Subject: Intimation under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (SEBI LODR) – Update on current Operational status of the Company in view of recent Geopolitical Developments

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, and in view of the recent geopolitical developments in the Middle East and the resulting volatility observed in global markets, we wish to provide the following update regarding the current operational status of Carysil Limited.

The operations of the Company continue to remain stable and uninterrupted. Our manufacturing facilities are operating normally, supported by robust infrastructure and operational flexibility, including dual fuel capability through PNG and LDO.

Further, the Company has a well-established and resilient supply chain, and as on date, no material disruption has been experienced in the procurement of raw materials or dispatch of finished goods.

While there has been a recent increase in global freight costs due to prevailing geopolitical conditions, based on the Company's current assessment, the overall impact on the Company's operations and financial performance is not material. It may also be noted that approximately 90% of the Company's export sales are conducted on an FOB basis, thereby limiting the direct exposure of the Company to fluctuations in freight costs.

The Company continues to closely monitor the evolving geopolitical situation and will take appropriate measures, if required, to safeguard operational continuity and supply chain stability.

This disclosure is being made in order to keep the stock exchanges and investors appropriately informed.

For **Carysil Limited**

Reena Shah
