PRESS RELEASE

Bharat Forge and Turgis Gaillard to propose AAROK on India's MALE UAV requirements

Paris Airshow, Le Bourget, the 17th day of June 2025- Indian company, Bharat Forge Ltd. and French company Turgis Gaillard have today signed a memorandum of understanding to offer AAROK UAV in alignment to the Indian Ministry of Defence.

AAROK is a MALE-class UAV developed to offer the best available technology at the lowest acquisition and deployment cost. Flying at high altitude and for long periods, it performs long-range surveillance missions. Its electromagnetic sensors and radar enable it to monitor the enemy while remaining stand off from the threats.

AAROK is permanently connected to command & control systems and other military assets, transmitting the information needed to establish an up-to-date tactical situation.

With a payload of over 1.5 tonnes of weapons fired from a safe distance, AAROK also makes a decisive contribution to supporting multi-domain operations by striking far behind enemy lines, disrupting enemy defences and neutralising their surface-to-air defence systems.

Flying for more than 24 hours, AAROK will finally reinforce India's assertion of sovereignty over its territorial waters by detecting incursions and monitoring ongoing activities.

A leading company in India's defence industry, an expert in managing complex programmes and a trusted partner of the Indian armed forces, Bharat Forge will establish an AAROK production line on site. These production capabilities will help meet the significant needs of the Indian armed forces with local production and ensure complete sovereignty on maintenance and overhaul operations.

With AAROK, Turgis Gaillard and Bharat Forge are offering the Indian armed forces an advanced, robust and scalable MALE UAV designed to act as a force multiplier in a connected battlefield.

About Bharat Forge

Bharat Forge Limited (BFL), a Pune-based Indian multinational, is a technology driven global leader in providing high performance, innovative safety critical components and solutions for several sectors including automotive, power, oil and gas, construction & mining, rail, marine, defence and aerospace. BFL has global manufacturing footprint with presence across five countries, with the largest repository of metallurgical knowledge and offers full service supply capability to its geographically dispersed marquee customers from concept to product design, engineering, manufacturing, testing and validation.
