## Aimtron Electronics Ltd. Announces Significant IIoT & AI Device Order from Vanix Technologies

**Mumbai / New Delhi** — Aimtron Electronics Ltd is pleased to inform its shareholders and the investing community that it has recently secured a major order from Vanix Technologies to manufacture 50,000 Industrial Internet of Things (IIoT) and Artificial Intelligence (AI) devices under a Memorandum of Understanding (MoU) signed in December 2024.

### Key Highlights:

- **Production Scope & Timeline:**

The first production batch is scheduled to commence in October 2025, with delivery targeted for completion by the end of the year.

- **Strategic Scale-Up:**

Over the next five years, Aimtron is expected to manufacture between 250,000 and 2 million IoT devices, reinforcing its leadership in India's electronics manufacturing ecosystem.

- **Alignment with National Initiatives:**

This collaboration aligns seamlessly with the Government of India's flagship Make in India and Atmanirbhar Bharat missions, underscoring Aimtron's commitment to supporting India's electronics self-reliance and smart manufacturing goals.

- **Leadership Endorsements:**

Mukesh Vasani, Founder & Chairman of Aimtron Electronics, stated that the partnership aligns firmly with the company's vision to boost India's status as a global electronics manufacturing hub.

Ashwani Rana, CEO of Vanix Technologies, highlighted that the collaboration merges Aimtron's manufacturing expertise with Vanix's innovation to address India's growing digital infrastructure needs in the IIoT sector.

- **Market Opportunity:**

The Indian IIoT market is forecasted to reach US\$ 7.12 billion in 2025 and grow at a robust CAGR of 21.18% to reach US\$ 15.35 billion by 2029, presenting a strong growth trajectory and sizeable opportunity for Aimtron and its stakeholders.

### Corporate & Investor Impact

This order significantly enhances Aimtron's growth trajectory and production pipeline, while the ramp-up in manufacturing is expected to generate meaningful employment opportunities as operations expand to meet delivery timelines. The development marks a strategic milestone in the company's mission to scale operations, reinforce its domestic and international presence, and further its integrated ESDM (Electronics System Design & Manufacturing) capabilities.
