Sub.: Press Release of the Company

Ref.: Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ('Listing Regulations')

Dear Sir / Madam,

We refer to our earlier Press Release filed today i.e. November 12, 2026 titled "**Kalyani Strategic Systems Unveils 120mm R.A.M.S, the Rapid Attack Mortar System - Another Step Toward Making Bharat Safe**".

Please find attached revised Press Release, titled "**Kalyani Strategic Systems Announces the Advancement of its Program for 120mm Rapid Attack Mortar System Mounted on Vehicle Platform - Another Step Toward Making Bharat Safe**" with slight modifications in the earlier version.

Kindly take the same on your record.

Thanking you,

Yours faithfully,
For Bharat Forge Limited

FOR IMMEDIATE RELEASE

Kalyani Strategic Systems Announces the Advancement of its Program for 120mm Rapid Attack Mortar System Mounted on Vehicle Platform
- Another Step Toward Making Bharat Safe -

Vehicle-integrated 120mm mortar designed to deliver rapid, protected fire support at high altitude and in all weather, for the Indian Armed Forces and International Customers

India | November 12, 2026: Kalyani Strategic Systems Limited (KSSL), the wholly-owned defence subsidiary of Bharat Forge Limited, today announced its advancement of program for the development of the **120mm R.A.M.S - the Rapid Attack Mortar System mounted directly on an agile 4x4 vehicle platform ("R.A.M.S")**. R.A.M.S is designed to give mobile forces powerful, rapid-response mortar fire that **keeps pace with future warfare strategies**. It marks another step in KSSL's commitment to a **Bharat that is secure, self-reliant and prepared to meet any threat to its sovereignty**, and to **partner nations that must protect their people against hostile threats**.

Fires from the vehicle. With R.A.M.S - the mortar integrated on the platform, crews can transition from march-to-fire mission in moments, and relocate before the adversary can respond. By **removing the need to dismount** and emplace the mortar, the system is designed to reduce crew exposure, compress the sensor-to-shooter cycle and keep the detachment protected throughout the engagement - **faster response, greater mobility and improved crew safety.**

Built for the hardest terrain. R.A.M.S is being engineered to retain its mobility at high altitude and its readiness through extreme cold, heat and monsoon. From mountain passes to desert and plains, R.A.M.S brings 120mm firepower to terrain where towed systems are slow to deploy and demanding to sustain.

Designed for future warfare. R.A.M.S is shaped by the realities of future conflict: persistent surveillance, compressed targeting cycles and a premium on survivability. Speed, mobility and shoot-and-scoot agility define the system, which is designed to give commanders a decisive edge in contested environments and a platform with the headroom to evolve with the threat.

Made in India, for the world. Designed and developed in India for the Indian Armed Forces and International Customers, R.A.M.S aims to advance Aatmanirbhar Bharat and reinforce India's growing standing as a **trusted indigenous design-manufacturer and exporter of advanced defence platforms**.

Mr. Amit Kalyani, Vice Chairman and Joint Managing Director, Bharat Forge Ltd, the parent company of KSSL, said, "Deepawali celebrates the triumph of light and the protection of all we hold dear. Our purpose at KSSL is to keep Bharat safe, and to stand with nations facing hostile aggression. R.A.M.S is being designed to give our armed forces credible, responsive capability at high altitude and in the most challenging conditions, while keeping our soldiers protected. We design for the challenges ahead - we design and build in India, for India and for our partners around the world. This is **Aatmanirbhar Bharat** in action, and another step towards a **Sushakt Bharat, Surakshit Bharat**."

As India celebrates the festival of lights, R.A.M.S program reiterates KSSL's conviction that national security begins with technology built for national security and protection, and its commitment to a Bharat and partner nations that stay safe, strong and prepared.

About Kalyani Strategic Systems Limited

Kalyani Strategic Systems Limited (KSSL), a wholly owned subsidiary of Bharat Forge Limited, drives the defence business of the Kalyani Group, one of the world's foremost engineering and metallurgical enterprises. With more than six decades of expertise in design, engineering, metallurgy and advanced manufacturing, KSSL delivers sovereign defence capability across the land, marine

and unmanned domains - spanning artillery systems, armoured and protected vehicles, small arms, ammunition, and marine and unmanned platforms. Beyond supplying battle-ready systems, KSSL enables partner nations to build their own defence industrial base through technology partnership, local industrialisation and assured through-life support, backed by proven production at scale and security of supply. Trusted by both Indian and global armed forces and governments seeking resilient, self-reliant capability, KSSL is a trusted global defence partner of choice.

About Bharat Forge

Bharat Forge Limited (BFL), a Pune-based multinational company, is a technology-driven global leader in providing innovative, high-performance and safety-critical components and solutions across automotive, aerospace, defence, rail, marine, energy and industrial sectors. With a global manufacturing footprint and world-class engineering capabilities, BFL is at the forefront of supporting India's strategic industrial and defence ambitions.
