The above information will also be made available on the Company's website at www.aimtron.in.

Thanking you,
Yours faithfully,

FOR AIMTRON ELECTRONICS LIMITED

Priyanka Shah
Company Secretary

Aimtron Electronics Achieves AS9100D Certification; Secures Defense & UAV Orders — Unlocks High-Value Aerospace & Defense Growth

Vadodara, India — October 13, 2025:

Aimtron Electronics Limited has achieved the AS9100D certification, the global benchmark for quality management in aerospace, aviation, and defense.

The company has simultaneously secured its orders from a Navratna PSU in defense communication, Electronic warfare systems along with pre-eminent market leaders in the Indian Unmanned Aircraft system or Indigenous UAVs solution provider, marking tangible traction in India's rapidly expanding defense and aerospace electronics ecosystem.

This milestone positions Aimtron among a select group of Indian ESDM companies qualified to serve regulated, high-reliability markets, reinforcing its precision-engineering capability and commitment to Make in India and Atmanirbhar Bharat.

Strategic Impact

- Access to premium programs: Certification enables participation in Tier-1 OEM and defense contracts, expanding Aimtron's entry into long-cycle, high-margin projects.
- Margin expansion: Aerospace and defense programs deliver structurally higher realizations, improving profitability and cash-flow resilience.
- Competitive differentiation: AS9100D elevates Aimtron as a globally compliant, mission-ready partner with advanced traceability, process control, and risk management.
- Capacity synergy: The new greenfield facility—with expanded SMT lines, Box Build, and ODM capabilities—amplifies certification benefits, positioning Aimtron as a complete design-to-delivery partner.
