekhar.

He said the government is trying to understand what needs to be done to bring them in. "We are looking at whatever disability they have in manufacturing in India and what other access, such as market aggregation, they require to make them invest in India. It is an area of focus," he said.

"Disability" is a reference to the gap between the cost of production in India and the cost in countries like China and Vietnam. The aim is substantially to reduce it as was done in mobile devices through the incentive scheme. HP and Dell are already eligible players under the existing PLI scheme for IT hardware. When contacted, Dell said it could not comment as it was in a "silent period". Apple did not respond to the query.

HP India MD Ketan Patel said: "We are discussing various initiatives with the government to increase local value addition in manufacturing. HP has been manufacturing in India since 2006 and last year, we significantly expanded our manufacturing operations in India, adding a whole range of laptops." Chandrasekhar pointed out that once the national data centre policy is implemented, the cloud in India will grow, as will demand for servers, PCs

and laptops. The government is also looking at creating a secured government cloud in an innovative way and that will also drive demand for IT hardware.

The move is significant as India has been heavily dependent on IT hardware through imports and most of them are from China. According to the latest numbers released by the India Cellular & Electronics Association, imports of laptops and tablet categories to India have seen a sharp 50 per cent increase in the April-June quarter from 76,000 crore in 2021-22 to 1,14,000 crore in 2022-23. Also, a study undertaken by EY pegged the total market for laptops in India in 2019-20 at \$4.85 billion out of which imports accounted for 86 per cent of the market at \$4.21 billion. The domination of Chinese imports is reflected in the fact that the market value of its imports was \$3.65 billion.

Mahindra..

The business leader, who's active on social media, stated that the government is trying to do its bit. "It has announced plans to hire 1 million in government jobs by 2023. Given that we have a 900-million-strong workforce, there's a lot more to do," he said.

The Indian unemployment rate is hovering around 7.8 per cent, he said citing data from CMIE. "This is because job growth has not kept pace with GDP growth," he said. Mahindra raised the issue of employability too. Only 40 per cent of the labour force that is capable of working is actually working or looking for work, he said. In contrast, the labour participation rate is more than 60 per cent in the US, he added. Job creation is happening mainly at the lower end of the gig economy - drivers for Uber delivery for Zomato, that sort of thing in the private sector, he emphasised. "This is not nearly

enough," said Mahindra, adding that the manufacturing needs to be boosted to create jobs on a mass scale and to take advantage of the global factors that are moving in India's favour. Like most of the manufacturing firms, MKM has been at the receiving end of the supply chain disruption. This has been one of the key reasons for the long waiting period for delivery of vehicles. The availability of semiconductors had slowed down to a trickle, he said. On Friday, MKM reported a revenue of ₹9,617 crore for its standalone business, up 67 per cent year-on-year for the June quarter. Its profit after tax was ₹1,430 crore, up 67 per cent YoY.

Elaborating on supply chain issues, he said, "those lamenting the demise of a global supply network are ignoring the fact that the disruption is in the China-dominated global supply network rather than in the true global supply chain."

"Unshackling ourselves from China is a good development for the rest of the world and long overdue. Nature abhors a vacuum, and other countries, including ours, will rush to fill it."

Around 60 per cent of companies and 82 per cent of manufacturers now report their production slowed during the present outbreak, due to lack of employees, inability to obtain supplies, or explicit factory halts resulting from the lockdowns, he said. Companies have learnt the hard way that it is crucial to keep monitoring the supply chain situation, to keep a finger on the pulse and get early signals of any possible disruptions, Mahindra said. "This points to the need for greater digitisation and reliable monitoring software, including perhaps blockchain." He expressed confidence that capital will flow from the West "as global interest in supporting the economically strong India grows".

The domination of Chinese imports is reflected in the fact that the market value of its imports was \$3.65 billion.

Mahindra..

The business leader, who's active on social media, stated that the government is trying to do its bit. "It has announced plans to hire 1 million in government jobs by 2023. Given that we have a 900-million-strong workforce, there's a lot more to do," he said.

The Indian unemployment rate is hovering around 7.8 per cent, he said citing data from CMIE. "This is because job growth has not kept pace with GDP growth," he said. Mahindra raised the issue of employability too. Only 40 per cent of the labour force that is capable of working is actually working or looking for work, he said. In contrast, the labour participation rate is more than 60 per cent in the US, he added. Job creation is happening mainly at the lower end of the economy - drivers for Uber delivery for Zomato, that sort of thing in the private sector, he emphasised. "This is not nearly

enough," said Mahindra, adding that the manufacturing needs to be boosted to create jobs on a mass scale and to take advantage of the global factors that are moving in India's favour. Like most of the manufacturing firms, MKM has been at the receiving end of the supply chain disruption. This has been one of the key reasons for the long waiting period for delivery of vehicles. The availability of semiconductors had slowed down to a trickle, he said. On Friday, MKM reported a revenue of ₹9,617 crore for its standalone business, up 67 per cent year-on-year for the June quarter. Its profit after tax was ₹1,430 crore, up 67 per cent YoY.

Elaborating on supply chain issues, he said, "those lamenting the demise of a global supply network are ignoring the fact that the disruption is in the China-dominated global supply network rather than in the true global supply chain."

"Unshackling ourselves from China is a good development for the rest of the world and long overdue. Nature abhors a vacuum, and other countries, including ours, will rush to fill it." Around 60 per cent of companies and 82 per cent of manufacturers now report their production slowed during the present outbreak, due to lack of employees, inability to obtain supplies, or explicit factory halts resulting from the lockdowns, he said. Companies have learnt the hard way that it is crucial to keep monitoring the supply chain situation, to keep a finger on the pulse and to get early signals of any possible disruptions, Mahindra said. "This points to the need for greater digitisation and reliable monitoring software, including perhaps blockchain." He expressed confidence that capital will flow from the West "as global interest in supporting the economically strong India grows".

Rahul, Priyanka detained as Cong protests price rise

Party stages demonstrations across country; Houses adjourned amid ruckus

ADITI PHADNIS
New Delhi, 5 August

Hordes of Congress leaders, including Rahul Gandhi, Priyanka Gandhi Vadra and leader of Opposition in the Rajya Sabha, Mallikarjun Kharge, all wearing black, were on Friday detained as they protested against inflation and Goods and Services Tax (GST) in Delhi and across the country. They were released after about six hours.

The police dragged Priyanka away from barricades erected near the Congress office at 24 Akbar Road in Delhi and showed her into a van as she said: "The government thinks it can silence us. It thinks that by showing its force, it can make us quietly sit in buses... But we have a purpose," she said.

She told reporters that high prices were pushing people into desperation, and the Narendra Modi government "had distributed largesse to all his friends". She could be seen arguing with the police who urged her to end the protest and go home as no permission had been given for the demonstration. However, she hurried down on the road and refused to move.

Elsewhere in the country, the police used water cannons to disperse protests. In Chandigarh, Punjab and

Congress leader Priyanka Gandhi during a protest as part of the party's nationwide protest over price rise, GST hike on essential items, and unemployment in New Delhi on Friday

Haryana, Congress members were drenched with water as they marched towards Raj Bhavan. In Mumbai, Congress leaders were detained at the Azad Maidan police station.

Congress MPs created a ruckus in both Houses of Parliament over the alleged misuse of probe agencies and the government "ignoring people's issues". Proceedings were adjourned in both Houses. Clad in black, Congress president Sonia Gandhi led party MPs out of Parliament, as Rahul Gandhi and other MPs shouted slogans. As the MPs proceeded towards Rashtrapati Bhavan, they were bundled into buses. Gandhi and some of his colleagues were taken to the Kingsway Camp police station and

released later.

Before Parliament started, Rahul held a press conference at 9.30 am to attack the Modi government. "What India has built brick by brick, starting almost a century ago, is being destroyed in front of your eyes. Anybody who stands up against this idea of onset of dictatorship is viciously attacked, jailed, arrested and beaten up," he said. "Prices of everything are going up. But the Finance Minister seems unable to see this. Maybe she's been told: 'Just keep talking. Go to any village, town, and they'll tell you high prices is the central livelihood issue. The reality is one thing, and the perception is another. The government is trying to create a perception that everything is ok'."

Shah: Protests send anti-Ram temple message

Home Minister Amit Shah on Friday linked Congress leaders' protest in black clothes over the issues of price rise and unemployment to the party's "appeasement" politics to convey its opposition to the Ram temple foundation laying by Prime Minister Narendra Modi on this day in 2020.

Rahul said institutions were being undermined. "The opposition fights in a democracy on the basis of having institutions back it. The judicial structure, electoral structure, media... the opposition stands on the basis of these institutions. All of them have been captured by the government. No institution in India is independent."

"There is financial monopoly and institutional monopoly, that is why the opposition is not effective," he said. On BJP's claim that they have been winning elections, he said, "Hitler also used to win elections. He had the entire institutional structure with him. Give me the power on the institutions and I will show you how elections are won."

Govt: US, Australia among 6 countries interested in Tejas

The US, Australia, Indonesia, and the Philippines are among six countries, which have shown interest in India's Tejas aircraft, while Malaysia has already shortlisted the jet under its acquisition programme, the government said on Friday. The other two countries that have evinced interest in the aircraft are Argentina and Egypt, according to Minister of State for Defence Ajay Bhatt. Tejas, manufactured by Hindustan Aeronautics, is a single-engine multi-role fighter aircraft capable of operating in high-threat air environments.

MONSOON SESSION IN THE HOUSE

Railways provided 350K jobs since '14

The Indian Railways had provided employment to 350,204 people so far between 2014 and 2022 and the process of recruiting 14,000 more was underway, Railway Minister Ashwini Vaishnaw told the Rajya Sabha. He also said in this year alone 18,000 jobs had been provided.

Bill to strengthen antitrust watchdog tabled in Lok Sabha

The Competition (Amendment) Bill, which seeks structural changes in the governing structure of the Competition Commission of India (CCI), was introduced in the Lok Sabha on Friday. Minister of State for Corporate Affairs Rao Inderjit Singh introduced the Bill seeking substantive provisions to allow the CCI to address the needs of new-age markets. The CCI has in recent times ordered probes and passed orders over alleged unfair business practices in the growing digital market. The New Delhi International Arbitration Centre (Amendment) Bill was also introduced in the Lok Sabha.

FROM PAGE 1

Modi, CMs..

According to sources, discussions on urban governance are likely to include tax reforms which help in raising revenue-generating powers of urban local bodies like municipal corporations and councils, thus making them more financially independent.

It will be the first in-person meeting between Prime Minister Narendra Modi and chief ministers on a common platform since July 2019. The last governing council meeting, in February 2021, was held virtually on account of the pandemic.

Modi during his stint as chief minister of Gujarat was trying to understand what needs to be done to bring them in. "We are looking at whatever disability they have in manufacturing in India and what other access, such as market aggregation, they require to make them invest in India. It is an area of focus," he said.

The PM and CMs are also expected to devote considerable time to agriculture and related subjects, including measures to lower import dependency on several food items. On the National Education Policy (NEP), the official statement said that the implementation of NEP-school education and NEP-higher education could be discussed separately. The success of the NEP depends on the active participation and cooperation of states as education largely falls within the domain of state governments. Also, the NEP has been a common issue with some southern states, such as Tamil Nadu, which has declined to implement it on the grounds that its education system and standards are far ahead of the requirement mentioned in the NEP. In the case of crop diversification, too, states have to play a dominant role as agriculture is predominantly a state subject. Here too, the emphasis will be on key cereal-growing

states of Punjab, Haryana, UP, MP, and a few others diversifying from wheat and rice towards more lucrative and in-demand crops, such as pulses and oilseeds. It has been learnt.

Meity looks..

However, these companies have shown interest in shifting part of their capacity at least to India. Apple has already done this for mobile devices. "We believe now that there is a tremendous interest from these companies and others to move some of the production to India and we are engaged with them and we would definitely want to welcome them," said Chandrasekhar.

He said the government is trying to understand what needs to be done to bring them in. "We are looking at whatever disability they have in manufacturing in India and what other access, such as market aggregation, they require to make them invest in India. It is an area of focus," he said. "Disability" is a reference to the gap between the cost of production in India and the cost in countries like China and Vietnam. The aim is substantially to reduce it as was done in mobile devices through the incentive scheme. HP and Dell are already eligible players under the existing PLI scheme for IT hardware. When contacted, Dell said it could not comment as it was in a "silent period". Apple did not respond to the query.

HP India MD Ketan Patel said: "We are discussing various initiatives with the government to increase local value addition in manufacturing. HP has been manufacturing in India since 2006 and last year, we significantly expanded our manufacturing operations in India, adding a whole range of laptops." Chandrasekhar pointed out that once the national data centre policy is implemented, the cloud in India will grow, as will demand for servers, PCs

and laptops. The government is also looking at creating a secured government cloud in an innovative way and that will also drive demand for IT hardware.

The move is significant as India has been heavily dependent on IT hardware through imports and most of them are from China. According to the latest numbers released by the India Cellular & Electronics Association, imports of laptops and tablet categories to India have seen a sharp 50 per cent increase in the April-June quarter from ₹600 crore in 2021-22 to ₹1,000 crore in 2022-23. Also, a study undertaken by EY pegged the total market for laptops in India in 2019-20 at \$4.85 billion out of which imports accounted for 86 per cent of the market at \$4.21 billion. The domination of Chinese imports is reflected in the fact that the market value of its imports was \$3.65 billion.

Mahindra..

The business leader, who's active on social media, stated that the government is trying to do its bit. "It has announced plans to hire 1 million in government jobs by 2023. Given that we have a 900-million-strong workforce, there's a lot more to do," he said.

The Indian unemployment rate is hovering around 7.8 per cent, he said citing data from CMIE. "This is because job growth has not kept pace with GDP growth," he said. Mahindra raised the issue of employability too. Only 40 per cent of the labour force that is capable of working is actually working or looking for work, he said. In contrast, the labour participation rate is more than 60 per cent in the US, he added. Job creation is happening mainly at the lower end of the economy - drivers for Uber, delivery for Zomato, that sort of thing in the private sector, he emphasised. "This is not nearly

enough," said Mahindra, adding that the manufacturing needs to be boosted to create jobs on a mass scale and to take advantage of the global factors that are moving in India's favour. Like most of the manufacturing firms, MKM has been at the receiving end of the supply chain disruption. This has been one of the key reasons for the long waiting period for delivery of vehicles. The availability of semiconductors had slowed down to a trickle, he said. On Friday, MKM reported a revenue of ₹9,617 crore for its standalone business, up 67 per cent year-on-year for the June quarter. Its profit after tax was ₹1,430 crore, up 67 per cent YoY.

Elaborating on supply chain issues, he said, "those lamenting the demise of a global supply network are ignoring the fact that the disruption is in the China-dominated global supply network rather than in the true global supply chain."

"Unshackling ourselves from China is a good development for the rest of the world and long overdue. Nature abhors a vacuum, and other countries, including ours, will rush to fill it." Around 60 per cent of companies and 82 per cent of manufacturers now report their production slowed during the present outbreak, due to lack of employees, inability to obtain supplies, or explicit factory halts resulting from the lockdowns, he said. Companies have learnt the hard way that it is crucial to keep monitoring the supply chain situation, to keep a finger on the pulse and get early signals of any possible disruptions, Mahindra said. "This points to the need for greater digitisation and reliable monitoring software, including perhaps blockchain." He expressed confidence that capital will flow from the West "as global interest in supporting the economically strong India grows".

Rahul, Priyanka detained as Cong protests price rise

Party stages demonstrations across country; Houses adjourned amid ruckus

ADITI PHADNIS
New Delhi, 5 August

Hordes of Congress leaders, including Rahul Gandhi, Priyanka Gandhi Vadra and leader of Opposition in the Rajya Sabha, Mallikarjun Kharge, all wearing black, were on Friday detained as they protested against inflation and Goods and Services Tax (GST) in Delhi and across the country. They were released after about six hours.

The police dragged Priyanka away from barricades erected near the Congress office at 24 Akbar Road in Delhi and showed her into a van as she said: "The government thinks it can silence us. It thinks that by showing its force, it can make us quietly sit in buses... But we have a purpose," she said.

She told reporters that high prices were pushing people into desperation, and the Narendra Modi government "had distributed largesse to all his friends". She could be seen arguing with the police who urged her to end the protest and go home as no permission had been given for the demonstration. However, she hurried down on the road and refused to move.

Elsewhere in the country, the police used water cannons to disperse protests. In Chandigarh, Punjab and

Congress leader Priyanka Gandhi during a protest as part of the party's nationwide protest over price rise, GST hike on essential items, and unemployment in New Delhi on Friday

Haryana, Congress members were drenched with water as they marched towards Raj Bhavans. In Mumbai, Congress leaders were detained at the Azad Maidan police station.

Congress MPs created a ruckus in both Houses of Parliament over the alleged misuse of probe agencies and the government "ignoring people's issues". Proceedings were adjourned in both Houses. Clad in black, Congress president Sonia Gandhi led party MPs out of Parliament, as Rahul Gandhi and other MPs shouted slogans. As the MPs proceeded towards Rashtrapati Bhavan, they were bundled into buses. Gandhi and some of his colleagues were taken to the Kingsway Camp police station and

released later.

Before Parliament started, Rahul held a press conference at 9.30 am to attack the Modi government. "What India has built brick by brick, starting almost a century ago, is being destroyed in front of your eyes. Anybody who stands up against this idea of onerous dictatorship is viciously attacked, jailed, arrested and beaten up," he said. "Prices of everything are going up. But the Finance Minister seems unable to see this. Maybe she's been told: 'Just keep talking. Go to any village, town, and they'll tell you high prices is the central livelihood issue. The reality is one thing, and the perception is another. The government is trying to create a perception that everything is ok'."

Shah: Protests send anti-Ram temple message

Home Minister Amit Shah on Friday linked Congress leaders' protest in black clothes over the issues of price rise and unemployment to the party's "appeasement" politics to convey its opposition to the Ram temple foundation laying by Prime Minister Narendra Modi on this day in 2020.

Rahul said institutions were being undermined. "The opposition fights in a democracy on the basis of having institutions back it. The judicial structure, electoral structure, media... the opposition stands on the basis of these institutions. All of them have been captured by the government. No institution in India is independent."

"There is financial monopoly and institutional monopoly, that is why the opposition is not effective," he said. On BJP's claim that they have been winning elections, he said, "Hitler also used to win elections. He had the entire institutional structure with him. Give me the power on the institutions and I will show you how elections are won."

Govt: US, Australia among 6 countries interested in Tejas

The US, Australia, Indonesia, and the Philippines are among six countries, which have shown interest in India's Tejas aircraft, while Malaysia has already shortlisted the jet under its acquisition programme, the government said on Friday. The other two countries that have evinced interest in the aircraft are Argentina and Egypt, according to Minister of State for Defence Ajay Bhatt. Tejas, manufactured by Hindustan Aeronautics, is a single-engine multi-role fighter aircraft capable of operating in high-threat air environments.

MONSOON SESSION IN THE HOUSE

Railways provided 350K jobs since '14

The Indian Railways had provided employment to 350,204 people so far between 2014 and 2022 and the process of recruiting 14,000 more was currently underway, Railway Minister Ashwini Vaishnaw told the Rajya Sabha. He also said in this year alone 18,000 jobs had been provided.

Bill to strengthen antitrust watchdog tabled in Lok Sabha

The Competition (Amendment) Bill, which seeks structural changes in the governing structure of the Competition Commission of India (CCI), was introduced in the Lok Sabha on Friday. Minister of State for Corporate Affairs Rao Inderjit Singh introduced the Bill seeking substantive provisions to allow the CCI to address the needs of new-age markets. The CCI has in recent times ordered probes and passed orders over alleged unfair business practices in the growing digital market. The New Delhi International Arbitration Centre (Amendment) Bill was also introduced in the Lok Sabha.

FROM PAGE 1

Modi, CMs..

According to sources, discussions on urban governance are likely to include tax reforms which help in raising revenue-generating powers of urban local bodies like municipal corporations and councils, thus making them more financially independent.

It will be the first in-person meeting between Prime Minister Narendra Modi and chief ministers on a common platform since July 2019. The last governing council meeting, in February 2021, was held virtually on account of the pandemic.

Modi during his stint as chief minister of Gujarat was widely credited for improving the revenue collection potential of urban local bodies. "The meeting could work towards achieving some sort of consensus on the issue of reforms and financial health of urban local bodies," said an official.

The PM and CMs are also expected to devote considerable time to agriculture and related subjects, including measures to lower import dependency on several food items. On the National Education Policy (NEP), the official statement said that the implementation of NEP-school education and NEP-higher education could be discussed separately. The success of the NEP depends on the active participation and cooperation of states as education largely falls within the domain of state governments. Also, the NEP has been a contentious issue with some southern states, such as Tamil Nadu, which has declined to implement it on the grounds that its education system and standards are far ahead of the requirement mentioned in the NEP. In the case of crop diversification, too, states have to play a dominant role as agriculture is predominantly a state subject. Here too, the emphasis will be on key cereal-growing

states of Punjab, Haryana, UP, MP, and a few others diversifying from wheat and rice towards more lucrative and in-demand crops, such as pulses and oilseeds. It has been learnt.

Meity looks..

However, these companies have shown interest in shifting part of their capacity at least to India. Apple has already done this for mobile devices. "We believe now that there is a tremendous interest from these companies and others to move some of the production to India and we are engaged with them and we would definitely want to welcome them," said Chandrasekhar.

He said the government is trying to understand what needs to be done to bring them in. "We are looking at whatever disability they have in manufacturing in India and what other access, such as market aggregation, they require to make them invest in India. It is an area of focus," he said.

"Disability" is a reference to the gap between the cost of production in India and the cost in countries like China and Vietnam. The aim is substantially to reduce it as was done in mobile devices through the incentive scheme. HP and Dell are already eligible players under the existing PLI scheme for IT hardware. When contacted, Dell said it could not comment as it was in a "silent period". Apple did not respond to the query.

HP India MD Ketan Patel said: "We are discussing various initiatives with the government to increase local value addition in manufacturing. HP has been manufacturing in India since 2006 and last year, we significantly expanded our manufacturing operations in India, adding a whole range of laptops." Chandrasekhar pointed out that once the national data centre policy is implemented, the cloud in India will grow, as will demand for servers, PCs

and laptops. The government is also looking at creating a secured government cloud in an innovative way and that will also drive demand for IT hardware.

The move is significant as India has been heavily dependent on IT hardware through imports and most of them are from China. According to the latest numbers released by the India Cellular & Electronics Association, imports of laptops and tablet categories to India have seen a sharp 50 per cent increase in the April-June quarter from ₹600 crore in 2021-22 to ₹1,000 crore in 2022-23. Also, a study undertaken by EY pegged the total market for laptops in India in 2019-20 at \$4.85 billion out of which imports accounted for 86 per cent of the market at \$4.21 billion. The domination of Chinese imports is reflected in the fact that the market value of its imports was \$3.65 billion.

Mahindra..

The business leader, who's active on social media, stated that the government is trying to do its bit. "It has announced plans to hire 1 million in government jobs by 2023. Given that we have a 900-million-strong workforce, there's a lot more to do," he said.

The Indian unemployment rate is hovering around 7.8 per cent, he said citing data from CMIE. "This is because job growth has not kept pace with GDP growth," he said. Mahindra raised the issue of employability too. Only 40 per cent of the labour force that is capable of working is actually working or looking for work, he said. In contrast, the labour participation rate is more than 60 per cent in the US, he added. Job creation is happening mainly at the lower end of the economy - drivers for Uber delivery for Zomato, that sort of thing in the private sector, he emphasised. "This is not nearly

enough," said Mahindra, adding that the manufacturing needs to be boosted to create jobs on a mass scale and to take advantage of the global factors that are moving in India's favour. Like most of the manufacturing firms, MKM has been at the receiving end of the supply chain disruption. This has been one of the key reasons for the long waiting period for delivery of vehicles. The availability of semiconductors had slowed down to a trickle, he said. On Friday, MKM reported a revenue of ₹9,617 crore for its standalone business, up 67 per cent year-on-year for the June quarter. Its profit after tax was ₹1,430 crore, up 67 per cent YoY.

Elaborating on supply chain issues, he said, "those lamenting the demise of a global supply network are ignoring the fact that the disruption is in the China-dominated global supply network rather than in the true global supply chain."

"Unshackling ourselves from China is a good development for the rest of the world and long overdue. Nature abhors a vacuum, and other countries, including ours, will rush to fill it."

Around 60 per cent of companies and 82 per cent of manufacturers now report their production slowed during the present outbreak, due to lack of employees, inability to obtain supplies, or explicit factory halts resulting from the lockdowns, he said. Companies have learnt the hard way that it is crucial to keep monitoring the supply chain situation, to keep a finger on the pulse and get early signals of any possible disruptions, Mahindra said. "This points to the need for greater digitisation and reliable monitoring software, including perhaps blockchain." He expressed confidence that capital will flow from the West "as global interest in supporting the economically strong India grows".
