Dear Sir,

Sub: Press Release - Alstom T&D India reinforces its leadership in 765 kV Alternating Current Extra High Voltage technology with two new contracts worth 2250 MINR

Please find enclosed herewith Press Release titled – “Alstom T&D India reinforces its leadership in 765 kV Alternating Current Extra High Voltage technology with two new contracts worth 2250 MINR.”

Thanking you,

Yours faithfully,
For ALSTOM T&D India Limited

Manoj Prasad Singh
Company Secretary

Encl : As above

14 June 2012

Alstom T&D India reinforces its leadership in 765 kV Alternating Current Extra High Voltage technology with two new contracts worth 2250 MINR

Alstom T&D India has been awarded two contracts from Power Grid Corporation of India Limited (PGCIL)-the central transmission utility of the country, worth of 2250 MINR. The contract worth 750 MINR is for supply, testing, erection and commissioning of 765 kV auto transformers for substation of PGCIL at Ranchi in the state of Jharkhand (Eastern India) and another contract worth 1500 MINR is for supply, erection, testing and commissioning of 765 kV auto transformers for Dharamjaygarh and Aurangabad substations of PGCIL in the states of Chattisgarh (Central India) and Maharashtra (Western India) respectively which is the largest order for the company in the auto transformer segment.

Alstom T&D India has received an order for delivering 500 MVA 765 kV single phase auto transformers for the substations. The project will help in establishing transmission systems for upcoming independent power producer (IPP) projects and efficient bulk power evacuation.

Transformers will be delivered from Alstom T&D India's world class manufacturing facility at Vadodara in Gujarat state, western India. The facility has been operational since April 2009 and was a pioneer in building India's first indigenous 765 kV transformer in 2010. Alstom T&D India holds strong leadership in 765 kV Alternating Current technology with all products manufactured locally and is geared to build the backbone of India's future electrical grid at 765 kV voltage level.

Rathin Basu, Managing Director, Alstom T&D India, declared, *"These new contract are an opportunity for us to associate with Power Grid in strengthening the backbone of the country. Alstom T&D India took early initiatives in 2007, by making investments in three state-of-the-art manufacturing units that are now delivering a full range of advanced engineering products in 765 kV EHV and 1200 kV UHV levels."*

About Alstom

Alstom is a global leader in the world of power generation, power transmission and rail infrastructure and sets the benchmark for innovative and environmentally friendly technologies. Alstom builds the fastest train and the highest capacity automated metro in the world, provides turnkey integrated power plant solutions and associated services for a wide variety of energy sources, including hydro, nuclear, gas, coal and wind, and it offers a wide range of solutions for power transmission, with a focus on smart grids. The Group employs 92,000 people in around 100 countries. It had sales of €20 billion and booked close to €22 billion in orders in 2011/12.

Alstom T&D India (globally known as Alstom Grid), is a market leader in the Indian power transmission sector. It has over 100 years of expertise in building the transmission infrastructure for the country. Alstom has a strong portfolio of products, solutions and services, comprising the entire range of transmission equipment up to Extra and

Ultra High Voltages (765 kV and beyond) including air-insulated switchgear (AIS) and locally manufactured power transformers and gas-insulated switchgear (GIS). It also provides power electronics solutions (HVDC, FACTS) to create super highways and offers highly advanced power management Smart Grid solutions for transmission and distribution including renewable energies integration. With over 3,500 employees and eight world class manufacturing units, Alstom T&D India is future ready to support the rapidly evolving transmission sector in India.
