Subject: Step down Subsidiary Update – Aimtron International Controls LLC (AIC) Achieves Highest-Ever Q2 Order Bookings in its History

Dear Sir/Madam,

We are pleased to inform you that Aimtron International Controls LLC (“AIC”), step down subsidiary of Aimtron Electronics Limited, has bagged US\$11.8 million in order bookings during the second quarter.

A copy of the press release titled “Aimtron International Controls LLC (AIC) Achieves Highest-Ever Q2 Order Bookings in its History” is enclosed for your information and records.

The above information will also be made available on the Company's website at www.aimtron.in.

Thanking you,

Yours faithfully,

FOR AIMTRON ELECTRONICS LIMITED

Priyanka Shah
Company Secretary & Compliance Officer

Aimtron International Controls LLC (AIC) Achieves Highest-Ever Q2 Order Bookings in its History

More than twice ICS's historical quarterly average by bagging orders worth Us 11.8 million with addition of five new customers

Vadodara, September 17, 2026: Aimtron Electronics Limited, an Electronics System Design and Manufacturing (ESDM) and Original Design Manufacturing (ODM) company, announced that Aimtron International Controls LLC ("AIC"), part of Aimtron Group's U.S. operations, has bagged US\$11.8 million in order bookings during the current quarter as of September 17, 2026, with the quarter still underway.

The acquired business, previously operating as ICS, has an operating history spanning more than 25 years and historically recorded average quarterly order bookings of less than US\$4 million. Following its acquisition by Aimtron and the commencement of operations under AIC on February 1, 2026, current-quarter bookings have surpassed US\$11.8 million—more than twice the historical quarterly average.

The milestone marks a significant step in the growth of the business under Aimtron ownership.

Strong contribution from ruggedized electronics customers

Order bookings were driven primarily by ruggedized electronics customers, including programmes involving rugged electronics for demanding operating environments.

AIC also added five new customers during the quarter, expanding its customer base.

Building on ICS's foundation under Aimtron ownership

The progress builds on ICS's established customer relationships, experienced team and manufacturing capabilities. Under AIC, the focus is on strengthening these capabilities through Aimtron's broader engineering, sourcing, manufacturing and customer-development resources.

This development supports Aimtron 2.0, the Group's broader growth vision, including the development of an integrated India-USA manufacturing platform. Strengthening the U.S. business is an important part of this strategy, supporting closer customer engagement and local manufacturing alongside the Group's global capabilities.

Mukesh Vasani, Chairman, Aimtron Electronics Limited, said:

"ICS built a strong foundation over more than 25 years. Since bringing the business into Aimtron and starting operations under AIC in February 2026, our focus has been to preserve its strengths, support the team and create new opportunities for growth."

*Aimtron Electronics Limited is a public company listed on the Bombay Stock Exchange (BSE) under the symbol AIMTRON.

“Bagging order of US\$11.8 million in bookings this quarter, compared with a historical quarterly average of less than US\$4 million, is an encouraging milestone. Adding five new customers makes this progress even more meaningful.

“I thank our customers for their trust and our team for their dedication. Our priority now is to execute these orders with quality, discipline and timely delivery, while building long-term customer relationships. This is an important step in our Aimtron 2.0 journey.”

The increased order bookings provide greater visibility into future manufacturing activity. Order bookings represent customer orders received and do not constitute revenue recognised during the quarter. Revenue recognition will depend on execution, delivery schedules and applicable accounting requirements.

About Aimtron Electronics Limited

Aimtron Electronics Limited is an India-listed ESDM and ODM company providing end-to-end electronics solutions spanning design, engineering, prototyping, PCB assembly, manufacturing, box-build, system integration and testing. Through its Indian operations and U.S. group businesses, Aimtron supports global customers requiring reliable engineering and manufacturing capabilities. Its Aimtron 2.0 vision includes building an integrated India–USA platform to support customers from product development through scalable production.

About Aimtron International Controls LLC

Aimtron International Controls LLC (“AIC”) is part of Aimtron Group’s U.S. operations. The acquired business previously operated as ICS and brings more than 25 years of operating experience, established customer relationships and electronics manufacturing capabilities. Operations under AIC commenced on February 1, 2026, following the acquisition by Aimtron.

AIC owns a manufacturing facility spanning more than 60,000 square feet on a four-acre site, with four SMT lines and room for future expansion.

These investments reinforce Aimtron’s commitment to strengthening its U.S. manufacturing operations and supporting larger, more complex customer programmes.

Thank you.

Mukesh Vasani, CEO
Aimtron Group
